PHILADELPHIA.

Selected for "The Friend."

In Epistle from the Yearly Meeting of Friends, held in Philadelphia, to its Members.

Impressed with the serious evils resulting from the present unsettled and disunited condition of our religious Society, and painfully convinced that the innovations made on the doctrines and testimonies held by Friends ever since they were gathered to be a distinct people, have not only broken up the harmony that once existed throughout the body, but that they are also leading those who adopt them away from the Scriptural, self-denying religion promulgated by our forefathers, and assimilating them to the more outward belief and practices of other professors, we are concerned once more to address our fellow-members. It is our earnest desire not to fall short in the performance of our duty, so far as we may be enabled, to guard them from the dangers which abound, and to induce them, by living up to the requirements of our holy religion, to build upon Christ Jesus, the Rock of ages and foundation of many generations.

In the Address issued by our Yearly Meeting in 1868, some of the more important doctrines and testimonies held by Friends are set forth, and several of the pervasions of and innovations upon them that have crept into the Society of latter time, are pointed out and testified against. To this document we would again call the attention of our members, without reiterating what was then said respecting those innovations, nor the concern of the Yearly Meeting in relation to their existence and spread. But we may not shut our eyes to the fact that other and more mature fruits, springing from the same root as was then warned against, have been and still are being produced.

The fear then tenderly expressed relative to the character of many of what are called Bible schools, and their tendency to foster undue activity in things supposed to belong to the knowledge and spread of the gospel, has been confirmed and increased by the conviction, that while the teaching and study thus pursued, irrespective of the unfoldings of the Holy Spirit, often lead to a knowledge that puffeth up rather than edifieth, this has induced some to introduce into our meetings for worship that which they have thus attained, under the character of gospel ministry, and that this source of spiritual weakness is often painfully apparent.

The appointment of meetings specially for social prayer, predetermining in some cases what is to be prayed for, and the inducements held out, at

times, in these and other meetings, to engage individuals, or even the whole company, to go on their knees and utter supplications, also encouraging them to make what is termed open *confession and consecration*, or to recite their religious experiences; however they may be plead for as being practised among some other religious Societies, we are persuaded are fitted to awaken mere emotional excitement, rather than that deep, heartfelt, spiritual exercise which we believe an essential qualification for such engagements, and which, when experienced, is always the effect of the immediate operation of the Holy Spirit; and, therefore, that their tendency is to hinder the work of true religion in the heart.

The weakening, stumbling effect of a disregard of that plainness of dress and manners which, from the earliest days of our Society, has distinguished Friends from the community around them, becomes more and more apparent, as the door which it opens invites to departures from other of our Christian testimonies, and by the excuse it furnishes to the young or inexperienced—when those occupying conspicuous positions in meetings indulge in it—to comply with the vain fashions and customs of the world: thus giving evidence that the change has its origin in a desire to shun the cross, and escape the mortification of being thought singular or narrow-minded.

While believing that there is a making melody in the heart, and a singing thus with the spirit and with the understanding, we cannot approve or give countenance to the introduction of singing or music into our meetings for worship. As Friends cannot adopt a form of words prepared beforehand and committed to memory, to be recited in meeting as an act of worship, so we believe such productions cannot be rendered less objectionable by singing them; while by acting on the natural senses and feelings, vocal or instrumental music may deceive into the supposition that the solemn act of worship has been performed, when the right preparation of the heart therefor has been unfulfilled. The practice is one which, with the exception of a very few instances occurring among the early converts in its infancy, Friends as a Society have discarded ever since their rise, though within a short time attempts have been made to introduce it in some meetings.

Highly as Friends have ever esteemed the Holy Scriptures, and strongly as they have urged upon the members to make themselves familiar with their contents, yet we believe the practice of reading them in meetings for Divine worship is out of place; as not constituting a part of worship, and that it ought not to be sanctioned.

The introduction of these innovations among us has naturally led to a close association of many with members of other Societies, engaging with them in what is termed religious or mission work, and thereby the hands of such have become weakened, so that the testimony Friends are required to bear against a hiring ministry, and against a ministry that can fix its own time for preaching and praying on what subject it will

speak or pray, and what it will do or leave undone, at its pleasure, has been either greatly lowered or let fall to the ground.

Believing the practices referred to to be inconsistent with the principles of Friends relative to ministry, prayer, the exercises proper in our meetings for worship, and our not being conforming to this world, we feel bound to declare our disunity with them, whether practised by our own members, or by others coming among us, whose conduct or appearance set at naught these testimonies, as ever held by Friends. It is with sorrow that we have felt ourselves called at this time to refer to these departures, and in gospel love we would caution our fellow-members against giving them sanction. They are alarmingly tending to carry many back to the observance of the beggarly elements and ordinances out of which the Lord Almighty brought our forefathers; and we affectionately entreat those who may have been incautiously led into them, to give up a course which must disqualify them to unite in a consistent maintenance of all our doctrines and testimonies. We earnestly desire an increase of true gospel fellowship, and Christian concern to watch over one another for good; that so unity and strength may be increased "to stand fast in one Spirit, with one mind, striving together for the faith of the gospel."

While thus expressing our disunity with these changes recently brought into the Society, and affectionately warning our members against them, under a full belief that they are adverse to the Scriptural and spiritual principles which have characterized the profession of Friends, we are impressed with a clear sense that they are not the only causes of that want of the life and power of the religion of Christ which is too prevalent among us. It cannot be denied that many of our members are living much below the high standard of the profession they make as Friends. That through the blinding, benumbing influence of the god of this world, many are so engrossed with its cares, its lusts, its friendships, and its deceitful riches, as to be lukewarm and careless about the great work of the regeneration and sanctification of their souls; which can be effected only by the transforming, creative power of Christ, the living and eternal Word, through the instrumentality of his Holy Spirit. Our Lord hath plainly taught that the gate by which the way to heaven is entered is straight, and the way itself is narrow; that whosoever forsaketh not all that he hath, cannot be his disciple; and that he that taketh not his cross and followeth after Him, is not worthy of Him. These declarations of the Author of eternal salvation make it evident that all who are in earnest in seeking that salvation, must submit to the crucifixion of self, with all its deceitful lusts, and to renunciation of the pomps and vanities, the corrupt maxims and manners of the world, which is at enmity with God. The whole teaching of our Saviour inculcates that self-denial, humility, meekness, willingness to suffer for righteousness' sake, in short, holiness before the Lord, are inseparable from a thorough compliance with the terms of

discipleship, and that the struggle for their attainment, by the aid of Divine Grace, is obligatory on all who name the name of Christ.

This was fully recognized by those who were instrumental in the Lord's hand in first gathering our religious Society; and by close attention to the "discoveries of the Light of Christ, and unreserved obedience thereto, the faithful among them were enabled to perfect holiness in the fear of the Lord, and with the spiritual weapons of their warfare, to become mighty through God, to the pulling down strongholds of sin.

With these truths before us, though under a sense of our own frailty and imperfection, we would tenderly but earnestly press the query home on every member, how nearly he or she is living up to the terms of discipleship, and thus manifesting in life and conversation the fruits of the Spirit? This inquiry can be answered truly, only as we seek in sincerity to be searched by that Light which makes manifest, and shows whether our deeds are wrought in God, yea or nay.

We doubt not that the truth of the declaration of our Saviour, "Except a man be born again, he cannot see the kingdom of God," is freely admitted by all of us. It should, therefore, be the primary object of our lives to experience this new birth; which is "not of blood, nor of the will of the flesh, nor of the will of man, but of God."

(To be concluded.)

Selected.

Coney.

Heb. *shaphan*; *Hyaena sylvatica* of naturalists.

The Hebrew name signifies "the hider," and it is known in Southern Arabia by a similar name, "*thofna*," though in Palestine and Sinai it is called "*weber*." It must not be confounded with the rabbit, sometimes called the coney in England, for no species of rabbit is found in Palestine or Arabia. It was forbidden as food to the Israelites. "The coney because he cheweth the cud, but divideth not the hoof; he is unclean unto you." (Lev. xi. 5; Dent. xiv. 7). In Ps. civ. 18, we read: "The high hills are a refuge for the wild goats, and the rocks for the conies;" and in Prov. xxx. 24, 26, "There be four things which are little upon the earth, but they are exceeding wise. . . . The conies are but a feeble folk, yet make they their houses in the rocks."

The hyrax or coney is a very singular creature, standing quite alone in its structure and anatomy. Although no bigger than a rabbit, and clothed with fine soft fur, it is neither a ruminant nor a rodent, but is classed by naturalists between the hippopotamus and the rhinoceros. Yet in its habits and manners it is very like a rabbit. It has a round head, short round ears, a tail which is so short it can scarcely be detected at all; its fur is a reddish brown or tawny, with a single oblong pale spot on the centre of its back, and lighter on its belly. All over its body a few long black hairs stand out from the fur. Its incisor teeth are conspicuous, chisel-shaped, exactly like those of the hippopotamus. It has no claws, but the four toes of its fore feet and the three of its hind feet are furnished with tiny hoofs, shaped like those of the river-monster. There are only three species known; one in South Africa, another in Abyssinia, and the third the Syrian hyrax.

Some difficulty has been raised respecting the prohibition in Leviticus, where the coney is forbidden as food, though "he cheweth the cud," whereas it is not a ruminant at all. The Hebrew

word, however, merely means "to re-chew," and does not necessarily imply the possession of a ruminant stomach. But the lawgiver speaks according to appearances, and no one can watch the constant motion of the little creature's jaws, as it sits continually working its teeth, without recognizing the naturalness of the expression.

The habits of the coney are very accurately portrayed in the Psalms and in Proverbs. It does not, like the rabbit, scoop out a burrow for itself, but lives in holes in the rocks, where it makes its nest and conceals its young, and to which it retires at the least alarm. They are a feeble folk, and though they will attempt to bite when seized in their holes, yet their efforts are not very formidable. But their wariness is great. "They are exceeding wise." Being in some degree gregarious, they never feed without having sentries on the lookout, and on the approach of danger a short squeak from the lookout sends the whole party instantly to their retreat. F. K. Holland, who observed them in Sinai, writes: "Though I several times saw single conies in Sinai, I only twice came upon any large number together. . . . One, when crossing a mountain pass, I was startled by a shrill scream near me, but could see nothing. On my return in the evening, I approached the place cautiously, and saw eight conies out, playing like rabbits. I watched them for some minutes before they saw me. At length one caught sight of me, and immediately uttered its scream, and all at once rushed to their holes. On another occasion I saw about twelve out feeding at a different spot, but on neither occasion did I see any appointed guard. They had runs like rabbits leading some little distance from their holes."

The coney has been supposed to be very rare in the Holy Land, though common in Arabia Petraea. We, however, found it in many parts, and in some plentiful. It inhabits the gorge of the Leontes, in Northern Galilee, the Ladder of Tyre, south of the Plain of Phœnicia, the Wady Kurn, leading out of the Plain of Acre. It is extremely common in the gorge of the Kedron, from Marsaba eastward, and all down the west side of the Dead Sea. In all the places named we detected it ourselves. They are but a feeble folk, but in these districts the stony rocks are their refuge, and tolerably secure they are in them. No animal ever gave us much trouble to obtain. They are far too wary to be taken in traps, and the only chance of securing one is patiently to lie concealed, about sunset or before sunrise, on some overhanging cliff, taking care not to let the shadow be cast below, and there to wait till the little creatures cautiously peep forth from their holes. I had the good fortune to see one feeding in the gorge of the Kedron, and here to watch it as it sat at the mouth of its hole ruminating, metaphorically if not literally, while waiting for sunset. Our Arabs obtained several other specimens for us near the Dead Sea.

We got one with six and another with three young; and four seems to be the ordinary number at a birth.

They make a nest of dried grass and fur, in which the young are buried like those of a mouse. The flesh is much prized by the Arabs. We found it good, but rather dry and insipid, as dark in color as that of the hare. It is said in winter to feed only at noon, and at other times at dawn and sunset. We saw them at all times of the day, but mostly in the early morning, and in this respect they seem very closely to resemble the rabbit.—*Tristram's Natural History of the Bible.*

Sarah R. Grubb, in 1784, thus writes: "A multiplicity of concurring circumstances, past and in prospect, have of late deeply affected me: the spirit of Goliath rages from every quarter; its power I feel, the low state of the church is evident, and my own weakness stares me in the face * * * and though retirement is what above all things I would choose for myself, yet, if I apprehend myself called to service at all, it is the fervent prayer of my spirit to be preserved therein from the fear of man, and from doing the work deceitfully; nevertheless, the secret feelings of my mind seem to say to the seed, that 'bonds await you.' May we then possess ourselves in patience, and not fear in seasons appointed to contend for the truth."

I recollect Sarah L. Grubb in Birmingham Meeting, England, addressing the concerned Friends under the trials awaiting them (in the presence of the late Edward Ash) with strong emphasis, that it was not for them to say "a confederacy, to all them that say a confederacy," intimating that their strength would not lie in that, but their unity and strength lay in each simply attending to the Divine Monitor within; and although in our day it is to some exceedingly trying to sit-one of our meetings, where there is so much of the mere creaturely actings, yet things are not worse than when Elijah said, "I alone was left a prophet in Israel, and they sought his life to take it away." The Lord, in his own time, will raise up his own truth over all that which opposes it. It may be well to remember what is left on record concerning good old Jacob, when he had to meet Esau, how he wrestled even to the breaking of the day—he wrestled until he prevailed; as a prince he had power, and his name was called Israel, so that Esau fell on his neck and kissed him; but previously to this he was in a great strait and deeply humbled, which caused him thus to seek to his God.

Although I was educated in the so-called "Church of England," yet from my earliest recollections I was in the habit of retiring to secret places, there to wait in retirement before the Lord, who wondrously opened my understanding, and instructed me so that I believed that I might commune with God, Abraham, Isaac and Jacob did, and that he could reveal his will to me as he did to them, and thus revealing from time to time. I ventured to state my views to a preacher, he told me I was a Quaker, yet I knew nothing of them or their principles. So that it appears to me needful for all to wait only upon God, and as we are obedient to his manifestations, we shall grow in grace, and he will dwell in us and will guide us continually, and whatever may befall his church or people, it will be eventually overruled for his glory and their sanctification; and although many may fall, yet I believe he will lead others who seek him, and those testimonies, doctrines and principles which he led our fathers and mothers in the truth into, will be gladly upheld by his faithful followers. May all my dear Friends everywhere, especially the younger, not faint or grow weary in the truth, but stay themselves upon the "mighty God of Jacob," who will yet raise up, qualify, and send forth a loyal band, even as he did Gideon of old, who felt himself weak and unworthy, yet was eventually made the champion to lead the band which were made victorious to over-

come their enemies. May all "gird up the loins of their minds, be sober and hope to the end." S. C.

Orleans Co., N. Y., 4th mo. 8th, 1876.

Japanese Paper.

In Japan, paper finds a very wide field of usefulness outside of the commoner but perhaps more important applications, for writing, printing, wrapping and wall papers. The peculiar strength and toughness of Japanese paper fit it for many uses which would hardly be anticipated. Japanese paper hadkerchiefs, with which we are all familiar, are quite soft and pleasant to use, and at the same time nearly as tough as cloth; and from twisted strips of paper torn from these, an excellent string may be extemporized, really quite strong and serviceable.

In Japanese houses, paper not only covers the walls and ceilings, but is used on the light sliding doors which divide one room from another, and on the folding screens which protect from the too abundant drafts. Light wooden frames, on which a single thickness of paper is stretched, form the windows, admitting light but not sunshine, and air in plenty but not wind. These paper *shoji*, however, as might be expected, fail completely against rain, and must be supplemented by sliding to, or outside wooden storm doors.

Made waterproof with oil, paper serves for umbrella covers and rain coats, and in large sheets is used to protect baggage and merchandise.

In the form of an admirable artificial leather, it is used for pocket-books, boxes, &c.

An inferior pasteboard is also made from paper, which is sometimes used for boxes. Thin sheets of wood, however, cut by hand with a large plane, being both cheaper and better, usually replace this material.

Articles of papier-mache are common, but are usually disguised by lacquer, and can hardly be distinguished from ordinary wooden lacquer ware.

Japanese paper is usually made from the inner bark of the paper-mulberry, (*Broussonetia papyrifera*), and is always made by hand, and is therefore of necessity made in small sheets; the more common size, known as *hanishi*, being about nine and a half by twelve and a half inches, though both larger and smaller sizes are used to a limited extent.

The paper as generally sold is unsized, the thick india ink used for writing, rendering size unnecessary; but there is a special paper called *ro-biki*, or *blotorgani*, very thin and translucent, used for blank books, &c., which forms an exception to this rule. The size used in the manufacture of this paper, is said to be made from the bark of a species of Hydrangea, (*H. Poniculata*).

Paper is usually made in small villages, of which all the inhabitants are paper-makers, the town being devoted to this industry alone. Similar villages of potters, brass-founders, nail-makers and vermicelli manufacturers are quite common; having sometimes an assignable cause for their location in the abundance or cheapness of raw material, but usually placed without regard to the special fitness of the region, having been first established by some prince or *daimio* to suit the necessity or convenience of his little kingdom.

Although thus associated in villages, there seems to be little or no co-operation between the different paper-makers; each family or house being complete in itself, and carrying on the

manufacture in all its stages from the first manipulation of the raw material to the end.

The system of adoption, by which the imperial line and the families of the nobility have been continued for so many centuries, also extends to the families of these artisans. If the son of a paper-maker does not wish to follow the trade of his father, he seeks adoption in a family devoted to some more congenial line of business; and his father adopts another son. In like manner a celebrated sword-maker, having no son of his own, will continue the renowned name of his family, by adopting the most promising young blacksmith of his acquaintance.

In the paper-maker's family all share the work; men, women and children, from the old and decrepit grand-parent to his little grandson, a precocious boy five or six years old.

The paper-mulberry shrubs which supply the raw material for paper-making, are grown by farmers in the vicinity of these villages, on the borders of their rice fields, or on the narrow ridges of earth which divide one rice field from another, and very rarely on ground specially devoted to the purpose.

The Japanese paper, excellent as it is, does not supply all the wants of the people; and this account would be imperfect did I not allude to the manufacture of paper from rags, after foreign methods, which is now being conducted on a large scale in several parts of Japan. In Tokio alone there are three or more paper-mills, fitted with the most approved American and English machinery, and capable of turning out large quantities of paper. The Government consumes large amounts of foreign writing paper; the newspapers use foreign printing paper; and the educational institutions require, in addition to these, drawing paper, book paper, &c. All of these are now made in Japan; and it seems likely that the rude and expensive process of making paper by hand, which I have described in these pages, is soon destined to disappear before the power of machinery, which makes a better paper, at less cost, from inferior and less expensive material.

—Henry S. Monroe.

Selected for "The Friend."

The Theatre.—There are institutions and customs among us, countenanced, patronized, vindicated by Christian men and women, which are, in this respect, essentially heathenish and utterly revolting. Such an institution is the theatre. The theatre of to-day is the enemy of women. It looks back to heathenism, and, if allowed, would speedily carry us there. The woman who patronizes it or apologizes for it, assists in the degradation, and retards the elevation of her sex. And, for reasons palpable to all well informed persons, the same argument is justly urged, with steadily increasing force as years go by, against the dancing customs in vogue in modern society. Is it strange that the Christian church, whose work is so largely the elevation of woman, and which is dependent so largely on Christian womanhood for her success, lifts up, in all her branches, a uniform and stringent testimony against both the stage-play and the dance? The American Congress, soon after the declaration of Independence, passed the following resolution:—

"Whereas, true religion and good morals are the only solid foundation of public liberty and happiness:

"Resolved, that it be, and hereby is, earnestly recommended to the several States, to take the most effectual measures for the encouragement thereof, and for the suppression of theatrical

entertainments, horse-racing, gaming and such other diversions as are productive of idleness, dissipation and a general depravity of principles and manners."

Is it strange that Christian citizens, observing with alarm the growing laxity of morals, are striving to bring back the government to see the principles of that earlier and better time?—*Christian Statesman.*

Scientific Notes.

For "The Friend."

The Influence of Ammonia upon the Color of Plants.—If flowers, originally of a violet hue, are exposed to the vapor of ammonia, even much diluted, a greenish color appears. This change has been observed to take place when such flowers are exposed to tobacco smoke, on account of the small amount of ammoniacal matter which it contains. When exposed to the fumes of ammonia, blue, violet and purple flowers have been observed to change to a beautiful green, red-colored flowers to become black, and white flowers to turn yellow. The flower of the *fuscia* with white and red tints, was observed to change to yellow, blue and green. Flowers thus changed, when plunged into pure water, retained their new colors for several hours, but finally returned to their original hues. It is also stated that the flowers of the aster, which are naturally inodorous acquire an agreeable perfume under the influence of ammonia.

Laced Powders.—Within a few years various substances have been sold under this name; some of but very little value. On the highlands of Thibet, Tartary and China, the herdsman have for a long period been accustomed to burn a substance inside their tents, in order by its smoke to protect themselves against the clouds of gnats and mosquitoes which infest those countries at certain seasons. This substance, it is stated, is derived from the *Pyrethrum carneum* and *P. roseum*, two plants growing wild in the Caucasus, and also largely cultivated there. Another variety has lately been introduced which is believed to be more powerful in its effects than those above mentioned, and consists of the flowers of the *Pyrethrum cinerifolium*, a plant growing wild in Dalmatia. The insecticide properties of the *Pyrethrum* (a genus of the Composite), appear to reside in the discoid portion of the flower, which, in the case of the Dalmatian species, is larger than in the others, and it is only when dried that they become fully effective. The "powder" should consist only of this portion of the plant.

Fish Raising.—Within the past few years, much attention has been given to this subject, and in several of the northern States, Commissioners have been appointed for the purpose of fostering the preservation and cultivation of our valuable food fishes, and the introduction of other species from distant points. There is also a Commission under appointment by the United States Government.

In Pennsylvania, the State Commissioners report that the introduction of California salmon has proved a success, and that they believe that in a few years, both the Delaware and Susquehanna will abound with this fine fish. Considerable effort has also been made to introduce the salmon trout into the rivers of Pennsylvania; 67,500 of the young having been distributed for this purpose.

In 1875, the United States Fish Commissioner, distributed a large number of young

shad, artificially hatched, to several of the larger rivers of the country, including the Mississippi. These were hatched at an establishment under the care of James W. Milner, near Holyoke, on the Connecticut River, whence about 2,000,000 young fish were turned into the Connecticut, and 1,370,000 distributed to other places; so that the waters of nearly every State east of the Missouri River it is hoped will be benefited thereby. By artificial hatching, it appears that a much larger proportion of the eggs perfect, than when they are subjected to the often adverse conditions of our streams. In the latter case it is estimated that not more than one egg in a thousand produces a young fish capable of providing for itself; but in the former, there is a probability that one thousand eggs taken, nine hundred at least will become perfect fish. Experiments made at the shad hatching establishment on the Susquehanna River below the Columbia Dam, show that an average of about 18,500 eggs may be obtained from a single fish.

The New York State Commissioners in making their Seventh Annual Report state, that in 1874, 5,000,000 young shad were hatched and turned into the Hudson River, and that the yield of mature shad has shown a steady increase from year to year. Larger hauls were made in 1875 than had been known for many years, and the fish appeared to be everywhere more abundant than formerly. The abundance of this fish in our northern rivers during the present season may be, in part, owing to the cold of the late spring, which no doubt prevented them from visiting our southern rivers in their usual numbers. The increased yield of the fishery, was accompanied with a reduction in the market price, which was considerably less than the average of the past few years.

Among the subjects which have engaged the attention of the Commissioners, are the introduction of shad into the great lakes, the increase of the black and Oswego bass, and the propagation of the white fish, salmon-trout and grayling. The N. Y. Commissioners propose, in addition to the above, to pay particular attention to the raising of brook trout by artificial means, and hope by their extensive arrangements to be able to supply a certain quantity of the spawn of the young fish of this species to almost all applicants. Steps have been taken to introduce the shad and salmon into the lakes of Minnesota and Vermont, to stock the waters of New Hampshire with whitefish from Lake Champlain, and to increase the propagation of the shad, the striped and black bass, and the California salmon in the waters of Virginia.

The value as food of the product of our rivers and lakes, may be estimated from the amount annually consumed in the city of Washington, as reported by the Inspector of Marine Products of that city. By this table it appears, that in 1875 there were brought to that market 464,215 shad; 1,674,445 herring; 557,203 " bunches of fish;" 1,240 sturgeon; weighing in all 7,002,049 pounds. The greater proportion of these were derived from the Potomac and lower parts of Chesapeake Bay.

Ready Methods of Obtaining Cool Water.—In Australia a large bucket made of sail-cloth or stout canvas about four feet high and ten inches in diameter is filled with water, covered with a thick piece of flannel, and hung up

under a tree or elsewhere in the shade. The constant evaporation in that dry atmosphere, which is increased when there is a breeze, reduces the temperature of the water so that it becomes very appreciably lower than that of the surrounding air. For a long period vessels of porous earthenware have been used in India for the same purpose.

LOOK UP.

Selected.

When sorrow's dark and heavy pall
O'er spreads thy hopes, brightening all,
Look up.

When stung by sin, and vexed by fear,
And the Avenger draweth near,
Look up.

When weary of the inward strife,
And longing for that "higher life,"
Look up.

What though the sky is robed in night?
The darkest hour precedes the light!
Look up.

When Pisgah's height thy feet shall tread,
And circling glory crowns thy head,
Look up.

If all is dark, or all is light;
Live thou by faith, and not by sight;
Look up.

By sorrow be thy patience tried,
And let thy joy be sanctified;
Look up.

Selected.

ALL THINGS PERISH SAVE VIRTUE.

Sweet morn—so cool, so calm, so bright,
The bridal of the earth and sky,
The dew shall weep thy fall to-night,
For thus must die.

Sweet rose—whose fragrance none I crave,
To glad my sense and joy mine eye,
Thy root is ever in its grave,
And thou must die.

Sweet Spring—so full of shine and showers,
It makes the weary spirit sigh,
To think, with all thy herbs and flowers,
That thou must die.

And all the bright and glistening train
Of stars that stud the deep blue sky
Must they all perish—none remain
To glad the eye?

And vales, and fields, and rushing streams,
And mountains that invade the sky,
Are they as baseless as our dreams?
And must they die?

And all that's beautiful and fair
On Nature's face—love's melody,
That makes sweet music of the air,
All—all must die!

And man, frail form of senseless clay,
Tho' now his glance is proud and high,
Perchance upon this passing day
He too may die!

But the bright soul?—that, shrined within
The quenchless light in mortal form—
Tho' dimmed by misery and sin,
Defies the worm.

When all the stars shall fade away,
And suns in their own blaze expire,
And trackless comets cease to stray
With wand'ring fire,

The soul shall ever live, nor know
The lapse of time, but dwell on high,
And share—in endless joy or woe—
Eternity.

—Powell.

"You may not see the purpose
Why your hearts are pierced and riven,
But with a firm undoubting trust,
Look ever up to Heaven."

Daniel Bowly, Jr.

[An esteemed correspondent in Ohio writes: "Having recently read an account of Daniel Bowly, Jr. in 'Piety Promoted,' volume third I thought there was much contained there suitable for the present time, when the mind of so many amongst us seem taken up with the pleasures of this world, together with the eager pursuit after its treasures.

I felt like calling attention particularly his remarks on the favor he considered it to be a member of our Society; also on attending places of diversion, the encumbrances or fatigues of business, plainness of dress, &c. If the editors see proper, I should like to see it placed before the readers of 'The Friend.' Eighth mo. 3d, 1876.

Daniel Bowly, Jr., son of Daniel and Sara Bowly of Cincerester, Gloucestershire, was a young man possessed of a good understanding and an amiable disposition; the pliability of which, together with an employment which frequently exposed him to temptation, promoted, though it did not sanction, a wide deviation in conduct from those religious principles in which he had been educated. On this deviation he became fully sensible in the course of a long illness; which he often acknowledged to be a mercy from that divine Providence, whose fatherly care had many times preserved him from sudden death when unprepared.

In the commencement of the disorder, which proved a consumption, his mind appeared to be deeply affected with the danger of his situation, though he then expressed but little of his feelings. As his weakness increased he remarked how exceedingly awful the prospect of the final change appeared; and he earnestly desired that he might know a fitness for eternity, and that when the time came, the Divine Presence might be near. His past conduct, he said, had been very erroneous; but that his supplication for forgiveness had, in his illness, been attended with such sweet refreshment, that he hoped it might be according to his desires. At other times, his sins appeared so great that he could hardly entertain a hope it would be well with him. "What can be expected," said he, "from a death-bed repentance? That is a time when all would gladly be saved. There will not probably be an opportunity given me of proving my sincerity, by an amendment of life; so that men may doubt it; but the omniscient Being knoweth how far I am sincere, and I hope, if it really be so, it will be accepted by Him; yet there is nothing equal to a proper dedication of time in health."

Another time, he said, "I hope the Almighty will forgive my sins. It is mercy alone that can save me, who have devoted so much of my life to business, and the amusements of this world; pleasure as it is generally called; but it is a strange sort of pleasure. It is pain, I feel it pain."

In another opportunity, he said, "What I have to deliver, is from a prospect of the awfulness of death, which in a short time will be my lot. Mankind in general are certainly under strong delusion; yet how kindly the Almighty condescends, from time to time, to give a degree of his light and help! But man may outlive this day of grace, which, through the merciful mediation of my dear Saviour, is now extended to me."

At another season, appearing much dis-

For "The Friend."

"Woman's Rights."

An autobiography of Ann Gilbert has recently been published, giving some interesting particulars of the life and character of this sensible and intelligent woman, who, with her sister Jane Taylor, has been widely known in this country, particularly among the youth, as the authors of "Original Poems." Accustomed to judge for herself in regard to the movements agitating the community in which she moved, she by no means approved of that which had for its object the admission of women to the elective franchise, and in reply to an application on the subject, she wrote the following characteristic letter.

"To Ann Knight, in reply to several papers advocating the rights of women, particularly to the elective franchise.

Dear Friend:—I have looked over the papers forwarded to me this morning, and cannot say that I accord with the views there advocated. On many grounds I think them untenable.

I believe that if half every family—observe, not half of the community (and there, perhaps, lies the practical mistake) for that might be a *class* only; but that if *half of every family* is honestly represented, the rights of the whole will be, in fact, as well secured as by any other arrangement. There will be, I think, as much justice, with perhaps less dissension—discussion which might affect domestic happiness—together with a much less cumbersome machine to manage.

Nature seems to have settled the question *a priori*. We have not lungs; we have not courage; we have not time for it (to say nothing of interruptions, which might happen inconveniently during the sittings of Parliament.) And modern science says, further, that the *division of labor* is the great secret of order and progress. So long as houses have insides as well as outsides, I think the female will have enough to do, even, I might almost say, irrespective of the numerous demands now making upon her by benevolent and religious societies. To these she does feel it her duty to attend; but they make a large addition to 'woman's work,' as understood by our grandmothers; still, with a warm heart and managing head, much of this sort may be accomplished, but it seems to me to form the boundary line of her out-of-doors business.

In doors she may do much, even politically—that is, I should say, it is her duty to instil principles into her children—principles affecting all the great questions—Freedom; Slavery; Justice; Humanity; War; Monopoly; Private Judgment; Voluntaryism, with as many more as may be thought of—and supposing she do all this well, wisely, effectively; and see to it at the same time, that dinners come *secundum artem*, that shirts have buttons (and buttons shirts.)—that everything, in short, within the homestead is done decently and in order—she will have, to my thinking at least, enough to do!

You adduce Scripture, and suitably applied, we all bow to its authority, but not misapplied. 'The righteous is bold as a lion,'—certainly—and as a general truth, has no need to fear what man can do unto him, but if applied to women, it would be plainly confronted by other passages especially intended for our own guidance, in which 'shamefaced-

ressed, he desired his sister to read a chapter in the Bible to him; after which he broke forth in earnest and pathetic exhortation to those present, to prepare whilst time and health were afforded; saying, that a little encouragement, during the reading, had been given for himself; and that he believed it was for some one present he had been so tried; adding, "I long that my friends would begin the work of religion in the life of it, for if the first offers are slighted, oh! how does the visitation deaden on the mind! It appears to me as though my own redemption is now nearly completed, and that I may be detained here, or the good of others; and I hope if there be anything to be done, the Almighty will enable me to do it."

He also said, "How comfortable would it be to meet my relations in that state of happiness, where I believe a residence to be preparing for my soul! I believe the Almighty retains me here as an example of his great mercy, and as a warning to some; but I earnestly entreat none will depend upon the same singular act of mercy. All the friendships of his world must be given up; and, if the mind be not illuminated with an immediate proof of the presence of our dear Saviour, yet it should be resigned, and prepare itself for the reception thereof, by a surrender of everything which does not appear consistent with state of preparation."

One time, speaking of trade, and that he seemed glad he had done with it, he said, "I hope I am not hardened or insensible of my state. I have earnestly supplicated for repentance, and have sometimes experienced something like touching the hem of the garment; but not quite so neither, as that was fully efficacious; but this lasted only for a time, and I seemed again left. In the forecast of my illness, a few times I asked for recovery, if consistent with the Divine will; with desires to be strengthened to lead a different life from my past; and to serve that good master whose doctrines I have, as it were, trampled under foot; but I have since seen the favor it may be to me to be taken from such a trial."

He said also, "What a favor it is to be members of our Society! Its rules forbid nothing that is good for us. How earnestly do I wish my near connections, in particular, may keep to the truth! Though the path may appear hard at first, yet as they follow their Leader with a single eye, it will become more easy. There may be times of withdrawing of the Divine Presence, and then the enemy will seek to enter; but by earnest supplication, preservation will be granted, and at times a comforting foretaste of future happiness; and the prospect of getting every day nearer to such an incomprehensible reward, is a favor beyond expression."

"How little satisfaction results from a life of pleasure, attending places of diversion, &c. Ah, the disappointments such meet with! I believe bitter portions are often their lot." He observed how he had been struck, when at those places of amusement, with a conviction that he was far more blameable than his companions, who had not so guarded an education; that, however innocently some of them attended, it was not so with him.

Embracing one of his brothers with great tenderness, he desired him to attend to what he had said, which was not in his own will; but, he believed, through the Spirit of Christ,

who in his unspeaking mercy had made of him such an example. He exhorted his brother and sister to endeavor to train up their children in the right way; as it is from the rising generation an advancement in society is to be expected. He remarked the many memorable instances in "Piety Promoted," of children from nine years old to fifteen and twenty, appearing in public testimony in meetings; and he said, he thought the care of children a great trust; but that the reward would be answerable, if rightly discharged. He recommended beginning with them as soon as their minds opened; and not plunging them into business at too early an age; and he remarked the great preference due to religion before earthly substance.

One morning, inquiring if it were not the meeting day to-morrow, and being answered in the affirmative, he said, "I almost long to go. How pleasant is the thought of being retired there from the world, when the general of the people are in the height of its engagements!" How foolish and unwise are men who are bartering their souls for gold, paltry gold! The too eager pursuit of it is a great hurt to some of our Society. If I were to revert, and found business stood in my way to peace of mind, I think I would give it up entirely; or do but little, and live accordingly. What signifies grandeur or curious food? The taste goes no farther than the mouth, then it is over. If some men heard me talk thus, they would think me foolish; but in this I am wise, and know what I say."

He advised young men not to spend their time unnecessarily at inns, but rather to go to Friends' houses, where he thought they would be welcome. He had, he said, thought otherwise; but that in the liberty he then felt, he could go to any Friend's house.

"I believe," said he, "the hope which I have, will continue with me to the end; yet the enemy is very busy, and would persuade me I have nothing to do with the kingdom of rest; but that is his temptation, and I must pray for patience; for I think the prospects I have had from time to time cannot be delusion."

A Friend asked him how he did, he replied, "I am very weak, but I hope I shall be willing to bear everything the Almighty may be pleased to lay upon me, so that I can but just get within the gates of peace." At another time, he said, "I wish I had served my dear Saviour in my health. Oh he is a kind master. How much time have I lost! how distressing must be the situation of those who are sleeping the sleep of death, until the last trumpet be sounded in their ears!"

Several Friends being in his chamber, one evening, he spoke of that wonderful gift dispensed to all, even that Holy Spirit which manifests our duty; and he recommended an immediate compliance with its discoveries; "For since," said he, "these illuminations are not at our command, it is very unsafe to trifle with them, by giving way to the suggestions of the enemy; but rather resign whatever may be called for," adding, "Can we not return a part to Him who gave the whole? What if it deprive us of a few luxuries? We can have but food and raiment; which only differ a little in kind between rich and poor."

(To be continued.)

ness, 'subjection,' 'meek and quiet spirit,' the 'inquiring of husbands at home,' and many such like are *enumerated*, as their virtues; and in describing their *sphere*, a very different course is assigned to them.—'To guide the house,' 'to bring up children,' 'to entertain strangers,' to descend to the humblest kindnesses,—are marked out for them by apostolic authority. It appears to me, therefore, that whenever Scripture legislates for us specially, it speaks in direct opposition to the views you advocate. I do not think they would comport with the design of our creation, or with actual, undeniable, unavoidable duties; I think they would subvert the wise result of experience in the division of labor, so necessary to the working of all great machineries; and I think after all, that we should not be a whit the better for women's interference!

Of course, I believe that there are both wise women and foolish men, but these terms do not divide the sexes. Generally speaking, if wise, we are not the *wisest*—on a large scale especially,—though perhaps on a small one. But the hand cannot say to the foot, 'I have no need of thee,' each is best about its own business; and unless we could regard women as likely to make, not only able statesmen, but the *ablest* of the two, all we could plead for would be an admission into their councils; and there large committees are always, I believe, less effective than small ones. The fewer that can manage a business the better; and as Governments do not take upon them to make laws for us *as women*, but only as 'all one concern' with the men, we may, I think, without anxiety, consent to 'share and share alike,' with the law-makers.

These are at least my opinions, and even if incorrect, I have not leisure to remodel, or further defend them. You have stated yours at length, I mine briefly, and if either is unconvinced, we should not perhaps effect much by saying more. I do (woman though I am) feel a lively interest in great rights and wrongs, and rejoice in the belief that ultimately *wrong* will have the worst of it. We are going forward, but I should not expect much advantage from taking the other half of every fisside into the quarrel. My left hand has much to complain of—never either fields a needle or holds a pen. But I don't find myself injured by this partial arrangement; one has the work, the other the needle, and so I manage between them.

Will you excuse me for having spoken thus freely? I think yours is a false movement, and thus far I put in my protest against it. Believe me, yours frankly,

ANN GILBERT."

Most Fragrant on Poor Soil.

"Mignonette, sweet, large, flowering, * * most fragrant on poorish soil."

The seed paper was laid down; the thoughts suggested still kept us company.

The lives of those most fragrant in good deeds have not all been spent amid the flowers of luxury, and beneath summer skies of prosperity.

We remember the benignant, serene expression of an aged lady whose countenance we loved to look upon, for it was illuminated with a contented earth does not give.

On better acquaintance it was found that she had trod a thorny path, but the rugged way led to the Hills of Peace.

And so it is on every hand; not the petted children of fortune, but the sons and daughters of trial and hardship, grow strong and useful and happy.

Turning from the analogy of nature to the book of Revelation, we find it written, "In the world tribulation; in me, peace." Yes, and the "tribulation worketh patience, and patience experience, and experience, hope." And oh, how blessed is that hope!

Then we can look up, even through blinding tears, and thank God for taking away a joy, dread though it was, to give in its stead a higher blessing. The foretaste of the bliss to come, and the sweet peace within, which neither time nor change can mar, are better than earth's brightest blossoms.

The lives of those who gain and keep the spiritual heights, are fragrant indeed. They are qualified to lead others along the upward way which they themselves have trod. They can sympathize and encourage in conflicts and temptations, for they know the trials and victories.

We can lead upward only as far as we ourselves have ascended. Then, Christian, let us not be discouraged "because of the way"—for strength is gained by trial and hardship, and thus the Master may be fitting us for his service. The poor soil of our lives may yet bring forth blossoms in the desert—blossoms which may be fragrant and fair when we have passed—

Beyond the smiling and the weeping,
To love, rest, and home.

Nat. Nap.

For "The Friend."

The Sioux War.

It is cordial to observe that here and there throughout the community voices are raised by intelligent and thoughtful men, against this (to say at least) unnecessary war, which is now being waged against those Indians. The following remonstrance by H. B. Whipple, Episcopal Bishop of Minnesota, contained in a letter to the President of the United States, is entitled to special consideration on account of the standing of the writer, and his acquaintance with the subject of Indian wrongs. The following is an abstract of the letter as published in a recent paper.

"THE INDIAN PEACE POLICY.

We have entered upon another Indian war, which I fear will be one of the most memorable in our history. Thousands cry for extermination. I yield to no man in my sympathy for the brave men of the border—for the brave soldiers; yet for every life lost in such a war the nation is guilty, which for one hundred years has persisted in a policy which always ends in massacre and war. Every friend of the Indian owes you a deep debt of gratitude for trying to give us a better policy. The so called peace policy was commenced when the Indian tribes were openly hostile or sullen and turbulent, and was a marvellous success. Its only weakness was that the system was not reformed. The nation led 300,000 men living without a vestige of government, without personal rights of property, without the slightest protection to person, property or life. We persisted in telling these heathen tribes that they were independent nations. We sent out the bravest and best of our officers, men whose slightest word was as good as their bond. We sent them because the Indians would not doubt a

soldier's honor; they made a treaty, and pledged the nation's faith that no white man should enter that territory. The Executive and Senate ratified it, and it was in all provisions the supreme law of the land. violation of its plain provisions was an act of deliberate perjury. In the words of General Sherman, 'Civilization made its own compact with the weaker party; it was violated, but not by the savage.' It was done by a civilization. The treaty was approved by the whole nation. The whole world knew that we violated that treaty, and the reason of the failure of the negotiations of last year was that our own commissioners did not have authority to offer the Indians more than one-third of the sum they were receiving under the old treaty. The peace policy has never been understood by the people. They suppose it has some vague plan to give immunity to savages who commit crimes, when the first thing which the friends of the Indians ask is law to punish crime. The peace policy was a success until our faith was broken. It was difficult to find men fitted for this work who would go to a distant agency upon a salary of \$1500 a year but many of the best men in the land had done this work, and been rewarded by leading many of the Indians to Christian civilization. I have feared to have the Indian Bureau changed to the War Department, because that would be a condemnation of the peace policy. My conviction is that the Indian Bureau ought to be an independent department of civilization, with one of the best men in the nation at its head. If this was done, and then gave to the Indians the protection of law, personal rights of property, a place where they can live by the cultivation of the soil, required to labor; if provided with necessary aid in the work of civilization; if Christian schools were protected and pledged faith kept sacred, we should solve the Indian problem and bring upon ourselves the blessings of God. I sometimes almost despair, and then I think it is so plain, the people will see. Here are two pictures—on one side of the line a nation which has spent \$500,000,000 in Indian wars; a people who have not 100 miles between the Atlantic and the Pacific which has not been the scene of an Indian massacre a government which has not passed twenty years without an Indian war; not one Indian tribe to whom it has given Christian civilization, and which celebrates the Centennial year by another bloody Indian war. On the other side of the line there is the same greedy dominant Anglo-Saxon race and the same heathen. They have not spent one dollar in Indian wars, they have had no Indian massacres. Why? In Canada the Indian treaties call these men 'Indian subjects of her majesty.' When civilization approaches them they are placed on ample reservations, they receive aid in civilization, they have personal rights of property, they are amenable to law and protected by law; they have schools, and Christian people delight to give them their best men to teach them the religion of Christ. We expend more than \$100 to their \$1 in caring for Indian wards. Will you pardon me if I suggest a plan which may obviate some of the evils, until Congress provides a remedy? 1. Concentrate the Indian tribes. Place all of the Indians in Minnesota on the White Earth reservation; the Indians of New Mexico Colorado and Sioux, in the Indian Territory; the Indians of the Pacific coast upon two re

II. Whenever an Indian, in good faith, gives up his wild life, and begins to live by labor, give him an honest title by patent of 160 acres of land, and make it inalienable.

II. Provide government for every Indian tribe placed upon a reservation. There are forty reservations where the plan could be inaugurated at once. As it is now the civilized and Christian Indian is pitifully helpless. I can count one hundred murders by Indians which have taken place in Minnesota in seven years, almost uniformly while under the influence of "fire-water," furnished in violation of law by white men. I do believe that a just and humane policy, worthy of a great Christian nation, will save our poor Indian wards, and bring us the blessing of God."

THE FRIEND.

EIGHTH MONTH 19, 1876.

We have received a copy of the printed minutes of the late session of Canada Yearly Meeting; and also some information respecting its proceedings, from a private source.

The meeting of Ministers and Elders on fifth-day, the 29th of Sixth month, was thought to be attended with a degree of that holy solemnity which is the crown of our assemblies; and valuable counsel was expressed by some Friends present. At this sitting Eliza Brewer returned the minute ranted her last year, to visit the meetings of Friends in England and Ireland, with information that the service had been performed to the peace of her own mind.

At a subsequent sitting of the same body, held on Second-day, the subject of reading the scriptures in meetings for worship and singing in them, was introduced, and objections to those practices pointed out; but to this concern to maintain the original principles and practices of the Society, considerable opposition was made by some visitors from other Yearly Meetings, of whom nineteen were in attendance with minutes.

In the general Yearly Meeting on Sixth-day, in addition to other business of that sitting, the London General Epistle was read, and directed to be printed for circulation among the families as heretofore. A proposition was made to hold "Devotional Meetings," and after some discussion, the same conclusion in regard to them was arrived at, as last year, viz., that they should not be considered as held under the authority of the Yearly Meeting.

On Seventh-day, the Representatives proposed Adam Spencer (who had before served the meeting in that capacity) as Clerk, and John Wright as Assistant Clerk; these nominations were approved. A committee was appointed to consider the propositions respecting a Conference of Yearly Meetings, appended to the epistles from Western and Indiana Yearly Meetings. As these propositions have frequently been referred to of latter time, we reprint the postscripts containing them.

"From Western Yearly Meeting.—On the reading of the correspondence of the several Yearly Meetings, this Meeting has again been introduced into prayerful and fraternal interest and sympathy, for all that bear our name, and especially for the Yearly Meetings on the

American Continent. We are again impressed with the necessity of a General Conference, by delegates from the several Yearly Meetings, to take into consideration and endeavor to reach conclusions upon such subjects as concern the general welfare of our Society, and to meet at such time and place as may be agreed upon during the course of its consideration by the several Yearly Meetings."

"From Indiana Yearly Meeting.—The proposition contained in the epistle from Western Yearly Meeting for a conference of committees from all the Yearly Meetings on the general interests of our religious Society was not concurred in by this Meeting, but in consideration of the condition of Friends in Philadelphia Yearly Meeting who are in harmony with their brethren of other Yearly Meetings, we have thought best to appoint a committee to unite with committees of other Yearly Meetings, in considering what can be done in reference to them."

At a subsequent sitting, the Committee on this subject reported, "We are united in the judgment, that way does not open to recommend the Yearly Meeting to take any action in the premises," which report was approved.

The summary answers to the Queries, evince a degree of honest care in the Subordinate Meetings, in drawing up their replies; thus, there is an acknowledgment in one instance, in speaking of behavior in meetings, of "want of due regard for the feelings of others," and in another part, of "a lack of love, arising from a want of unity in sentiment." We are glad to find it stated (though with some exceptions), "Friends endeavor to train up their children, and those of other Friends under their care, in the principles of the Christian religion as proposed by us, and in the plainness and simplicity of dress, language and deportment which it enjoins; and are good examples in these respects themselves."

The minute of advice adopted, was as follows:—"The evidences of a want of faithfulness to Christian principles, as brought to view in the answers to the Queries, introduced the meeting into deep exercise, and much good counsel was imparted, tending to stir us up to greater care and watchfulness in reference to ourselves to the motives that lead to actions. To be concerned that our hearts are made right with God, and that all our relations with Him and with our fellow-men may be according to his will. That our minds may be so imbued with the love of God, as to do honor to his name at all times, and that we love one another with a pure heart reverence. To be exercised with that charity that suffereth long, and is kind. We were feelingly exhorted to seek after, and come to a clear understanding of the profession we are making of our principles, and the testimonies that are an outgrowth of them; and that we maintain a walk consistently therewith. May we be concerned to train up our children in the way they should go, in right principles and practices. To provide for them suitable reading, to exercise a religious care in the selection of books for their use, and as a prominent means to the great end in view, to inculcate in their minds a knowledge of the Holy Scriptures; to be diligent in the private and daily reading of them in our families, to improve those opportunities according to the will of God, whether it be in silent or vocal prayer, in counsel or instruction, in

which we shall have good hope in His blessings.

"A caution was expressed, that we keep to the strictly medicinal use of intoxicating drinks, that the use be not abused. A concern was also expressed in reference to the use of tobacco. In sympathy with those who use it, in the difficulty of abandoning it, were they counselled to seek for Divine aid in the matter. Particularly, were the young advised to avoid the use, in order that there be not a succession of those who use it.

"May all Friends maintain a just and upright dealing with their fellow-men.

"May we accept the exhortation to repair the wall in our appointed place, and maintain the watch over against our own houses; may we not turn aside to solace with the enemy, but maintain first principles, so as to know, more and more, the salvation that God doth appoint for walls and for bulwarks."

The Boarding-School Committee reported, that they had accepted as a new site for the school house, a grove and hill containing ten acres, which had been purchased by private subscription. They had made a contract for the erection of the building, for the sum of \$24,300, to be completed by the 1st of First month next. The contractors were reported to be proceeding rapidly and satisfactorily with the work.

The statistical reports showed, that there were 26 meetings and 1,546 members belonging to the Yearly Meeting. The children of school-age numbered 278.

The meeting closed on Fourth-day afternoon, 8-venth month 5th; the concluding minute being as follows:

"Having finished the business that has claimed the attention of the meeting, under a renewed sense of the Lord's sustaining power and help in these truly solemn engagements, we separate, proposing to meet again at this place, at the usual time next year, if the Lord permit."

In the present number we reprint the Epistle to its members, issued by our late Yearly Meeting, which briefly but forcibly restates and affirms the views of Friends in regard to several of our important testimonies, and tenderly invites and encourages all to the faithful and fearless support of the original doctrines and testimonies of the Society before the world. We consider it a noble testimony for the Truth, and particularly appropriate at the present time, and desire that its Christian advices, admonitions and entreaties may be widely known and observed.

We take occasion at the opening of a new volume to remind our contributors that communications intended for its columns should be accompanied by the name of the Friend who forwards them.

SUMMARY OF EVENTS.

FOREIGN.—The London Times publishes a dispatch from Paris saying the English programme of non-interference in the eastern question which was sanctioned by the Powers after the failure of the Berlin memorandum is the basis of the subsisting harmony. The signal for mediation therefore can and ought to come only from England. She is the arbiter of the moment when the struggle is to be considered finished and mediation may be successfully proposed. As yet it is certain that

England does not think the moment opportune, and no other Power will take the initiative.

Benjamin Disraeli is about to be raised to the House of Lords, with the title of Earl of Beaconsfield. He closed the debate the evening of the 11th inst., defending the government in the course pursued by it in regard to the intervention in European Turkey, and this it was believed would be his last speech in the British House of Commons. The leadership of the Conservatives in the House of Commons will probably devolve upon Sir Stafford Northcote, the present Chancellor of the Exchequer.

The Dory Centennial, the minute vessel which sailed from the United States for England, was in sight of Ireland on the 9th inst., on the 13th Capt. Johnson landed in Wales for provisions, and then proceeded towards Liverpool.

Queen Victoria held a council at Osborne House, Isle of Wight, the 12th inst. She there delivered the seal of the office of the Lord Privy Seal to Disraeli. In spite of statements to the contrary a Ministerial crisis exists in Spain. The return of ex-Queen Isabella bodes no good. The removal of members of the Cabinet which took part in the revolution against her is contemplated.

A Berlin dispatch announces the conclusion of an offensive and defensive alliance between Germany and Russia.

Madrid advices report that throughout Spain the legislature is heavily hilled, nothing like it having occurred since 1800. Many farms in the neighborhood of the straits, and in Andalusia the grape vines have been seriously injured.

President MacMahon, of France, has liberated 161 more of the Communist prisoners.

Dufaire has been chosen as a Vice Senator of France, in place of Casimir Perier, deceased.

Both Chambers of the Assembly were prorogued *sine die* on the 12th inst. by a decree of President MacMahon. The municipal bill finally passed both branches with much unanimity.

The following announcement has been made public in the U. S. Subscriptions will be opened on the 22d of August for an undertaking with a capital of \$6,000,000 to establish and work a new telegraph cable between Paris and New York. The government has granted to Payer Quetier the right to establish this communication.

A war was outrages in Bulgaria having been severely commented on in the British Parliament and in the London Times, an official statement was made in the House of Commons by one of the Under Secretaries of the Foreign office to the effect that the Porte had been remonstrated with on the subject on behalf of the British government; that the atrocities had ceased, and that punishment was being inflicted on the perpetrators.

Two powerful Turkish armies are now marching through the heart of Servia almost unopposed, and it is said that Servia, despairing of a successful issue of the war, has concluded a truce, and meditates in favor of peace. The *Standard's* Berlin special says the Porte has positively declared its willingness to negotiate for peace whenever the powers are disposed to intervene, but it is not willing to agree to an armistice before the entry of the Turks into Belgrade.

It is reported that the Turkish Sultan has improved late, and that his recovery is probable. The Porte has granted complete amnesty to the Bulgarians implicated in the late rising, with the exception of the leaders and those who were active movers of the revolt.

A Belgrade dispatch of the 12th denies that the Servian cause has yet become desperate. Thirty thousand Bulgarians, principally old men and women, have, it is stated, taken refuge in Servia to escape the cruelty and outrages of the Turks.

Cuban advices report increased activity of the insurgents, who have recently destroyed much property and killed a number of persons.

The French Mission Chapel at Ning-koofoo, province of Ngan Hooi, China, was attacked by the populace during the celebration of mass recently, and the priest and many of the congregation were killed.

U. S. VESSELS. During the week ending 7th mo. 31st last, there arrived at the port of New York 9975 immigrants, of whom 5736 were males and 4045 females. Of the total number there were from England, 1101; Scotland, 357; Wales, 85; Ireland, 1105; Germany, 2241; Austria, 522; Sweden, 925; Norway, 494; Denmark, 109; France, 102; Italy, 102; Switzerland, 95; Spain, 82.

A vessel that was built in Philadelphia in 1761, one

hundred and twelve years ago, recently arrived at Leith, Scotland, with a cargo of ice from Norway.

During the year ending 6th mo. 30th last, the total revenue of the U. S. Treasury from the imposts on distilled spirits amounted to \$56,436,261, which is \$4,559,635 more than in the previous year; from fermented liquors, \$29,132,212, an increase of \$431,146 over last year; from tobacco of all kinds with special taxes \$39,795,275, or \$2,491,835 more than last year.

The bill to establish the new Territory of Pembina and to provide a territorial government therefor, has passed the U. S. Senate. Pembina will include all the territory between the forty-sixth and forty-ninth parallels of latitude, and the State of Minnesota and the Territory of Montana. The new territory has at present only about 12,000 white inhabitants. It is traversed by the Northern Pacific Railroad.

A bill to restore the franchising privilege formerly enjoyed by members of the forty-sixth and forty-ninth parallel Senate by a large majority. The differences between the Senate and House of Representatives in regard to the appropriation bills have, after many conferences, been at last accommodated. The House yielded to the Senate on most points or no appropriations could have been made.

On the 11th inst. the President sent a message to Congress asking the power to call out five regiments of volunteers of 1000 men each, to serve for six months during the present hostilities with the Sioux. He would prefer an increase of the regular cavalry service to 10,000 men, and 5000 more if not thought desirable, than he wishes to be able to secure volunteers in order to end the contest, if the force now in the field should prove inadequate.

Chicago contains in all 121,495 buildings, only 13,012 of which are constructed of stone, iron and brick, all the remaining structures being of wood.

The twelve regular appropriations for 1876 are appropriate \$147,719,674.85. At the last session they amounted to \$177,203,280.71, making a difference of \$29,584,205.86 in the way of retrenchment effected by the present Congress.

The wool earnings for seven months, as far as reported, show an increasing tendency, the net earnings being about seven per cent. ahead of last year.

The interments in Philadelphia last week numbered 404, including 179 infants under two years. There were 39 deaths of cholera infantum, 32 marasmus, and 23 typhoid fever.

The Markets.—The following were the quotations on the 14th inst. New York.—American gold, 111 $\frac{1}{2}$. U. S. sixes, 1881, 1201; do. 1896, 1173; five per cents, 1172. Superfine flour, \$8.60 a \$11.00; State extra, \$4.40 a \$4.60; finer brands, \$5 a \$8.75. White Tennessee wheat, \$1.20; amber Indiana, \$1.23; No. 2 Chicago spring, 95 cts.; No. 3 do. do., 88 cts. Mixed State oats, 39 a 42 $\frac{1}{2}$ cts. Rye, 76 cts. Yellow corn, 60 cts.; mixed, 57 cts.; white, 61 a 63 cts. *Philadelphia.*—Cotton, 121 a 124 cts. Superfine flour, \$3.75; extras, \$4.00; Minnesota extra, \$5.75; finer brands, \$6 a \$8.50. Pennsylvania amber wheat, \$1.17 a \$1.20; new red, \$1.10 a \$1.17; white, \$1.25 a \$1.29. Yellow corn, \$1.00. Yellow cts. Oats, 33 a 35 cts. *St. Louis.*—Flour, medium grades, \$4 a \$5. No. 2 red fall wheat, \$1.15; No. 3 do., \$1.03. Corn, 42 $\frac{1}{2}$ cts. Oats, 34 cts.

NOTICE.

We are requested by John Bell, Agent, late of Richmond, Ind., to state that his present address is San Francisco, Cal.

WESTWON BOARDING SCHOOL.

The Committee on Instruction of the Westwon Boarding School meets on Seventh-day, the 26th inst., at 10 A. M., at the Committee Room on Arch Street, Philadelphia.

JOSHEP WALTER, Clerk.

FRIENDS' ASYLUM FOR THE INSANE.

New Frankford, (Twenty-third Ward, Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

RECEIPTS.

Received from Sarah E. Hines, Pa., \$2.10, vol. 50; John H. Lippincott, Pa., \$2.10, vol. 50; Alfred King, Agent, N. Y., \$2.10, vol. 50, and for G. bet Weaver, Susan Mitchell, William R. Hazar Mary A. Simkin, and Susan King, \$2.10 each, vol. 50; from Mary Gillespie, City, \$2.10, vol. 50; from Willia Hancock, Pa., \$2.10, vol. 50; from Samuel F. Trot City, \$2.10, vol. 50; from Daniel Smith, \$2.10, vol. 50; from Jonathan Blackburn, O., \$2.10, vol. 50; from Josiah Fawcett, O., \$2.10, vol. 50, and for M. L. Shreve, Ind., and George Blackburn and Robert Mille O., \$2.10 each, vol. 50; from Samuel Allen, City, vol. 50, and for Deborah D. Horney, Ind., \$2.10, vol. 50; from Daniel S. Jones, \$2.10, vol. 50; from Emmet E. Hillard, N. J., \$2.10, vol. 50; from Sara Green, R. I., \$2.10, vol. 50, and for Eliza G. Sheffield, Conn, \$2.10, vol. 50; from Samuel P. Leeds, N. J., \$2.10, vol. 50; from William Tatnall, Del., \$2.10, vol. 50; from Joseph Waring, Canada, \$2.10, to No. 23, vol. 51, and for James Stover and George Polard, \$2.10 each, vol. 50; from Jesse E. Maloney, Pa., \$2.10, vol. 50; from James F. Reid, Pa., \$2.10, vol. 50; from John B. Baderton, Pa., \$2.10, vol. 50, and for Edw'd Balderston and Mercy Comfort, Pa., John Deacon, N. J., and Lloy Biderston, Md., \$2.10 each, vol. 50; from Davi Heston, Pa., \$2.10, vol. 50; from William H. Blackburn, O., \$2.10, vol. 50, and for Abel H. Blackburn and Merah Hall, \$2.10 each, vol. 50; from George Haine N. J., \$2.10, vol. 50, and for Elizabeth T. Engle, \$2.10, vol. 50; from Marshall Fell, Pa., \$2.10, vol. 50; for Charles W. Roberts and James C. Roberts, Pa., \$2 each, vol. 50; from Philip Carter, Md., \$2.10, vol. 50; from Lettice Evans, N. J., \$2.10, vol. 50; from Ephraim Smith, City, \$2.10, vol. 50, and for Morris Cope, Morris S. Cope, and Elizabeth Hughes, Pa., \$2.10 each, vol. 50; from Charles Williams, City, \$2.10, vol. 50; from James Bromley, City, \$2.10, vol. 50; from John W. Biddle, City, \$2.10, vol. 50, and for William Biddle, Same; Wm. Stokes, \$2.10, and Ann Gize, \$2.10, vol. 50; from Isaac Child, O., \$2.10, vol. 50; from P. H. Tinsley, Tinsley, N. Y., \$2.10, vol. 50; from Edward Thorn, N. J., \$2.10, vol. 50, and for Barton F. Thern, \$2.10, vol. 50; from Anna Pickering, City, \$2.10, vol. 50; from Joseph Sattergood, Jr., Agent, Pa., for S. Eulen Sharpless Jane B. Davis, Ann Scott, David J. Scott, Elizabeth S. Thomas, Eusebius H. Townsend, and Alfred Embree, \$2.10 each, vol. 50; from Samuel Haines, Caleb P. Haines, Juliana N. Powell, and John Bull, N. J., \$2.10 each, vol. 50; from Dorcas B. Robinson, R. I., \$2.10, vol. 50; from Esther H. Griffen, N. Y., \$2.10, vol. 50, and for William D. Griffen, \$2.10, vol. 50; from Levi L. Hoopes, Pa., \$2.10, vol. 50; from William R. Taber, N. C., \$2.10, vol. 50.

Remittances received after Fourth-day morning will not appear in the Receipts until the following week.

EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these Schools, to be opened about the first of Tenth month. Apply to Elton B. Gifford, 719 Market St. George J. Scattergood, 413 Spruce St. William D. Hines, 315 North Seventh St. Ephraim Smith, 110 Pine St.

DIED, on the morning of the 28th of 6th mo. 1876, at his residence, near Snyder, Ohio, JOHN M. SMITH, in the 62d year of his age, a member of Finishing and Mending and Glycerine Particular Meeting. He bore a most unobscured and blameless life, with much patience and a Christian resignation to the Divine will. His close was peaceful.

—, at the residence of her son-in-law, William Truitt, on the 6th instant, HANNAH G. LEEDS, in the 73d year of her age, a member of Woodbury Monthly Meeting, near Jersey, N. J. From early life she was earnestly concerned to be found a faithful follower of the Lord; and near the end of her life testified that "it was through mercy, all mercy, nothing but mercy, that her sins were forgiven, and an evidence granted of her acceptance."

An Epistle from the Yearly Meeting of Friends, held in Philadelphia, to its Members.

(Concluded from page 2.)

Friends have ever maintained full belief in that most precious truth, that "God so love the world that He gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life;" also in the inexpressible value of the atonement and mediation of our Lord Jesus Christ; and that the remission of sins which any partake of, is only in and by virtue of that most satisfactory sacrifice which He made of himself, when He bore our sins in His own body on the tree, and poured out his soul unto death. But seeing that "the natural man receiveth not the things of the Spirit of God, for they are foolishness unto him; neither can he know them, because they are spiritually discerned," they have felt themselves imperatively called to believe in and uphold the Scriptural doctrine, that a manifestation of the Holy Spirit is given to every man to profit withal; and that it is through obedience to and co-operation with this gift, this grace of God which ringeth salvation, that any can be brought to a saving knowledge of God and of his dear Son, and to participate in the benefits of Christ's coming, sufferings, and death, agreeable to the testimony of the Apostle: "That which may be known of God is manifest in him; and, "No man can say that Jesus is the Lord but by the Holy Ghost."

Holding and preaching this doctrine, characterized Friends in the beginning; they were willing to suffer the loss of all things, rather than shrink from its avowal in both principle and practice; and it has been a distinguishing feature of its belief throughout the existence of the Society. Isaac Pennington, speaking on behalf of Friends in his day, says, "That which God hath given us the experience of,—after our great loss in *literal* knowledge of things,—and that which *He hath given us to testify of*, is the mystery of the hidden life; the inward and spiritual appearance of our Lord and Saviour Jesus Christ, revealing its power inwardly, destroying enemies inwardly, and working his work inwardly." It is, we are persuaded, owing to a light esteem of or departure from this fundamental doctrine of the gospel, that while many make acknowledgment of Christ as having made atonement for sin, and that He is the Author of eternal salvation, yet they fail to know

Him to set up his righteous government in their hearts, and bring them out from the bondage of corruption.

The way of reconciliation of fallen man to his offended Creator has been opened by Christ; for while we were yet sinners Christ died for us. "But as no man knoweth who the Son is but the Father, and who the Father is but the Son, and he to whom the Son will reveal him," so no man cometh to Christ the Son, except the Father which hath sent Him, draw him; and this drawing is by the Holy Spirit, when the visitation of Divine love and mercy is extended to the soul. As man is a free agent, he may embrace or reject the pleading or reproofs of the in-speaking voice. If rejected, it is uncertain whether the offer to bring the guilty soul to Christ, will be renewed; for God hath said, "My Spirit shall not always strive with man." If it is accepted, the Light of Christ shineth into man's dark heart, shows him his alienation from his Creator, his continued disobedience to his righteous law, and his utter inability of himself to extricate his soul from its lost and condemned condition. The Holy Spirit alone can effectually convince of sin and its exceeding sinfulness. As its revelations are heeded, it awakens that "godly sorrow which worketh repentance unto salvation, not to be repented of;" and as the humbled penitent bears the ministration of condemnation, as his sins are made manifest, and go beforehand to judgment, this same Spirit enables him to look with availing faith on Him whom he hath pierced, as the Lamb of God that taketh away the sin of the world, and thereby through his blood, to obtain remission of his past transgressions, and be so far justified.

But man cannot come to Christ in his own time, and will, nor can he be brought into acceptance with God, by making vocal confession, in his carnal will, of belief in Him who died for him at Jerusalem, and in the same will declaring that he accepts Him as his Saviour. Confession of sin may be made without being the result of that conviction which the Holy Spirit alone can work; nor is a literal belief in the truths respecting Christ and his offices, as recorded in the New Testament, an availing acceptance of Him as the Saviour, disconnected from the work of the Holy Spirit in the heart. These may be called forth when the feelings are much excited by external circumstances, and the natural man, under some sense of judgment to come, may give expression to strong—perhaps suddenly awakened—emotions of the kind; but they are of no avail in the work of salvation, unless the Spirit of Him who came to seek and to save that which was lost, begins and carries on the work of regeneration, by his inward operation on the soul. Christ is the Alpha and the Omega; the First and the Last; the Author and Finisher of man's salvation, to all who obey his commands and instructions, whether received immediately through his

Spirit within, or mediated through his recorded teachings, or by other means of which He may make use.

But, dear Friends, while it is important for us to consent to the "doctrine which is according to godliness," we desire to impress upon all, that the holding of sound doctrine will be of little or no avail in working out salvation with fear and trembling, unless it is carried into practical exemplification, by simple, unreserved obedience to the requirements, however small they may appear, of that measure of "the Grace of God" which "hath appeared unto all men, teaching us that denying ungodliness and worldly lusts, we should live soberly, righteously, and godly, in this present world." As this obedience is yielded, this Divine Grace or Holy Spirit will not only take of the things of Christ, and show them unto us as we are prepared to receive them, but He will enable us to deny ourselves, to bear the cross daily in not being conformed to the world, and to submit to the necessary washings of regeneration; that being buried with Christ by baptism into death, we may be brought to experience the power of his resurrection and the fellowship of his sufferings; that like as He was raised from the dead by the glory of the Father, even so we also should walk in newness of life. You will find this heart-changing, self-sacrificing religion as taught by our Lord and his Apostles, set forth in the Scriptures of Truth, which we would urge on you diligently to peruse.

This was the religion which upheld the members of our Society, when subjected not only to the scorn and hatred of worldlings and high professors, but when called on to count their lives not dear unto themselves, so that they might finish their course with joy, and the ministry they had received of the Lord Jesus, to testify the gospel of the Grace of God.

Why then should any among us desire to forsake the pure religion of our forefathers? to turn aside from *their* footsteps, who gave such abundant evidence they were of the flock of Christ's companions; or why witness against them, by undervaluing and refusing to maintain in life and conversation all those gospel testimonies, into the adoption of which they were led by the Master whom they served?

Rather, while striving to walk in their footsteps, let each one prize the privilege of drawing instruction and encouragement from the testimony to the efficacy of a practical belief in the truth of the gospel, and the value of a restricted life consonant therewith, together with the glorious reward of the obedience of faith, as these were exemplified in their lives and conversation, and are recorded in their writings.

Much still remains in the professing church which has been introduced and continued through "philosophy and vain deceit, after the traditions of men, after the rudiments of

the world, and not after Christ;" and we cannot but believe that the blessed Head of the church is still seeking to purge it of all such spots and wrinkles. May we then not be found as a deceitful bow in the day of battle, but bowing low before Him in deep humility, crave that He will give us to see ourselves as He sees us, and more fully prepare and equip us to come up to His help against the mighty, and to build one another up on our most holy faith.

Toward our beloved young Friends our sympathy and love go forth, with renewed solicitude that the increased trials and perplexities, arising from the many voices and contrary practices now abounding, may not render you indifferent to the all-important work of your soul's salvation, nor yet subject you to be carried about by every wind of doctrine, by the sleight of men, and cunning craftiness; but rather that you may be taught thereby the danger of placing undue dependence on outward knowledge or performances; and induce you to seek retirement, and silent waiting upon God; to commune with your own hearts, and with that "Word which," as Paul saith, "is nigh thee, even in thy mouth and in thy heart."

Be persuaded, dear young Friends, to cooperate with the gentle intimations of this speaking Word, and to render obedience thereto, even in things which to you may appear small, and to the world foolish, and you will find that Christ is the same yesterday, to-day, and forever; his compassions fail not. He can save to the very uttermost, and to those who thus receive and obey Him. He will give power to become the sons of God. Rest assured, that though He has declared, that of those who are ashamed of him before men, He will be ashamed before His Father and the Holy angels, yet He is a rich rewarder of those who serve Him in child-like obedience, and that there are no joys to be compared with the joys of God's salvation. The acquirement of the perishing things of this world is not worthy to be put in competition with having up treasure in heaven, where neither moth nor rust can corrupt; and they are by far the most wise and happy who, like Moses of old, choose rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season.

Friends having been raised up to stand as witnesses for the spirituality, the simplicity, and the purity of the Christian religion, and against the corruptions that from time to time have crept into the visible church, we feel that great responsibility rests upon them; upon the young as well as upon the more advanced in years; upon them individually as well as collectively; and strong are our desires that the Lord may be pleased to turn his hand upon us for good, bringing our members of every age to a full surrender of their hearts to Him; that, through the regenerating power of the Holy Ghost, they may be prepared and made willing to rightly uphold the various testimonies committed to us to show forth before the world, and thereby "adorn the doctrine of God our Saviour in all things."

Issued, 4th mo. 1876.

Buddhism in Japan is declining. In a single district of Ken seventy-one temples have since 1873 been converted into dwelling houses or used for other secular purposes. During the last six years upwards of 600

temples have thus been diverted from their original object.

For "The Friend."

The following letter is abstracted from a series written by J. W. Forney, editor of the Philadelphia "Press," during a visit in Europe in 1874-75.

"What a garden is England! There is infinite progress in the large towns, but the beauty of the country must be the work of the ages. The old castles, the ancient inns, the super-solid roads, the vast estates, closed in with high stone or brick walls, the narrow streets, even the small towns, are so many evidences of the centuries of experience through which this great country has attained its present strong position.

You leave Liverpool by rail, and after a short ride reach the famous and ancient city of Chester, with its cathedral eight hundred years old; the curious wall that still surrounds it, from one tower of which Charles I. saw his army routed by the hosts of Cromwell; the ancient "Rows," distinctly recalling a period far remote; the Castle, a record in stone of the Roman occupation; and the luxurious estate of the new Duke of Westminster, Eaton Hall.

After a good night's rest in Chester at the principal hotel, "The Queen's," we started for the Staffordshire Potteries traversing a region of varied interest and beauty. The miniature houses and gardens at most of the stations looked like toy-shops, with their flowers woven into all sorts of figures and forms, and seemed an odd set-off to the great palaces of the gentry and nobility, of which we had glimpses in the distance. The history of the world is traced in the progress of the earthen, glass, or stone articles of the saloon, the parlor, the library, and the kitchen, used by the respective nations. Under the generic name of pottery, which includes all the varieties of earthenware, from porcelain down, you go back to the fifteenth and sixteenth centuries in Italy, Belgium, Germany, France, and in the seventeenth and eighteenth to England. England unquestionably leads in supplying the demand of most countries with all the varieties of these elegant and useful works. I was attracted to the Potteries by the growing interest in the ceramic art in the United States, illustrated by the enterprise at Trenton, N. J., and by the immense sums of money spent in our great cities for the products of these English manufactories.

Our visit to the Potteries in Staffordshire was a revelation. The district in which they are located is only about ten miles in length by one and a half in width; yet into this narrow space are crowded two hundred and sixty establishments, of which one hundred and thirty-four are devoted to earthenware, sixty to china, twenty-six to Parian, and forty miscellaneous. Here most of the finest wares and ornaments are manufactured, and thousands of persons are employed. The clays are mainly English; some are dug in the vicinity of Burslem. The English trade dates back into the seventeenth century. In 1759, Josiah Wedgwood, whose marble statue at Stoke-on-Trent attracts much attention, invented the exquisite adaptations, including terra-cotta, Jasper, and the famous queensware so much in fashion a few years ago, that made him illustrious in English history.

We traversed the renowned Minton works,

in which the finest conceptions of Wedgwood and his successors are wrought into the most beautiful forms by the skill of the present age. I was surprised at its comparatively small and ancient appearance. Yet here were found hundred men and women, boys and girls closely engaged. The show-room was a treasure of vases, flowers, figures, goblet with curious devices of all ages and taste, copies of the long gone past and models of living present. The process of manufacture was very curious. Here was the clay in plastic state turned into inconceivable shape by the wheel of the machinery and the cunning of the human hand; the kneaded lan worked into cup and saucer, bowl and goblet next passed into another room to dry, then to another to receive the picture, then to oven to be annealed into perfect beauty. The exquisite statuettes we see in terra-cotta in old windows at Gray's, Tynedale & Mitchell's, Caldwell's, and Bailey's, with the flower basket and bouquets, and the wonderful conceits of walls and pillars, all come hence. It was liberal education to watch how skillfully the artists did their work, and how quickly.

There was, however, in all this rapid review a practical side. I allude to what are known as "caustic tiles," which have become an essential feature in nearly every public and private building in England, and which, contributing to beauty, cleanliness, and durability, and freedom from vermin, I hope to see covering the sides and ceilings of our American houses. They are sometimes used on our floors, but rarely on the sides and ceilings of our rooms and halls. They are not so cheap as our modern processes, such as what we call calcimining, but they outlast all other methods.

From Stoke we rode to Birmingham—robust, healthy, noble town! We came into it with a sort of moral prologue worthy of remembrance and imitation in Philadelphia. The railroad station is over a mile from our hotel. We took a four-wheeled hack. Two friends who were with me asked, as we started, "How much a piece?" I said, "One shilling." They got to the hotel, and each offered his shilling to Cabby. He said, "No, gentlemen, my charge is only a shilling for all."

Birmingham had a population of 444,545 at the last census, and 65,377 inhabited houses. In 1841 the population was only 182,122, a growth that, large as it is, bears no proportion to the increase of Chicago or St. Louis. We must look at a few of the products of Birmingham to see the diversified capacity of this wonderful workshop of the nations. In its rifle factories it employs 4328 persons; in brass, 3892; in locomotives, 1661; in iron, 1561; in buttons, 1578; it has goldsmiths, 2477; coachmakers, 1144; Women are largely employed in lace, polishing, japanning, ribbons, steel pens, silk, and cotton. I name these occupations to show how nearly they are similar with ours; and when I showed a friend in Birmingham how many people are employed in Philadelphia, and at what wages, and our population, the value of our annual products, the number of our houses, many owned by our mechanics, he exclaimed, "And this is only one of your cities! What you tell me of New York, Chicago, and St. Louis is equally wonderful. Of course, I will be at the Centennial."

The churches and hospitals of Birmingham impressed me beyond utterance. The Hos-

gital of St. Thomas was founded in 1285! St. Martin's church is so old that its origin is lost, and the foundation of the present structure belongs to the early part of the thirteenth century! The public buildings are superb, as you may judge when the town hall is one hundred and forty five feet in length, sixty feet in width, and in height sixty-five. Here John Bright, who represents Birmingham, has frequently spoken to four thousand persons. I cannot describe its parks, its railroad stations, its great Exchange, its theatres, its statues, its devotional temples, its great colleges.

Stratford-on-Avon is about twenty-six miles from Birmingham, and a pleasant ride it was. We had a second-class car, and a first-class farmer to talk to. "Your crop is thin this year," I said. "Yes," he replied; "we have had little rain to speak of. Pray, are you not Americans?" "Yes, all three." "You like England?" "Very much, but our own country ever so much more." "I don't wonder; my boy is away over yonder in Marysville, California, and is doing right well, sir, and he is asking me to come to him." "Are you well off here, sir?" "Very nice, indeed, but we need our boy." "Stay where you are and let him come to you, as he can for a small sum, if he is only sober and good." "I thank you, sir. Here you are in Stratford, and you will find Shakespeare waiting for you. He has a strong, warm side for you Americans."

We posted across the country from Stratford to Kenilworth, Warwick, Guy's Cliff, and Leamington. How level the road! Great oaks or beeches, large fine houses of the gentry, suffocating villages of the poor, strong beer and bad gin, no population on the roads, all elegant, odorless, and silent—a breezy day, and a desolate distance. We saw Warwick's entrance carved through stone, its lordly halls half ruined by the fire of 1871, its pictures by the oldest artists, the bed in which Queen Mary slept, the great tower—and having duly paid our shilling apiece at the Castle, and our six pence to see the great "Warwick Vase," found in the Emperor Adrian's villa at Tivoli, capable of holding one hundred and sixty-eight gallons, we retired, and posted on to Kenilworth, five miles. When we got there the lovely evening had made a picture of the venerable place, not less lovely because there were sweet children and ladies on the lawn, and an artist, with his canvas on a portable frame, painting the scene from the green fore-ground. Here you stand in the midst of the centuries. From Henry I. to Elizabeth, Kenilworth was the theatre of war, diplomacy, and intrigue. Earl Clarendon is the present owner.

From Kenilworth to Leamington is about five miles. If Kenilworth is redolent of the past, Leamington is the trophy of the present. It is the growth of modern manners and customs—a mitigated sort of Saratoga—its healing waters and historic surroundings attracting crowds. England never suffers from what we know as summer. When Americans run off to the mountains and seaside in July, "the season" is at its height in London.

From Leamington by rail to another cluster of the centuries—Oxford—fifty-five miles from London. Here we stood among the stony record of ages of literature. From Alfred to Victoria we read the story of the gigantic growth of England. Over eight thousand students gather in these venerable

chambers. Twenty-one colleges and six halls constitute what is called the University. One library—the Bodleian, of three hundred thousand volumes, next to the Briti-h Museum; a vast procession of portraits of the great graduates and chiefs of the venerable institution; ancient groves, and lawns, and alcoves, with "Addison's Walk," recalling the memory of the gentle Spectator. You might give a week, a month, a year to Oxford, and still find material for interest and information."

From the "Guiding Hand,"

Fleming's Prophetic Warning.

"The testimony of Jesus is the spirit of prophecy," and, as "prophecy came not in old time by the will of man; but holy men of God spake as they were moved by the Holy Ghost," so throughout all ages the history of the church bears witness, that among those who have faithfully borne "the testimony of Jesus" to mankind, there have been men of sound judgment, sobriety, piety, and spiritual understanding, who at various times have testified to the impelling power of the prophetic spirit, which has caused them to speak with a might and a wisdom and a foreknowledge not their own; and whose words thus spoken have been made to stand firm against all the craft and scoffing of the ungodly, as a demonstration of the wisdom and the power of that Spirit which "searcheth all things, even the deep things of God," and takes "the things of God" and shows them to his people.

An eminent example of this may be found in the history of Robert Fleming, who was born at Yester, in Scotland, 1639; educated at the university of Edinburgh and St. Andrews, under the care of the godly Rutherford; called at the age of twenty-two to minister to the church at Cambuslang; ejected from his charge, with nearly four hundred other ministers, by the "Glasgow Act" under King Charles II.; driven to wander as a fugitive before his foes, imprisoned, released, guided at last to Holland, and called, after the death of Mr. Brown, to the pastoral charge of the Scotch church in Rotterdam, where he settled in 1677, and fulfilled a faithful and successful ministry, beloved by his flock and honored by his heavenly Master.

The records of his history represent him as eminent in the ministry of the word of God, a Boanerges and Barnabas combined, whose labors were owned of the Lord to the salvation of many. His charitable disposition caused him to view with regret the strifes and bickerings of Christians, saying, "I am amazed to see good men thus tear one another in the dark," and remarking again, "I bless God, in fifteen years I have not given any man's credit a thrust behind his back; but when I had grounds to speak well of any man, I have done so with faithfulness, and when I wanted a subject that way I kept silence."

The life of Fleming was emphatically a life of trust, and in all his persecutions his table was spread, even in the presence of his enemies, his cup was filled, and his head anointed with oil, and he was ready to distribute, willing to communicate, rich in good works; and, for the rest, his treasures were laid up in heaven.

His well-known work on "The Fulfilling of the Scripture," his "Treatise concerning the way of the Holy Ghost's working on the souls of men, especially after conversion, in communion between God and them," and an-

other in manuscript entitled, "A short Index of some of the great appearances of the Lord in the dispositions of his providence to his poor servants," &c., which recorded many particular instances of the Lord's providential dealings with him during his life, serve to show something of the current of his thoughts, and give some tokens of his deep and rich experience in the things of God. The following instance of his utterance of a prophetic warning and its awful fulfillment, is well authenticated by writers of reputation and veracity.

One day as he was preaching to his congregation at Rotterdam, he observed three young men among the audience, whose behavior was in the highest degree indecorous. The minister observing that the conduct was continued, reproved them therefor, and desired that in an assembly gathered for such a purpose, they should at least maintain a decent demeanor. This gentle admonition seemed rather to increase than abate their misbehavior; and they continued peeling oranges, cracking nuts, and distorting their faces at the minister.

Fleming was hence compelled a second time to admonish them; at which they appeared still more enraged than before, persisting in their conduct, and manifestly becoming more callous and incorrigible.

The worthy minister seemed so impressed and shocked at their hardened behavior, that in the midst of the discourse he made a solemn pause, and an awful one too—"prophetic of their end." He turned, and looked them full in the face for some time, apparently with much internal agitation. At length he addressed them in the following words, and in a most impressive manner and tone: "My young friends, I am sorry to be the bearer of such a dreadfully alarming message to you, and I have begged the Lord to excuse me from it, but he will not; therefore I must not shrink from the painful duty of declaring the awful and confirmed impression on my mind. I now tell you, that you have not a week longer to live in this world!"

This dreadful sentence, proceeding from a man, somewhat excited the doubtful apprehensions of the congregation, who thought it was the ebullition of precipitancy and rashness; and some of his intimate friends were of opinion, that religion would suffer scorn and reproach for it, especially if the prediction should not be verified. The minister added, "Let the event prove the truth of it; for I am persuaded I was moved by the Spirit of God to say and affirm what I did, as prophetic of their end."

Monday passed, and nothing occurred; but on Tuesday, one of the young men went on board a vessel to prosecute an intended voyage, which was fixed previous to this affair; and, in consequence of a violent storm that arose, the ship was driven on shore, and this unhappy youth perished in the tempest.

On Wednesday another of the young men was concerned in a quarrel with some person, the issue of which was fighting a duel, with swords, wherein this wretched victim fell.

On Thursday the only surviving one was suddenly taken ill, at which he began to be terrified, as two of his sinful companions were already cut off. He then was desirous to send for the same minister whom he had ridiculed. When Mr. Fleming arrived at his house, he asked the young man what he wanted him

for. The youth begged he would pray for him; when the minister requested to know what he would wish him to pray for. The supplicant replied, "For my life." "That is not in my power to do," rejoined the minister, "for I am sure you will die." "Then," said the youth, "beg, or pray, for the life of my soul, if you please." Fleming so far consented as to kneel down by the bed-side, in which posture he remained for a considerable time; but at length he arose, without having uttered a word. He then addressed the young man, saying that he found his lips so closed, that he could not utter a syllable on his behalf. He accordingly took his leave; and soon afterwards, this last remaining of the three scoffers died in horror and despair, accomplishing the prediction of the minister, and confirming that declaration of Holy Writ, "He that being often reproved hardeneth his neck, shall suddenly be destroyed, and that without remedy."

The scoffer may mock at this narration, as did these young men at the message of the man of God; and the formal Pharisee who prays by rote for one thing as well as another, and at one time as well as another, may doubt and cavil at such facts as these; but the man of God who, "praying always in the Holy Ghost," finds himself helped by that Spirit which maketh intercession with groanings which can not be uttered, will recognize the fact which his own experience has already shown, that there are things for which no spiritual Christian can pray, and times when supplication is forbidden. Alas for those concerning whom God speaks to his servants as he spoke to the weeping Jeremiah of old, saying, "Pray not thou for this people, neither lift up cry nor prayer for them, neither make intercession to me, for I will not hear thee." Jer. vii. 16. Happy are they in whose behalf "the effectual prayer of a righteous man" still "availeth much."

What the First Saloon Cost.

The Kansas State *Sentinel*, in recording a fact, draws a moral which we think none who study it can fail to profit by:

The first saloon licensed by the Board of County Commissioners, nearly nine years ago, paid fifty dollars for that privilege. It met a bitter opposition from the friends of temperance and good order, but the rum men were alert, and by presenting a bogus petition asking for it, the thing was granted, and fifty dollars are supposed to have gone into the treasury.

A change at once came over our town. Drunken men began to be seen upon our streets. Men who before paid their bills regularly, now paid so much for rum that their bills to honest tradesmen had to go unpaid.

The air of that saloon, night and day was made black with profanity, vulgarity and rum. Our young men went there and staid until the hours of midnight. What effect it had on them will never be written.

A poor hard-working settler down on the river, who had opened up a farm, and therefore maintained his family, began to visit the saloon and to neglect his home. One morning he was found outside with his head fatally crushed by a drunken companion. A long and tedious series of trials followed, costing the county over one thousand dollars, resulting in sending the murderer to prison for fourteen years, and breaking up his family.

The murdered man's widow made an attempt to keep her family together on the farm, and to furnish them with food, but in two or three years she died—no doubt from privation. A daughter soon followed her mother from the same cause; then the ragged children were sent to their friends in Ohio, at the expense of the county.

These facts are given from my knowledge of them, and just as they are. Now, let us see how this transaction paid:

The county got \$50.	
Paid to keep murderer fourteen years,	
say \$200 per year,	\$2,800
Convict murderer,	1,000
Send children to Ohio, say	75
Industry for six children, lost to the State ten years, at \$100 per year,	6,000
Total expense,	\$9,925
Deduct license,	50
Loss by transaction,	\$9,875

HOPES.

"Oh boy! why seek'st thou with such care,

Those bubbles of the sea?"

Thy touch but frees the prison' air,"—

"I'm gathering hopes," saith he.

"Old man, why in that shatter'd bark

Dost stomp this troubled sea,

Without a compass, rudder, mark?"

"I'm following hopes," saith he.

Selected.

"COME TO ME."

Art thou weary? art thou languid?

Art thou sore distressed?

"Come to Me!" saith One, "and, coming,

Be at rest."

Hath he marks to lead me to him,

If he be my Guide?

"In his hands and feet are wound-pricks

And his side."

Is there diadem as monarch

That his brow adorns?

"Yea a crown in very surety,

But of thorns."

If I find him, if I follow,

What his garden here?

"Many a sorrow, many a labor,

Many a tear."

If I still hold closely to him,

What hath he at last?

"Sorrows vanquished, labor ended,

Jordan passed."

If I ask him to receive me,

Will he say me nay?

"Not till earth and not till heaven

Pass away."

Finding, following, keeping, struggling,

Is he sure to bless?

"Saints, apostles, prophets, martyrs,

Answer, yes!"

Reproductive Force.

Every organism, from the humblest blade of grass to the most illustrious man, is not only living its own life, but impressing it upon myriads of other similar existences, and this not by any intentional act of its own, but by an inevitable law of its very being. In the simpler forms of life this transmission of self appears to be chiefly in the direction of propagation. The plant lives its individual life, and drops its seed, which springs up into similar organisms. As we rise higher in the scale, however, we notice that this reproductive force is widened in its action. The bird

not only lays its eggs, but cherishes its young, and doubtless maintains some degree of social influence upon its feathered mates. But it is reserved for man to exercise this power in its fullest and broadest sense. He reiterates himself, not only in his children but in all with whom he comes in contact. He impresses not only his physique upon a few, but his character upon the many. There are births of conduct going on continually, and each one of us is a parent. As the sun sheds unconsciously its light and heat, and makes all things within the range of its influence in some degree like itself, so we shed our dispositions and qualities upon one another, and transform them in some degree to our own image.

This influence is something quite apart from any voluntary and intentional action. We often deliberately set to work to produce some change in our friends or in society at large. Perhaps we work hard to improve a man, to educate a child, to promote a reform or to break up a vice. We may bring all our powers to bear upon the matter in hand, we may set other influences in operation, we may descant eloquently upon the advantages of one course and the evils of the other; nay, we may even call to our aid all the restraints of the law and the rewards of public favor, and with it all, we shall not accomplish so much as will a single, good and pure soul, so mystical attraction. The one is artificial, spasmodic, noisy; the other is natural, constant, quiet; the one is like medicine given to counteract some evil, the other is like a pure and bracing atmosphere entering into the lungs and giving new tone and vigor to the entire system.

Take the child from its earliest years—how is its character built up, its disposition engendered? Partly, no doubt, by the parents' active and earnest labors and precepts, but much more largely by their lives. The opportunities they have for deliberately instructing him are a mere nothing compared with those that he has for observing their conduct, drinking in their opinions, and finding out their real desires, feelings and aims. He is told, for instance, of the sacredness of truth, and the sinfulness of deceit, but if he sees those around him practicing small artifices, if he hears unkind transactions recounted as good jokes, if he is himself duped and misled by insincerity, how much will the moral lectures affect him? They will but add another instance of duplicity, and strengthen within him the spirit of dishonesty which he is constantly absorbing.

The same thing is going on everywhere, and with every one. We are all continually and inevitably influenced by the lives of those around us. It is not that we copy them, but that we unconsciously absorb them. We are, as it were, pouring our nature into each other all the time, without thought or intention. The stronger the nature the more potent is its magnetism. The closer we approach to the sphere of another, the more we partake of his character. Patience, courage, hope and enthusiasm are not taught, but infused. They are transmitted by an electric current that no power of ours could create, and certainly none could destroy.

We can never fully estimate this reproductive force. Not only every action, but every thought, feeling, desire and aim is full of potency upon others. They are constantly

being shared, and are ever writing their impressions on the characters of those with whom we mingle. We are always either lifting some one up or drawing him down to our own level. An atmosphere of some sort is always emanating from us, and permeating others. Is it pure or corrupt? Are we influencing the spirit of justice, truth and love, or of selfishness, deceit and hatred? Are we inculcating the habits of industry, temperance and frugality, or of idleness, sensuality and extravagance? As the fountain is, so will be the stream. If we would know what influence we are shedding, we have but to examine our most cherished thoughts, hopes and purposes. We may fancy them hidden in our own breasts, but it is not so. They are all at work reproducing themselves in countless forms in the hearts of others, and building up their characters for good or for evil.—*Ledger.*

Daniel Bowly, Jr.

(Continued from page 4.)

He recommended, that after being at meeting, and having been favored there with tender impressions of good, as he sometimes had been, great care should be taken not to lose them, by too soon entering into conversation, concerns of business, or attention to anything of a contrary nature, whereby the mind might be deprived of the benefit intended.

"Our profession," said he, "is a very exalted one; and if we keep to it, would make us as lights in the world. Our religion teacheth us to believe in immediate communication with God, through his beloved Son; which is an unspeakable privilege to all who attend to it, and, wonderful condescension! that he who is Lord of all, should thus notice poor man; and, time after time, be visiting with the offers of his mercy to insure our happiness; visitations we should be very careful not to reject, as being a common favor, and think we will accept them at some future time. For, though the Almighty is long forbearing and delighteth in mercy, we know not when may be the last offer of his grace to assist us in the work of salvation. What a dreadful thing would it be to withstand the last!"

Speaking of the evidence he had of his future peace, he said, "I have a clear view that I shall be received into the kingdom of rest and peace. I see the gates of heaven standing open to receive me, and thousands of the just waiting to embrace me. I desire but just to get within the pales of safety, to be in the presence of the Lord, and to behold his glorious countenance." "O! death, where is thy sting? O! grave, where is thy victory?" Christ taketh away the sting of death. My dear Saviour is reconciled to me. I know he is. His mercy is very great. I cannot speak enough of his mercy."

Some one remarking how exceedingly quick the last three weeks had apparently passed away, he replied, "Yes, and perhaps there are some who have not done anything in the time, which is a serious consideration: for in one week a man may be taken sick and die; and if we do not close in with the visitations of God in time, we shall be lost forever."

At another time, "Let us be earnest in making ready for the glorious kingdom of rest and peace, where, Oh, that we may enter! And all may, if they will. Let us endeavor to do a little every day; let none be discouraged, though their progress in religion may be slow; yet let them keep on in

their little way: for I believe our kind Saviour may, at times, withdraw his sensible presence from us to try how our faith will continue; yet if we hold on, our reward, at last, will be great, and as much as those who feel a present one."

On the 9th of the Eighth month, his sisters, who lived at a distance, came; at which he much rejoiced, having often expressed a desire to see them again. The next morning he affectionately addressed them, desiring they would be particularly careful of the cultivation of their children's minds; and not make business the first object for their sons; a very little being sufficient, and that great portions were by no means desirable. In much weighty advice to those present, he wished them to make an offering of all they had. Particularizing one of his sisters, he also said, "What thy conscience tells thee, that mind; and what is told thee to put on, that wear; and what is told thee to give up, give. Fear not the great or rich, but be alike to all."

"Be religious, and then you will have our Saviour's arm to lean upon. Oh, he is a merciful Saviour! I have found him such: an easy master, a kind friend. Ah! how I regret that I neglected serving him some years. Think what a superior education we have had, to most; what a nice institution is ours—the peculiar institution of God; and I believe it is not to die away, although some of our Society have gone from it, for whom I am sorry."

"I believe great advantage may arise from frequently comparing time with eternity, an awful eternity. It appears to me exceedingly awful. Heaven and hell are placed before us. We have now our choice; and we know what wretches hell is composed of; foul minds, full of remorse for ever; for their worm never dieth. On the other hand, in heaven there is great harmony. Oh, I have had beautiful prospects! I have seen the innumerable company of angels, and the spirits of good men! But how is it? We are ashamed of not complying with man, and not ashamed of doing so to God. We can apologize to man and say, we are sorry we did not do so, or so, and we can directly go, commit neglect before God, and feel no sorrow for it. Oh, what mercy there is! In great wisdom and unspeakable kindness is the good Mediator given to reconcile us, and work redemption in us. Do not let us fear man. What is he? Look upon me, and see a poor weak thing who can hardly speak."

After this earnest exhortation to those, for whose eternal happiness he was so affectionately and deeply sollicitous, he was much exhausted, and, desiring to be put to bed, uttered the following short ejaculation; "Oh, Lord God Almighty, be thou pleased to look down upon, and be with us!" With some difficulty he got to bed; and for several hours his cough and other symptoms were very alarming, and were thought to indicate approaching dissolution; but after having slept some time, he took some refreshment, and said he must now endeavor to say a few words more, as he might not have another opportunity. Most of his near relations being present, he called particularly to one of his sisters, requesting her to sit near him, that she might hear what he had to deliver; and he was wonderfully strengthened to testify with power to the truth; beautifully setting forth the means of salvation appointed for all.

Some of his relations standing by his bedside one evening, he remarked how contemptible the world appeared; and speaking of its wickedness, he added, "I would not be understood to despise the world itself. No; it is the creation of God; and we are placed there to enjoy all things with temperance. If it were as it ought to be, it would be a sort of paradise; it would be a happy pilgrimage to eternity; it is the depravity of man that makes it so detestable."

He cautioned some of his friends to beware of the fatigues and inembrances of business, saying, "It will not do for those who have been all the week in the hurry of business to go to meetings, and appear before the Lord in form only. A man whose time is wholly engrossed in business in common, if he goes to meetings pretty constantly, and sits there two hours, yet it is to be feared his thoughts will be engaged on that which takes up the greater part of his time; and if it be so, it is great mockery of God. Neither will it do to go on in an outward show of dress or address, if not true worshippers of the Lord, in spirit and in truth. They must daily give up their minds to him, daily retire to worship him. I know a man ought to provide for his family, and carry on a proper business, which I believe to be right; but it should by no means be the first object, for riches will be nothing in the end. What would I give now for all the world? Why nothing at all."

"I don't regard what the natural man may advance in opposition to this doctrine of giving up all for the sake of religion. I am now upon the brink of death to the body, but opening into the life of the spirit. I am going to live forever, and I am certain nothing will do but giving up every earthly obstruction for the cause of God. Make him a sacrifice; offer up all you have; offer up your lives to him, as Christ did his for your sakes and mine. Perhaps some may, from the strength of health and abilities, be ready to conclude what I say proceeds from weakness. I know it does not, but that it is the truth, and you will all find it so; and that man who trusts to the strength of his own mind, or natural understanding, will be wrong, for nothing will do without God. Now, remember this; think of it upon your death bed, and you will feel it is true. So farewell in Christ."

(To be concluded.)

Selected for "The Friend."

The annual Epistle of London Yearly Meeting for 1740, contains the following touching and instructive exhortation:

"And, dear Friends, as it is recorded in Holy Scripture that 'many of the priests and Levites, and chief of the fathers, who were ancient men, who had seen the first house, when the foundation of the second was laid before their eyes, wept with a loud voice.' (Ezra iii. 12); so many, in this our day, are affected with grief, in comparing the present state of the church with its first beginning; when the members thereof adorned the doctrine of the gospel in their lives and conversations; and the fruits of the Holy Spirit, viz: their patience, long-suffering, gentleness, meekness, temperance, love, sincerity, truth, humility, self-denial, plainness of speech and habit, were conspicuous to all. Wherefore we earnestly exhort, that Friends everywhere, who have swerved from the way of truth, would speedily return to their first love, and

turn their minds to the inward manifestations of Divine light, which discovers and improves the deeds of darkness, and leads to purity and holiness, and every good work; begets true unity and fellowship one with another, and a reverent and sacred regard to the truths delivered in the Holy Scriptures."

Review of the Weather, &c.
FOR SEVENTH MONTH.

	Selected.	
	1875.	1876.
Rain during some portion of the twenty-four hours, . . .	12 days.	12 days.
Rain all or nearly all day, . . .	0 "	1 "
Cloudy without storm, . . .	3 "	3 "
Clear, as ordinarily accepted, . . .	14 "	15 "
	31 "	31 "

TEMPERATURES, RAIN, DEATHS, &c.

	1875.	1876.
Mean temperature of Seventh month, per Pennsylvania Hospital, . . .	75.20 deg.	80.45 deg.
Highest point attained during do. do. . .	91.50 "	103.00 "
Lowest point attained during do. do. . .	60.00 "	59.00 "
RAIN during Seventh month, do do. . .	4.17 in.	6.20 in.
DEATHS during the month, being five current weeks for each year, . . .	2363	2989

Average of the mean temperature of the Seventh month for the past eighty-seven years, . . .	76.00 deg.
Highest mean temperature occurring during that entire period, 1872, . . .	82.31 "
Lowest mean temperature occurring during that entire period, 1816, . . .	68.00 "

COMPARISON OF RAIN.

	1875.	1876.
First month,	2.36 inch.	2.92 inch.
Second month,	2.84 "	3.68 "
Third month,	3.43 "	5.50 "
Fourth month,	1.36 "	1.98 "
Fifth month,	1.57 "	5.18 "

Totals for the first six months of each year,	16.81 "	20.66 "
Seventh month,	4.17 "	6.29 "
Totals thus far,	20.98 "	26.96 "

To enable us to have a correct idea of the "heated term" we have recently experienced, it becomes necessary we should go back a little. Through the courtesy of the compiler of the records at the Pennsylvania Hospital (C. G. Witzman), who placed them at our disposal, we are enabled to give the following facts:

The only day in the Sixth month when the mercury dropped below 66 was on the first, when 60 deg. was reached. The weather was steadily warm from that time until the 23d, inclusive, 90 degrees and upward being reached, as follows:

On the 3d, . . . 95	On the 11th, . . . 90
" 8th, . . . 91	" 15th, . . . 92
" 10th, . . . 94	" 16th, . . . 91
" 11th, . . . 94	" 19th, . . . 92

As low as 66 degrees being reached only three times during that period.

On the 21th of the same month the continuous extreme of heat may be said to have fairly set in, the maximum of temperatures for the balance of the month being as follows:

On the 21th, . . . 93	On the 28th, . . . 97
" 25th, . . . 96	" 29th, . . . 93
" 26th, . . . 99	" 30th, . . . 91
" 27th, . . . 99.5	

Following this continuous "heated term," wherein but little "let up" was experienced,

down into the Seventh month, the 23d of the month found the community almost exhausted, and the death rate of our city fearfully increased, reaching on the week ending the 15th the alarming number of 854, eighty of which were from sunstroke. During the three weeks ending the 22d, the total number of deaths from sunstroke was reported to be one hundred and nineteen with six hundred and four from cholera infantum. We cannot find in our diary kept for a number of years any corresponding week equal or exceeding it, except that ending on the 13th, 1872, when 885 deaths were announced. But to return to temperatures. During the first twenty-three days of the month the following high temperatures were reached, viz:

On the 2d, 101 deg.	On the 11th, 98 deg.
" 8th, 103 deg.	" 12th, 98 deg.
" 9th, 102 deg.	" 15th, 96 deg.
" 10th, 100 deg.	" 20th, 98 deg.

We believe the above high temperatures cannot be questioned, as we have heard from apparently reliable parties 105 degrees and 106½ degrees reported, but think these were due to undue reflection, not the current atmosphere.

The average of this thirty days of continuous heat was 81.81 degrees, and bear in mind this was at nine o'clock in the morning.

To have a correct idea of the intense heat we have passed through, and for such an unusually continuous period, it may be well to concentrate here a few facts.

Average of the mean temperatures for the Seventh month for the past eighty-seven years, . . .	76.00 deg.
Highest mean during that entire period, 1872, . . .	82.31 "

During which period the mean has only three times reached . . . 81.00 " The "heated term" commenced on the 19th of Sixth month, and continued until the 23d of Seventh month, inclusive—a period of thirty-four consecutive days:

The maximum mean of which, per our compilation from the records of Pennsylvania Hospital, was . . .	94.34 "
While even the minimum mean reached, . . .	70.75 "
The maximum mean of the last twelve days of Sixth month, . . .	92.08 "
The minimum mean of the last twelve days of Sixth month, . . .	67.66 "
The maximum mean of the first twelve days of Seventh month, . . .	95.55 "
The minimum mean of the first twelve days of Seventh month, . . .	72.41 "

We question much whether such an array of figures can be found in any other year, although it is barely possible something like it may be found in 1872. But it must be remembered that that year's record of heat does not run back into the Sixth month.

The report from the United States Signal Office says: "The comparative table shows that the range of temperature for this month has been as great, the maximum the highest, and the mean the largest, than for any similar month during the past six years."

J. M. ELLIS, 325 Walnut St.

Philadelphia, Eighth mo. 1st, 1876.

Extract from the Journal of Job Nell.

On the First-day following, the 22d of 11th mo. 1788, I was at meeting at Smith's Creek, in suffering silence. About this time Satan

seemed almost let loose upon me, to buffet me with doubts, even in things wherein I had been well established and assured. And persuaded I am, I have no words adequate to the full and clear description of the buffetings, horror and distress that seized and bore down my drooping soul; but I have since clearly seen, that the Lord's determination was, that if I would still be his, I should lay down my own life, that of my own will entirely, and in all things, and take him and his will for my only good, in and through all. And as my own will was once more crucified and slain my life laid down upon the cross—all within me bowed—on this wise then my soul addressed my God: "Lord, I know thou art all goodness; I have drank of the rivers of pleasure at thy right hand, which is all of thy mere bounty and grace; I surrender my all once more to thee without reserve. Here I am—do with me whatever thou pleasest—blessed and adored be thy name for ever—yield to thy will—not mine, but thine be done. Amen."

After this full surrender of my will and my all, light sprang in my soul; darkness fled before it; Satan's head was raised; God did truly bruise Satan under me; I saw his power was limited; and that the Lord God Omnipotent still reigned over all. Life and immortality was again, as it were, brought to light out of the depth of obscurity, and established over all in meridian brightness and assurance in my soul. Great enlargement followed this sore conflict, and my consolation was full and unspcakably glorious—blessed for ever be the Lord my God, and wonderful leader! in the heights my soul will praise him, and for the depths of prostration will I magnify his name, who makes all things work together for good to those who truly love him—Love him, O my soul, for ever, and submit thy all to his holy care and keeping, through every trying time.

After this most trying conflict, I found my way opened again, and had meetings at Crooked Run, Center, Mount Pleasant, Bear-Garden, Back Creek, Hopewell, Middle Creek, Taskarorah and Bull-skin, all open good meetings, and most of them eminently so, even to my own admiration! Truth's doctrines were largely opened with divine life and authority; many who were much unacquainted with true religion were much reached; and such as were hungering and thirsting after something more substantial than they had yet feelingly known, were greatly refreshed. My soul bowed in awfulness before that God, who, through the deepest probations and discouragements, safely brought me on in the right way; lauded me on firm ground; and even made my most fiery trials and extreme conflicts promotive of almost inexpressible enlargements and consolation.

Oh! he well knows what he is about, in suffering his chosen followers to be thus closely tried—indeed this is the very way they become chosen; for he ever chooseth them in the furnace of affliction; here he refines them as gold seven times tried in fire; thus they bear his holy law; thus they are made able to dwell with that which, to everything sinful, is as a devouring fire and everlasting burnings, and not be hurt; the fire shall not kindle on them to devour; the smell of it shall not be on their garments; but every thing in them that is chaffy shall be burnt up, in, and by this unquenchable fire; so the weighty

abstantial wealth comes to be gathered into the garner. Oh! thou traveller Sion ward, whenever the Lord leads thee in this line, sink not that none have walked the way before thee; but remember it is the high-way to glory; the only trodden path to blessedness—remember others, before thou wast sought forth, have deeply experienced it, have tasted the wormwood and the gall; and be ready to think it impossible for them to come forth into the light again, or to rejoice in God, the rock and horn of their salvation. But be thou patient, be thou faithful to death: yea, in and through this ward death, and thou shalt receive a crown of life; for it is an eternal truth, that though many are the afflictions of the righteous, yet surely the Lord delivers them out of them.

Next I had a meeting the 4th of 12th month, in the Presbyterian meeting-house at Finchester: a glorious good meeting it was—I was ready to think near as much so, as in low state, while clothed with clay, is capable of. Several important doctrines of the gospel were largely opened, having strength and utterance given—every mind seemed ushered into a degree of awfulness and reverence! all glory and praise be ascribed to him who is our only sufficiency; for with gratitude, and prostration of soul before him, it may be truly said, “hitherto hath the Lord helped us,” 1 Sam. vii. 12.

THE FRIEND.

EIGHTH MONTH 26, 1876.

It is related of John Woolman that when prostrated by the small pox whilst engaged in his last errand of love to his Friends in England, and after his kind female attendant had exhausted every means of alleviation which she could devise, without checking the vital disease that was fast quenching the vital flame, she panted in her efforts in a sort of despair, and exclaimed, “What shall we do now?” He calmly replied, “rejoice evermore, in everything give thanks.” This rejoinder has seemed to us one of the most sublime instances recorded of the triumph of Christian faith over physical suffering and temporal death; a fitting climax to a life more than usually hid with Christ in God. The apostle has beautifully foreshadowed such an experience in his exhortation to “be careful for nothing, but in everything, by prayer and supplication with thanksgiving let your requests be made known unto God, and the peace of God which passeth all understanding shall keep your hearts and minds through Christ Jesus.” John Woolman’s temperament may be said to have been unusually placid, and his thoughts accustomed to float in a spiritual atmosphere above the cares and anxieties of the world around him; yet he was a man of acute sympathies, upon whom the responsibilities of a minister of Christ ever sat lightly. Was not the secret of his strength in this critical hour, his freedom from anxious care respecting the issue of the malady, to be found in that daily habit of making his requests known unto God with thanksgiving, that praying without ceasing, which is coupled with “rejoicing evermore,” by the apostle?

J. W., however, as if sensible that the state of mind referred to was not always at our command, soon added, “this is not always easy of attainment.” Amid the various dispensations which the Christian traveller has allotted to him in his pilgrimage from Egypt to Canaan, doubtless he will find those of stripping of sensible joy, and clothing in the spirit of heaviness not withheld. They are among the “needs be,” of “heaviness through manifold temptations,” which Peter alludes to as necessary for the trial of our faith. The object of such provings being “that it may be found unto praise and honor and glory at the appearing of Jesus Christ.” The unusual exhaustion of nervous force which has resulted from the extreme heat of the past month, has tended, we apprehend, to depress the tone of feeling of many of our readers, whose age or enfeebled health had predisposed to a lack of buoyant spirits. Such as this, and other dispensations appointed in Divine Wisdom, which do not spare even the brave and strong-hearted at periods in life’s journey, often bow the spirit in mournful cadence to the voice which whispers that “all is vanity.” Charles H. Spurgeon says, “causeless depression is not to be reasoned with, nor can David’s harp charm it away by sweet discords.” As well fight with the mist as with this shapeless, undimable, yet all bedouling hopelessness. One affords himself no pity when in this case, because it seems so unreasonable and even sinful, to be troubled without manifest cause; and yet troubled the man is, even in the very depths of his spirit. If those who laugh at such melancholy did but feel the grief of it for one hour, their laughter would be sobered into compassion. Resolution might, perhaps, shake it off, but where are we to find the resolution when the whole man is unstrung? The physician and the divine may unite their skill in such cases, and both find their hands full and more than full. The iron bolt, so mysteriously fastens the door of hope and holds our spirits in gloomy prison, needs a heavenly hand to push it back; and when that hand is seen, we cry with the apostle, “Blessed be God, even the Father of our Lord Jesus Christ, the Father of mercies, and the God of all comfort, who comforteth us in all our tribulation.” * * * “Simon sinks till Jesus takes him by the hand.” * * * “When we are ridden with horrible fears, and weighed down with an intolerable incubus, we need but the Sun of Righteousness to arise, and the evils generated of our darkness are driven away; but nothing short of this will chase away the nightmare of the soul.” * * * “By all the castings down of his servants, God is glorified; for they are led to magnify him when again he sets them on their feet, and even while prostrate in the dust, their faith yields him praise. They speak all the more sweetly of his faithfulness, and are the more firmly established in his love.”

Let all those who may be brought under these proving dispensations, accept them in the spirit enjoined by the apostle James: “My brethren, (says he) count it all joy when ye fall into divers temptations; knowing this, that the trying of your faith worketh patience; but let patience have her perfect work, that ye may be perfect and entire, wanting nothing.”

In this state of humble acquiescence, we shall realize the power of Christ to work in

us in due season, both to will and to do of His own good pleasure, and through Him having access by faith into this grace wherein we stand, shall be enabled in His time to rejoice in hope of the glory of God; and not only so, but to glory in tribulations also, whilst we look not at the things which are visible to mortal ken but contemplate with the eye of faith those glories that are eternal, laid up in mansions which our sympathizing Redeemer has gone before to prepare for those who keep the word of His patience, and whose names He will confess before His Father and the holy angels.

SUMMARY OF EVENTS.

FOREIGN.—The British Parliament was prorogued on the 15th inst.—The Queen’s year speech, which was read by the Lord Chancellor: “The effort which, in common with other powers, I have made to bring about a settlement of the differences unfortunately existing between the Porte and its Christian subjects in Bosnia and Herzegovina, have been hitherto unsuccessful. The contest between these provinces has extended into Serbia and Montenegro. Should a favorable opportunity present itself I shall be ready, in concert with my allies, to offer my good offices for the purpose of mediation between the contending parties, bearing in mind alike the duties imposed upon me by treaty obligations and those which arise from the considerations of humanity and policy.”

A difference has arisen between my government and that of the United States, as to the proper construction of an article in the treaty of the 9th of August, 1842, which relates to the mutual surrender of persons accused of certain offences. The inconveniences to both countries which would follow a cessation or the practice of extradition are great and obvious, and I entertain the hope that a new arrangement will soon be arrived at by which the matter will be placed on a satisfactory footing.”

The Queen refers to the satisfactory settlement of the long-standing boundary dispute with the Orange Free State, which had been recently brought about by the visit of the President of that republic. The due attendance of the pupils at the elementary schools and other topics are briefly brought into view.

The superabundance of money in London is still a subject of regret. The Bank of England has a balance of interest remains at 2 per cent, but discounts of prime three month’s bills are made outside the bank at $\frac{1}{2}$ to 1 per cent.

The King of Dahomey, on the west coast of Africa, has a quarrel with the British authorities. He holds forth to Frenchmen—The Queen wishes her speech, which if the English squadron fires upon the natives.

The dory Centennial is now at Liverpool, having safely accomplished its voyage across the Atlantic.

Disraeli has issued a farewell address to his constituents, the electors of Buckinghamshire, by whom he has been returned to the British House of Commons four times in the past twenty years.

The explorations in Algiers to ascertain the feasibility of making an inland sea by cutting through to the Mediterranean, show that the surface of the country is such that a sea can be formed having a breadth of 35 and a length of 210 miles. The expenses are estimated at from eight to one hundred million francs, a part of which, it is supposed, will be borne by the Tunisian government.

The French Assembly was prorogued on the 12th inst. Moderate views and conciliatory feelings appeared to be general among the members.

The imports of Canada for the fiscal year ending 6th mo. 20th inst, amounted to \$35,055,532, which is a decrease of \$24,562,125 from those of the previous year.

The accounts from the seat of war in European Turkey are still of a confused and unsatisfactory character. A dispatch to London from Constantinople says, “The Paris Convention for the fiscal year ending 6th mo. 20th inst, nominated a successor, and nominate a successor. The British ambassador has protested against this course. The war is attended with many outrages and great cruelty which the Turkish government is unable to prevent. Some of the volunteers having sold Serbian children as slaves, the Grand vizier has given orders that henceforth any one guilty of such a crime shall be punished with death. The Turkish commanders are ordered to protect all peaceful inhabitants and their property. A Berlin dispatch says: It is reported that

the czar is anxious for a speedy termination of the war, and has personally besought the emperors of Austria and Germany to offer their good offices to the belligerents for the purpose of securing peace.

The latest Belgrade dispatches say that the Serbian army has been re-organized and will now resume the offensive. The Turkish forces had been repulsed in two partial engagements.

A special dispatch from Belgrade says that overtures were made on the 21st by the diplomatic agents of England, France, Italy and the three great northern powers looking to mediation. A British minister at Lisbon dispatch of the 19th states that great commercial embarrassment prevailed in that city. A general run upon the banks compelled them to close their doors, although they have assets in excess of liabilities. The government has issued a decree for the suspension of all bank-note payments, which it is supposed will give the embarrassed money institutions time to meet their engagements, as supplies of silver coin are expected from London. It is said this crisis need not have occurred if gold and silver had been sent for two weeks sooner.

UNITED STATES.—The first session of the Forty-fourth Congress adjourned the evening of the 15th inst., having been sitting since the 6th day of the Twelfth month, 1875. Less was accomplished than might have been expected in this protracted session, owing to the retirement of Mr. Webb, and the prevalence of violent party spirit. The two Houses did not agree on the President's proposition to authorize the raising of 5000 volunteer cavalry to operate against the hostile Indians, but finally agreed that the regular cavalry might be increased for this purpose to the extent of 2400 men. Various important bills, on which much time has been spent, will go over to next winter's session. Among these are the House bill to repeal that clause of the act for the resumption of specie payments which fixed a specified day for resumption; the bill equalizing bounties to volunteers in the late war; a bill for the removal of the land office to New Orleans. The treaty providing for free commercial intercourse with Hawaii was finally ratified by the Senate. The two Houses passed a concurrent resolution providing for the appointment of a commission, consisting of three members of each branch of the House of Representatives with experts selected by them, to inquire into the change which has taken place in the relative value of gold and silver, and into the policy of the restoration of the double standard in this country, also into the best means for facilitating the resumption of specie payments.

There were 612 interments in New York last week, and 409 in Philadelphia.

The number of paying visitors to the International Exhibition for the week ending the 12th inst., was 151,850, and that for ending on the 19th inst. 133,465. On the 17th receipt was \$4940, from the opening to 8 o. m., 18th, amounting to \$1,056,805.

The whaling bark Catalpa has arrived at New York from New South Wales, with nine Fenian convicts who effected their escape from the penal colony in the Fourth month last.

The Markets, &c.—The following were the quotations on the 21st inst. New York.—American gold, 110½, U. S. sixes, 118½, 119; do., 1866, 114; do. 5 per cent, 138½, 117. Superfine flour, 3.50 to 3.40; State extra, \$4.40 to \$4.50; finer brands, \$8.5 to \$10; No. 2 Chicago spring wheat, 1.20 to 1.15; do., 1.15 to 1.10; do., 1.05 to 1.00. Texas, \$4.65 to \$4.10. White oats, 40 to 45 cts. Rye, 70 cts. Yellow corn, 61½ cts.; mixed, 50 cts. Philadelphia.—Middling octon, 12½ cts. Flour, from \$3.75 to \$8.50. Michigan white wheat, \$1.25; amber, \$1.18 to \$1.20; red, \$1.10 to \$1.16. Rye, 60 cts. Yellow corn, 58 to 60 cts. Western mid., 43 cts. Do., 40 cts. To 44 cts. Sales of 280 live cattle at 4 to 6½ cts per lb. gross. Sheep, 44 to 55 cts per lb. gross. Receipts 11,000 head. Hogs, 295 to \$9.50 per 100 lb. net. Receipts 3500 head. Chicago.—No. 2 spring wheat, 89½ cts; No. 3, 87 cts. No. 4, 84 cts. Do., 85 cts. Do., 87 cts. Barley, 70½ cts. Lard, \$1.30 to 1.36. Do., 1.37. No. 2 red rail wheat, \$1.18; No. 3 do., \$1.05. No. 2 corn, 43½ cts. Oats, 37 cts. Rye, 49 cts. Barley, 50 cts. Lard, 104 cts.

EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these schools, to be opened about the first of next month. Apply to

Elihu R. Gilbert, 719 1/2 St. George, near 8th St.
George J. Scadding, old 413 Seventh St.
Richard J. Allen, 232 North Seventh St.
Ephraim Smith, 1110 Pine St.

RECEIPTS.

Received from Joseph Warrington, M. D., N. J., \$2.10, vol. 50; from James G. McCollin, City, Pa., \$2.10, vol. 50; and for Anna G. McCollin, \$2.10, vol. 50; from Elizabeth L. Evans and Lydia Saunders, Jr., N. J., \$2.10, vol. 50; from George L. Ayres, City, Pa., \$2.10, vol. 50, and for Isaac Price, S. Marshall Brinton, and James Means, \$2.10 each, vol. 50; from Isaac P. Wilbur, Mass., \$2.10, vol. 50, and for Mary A. Gardner, E. I., \$2.10, vol. 50; from James Hilyard, N. J., \$2.10, vol. 50; from Nancy R. Bullfinch, Mass., \$2.10, vol. 50; from Ed. W. C. Silliman, N. Y., \$2.10, vol. 50; from C. J. Mott, N. Y., \$2.10, vol. 50; for Jane P. Jones, Pa., \$2.10, and Joseph W. Jones, \$2.10, vol. 50; from Henry W. Wills, N. J., \$2.10, vol. 50, and for Joshua S. Wills, \$2.10, vol. 50; from Jordan Ballard, O., \$2.10, vol. 50, and for Cornelius D. Hays, N. Y., \$2.10, vol. 50; from T. A. Wilson and John A. Oren, O., and Mary Gibbs, Ind., \$2.10 each, vol. 50; from Lydia Ann Hendrickson, N. J., \$2.10, vol. 50; from William Webster, Pa., for Sarah North and David Hunt, \$2.10 each, vol. 50; from Joseph Stanton, O., \$2.10, vol. 50; from William D. Meyers, Pa., \$2.10, vol. 50, and from Henry Knowles, Agent, N. Y., for Elizabeth Peckham, Daniel Peckham, David Narbonne, Lorenzo Rockwell, David Peckham, John J. Peckham, John P. Carpenter, Benjamin Ross, Chester A. Weaver, Alonzo Knowles, Hubert Rockwell, and Robert Knowles, N. Y., Henry A. Knowles, Id., Martha Knowles, N. Y., Ann Amanda Gallinger, N. Y., Mrs. G. H. and Eliza Brewer, Canada, \$2.10, to No. 14, vol. 51; from Elizabeth Hunt, O., \$2.10, vol. 50; from Josiah L. Haines, City, +2, vol. 50; from Amy Middleton, N. J., \$2.10, vol. 50; from William Matlock, N. J., \$2.10, vol. 50; from Charles C. Shuckler, Pa., \$2.10, vol. 50; for Stacy Jorden, N. J., \$2.10, vol. 50; from Wm. Warrington, N. J., \$2.10, vol. 50; from Elwood Thomas, Pa., \$2.10, to No. 14, vol. 51; from John D. Harrison, Pa., \$2.10, vol. 50; from Levi B. Stokes and William Berry, Gtn., \$2.10 each, vol. 50; from Isaac Morgan, N. Y., \$2.10, vol. 50; from John Palmer, Pa., \$2.10, vol. 50; from Henry Palmer, Pa., \$2.10, vol. 50; and for Thomas C. Palmer, \$2.10, vol. 50; from Susan C. Gorham, N. Y., \$2.10, vol. 50; from Sarah C. Paul, N. J., \$2.10, vol. 50; from Deborah Satterthwaite, N. J., \$2.10, vol. 50; from Daniel Packer, N. J., \$2.10, vol. 50; from John D. Baker, N. Y., \$2.10, vol. 50; from H. D. White, \$2.10, to No. 13, vol. 51; from Josiah A. Roberts, Pa., \$2.10, vol. 50; from Joseph K. Evans, N. J., \$2.10, vol. 50; from Mary M. Applegate, N. J., \$2.10, vol. 50; from William Pickett, O., \$2.10, vol. 50, and for William Massey, \$2.10, vol. 50; from Josiah Fawcett, O., 10 cts. Philadelphia.—Mrs. M. C. Dutton, N. Y., 80 cts. Bonnell, Catherine W. Darlington, William Fisher, Hannah Bonell, Marian French, Thomas Y. French, Sarah Ann Cople, and Phoebe Ellison, \$2.10 each, vol. 50; from Ellis Winner, O., \$2.10, vol. 50; from David E. Baker, N. Y., \$2.10, vol. 50; from T. S. Bragg, N. Y., \$2.10, vol. 50; from Phoebe L. Wild, City, \$2.10, vol. 50; from Sarah C. Gaskell, N. J., \$2.10, vol. 50; from Ruth P. Johnson, Pa., \$2.10, vol. 50; from William H. Blackburn, O., for Jas. Head, Pearson Hall and Wilson Hall, \$2.10 each, vol. 50; from Saml A. Brown, Pa., per Mark Baldwin, \$2.10, vol. 50; from J. M. Dowe, Ind., \$2.10, vol. 50; from John Wilson, Ia., \$2.10, vol. 50; and for Charles Thomas, \$2.10, vol. 50; from George Brinton, Pa., \$2.10, vol. 50; from Jacob Roberts, Pa., \$2.10, vol. 50; from Martha Taylor, N. J., \$2.10, vol. 50; from Hannah King, N. Y., \$2.10, vol. 50; from Joel Walker, Agent, N. Y., \$2.10, vol. 50; from M. J. Dwyer, Pa., \$2.10, vol. 50; from C. Stokes, Ruth A. Harned and Walker Moore, \$2.10 each, vol. 50; from Charles Jones and Jane S. Comfort, Gtn., \$2.10 each, vol. 50; from Martha Sankey, Pa., \$2.10, vol. 50; from Palmer Good, Pa., \$2.10, to No. 14, vol. 51; from Elizabeth D. Mott, N. Y., \$2.10, vol. 50; from Stephen M. Trouble, Pa., \$2.10, vol. 50, and for John Withersoll, \$2.10, vol. 50; from Isaac Leeds, N. J., \$2.10, vol. 50, and for Susan Powell, Pa., \$2.10, vol. 50; from Sarah E. Evans, N. J., \$2.10, vol. 50; for Asenath A. L. Evans, N. Y., \$2.10, vol. 50; from Isaac Roberts, Pa., \$2.10, vol. 50; from Elizabeth W. Johnson, N. Y., \$2.10, vol. 51; from Susanna F. Sharpless, Pa., \$2.10, vol. 50, and for Ann Sharpless, \$2.10, and Lewis Forrester, \$2.10, vol. 50; from Jonathan Gray, R. I., \$2.10, vol. 50, and for Harvey Chase, R. I., and Isaac S. Estlin, N. Y., \$2.10 each, vol. 50; from Elizabeth C. Wood, \$2.10, vol. 50, and for Elizabeth Anntrim, \$2.10, vol. 50; from Rachel S. French, O., \$2.10, vol. 50; from T. I. Hayes, O., \$2.10, vol. 50; from Daniel J. Morrell, Pa.,

\$2.10, vol. 50; from William Carpenter, Agent, N. Y., \$2.10, vol. 50, and for Rebecca Wistar and William Sheppard, \$2.10 each, vol. 50; from Joel Thompe (Ed.), \$2.10, vol. 50; from Uriah Evans, N. J., \$2.10, vol. 50; from Charles, \$2.10, vol. 50; from Ellen R. Eddy, James Allen, Levi Trott, and John W. Stokes, \$2.10 each, vol. 50, and for Benjamin J. Wilkins, \$3.20 to No. 32, vol. 50; for Eunice Mickle, N. J., \$2.10, vol. 50; from Samuel Nicholson, N. J., \$2.10, vol. 50; for Elwood E. Haines, N. J., \$2.10, vol. 50; from Charles L. Harris, N. Y., \$2.10, vol. 50; from E. J. Zerk, N. Y., \$2.10, vol. 50; from Townsend Hoopes, Pa., \$2.10, vol. 50; from Susan T. Hoopes, \$2.10, vol. 50; from Joseph Spate, Gt. Jr., Agent, Pa., for William P. Townsend, Thos Thorp, Philena S. Yarnall, Susan S. Thomas, My Ann Newlin, Susan L. Temple, Harriet H. Thatch and W. G. Hunt, \$2.10 each, vol. 50; from Joseph Bailey and Joseph L. Bailey, Pa., \$2.10 each, vol. 50.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTTOWN BOARDING SCHOOL.

The Committee on Instruction of the Westtown Boarding School meets on Seventh-day, the 26th inst. at 10 A. M., at the Committee Room on Arch Street Philadelphia.

JOSEPH WALTON, Clerk.

MALVERN BOARDING AND DAY SCHOOL.

Will re-open on 2nd day, the 11th of 9th month 1876. Address,

JANE M. ELDRIDGE, Princi. Pa.

DIED, at her residence, Wilmington, Delaware, of the 11th of 4th mo. 1876, SARAH R. TATNALL, wife of Joseph Tatnall, aged 59 years, a member of the Westtown Boarding School. She was a devoted Christian, and her health she was enabled to bow in resignation, to the will of her Heavenly Father, expressing, a short time previous to her departure, the belief, "that all her trials had been for her purification,"—adding, "I see myself a very poor creature, just such an one as Jesus died to save; and when resting my mind on His merciful love, during a recent season of especial favor, succeeding nights of conflict; when many sweet and precious promises were presented to her mind, as though sent for her comfort and the confirmation of her faith. Perceiving her end approaching she remarked, "I am about to die, and I have felt great shrinking from death, but these have been all taken away—if I live is the Lord's will, I am ready, and willing to go." Thus mercifully supported, with, apparently, every doubt and anxiety fear removed; she passed peacefully away, as proved, as we recently believe, to receive the welcome message: "Enter thou into the joy of thy Lord."

—, on the 16th instant, JAMES E. KATHON, in the 68th year of his age, a beloved member of the Monthly Meeting of Philadelphia, for the Western District.

—, at her residence, in Salem, Ohio, 7th month 27th, of a long and useful life, REBECCA HARRISON REEVE, in the 71st year of her age, a member of Salem Monthly and Particular Meeting. She was a firm believer in the ancient principles of Friends, and often remarked with sadness the low state of our once highly favored Society. Although it was her lot to pass through many of the trials and afflictions which have been with Christian patience and resignation, and was, we believe, enabled to experience the reality of that beautiful expression in the 23d Psalm, "Ye, though I walk through the valley of the shadow of death, I will fear no evil, for thou art with me; thy rod and thy staff they comfort me."

—, at her residence, in Damascus, Columbiana Co. Ohio, on the 29th of 7th mo. 1876, REBECCA H. CARR widow of Isaac Carr, and daughter of Aaron A. and Mary W. Woolman, in the 60th year of her age, a member of the Upper Merioneth Monthly Meeting, and had been connected to live in a home of holiness and uprightnes; and when brought to a bed of languishing, she expressed, respecting her future prospects, that she saw nothing in her way, and patiently awaited her change as a member of her sufferings.

—, at her residence, in Salem, Ohio, near Trenton, N. J., after a brief stay, in the 7th day of her age, a beloved elder and overseer of Chesterfield Monthly Meeting. He was firmly attached to the principles and testimonies of the religious society of Friends, and was much honored by a large circle of friends and acquaintances, although rarely attending any religious communion by speech, his friends have the consolatory belief that through the mercy of his Redeemer his end was peace.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. L.

SEVENTH-DAY, NINTH MONTH 2, 1876.

NO. 3.

PUBLISHED WEEKLY.

Price, if paid in advance, \$2.00 per annum; if not paid in advance \$2.50; 10 cents extra is charged for postage on those sent by mail.

Postage on those sent by mail.

PHILADELPHIA.

For "The Friend."

Quakers and Quakerism.

[The following article is condensed from one which appeared in "Macmillan's Magazine," over the signature of Ellice Hopkins. It is written in a friendly spirit, and shows some true appreciation of the position and doctrines of early Friends. As was to be expected, the author dissenting from that practical bearing of the cross in every day life, which led to their peculiarities and testimonies; and without which they would be shorn of their strength.]

"Reader, wouldst thou know what true peace and quiet mean; wouldst thou find a refuge from the noises and clamors of the multitude; wouldst thou enjoy at once solitude and society; wouldst thou possess thine own spirit in stillness without being shut out from the consolatory faces of thy species; wouldst thou be alone, yet accompanied, solitary, yet not desolate, singular, yet not without some one to keep thee in countenance; a unit in aggregate, a simple in composite, come with me," says Charles Lamb, "into a Quakers' meeting."

Few, probably, of those who are familiar with the charming essay from which we quote have accepted the invitation. Few have made their way some summer Sunday into that quiet place, generally even in towns set round with waving boughs, and harmless flowers, and "fair ungriving things," which seems already to have attained

to where beyond these voices there is peace; where a soft multitudinous silence reigns as of a windless sea with all its waves at rest, where even the children sit with faces unflushed and wide-eyed as the daisies in the summer sun without, and the tired spirit, weary with the strife of tongues and all the barren noises of the outer world, bathes itself in stillness, while, in solemn Quaker phrase, "sitting before the Lord."

But, though few of us have any personal acquaintance with the silent charms of a Quakers' meeting, most of us have experienced a certain restfulness in the individual Quaker, especially in the women, the myrrh and cassia of those silent meadows they tread weekly still clinging to their garments. Perhaps in some noisy railway-station, some scene of foul-smoke and human bustle, we have suddenly found ourselves face to face with such a one, clad in that spotless Quaker vesture

which, like the lily's, refuses to know the defilements of earth, and have felt a sudden stillness come upon us as our eyes rested on those soft pearl greys that seem borrowed from early morning skies, and our troubled glance sank rebuked before those quiet eyes that gaze forth on us from under the peaceful caves of the quaint poke-bonnet, itself so restful a protest against the ever-shifting vanities of human head-gear, and the restless human brains beneath. And which of us on being asked with that tender Scriptural directness which refuses to slur over one's individuality by addressing one as a loose multitude in the plural form, "Art thou bound on a long journey?" has been altogether able to resist an eerie feeling creeping over him, a sense of a far-off silent bourne from which no traveller returns, as though he had heard in his heart a distant murmur, a waft of bells from that "strange and undiscovered city which we seek," as pilgrims on a far journey.

But though we are all familiar with the individual Quaker, and as a rule hold in love and respect this peaceful "Society of Friends," to give them, not the name by which they were called in derision by the world, but the beautiful name they chose for themselves—*la Société des Amis*, as their French brethren are called—little is generally known of their history, or of all that has been accomplished in the Christian Church by these worshippers of light and silence, a light "that lighteth every man that cometh into the world," a silence which is the voice of God in the soul.

We propose, therefore, in the present number to give a brief sketch of their history and constitution, without which it would be impossible to understand the position which they occupy, and then to enter in greater detail into what they have accomplished, the many remarkable movements in which they have taken the lead showing themselves on many points to be far in advance of the rest of the Christian Church.

Quakerism, as we all know, was founded by George Fox, born in 1624, the son of a weaver known as righteous Christy, who apprenticed him to a shoemaker, but as the shoemaker also dealt in wool, George's business was chiefly to see after the sheep. But it was doubtless from his master's shop that he got the materials for that memorable protest against the forlorn nakedness of man, which makes him a pauper dependent for out-door relief on his lowliest fellow creatures. It was doubtless there that he wrought that "leather hull from which the divinity and dignity of man was once again preached, no longer in scorn, as from the cynic's tub, but in love."

The owner of this "perennial suit of leather," this strange young shepherd, that same spring when Charles I. surrendered himself and his cause to the Scotch Presbyterians, might have been seen wandering forlornly about the fields of Drayton and Coventry, in sore conflict of soul, sitting in hollow trees alone with his

Bible, "for," as he says in that old Hebrew prophet's journal of his, "I found none to speak to my condition." The clergyman of Manchester, with whom he reasoned "about the ground of temptations and despair," bade him take tobacco, and sing psalms. "But," as he says quaintly, "tobacco was a thing I did not love, and psalms I was not in a state to sing." Another, a "priest of high renown," would needs give him physic, and he was to have let blood; but not a drop of blood could they get from him, his "body being," as it were, dried up with griefs, and sorrows, and troubles. "So neither them nor any of the Dissenting people could I join with, but was a stranger to all, relying wholly upon the Lord Jesus Christ."

At last, after enduring great troubles and torments, and when all his hopes in all men were gone, so that he had nothing outwardly to help him, nor could tell what to do, he heard a voice which said, "There is one, even Christ Jesus, that can speak to thy condition." "And when I heard it my heart did leap for joy."

Soon after he thus found peace, not in the systems of man, but in the "inward teaching of Christ, who hath the key, and who opened the door of life and light," George Fox began to preach, travelling on horse or foot all over the United Kingdom, and ultimately even extending his labors to the Barbadoes, America, and Holland.

To understand the effect produced by the preaching of this remarkable but uneducated man, one must realize the state of religious thought which then prevailed. Theology had not yet broken through a hard crust of scholasticism and logomachy which bound it in, and made it rather an endless disputing on words and notions, than a living grasp on facts and spiritual realities. A London minister could still undertake to prove the doctrine of the Trinity to some of the early Friends by the following syllogism, supported by a spurious text: "There are three that bear record in heaven, the Father, the Word, and the Holy Ghost, and these three are one."

These are either three manifestations, three operations, three substances, or three anything else besides substances. But they are not three manifestations, three operations, three substances, nor three anything else besides substances.

Ergo, three substances.

It is not likely that such barren verbiage as this would afford any common ground to meet on in the worship of common truth. Everywhere strife and confusion reigned, while a certain hard externalism which characterized the prevailing religious thought found its appropriate expression in persecution, the only ground of union being abhorrence of the "hideous idol, toleration." Calvinism, with its remorseless logic, which, if in M. Guizot's words, "it tortures history," still more tortures those infinite truths that from their very

nature burst the bounds of our narrow possibilities, and, existing as contradictions to the intellect, can only be apprehended as a whole by the moral emotions of man; Romanism, with its priest-craft and its burdensome rites and ceremonies, the gilded tomb beneath which the responsibility and freedom of man lay buried; a hard Judaizing Puritanism on one hand, and on the other a Church enforcing a rigid conformity, "as stanch and solid piece of framework as ever any January frost could freeze together;" what wonder that men were weary of it all? What wonder if men like Milton ceased to attend any place of worship, loathing the jarring of the sects; that Cromwell exclaimed in despair, "Every sect saith, Give me liberty; but give it to him, and to his power he will not yield it to anybody else." What wonder that men's souls were everywhere beginning to be sick of these disputed shadows, and to long for some undisputed reality?

To this craving the preaching of George Fox appealed, the "man who stood forth from the Babel of tongues, and preached the inner truth and meaning of all those things the sects were disputing about." That the kingdom of God is within us, that there is an indwelling Spirit, a light "that lighteth every man that cometh into the world;" that one must listen to his voice, not in the Babel of creeds without, not even in the letter of a sacred book, but in the silence of one's own heart within; that Christ's atoning work must be realized to the heart, and that it is the Christ in us which is the hope of glory;* that the Church is not "an old house made up of stones, lime, and wood; but the blessed company of all faithful people" who are walking by the inner light; that the true priest and prophet is the man or the woman in whom the Eternal speaks, and whose ministry is not for hire—this was the message of George Fox. Crowds gathered to hear him; wherever the report flew through village or town, "The man in leather breeches is come," the priests in many places fled in alarm; the "earthly and airy spirit in which people held their religion was shaken;" and numbers gave in their adhesion to this people, called Quakers in derision by an unjust judge whom George Fox had bade "tremble and quake before the Lord."

(To be continued.)

Testimony of Friends of Tortola concerning John Astagh.—His godly life and conversation spoke him to be a true follower of the Law, and minister of Jesus Christ, whom he freely preached, and by the effectual power of whose divine love he was called forth to our assistance; for which we bless, praise, and magnify the God of all our mercies. As a faithful messenger, with much love, in a tender frame of spirit, would he invite all to the fountain which had healed him. Of the deep humility that appeared in him in the time of his public testimony; and when in private conversation with his near and dear friends, as he often said we were to him, how cheerful and pleasant would he be in that blessed freedom wherein Christ had made him free. Innocent, harmless, of a cheerful countenance.

[* It must not be overlooked, that George Fox also reverently accepted the Holy Scriptures, and the atoning sacrifice of the Saviour on the cross—though he taught the sound Scripture doctrine that none could be saved thereby but those who submitted to the work of His grace in their own hearts.]

yet not without a Christian gravity, well becoming the doctrine he preached. He was valiant for the truth to the last, and though he has gone to his grave, his memory is sweet and precious.

Frivolous Instruction in the Common Schools.

Practical elementary knowledge was unquestionably the simple idea of the common school system. That simple idea has become a very complex one; and instead of thorough instruction in reading, writing, spelling, arithmetic, grammar, geography, and the history of one's own country and political institutions, children are coaxed, wheedled, dragged or driven over every division of science, into which knowledge, speculation or experiment has been formulated. The course of study which children from six to sixteen years are now expected to pursue with intelligence and profit, includes:

<i>Reading,</i>	<i>Latin,</i>	<i>Greek,</i>
<i>Spelling,</i>	<i>Botany,</i>	<i>Geometry,</i>
<i>Writing,</i>	<i>Geology,</i>	<i>Algebra,</i>
<i>Drawing,</i>	<i>Astronomy,</i>	<i>Chemistry,</i>
<i>Music,</i>	<i>Optics,</i>	<i>Mineralogy,</i>
<i>German,</i>	<i>Hydraulics,</i>	<i>Political Economy,</i>
<i>History,</i>	<i>Dynamics,</i>	<i>Rhetoric.</i>
<i>Zoology,</i>	<i>Physiology,</i>	

The mental energy of the child is thus distributed over this immense field, comprising all the accumulations of investigation which mankind have made since the beginning of time; instead of being concentrated upon the chief elements of all knowledge—namely, language and arithmetic—without a thorough familiarity with which honest progress in secondary studies is impossible.

The result of the distributive system of instruction is that the children of the comparatively poor, who constitute the large majority of every community, leave the common schools entirely unfit to earn their living with the intelligence and efficiency which might have been reasonably expected from the number of years they had spent there, and the cost of their instruction assessed upon tax payers.

A boy of sixteen is graduated from a high school, and seeks employment. He asks the counsel of a trusty friend, and this colloquy is likely to ensue:

Old Practical. Well, what can you do, John?
Concited John. Oh, almost anything, I suppose.

O. P. But what can you do?
Surprised John. Why, I can do—

And he flatters himself that his hesitation is certainly a mistake. Has he not been at school since he was six years old? Did he not "learn everything?" Was he not a smart boy? Has he not his diploma of graduation from the high school?

O. P. What have you been studying the last few years?

Complaisant John. Greek, Latin, German, French.

O. P. All right. You must go to college, and be a lawyer or a doctor—or a minister.

Wonted John. No, sir. Father is dead, and mother can't send me to college. I must go to work right away, and earn money. It is needed at home.

O. P. Very well. That does you credit. You know German and French. Mr. Lamonte, an importer, wants a correspondence clerk to read and write letters in those languages. That will be a nice place for you—

Perplexed John. Oh no sir. I only know little of each. I can read them in print well in the books we used, but I cannot spell them or write them.

O. P. Well, what else did you learn?

John. Chemistry—

O. P. That will do. The druggist on the corner wants a young man who understand the properties of chemicals and manufacture of drugs, and your knowledge of chemistry just the thing—

Scared John. Oh no, sir. I don't know anything about chemistry—only a little—some the definitions and pretty experiments. I had not much time for chemistry.

O. P. Him. You are equally well off in geology, astronomy, mineralogy, botany, zoology, optics, physiology, and all the other things, are you?

Chagrined John.—

O. P. Well, never mind. You studied geometry and trigonometry? Yes, of course. friend of mine, a surveyor, asked me to fit him a capable assistant, and he would pay him good wages—

Unhappy John. Oh no, sir. I could not do that. You see we had not much time for geometry; I can demonstrate some of the propositions in the book, by the letters—that's all.

O. P. You can draw? You can earn something in an architect's office? You can help the draughtsmen over in the Locomotive Works? That's a good business—

Laughing John. Oh no, sir! I can't draw. I had no taste for it, but went through the forms with the rest of the class, because we all had to. But I scarcely know a straight line from a curved one; mother always said I had no "eye" for drawing, or anything like that.

O. P. You're rather a neat and pleasant lad—fond of music? You studied that in school ever since you were a little fellow? Course. Well, I can get you a place in a music store—

Miserable John. Oh no, sir! I don't know one note or sound from another. We studied music in a sort of way, because we were "marked" on it, but I never could learn it. Mother knows I have no "ear."

O. P. Of course you can keep books?

Downcast John. Oh no, sir! I would not dare to try. We had a class one in single entry, but we were so busy with our Latin and Greek and geology—and all the other things, that we did not pay much attention to that.

O. P. Anyhow, you learned grammar and rhetoric, I am sure. That Mr. Kopp, who has an insurance agency, told me last week that he would like to get a nice smart young man who could prepare correct statements for him out of his books—write up his reports,—and so on. You are the very lad for Kopp—

Trembling John. Oh no, sir. I can't do anything like that. Why, I have not looked inside a grammar for years; we don't learn English grammar in the high-school, sir. Grammar is only taught in the lower grades, and then I was too young to understand it. Mother has had to correct my language at home, but I don't know whether it is correct or no. I can't parse—I never could. And we only wrote compositions now and then, and I always teased my sister into writing mine. Boys don't like composition as well as girls, sir.

O. P. I guess we'll have to fall back on your arithmetic. Your handwriting, I see, is

it very good, but you can improve that in a try. You learned all about percentage interest and foreign exchange in your arithmetic. I will give you a note to one of the banks—

Overwhelmed John. Oh no, sir! We did not study arithmetic in the high-school! and I never understood percentage—it is the hardest thing in the book. I was only a little wiser when we were in percentage, and I could get it through my head. Decimals always puzzled me—

O. P. You have been in school ever since you were a little fellow able to go. Your mother has kept you there, at great inconvenience, calculating that you would be able to support your brothers and sisters until they grew up. You have "studied everything"—including Latin and Greek and all theologies and drawing and music. I guess you can now earn fifty cents a week as a parcel boy.—*National Teachers Monthly.*

Daniel Bowly, Jr.

(Continued from page 13.)

The 12th of the Eighth month, addressing me of his sisters, he said, "Sister, how many times have I been preserved from death, times more than I can remember! Ah, how often, sister, have some of us been raised, as it were, from death! We should often think of it, and now we have answered the kind intention, it may not be so again. The next may be the last time. Then do let us begin to prepare and do every thing that is required of us. I believe plainness of dress is. We are indeed a chosen people, and what may not be wrong in others is so in us. Plainness of dress is as a hedge about us. The world is not then seeking our company. Do remember what our Saviour said, 'Whosoever denieth me before men, him will I also deny before my Father who is in heaven.'"

At another time he said, "I should be disgraced if on this death-bed, with all this pain and weakness of body, I had my sins before me. What horror should I feel!"

A Friend expressing a desire to help him, he replied, "None can help me essentially but my dear Saviour: he can release me, if it be his blessed will."

He advised one of his relations to bring up her children in a plain way: knowing from experience, what a disagreeable situation those were in who accommodated themselves to their company. "This," said he, "will not do." He believed the easy way chosen by many of our Society had as little religion in it as any, or less, and was highly displeasing to the Almighty. He also recommended a single line of conduct. He often spoke of the benefit of retirement, and said that other things must be given up to gain it. He wished not to be interrupted during meeting time; for, although not able to go, he loved to compose himself, when the nature of his complaints would admit of it, and was often favored with great stillness at those times.

He impressively said, "The enemy is still very busy with his insinuations, and would persuade me that all is done, and so lead to neglect; but I must watch and pray to the end, and be very earnest with the Almighty to continue his favors, and that he will support through all."

For some time he was much propped with poverty of spirit, added to great bodily weakness; but his desires were for patience, say-

ing, "It is very trying to bear such great lowness and sinking of body and mind. What can I do, but endeavor patiently to bear it, looking constantly to the Almighty?" Some one asking him how he was, he answered, "I am very low, but I keep mine eye upon God."

His sister, having sat up with him, remarking how comfortable a night he had passed, he said, with much sweetness, "Yes, I prayed for a little respite, and it has been granted me." About this time his strength recruited so much, for a few days, that the possibility of a recovery was hinted to him. This at first seemed almost more than he could bear; but after a pause he said, "In this also I will endeavor to seek after resignation, and keep mine eye to my Saviour; who, I ardently hope, will now take me, having in kind mercy so prepared me for my change. Can it be, after the near prospect that I have had, that I shall enter life again?" "Must endeavor, earnestly endeavor, after patience."

Some hours after, being asked how he did, his reply was, "I feel myself quite resigned. I have supplicated for patience, and I hope I shall be contented to live, if it be the Lord's will. I know he can preserve and keep me. Indeed I have experienced such resignation, that I think I could feel a pleasure in living, that I might bear my cross in the world." He was indeed preserved in a very patient, waiting, frame of mind, and expressed but little for several days; but his company was truly pleasant, and his deportment evinced where his mind was centered, though he said the enemy was so busy, tempting him to doubt, that he had hard struggles at times to keep his faith.

The effort of recovery was grounded, again subsided; his cough became more troublesome, and increasing weakness was evident. He remarked, "I believe I was too anxious to go, a little time since; but now I feel willing to wait the Lord's time for the end. I have reason to hope my disorder is making its progress."

He was naturally of a compassionate disposition; and, during his illness, often spoke feelingly of the poor, recommending liberality to them; which, he said, he had seen to be a Christian duty; and how much greater satisfaction would result from relieving their wants, than from unnecessarily accumulating wealth.

About the end of the Eighth month, he was strongly impressed with a belief that some one of his relations would be removed before him; and in a day or two after, an account came that one of his aunts, who had been for a long time in a poor state of health, was very unexpectedly deceased. When this was mentioned to him, referring to the above intimation, he said he thought he should now be soon released.

On the 1st of Ninth month, he said, "The state that I expect to enter is that of calmness and peace: divine peace, the purest spirituality." When I have spoken of gates or doors, I wished to imply an entrance into this state; for I believe my ideas of future happiness are not gross. I hope to live in the presence of God, and to feel constant support from him; and I do not wish to know more."

The next day he was very weak, and reluctantly left his chamber. Some hours after, he was seized with a violent fit of coughing, so that the hour of separation seemed, both to himself and friends, fast approaching; and

in a short respite from the cough, he expressed triumphantly, "I am happy, I am happy! If I never speak more, give my dear love in Christ Jesus to all my friends." After being relieved, by bringing up the phlegm, he was put to bed, and some time after remarked, "Death is awful! very awful! but I have full faith in my foundation."

At another time he said, "I believe my dear Saviour is ready to receive me, figuratively speaking into his arms: that is into purity; and I believe that is what all good minds desire to enter into." He desired he might not be disturbed when he was thought to be going; and hoped he should have an easy passage, and that he might go off in a sweet sleep. He said, "I have earnestly prayed for you. Do you pray for me." Shortly after, observing his friends affected, he said, "It is not from a callous disposition or hardness of heart, that I appear unmoved at parting with all my dear, dear, and beloved relations. It is the advantage I shall reap myself, that is my support; and knowing there is a powerful visitation extended to you, so that you may all gain an admittance, and soon be in the same place with me."

In the evening some one remarking how exceedingly hard it rained, he said, "I like to hear it; the sound of it is solemn, being the work of the Almighty." The withdrawing of the sun, and darkness, is like what good souls experience in the work of redemption; when divine light is withdrawn from them, and the damps of melancholy felt. In these seasons what strange ideas is the mind tried with; such as are very apt to cast down timid minds; but there is a secret support sustains, though at such times not sensibly felt."

On the 3d he expressed an earnest desire for an easy passage, making solemn supplication, as follows, "O, Lord God Almighty! have pity upon me. It was thou who created both soul and body." Some time after, to a near friend, he said, "I believe the enemy has now almost done with me."

On the 4th he was very weak, but still and composed. He said he was going to the Father and the Son; and, looking on his friends, bade them farewell. A short time after, he remarked that he felt such an entire resignation that, if it were the Lord's will, he was willing, even now, to recover or die; and how comfortable it was to be thus favored to the end. About twelve o'clock he took an endearing leave of two of his consins who had tenderly waited upon him; soon after which, a considerable alteration was apparent, and his voice was become so weak that little could be understood; but he continued in a heavenly frame of mind, full of love.

The last connected sentence which was distinctly heard, was as a seal to the foregoing truths, being this: "I have the satisfaction to say, I have been washed in Jordan."

Not long after this, he appeared to be retiring to sleep; but the fact was, that he was quietly departing; which he did in the manner for which he had so often prayed, without a groan, or even a sigh.

His corpse was interred on the 11th of the Ninth month, 1793, in Friends' grave yard at Cirencester. Aged twenty-five years and eighth months.

The highest act of charity in the world is to bear with the unreasonableness of mankind.—*A. Bennett.*

For "The Friend."

The Population of China.—Margary, the British consul, who lost his life by violence in 1857, when near the frontiers of China on official business, had travelled extensively in that country. He was also well acquainted with the language, and could not only read Chinese books, but he could converse easily with the Chinese, and as he travelled listened attentively to the conversations of the common people about him. A narrative of his journeys and observations has been published recently, in which he combats some of the prevalent erroneous notions of China, and among them the common one that the population is greatly denser than that of any other land with which we are acquainted. China is a large country with a very ancient civilization and has doubtless a great number of inhabitants, but in the absence of any accurate censuses, it is probable that we have entertained extravagant and exaggerated views of the number of its people, and that it does not contain, as has been sometimes ascertained, one-third or more of the entire population of the globe. On this subject Margary says: "It is very much the fashion to talk of China as if it were a sort of human beehive or ant heap, overburdened with struggling humanity, but I have never yet been overpowered with a sense of this multiplicity. The walls of Peking and indeed of every city embrace as much waste land and open space as ground which is fully occupied, and the open country is but sparsely dotted with villages. And since 1861 the unhappy central provinces, which were devastated by the rebels, have remained a wilderness, where now, in parts, the foreigner can roam at will and bag his game by thousands. Pheasants, deer and wild pigs multiply without hindrance. No wealthy sportsman at home can rival the natural preserves which a Shanghai resident freely commands."

Selected for "The Friend."

Ann Gilbert, in her autobiography, thus writes respecting the expected loss of one of her old and valued friends of Nottingham:

"A slice out of this world anywhere, is generally well colored with calamity * * * how long we are in learning practically the simple lesson, that here is not our rest! Year after year, as we go forward in life, we are constantly making a nest for our hopes in some cherished pleasure, some happy arrangement, something in which we have forgotten to look for the cankered side. And sometimes after wandering from hope to hope for the best, or rather the longest part of life, we are brought suddenly to deduce the mournful moral (mournful as far as earthly expectations are concerned), that here *truly*, not merely as a passage familiar to our memories, but in fact and reality, here is not a rest."

George M. Stearns tells this story, illustrating the character of the late Judge Wells. When acting as Trial Justice at Chippewa, in his early professional life, a drunken fellow on trial broke away from the officers and struck the Justice violently on the head. For an instant, said Stearns, the natural man blazed out of John Wells' eyes; but, speedily controlling himself, he ordered the man removed until morning—"because I was afraid I was too angry to be just." When the next day came, and sentence was passed, Jus-tice Wells

imposed the lowest fine that the law would allow, and paid himself for his assailant's liberty.—*Late Paper.*

HELPING THE BIRDS.

All day I have been hunting
For ends of scarlet bunting,
For pieces out of rackets, whose colors make a show,
Fragments of red, or azure,
Bright bits of doll-house treasure,
And faded bows and ribbons worn many years ago.

From sill and from projection
I hang this gay collection,
I strew the lawn and garden path, I fringe each bush and tree,
I dress the door and casement,
The garret and the basement,
Then watch to see if birds, perchance, will use my charity.

There comes a pretty chatter,
There comes a chirp matter,
Of tiny feet upon the roof and branches hanging low,
And flirts of wing and feather,
And little strifes together,
And sheers and flights and flutterings and wheelings to and fro.

There is a dash of scarlet
On yonder saucy varlet,
This one, just beside me, is dressed in blue and gray;
And this one is golden color,
And that one's coat is duller,
And here's a bird whose crest and tail have orange tippings gay.

A shadow and a flutter!
A chirp above the shutter!
See this swift oriole that wheels about the window, here!
Now flitting sidewise shyly,
Now, with approaches wily,
Circling and circling closer, between desire and fear.

O, pirates, dressed in feathers,
Careless of winds or weathers,
How you get to plunder, how bold you all have grown;
Here each among the number
His claws and beak will muster,
And carry off the strings and rags as though they were his own.

The stock is fast diminished,
And when the nests are finished,
The nests of orioles and wrens, of robins and of jays,
In pleasant summer leasures
I'll watch the rag-bag's treasures
Swing in the wind and sunshine above the garden ways.

—Wide Awake.

NOTHING AND SOMETHING.

By GRACE H. HORRE.

Left "nothing" O, that I can scarcely believe!
No land, no estate, and no treasures in store!
Cut off in his prime, and with "nothing" to leave!
Ah, then, in his death he was wretchedly poor!

Left "nothing" Left no sweet remembrance behind!
Left nothing to call forth the anguish of grief!
No brave, tender deeds in their hearts has he left,
Which now bring out sobs and tears for relief!

Left nothing to satisfy honor or pride!
Left nothing the higher emotions to move!
Left no grateful heart, who, when'er he is named,
Shall echo his praise in the accents of love!

Ah, then, he left "something" I thought so at first!
A true man he was; he was honest and kind;
He left a good name; that is "something," my friend—
A treasure of treasures, his children may find!

'Tis "something," I think, of a father to speak
In clear, happy tones, and with no blush of shame;
'Tis "something" to know, at his death, he bequeathed,
The good heritage of a brave, honest name!

—Christian Ado.

Noble deeds are held in honor, but the wide world surely needs,
Hearts of patience to unravel,—the worth of common deeds.

Testing Coin in the Royal Mint.

The London Times says: Although during the past year the work performed at the Royal Mint has been from various causes less than in some previous years, still the labor and responsibility falling upon the Freeman of the Goldsmith's Company, who yesterday acted as jurymen upon this trial, were very much the same as heretofore; all the tests to be applied to the various coins in the Pyx being the same, whether the coinage happens to be heavy or otherwise; the only saving of trouble to the jurors in the case of a limited coinage being, as on this occasion, the less amount of tedious counting of the moneys deposited in the Pyx since the last trial.

Pursuant to the terms of a warrant of the Lords Commissioners of her Majesty's Treasury, dated June 15, 1876, issued under the provisions of the Coinage Act, 1870, the officers, summoned from the various public departments interested in this trial, attended at Goldsmiths' Hall at 10 o'clock yesterday morning for the purpose of conducting the trial of the Pyx.

The following is the method pursued by the jury in conducting this very stringent and exact scrutiny of the work done at the Royal Mint, as prescribed by her Majesty's Order in Council of the 29th of June, 1871. First, the jurors have to ascertain that each packet of coins found by them in the Pyx contains the number represented by the officers of the Mint to be therein. It may here be stated that the Deputy Master of the Mint is bound to place in the Pyx, with a view to this trial, one coin from each "journey weight" of metal used in coinage; the journey weight in the case of gold being fifteen pounds troy, and of silver sixty pounds of the same weight. After satisfying themselves that the contents of all the packages are correct—a long and tedious job where the coinage during the past year has been heavy—they take as many coins from each packet as they think necessary for the purpose of the trial. They next have to weigh each of the coins so taken out, so as to ascertain whether they are within the prescribed remedy as to weight. This remedy, it should be explained, is an allowance in weight, below the actual standard made to the Deputy Master of the Mint in the manufacture of each denomination of coins, and, although very small, he has always been found to have worked well within his margin.

So delicate are the balances used in this operation, that it occasionally happens that a draught of air from the opening of a door or window will turn the scales—in fact, it is quite necessary to keep the atmosphere as much undisturbed as possible around the instruments. The exact result of each of these and the following tests has to be set out at full in the verdict. The next operation is this: The jurors melt all the coins of gold and silver so selected from the packets into separate ingots, and assay them, comparing them with the standard trial plates, so as to ascertain whether the metals are within the Deputy Master's remedy as to fineness. The standard fineness for fine gold is 1112 fine gold and 112 alloy, or millisimal fineness 916.66, the remedy being millisimal fineness .002. For silver coin the standard fineness is 37-10 fine silver and 3-40 alloy, or millisimal fineness 925, the remedy being millisimal fineness .004.

The gold trial-plate used in this test is of lead as nearly perfectly pure as possible to procure it, the preparation of which cost Mr. Roberts the chemist to the mint, infinite pains to accomplish. The Deputy Master, in his 14th annual report, lately issued, makes the following interesting remarks as to the metal which this trial-plate is composed: "As an instance of the intimate relation which should exist between technical work and pure science, I may call attention to the trial mentioned by Mr. Roberts, that the trial plate of pure gold made by him in 1873 has accidentally rendered good service in experiments in solar physics, a portion of this plate, which is probably the purest ever prepared, being used as a standard or comparison in photographing the spectra of certain other stars."

The residue of the coins is next weighed in bulk, so as to ascertain whether they are then the remedy as to weight. As many coins of gold and silver are now taken by the assay from such residue as they think fit, and assayed individually, to see that they are within their respective remedies. This operation being completed, the jurors then drew their verdict, embodying therein all the results of their various and searching tests. Each verdict was given to the Queen's Remembrancer at the appointed hour, read aloud by the Clerk of the Goldsmiths' Company, and signed by the Jurors and Sir Frederick Pollock. It will be found to contain a most complete discharge to the Deputy Master and his staff for the correct and careful performance of their duties during the past year.

The total value of the gold coined since the last trial, on the 21st of July, 1875, was £4,309,074 12s. 11d., which was converted into 1,409,074 half-sovereigns, of which 3800 half-sovereigns and 2347 half-sovereigns were placed in the Pyx. The value of the silver coined at the same time was £400,644, from which 1,602,608 half-crowns, 608 florins, 712 shillings, 340 pence, two fourpennies, 117 threepences, 10 twopennies, and six pennies (making a total value of £194 3s. 9d.) were placed in the Pyx for the purposes of this trial. A large quantity of bronze coinage was likewise issued during the past year; but of this latter no examination was made at the test of the Pyx.

True Faith.—A man dead in sin can adopt religious system, and become a happy professor, as easily as he can take up any other science, and this often perplexes the mind of those who are beginning to seek the Lord, because they find, now they are beginning to "love Christ," they have no control over "ames and feelings, so as to be happy at will. The life of Christ in a man makes him most sensitive to the power of Satan, and to the wiles by which he is ever living in wait to deceive. It also produces in a man the keenest apprehension of the solemn and boundless importance of eternal things. Such a man feels that true faith is the gift of God, and that to attain that assurance which above all things he desires, he must have Christ so personally revealed to his heart by the Spirit that he can say without doubt, "I know in whom I have believed." "I know that my Redeemer liveth;" and before he is brought up to live here in the blessed assurance of the agency, he knows what it is to be kept many years, perhaps, in the Lord's stripping-room; where, often in a state of terror of soul, on

account of the searching and idol-crushing process he passed through, while he is "suffering the loss of all things," he is perplexed to see many settle down around him in a profession, without apparently any exercise of soul at all as to the genuineness of their interest in Christ. They hear the Word, and anon with joy receive it! With the outward ear they hear of Christ; with a dead faith they believe in Him, like as they believe in Alexander the Great; and with a dead love they love Him, just as they do the immortal Howard, for the incomparable beauty of his character, naturally considered.

What should hinder these from settling down in a delusion? Satan will not disturb them; he knows they are secure in his pious trap. They are satisfied with themselves and their profession. Nothing disturbs such in life nor in death; excepting, perhaps, that their tempers become a little ruffled if a living one ventures to hint to them their fear that all the glittering of their piety is but that tinsel of death which is to be found existing to a great extent "in the gall of bitterness and in the bond of iniquity." Self-examination as to the performance of duties is a common and pleasing occupation with such, even if it involves a little penance for shortcomings; but to apply the fire to their lust, to test its purity is that which never enters the dead one's thoughts. However, whether in a profession or not, what a mighty change takes place the moment the kingdom of heaven is set up in a man's soul! From the moment that kingdom comes in power, self-deception, the will indifference of death, is at an end; and no more will peace reign and rule in that soul until Christ, the mighty King, is revealed in the heart, the hope of glory. Yes, it is a *real kingdom*, standing in a *real life*, and producing *real, unmistakable, living effects.*—*Episcopal Recorder.*

Grapes as Food.—We have on former occasions referred to the value of fruits as articles of diet, both in health and in sickness. Grapes may deservedly claim a high rank among the fruits in this respect. They contain a considerable amount of hydro-carbonaceous matter, together with potassium salts—a combination which does not tend to irritate, but, on the contrary, to soothe the stomach, and which is consequently used with advantage even in dyspepsia. According to Dr. Hartsen, of Cannes, in France, who has recently contributed an article on the subject to a foreign medical journal, the organic acids in the grape, especially tartaric acid, deserve more consideration than they have generally received. Their nutritive value has, he thinks, been much underrated. It is known that they are changed to carbonic acid in the blood, and possibly careful research may show that they are convertible into fats. Dr. Hartsen thinks that they should be ranked with the carbohydrates as food. They have been found a valuable diet in fever, and the success of the "grape cure" in the Tyrol and other parts of Europe, appears to show that they are positively beneficial in other diseases. No doubt the good results of a residence at this establishment are in a measure to be ascribed to the climate and the general hygienic discipline adopted. The advantage does not wholly consist in the fact that so many pounds of grapes are eaten daily, but partly in the fact that other less healthful things are not eaten,

and pure air and exercise are also important elements in the curative treatment. But after giving all due weight to these allied influences we must allow no small fraction of the beneficial result to the grapes.

We rejoice, therefore, at the increased cultivation of the vine in this country, and hope to see it go on extending wherever soil and climate permit. Let every man who can do it plant a centennial grape vine, or a score of vines, beside the "centennial tree," which the papers have been advising him to set out. He can eat the fruit of the former sooner than he can sit under the shade of the latter, and his children will bless his memory for both.—*Journal of Chemistry.*

For "The Friend,"

Resignations of Membership.

It is narrated of an eminent Counsellor-at-Law who, many years ago, took occasion to thoroughly examine our Book of Discipline, that he declared it to be "the greatest chain of consistencies" he had ever read; a sentiment, to which anyone will probably in measure respond, who examines for himself.

In the beautiful language of the introduction, we find the object of the establishment of the discipline thus set forth; and, though for want of space but a portion is here inserted, the whole of the introduction is well worth perusal and serious consideration.

"As it hath pleased the Lord in these latter days by his Spirit and power, to gather a people to himself; and, releasing them from the impositions and teachings of men, to inspire them with degrees of the same universal love and good will by which the Gospel was ushered in,—these have been engaged to meet together for the worship of God in spirit, according to the directions of the holy Law-giver; as also for the exercise of a tender care over each other, that all may be preserved in unity of faith and practice; answerable to the description which He, the ever blessed Shepherd, gave of his flock: 'By this shall all men know that ye are my disciples, if ye have love one to another.' John, xiii. 35.

"For this important end, and as an exterior hedge of preservation to us, against the many temptations and dangers to which our situation in this world exposes us, rules for the government of the Society have been made and approved from time to time, and the following now form our code of discipline."

With very little exception, no changes have been made in these rules for forty years, consequently any impression that they are more stringent now than formerly, is fallacious.

To the superficial examiner of the Book of Discipline, who reads its pages merely to note the subjects treated of, the thought might occur that there were some contingencies not provided for; and on the subject of resignation, he would find the book wholly silent. Whatever surprise this might occasion, it would probably disappear, as the reader became imbued with the spirit pervading the whole of the discipline; a spirit of love and earnest desire, that all should be living members of the Church, and faithful and exemplary in their maintenance of the doctrines and testimonies of the Society. Where this state is attained, there can manifestly be no occasion for resignation of membership, and consequently in this view of the aim of discipline, no call for providing for it.

If then a unity with our religious profes-

sion, and a life consistent therewith, present no room for a disposition or inclination to resign a right of membership, it follows conversely, that such a disposition or inclination must be the result of an alienation from (to adopt the language of the introduction referred to) "the religious principles and testimonies which we believe we are entrusted with, for the promotion of truth and righteousness in the earth;" or, a desire for "conduct subversive of its order." Seen in this light, the expression of a worthy Friend, many years ago, was not an unnatural one, that "where a resignation was presented, it was an evidence that something was wrong, calling for the care of Friends."

As the fundamental ground of an organized Society, is the promotion of the best welfare of its members and of mankind; and the principal motive for maintaining its organization, a belief that those interests are promoted thereby; there may be cases where it is not its duty to accept a resignation of membership.

There may be cases where such resignations are the result of hasty, ill-founded conclusions; of misapprehensions; of excessive discouragement; or of erroneous views, which might be corrected by wise and loving labor; and in regard to these, it is important to keep in mind the spirit which animates the discipline of our Society, and which seeks to bring back the wanderer to the fold.

On the other hand, there exists an abstract right in any member to disconnect himself from membership; for though the Society gives the children of members a privilege of membership, it will neither have others to join or members to remain as a matter of compulsion.

Liberty of conscience, is a principle for which Friends have always contended before the world, and they would not consistently apply it to themselves, if they wished to compel any to remain in membership against their will. Although the conscience may become grievously misguided and misled, there is a palpable want of honesty in any persons claiming to be consistent members of a society while declaring that they conscientiously disagree with its doctrines or its testimonies, or its regulations.

In the case of violators of our discipline, who cannot be reclaimed by the labors, and are consequently disowned by the meeting, it is the theory of our polity, that the act of separation has been that of the individual, not of the meeting; but that the latter simply declares it. It is therefore plain, that where an individual declares in writing, that he resigns his membership with a Monthly Meeting; and the Meeting is satisfied, that he has chosen for himself a course of life inconsistent with the principles or regulations of the Society; it cannot, in such case, properly decide the matter, but, *in effect*, must enter upon its minutes, as a matter of record, the fact of his resignation, and that he has thus separated himself from the Society of Friends, and is no longer a member thereof.—unless the Meeting accepts the inevitable alternative of laboring with him as an offender.

A Monthly Meeting must be guided by the spirit of true judgment, and by that alone in choosing between such alternatives when presented. Where any have gone astray the church owes them a duty of labor in the spirit of restoring love, but where there is no open-

ing for the labor, the service is released. As with the affairs of men, so with meetings, there must be a discernment of opportunities for the discharge of incumbent duties, and where these are disregarded the neglect may result in present weakness and future distress.

Brute Ferocity.—There are some things hard to believe—even with all we know of the baser possibilities of human nature. Some years ago a human animal, by habit called man, endeared himself to the baser sort of people, by killing rats like a terrier, with his teeth, and matching himself against quadruped dogs, with no other weapons than those which nature has provided. The scene of his exploits was Port Jervis, New York; and he afterward roamed away to St. Clairsville, in Pennsylvania. There, according to a letter in a New York paper, he has fought one dog too many, and is dead from his injuries. The story is too good to be reprinted here, but both the dog brute, and the man brute died.

This, it is true, is the very remote out-cropping of what is called sport, but without descending to so very low a depth, is there not some danger that in cultivating the mere muscle, and in contempt of what elevates man above the brutes, well meaning persons are not unconsciously drifting away from true manhood? It is a happy condition to be robust in strength, capable of enduring fatigue—in a word, to be "manly." But there are two sides to manhood. In one, the lower order of animals may be superior—the mere animal part of the human being. In the other, the moral and intellectual—the true manhood—man is without a peer; and it is certainly a woful descent, from the image in which he was created, when he prefers his animal to his intellectual attributes. Everything in the world gains or loses by its associations; and when any pursuit of amusement leads a young man away from respectable companions, he should at once consider whether what he gains in amusement is compensation for what he loses in character. And there is still a more important consideration—and that is whether he is not depreciating his own worth and manhood, and losing his self value and self respect, as well as the estimation of his friends. There is an old proverb about pitch, which young men will do well to remember.—*Public Ledger.*

For "The Friend."

When that good man, John Tauler, was drawing near to the close of his earthly pilgrimage, he sent for the poor layman, who, in previous years had been the Lord's instrument to turn his attention, to a Christian minister, from the letter that killeth, to the Spirit that giveth life. The man was obedient, and came to the master, who received him kindly and lovingly; and the man was glad that he had found him yet alive, and said, "Dear master, how fares it with thee?" Then said Tauler, "Dear son, I believe the time is near when God is minded to take me from this world; therefore, dear son, it is a great comfort to me that thou shouldst be here at my departure." On this, Tauler gave him some papers, in which he had written down the discourse which they had had together twenty years before, and begged Nicholas to make a little book of it, which the latter promised him to do. But Tauler earnestly enjoined him to conceal both their names; "for," he says, "thou must surely

know that the life and words and works which God hath wrought through me, a poor unworthy sinner, are not mine, but wrought in the power of the Almighty God, to who they eternally belong."

This appears to me to be in strong contrast with the willingness, if not positive desire prevalent these later days, to see one's own name for some good, in the public print. And I have queried, are not the publishers thereof responsible, for thus setting a snare in the way of some weak brother or sister who may thereby be tempted to think too highly of themselves than they ought to think, and lose ground through the pride-provoker and most needlessly practice of publishing the authors' names with the remarks that make, in "reports" and periodicals. It is I trust we want—the "apples of gold in pictures of silver." Can not we have this without setting "men to search their own glory without stimulating them to speech that savors not of God? I am aware that it is very gratifying to know who said this and that but is there not a danger of this curiosity being satisfied at too great a cost?

THE FRIEND.

NINTH MONTH 2, 1876.

In looking at the present condition of this so-called Christian world, it is interesting to observe the advances made in the arts and sciences pertaining to a cultivated community, and the general gradual approach to a correct policy for encouraging every one in an industrious effort to attain success in the career he may have adopted for his own maintenance and of those dependent upon him. There is encouragement in observing the prevailing endeavor to diffuse the light of knowledge throughout different classes, instead of contenting it among a chosen few, and so to plan and execute government as that in most of its relations it may encourage comparatively light on the natural liberty of its subjects and consequently its requisitions be but little felt.

With this great improvement in the state-society since the foundations of civil government were laid amid scenes of rapine and blood, it is astonishing to witness the inconsistency and obstinacy with which the professed disciples of Christ adhere to the policy of war, and advocate the propriety of taxing the people, and employing the revenue thus obtained, in preparing the most efficient means for taking human life, and in training a large portion of the more able-bodied citizens in the art of slaughtering their fellow beings. The time and ingenuity of some men who would think it derogatory to be charged with not believing the words of the Prince of Peace are almost wholly occupied in devising instruments the most destructive, that will ensure the greatest amount of carnage in the shortest time; while nations, acknowledging their dependence on, and praying for the blessing of Him who commands to forgive and love enemies, to do good to those who hate and despitefully treat you, act upon the principle that unless prepared to enter at a moment's warning on a course of retaliation, of murder and pitiless destruction, they must expect to be assailed and despoiled.

so carefully and continuously is the foul, ritual system cherished, springing, as is declared by divine authority it does, from man's corrupt passions, that even in our great international exhibition, professedly intended to cultivate the arts of peace, and remove national or sectional jealousies and dislikes, it has been thought appropriate to receive a "poster cannon" from Germany, to excite admiration and rivalry, and to parade thousands of troops, drawn from all parts of the globe, to give evidence of military prowess, and add eclat to the show.

Why is it thus? Why is it that with a general knowledge of the precepts and principles that characterize the Christian dispensation under which we live, and a professed obligation to adopt and live in conformity with them, that opinions and conduct in direct opposition to those gospel commands and teachings, which preclude all anger and strife, and carried out would prevent or put an end to war and bloodshed, are so popular in the community, and so readily followed into practice? We admit that the New Testament was written by holy men of old as they were moved by the Holy Ghost, and that the language employed was intended to convey to ordinary understanding divine truths and knowledge of the will of God, for the government of life and conduct, we may well ask how is it that those emphatic teachings of Christ and his apostles, which inculcate good will to man, love even of enemies, forgiveness of others in order to obtain forgiveness of our own sins, and praying for those who hate and persecute us; which, when practised by individuals, are confessed to be the fruits of the Spirit, when called for by circumstances affecting a nation, are ignored, unheeded or frittered away?

When the accumulated experience of ages has demonstrated that war is an incalculable evil, giving rise to crimes and suffering unequalled by any other scourge of the human race, and never producing beneficial results that could not have been better attained had the potent policy and resources of peace and good will been allowed to work their legitimate end, why is it that men, or communities, persist in resorting to the sanguinary horrors of the battle field to decide between right and wrong, and in lauding above all others, those who build their claims for celebrity in their successful participation in the murderous game of war?

The apostles and their immediate successors in the ministry of the gospel, preached the peaceable doctrines of Christianity, and consequently the primitive church stood in direct opposition to all military measures and engagements; very many of the early believers willingly laying down their lives rather than enter the army or bear arms. Their uniform testimony was, "I am a Christian, and therefore I cannot fight." But when the spirit of the world, which is enmity towards God, usurped the government that belongs to Christ; and those who professed to be his ambassadors and to teach his religion, became more solicitous to promote their own temporal interests by obtaining place and power, than to extend the kingdom of the Prince of Peace, they glossed over the plain precepts of the gospel to gratify the lusts that warred in their own members, and pandered to the evil propensities of men in authority, by perverting not only the plain commands of Him whom they

professed to serve, but the very spirit of his gospel of peace and good-will to men. Then it was that the testimony of the whole primitive church against war was given up, and the priests became advocates of resort to the sanguinary arbitrament of the sword for settling national disputes.

From that day to the present time, those occupying the position of ministers in the visible church, have almost universally, in this respect, followed in the footsteps of the hirelings who first introduced this deplorable heresy. This, we verily believe, affords the true solution of the astonishing anomaly of the great body of the nominal believers in Christ, tolerating and practicing the horrible atrocities of war, as being compatible with the dispensation of love, mercy and kindness, which our Saviour died to introduce. Those claiming to speak on his behalf have cultivated and spread the belief, in subservience to the assumption of necessity, that we are justified, under circumstances of aggression or provocation, in conforming to the impulse of our natural feelings of retaliation and revenge. Instead of teaching and urging the obligation resting upon all who name the name of Christ, to depart from iniquity, by obeying him in all things, and submitting to the self-denying power and principles of the gospel, they have drawn a veil over some of His plainest requisitions, and sought to sanctify the cruel and unchristian system of violence and bloodshed, which the apostle James declares to be the product of the lusts that war in our members. Had they uniformly and universally, whether basing their claim to be ministers of Christ on the assumption of "apostolic succession," or deriving their credentials from ordination by other men, preached the doctrine of the New Testament, that cuts up war by the roots, as it was held by the primitive church during the first two centuries, the profession of arms, the waste of human life and the revolting barbarisms inseparable from wars and fightings, we may fairly believe would never have polluted the Christian church, giving force, by their utter inconsistency with the religion professed, to the taunts of unbelievers, and obstructing the spread of the gospel among heathen idolaters.

Had all the ministers in the different churches at the time of Luther, instead of sanctioning resort to the sword, steadily urged the necessity of purging the Christian church from any participation in this prolific source of wickedness and misery, and had their successors in office conscientiously continued the good work, who can doubt that the present generation would be living near, if not in the time foretold by the prophet, when nation would not lift up sword against nation, neither would they learn war any more.

Here then rests, in large measure, the responsibility for the toleration and presence of the enormous evils of war among the professors of the Christian religion, and the question may well come home to some among us, the declared friends and advocates of peace, where is the consistency of seeking to justify or unite with those who, claiming to be Christ's ministers, use the authority attached thereto to support and palliate the military system? While maintaining christian charity towards all, let us bear a consistent testimony against mutilating the gospel of peace and salvation.

SUMMARY OF EVENTS.

FOREIGN.—Great heat has prevailed in England during the past two months, as well as in the United States, but the official reports show that the average weekly mortality throughout the kingdom has not exceeded 20 per 1000, the lowest being 15 in Nottingham. In London the weekly death rate was only twenty-one per 1000 of the population.

A large amount of gold has been withdrawn from the Bank of England, chiefly for export to Portugal.

Soundings for the Channel tunnel to connect England and France, have progressed so far that it is expected they will be finished in a week or two. The engineers report that the results of the soundings are very satisfactory.

According to the British Board of Trade returns for the Seventh month there was, during that period, a falling off of seven and a half per cent. in British imports, and of twenty and a half per cent. in exports. In seven months the imports have received £217,747,000, while the exports have been only £115,294,000.

The wheat crop of England will, it is stated, be less than an average, and probably not larger than that of 1875.

London, 8th mo. 28th.—Consols 95 5/16. U. S. five per cent. 107 1/2.

Liverpool.—Middling indies cotton, 6d. Orleans, 6 1/2d.

A Lishon dispatch says business is beginning to recover, and there is hope that financial matters will soon return to their normal condition. Bank notes circulate without discount, and are selling at a premium.

The elections in France of presidents of the Councils General, have resulted in the choice of 41 monarchists, 39 republicans and five constitutionalists. The republicans have gained seven seats.

The Spanish government has appointed a commission to enquire into the physical condition and capabilities of the Philippine Islands. A botanist is accompanying the expedition, who is to report on the condition and extent of the forests and the nature of the flora of the interior.

The rumors of a conspiracy at Pamplona, Spain, have been confirmed. Two serazens in the Spanish army near the city of Pamplona, were arrested, and were shot forthwith. Disturbances occurred at San Sebastian, but the disorders were promptly repressed.

The struggle in Servia has continued without decisive result. In a sanguinary and protracted contest at Alexinatz, south of Belgrade, the Turks, who were the assailants, were repulsed, and a lull, it is said, has suffered heavy losses. This success encouraged the war party in Servia and negotiations for peace were suspended. A Vienna dispatch of the 25th says, however, that on the previous night Prince Milan invited all the foreign consuls to a conference. It is understood that the conference related to negotiating an armistice, that the prince expressed a desire for peace, and requested mediation looking thereto. The consuls urged peace, and Prince Milan declared his readiness to comply with their advice. There may be a difficulty in settling the terms, as the Turks will probably demand an indemnity for the expenses of the war.

The Constantinople dispatch of later date says, that preliminary negotiations for peace have been opened between the foreign ambassadors in consequence of the steps taken by Prince Milan. A Berlin dispatch announces that the Powers have agreed to request the Porte to accede to a suspension of hostilities. Turkey will grant only a short armistice for the purpose of accelerating terms of peace.

At the latest dates the contest at Alexinatz was still undecided. The London News correspondent with the Servian army at Alexinatz says: The Servians lost 10,000 men in the first five days fighting around the town.

The past summer has been unusually warm in upper India. At Allahabad for ten consecutive days in the Fifth month, the mercury never fell below 110 degrees in the shade, and in the Sixth month it frequently rose to 115 degrees. At Calcutta the temperature was seldom above 95 degrees.

CUSTOMS.—The exports of merchandise from the United States for the past fiscal year, as furnished by the Bureau of Statistics, amounted to \$540,334,671, and the imports \$460,741,190, an excess of exports over imports of \$79,643,481. The exports of specie and bullion amounted to \$56,500,302, and the imports of the same to \$8,939,881.

The U. S. Secretary of the Treasury has made a contract with a combination of American and foreign capitalists for the sale of \$300,000,000 of four and a half per cent. bonds to be issued under the funding acts of 1870 and 1871, and due 1891. The purchasers take at pre-

sent \$40,000,000, with the privilege of taking \$200,000,000 more on the same terms. The Secretary will shortly call in 5-20 bonds to an amount equal to the proposed issue. By the new arrangement the interest account will be reduced four and a half millions annually.

The Black Hill miners are finding gold in considerable quantities, striking hostilities with the Indians. Eight hundred ounces of gold from that region arrived recently at Cheyenne from the Hills; also a piece of quartz, weighing about 25 pounds, which contained with free gold all over the surface.

Six Commissioners have been sent to the Sioux with Wasington, who are instructed to make a tour on the Indian territory. The Indian Commissioner has ordered that all sales of arms and ammunition at the agencies to either whites or Indians, must be stopped instantly.

The interests in Philadelphia last week numbered 307, viz: 163 adults and 204 minors.

The attendance at the International Exhibition last week was large. It was visited by 337,527 persons, 287,699 of whom paid for admission. On the 26th ult. visitors were admitted for 25 cents each, and on that day no fewer than 107,630 persons passed through the gates, 97,772 of whom, adults and children, paid for admission.

Egyptian rice has been cultivated in Texas, where it is found to grow well on prairie upland, and yields abundantly. The heads are larger, the grain heavier, darker and more easily obtained than the varieties heretofore cultivated.

Receipts, &c.—The following were the quotations on the 28th ult. New York—American gold, 110½; U. S. sixes, 1881, 119½; do, 1867, 117½; five per cent, 1841, 116½. Superfine flour, \$3.50 a \$4.10; State extra, \$4.50 a \$4.65; finer brands, \$5 a \$9. White winter wheat, \$1.26; amber do., -1.21; No. 2 Milwaukee spring, \$1.06; No. 3 Chicago spring, 90 a 99 cts. White corn, 45 cts; red, 53 a 60 cts. State red, 30 cts. Mixed corn, 56 cts; yellow, 55 a 60 cts. Philadelphia.—Middling uplands extra, 12½ a 12½ cts.; New Orleans, 12½ cts. Flour, \$1 a -8.25. Old white wheat, \$1.25; prime amber, \$1.19 a \$1.23; red, \$1.10 a \$1.15. Western rye, 60 cts. Yellow corn, 57 a 58 cts. White do., 44 a 45 cts. Oats, 30 a 31 cts. Beans, 10 a 10½ cts. Western 7, 8 a 8½ cts. Sides of 4000 head cattle, \$4 a 6 cts, per lb, gross for extra, 4½ a 5½ cts, for fair to good, and 3 a 4 for common. Sheep, 5 a 5½ cts, per lb, gross. Receipts 12,000 head. Hogs, 9 a 9.25 per 100 lb, net for corn fed. Chicago.—No. 2 spring wheat, 91½ cts; No. 3 do., 85 cts; red, 90 cts. No. 2 oats, 31 cts. Cincinnati.—Family flour, \$2.25. Wheat, 90 a 91 cts. Corn, 47 cts. Oats, 33 a 43 cts. Brandy, 85 a 88 cts. Lard, 9¢.

FRIENDS' SELECT SCHOOLS.

These schools, under the care of the three Monthly Meetings of Friends in this city, will reopen on Second-day, Ninth mo, 4th, 1876. The Boys' School, on Cherry St., above Eighth St., is under the care of Z-beebe Haines, as Principal. The Girls' School, on N. 4th, below Race St., is under the care of Margaret Lightfoot. There are also two Primary Schools for the instruction of those children who are too young to attend the higher schools; one of which is held in the Meeting-house at the corner of Sixth and Noble streets, taught by Deborah Brooks, the other in the Boys' School building on Cherry street, under the care of Susanna Hines.

The attention of Friends residing in this city and its neighborhood is particularly invited to these schools. The terms are moderate, and Friends belonging to Philadelphia Yearly Meeting, sending children to these schools, (also members who may find the charges burdensome, can be fully relieved.) In the primary schools opportunities are afforded of obtaining a liberal education in useful branches of Study, and in the Latin and Greek languages. Facilities for illustration are afforded by a valuable collection of philosophical and chemical apparatus, minerals, and Anaxax's models of parts of the human system is also taught in the Girls' School. In the primary schools the children are well grounded in studies of a more elementary character.

It is desirable that applications for admission of children should be made early, and that parents returning children to the schools should send them at the beginning of the term.

Further information may be obtained upon application to the Treasurer, JOHN W. SMEDLEY, No. 415 Market street.

RECEIPTS.

Received of Margareta E. Reed, Pa., \$2, vol. 50; from Phoebe H. Mitchell for George Upton, N. Y., \$2.10, vol. 50; from Ann H. Bacon, N. J., \$2.10, vol. 50, from Clarkson Moore, Pa., \$2.10, vol. 50; from Amos Lee, Pa., per Jesse Hall, \$2.10, vol. 50; from Rebecca S., \$2.10, vol. 50; from Mrs. Mary Ann, for George T. Satterthwaite, \$2.10, vol. 50; from Mary Allen, City, \$2, vol. 50; from Hannah Hoffman, City, \$2.10, vol. 50; from John Brantingham, O., \$2.10, vol. 50, and for Isaac Cole, \$2.10, vol. 50; from Ira J. Parker, Pa., for John Warner, \$2.10, vol. 50; from Charles T. Westcott, \$2.10, vol. 50; from Benjamin M. Kinsley, N. Y., for William Harvey, G. W. Brickett, Andrew Hinshaw, Jonathan B. Parker, Milton Stout and Cyrus Stout, \$2.10, each, to No. 82, vol. 49; from Mary P. Gibbons, City, \$2, vol. 50; from Margaret Lightfoot, City, \$2, vol. 50; from Seneca Lincoln, Miss., \$2.10, vol. 50; from Maria Pusey, Pa., \$2.10, vol. 50; from Richard, Dryden and Irish Barton, N. J., \$2.10 each, vol. 50; from Parker Hall, Agent, O., \$2.10, vol. 50, and for William Hall, William Hall, Jr., John W. Smith, Lewis Taber, Josiah Hill, Robert Smith, Jonathan Binns and David Binns, \$2.10 each, vol. 50, and for Joseph R. Russell, \$2.10, to No. 20, vol. 50; from Joseph H. Burt, \$2.10, vol. 50; from George W. Hibbs, Pa., \$2.20, vol. 50; from William Windle, Pa., \$2.10, vol. 50; from William R. Bollock, M. D., Del., \$3.20, to No. 52, vol. 50; from Martha R. Comfort, N. J., \$2.10, vol. 50; from Anna T. Hancock, City, \$2, vol. 50; from George Matlack, N. J., \$2.10, vol. 50; from John H. Light, Agent, N. Y., \$2.10, vol. 50, and for William Brockton, Hibbard, Fuller, David Haight, Humphrey S. Haight, and Levi H. Atwater, \$2.10 each, vol. 50; from Caleb Hoopes, Pa., \$2.10, vol. 50; from Lewis Passmore, Pa., \$2.10; from Charles Lippincott, N. J., \$2.10, vol. 50; from Samuel Williams, N. J., \$2.10, vol. 50; from Francis Lightfoot, each, \$2.10, vol. 50; from George T. Satterthwaite, \$2.10, vol. 50; from Margaret Miller, N. J., \$2.10, vol. 50; from Martha H. Lincoln, Pa., \$2.10, vol. 50; from Owen Y. Webster, Jr., \$2.10, vol. 50; from Thomas M. Harvey, Pa., \$2.10, vol. 50; from Edward Sharpless, N. J., \$2.10, vol. 50; from Z-beebe Haines, N. J., \$2.10, vol. 50; from John H. Light, Agent, N. Y., \$2.10, vol. 50; from Isaac Hall, Pa., \$2.10, vol. 50; from John H. Ballinger, N. J., \$2.10, vol. 50; from Thomas S. Pike, N. J., \$2.10, vol. 50; from John R. Tatum, D. A., \$2.10, vol. 50; from Royal Woodward, N. Y., \$2.10, vol. 50; from Daniel Satterthwaite, N. J., \$2.10, vol. 50, and for John H. Light, Agent, N. Y., \$2.10, vol. 50; from Mich. Reuben Satterthwaite, City, Daniel Satterthwaite, N. Y., \$2.10 each, vol. 50; from Ruth Foster, R. I., \$2.10, vol. 50; from Samuel Shaw, Agent, O., \$2.10, vol. 50, and for Francis Britney, Mich., \$2.10, to No. 22, vol. 51, and John Hines, Bark Ashton, Rachel Cole, Levi Bollon, Hannah Blackburn, Nathan M. Blackburn, Benjamin Harrison, Joseph Taylor, Millan Cadwallader, David Wickeshaun, and I. Thomas Blackburn, O., \$2.10 each, vol. 50; from Abner Eldridge, Agent, Io., \$2.10 vol. 50, and for Alexander L. McGrew, M. A. Fritchman, and Nancy L. Thompson, \$2.10 each, vol. 50, and Sarah Tipton, \$2.20, to No. 52, vol. 50; from John H. Light, Agent, N. Y., \$2.10, vol. 50; from Thomas B. Warner, Joseph W. Warner, and Matilda Warner, \$2.10 each, vol. 50; from Esther H. Prickett, N. J., \$2.10, vol. 50; from John Woolman, City, \$2, vol. 50; from Martha T. Cox, City, \$2, vol. 50; from Gilbert M. Grew, O., \$2.10, vol. 50, and for John Hoyle and Anna L. Negus, \$2.10 each, vol. 50; from Parker Hall, Agent, N. Y., \$2.10, vol. 50; from John H. Ballinger, Brackin, Jonathan Fawcett, Esther Fogg, and Israel Steer, \$2.10 each, vol. 50; from Henry Clark, O., \$2.10, vol. 50; from Daniel Williams, Agent, O., \$1, to No. 52, vol. 50, and for Asa Branson, Joseph Bailey, Isaac Mitchell, Jacob Holloway, Joseph Walker, John C. Wood, and Josiah Hill, \$2.10 each, vol. 50; from Thomas Holloway and Mary Chandler, \$2.10 each, vol. 50; from Stouglend Stokes, Pa., \$2.10, vol. 50; from George L. Smedley, \$2.10, vol. 50; from Phillip P. Dunn, N. J., \$2.10, vol. 50, and for Thomas A. Bell, Pa., \$2.10, vol. 50; from Richard Hill, Agent, England, 10, 51, vol. 50, and for Josiah Hill, \$2.10, vol. 50; from Thomas Williamson, Peter Eggleston, William Walker, Joseph Thompson, William Wigham, John Little, John H. Walker, Martin Lindbeter, George M. Gundry, Nancy Ripson, Richard B. Brockbank, and Hannah Pearson, 10, 51, each, vol. 50; from Susan Williams, £1, 10s, vol. 50; from George W. Hines, \$2.10, vol. 50; from Thomas Jackson, 10s, 6d, each, to No. 31, vol. 51; from Benjamin P. Elliott, City, \$2, vol. 51; from Daniel Maule, £10, \$2.10, vol. 50, and for Joseph Matlack, Pa., \$2.10, vol. 50; from Charles Bell, N. J., per Joseph Walton, \$2.10, vol. 50; from Charles Darnell, N. J.,

\$2.10, vol. 50; from Sarah B. DeCon, N. J., \$2.10, vol. 50; from Sarah Hoopes, Pa., \$2.10, vol. 50; from Thomas Woolman, City, \$2, vol. 50, and for Enos S. Eldridge, Pa., \$2.10, vol. 50; from Joseph Satterthwaite, Jr., Agent, Pa., for Sarah Yarnall, Sarah C. Passmore, Samuel B. Kirk, Isaiah Kirk, Pinneus Porter, Rach E. Woodard, Nancy Gibbons, and Elizabeth M. Wood, \$2.10 each, vol. 50; from William Smedley, City, \$2, vol. 50; from Richard J. Allen, City, \$2, vol. 50; from Richard W. Bacon, City, \$2, vol. 50; from Frederic Muerkt, O., \$2.10, vol. 50, and for Stacy Cook, \$2.10, vol. 50; from William Carpenter, Agent, N. J., £1, Josiah Winter, Richard M. Axtell, Ann D. Smedley, Samuel P. Carpenter, Lydia F. Zorn, Leitia Rees, and Aehsh Reeve, \$2.10 each, vol. 50, and for William C. Reeve, \$2.10, to No. 14, vol. 51; from William Evans, N. J., \$2.10, vol. 50, and for Mary Evans, \$2.10, vol. 50; from Joseph S. Moore, City, \$2.10, vol. 50, and for Walter Moore, Pa., \$2.10, vol. 50; from Mary T. Satterthwaite, City, \$2, vol. 50, and for Mary H. Cadwallader, \$2, vol. 50; from Hannah P. Ruhlup, N. J., \$2.10, vol. 50; from Rebecca Hibberd, Pa., \$2.10, vol. 50; from Jacob P. Jones, City, \$2, vol. 50; from Thomas Perry, R. I., for George Foster, George G. Foster, J. Burely Foster, and Elizabeth Perry, \$2.10 each, vol. 50; from George S. Hutton, City, \$2, vol. 50, and for George Pandrich, Pa., \$2.10, vol. 50; from Hann Flanagan, City, \$2, vol. 50; from Enoch S. Zelle, N. J., \$2.10, vol. 50; from Caleb Darnell, N. J., P. Samuel Williams, \$2.10, vol. 50; from Joseph Cogswell, O., \$2.10, vol. 50; from George T. Satterthwaite, vol. 50; from Henry R. Post, L. I., \$2.10, vol. 50, and for Lydia Post, \$2.10, vol. 50; for Charles W. Rober and James C. Roberts, Pa., 10 cents each, postage cts. vol. 50; from George D. Smith, O., \$2.10, vol. 50.

Remittances received after Fourth-day morning will not appear in the Receipts until the following week.

MALVERN BOARDING AND DAY SCHOOL.
Will reopen on 2nd day, the 11th of 9th month 1876. Address, JANE M. ELDRIDGE, PAOLI, PA.

EVENING SCHOOLS FOR ADULT COLLEGE PERSONS.

Teachers are wanted for these Schools, to be opened at the first of Tenth month. Apply to George J. Satterthwaite, 415 Spruce St., or Richard J. Allen, 833 North Seventh St., Ephraim Smith, 1110 Pine St.

MARRIED, at Friends' Meeting-house, in West Chester, Pa., 8th mo, 10th, 1876, ISYDA SHARPLESS, of Haverhill, Delaware Co., Pa., to LEVIA T., daughter of the late Passall Cope.

MARRIED, at Friends' Meeting-house, Wilmington, Del. on Fifth-day, 8th mo, 24th, 1876, WILLIAM C. MALON of this city, to MARY A., daughter of Mary and the late Sam'l S. Downing, of Wilmington, Delaware.

DIED, at her residence, near West Chester, Iowa, the 1st of 21 mo, 1876, SUSAN, wife of Ulysses McGreag, aged 26 years, a member of Flushing Monthly Meeting, Ohio. This dear Friend was enabled to bear the sufferings of a protracted illness with exemplary patience and Christian resignation. She found that her life was being consumed in the care of the wretched of the world in which she so cheerfully took a great deal of light. She was enabled to say, "God has forgiven my sins," "I am ready to go."

—, at his residence near Chesterfield, Ohio, on the 7th of 7th month, 1876, ROBERT TOWN, a member of Chesterfield Monthly Meeting of Friends, aged 64 years. This dear Friend was firmly attached to the principles and testimonies of the Society of Friends, and after mourned over the wide departure from the sincerity and simplicity which marked its first rise. His living yielded to the visitations of the Spirit of Truth in early life, he was enabled to encourage his children's steady attendance at the meetings of Friends, and to witness the light and life, which he had experienced to the principle of truth while treading the slippery paths of youth, and a source of comfort to his declining years. As his health gradually failed, he looked forward to the time of his departure with comfort, feeling nothing in the world more desirable than to be reunited to his family, and friends a comfortable home, that through the loving care and mercy his purified spirit has been permitted to enter that city, whose builder and maker is the Lord, there to join the just of all generations in singing the glad anthems of eternal praise.

For "The Friend,"

Quakers and Quakerism.

(Continued from page 18.)

The position the Quakers now found themselves in amid the contending sects, irresistibly minds one of Heine's story of the two children who were disputing as to the nature of a moon, one saying her mother had told her was made of sugar and that the angels ate it up with the sugar-nippers every night into the little stars, the other declaring her grandmother had told her it was a melon that was consumed every month the infernal regions with pepper and salt no sugar was to be had. From ridiculing each other's rival views they soon proceeded to blows, and were scratching and tearing one another in true polemical fashion, when they were separated by a boy coming out of the neighboring school. He, being better instructed, proceeded calmly to explain the true nature of the heavenly body. But with what result? That the two angry little controversialists at once compounded their own differences, and united their forces in engendering the dispassionate young philosopher within a inch of his life. In much the same way the openly religious disputants of that day combined in ill-treating these peaceful preachers of spiritual truth, "the accursed race of heretics called Quakers," as they are denominated by the New England Puritans. It mattered not what party was in power, Quakers were whipped, fined, imprisoned, as many as two thousand being scattered in loathsome dungeons throughout the kingdom. Forbidden their conscience to resist, they were lured as sheep to the slaughter; and we must go back to the times of the early Christians and find anything so touching as the heroic tranquillity, the unflinching firmness, the unobscured meekness, with which they bore their cruel wrongs and sufferings.

But at the same time we must admit that perhaps their negations, even more than their affirmations, were responsible for the violence of the persecution that raged against them. With a not unnatural rebound from the externalism and word disputes of the time, George Fox and his followers were led to reject all rites and ceremonies and time-honored customs. Because some people built upon the bridge, the bridge itself must be destroyed. The sacraments, judicial oaths, marriage ceremonies, an ordained ministry, tithes, mourn-

ing clothes, military service even for national defence, down to the "lying habit" of addressing individuals in the plural number and of taking off the hat in sign of deference—the early Quakers made a clean sweep of them all. We question whether any of their doctrines or practices produced so much irritation as the last mentioned. Homer placed the vulnerable point of his hero in the heel; for the mass of mankind it would seem to lie at the other extremity, in the hat. "O the rage and scorn," exclaims Fox in his "Journal," "the heat and fury that arose! O the blows, punchings, beatings, and imprisonments that we underwent for not putting off our hats to men; for that soon tried all men's patience and sobriety that it was. The bad language and evil usage we received on this account is hard to be expressed, besides the danger we were sometimes in of losing our lives for this matter, and that by the great professors of Christianity."

But despite the continued persecution, which raged for a space of forty years, when James I. issued his Declaration of Indulgence, by which fourteen hundred Friends were liberated from prison, the Quakers continued to increase in numbers. Increased weight was also given them by the accession of men in high position, such as Penn and Barclay of Urie, the author of the celebrated "Apology," a book of divinity which the late Bishop Thirlwall is said to have highly recommended to students of theology. But everywhere, whether at court or in prison, we find them upholding the great principles of religious liberty and the rights of conscience, wearying out persecution in their own persons, and pleading, both by pamphlet and speech, for toleration, not only towards their own members, but for all other oppressed sects, in the spirit of Milton's noble words, which they only seemed to grasp, "Let truth and falsehood grapple; who ever knew truth put to the sword in free and open encounter?"

So little practical recognition, however, could then be won for these enlightened views, that large numbers of the persecuted Friends emigrated to New Jersey; and on the grant of extensive lands by the crown to William Penn, the new territory, Pennsylvania, was colonized entirely by them. Perhaps one of the fairest and most unsullied chapters in human history is that in which Penn and his people, acting on their large and catholic theology, met unarmed those American Indians whom all other European settlers had contemplated as fierce and bloodthirsty savages, and addressing them as children of a common father, concluded with them that treaty which, in Voltaire's words, was "the only league between those nations and the Christians that was never sworn to and never broken."

The appointment of the ministry is peculiar to the Friends. George Fox rejected the "one-man ministry," and with it the common sense principle that "the laborer is worthy of his

hire." Any one, irrespective of sex, who feels moved thereto may stand up and preach in the meeting for worship. But let not the reader think this must needs lead to a Babel of words, and a natural selection of the longest tongues, generally supposed to be of the feminine gender, which could scarcely be defined as "a survival of the fittest." Quaker discipline averts this danger. Should the word prove unto edification, the preacher, male or female, is enrolled as a minister, and then has the counsels of experienced elders in the exercise of his or her gift. But should it not be so, the elders signify the same after a time on the part of the congregation, and the speaker is reminded that the wise man saith there is a time for silence as well as a time for speech. Perhaps some of those who consider it a religious duty unflinchingly to submit their souls to a weekly macaulizing of pulpit platitudes may not be altogether without a feeling of envy at any Church militant possessing a privilege which seems rather to savor of the Church triumphant.

On the great crucial question of marriage, George Fox's views were clear and deep. He was free from the confusion of thought which makes so many minds identify marriage with the ecclesiastical rite that celebrates it; and from the superficial view which regards it as a mere civil contract, and not rather as the deepest symbol of the divine in man. "We marry none," he says, "but are witnesses of it, marriage being God's joining, not man's." * * * In accordance with this elevated view of the religious sanctity of marriage, the utmost care was taken that this sacred union should not be entered into lightly; but in the presence of numerous witnesses who attested the marriage certificate. But with that unfortunate narrowness of the human mind which so often distorts the great truths it grasps, the early Friends forgot that this view of marriage is compatible with any religious rite, and marriage by a priest became an almost more frequent source of discomfiture in the after history of the Society than even grave moral offences.

On the death of Fox, 1690, and the passing away of its first founders by the close of the seventeenth century, Quakerism underwent a great change. It lost its aggressive character, its brave assault upon the world, which made it in the mind of its first founders not so much a new sect as primitive Christianity itself restored to mankind, and retreated more and more within its own borders. With the withdrawal of persecution, and with the singular commercial success which has always attended the Quakers in common with the Jews, came a decline of zeal and a decreasing ministry, both resulting in the Society being more and more content to bear a negative testi-

* [The author here fails to see the true ground of the disciplinary regulations of the Society of Friends on this subject; i. e. the necessity laid upon them to bear a clear testimony to the truth in all their practices.]

mony, by disavowment of its erring members, against the evils it had at first actively combated; a testimony which, while it had no effect on the world without, disastrously thinned the numbers of the Society. The very greatness of the truth it held from the first became a source of weakness and error. Believing that

God is never so far off
As even to be near,

believing in the inner light, the indwelling Spirit, they deprecated anything which was supposed to distract the mind from its inner teaching. They failed to grasp the truth that the work of the light within is to shine on the darkness without, and reveal God in all things, sanctifying and illuminating all human life, clothing it itself in the slow, sweet pomp of sunset and sunrise, of starry skies, and ordered lights, and returning seasons, uttering itself in infinite aspirations of music, shaping for itself a body out of the lovely forms of art. "I was moved," says George Fox, "to cry against all kinds of music, for it burthened the pure life." Music, the drama, art, fiction, in which a genius only second to Shakespeare has late manifested itself, are all the subjects of repeated reprobation and admonition in the minutes of the Yearly Meetings of the Friends.

(To be continued.)

The Nevada Quartz Mill—The Process of Extracting the Precious Metals from the Ores.

In a small annex to Machinery Hall, standing west of the pump annex, and between Machinery Hall and the Elm avenue fence, is exhibited the complete process of extracting the precious metals from the quartz of the mines of the famous Comstock Lode in Nevada. The process is extremely interesting, and attracts large numbers of visitors, especially when the huge stamp mill is in operation, the noise, resembling thunder, being heard at a considerable distance.

The State of Nevada, by an act of her Legislature, appropriated the sum of twenty thousand dollars gold coin, or about twenty-two thousand dollars currency for the purpose of exhibiting her mineralogical specimens, and showing the process of reduction of the ores. The mineralogical specimens are arranged in the Government Building. A sufficient supply of quartz to keep the works

[* The work of the Light within is primarily to reveal the darkness *there existing*, and to lead out of this spiritual darkness those who obey its manifestations and become united to it in spirit. The mind thus divinely illuminated, will be prepared to discern in all its works—

"The unambitious footsteps of a God,
Who gives its lustre to an insect's wing,
And wheels His throne upon the rolling worlds,
And smites it with the slow, sweet pomp of sunset
and sunrise, of starry skies, and ordered lights,
and returning seasons;" the hand of that beneficent
and almighty Creator, who giveth us richly all things to
enjoy. But we believe the experience of the most devoted
Christians of all ages contradicts the assertion—
—"the work of this Divine Light is shown in water, and
itself in infinite aspirations of music," and in "shaping
for itself a body out of the lovely forms of art," as we
understand this somewhat obscurely worded sentence
to maintain. We do not ignore nor condemn the pleasure
to be derived from sweet and harmonious sounds—
—"the song of birds, the murmur of the wind, and
the fall of water, nor from the contemplation of the
beautiful objects of nature and of art; but these are the
relaxations of the mind from higher duties and engage-
ments, and not to be made the main employment of
life, or to consume years of patient study and practice
to enable us to indulge in them.]

in operation for a portion of each day during the continuance of Exhibition was procured from the consolidated Virginia, California, Ophir and Belcher mines, all in Storey county, Nevada. This ore was packed in sacks containing about a bushel each, and loaded on cars of the Pennsylvania Railroad at the mines and unloaded at the building in the Park, making the entire journey of about three thousand miles without change of cars.

The ore is in exactly the same condition as that used in the mills in Nevada. It is a light gray mixture of quartz, stone and white dust, and to the uninitiated has no appearance of value whatever. The attendants are reticent about stating the value of the ore now on hand in the building, or the quantity of silver they expect to obtain from it during the Exhibition, but it will amount to quite a considerable sum. The ore is a free milling ore, and worked by the Washoe amalgamating process. East of the Comstock Lode a different character of ores is found, viz., refractory ores, which require a preliminary roasting with salt, in order to chlorinate the ore; and also those which must be reduced by the smelting process.

The machinery on exhibition consists of a double-decked hoisting cage and mining cars, such as are used at the mines; a stamp mill, with automatic feeder, an amalgamating pan, a separator and a retort, the uses of all of which will hereafter appear. The machinery is all driven by a small Baxter steam engine.

The quartz mill proper is a large and heavy piece of machinery, occupying a space about twelve feet square, in the centre of the building. The framework is of heavy timbers, and is about 12 feet in height. Arranged in a row, side by side, in the centre of the machine, are five "stamps." These are made of bars of round iron, about three inches in diameter, and fourteen feet long; the lower ends are shod with cast steel, and are considerably larger than the body of the bar.

About one-fourth of the way from the top of the machine a shafting extends across at right angles to the row of stamps. On this shafting are five long cams, which work against projectors upon the stamps, raising them about a foot and then allowing them to drop suddenly by their own weight. Below them is a "mortar" of cast iron, faced in its inner surface with steel, and into this mortar the stamps fall one after the other as the cams above lift them and let them drop. The mortar is a solid casting, weighing 4400 pounds, and the stamps weigh 775 pounds each.

The amalgamating pan is a large circular wrought iron vessel, about six feet in diameter and four feet deep, having a strong, flat bottom, upon which a miller revolves at the rate of 90 revolutions a minute.

The separator is a similar iron vessel, with a pair of arms or dashers, which revolve in it, and with an opening in its bottom through which to allow the amalgam of mercury, silver and gold to escape.

The mode of operating is as follows: The ore is emptied into the Tulloch automatic feeder, which is attached to the stamp mill. This feeder is simply an iron funnel, with a chute at the bottom to pass the ore into the mill. This chute is kept shaking up and down sufficiently to cause the ore to pass slowly over it and drop into the mill at the proper rate of speed. The ore drops into the mill under the stamps, and is ground into a

very fine powder. A stream of water passes into the mortar at the same time as the ore, and the powdered ore is mixed with that water, and the splashing caused by the stamp dashes it through a very fine screen, from which the mixture runs in what looks like stream of excessively muddy water into the settling tanks, where the powdered ore sinks to the bottom, and the water is partially pumped off.

The crushed material then passes into the amalgamating pan, where it is heated by steam, and certain chemicals added, and while still hot it is ground for three hours by the swiftly revolving miller. After having been thus thoroughly ground, a quantity of pur mercury is added. The proportion of mercury varies according to the richness of the ore, but sufficient is always added to keep the mass in a fluid state until the final process. After the mercury is added the material is stirred around in the amalgamating pan for an hour more, after which, still looking like muddy water, it is allowed to run into the separator.

Here the dasher or "revolving shoes" are kept revolving rapidly, keeping the material violently agitated, while in the meantime the particles of amalgam looking like mercury gradually fall to the bottom by their own weight, and pass off through an inverted siphon pipe into an iron bowl. The pipe being always filled with the heavy substance of course prevents the muddy mixture of water and sand from escaping.

We have now an amalgam consisting of gold, silver and mercury in a fluid state, an resembling pure quicksilver. This is strained through a thick closely woven canvas bag, the free mercury filtering through into a vessel beneath, and leaving in the bag a mass about the consistency of stiff putty. This mass still contains about one-fifth its weight in mercury, but is in condition to be handled. It is then put in dishes in an iron retort and placed in the furnace where the mercury is all driven out by evaporation and collected by condensation to be used over again. This produces the masses of "retort bullion" which in the case of the ores now being worked has from half to two-thirds of its value in gold. It is now in condition to be sent to the mint where the gold is separated from the silver by a chemical process by which the two metals are obtained, each absolutely pure. The silver which is made at the Centennial mill is struck into medals at the mint and sold at the mill to visitors.

The pulp escaping from the separator is called tailings. At the mines these tailings are often concentrated upon blankets or other wise, or simply allowed to settle in reservoir for re-working. The "slimes" or "slums" comprise that part of the ore which is crushed under the stamps to an impalpably fine powder and escapes in the battery water without ever getting into the pans.

The State of Nevada contains fifty-three thousand inhabitants, and has produced in the past year over fifty millions of dollars in bullion, about one-third of the value of which is in gold, and two-thirds silver. The ore is all taken from the Comstock Lode. The mill on exhibition is a section of such a use as at the mines. The mills at the California and Eureka mines have sixty stamps each, and are the largest mills in the State. In the amalgamating machinery at Antofagasta, Chil

ore is crushed between iron rollers instead of being stamped, and the process differs in her important respects from that in use in Nevada.—*Public Ledger.*

For "The Friend."

A query has arisen in my mind, Are the officers of the Society of Friends, as held by Fox, Barclay, Penn and their co-laborers, promulgated now in the same life, spirit and power, as in their day?

There are those who will claim they are; and some who say, there never was a time at our Society was in a more prosperous condition, unless it was in the first few years of its existence. If the query be asked, In what does this prosperous condition consist? It is told that the true spirit of Quakerism is being revived, and therefore many are added to the church who are to be saved, &c. Now if the Quakerism above alluded to, is of the same spirit, and its fruits the same, it will not hurt to compare it with that which existed in the rise of our Society.

At the present day, we often hear the expressions, that we can't come to Christ right now if we will; that faith is the acceptance of God's mercy and grace in Christ Jesus; that the grace of faith, or power of believing; the gift of God; the act of faith, or actual believing; the exercising of that power; and that faith in those who are not exercising it, is similar to a partly paralyzed or lamed arm, which, by exercising our wills, we can move. So in faith, we must put our wills into it in order to believe, and by thus believing in the sacrifice and atonement of our Lord and Saviour Jesus Christ, the guilt of our sins is taken away: "Jesus paid it all," and thus we are converted; that a state of holiness, entire sanctification or Christian perfection, is to be attained to, which is necessarily postponed, it is a privilege and a duty, and to be attained now. It is claimed there are differences between the perfection of Adam before the fall and Christian perfection, arising mainly from the diseased and imperfect physical organization of our race.

Of the fruits of the Quakerism of to-day, there is certainly sufficient manifestation to form some idea of the tree. How few of its professors now appear as Friends, either in dress or address; but instead thereof, use the compliments of the fashionable world; and come, in order to maintain a testimony against plainness of dress, have adopted clothing of very fashionable cut! Others encourage their children to learn music, and introduce musical instruments into First-day schools, claiming thereby to create a greater interest therein; adopt what is called the one-lesson system, which is prepared long before, and by those of other denominations, thereby deserting the true principle of teaching, as laid down by the apostle Paul, yet at the same time claiming these schools to be the nursery of the church. There are those who have become so bold as to deny the doctrine of "universal and saving light," as held by all true Friends.

Having thus briefly considered some of the doctrines advanced, and the fruits shown by some of the Society of to-day, let us now turn to those of early days. We find George Fox, when about nineteen years of age, commanded of the Lord to leave his relations and to break off all familiarity or fellowship with young or old. In the year 1644, a great temptation came upon him, almost to despair; in which

condition, he says, he continued for some years, and vain would put it from him, often going to priests for comfort, but found none with them, for he found all of them miserable comforters. From the priests he turned his attention to the dissenting people. Here he found some tenderness, but he found there was none among them all that could speak to his condition; and when his hope in all men was gone, "Then, O then, I heard a voice which said, there is one, even Christ Jesus, that can speak to thy condition." His zeal in the pure knowledge of God and of Christ, grew without the help of man or books. His testimony is, "when the Lord God and his Son Jesus Christ sent me forth into the world to preach his everlasting Gospel and kingdom, I was glad that I was commanded to turn people to that inward Light, Spirit and Grace, by which all might know their salvation and their way to God, even that divine Spirit which would lead them into all truth, and which I infallibly knew would never deceive any."

Space will not admit of speaking of the trying exercises of many of those who were raised up in the first fifty years of the Society's existence, (but would not we all profit by a perusal of the history of their lives?) I would especially call attention to the 24th section of the Propositions on Universal and Saving Light, in Barclay's Apology, commencing on page 168 and extending to page 175 of the Philadelphia edition.

But there is yet left in our Israel, "one of a city and two of a family," who have not drunk of the wine of mystery Babylon, who have not the mark in their right hands or in their foreheads. Oh, may these be kept in the power of everlasting truth; and may they be willing to go into suffering with the true seed, that is now being oppressed and trodden under foot by false brethren, under a pretence of having more light than those of former days; but this has always been the shift of anti-Christ in order to deceive those who are not built on Christ the Rock.

There are two kinds of faith viz., that which is of God and that which is of the man's part. Much is said of the necessity of the will being brought into exercise in spiritual things, by those who are making a great profession of godliness, yet fall short of true Christian perfection. Thence follows the doctrine that owing to our diseased and imperfect physical organization, we cannot attain to that perfection that our forefathers in the truth claimed was the Christian's privilege to attain to; and yet did not Christ come to restore all things? But such and similar doctrines arise mainly from denying the inward appearance of the Light of Christ, and the want of knowing the cleansing and purifying power of the blood of Christ in the inward parts; for I do believe there never was a Quaker, who was one inwardly, but what was one outwardly. D.

Kansas.

To every man there are many dark hours, when he feels inclined to abandon his best enterprises, when his heart's dearest hopes appear delusive; hours when he feels unequal to the burden, when all his aspirations seem worthless. Let no one think he alone has dark hours. They are the common lot of humanity. They are the touch-stones to try whether we are current coin or not.

Meteorites.

The Centennial Exhibition contains at least four remarkable meteorites, one from Chihuahua, Mexico, now to be seen in the Mexican section of the Main Building; one from Orvik, Greenland, on exhibition at one of the entrances on the northern side of the Main Building, and two in the Government Building—one from Tucson, Arizona, and one (known as "The Blake") from Tennessee.

The *Orvik (Greenland) Meteorite*.—This, the heaviest of the specimens on exhibition, weighs 6 20-100 tons, and is one of a group of iron meteorites discovered upon the shores of Greenland by Professor Nordens-Kiold, the celebrated mineralogist and Arctic explorer, who is also one of the judges in Group Jury No. 1 at the Exhibition. The discovery was made in 1870, at Orvik, on Disko Island, upon the open coast, and at a place almost inaccessible in even a moderately rough sea. Here were found meteorites of various dimensions, which are supposed to have fallen during the tertiary period, an ancient date in the world's history, and have been imbedded in the strata of the miocene period. They have since excited much attention and interest in the scientific world.

The cliffs of the place rise to a height of two thousand feet above the sea level, the upper portion being formed in basalt. The meteorites were found upon the shore at the base of this cliff, within an area of about fifty square yards. There were twelve large specimens and many smaller ones. In 1871, the Swedish Government fitted out an expedition composed of two naval vessels, under the command of Captain Baron Von Otter, to go to Baffin's Bay, in Greenland, and procure these numerous masses of meteoric iron.

The undertaking, though a difficult one, owing to the rough shore and the absence of a harbor at the place where the specimens were found, was finally successful. The largest mass, about nineteen English tons in weight, is now in the hall of the Royal Academy, at Stockholm. The second block has been presented to the museum at Copenhagen, and one of the smaller ones is in the British Museum.

The *Iron-Ainsa Meteorite*.—This celebrated ring-shaped meteorite from Arizona, sometimes called the signet meteorite, now occupies a place in the Smithsonian Department of the Government Building. It was found in the early part of the last century in the Sierra de la Medera Mountains, near Tucson, Arizona Territory. There is a tradition among the old residents of Tucson, that there was a shower of meteorites in the mountains there some two hundred years ago.

In 1735, Captain Juan Bautista Ainsa, who then visited the region, undertook to transport this large meteorite to Spain. After getting it as far as Tucson he abandoned the undertaking, and the meteorite remained in that town, and was used as a kind of public anvil by the people. At length it fell into disuse and became partially buried in the ground in one of the side streets. It was found there by Dr. Irving, of the United States Army, in 1857, and by the aid of Mr. Ainsa, a grandson of the Captain Ainsa here spoken of, it was transported to Hermosillo, in Sonora, and thence shipped to San Francisco, on its way to the Smithsonian Institute at Washington, D. C., where it has since been an object of great interest to all visitors, and especially to experts familiar with meteorites, who have

readily remembered it by reason of its annular shape, and the large hole, some two feet in diameter, through its centre.

It is the only annular meteorite of which there is any record, and is the property of the National Museum at Washington. Its total weight is 1400 pounds. One of the distinguished scientists at the Exhibition inclines to the opinion, that the large cavity in this specimen was originally occupied by sulphurous or earthy minerals, such as are often found in meteorites in a more or less globular condition, and which, by decomposition in the soil, leave the iron free and with a pitted surface.

The Blake Meteorite.—The Blake meteorite, in the Government Building, is a new and interesting specimen, weighing about three hundred pounds, brought by General Wilder from Tennessee. It was discovered in 1873, in Cocke county, about ten miles from Greenville, by a farmer, who, after breaking two plows upon it, dug it out. It is about three feet long, and is remarkable for its elongated form, being shaped somewhat like a flattened sgar. It is a compact mass of iron, containing both nickel and cobalt, and no doubt has a very interesting internal structure, as yet undetermined. When found it was standing at an angle of about forty five degrees, the top end about eight inches below the surface. It is one of a number of interesting specimens belonging to the private collection of meteoric stones, minerals, &c., of Professor W. P. Blake, in charge of the Mineral Department of the Smithsonian Institute.

The Chihuahuca Meteorite.—This specimen, stationed in the Mexican department of the Main Building, is a compact mass of iron with a pitted surface, weighing 4000 pounds, and one of several meteorites found at Chihuahuca. The exterior very much resembles that of the Arizona specimen.

It may be that the inter-planetary spaces are filled with dust and meteoric grains, ranging in size from mere powder or dust to the largest planets; and Dr. Bannhauer suggests that the auroral displays are caused by the polarization of meteoric dust by the magnetism of the earth. Norden Skjold, it will be remembered, found an impalpable dust of iron upon the broad expanse of the Arctic snows. An examination of this dust resulted in the discovery of the presence of not only iron, but its meteoric origin is considered certain.

The collection and study of meteoric stones is of great importance as revealing to us something of the constitution of other worlds than our own, each fragment giving some new fact or idea concerning the origin of planets. It is usual to grind and polish the surfaces of specimens of this iron, and these almost invariably show a very peculiar crystalline structure. This is brought out by etching, some portions of the iron being less acted upon by strong acids than others. Surfaces so etched may be used to print from, and many of the illustrations of the structure of meteorites are printed directly from the meteoric iron plate.

One of the most interesting facts yet discovered with regard to meteorites is the enormous amount of hydrogen gas which they contain. Its presence in meteorites was demonstrated by Graham, and Prof. Wright, of Yale College, has published several important memoirs upon the occlusion of hydrogen in meteoric iron. Nearly all the facts point

to the absence of oxygen gas in the region where these meteorites originated; nickel and cobalt are their almost invariable associates, while silver, phosphorus and chlorine are also found in some of the irons.

Of the collections of meteorites that of the British Museum ranks first in importance, that of Vienna second, of Paris third, and of Professor Charles W. Shepard, of Amherst, Mass., fourth.

In the last named collection no less than 254 localities of meteorites are represented, the total weight of the collection being about 1200 pounds, the heaviest iron weighing 438 pounds, and the lightest half an ounce. The largest meteoric stone in the Professor's collection weighs 571 pounds, and is from Wacoula, Kansas. The collection in the Academy of Natural Sciences of this city and that in Yale College are also of considerable importance. Prof. C. C. Smith, of Louisville, Kentucky, who has given much attention to the examination of meteorites, and has published many memoirs upon them, also has a large and interesting collection. — *From Philadelphia Inquirer.*

HOW I LIVE.

Living friendly, feeling friendly,
Acting fairly to all men,
Seeking to do thus to others
They may do to me again,
Hating no man, scorning no man,
Wrangling none by word or deed:
But forbearing, soothing, serving,
Thus I live—and this my creed.

Selected.

Harsh contending, fierce opposing,
Is of little Christian use,
One soft word of kindly peace
Is worth a torrent of abuse;
Calling things bad, calling men bad,
Adds but darkness to their night,
If thou wouldst improve thy brother
Let thy goodness be his light.

I have felt and known how bitter
Human coldness makes the world,
Ev'ry bosom round me frozen,
Not an eye with pity peep'd;
Still my heart with kindness teeming
Glads when other hearts are glad,
And my eyes a tear-drop findeth
At the sight of others sad.

Ah! be kind!—life hath no secret
For our happiness like this;
Kindly hearts are seldom sad ones
Blessing ever bringeth bliss,
Lend a helping hand to others,
Smile though all the world should frown,
Man is man, we all are brothers,
Black or white or red or brown.

Man is man through all gradations,
Little reck's it where he stands,
How divided into nations,
Scattered over many lands;
Man is man by form and feature,
Man by vice and virtue too,
Man in all one common nature
Speaks and binds us brothers true.

The immediate teaching of the Holy Spirit is the foundation of all gospel worship and ministry; and those who depend entirely thereon, shall not be disappointed, through the failure or absence of instrumental means. Wherefore, we beseech you, wait in silence, with reverence and singleness of heart, in all your meetings, that you may witness the incomes and refreshing influences of the Holy Spirit, by which you will be "strengthened in the inward man," and be made to grow and flourish as "trees planted by the rivers of

water," which bring forth their fruit in due season.—*Epistle London Yearly Meeting, 1740*

Confinement of Rebecca Travers.

Rebecca Travers was a gentlewoman who was thought of account in that day of religious excitement and high profession. She had received a good, religiously guarded education, and was a zealous professor among the Baptists. The many reports that had reached her of the Quakers in the north, had preceded her strongly against them. She looked upon them as worthless, unskillful fanatics, who were very commonly in their appearance, their manners and carriage; with whom those who stood fair in church or State could wish to have little or nothing to do.

James Naylor having come to London in 1655, preached with so much eloquence that many of the higher rank flocked to hear him and some of the Baptist pastors challenged him to dispute with them. A time and place was agreed on and there was no little interest excited among very many. Rebecca Travers having been invited by one of her friends to accompany her to hear this dispute, consented to do, fully prepared—as she afterwards said—to witness the defeat of the rustic Quaker by the learned ministers of her own Society. But greatly was she surprised and confounded when the "countryman," rising on a platform opposite to the ministers, after they had spoken poured out such a stream of Scriptural argument as overturned all the objections that had been brought forward against the principles of Friends, and showed that those principles were based on the immutable foundation of truth. Two of the Baptist ministers said they were sick, and went away, while the other failed to show how the texts he quoted sanctioned the opinions he advanced.

Though mortified at the result of the dispute, Rebecca was curious to hear J. Naylor preach, and the next First day went to the Bull-and-Mouth meeting, where he spoke so convincingly, that she remarked, "She could not but declare, that if she had lived in the apostles' days, she could not have heard truth more plainly, nor in greater power and demonstration of the Spirit, than she had that day." From that time she became a constant attendant at the meetings of Friends; but still she found it a hard matter fully to act up to the doctrines she knew to be true. There were many things to be given up hard to part with, and her former habits of religious profession prompted to seek for that knowledge in divine things, which could be obtained by the natural understanding alone. Some time after, having been invited to dine in company with J. Naylor, a person present who was a high professor, put many curious questions to him. James answered him with wisdom, but with great caution; but not so as to gratify the strong desire she felt to hear him discourse of these sacred mysteries. Presently J. Naylor, reaching across the table, took her by the hand and addressing her, said, "Feed not on knowledge; it is as truly forbidden to thee, as ever it was to Eve; it is good to look upon; but not to feed on; for who feeds on knowledge, dies to the innocent life." This was spoken with power, and carried conviction to her soul. She gave up her own willing, and searching into hidden mysteries, became emptied of her self-knowledge, and taking up the daily cross, she found that, as a babe in Christ, all that was necessary for her

o know of those things hidden from the wise and prudent, was revealed to her by the Spirit of her Father in heaven. She became an acceptable minister in the Society; suffered much for witnessing to the truth, and died beloved, in a good old age.—*Friends in the Seventeenth Century.*

The Age of Myths still Here.

In the course of the last eighteen months strange excitement has prevailed among the masses in certain parts of Germany. At the suggestion of "The German Anthropological Society," the Prussian authorities, it seems, ordered a peculiar sort of census-taking of the children in the schools, with reference to the complexion and the color of the hair and of the eyes. It was hoped that the results thus obtained might furnish data upon which to found conclusions respecting the descent and race relations of the populations. At the first it was an entirely innocent proceeding and it might easily become the source of an interesting and possibly important scientific developments. But in several parts of Prussia and Posen the Catholic people, already excited somewhat by the agitation of the ecclesiastical disputes, took to the alarm, and not only among the rural population, but even in the towns, the most extraordinary reports were circulated and believed in explanation of the interest which the authorities had suddenly begun to take in the children's eyes and hair. In some places the story was that all Catholic children having black hair and blue eyes were to be sent away to Russia. Then Turkey was asserted to be the country to which they were to be sent. "The King of Prussia laying a game of cards with the Sultan had taken and lost 10,000 of his youthful subjects," this was the legend which, fully believed by the people, sufficed to account for the fact. It was further said, that the Sultan had sent into the country certain negroes and Arabs who should seize the children on their way to and from school and carry them off—a task certain to be all the easier because the teachers were well known to be interested in the nefarious business—each of them to receive five thalers for every child he might deliver into the hands of the kidnappers. Some plausibility was given to the story by the fact that a company of negroes and Arab jugglers were just then performing in the city of Posen. The strange legend before long spread beyond the borders of the provinces of Prussia and Posen, even reaching Russia. Its form, however, changed with latitude. In Lauenburg, and perhaps elsewhere, Prince Bismarck was believed to be the unsuccessful ancestor who had lost the children. In the Polish town of Sabno the legend ran, that the Russian Government had sold, for a large sum of money, 6,000 pretty young girls, genuine "blondes," to an Arab Prince. This story, generally credited, caused among the rustic masses such terror, that to escape the imaginary peril, they forthwith got married, without consulting taste or affection. But the alarm of those young girls of Sabno was nothing in comparison with the terrors of the parents in Old Prussia and Posen. Strange and even painful scenes were exhibited. Mothers in agitated crowds went to the school houses and demanded explanation, or to see after the safety of their children. Many refused to send their children to school. In one village, women and men armed with clubs

appeared before the school house to protect their offspring, who had already sought refuge in the neighboring cornfields.

These alarms seem to have continued to prevail during many months. Neither the frights nor the fictions to which they gave rise can be justly pronounced more unreasonable than those panics which from time to time occur in every country in connection with the rage of epidemic diseases. The peculiarities of this German excitement must obviously be referred to antecedent conditions—especially the dissatisfaction and distrust with which the Catholic people had learned to regard the Government and its representatives. Lack of circulating intelligence, such as newspapers afford, is another important element of folly. But, after all, the facts are curious and interesting, especially as they show how, even in the present age, myths and legends spring up as of old, and are soon and easily dissipated by the spirit of the time.—*Pittsburg Telegraph.*

For "The Friend."

A Conference of Friends of Western Yearly Meeting, was held at Plainfield, Eighth month 22d, 1876. The object being to promote and maintain the doctrines of the Gospel of our Lord and Saviour Jesus Christ, as believed, practised and promulgated by the original founders of the Society of Friends. The following report, prepared by a committee appointed by a previous conference, was read, united with, and adopted.

"We would earnestly recommend, that Friends, on all occasions, be steadfast, honestly endeavoring, by the help of the Holy Spirit, to promote the cause of Truth; laboring for the firm establishment of all believers on the sure Foundation.—Other foundation can no man lay than that is laid, which is Jesus Christ." And believing the Society of Friends, in its rise, built on this foundation, we have no desire to lay another, or to erect a new structure on the old. But seeing it is a day of much stir in the world on the subject of religion, we are especially concerned for the safety of our branch of the Church; that the God of all grace may establish, strengthen, settle and we believe it is incumbent on all who desire to maintain the original doctrines, testimonies and peculiarities of our Society, as given forth by ancient Friends and handed down to us, to stand unflinchingly by them; disclaiming in Christian meekness and forbearance, any unsoundness in doctrine and practice; being persuaded as we are, that we still have a mission in the world, in upholding the various peculiarities as well as the fundamental doctrines, which our worthy predecessors were brought, in the light of Truth, to see were necessary for the followers of Christ to maintain, which doctrines, we believe, are the true doctrines of the Scriptures; and that the usages which they adopted are the legitimate outgrowth thereof.

"We would also recommend, that Friends be careful and diligent to promote the right maintenance and exercise of our discipline, without compromise or delay." "Finally, we would entreat all to stand fast in the Lord, and in the power of his might, not being carried about by every wind of doctrine; or the cry, lo, here is Christ, or lo, he is there; being unprofitably engaged that we be preserved from unprofitable debates; always so dependent on Divine Wisdom for help and

guidance, that we may not turn either to the right hand or to the left, being 'steadfast, immovable, always abounding in the work of the Lord.'"

The want of information in regard to the doctrines and principles of Friends, being felt to be a prolific source of the misapprehension of the minds of many of our members, the Conference was united in taking measures to procure tracts and small books, containing extracts from the standard writings of early Friends, for distribution, in order for their being more extensively read by our members. The subject was referred to a committee, to have the same under care, and endeavor to obtain such works.

Church Debts.

The primary idea of a church with our fathers a hundred years ago, was a fit place in which to praise and worship God. A plain wooden meeting-house was good enough. Hard, un cushioned seats, if they did give an occasional backache, were to the penitent sinner in striking contrast with the kind Christian words in the sermon. The want of a heating apparatus was supplied by the spiritual glow in the heart of the honest worshipper.—The door was closed against all show, pomp and unnecessary grandeur, and nothing but pure and undefiled religion prevailed within. When a meeting-house was to be built, the farmers brought their lumber, the carpenters and laborers gave their time—all did their share. The structure, when finished, belonged to them individually as well as collectively. When thus completed it was dedicated to the service of God.

Now a days men build churches at a cost of a hundred thousand dollars, when they only have a fifth of that amount pledged. They express a desire to build a church, and disregard entirely the laws of political economy in the course of its erection. They must advertise an organ as large, a choir as high-toned, a minister with a salary as expensive as the church around the corner has. A foolish spirit of rivalry and vainglory inspires them to run into debt.

Debt burdened churches are the rule, not the exception. They are oftentimes considered churches of highest standing. St. Thomas Church, in New York, is said to be hopelessly, and the Church of the Ascension very heavily, in debt. The Church of the Disciples owes \$159,000. The Church of the Holy Trinity is quite as poorly off. The financial condition of the majority of churches in New York is unhealthy. Grace and Trinity, with their accumulated wealth, are conspicuous exceptions. The Episcopal church lays down the wise and honest rule that no church shall be consecrated until entirely free from debt; and it is a fact worth noting, that not in seven years has an Episcopal church in New York been consecrated. In Chicago the Park avenue Church, after the most untiring efforts, has succeeded in redeeming the debt of \$120,000 to \$60,000. Nearly all the churches of that city are in as bad or worse pecuniary condition. Even so wealthy a society as the Church of the Pilgrims, in Brooklyn, has an accumulated debt to carry on its shoulders. These are only isolated cases of a uniform rule in most of the cities and larger towns of the country.

A church in debt! The phrase is certainly a paradox. That men whose moral and reli-

gious character is unblemished should run a church into debt, when they see no way of paying it, is an offence as great as if they spent money not their own. If Christian ethics are not practised, as well as taught, the gospel is perverted. Economy and honesty must be taught and exemplified in our churches if we would see it in business. As long as churches run into debt, so long will individuals. If churches are lax in paying debts, parishioners will be slow to meet their notes. An honest church makes an honest citizen.—*The Independent.*

For "The Friend."

Bunhill Fields Burial Ground.

The proposition, which seems likely to be carried into effect, to make use of this historic piece of ground for building purposes, has awakened much interest and discussion among Friends in England. This is shown by the articles *pro* and *con* which appear in the Friendly journals of Great Britain. The following extracts from a communication in *The British Friend* for the Eighth month, will show the views taken by the writer on this subject.

"The ultimate disposal of the remaining portion of Bunhill Fields Burial Ground (the London School Board having, by its compulsory powers under Act of Parliament, forced the cession by sale of about one-third of the original space) is a question that naturally excites the deep interest of Friends both in England and America. It is the place of sepulchre of George Fox and many hundreds of his contemporaries—the fathers and martyrs of the early Quaker Church. Along with these, it is calculated, there rest the remains of nearly 12,000 other and later members of the Society of Friends, connected by ancestry or relationship with a large portion of its existing members, and thus forming an assembly of the dead nearly equal in numbers to all the members of the Society now living in Great Britain. What wonder, then, that the prospect of such a plot of ground being diverted to other purposes excites earnest discussion, and that the announcement, that the Six Weeks' Meeting (the Standing Committee of the Quarterly Meeting of London and Middlesex for the care and administration of its property) proposed to sell the remaining portion of a 'parcel of ground' so hallowed by its associations, should have raised a storm of mingled astonishment, indignation and dismay. That such should be the case is surely most natural and excusable, and the discussion of the subject in these columns follows of course.

"At the last Quarterly Meeting of London and Middlesex (held at Westminster on the 4th of Seventh month) the subject was brought before it by a minute from the Six Weeks' Meeting, requesting the leave of the Quarterly Meeting to treat for the sale of some ground, for the purpose of erecting thereon model lodgings for the families of working men; the chief portion of the remainder being devoted to a mission hall for the benefit of the neighborhood. A long and interesting discussion followed, in which, probably, two-thirds of those present expressed an opinion favorable or adverse to the proposal, and for a considerable time it seemed very doubtful whether the prevailing sentiment of the meeting was to grant or to refuse its sanction to the scheme proposed. Ultimately, it seemed clear that,

with the exception of some important and influential dissenters, the general opinion of the meeting was in favor of leaving the Six Weeks' Meeting to act as suggested in its report; but at the same time was appended to the minute of consent a cautionary instruction that the course suggested should be carried out, on the one hand, with all due regard to natural and Christian feelings of reverence for the dead, and on the other hand, that the benefits contemplated for the living poor of the neighborhood should be, by the terms of sale, secured to them and their successors in perpetuity.

"Bunhill Fields Burial Ground has for many and many a year ceased to be a quiet resting-place. The great city has gradually and remorselessly spread its dingiest pall of sordid squalor around and beyond it. Close by, stifling courts and narrow crooked alleys crowd round; wretched dwellings overlook it; the city arab, with his dreadful precocity of impudence and knavery, swarms around it, and instead of plucking the daisies (if any would grow) flings brick-bats and filth, and foul language. The place, in spite of all care, becomes the constant receptacle for the refuse of a poor crowded neighborhood. The filthy liquids of filthy dwellings are thrown from the windows that overlook the walls. The discarded remnants of three out-worn garments are flung into it; and foul smells and foul sights, and foul sounds gather in abundance around it. Doubtless, as has been said, by substituting an open iron-railing for a brick wall, by constant oversight, and a large annual expenditure, the space might, until some railway or other company, irresistibly armed with full parliamentary powers, seizes it, still be kept open, and made and kept tolerably decent, if not attractive. There are some shrubs, which even London smoke does not quite kill, and such might be made to grow; and by a constant succession of fresh immigrants, in pots, from the country, a tolerably bright and cheerful collection of flowers might be made to appear. But it will be a dingy hole after all, ever more and more hemmed in by lofty warehouses, which are gradually crowding out the squalid dwellings of the poor around. And can nothing really better than all this be done for the neighborhood—nothing more conducive to its real and permanent benefit, and also more accordant with the noble Christian spirit of practical philanthropy that so eminently distinguished George Fox and his fellow laborers, and by which their memory may be more really honored, and distinguished?

"The London School Board is, as has been said already, in possession of one-third of the ground, a possession which Friends could not by any possibility prevent, and their work is a good work in the main, and especially for such a neighborhood.

"Is it other than a good work to bring into contrast with the unwholesome dwellings of the vicinity, the civilizing influence of the well-ventilated workmen's lodging-house, with all its cheap but efficient appliances for decency, cleanliness, and comfort; and the christianizing influence of the mission hall and the First-day School? And if, while providing these, there be also added, as proposed, a careful and reverent collection of the undistinguished and undistinguishable remains of the dead into a distinct portion of the remaining ground, and the erection over them of a sim-

ple stone of memorial, graven with the name of those whose remains have been during the last ten centuries recorded as interred within those walls—will there not be a combination of reverence for the dead, and of benefit to the living, not unworthy of the character of the Society of Friends? And even, if some among us might still have preferred the adoption of some other plan, and think that London Friends in this matter err in judgment, they may surely exercise towards those who thus differ from them a portion of that charity which thinketh no evil, and, at least, acquit them of the charge of being actuated by sordid and mercenary considerations in the decision of such a matter as this. T. G. D."

An editorial article in the same number of *The British Friend* says:—"There can be few Friends, we imagine, who have not read or heard of this burying-ground. Some communications in the present number give some account of what it was and what is now determined to be done with it by Friends of the 'Six Weeks' Meeting' in London.

"George Fox's grave is in the reserved portion, and in the open space in front of the intended Memorial Hall. 'The most recent grave that will have to be disturbed is twenty-seven years old, and this,' says our correspondent, 'is the worst feature of the plan, though less objectionable than the others has been in this respect, which had been twice altered in the course of the month. I would hope,' says he, 'that the letters which are appropriate will appear, inasmuch as there are two other old and disused grave yards Whitechapel and Long Lane, that will shortly come in for attention.'

"At the 'Six Weeks' Meeting' on the 25th of Seventh month, there were memorials infinitely and numerously signed from Bristol, Darlington, Newcastle, Birmingham, Hitchin and one or two other places, besides many letters public and private. Even some Friends in Edinburgh and Glasgow united in craving delay till the judgment of the Yearly Meeting, was obtained. The matter was discussed a some length on the 25th, but though opinion were exchanged freely, no good reason, our informant says, could be got why the committee was in such a hurry.

"As to the exact size of Bunhill Fields Burying Ground originally, our correspondent says nothing, but it may be new to many country readers to learn that a portion of about one-third was sold to the School Board in this portion it is said no Friends had been interred. The further piece now sold equal that which the School Board acquired, the whole remains in which are to be disinterred and removed to the place reserved for the Memorial Hall, &c. No doubt there will be an endeavor not to outrage the public feeling in this unhallowed and revolting sort of work but for the credit of our Society it would have been far better to have sacrificed pecuniary profit, and manifested a reverential enduring regard for the resting-place of our ancestors remains."

The Maelstrom as it is.—Nearly midway in London Strait a huge naked rock, which might fairly be called an island, lifts itself above the waters, breasting and conflicting current caused by the wind and tides. Between this rock and the cape on Moskonge is the famous Maelstrom, which fertile imaginations have clothed with many terrors.

Its geographical position is such as to expose it to fierce tidal currents, and when these are assisted by high westerly winds they are, doubt, terrific. The bottom of the strait strewn with immense boulders, which are arranged as to give the current a spiral motion, directed towards the isolated rock on the northern side, which is much increased in times of high tides and storms, when it whirls quite around the island rock. Then it is that it becomes really difficult for boats and vessels, without steam power, to keep off the rocks against which the wayward currents would dash them.

While there are at times vast and powerful eddies, which give objects floating upon them fearful spiral motion, there is nothing like vortex produced by a subterranean discharge of the water, although the tumbling and boiling character of the spiral current may suggest temporarily objects drifting on the surface.

No doubt, in the course of time the action of the water has tended to level down the bed of rocks, some of which, we may presume, stood themselves above the surface. This may have made the Maelstrom much more terrific than it now is, and better justified the ancient fable.

As it is, in ordinary times and in favorable weather, the fishermen do not hesitate to seek or fares throughout these waters, which to strangers are suggestive of the most terrible angers.—*A Saunter in Norway.*

What a pity that the want of obedience on the part of those powerfully called, should prevent their being chosen; yet is this mournfully and conspicuously the case; and I often fear it will still be so, because I see the hindering things still prevail, and many are overcome of evil, instead of overcoming evil with good.

The cup of life is mingled with the bitter, as well as the sweet; and were it not so, we should be ready to forget that this is not the face of our rest, that we are but pilgrims and strangers here below, and ought to be diligent seeking another and a better country of uninterrupted bliss, where joy unspeakable and full of glory is the eternal portion of those who, "having come through much tribulation, have washed their garments and made them white in the blood of the Lamb." Oh! animating consideration. Is not this worth a world of trials and a fight of afflictions to obtain?—*Sarah Lynes Grubb.*

THE FRIEND.

NINTH MONTH 9, 1876.

We find in *The British Friend* for the Eighth month, some statistics of the Society of Friends in America, which represents the number of members belonging to the Yearly Meeting of Philadelphia as about 3500. We do not know what data the compiler of these statistics founded his estimate, but he has certainly erred misled in this instance. About three years ago, a Friend who was interested in statistics, made a careful census of the whole number of members and of the school children belonging to each Monthly Meeting in Philadelphia Yearly Meeting, in order to throw light upon some question he was then investigating. The sum was 6183; since that time

this may have been reduced, but not to any considerable extent.

The flow of population from one section of country to another, and the causes which influence it, are subjects of much interest to a thoughtful mind. In the United States, the Western States have rapidly increased in population at the expense of the Eastern; and the Yearly Meetings of Friends located there have been augmented in proportion. Thus some parts of Ohio were largely settled by emigrants from North Carolina, and at times meetings would remove almost entirely.

In illustration of this tendency, a writer in the Public Ledger of this city has compiled a table from the census returns of 1870, by which it appears that independently of those from foreign countries, there were then living in the State of Pennsylvania 232,215 natives of other States of the Union; but that those States contained 663,619 native-born Pennsylvanians. From New England and New York she had received more than she had sent; while the proportion was decidedly reversed in the West. For example, Ohio had received a surplus of more than 130,000, Michigan 28,000, Indiana 55,000, Illinois, 90,000, Iowa 72,000, and Kansas 19,000 Pennsylvanians.

We would not however convey the impression, that the decline in numbers in the members of Philadelphia Yearly Meeting (with which we are more particularly acquainted than any of the others) is to be attributed solely or even chiefly to emigration from its limits. It has doubtless lost much in this way; but the severest blow it ever received was the separation in 1827, which greatly reduced its numbers; in some places leaving but a few scattered remnants of large meetings. Perhaps next in effect to this sad calamity, has been the effort to maintain the ancient standard of its discipline, leading to numerous disowments of those who were unwilling to conform to its restrictions—especially by marriage with those who were not members of the Society. The number of these disowments is an evidence of the need of a more widely diffused and earnest zeal in the support of our doctrines and testimonies; for want of which many become little more than nominal professors; and so are easily drawn away, by the varied allurances that are presented to them, into liberties inconsistent with their profession.

We believe thoughtful Friends in all parts of the Society, have seen and mourned over this tendency, and the query must often have arisen in their mind, "What remedy can be applied to this evil?" Some may think it judicious to maintain or increase the number of our members, by so relaxing the provisions of the discipline as to accommodate it to the lowered tone of religious feeling that prevails; and to open the door for admission into our fold so widely, as to admit as members any who are willing occasionally to attend our meetings, whether truly convinced of our principles or not. Yet the question may well be put to such as advocate this course, whether a religious society can properly fulfil its mission if it fails to hold up to the world a clear testimony to the doctrines it professes, and to the blessed effects of those doctrines as manifested in the lives and conduct of its members? Much as we desire to see our principles spread in the world, because they tend to promote the good of mankind; yet we do not

believe that the real strength and efficiency of the church will be promoted by measures which tend to fill up its ranks with merely nominal members.

Without question, the primary source of availing help and strength is in the Lord alone. If the church prosper, it must be from the fulfillment of the ancient prophecy, "I, the Lord, do keep it; I will water it every moment; lest any hurt it, I will keep it night and day." It is a consolation to be assured that the spread of His kingdom in the hearts of men is still dear to Him; and therefore that the extension of His gracious visitations will not be withheld from the children of men. Yet how sad would it be, if those who, from their training and position may in some sense be called the "children of the kingdom," should be cast out for refusing to obey the invitations of the Lord's Holy Spirit; and His table should be filled more exclusively from the highways and hedges of the world?

We greatly desire to see a restoration of primitive zeal and devotedness; and this must come through individual faithfulness, watchfulness and humility. The honest laborer in the Lord's vineyard is sure of receiving his wages. Let none, then, be unduly discouraged by the signs of the times, but with steady perseverance go on with their allotted task; remembering the encouraging promise, "In due season ye shall reap, if ye faint not."

SUMMARY OF EVENTS.

FOREIGN.—The affairs of Turkey are still in an unsettled condition. Murad IV. who was called to the throne a short time ago, soon manifested his unfitness for such a high trust, being found weak in mind and body. The ministers and high functionaries thereupon took the responsibility of removing him, and have declared his younger brother Abul Hamid II., to be Sultan in his stead. The deposition of Murad caused no excitement or disturbance in Constantinople. It is certain that the Turkish Ministers are the ruling power, there being no restraint upon their actions but that which may be imposed by public sentiment.

The proposed mediation between Turkey and Servia has been so far without result, hostilities being kept up as heretofore. The Powers notified Prince Milan of their acceptance of the task of bringing about peace negotiations, but the war party is so strong in Servia that it is probable the attempt will be frustrated unless some serious disaster produces another revision of feeling. The Servian army has been largely recruited by volunteers from Russia. A subscription for a loan of their acceptance of the task of bringing about peace negotiations, but the war party is so strong in Servia that it is probable the attempt will be frustrated unless some serious disaster produces another revision of feeling. The Servian army has been largely recruited by volunteers from Russia. A subscription for a loan of their acceptance of the task of bringing about peace negotiations, but the war party is so strong in Servia that it is probable the attempt will be frustrated unless some serious disaster produces another revision of feeling.

The London Times correspondent at Belgrade telegraphs that on the first inst. a terrible battle occurred at Alexinatz, in which the Servians suffered a serious defeat.

The Porte being disquieted by the influx of Russian volunteers into Servia, is considering the advisability of closing the Danube.

In Great Britain the weather has been unsettled and unseasonably cold. There has also been an unusual amount of rain often accompanied by violent winds. Similar reports have been received from France, Germany and Switzerland.

Great depression in trade and manufactures continues and many failures are announced, some of large establishments, and many more with liabilities ranging from \$20,000 to \$100,000.

At Dundee one of the largest works has closed, throwing nearly two hundred people out of employment.

London, 9th mo. 4th.—Consols 95 11/16. U. S. five per cents, 107.

Liverpool.—Uplands cotton, 6d. Orleans, 6 1/2d. for middlings.

The Danish government has made an appropriation for further explorations in Greenland. A competent

party has been sent to explore the district of Julian-shaab and the interior eastward from that point.

At last accounts the insurrection in San Domingo had not been quelled. The port of Azua had pronounced for Riez and the declared war blockade by the Government. Puerto Plata and Santiago continued to be besieged by the insurgents, and communication with the interior was interrupted.

The French Court of Appeals has quashed the sentence of fine and imprisonment passed by the correctional tribunal on the author of the newspaper *Les Droits de l'Homme* for libelling the Chamber of Deputies.

It is stated that there are now 1200 congregations of professed Christians in the island of Madagascar, numbering about 260,000 worshippers.

The Spanish government perseveres in its efforts to cast the insurrection in Cuba. It recently obtained a loan for this special purpose, and will soon embark at Santander and Cadiz a large military expedition to the island.

The anniversary of the battle of Sedan was celebrated at the inst. throughout Germany. One of the newspapers had leading articles in relation to the event, almost all of which are remarkable for their tone of conciliation toward France.

The result of the various surveys authorized by the United States of a route for a ship canal between the Atlantic and Pacific oceans, is the conclusion that one through Lake Nicaragua is the most feasible. Its construction will depend on the concurrence and aid of Nicaragua and the great maritime powers of Europe. The length of the canal would be 61½ miles, to which must be added the slack water navigation of the San Juan river and 56 miles across the lake, making the whole distance from ocean to ocean 180½ miles. At least five years will be required for the work, and an expenditure of nearly one hundred millions of dollars.

UNITED STATES.—During the Eighth month the public debt was reduced \$3,119,370. The amount of coin in the Treasury at the end of the month was \$62,511,956, and the currency balance \$11,666,805.

The outstanding fractional currency is still nominally \$31,555,311, notwithstanding the issue of silver coins. It is held in the hands of the many millers, but small notes have been destroyed and will never be presented for redemption.

The interests in Philadelphia last week numbered 345, and in New York 610.

The mean temperature for the Eighth month, by the Pennsylvania Hospital record, was 75.59 deg., the highest during the month was 95 deg., and the lowest 55 deg. The amount of rain for the month 1.21 inches. The mean temperature of the three summer months of 1875 is stated to have been 75.52 deg. The highest during the mean of the three summer months of 1872; the lowest was 60 deg., in 1816. The amount of rain in the three summer months of 1875 was 15.98 inches, and in the corresponding months this year only 9.63 inches.

The Philadelphia city passenger railroads reported 2154 miles of road at the beginning of the year, and 1,056 cars and 6,097 horses. The receipts from passengers carried were, in 1875, \$5,631,216, and the expenses \$3,668,839, leaving \$1,962,376 income from roads costing \$8,318,471. During the year 1875 ten persons were killed, and \$14,142 for appropriate compensation.

A number of disastrous fires were reported last week in various parts of the country. One occurred in San Francisco by which two hundred families were rendered homeless and property burned to the value of \$1,000,000.

The number of persons who paid for admission to the International Exhibition at Philadelphia in the six days ending 9th month 2d, was 259,333. The total receipts at the gates up to that date were \$1,303,247.

The total coinage of the U. S. mints for the Eighth month was \$7,719,429, against \$7,000,000 for the same month in 1875.

The foreign commerce of the port of New York for the past week was as follows: General merchandise exports, including dry goods, \$4,467,011; produce exports, \$5,530,585, specie exports, \$317,401. The total imports of merchandise—this year were \$199,097,396, against \$214,147,029 for the corresponding period of 1875 and \$281,814,056 in 1874. The total exports of produce were \$174,251,232, against \$166,812,612 in 1875, and \$197,829,492 in 1874.

The Markets.—At the following were the quotations for the 4th inst. New York—American grain, 169½; Superior Flour, \$3.50 a \$4.75; State do., \$1.40, \$1.40; finer brands, \$5 a \$8.20. No. 3 Chicago spring wheat, 97 a 99 cts.; new red winter, \$1.16. No. 2 Chicago, 91 cts.; white, 45 a 47 cts. Rye, 75 a 80 cts. Yellow corn, 58 a 59 cts.; mixed corn, 55 a 56 cts.

Philadelphia.—Uplands and New Orleans cotton, 12 a 12½ cts. Flour, Ohio extra, \$4.00; finer brands, 4.50 a 8.25. Bed wheat, \$1.15 a \$1.18; amber do., \$1.18 a \$1.20; old white, \$1.25. Western rye, 60 cts. Yellow corn, 55 a 56 cts. Road and pure oats, 41 a 48 cts. No. 1 York cheese, 9 a 10 cts. Clover seed, 14 cts. Timothy, \$1.75 per bushel. Beef cattle were in better demand this week, but prices were without material change. 2,500 head arrived and sold at 53 a 63 cts for extra Pennsylvania and western steers; 4½ a 6½ cts for good Pennsylvania and western steers; gross for common as to quality. Sheep were in fair demand, 12,000 head sold at 4½ a 5½ cts, per gross as to quality. Hogs were rather lower, 3,000 head sold at \$8.75 a \$9.25 per 100 pounds net. *Chicago.*—No. 2 spring wheat, 97½ cts. No. 3 do., 84 cts. No. 2 corn, 54 cts. Oats, 31 cts. Rye, 53½ cts. Barley, 77 cts. Lard, 10 cts.

RECEIPTS.

Received from William T. Fawcett, Ind., \$2.10, vol. 50, and for Isaac Ferris and Philip Johnson, \$2.10 each, vol. 50; from Benjamin D. Stratton, Agent, O., \$2.10, vol. 50, and for Edward Y. Cope, Uriaah Price, Christiana Kirk, Hannah Gilbert, Joshua Coppock, Joseph Stratton, and John F. Stratton, \$2.10 each, vol. 50, and for Charles W. Satterthwaite, \$2.10, to No. 19, loc. 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Receipts received after Fourth-day morning will appear in the Receipts until the following week.

FRIENDS' SELECT SCHOOLS.

These schools, under the care of the three Monthly Meetings of Friends in this city, will reopen on Second-day, Ninth mo. 4th, 1876. The Boys' School on Cherry St., above Eighth St., is under the care of Edward Haines, as Principal. The Girls' School, on Seventh St., below Race St., is under the care of Margaret Lightfoot. There are also two Primary Schools for the instruction of those children who are too young to attend the higher schools; one of which held in the Meeting-house at the corner of Sixth and Noble streets, taught by Mrs. Dorothea C. Child, of the Boys' School building on Cherry street, under the care of Susanna Howe.

The attention of Friends residing in this city and its neighborhood is particularly invited to these schools. They are held in the Meeting-house, and Friends belonging to Philadelphia Yearly Meeting, sending children to these schools, (also members) who may find the charge burdensome, can be fully relieved. In the principle schools opportunities are afforded of obtaining a liberal education in useful branches of Study, and in the Latin and Greek languages. Facilities for illustration are afforded by a valuable collection of philosophical and chemical apparatus, minerals, and Anzoni's models—parts of the human system, &c. French is also taught in the Girls' School. In the primary schools the children are well grounded in studies of a more elementary character.

It is desirable that applications for admission of children should be made early, and that parents return children to the schools should send them at the beginning of the term.

Further information may be obtained upon application to the Treasurer of the Committee.

JAMES SMEDLEY, No. 415 Market street.

MALVERN BOARDING AND DAY SCHOOL.

Will reopen on 2nd day, the 11th of 9th month 1876. Address,

JANE M. ELDRIDGE, Paoli, Pa.

EVENING SCHOOLS FOR ADULT COLORED PERSONS.

Teachers are wanted for these Schools, to be opened about the first of Tenth month. Apply to

Elton B. Gifford, 719 Market St.

George A. Scattergood, 415 Grace St.

Richard J. Allen, 835 North Seventh St.

Ephraim Smith, 1100 Pine St.

FRIENDS' ASYLUM FOR THE INSANE.

Now Frankford, (Twenty-third Ward.) Philadelphia. Physician and Superintendent—JOSIAH H. WOODRUM, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, on the 10th of 8th month, 1876, at his residence, near Mt. Pleasant, Ohio, JOHN WILSON, in the 18th year of his age. He had near his close, "All in peace."

—, on the evening of the 28th inst., at her residence in this city, JULIANA BANNER, in the 82d year of her age, a member of Western District Monthly Meeting.

WILLIAM H. PALE, PRINTER,

No. 422 Walnut Street.

THE FRIEND.

PHILADELPHIA.

For "The Friend,"

Quakers and Quakerism.

(Continued from page 26.)

The immense revival of discipline which took place in 1770 assumed the same negative and restrictive character, and Friends increasingly isolated themselves from the world they were at first gone forth so bravely to subdue. A powerful action which still remained to Quakerism was carried out by isolated individuals, and no longer by the Society at large.

In Ireland, at the close of the eighteenth century, and thirty years later in America, successive secessions took place on doctrinal grounds, the undue stress laid on the inner life, to the practical exclusion of the atoning work of Christ, leading to Unitarian tendencies and a denial of the inspiration of the Scriptures. Modern Friends while holding strongly as ever the old mighty truth, "I live in the Holy Ghost," give a far more prominent place to the atonement in their teaching.*

It is to both the merits and defects of Quakerism that we must attribute its steady decline in numbers. On the one hand its high standard of practice, its strict discipline, the ready protest it has maintained against war, dupe luxury, &c., led to many defections and secessions. On the other, its rigid unmitigated character, its vexatious restrictions, marriage limitations, its public worship adapted for the *ethnos*, but which takes account of the weak and the ignorant, the sense of the sacraments, and the want of established ministry for religious teaching, have all contributed to the decline of the Society in numerical strength.† At the end of

* Those familiar with the writings of the early members of the Society of Friends, know that they obtain frequent and full declarations of their faith in a atoning sacrifice of the Redeemer.]

† These causes, so far as they are correctly assigned, existed almost from the first rise of the Society; and therefore, by themselves, do not furnish an adequate explanation of the diminution in the number of members which the writer speaks—yet they doubtless had considerable effect, in connection with a decline of zeal and increase of worldly prosperity, and that self-indulgence which naturally follows. The Quakerism of the 17th century was not more rigid in its character than that of the 17th; but its professors as a body (though many noble exceptions) were more worldly-minded and less earnest in the work of religion; and hence the Society was in measure shorn of its strength; and many wandered from its fold, who were unwilling to submit to the restraints imposed on their inclinations.]

the seventeenth century, if we are to trust to the anonymous and hostile author of "The Snake in the Grass," a pamphlet directed against the Friends, the Society numbered in England alone one hundred thousand. In DaFrymple's "Memoirs" they are stated at half that number; but as he quotes from returns furnished to William III. by parties wishing to magnify the strength of the national church and to underrate the number of dissenters, this is probably an understatement. It would be tedious to enter into the statistics which enable us to strike the balance between the two; but estimating the population of the United Kingdom at eight millions and a half, we may approximately conclude that one person in one hundred and thirty professed with the Friends in the latter part of the seventeenth century. At the present day, whilst the population has nearly quadrupled, the Society of Friends numbers in the United Kingdom only twenty-six thousand,* or about one person in twelve hundred.

Nor do we think that the withdrawal of vexatious restrictions and archaic narrowness, which marks the Quakerism of the present day, and its greater assimilation to modern life, will prove sufficient to prevent a yet further decline, though we do not contemplate the extinction of Quakerism till the Christian Church has absorbed into herself the distinctive truths to which it has borne such noble witness.

By its very rejection of all outward forms, and its realization in individuals of the deepest and most spiritual type of Christianity, it stands as an eternal witness to the spirituality of Christ's religion, and the catholic operations of God's Spirit, a truth emphasized by the very isolation in which it is held, an eternal protest against the sacramentarianism—

Which would confine the Inestimable,

And tie him to his own prescript,

Who made his laws to bind us, not himself.

But if as a system on which to found a divine society Quakerism is defective, we doubt whether as a school for the energetic yet disciplined development of the individual character it is not unrivalled; and to this we attribute its being on so many points in advance of the Christian Church. In its absolute recognition of the sacredness of individual responsibility, every man and woman being the possible mouthpiece of the Divinity, in the facilities it offers for the *superior's* *teftimes* coming to the front, the whole being bound to assist the exercise of the individual's gift, in the silence and subjection it enjoins to the divine voice, above all in its intense recognition of a great spiritual force—call it by what name you will—which a man can lay hold of by faith and make his own, Quakerism stands alone and unrivalled. The inner light the Quaker believes in is an inex-

haustible source of force, like the sun without. He does not expect to work uncalled for miracles by it; there is nothing arbitrary in its action any more than in the forces of nature; it only works in the line of the divine will, but in the line of that will it is practically omnipotent. As an engineer takes hold of some natural force, and by obeying its laws makes it his own, and drives his engine right through the granite bases of an Alp, so by obeying the divine Spirit we gain a supernatural power before which all obstacles must disappear. In Emerson's noble words—

So nigh to grandeur is our dust,

So nigh is God to man,

When duty whispers low, "Thou must,"

The soul replies, "I can."

As St. Theresa said when she set to work to found a much-needed house of mercy with only three halfpence in her pocket, "Theresa—an I three halfpence can do nothing; but God and three halfpence can do all things." In this practical recognition of a great ever-present spiritual force, the power of the Holy Spirit, has not Quakerism still got much to teach the Church at large, and, once learnt, might not a new era dawn on Christianity?

We have now to trace out what Quakerism through its belief in an indwelling Spirit,* which is both light and force, has accomplished, as well as in the witness it has borne to unacknowledged truths, as in the practical reforms it has effected.

We are all familiar with the unswerving witness that Quakerism has borne against war in the name of the Fatherhood of God and the brotherhood of man. In this alone it has shown itself some centuries in advance of the rest of the Christian Church. Changing used to say that if we would only dress our soldiers in butchers' blouses, the eyes of mankind would at once be opened to the true nature of "glorious war." But even without the help of the butcher's blouse, the Quaker's mild glance has been able to pierce through the scarlet and white and gold trappings of military glory, and see the foul blood-miscured idol beneath.

We do not mean to inflict upon our readers any trite declamations against war, or indulge in the usual calculations of how many pipes of human blood have been wasted, or how many thousand lives are destroyed per page in an ordinary history. But it may be worth while briefly to inquire how far there is a law of evolution in human affairs which seems to point to the gradual extinction of war, and how far, therefore, the world is destined to come round to the Quakers, and not the Quakers to the world.

* "The Light of Christ within, as God's gift for man's salvation, is their fundamental principle, which is as the corner-stone of their fabric; and to speak eminently and properly, their characteristic or main distinguishing point or principle."—PENN. A recent authority, S. Tuke, represents the views of the early Quakers on the Spirit as "the foundation of what is called Quakerism."—"Life of Whitehead."

* This is probably an over estimate.

Going back to the rise of modern Europe, to the period which we emphatically name the Dark Ages, we find society, in the disruption of the ancient civilizations and the infancy of the new, gradually reforming itself on the only available basis of physical force, being built up of military units, the sum of which constituted the feudal system. "Because," says M. Guizot, "the system of judicial guarantees was vicious and powerless, because no one had faith therein, in one word, in default of anything better, men did themselves justice; they protected themselves." Private warfare and judicial combat became established institutions regulated according to fixed principles, and with more minutely determined forms than the pacific process." In the practical absence of legal and judicial institutions men at that period were obliged to have recourse to Lynch law.

(To be continued.)

Coal and Coal Mines.

BY EDWIN BATTLE.

Everybody knows that coal is black and heavy; that it is dug out of a mine, and that it is a very useful article to have in the house during the winter months; but as to its origin, what it really is, how long it takes to grow or form, where it comes from, or how long the supply will last, are questions left by the many, for the few to consider.

Redfern speaks scientifically when he says "coal is a compressed and chemically altered vegetable matter, associated with more or less earthy substance." Fownes says "coal is looked upon as a product of decomposed organic matter, especially vegetable matter, beneath the surface of the earth, where water and air are almost excluded." In other words, coal is the remains of old forests, which have been subjected to an enormous pressure for thousands of years, or perhaps for ages. Coal has been proved by the microscope to be of vegetable origin; very thin layers of coal have been examined by Dr. Aitkin, of Glasgow, and several others, and in every portion so examined, they found traces of vegetable cells, or structures, showing its plant origin. Even in the most altered coal this could be ascertained, and leaves of trees and portions of branches were plainly visible under a similar examination. Three principal varieties of coal are met with, Anthracite or Glance coal; Lignite or Brown coal; and Black or Bituminous coal, or rather a soft coal producing more smoke and gas than coal in ordinary use.

How long does it take to form coal? is a question not so easily answered. You may remember that Pollock speaks of "Questions put in much simplicity, but ill to solve," and this is one of those. Nature works slowly; vast portions of land may be covered by the sea, or be reclaimed from the sea, mighty monarchies may be overthrown, whole generations of men may disappear from the scene; but all this time, silently down in the bowels of the earth, a change is taking place, and the Great Ruler of the Universe, in His own time and way, is preparing to meet the wants and necessities of man in ages far remote. Remove the earth's crust, dig a little deep, and we shall find that fuel of another kind from that used by a former race of beings, has been provided, and that the unconsumed timber of another age is still in existence, in another form 'tis true, discoloured it may be, but in its

present state more condensed, producing more heat, occupying less space, and more adapted to meet the requirements of the men now living than when it stood erect in some primeval forest. Nothing is wasted in Nature's great laboratory, for the fuel not wanted by one generation is wonderfully preserved in God's great storehouse for the use of generations yet to come.

The use of coal does not appear to have been known to the ancients, and although we read of coals in the Bible on several occasions as having been used, we are to understand charcoal as meant and not coals. We are not told that coals were ever known to the Jews. Of late years mineral coal has been found in Mount Lebanon, eight hours from Beirut. Coal appears to have been discovered at Newcastle, England, in the early part of the thirteenth century, and not many years after was complained of as a nuisance, and Parliament petitioned King Edward the Third to prohibit its use. A proclamation was soon issued to that effect, but, as wood was very dear, the use of coal became general, in spite of the proclamation and the Parliament, and if there has been one thing more than another which has contributed to make England what she is, it must surely have been the discovery of those wonderful coal mines which, some few years since, appeared to have been almost inexhaustible.

Twenty years ago, 30,000 tons of coal were consumed in Manchester and its suburbs, per day, to furnish steam power; 3,000 tons per day were used in the manufacture of salt; transatlantic steamers then took 70,000 tons per year; gas works 10,000 tons per year; and it is recorded by M. de Carnal, one of the greatest owners of coal mines in Prussia, that the quantity of "coal mined in 1857, in different countries, amounted to 125,000,000 of tons, a mass which, piled up six feet high, would cover a geographical square mile, and that it amounted in value to £37,000,000 sterling, a sum far beyond that realized by the digging of the precious metals." Where coal is now found, and how much was found in 1873, may be seen by consulting the following table of statistics, compiled by a New York firm engaged in the coal trade:

	Tons.
Great Britain,	123,400,000
United States,	50,000,000
Prussia,	24,000,000
France,	15,000,000
Belgium,	14,000,000
Austria,	7,000,000
Australia,	1,000,000
Nova Scotia,	1,000,000
Spain,	600,000
India,	550,000
Russia,	250,000
Other countries,	2,000,000
Total,	238,800,000

These figures represent pretty nearly the coal production of the world for 1873, and if we bear in mind that Great Britain consumed, in 1871, no less than 105,000,000 tons, chiefly on account of her industrial establishments, we are somewhat prepared to answer the next question.

How long will the supply last? This we confess is a problem not solved to the entire satisfaction of all concerned. In 1859 it was affirmed that "England could furnish coal

enough for all Europe for 4,000 years; from a pamphlet lately issued, and from which the above statistics were taken, we learn that the question of coal supply in England has for a long time engaged the earnest attention of the government, and the Commissioners appointed by the Crown have, a five years of investigation, at great expense reported that the amount of coal in Great Britain to the depth of 4,000 feet is enough to last from 200 to 300 years, and the present rate of increase in the consumption of coal be continued, the supply will much sooner be exhausted." At a depth of 4,000 feet it would seem to be an unheard-of thing to pursue mining operations. "At Rosbrid the deepest shaft in England, 2,376 feet, temperature is 92 degrees. At 2,690 feet, temperature reaches blood heat (98), in which continuous exertion is impossible. The people of England begin to see that in order to make their supply keep pace with the ever increasing demand, they must economize use. It has even been proposed in Parliament to prohibit its exportation, which amounts to about 14,000,000 tons per annum. The *London Engineer*, a reliable paper, said 1865: "If ever we are dependent on America for coal it would require about 1,200 cubic feet of the size of the Great Eastern, to maintain our present supplies." This seems to indicate from what quarter of the world England expects coal to come from. J. Lothian Bell appeared before a Parliamentary Committee, requested, and proved by carefully prepared statistics that the iron manufactures consumed one third (or 40,000,000 tons of coal) of the entire product of Great Britain, a nothing but a more ample supply of coal relieve the country. "European competitor said he, "will not seriously affect the English market, as the resources of the countries nearest at hand are not great enough to be taken in consideration; but America has enough coal for all the world." Want of space forbids our saying anything about the white coal found in Australia, or the immense bogs of peat found in Ireland, Wales and some parts of England, large quantities of which are used for fuel as a substitute for coal. It would be singular if it should come to pass that America should supply England and literally "carry coals to Newcastle."—*New York Observer*.

[The following letter and extract is from subscriber in Ireland.]

TO THE EDITOR OF "THE FRIEND:"

I offer for insertion in "The Friend," if approved, of the enclosed, which I have copied with the remarks thereon, from a part of a diary in my hands and which has never been published,—the manuscript has come into my hands from some of my ancestors.

We continue to read the "Philadelphian Friend" with much interest, and value greatly.

Extract from the diary of S. ptimus Moxam (Clonmel, who departed this life at the house of our friend Robert Dudley, in Clonmel, the 10th day of the 31st month, 1775, after a short illness, aged 26 years).

"2nd month 19th, 1775.—Our afternoon meeting I desire to remember with humble gratitude and thankfulness, for the merciful regard and sheddings forth of that Divine bread, and consoling, tendering, endearing love, that unites the whole body in joint love

ship and oneness. Oh! that we may more press after it, is the desire of my heart at this time. Oh! the solemnity that we favored with. I thought I was thankful that there was a number present who were blest, through divine mercy, to worship the Father in spirit and in truth, for such I persuaded He is now seeking as well as merely. Glory to His ever-living, ever-thy, powerful and great Name, there is a power still preserved in this place who can, His power and might, worship Him in holiness. Oh! that I may never forget these blessed seasons of Divine favor and regard. I remember I thought much of heaven and the silence that was there for the space of half an hour. Yes, there was silence in heaven for the space of half an hour; and I cannot but admit that this matter should come so peculiarly before me, and with so much earnestness and joy as I cannot express. I remember also, my solemn and final change was mysteriously brought before the view of my mind with such uncommon resignation, peace and sweetness, which greatly tended to bring my mind in contrition of heart before the great object of all our worship. Oh! may we wait upon Him, it is He who doth our works in us and for us, through His blessed Son Christ Jesus our Lord, to whom glory, thanksgiving and praise for evermore! for He is all worthy with the Lamb to consummate. Amen! Amen!"

It is very remarkable that in a few days after the date of this memorandum, the last of the diary, this dear young man was seized with the illness which terminated his life. It appears that in this season of peculiar favor, which he so feelingly describes, that he not only had a view of his final change, but that his purified spirit, about to be freed from the shackles of mortality, was permitted a foretaste of the fulness of joy which so nearly awaited him.

"Mark the perfect man and behold the upright, for the end of that man is peace."

New Jersey's Products and Resources.—In the Address made by Abraham Browning before the Centennial Commission on the 24th inst., he gave some statistical information respecting New Jersey which is interesting. He says:

"The wealth of New Jersey is shown by the fact that in 1765 the entire land, improvements and personal property were assessed at \$15,000,000, or \$150 to each individual, while in 1870 the value was assessed at \$941,000,000, or \$833 to each individual.

"The soil of New Jersey has always been appreciated, but according to the census of 1870, Jersey had 2,500,000 acres under cultivation, the early one-half. The value of her products was \$43,000,000, averaging \$14.30 per acre, more than twice the average. Massachusetts, the next highest on the list, with 2,700,000 acres, produced \$32,000,000, with an average of \$11.80 per acre."

By reference to Appleton's American Cyclopaedia, it appears that more than half of all the cranberries produced in the United States are grown in New Jersey. In 1873 it was reported that 7,000 acres of cultivated and 40,000 of wild land were devoted to the culture of cranberries; and that the crop amounted to about 125,000 bushels, worth from \$2.50 to \$2.75 per bushel.

For "The Friend."

At the eventful period in which the Society of Friends was raised up, two defective modes of belief were prevalent among the professors of Christianity. The one, that Christ had purchased eternal redemption for all those who had been foreordained thereto from the foundation of the world, and who therefore could not be lost. The other that all who by the study of the Scriptures, or through the teaching of others, obtained a belief in Christ as the Saviour of man, in his atonement for sin, and his mediatorial offices as revealed in the sacred page, if they freely confessed that belief, would be accepted by the Father for his Son's sake. The work of the Holy Spirit in the heart, leading to unfeigned repentance and amendment of life, through his transforming power and washings of regeneration, appeared to be little understood or regarded. The assistance of the Spirit was freely acknowledged as being necessary, but his influence was supposed to be imparted through the Scriptures, the church, or the "means of grace" appointed by the latter.

One of the most striking features in the proclamation of the fundamental truths of the religion of Christ, brought conspicuously into notice by George Fox and his faithful coadjutors, was that a measure or manifestation of the Holy Spirit is given to every man; its immediate operation on the mind of every rational being, enlightening him to discern between right and wrong, teaching and enabling him to act in accordance with the will of his Creator concerning him. They taught in simple but emphatic language that obedience to this measure of Divine Grace, or Light of Christ, mercifully bestowed on all, was directly and inseparably connected with the present and eternal welfare of every responsible being. That it was it, and it alone that could enable any one, whatever his intellectual power or his acquired knowledge, to work out his soul's salvation with fear and trembling.

Acting and speaking under the inspiration of this unspeakable gift themselves, their gracious Master enabled them to reach it as a witness in others, even where it often had been pressed down as a cart under sheaves—convicting of sin, pleading for repentance and amendment of life, and to allow it to rise into dominion over the corrupt propensities and frailties of the natural man. Not only did they teach that "the law of the Spirit of Life in Christ Jesus" was the efficient means of setting the soul "free from the law of sin and death," but that obedience to its requirements was the only way to arrive at that knowledge of God and of Jesus Christ, his Son, which is life eternal.

Hence it was the burden of their service as ministers of Christ, to induce their hearers, not to trust to a mere belief in the sacred truths recorded in the Holy Scriptures—valuable as belief in them is—but to seek to know in themselves the revelation of the Spirit that leads into all truth; which alone could give a right understanding of the Scriptures, take of the things of Christ and show them availing unto their souls, bestow on them a part in that forgiveness of sin, purchased by the atoning blood of the Lamb, and bring them "to know the things freely given to us of God." George Fox says their ministry was directed "to bring every one to their teacher in themselves," and to impress on their hearers the

necessity of knowing Christ revealed spiritually in them; so that as the work of sanctification was carried on "with open face beholding, as in a glass, the glory of the Lord," they might be "changed into the same image from glory to glory, by the Spirit of the Lord."

Under the Divine unction and blessing, this was the preaching that was instrumental in bringing thousands out of darkness into the marvellous light of the gospel; and those who continued in the faith rooted and grounded, were made more than conquerors, through Him who loved them and gave himself for them. There was no desire manifested to portray the way and work of the religion of Christ, in other colors than He had himself presented it. It was clearly set forth by those deeply experienced believers in a crucified Saviour, that if any man would be his disciple, he must deny himself, take up his daily cross, and follow Him in the regeneration. He had declared that He is the door into the sheepfold, and that if any man climb up any other way, the same is a thief and a robber. The early Friends knew from experience that his word was truth, and they adhered to it in their ministry, in their lives and in their conversation.

The doctrines of the gospel are immutable, adapted to all times and circumstances. In every generation from the time when Friends were first gathered into an organized body to the present day, the members who have submitted to walk by the same rule, and mind the same thing as those who were the instruments in founding it, have maintained the same doctrines and testimonies. It is a blessing from on high that the omnipotent Head of the church has preserved in it at the present troublous juncture, those who in the exercise of the ministerial gift bestowed by Him, continue to preach the same doctrine; and others, who likewise possessing their souls in meekness, patience and steadfastness, are willing to pass through tribulation and reproach, if only they may be kept faithful in support of the faith once delivered to the saints, and are enabled to press toward the mark for the prize of the high calling of God in Christ Jesus.

Our Saviour warned his disciples that many would assume to come in his name, crying, "Lo! here is Christ," or "Lo! he is there," and who would deceive many.

In our day there are those who, if they may be judged by their public discourses, seem to have obtained little or no deeper knowledge of Him whom "God exalted to be a Prince and a Saviour to give repentance to Israel and forgiveness of sins," than as He is spoken of in the New Testament as manifested in the flesh, working miracles, and offering up himself as a propitiatory sacrifice for the sins of the world. They are in the outer court, depending upon a self-wrought belief in what Christ has done for us without us; as were the high professors, when George Fox was sent forth commissioned "To turn people to that inward Light, Spirit and Grace, by which all might know their salvation and their way to God; even that Divine Spirit which would lead them into all truth." The main dependence of these for obtaining the knowledge of Christ and his offices, is the study of the Bible. Inappreciable is the value of the Holy Scriptures, as George Fox well knew; but as the people were then substituting a knowledge of their contents for attention and obedience to the in speaking word of Divine Grace, he says, "I was to

direct people to the Spirit that gave forth the Scriptures, that they might be led into all truth, and so up to Christ and God, as those had been who gave them forth."

A departure from this fundamental doctrine of the gospel has led to an attempt to lower the standard of Truth, to remove the ancient landmarks, and to delude the people with a religion that admits an alliance with the world, in not a few things that cannot obtain entrance through the strait gate, nor be carried along in the narrow way. We are readily pleased with that which accords with our natural inclinations; which, cherishing the sentiment that salvation having been purchased for man by a crucified Redeemer, and that fallen man has not the power of himself to save himself, assumes there is therefore little or nothing for us to do, but to accept it as a free gift; without going deeper or troubling ourselves about other terms than such belief as we can of ourselves command; without worrying ourselves about self-denial in what we choose to call little things, or making ourselves unhappy by rejecting the friendship of the world, and being esteemed fools by those we love to associate with and to copy after.

Alas, for those who are caught with this specious device of the enemy of souls! If their spiritual eye has ever been opened, their vision soon becomes dimmed; the light in them becomes darkness; and oh! how great is that darkness. Satan easily supplies a strong faith, which is imagined to be the true faith, and as easily passes off on them his counterfeit graces for the genuine fruits of the Spirit. In this condition they may be willing to compass sea and land to make proselytes, and persistently refuse to have their eyes opened to the sad fact, that they are blind leaders of the blind.

For those who are deeply grieved on account of these things, it may be well to cultivate the confiding spirit evinced by John Barclay, in the following extract from one of his letters: "I am cheerfully confident that if * * * any of these [advocates, counsellors, &c.] should not keep their habitations firm and unswerving, but turn aside *in any respect* from the ancient testimony *as to any particular*—that He who raised up such a people as we were at the first, will never cease to raise up such, and put forth some into the foreground, into the very seats of the unfaithful, the worldly-wise, the modifying, the men-pleasers, who still contend for that which some of us have struggled against. I have seen it wonderfully in my short day; I have read it of those who have gone before; and therefore let none ever throw away their shield and weakly compromise the trust devolving on them."

Delaware Co., 9th mo, 1876.

Opium Smoking.—A Chinese essayist on opium smoking says:—"Three years ago I saw an Englishman go to the hospital at Kolangsen to get himself cured of opium smoking. I was told that this man was in a good position in life, and had excellent abilities—yet he fell like this. It seems to me that it would be difficult for this man, if pressed at some future day by weariness and exhaustion, to avoid again having recourse to the criminal indulgence, and just as hard to prevent his leading his companions to do the same. If, in this little Amoy, Englishmen have been seen smoking opium, how are we to be sure

that in other places there are no Englishmen that smoke opium? Further, how are we to be sure that at some future day such men will not lead others to smoke opium? China for aught might call herself a country of literary enlightenment; but since opium came to abound in China, she has come near to a tottering and helpless condition. At present England, although she is a famous nation, having among her people a certain number of opium smokers, secretly leading others astray, if she does not stop the traffic by prohibition, will find it difficult to prevent the mischief from spreading over the entire country."

A TEACHER'S CARE.

Selected.

Teacher, watch the little feet,
Climbing o'er the garden wall,
Bounding through the busy street,
Ranging cellar, shed, and hall.
Never count the moments lost,
Never mind the time 't will cost,
Little feet will go astray—
Guide them, teacher, while you may.

Teacher, watch the little hand,
Flitting berries by the way,
Making houses in the sand,
Tossing up the fragrant hay.
Never dare the question ask,
"Why to me this weary task?"
These same little hands may prove
Messengers of light and love.

Teacher, watch the little tongue,
Prattling, eloquent, and wild;
What is said, and what is sung,
By the happy, joyous child.
Catch the word while yet unspoken,
Stop the row before 'tis broken;
This same tongue may yet proclaim
Blessings in the Saviour's name.

Teacher, watch the little heart,
Beating soft and warm for you;
Wholesome lessons now impart,
Keep, O keep, that young heart true,
Extricating every seed,
Plucking up the noisome weed,
Harvest rich you then may see
• Ripening for eternity.

—Family Treasury.

Selected.

FROM THE FRENCH OF PIERRE CORNEILLE, CALLED
LE GRAND CORNEILLE.

"O Dieu de verité, pour qui seul je soupire,"
O God of truth, for whom alone I sigh,
Knit then my heart by strong sweet cords to thee;
I tire of hearing; looke my patience try.
Entré to thee I cry,
Thyself my all shall be.

Speak thou alone!—For me nor human lore
Nor human sight shall now expound thy word;
Let creatures hold their peace, and thee adore;
Let voice of man no more;
But only thine, be heard!

Lord, he thou near, and cheer my lonely way,
With thy sweet peace my aching bosom fill;
Scatter my cares and fears; my griefs assay
And be it mine each day
To love and please thee still.

My God! Then hasten me; but clouds obscure
E'en yet thy perfect radiance, Thine divine!
O for the stainless skies, the splendors pure,
The joys that aye endure,
Where thine own glories shine!

Henry Downton.

An International Law Conference is to be held at Bremen, in September, under the auspices of the Association for the Reform and Codification of the Law of Nations. The first meeting is to be held September 25th, and the subject for discussion will cover a wide range, extending from private International Law

through all the branches of public International Law, to such miscellaneous matters as Prohibitive or Free Trade Tariffs, and Principles of intercourse between Christian and non-Christian nations. The object of the Conference is, if possible, to pave the way for the assimilation of the laws of different countries on all subjects of an international character. Thus, in the transactions between individuals of different nations there are Bills of Exchange and other negotiable securities, and it is intended to discuss the assimilation of the laws and treaties regulating them in the different countries. Judgment of foreign courts and their modes of confinement are also to be considered. Patent law varies in different countries, and thus presents an interesting subject for discussion. International coinage and mint regulations were also considered. Ship owners and underwriters, as well as merchants who make foreign ventures, are considerably perplexed by different national regulations about wrecks and collisions, general average, where loss occurs, and maritime insurances. These, as well as the nature of the maritime tribunals to consider and regulate such questions, are to be fully discussed. In public questions of International Law, the foremost now pending in which the United States is interested is the extradition of criminals, and the consideration of the International Law upon this subject will attract great attention at the Conference. The arbitration system of settling international disputes and the limits to it, will also be considered, and in connection with this there is the law of maritime capture. The Codification of the Law of Nations, whereby much that is not yet reduced to a written code will be permanently ascertained and recorded was a principal subject of discussion at the Hague Conference last year, and will be considered again at Bremen.—*Philada. Ledger* 8th mo. 31st.

Charity.

For "The Friend."

There are both right and left-hand errors to be carefully guarded against. Too many in the religious world, and too many also under our own name, are wearing garment made of mixed materials, and are sowing their ground with divers kind of seeds. These want of keeping under the anointing, qualifying power of the Lord Jesus, are bringing forth fruits of a spurious growth, and lack the true savor.

Now, while on the one hand, we must carefully cherish the *right growth*, both in ourselves and, as the Lord gives us true discernment, in others also, even that which springs from the *right seed*, and be willing under the guiding hand of the Husbandman, to have the pruning knife used for our good when necessary, so, on the other hand we must watch that our charity does *not* reach *too far*, even to protect and cherish, or cover over that which comes from a wrong seed or root, either in ourselves or others.

The first great matter is, to try and get down *low enough in ourselves*, even where the seed of life lies buried, that, dwelling with the root thereof, we may partake of its nature, and be thoroughly joined thereto. Then methinks we shall grow up in Him indeed, and the "plant of renown" will flourish in us of a truth, and we shall witness the eye-salve of the kingdom to enlighten our hearts, and

like as quick of understanding "in His fear," and being thus qualified by Him truly to distinguish between thing and thing, our charity will be fervent among ourselves, and it will make us exceeding tender of the life in all, and shall be enabled to own the smallest disparagement of it in any, and feel great care to set upon us that we do nothing to hurt it; yet it will not prevent us from bearing a faithful testimony against that in any, which is oppressing and choking the growth of this heavenly plant.

It does not mean that many in our religious Society, desire to exercise the right kind of charity, but need to be watchful, lest we cherish that which is appointed for destruction. I am firm in the belief, that as we dwell low with the Lord, we shall be safe. May the growth in us, and among us, be such as the Lord will own, and may He, in such a measure as He sees best, enlighten our hearts, and enable us, as to the measuring rod of his own Holy Spirit, to measure, and thereby truly to comprehend with all saints, what is the breadth, length, and depth, and height," of that building which we or others, may be rearing.

For there is much that is spacious and beautiful, that lacks the true proportions, and differs from the heavenly pattern, known only to those who have seen it in God's holy mount.

Eulogium on the Life and Character of Horace Binney, by the Hon. William Strong, Justice of the Supreme Court of the United States.

This highly interesting memoir of one of our best eminent fellow-citizens will be eagerly read. Horace Binney was born in this city, the year 1739, and passed his long life, ordering upon ninety-six years—among us, in the most pre-eminent position not more than his commanding intellect, to his vast and exact legal knowledge and the judicial cast of his mind, than to his severe unblemished integrity, and to the purity and dignity of his private life.

"Forty years ago, in this hall," says Judge Strong, "on an occasion much like the present, Mr. Binney commenced his eulogy on Chief Justice Marshall, with the following remark: 'The Providence of God is shown most beneficently to the world, in raising up men of time to time, and in or owing with long days, men of pre-eminent goodness and wisdom.' The thought thus expressed is worthy of recall to-day. At intervals all along the line of human history, and especially in enlightened communities, men have appeared, who, by their native endowments, their thorough culture, their ceaseless energy, and their moral worth, have raised themselves to a plane above that of their fellows; men who have been in advance of all their cotemporaries, and to whom the rank of leaders has been universally conceded. Such leaders have arisen in every department of social life, in the learned professions, among the devotees to the fine arts, in the explorations of natural science, in mechanical pursuits, in those of commerce, and even in the department of agriculture. Occasionally, as we noted one has lifted his standard of attainment higher than that of any of his predecessors and has gone forward beyond the utmost reach. Such men are among the benefactors to the world of a beneficent God. It is through their agency society makes progress. They lead the onward way. Their lives lend attractive force to that which is truly valuable. They present models for im-

itation, and their achievements stimulate to a generous rivalry. Their standard 'full high advanced,' is ever visible, and it calls with a noiseless but persuasive voice to those who are behind, to move onward. No one can overestimate the value of such a life to young men in the legal profession, if it be kept ever in view. If they have not mistaken their calling, it must win their admiration, and stir the noblest impulses of their hearts. It is a perpetual reproof of contentment with any attainments less than the highest possible, a rebuke of character and conduct unbecoming the best aims, and it gives courage for the grandest efforts.

"Happily the lessons of such a life are beyond the reach of death. They are the rightful property of more than one generation. They ought never to fade into oblivion. To preserve them with gratitude for the past, and with hope for the future, is a duty which the living owe to themselves and to those who shall come after them. And this duty is best performed as a skillful painter preserves in memory the subject of his portrayal. A portrait is not a life, it is true, but it recalls a life. So, a delineation of character and achievement, if it be accurate, prolongs the influences the character is fitted to exert. It is therefore in obedience to your desire to perpetuate as far as may be, the instruction and example of a life more than commonly eminent and useful, that I am to speak to you of Horace Binney."

Having lost his father when seven years old, he was placed at a school in Bordentown, where he remained three years—and afterwards entered Harvard University. "It was at Bordentown and at Harvard," says Judge Strong, "that Mr. Binney laid the foundation which he subsequently built his character and his fame. Protected by Divine Providence, as he was wont to acknowledge, against the perils that even then beset the paths of young men in a college course; having an ardent desire for distinction in his class, a desire which forbade any deviation from moral rectitude, and strongly resisted every temptation to indolence or vicious indulgence; he secured for himself all the advantages of mental and moral culture, which the most advanced collegiate education in this country could then give. Through his entire college life, his intercourse with the officers of the institution was one of uninterrupted respect on his part, and of affectionate confidence on theirs. He was the least of his acquisitions. He acquired the art and the habit of study, with an unflinching love for it, and this acquisition was permanent. It continued to be his delight, and a great element of his power until the close of his life. Never for a moment did he lose the mistake into which so many fall, of considering the primary object of a liberal education to be securing a knowledge of facts, or of sciences, which might be useful in after-life. This knowledge he knew would decay. He sought and he obtained the 'art of all arts' first—that of setting the mind intently upon a subject of thought, and holding it there until the subject is thoroughly understood.

"This power or art of study which he acquired during his college life, he ever regarded as his most important gain, and many years afterward he spoke of it as such. Much of what he acquired, he said he had lost. His knowledge of the Latin and Greek classics, as

well as of the higher mathematics, had fallen away from disuse, though he had preserved enough to assist his children in their education, 'but,' he added, 'the unflinching art which I acquired at college was that of study, and if the acquisitions of knowledge I then made if they are faded, or fallen from the surface, * certainly the art or faculty of study has never left me.' Habits and tastes like these were his constant shields, as well as his instruments of power; and long after his graduation he was able to say, 'I look back to my college life with great satisfaction. I was a fair student of everything I was required to learn, and it does not occur to me that I ever missed a recitation. I have no recollection, that during those four years, I ever did a thing to make my friends blush, and their praises when I left college, gave me courage to begin my first steps in the world.'"

After graduating at Cambridge, he studied law in his native city, and was admitted to the bar in 1809. Success comes slowly to the lawyer, and it was several years before his great abilities were appreciated. His conduct of some insurance cases in 1807, brought him into notice, and from that time business flowed in upon him. "He seemed to pass," says Judge Strong, "at one bound from his long apprenticeship waiting into acknowledged leadership. He divided the business of the courts with the eminent men, who, when he came to the bar held all that was worth holding. * * He had great advantages, none of which were neglected. * * He had a fine commanding person, an uncommonly handsome face, a dignified and graceful manner of address, and a most melodious voice perfectly under his control, and modulated with unusual skill. He was constitutionally an earnest man, yet while in earnest, he had a calm self-possession, the fruit of consciousness that he fully understood his subject, and of confidence that he could make others understand it, and he entered upon the trial of his causes with a sure conviction, confirmed by his previous study that he was advocating the right. No unjust or dishonest case would he willingly undertake, and he was able to say after his career at the bar had closed, that he had never knowingly committed an injustice toward a client, or the opposite party, or prosecuted a cause that he thought a dishonest one, and that he had washed his hands of more than one, that he had discovered to be such after he had undertaken it, as well as declined many which he perceived to be such when first presented to him. Add to this the power of a mind equal to the comprehension of any legal subject, a mode of presentation the best possible; a rhetoric that was faultless; an aptness of illustration that illuminated the most abstruse matters; a personal character without a visible flaw, and it is easy to see that he must have been, as he was, a most persuasive and convincing advocate.

"He won the confidence of courts and juries by his entire freedom from trick, or any of the low arts of cunning. He disdain to practice any stratagem or artifice for the purpose of obtaining an advantage over an adversary. His nature was true, and his life was truth unfolded. He was always candid, giving full consideration to whatever made against him. He appealed to no prejudices, but rather boldly met and endeavored to dissipate them. He was ever courteous in his demeanor towards the court, and towards his opponents. Thus

every element of power in mind, in culture, in habit, in physical endowment, in taste, in demeanor and in character, was his. All united in giving to his forensic efforts an efficiency and a success inferior to those of no other. * * * Of his judgment I find it difficult to speak in fitting terms. It seemed to be intuitive, yet its conclusions were cautious deductions of sound reason from a most comprehensive and accurate view of the facts, alike in detail and as a whole, and from a wise selection of the principles properly applicable to the state of the facts as he found them. He brought to every subject submitted to him, the calmest consideration, unbiassed by prejudice or preconceived opinions, and he gave true weight to whatever bore upon it. Hence the decisions of this judgment were never narrow, and almost never wrong. He was a most wise and safe counsellor at the bar, and in every circle where his counsel was sought."

(To be concluded.)

For "The Friend."

The following passage from Charles H. Spurgeon's lectures, furnishes an interesting illustration of that Divine guidance, without which there can be no true ministry of the Gospel. However "carefully studied" the "topic of discourse" may be, however doctrinally sound, and whatever amount of earnestness may be infused into it; yet, if the holy anointing is absent, if the call of the Lord is not then and there extended to the preacher, his labors are not gospel ministry.

It is encouraging to meet with acknowledgments of this truth (even if they are but partial ones) among the spiritually-minded professors of other branches of the Christian Church; and one can but desire that our own members, whether preachers or not, may increasingly value their liberation from the bondage of formal sermons and other services so-called; and become prepared to partake in spiritual communion with God and with one another, whether their meetings are held in silence or otherwise.

"I had opened the Bible to find the text, which I had carefully studied as the topic of discourse, when on the opposite page another passage of Scripture sprang upon me like a lion from a thicket, with vastly more power than I had felt when considering the text which I had chosen. The people were singing, and I was sighing. I was in a strait betwixt two, and my mind hung as in the balance. I was naturally desirous to run in the track which I had carefully planned, but the other text would take no refusal, and seemed to tug at my skirts, crying 'No, no, you must preach from me. God would have you follow me.' I deliberated within myself as to my duty, for I would not be either fanatical or unbelieving, and at last I thought within myself, 'Well, I should like to preach the sermon which I have prepared, and it is a great risk to run, to strike out a new line of thought, but still as the text constrains me, it may be of the Lord, and therefore I will venture upon it, come what may.' I almost always announce my divisions very soon after the exordium, but on this occasion, contrary to my usual custom, I did not do so, for a reason which some of you may probably guess. I passed through the first head with considerable liberty, speaking perfectly extemporaneously both as to thought and word. The

second point was dwelt upon with a consciousness of unusual quiet efficient power, but I had no idea what the third would or could be, for the text yielded no more matter just then, nor can I tell even now, what I could have done had not an event occurred upon which I had never calculated. I had brought myself into great difficulty, by obeying what I thought to be a divine impulse, and I felt comparatively easy about it, believing that God would help me, and knowing that I could at least close the service should there be nothing more to be said. I had no need to deliberate, for in one moment we were in total darkness—the gas had gone out, and as the aisles were choked with people, and the place everywhere crowded, it was a great peril, but a great blessing. What was I to do then? The people were a little frightened, but I quieted them instantly by telling them not to be at all alarmed, though the gas was out, for it would be soon relighted; and as for myself, having no manuscript, I could speak just as well in the dark as in the light if they would be so good as to sit and listen. Had my discourse been ever so elaborate, it would have been absurd to have continued it, and so as my plight was, I was less embarrassed. I turned at once mentally to the well-known text, which speaks of the child of light walking in darkness, and the child of darkness walking in the light, and found appropriate remarks and illustrations pouring in upon me, and when the lamps were again lit, I saw an audience before me as rapt and subdued as ever a man saw in his life. The odd thing of all was, that some few church-meetings afterward, two persons came forward who professed to have been converted that evening; but the first owed her conversion to the former part of the discourse, which was on the new text that came to me, and the other traced his awakening to the latter part, which was occasioned by the sudden darkness. Thus you see, Providence befriended me. I cast myself upon God, and his arrangements quenched the light at the proper time for me. Some may ridicule, but I adore; others may even censure, but I rejoice. Anything is better than mechanical sermonizing in which the direction of the Spirit is practically ignored."

The President of the Royal Geographical Society, Sir Henry Rawlinson, has received from General Stone a letter dated Cairo, June 10th, enclosing a telegram received from General Gordon, announcing the definite discovery of the source of the Nile. It was in 1863 that Captain Speke telegraphed to Sir Rodrick Murchison, "The Nile problem is settled." So far, however, was this from being the literal truth that a dozen years have passed without confirmation. Speke traced the stream to the Albert Nyanza or Lake, which Sir Samuel Baker reached next year, and also explored a tributary of that lake, to which he gave the name of the Somerset river, and which has since been found to be a channel connecting the Victoria and Albert Nyanzas, discharging the waters of the former into the latter. But geographers were not satisfied. They insisted upon the probable source in a third lake close to the equator, and called the Tanganyika. To this Speke strenuously objected, insisting that the true source of the Nile is in the Victoria basin, and this assumption has just been verified by an Egyptian expedition commanded by Mr. Gessi, an engineer on the

staff of General Gordon. He has followed the White Nile to its emergence from the Albu Nyanza; has circumnavigated that inland sea, and carefully measured it, and has pronounced the Victoria Nyanza to be the head reservoir from which the Nile derives its water. Thus Speke is sustained to the fullest extent, and most henceforth be honored as the discoverer of a secret that for two thousand years has puzzled the brains of mankind.—*Late Paper.*

The Decay of Conscience.

I believe it is a fact generally admitted that there is much less conscience manifested by men and women in nearly all the walks of life than there was forty years ago. There is justly much complaint of this, and there seem to be but little prospect of reformation. Thieves and frauds, and villainies in high and low places, among all ranks of men, are most alarming, and one is almost compelled to ask "Can nobody be safely trusted?" Now, what is the cause of this degeneracy? Doubtless there are many causes that contribute more or less directly to it; but I am persuaded that the fault is more in the ministry and the public press than in any and all things else. It has been fashionable now for many years to ridicule and decry Puritanism. Ministers have ceased, in a great measure, to probe the consciences of men with the spiritual law of God. * * *

They seem to me to "make void the law through faith." They seem to hold up a different standard from that which was inculcated in Christ's Sermon on the Mount, which was Christ's exposition of the moral law. Christ expressly taught in that sermon that there was no salvation without conformity to the rule of life laid down in that sermon. True faith in Christ will always and inevitably beget a holy life. But I fear it has become fashionable to preach what amounts to an antinomian gospel. The rule of life promulgated in the Gospel is precisely that of the moral law. These four things are expressly affirmed of true faith—of the faith of the Gospel:—

- 1st. "It establishes the law."
- 2nd. "It works by love."
- 3rd. "It purifies the heart."
- 4th. "It overcomes the world."

These are but different forms of affirming that true faith does, as a matter of fact, produce a holy life. If it did not, it would "make void the law." The true Gospel is not preached where obedience to the moral law is the only rule of life is not insisted upon. Wherever there is a failure to do this in the instructions of any pulpit, it will inevitably be seen that the hearers of such a mutilated gospel will have very little conscience. We need more Boanerges or sons of thunder in the pulpit. We need men that will flash forth the law of God like vivid lightning, and arouse the consciences of men. We need more Puritanism in the pulpit. To be sure, some of the Puritans were extremists. But still under their teaching there was a very different state of the individual and public conscience from what exists in these days. Those old, stern grand vindicators of the government of God would have thundered and lightened till they had almost demolished their pulpits, if any such immoralities had shown themselves under their instructions as are common in these days. In a great measure the periodical press takes

stone from the pulpit. The universal literature of the present day shows conclusively that the moral sense of the people needs toning up, and some of our most fascinating preachers have become the favorites of infidels, sceptics of every grade, Universalists, and the most abandoned characters. And has the offence crossed, or is the cross kept out of view? Has the holy law of God, with its stringent precept and its awful penalty, become popular with unconverted men and women? Or is it ignored in the pulpit, and the preacher praised for that neglect of duty for which he should be despised? I believe the only possible way to arrest this downward tendency in private and public morals is the bidding up from the pulpits in this land, with sparing faithfulness, the whole Gospel of God, including as the only rule of life, the precept and holy law of God.—*Chas. G. Finney.*

Headaches from Eye Strains.—Dr. S. Weiritchell calls attention to the injurious effects upon the general health, often little suspected, of defects of the eyes. In the efforts to cure this affected, a strain is involuntarily induced upon these organs, which extends to the brain, and is often followed by serious results. He says:

"That there are many headaches which are indirectly disorders of the refractive-accommodative apparatus of the eyes.

That in these instances the brain symptom often the most prominent, and sometimes the sole prominent symptom of the eye troubles, so that while there may be no pain or sense of fatigue in the eye, the strain with which it is used may be interpreted solely by cephalic or frontal headaches.

That the long continuance of eye trouble may be the unsuspected source of insomnia, vertigo, nausea, and general failure of the health.

That in many cases the eye trouble becomes suddenly mischievous, owing to some failure of the general health, or to increased sensitiveness of the brain from moral or mental causes."

The form of head-pain caused by eye troubles soon disappears when the eyes are corrected. A number of cases have been observed in which violent headaches, and in some cases apparent disease of the brain, have been quickly and permanently removed by the use of glasses which corrected a defect in the sight.

From "The British Friend."

A Suggestion on the Ministry.

It would have been a relief if another hand had offered the suggestion, which for some years has seemed worthy the consideration of Friends in the ministry. Those, who nevertheless are truly of the upright in heart, may attend their communications from the mistaken view that, so long as subjects open while they are speaking, they should continue to speak. But, seeing that Scriptural subjects are so familiar to the speaker that they will be sure to present themselves—one leading to another, in long succession—the faculty of erecting the safe stopping-place is greatly to be desired. This true faculty is not altogether a merely natural closing of a subject (which also may of course be helpful to a conclusion), but mainly resides in a watchfulness of the restraints as well as of the constraints of the Spirit. There would then

be a quick discerning as to what portions, even of Scripture passages, coming abundantly before the mind of the speaker, were shone upon by the light of requisition to express them. And thus, as to the use of Scripture itself in ministry, it would not be reduced to the mere employment of memory.

"Quench not the Spirit;" but then neither so dilute it that its wine is not only mixed with, but lost in, water. That opening of the Spirit (to change the figure) which should have been as gold in its weight upon the heart of the hearer, may, when the gold is beaten out into thin leaf, become as the chaff which the wind driveth away. Let it always be remembered by ministers that (as our late dear friend, William Forster, said so many years ago) there may be "a large gift in few words, and a very small one in a great many." In fact, the rambling style which results from going on with what comes before the mind that is not quick of understanding to know what to take and what to leave (and which rambling style, collecting much Scripture, goes to increase the evil of long sermons), may pass for a considerable ministry. Sometimes, with such as do not bear in mind that, as to a ministry of this sort, the wonder is, not that it should be capable of going on, but that it should stop even when it does.

WILLIAM BALL.

Experiments with Dynamite.—The Edinburgh *Scottishman* says:—By invitation of the East Lothian Agricultural Society, Robert McArthur and J. C. Aitken, of the British Dynamite Company, made a number of experiments, with a view of showing how farming operations may be aided by the new explosive. The experiments took place in a field on the farm of Morham and but a short way from the scene of the steam plow trials. In the reclamation of land especially, tree stumps and boulder stones are a source of annoyance to farmers, and hitherto, when it has been desired to remove these altogether, the expense of taking them out by simple digging or blasting them with ordinary gunpowder has been found to be considerable, while the time consumed over the operations was very great. It was with the object of exhibiting the rapidity with which tree stumps and stones could be cleared from land that the experiments took place, and in the course of an hour forty or more were blown into the air and the ground left ready for trenching. A spadeful of earth was removed from the side of a stump and a hole driven into the stump with a crowbar. Into this hole a cartridge of dynamite was pressed by means of a wooden ramrod, then a detonating percussion cap with a Bickford's fuse attached was squeezed into a small cartridge or primer of dynamite, and inserted into the hole in the trunk in contact with the charge. The hole was filled up with loose earth, about a foot-length of the fuse being left bare. A match was next applied to the fuse, and sufficient time was taken for the powder to reach the percussion cap to allow the operatives to retire to a safe distance. When the explosion occurred the trunk was literally burst out of the ground, some of the fragments, weighing nearly twenty pounds, being thrown to a distance of over a hundred yards. The destruction of the stumps was complete. In breaking up boulder stones, the dynamite was simply placed on top of the stones, covered

with wet sand, and fired with a fuse in the ordinary way. The result was the reduction of the boulders to fragments the size of a walnut. It was effectually proved by the experiments that land can be speedily cleared of formidable obstructions to good cultivation by the use of dynamite, and the committee of the society who watched the operations expressed themselves as highly satisfied with the results.

THE FRIEND.

NINTH MONTH 16, 1876.

SUMMARY OF EVENTS.

FOREIGN.—Abdul Hamid, the new Sultan of Turkey, has been fully interested in the averting of war.

A dispatch to Reuter's Telegram Company from St. Petersburg states that the Porte, replying to the representations of the European ambassadors in favor of peace, said in the present military situation an armistice was opposed to its interests. The Porte, however, at the same time held out hopes of the speedy proposal of conditions of peace. Notwithstanding the defeat of the Servians before Alexinatz, that stronghold is still in possession of some of their forces. A Belgrade dispatch says the Servians would prefer a continuation of the war to humiliating conditions of peace. Many of the Servians having motivated themselves to avoid military services, orders have been issued that all men who do so shall be punished by death or imprisonment. The most ardent combatants in the Servian cause appear to be the Russian volunteers. General Tchernayeff, commander in chief, is an officer of the Russian army. The London Times has a special dispatch from Belgrade stating that outside of that capital there exists a strong feeling of discontent against the Servian government.

Much indignation has been aroused in England by the reports of atrocious outrages committed by the Turkish soldiers in the district of Vidin. E. Foster, a distinguished member of Parliament, has gone to Bulgaria for the purpose of ascertaining the reality of the alleged barbarities.

On the 6th inst. a sanguinary conflict occurred in Montenegro, in which the Turks were defeated. It is said they left 800 men dead on the field, and that a great number were drowned in two rivers which they attempted to cross in their flight.

There is reason to hope that outrages by the Turks have not been so general as has been reported. In one district of Servia, in which the homes of the people were for a time in the hands of the Turks, no barbarities were committed.

A large part of the town of St. Hyacinthe, Canada, thirty miles from Montreal, was destroyed by fire the 31st inst. The loss is estimated at \$2,000,000. About six hundred dwelling houses were burned, and 2200 people left homeless.

A special from Madrid says: "The government has ordered all native and foreign Protestant chapels, Bible societies and schools, to immediately remove all external signs, placards and inscriptions indicating their faith. The foreign societies have protested to their respective consulates."

A dispatch from Madeira says intelligence has been received there of the outbreak of hostilities on the west coast of Africa. A British expedition consisting of three ships under Commodore Bruce, ascended the river Niger and had a conflict with the natives. Several villages were burned and a number of Englishmen were wounded.

At a cabinet council in Madrid it was decided to notify the Spanish provincial authorities that while the constitution forbids manifestations offensive to the Catholic religion, proper respect for the inalienability of Protestant churches must be enforced.

The French Geographical Society is about to open a subscription for an exploration of the Ahaggar, a mountain region of Central Sahara, situated at equal distance between Algeria and the Sudan. The Ahaggar, which is within the torrid zone, has mountains covered with snow during two or three months of the year. It has never been visited by any European traveller.

The steamer at San Francisco, from Hong Kong, brings the following intelligence: The report of the massacre in Ning-Kou-Fou is confirmed. The Roman

Quakers and Quakerism.

(Continued from page 24.)

But the sword is only, as it were, the flame that is used to set up chemical action and bring into activity the true laws that govern human society. As towns increased in population, and more and more citizens became engaged in the peaceful prosecution of trade, the essence of lawless force no longer even approximately answered its purpose, and became intolerable evil. Judicial institutions took place, private war was abolished by de-ces, and that gradual disarming of the private citizen took place which we see accomplished in the present day, when the walking-stick or the umbrella has taken the place of the sword which once formed part of a gentleman's ordinary outfit, and even duelling is looked upon with discredit as a relic of barbarism. Meanwhile kingdoms once, like England and Scotland, at strife with one another, peacefully coalesced under hereditary monarchs, and war was banished from their limits, coming down to our own day, the old mechanical system of government, under which kingdoms were handed about from ruler to ruler, without the consent of the people, carried out on a colossal scale by Napoleon in the wars which drenched Europe in blood, became a yoke too grievous for humanity to bear, and under its iron reign a new feeling of national life was born which exacts an organic connection, a blood relationship between the government and the people, brings about the unification of peoples of the same race, and sets an ultimate bar to foreign conquest. Under this potent principle a united Italy and a united Germany have arisen, and the red lines of war have been driven back, leaving whole territories, once torn with discord, now free from its devastating floods. Nor is without momentous significance that the leadership of Europe has passed from France, the stronghold of the old barbaric military spirit, to the more peaceful Teutonic races.

But is the progress to stop here? or may we not expect that the same laws which have already eliminated war from civilized private life, as well as freed extensive territories from its scourge, will ultimately work the same evolution in national life? May we not trace the gradual development of new conditions of national life which will ultimately necessitate some other appeal than the appeal to force

by steps analogous to those that have already brought about the result in civil life?

Nations may be said roughly to pass through three stages of growth:—

Firstly, the youthful stage; thinly peopled, exporting natural produce, and importing luxuries.

Secondly, the self-subsistent stage; well peopled, consuming their own produce, and manufacturing their own goods.

Thirdly, the most dependent stage; densely peopled, exporting manufactures and luxuries, and importing natural produce.

Holland, Great Britain, Switzerland, and Belgium have already passed into the third and most dependent stage, and with the increase of population other nations must infallibly do so as well. "A few years ago," observes a writer in the *Quarterly Review*, "England was able to feed her own people from the produce of her own fields; she now buys grain to the annual value of more than 12,000,000*l.*, besides relying on foreign raw material for employment, foreign markets for the disposal of her manufactures, foreign land for the disposal of one or two hundred thousand of her surplus population."

Such being the new and unforeseen conditions of national life, may they not ultimately be found to be utterly incompatible with the old method of settling national disputes by force of arms, a war inflicting such intolerable injury on a neutral state as to necessitate the adoption of some other method of settling disputes than one which has ceased to secure even approximate justice?

What the ultimate solution of the problem may be; whether as the state or country is already absorbed into the nation, the nation in its turn is destined to be subordinated to some larger whole, such as the European Confederation sketched by Professor Seeley, the nations being disarmed, and the confederation alone possessing the right of levying troops; or whether, as the Declaration of Paris, now adopted by forty-six civilized powers, would seem to promise, it will be found possible to establish a system of international law, with some kind of international judicial machinery for its interpretation, and jointly enforced by the nations adopting it, it would indeed require a far-seeing eye to decide. All we have endeavored to prove is that Quakerism has only proved itself

the prophetic soul

of the great world, dreaming of things to come, in its resolute protest against war, and its prophecy of its final extinction.

With regard to that other great "open sore of the world," slavery, the part that Quakerism has taken is equally remarkable. Slavery has never as a rule been recognized among the Friends except in the mitigated form

* See "On International Law," by Frederic Seebohm, Longmans, 1871, where the whole question is ably discussed, the writer being himself a distinguished member of the Society of Friends.

which it assumed among the Jews. Penn, in his laws for his Pennsylvania colony, enacted that at the end of fourteen years every slave should be manumitted on payment of two-thirds of the product raised by the gift of land and tools from the Society.

But even of slavery in this modified form we find a condemnation entered in the minutes of the Society as early as 1737, nearly a century before Parliament abolished slavery in the English colonies. As early as 1772, the practice of holding slaves had, owing to the labors of Woolman and others, ceased among Friends, and in the great anti-slavery contest the names of many eminent Quakers are prominent. But how deep and thorough has been their devotion to this great question is perhaps best evinced by the untiring efforts the Society has made after the abolition of slavery in America, and the excitement of the struggle were over, for the relief and permanent training of four million freedmen thus suddenly emancipated. Nearly 200,000*l.*, or about half the total relief contributed for the assistance of the freedmen, was subscribed by the small Society of Friends.

In the cause of education, the lead the Quakers have taken has been the more remarkable in that they started at a decided disadvantage. The stress laid by the early Friends on the teaching of the Spirit led at first to a tendency to depreciate all external teaching, both sacred and profane. In respect to the qualifications of a gospel minister, Barclay says, in his famous "Apology," "that letter-learning had proved more frequently hurtful than helpful" and the minister was exhorted to take his seat in the meeting for worship with his mind as much as possible like a blank sheet. Indeed, in reading the diatribes of Fox and the early Friends against human learning, one is forcibly reminded of a dissenting preacher at Cambridge, who, inveighing in broad north-country accents against the classical studies of the university, ended his peroration with the startling but to himself conclusive question, "Do you think *Poor* knew Greek?" The shrewd mother-wit of George Fox was however quick to rectify in practice any doctrinal excesses, and we find him in 1667 establishing two schools in the neighborhood of London, where he desired that "girls and young maidens, as well as boys, might be instructed in all things civil and useful in creation," a definition of educa-

(* The views of the Society of Friends in its early days, on the subject of education, are those still held by all its consistent members. It has always favored education as a means of qualifying its members for the right performance of the various civil and social duties of life; but it has unwaveringly maintained, that Gospel ministry is a Divine gift which is conferred on the recipient as well as he learned; and that no amount of literary instruction can authorize or qualify any one to exercise it, when this gift has not been bestowed. There was therefore no conflict between the practice and doctrine of George Fox when he advised the establishment of schools, as mentioned a few lines further on.)

tion broad enough to satisfy a London school board. We believe he even issued some expurgated classical school-books, but the exact nature of a Quaker liad we have found ourselves reluctantly obliged to relegate to the domain of "the unthinkable." Five years later fifteen schools were in operation, chiefly used by the middle and wealthier classes, while the poorer children were partially instructed in the Society's meeting-houses.

The provisions for education remained however very defective till the great revival of discipline in the middle of the eighteenth century, when education became a subject of paramount concern. In 1779 the indefatigable labors of Dr. Fothergill and others resulted in the establishment of a large boarding-school at Ackworth, in Yorkshire, where three hundred children of the middle and poorer classes have now for eighty years received a good English boarding-school education at the expense of the Society.* When, therefore, it is urged that the Quakers have no poor, it must be remembered that a process of "levelling up" has been steadily going on for nearly a century. They alone have recognized the claim of the poorest to a liberal education, and have proved themselves capable of affording the necessary funds, since they alone of Christian communities seem to have practically realized the Christian altruistic theory of property, neither all-levelling communism on one side, nor selfish "rights of property" on the other, but a trust concentrated in one hand for the good of the many. Many a poor boy educated at Ackworth has risen to take his place among our great merchants; many have now independent positions in the colonies, a large proportion of the Ackworth boys emigrating, and none remaining in the too often almost serf-like subjection and poverty of our English laborers. The British and Foreign School Society, chiefly founded by Quakers, attests their activity in the cause outside their own body.

(To be continued.)

[A writer in the *Primitive Christian* relates the following instructive incident. "Let your light so shine before men that they may see your good works and glorify your Father which is in Heaven."]

A gay young man attended an evening meeting where an eloquent young speaker preached. He portrayed with great clearness the sinfulness of man, his fallen, sinful, helpless, and undone condition without divine aid. He also set forth the Saviour as all sufficient. He impressed all with his kind gracious invitations; the assurance that he is not willing that any should perish, but that all should come to repentance; that he who comes to him he will in no wise cast out, and he that seeks shall find. The young man was convinced. He determined to become a Christian. He was glad to learn that the speaker and a number of his brethren were going the same road home that he was, as it would give him a chance to open his heart. But his astonishment knew no bounds when he saw their loose conduct, and heard their jokes, loud laughter and tall yankee tales. He could not see any Christianity in that and hence became a confirmed infidel. Years rolled on and both became old and gray.

*The infidel grew sick and on his death bed

sent for this preacher. When he came the infidel said:

"When I was a young man I heard you preach and then and there I determined to become a Christian."

"Thank God for that," said the minister. "Hold," cried the infidel, "wait until I am through and see whether you have any reason for being so thankful. As already said, I determined to become a Christian, but when I saw the bad conduct of you and your members that same evening, and heard your unholiness conversation, I concluded that Christianity was a wretched farce. I am on my death bed now and know better."

An Eulogium on the Life and Character of Horace Binney, by the Hon. William Strong, Justice of the Supreme Court of the United States.

(Concluded from page 38.)

"He was a man of great moral courage. When he had matured his convictions of the right, he was not to be driven from their avowal by any fear of consequences. He was a resolute and fearless supporter of law and order in the community. When the Kensington riots threatened to uproot the foundations of society in the northern part of the city; when the law was temporarily overthrown and its officers were powerless to resist the outbreak; when men's hearts failed them for fear, and many thought only of submission or compromise, he stood firm. He bent not before the storm. It was he more than any other who inspired confidence. It was he who restored courage to many who were faint-hearted; that gathered around him the virtue and intelligence of the city, and led in bringing back the supremacy of the law. And when in later years the foundations of our government seemed crumbling away; when civil war threatened the subversion of our cherished institutions; when attachment to party, with very many, prevailed over love of country, Mr. Binney, an old man of more than four score, stepped forward, and placed all his influence and the weight of his great name, in the scale of a tottering government, nor was there ever an occasion when high moral courage was demanded, when the city was in trouble and needed a leader and adviser that he was called upon and failed efficiently to respond. He was often resorted to in seasons of perplexity, and never was application made in vain. Even when not consulted, the friends of good order and of the right were encouraged by the fact of which they needed no other evidence than his life, that he would always be found on the side of the just, the orderly and the true."

"About the year 1830, after severer exertions than were usual, Mr. Binney's health began to be impaired, and he desired to withdraw gradually from the courts, and throw off, in considerable measure, the load of business with which he was oppressed. It was this in part which made him willing to accept a nomination for Congress. There were doubtless other reasons that influenced him. Principal among these was the hostility of President Jackson to the Bank of the United States. * * * Believing as he did in the great usefulness of the bank, and in its necessity for the public welfare, he did not feel at liberty to decline the call. He was elected, and he took his seat as a member of the 23d Congress in 1832. That Congress was filled with distinguished men, many of them long trained

in the public service. Mr. Binney took it a great reputation, such as few lawyers ever brought into Congressional life. He was expected from him, and all that was expected was realized. If he found any equal he found no superior. He never stooped the arena of partisan discussion, but in consideration of important subjects, especially that of the removal of the public deposits from the Bank of the United States, he proved himself to be a statesman of high rank, an most accomplished debator." A most competent judge, who was himself a member that Congress—ex-president John Quincy Adams—remarks upon Binney's great speech "June 9th, 1834. Mr. Binney took the floor again, for an hour and a half, and closed one of the most powerful speeches for sound argument, correct principles and honorable sentiment, that ever was delivered in Congress. "Though but two years a member," said Judge Strong, "he has left at Washington most enviable reputation. The old men will naturally recur to olden times, speak of him as one of the giants of the past, and wot to be associated as a statesman and an orator with the trinitate that so long adorned the American name."

"But public life was extremely distasteful to him; he turned his back upon it with gladness. Declining a re-election, he returned to Philadelphia, and retired from all professional practice in the courts. * * * One of the crowning glories of his life remains to be mentioned. He was an earnest Christian. He carried his religion into his daily life. He was a controlling power in his business, the formation of his judgments, and in his intercourse with others. It was the basis of his fidelity to his clients and of his unwillingness to do injustice to opponents. It led to the courtesy of his demeanor, and to his personal candor. It contributed also to his personal enjoyments. He found great satisfaction in the study of religious books, especially those relating to doctrinal theology. He loved to bring his reason to the support of his faith, and he delighted in the most cogent arguments in support of Christianity. His mind was at all times a reverent one. He discontinued systematically in his household, all conversation and every allusion that looked like irreverence on sacred subject. At one time near the close of his life, while speaking of his debility, he said, 'but I do not think I have gone back, and I am very thankful for it, because I think a single step backward would have finished my *sum*, and it must have been shown as it stood on the slate right or wrong, to the Great Master. I hope that what is wrong in the *sum*, may prove to be written on *slate*, that mercy may pass her soft and gentle hand over it. But there is something which no touch will remove, because it is not *there*—THE GOOD HAVE NOT DONE."

* * * *After all*, Mr. Binney's powers and character are best illustrated by his life. That was singularly consistent and complete. It is safe to say, that rarely if ever has a man lived, who had fewer apparent defects. From whatever point of human view he was observed, no flaw or imperfection was visible. In every aspect he was symmetrical, with no grossly undeveloped or distorted, with no even an excellence overgrown at the expense of any other—throughout both great and good.

* Those who are able to do so, pay the whole or part of the cost.]

Such was Mr. Binney. So, during three generations, he stood erect and conspicuous on his brethren of the bar, and in this community a light and an ornament—a strong ever and a ground of trust—a leader and a de.

The Chinese Christians and the Opium Trade.

The *Friend of China* contains an address to the "Anglo-Oriental Society for the Suppression of the Opium Trade" (of which society the *Friend of China* is the organ) from the Chinese Christian Churches of Hong Kong. I extract from two other addresses, also in Chinese Christians. It is well that a 'd of sympathy between the Christians of China and of England on this subject should exist, and that the powerful appeals of the mercer should be extensively known and deeply pondered by the latter.

The address begins by expressing the traders' joy that an association had been formed for the suppression of the opium trade. Thereupon follow some strong sentences on individual, family, and social evils to which smoking leads, the impoverishment of the country, and the objections to the suppression of the trade from the revenue point of view. Then they go on to say: "The trade in opium not only injures England's national reputation, but it is also injurious to the sacred doctrine. * * * From the moment the teachers

Christianity entered China they immediately began to recommend abstinence from opium smoking, while the traders in opium were from their own country. People laughed at them for thinking of converting people at such a distance, when they were unable to influence their own neighbors. This great inconsistency often compels us to close our mouths and hold our tongues, and on this account we say opium hinders the progress of the sacred doctrine."

This address bears more than 150 signatures. The next letter is from the Hakka churches of Hong Kong and the Canton province. The Canton Christians arrange objections to opium under four heads:—(1.) It wastes the vital energy. (2.) It squanders the wealth. (3.) It injures body and soul. (4.) It hinders the propagation of the truth. Under the last head they say:

"What do we mean by hindering the propagation of the truth? Whatsoever be the matter concerned, something more than words are required to establish one's position securely. Of late years the holy religion of Jesus has been proclaimed in China, and certainly many converts have been made; but there is an innumerable majority who revile the doctrine. We constantly hear the Chinese saying: 'The foreigners who preach the doctrine of Jesus affirm that they taught men to love others as themselves, and always to bear in mind the golden rule; but every year they import opium into China, and thereby injure millions of their fellow-creatures. Lately the quantity imported has increased, and the injury it produces has increased in proportion; as if they meant to carry off all the wealth of China, and to drain away the life-blood of the people before they stop. When men only think of what profits themselves, and are regardless of the injury done to others by such an extent as this, how can they be said to love others as themselves? How can we believe their doctrine and follow their religion?'"

"Now, the Chinese are of a very suspicious

and jealous disposition, and if they could not point out any cause of complaint in foreigners, they would still harbor this thought, 'They are not of the same race with ourselves; they are bad people.' How much more will they think thus when opium comes from Western countries, and they have a plain fact to allege? When the injury pierces to the quick, do you suppose they will silently and patiently endure it? True, those that preach the Gospel in China are many, and they come from different countries, while opium is imported into China from India alone; but the Chinese do not make distinctions; they eye it, and say, 'It comes from the West.' Thus, on account of Indian opium, England, America, France, and other countries, are all compromised. They all are included in the wrong-doing; they all have to bear the disgrace.—*From the London Watchman.*

The Conditions of Welfare.

Perhaps there is no greater benefit a deep thinker can accord to the world than that of simplifying what is complex, and drawing into small and easy compass that which is too much involved for the average mind to grasp. Herbert Spencer has done much in this direction in his late work on Sociology, especially in his interpretation of our social relations, and the consequent duties which flow from them. He reduces the conditions which are necessary to hold society together to two general principles, upon the right fulfilment of which the entire welfare and happiness of the community depend. One is that each individual shall so live as not to burden others; the other, that he shall so live as not to injure others. This may at first sight seem a meagre epitome of our social duties, containing only negative directions, and no positive and actual line of conduct. But viewed more closely, this seeming paucity will disappear, and these two principles will be full of meaning.

In order to avoid being a burden to the community, it is needful that the individual, on emerging from the natural protection of the parent, shall be self-supporting:—that is, he shall in some way render service equivalent in value to what he consumes. No rank or station, no amount of wealth on which to subsist, no fancied delicacy of taste, or of habits, can ever absolve one from this condition. Childhood, ill-health, extreme age, or mental incapacity are the only grounds on which an exception can be made;—and these furnish abundant material to give full scope to all our benevolent impulses. It is not an uncommon remark, "such a one has not need to labor," meaning that he does not actually require the money which his labor would bring. This is a poor and weak idea of the foundations of industry. They are not mere dollars and cents—they lie far deeper down in the very nature of that liberty which we all prize so highly, and for which we so loudly contend. For every mere consumer subtracts so much from the world's property, taxes every industrious person to that degree, and thus destroys equal rights and tramples upon freedom. It matters not that he is able to purchase his unearned luxuries; it is true, but he uses it as a token of labor, it is money, but not of his, and his own toil of hand or head is all that truly belongs to him. If he refuses to contribute this in any form, and persists in idleness, no matter what may be his pecuni-

ary resources, he defrauds the community, and violates the very first condition of social welfare. It is not, of course, always essential or best that his labor be of such a kind as to produce an immediate return in the shape of money. Generally this will be the case, but it has nothing to do with the principle involved. A scientist in his investigations, a philanthropist in his work of mercy, a mother in her labors for the welfare of the family, may never receive a dollar for all their exertions, but they are often far more truly self-supporting than many who receive large and tangible results for all their work.

The second condition of social welfare is equally comprehensive. We must live so as not to injure others. This, too, is far from being a negative work. No "let-alone" principle will serve us here. It is not enough that life and property be held sacred. There are other ways of injuring a man besides killing or robbing him. We may spoil his good name, ignore his rights, deprive him of opportunities. We may injure him by a whisper, a gesture, by coldness or silence, by suspicion, disdain or indifference. Our influence will injure him, if it be not good; our example, if it be not controlled by just principles. Which of us can say that he is free from blame in this respect? Who can say that it is a simple and easy thing "not to injure" our neighbors?

Civilization is all the time developing in us increased power to fulfil these conditions, and all government and laws are but expressions of the public sentiment in regard to them. But the best effect of law is only realized when men learn to do without it, and be a law unto themselves. Then they rise above all need of outward restraints, and set their standards far beyond that which any coercion could suggest. Thus while the law can protect our social welfare only from the grosser and more palpable violations of these conditions, each individual should so regulate his conduct as to fulfil the highest ideal which he is capable of forming of his social relations. If each of us do this, day by day, simply and unobtrusively, yet earnestly and lovingly, we shall at least approximate to the perfect social state, in which, without coercion or restraint, but from the pure love of justice and freedom, men will so live as neither to burden nor to injure their fellow-men.—*Public Ledger.*

For "The Friend."

From an Epistle of dear George Fox, written with his own hand, an I left sealed up with this superscription, "Not to be opened before the time."

* * * "As for this spirit of rebellion and opposition that hath risen formerly and lately, it is out of the kingdom of God and heavenly Jerusalem, and is for judgment and condemnation, with all its books, words and works. Therefore Friends are to live and walk in the power and spirit of God that is over it, and in the Seed that will bruise and break it to pieces. In which seed you have joy and peace with God, and power and authority to judge it; and your unity is in the power and spirit of God that doth judge it: all God's witnesses in his tabernacle go out against it, and always have and always will."

No wisdom or words of man, but the power of the Holy Spirit which originated the Society and by which it has been maintained, must continue to preserve it to the glory and praise of God.

For "The Friend."

"Etiquette at the Table."

It was among other rules written down by an eminent American, to be observed by him, "To speak not of doleful things in times of cheerfulness or at the table; speak not of melancholy things such as deaths and wounds, &c., and if others mention them, change if you can the discourse." Of the same purport was the involuntary remark of a little boy recently at table (an acquaintance of the writer) when others were speaking of the sickness of another, he said in substance, "Do quit talking of sick people, I just feel as if I had a piece of them on my plate." These are little matters, but their observance or non observance may add to or diminish much from daily comfort. These reflections have arisen from reading the following article on dining comfortably.

DINING COMFORTABLY.

Most people are aware, even without any scientific knowledge, that the mind has a most direct influence on the stomach, that the stomach reacts upon the mind, and that the two linked mysteriously together, act and react one upon the other with unflinching certainty. Digestion thus obviously to a great extent will depend on the state of mind in which we sit down to a meal. It is not sufficient always merely to set the bread-winner down to a good dinner. If he has been hard at work, battling during the day with the perplexities and difficulties inseparable from daily life, in whatever calling, his meal, if it is to do him all the good it should, must be a cheerful one, and it is as much a part of a loving wife's duty to meet him with smiles and pleasant words as it is to give him his soup hot and his meat cooked to a turn. Nay, although disappointment in the quality of the viands—a tough steak, a tepid sole—will check much more than is thought the process of digestion, even when spirits are good and appetite keen, it will not be so prejudicial to the healthful assimilation of food as will be dolorous tales of domestic cares or the announcement of bad news. Whatever trials and sorrows have to be faced, dinner time and the time immediately succeeding it is not the time to grapple with them or dwell upon the means by which they are to be surmounted. Again, highly animated discussions, lapsing often into virulent argument, are distinctly prejudicial at meal time; for temper, if ruffled, will retard digestion as fatally as damped spirits will. In a word, there is no byway to health more directly useful and generally worth sticking to than that by which we can have our meals in peace and comfort, if not in absolute gayety.—*Trusley's Magazine.*

Selected for "The Friend."

A truly converted Christian man abides in a sincere and humble confession of his nothingness; all his desire is that none should set him above others, but rather to be subject in all meekness. He thinks lightly of himself and his own wisdom; and is willing to take advice, and interprets everything for the best. But those who are not truly converted think much of themselves—they deem their works and services of great value, and it is not at all to their taste to be subject to others. If any reprove them, they are contentious, and defend and justify themselves to the utmost that they can. The right sort of men are patient under whatever injustice God suffers to befall

them, and are wont meekly to seek reconciliation with those who have done them wrong. But the false burn with anger, and are full of murmuring against all who do not conform to their wishes. They want to have praise for all they do; and if they are not honored and thought highly of, they become like one possessed, and are often seduced into actual deceit in their struggle to save their reputation.

Dupes to Ourselves.—We are all greater dupes to our weakness than to the skill of others; and the successes gained over us by the designing, are usually nothing more than the prey taken from those very snarers who have laid ourselves. One man falls by his ambition, another by his perfidy, a third by his avarice, and a fourth by his lust; what are these but so many nets, watched indeed by the Fowler, but woven by the victim?—*Lacon.*

STILLNESS.

Thy lesson art thou learning,
O tried and weary soul?
His ways art thou discerning,
Who works to make thee whole?
In the haven of submission
Art thou satisfied and still?
Art thou clinging to the Father
'Neath the shadow of His will?
Now, while His arms envelop thee,
Think well, He loveth best!
Be still, and He shall mould thee
For His heritage of rest.

The vessel must be shapen
For the joys of Paradise;
The soul must have her training
For the service of the skies;
And if the great Refiner
In furnaces of pain
Would do His work more truly,
Count all His dealings gain:
For He Himself hath told thee
Of tribulation here:
Be still, and let Him mould thee
For the changeless glory there.

From vintages of sorrow
Are deepet joys distill'd,
And the cup outstretch'd for healing
Is oft at Marah fill'd:
God leads to joy through weeping,
To quietness through strife,
Through yielding into conquest,
Through death to endless life:
Be still; He hath enroll'd thee
For the Kingdom and the crown;
Be silent; let Him mould thee
Who calleth thee His own.

Such stillness is communion.
Such stillness is a shrine,
The "fellowship of suffering"
An ordinance divine:
And the secrets of "abiding,"
Most fully are declar'd:
To those who with the Master
Gethsemane have shar'd.
Then trust Him to uphold thee
'Mid the shadows and the gloom;
Be still, and He shall mould thee
For His presence and for Home.

For resurrection stillness
There is resurrection pow'r;
And the prayer and praise of trusting
Key-glories each to other:
And common days are holy,
And years an Easter-tide,
For those who with the Risen One
In risen life abide!
Then let His true love fold thee,
Keep silence each to other:
Be still, and He shall mould thee,—
Oh, rest, thou in the Lord!

SOWING AND REAPING.

Sow with a generous hand,
Faise not for fall or pain;
Weary not through the heat of summer,
Weary not through the cold spring rain;
But wait till the autumn comes
For the sheaves of golden grain.

Scatter the seed, and fear not,
A table will be spread;
What matter if you are too weary
To eat your hard earned bread!
Sow, while the earth is broken,
For the hungry must be fed.

Sow,—while the seeds are lying
In the warm earth's bosom deep,
And your warm tears fall upon it,—
They will stir in their quiet sleep;
And the green blades rise the quicker
Perchance for the tears you weep.

Then sow,—for the hours are fleeting,
And the seed must fall, to-day;
And ere not what thou shalt reap it,
Or if you have passed away
Before the waving corn-fields
Shall gladden the sunny day.

Sow; and look onward, upward,
Where the starry light appears,—
Where, in spite of the coward's doubting,
Or your own heart's doubts and fears,
You shall reap in joy the harvest
You have sown, to-day, in tears.

—*Adelaide Procter*

Besetting Sin.—Do you habitually realize that you are somebody? Is your talk such as to call attention to your personal merit? Are you very sensitive about the consideration in which you are held? Well may you suspect pride.

Are you hard in your bargains and contentious about small matters? Are you worried and annoyed by the ever-recurring demand for alms? Do you give reluctantly the scanty first fruits, amusing yourself the while with dreams of how liberal you would be if you were richer or out of debt? Be sure consciousness is hid somewhere.

Do you rebel against regularity in religious habits and make every day fresh excuses for the neglect of devotion? Are you fretful under the routine service of life, and discontented that you have not an easy time? These are the symptoms of sloth.

Have you so little control over your appetite that you cannot restrain it when prudence requires, or when spiritual discipline demands it? Albeit no drunkard, are your faculties occasionally excited or habitually stupefied by drink? Gluttony is there.

Are you fretful, irritable, impatient of slight and contradictions, with a good memory for injuries? If not openly quarrelsome, yet guilty of the folly and ill-breeding of showing dislike for others by manner and gesture? Anger has the better of you.

Howbeit free from actual unchastity, do you indulge in unclean thoughts, do you languish at the coarseness of food? Do you indulge in the coarsest? I may not enlarge; only lust, baleful lust, creeps all over the land, leaving its slime upon books and papers and show and amusements.

And once again: Does it pain you to hear others well spoken of? Do you drop little words of detraction? Are you ashamed to go to a church where other people's clothes are finer than your own? Are you discontented as you see the better houses and more luxurious appliances of others? There is envy in the heart.—*Bishop Lay.*

Selected.

Public Worship.

Ed. contd.

CAN THIS BE THE RIGHT MODE?—The hour cometh and now is, when the worshippers shall worship the Father in spirit and in truth; for the Father seeketh such to worship Him, in spirit; and they that worship him must worship in spirit and in truth."—John, iv, 23, 24.

As a question like this may not unaturally occur to those who attend a Friends' meeting for the first time, they may be glad of a few lines of explanation.

We are truly met in His name we believe our Lord Jesus Christ though unseen is present; as He himself said, in the mid-t of us (1. xviii, 20), and we therefore wait in silence to be taught by Him. This silence affords an opportunity for secret prayer, meditation, and self-examination; and, while thus occupied, the Holy Spirit often shows us what we really need, prompts us to pray for what we want, and prepares our hearts to worship through Jesus Christ, through whose precious blood we have boldness to come into His presence. (Heb. iv, 14-16; x, 19-25.)

Worship is an individual act which we must perform for ourselves, and which no one can do for us. "When will the service in?" a Friend was once asked by a stranger, "I never then or I begin to serve," was the reply. And when a number of worshippers are united in the reverent service of God they are baptized by His Spirit into one body (1. Cor. xii, 13), enjoy sweet fellowship with one another, as well as with the Father and the Holy Spirit (1 John, i, 3), and partake together of the life of God.

While thus met, opportunity is afforded for offering up of vocal prayer, or for the reading of the gospel, by any of those present, as they feel it required by the Lord at that time. Thus meetings are sometimes held throughout in silence, and sometimes the whole time may be occupied by ministry of prayer, with brief intervals of silent worship. We believe that the call of Christ and the anointing of His Spirit make the minister of no college, education, or the imposition of any hands.

From the 1st Epistle of the Corinthians we learn that a variety of ministrations in the names of the apostles was exercised by the different members of the congregation for the good of all (1 Cor. xiv, 1; 1 Cor. xii, 1). It is quite clear that it was not left to us, as it usually is now, to one man to conduct the service, but that it was open to any rightly gifted to take part in it. Nor would it be his practice, as "the spirits of prophets are subject to the prophets" (1 Cor. xiv, 32, 33), and God is indeed found to be the author of order and peace. "Ye may prophesy one by one," said the apostle Paul, and in the New Testament to prophesy generally means to preach under the influence of the Holy Spirit (1 Cor. xiv, 3), "that all may learn, and all may be comforted" "if anything be revealed to another that sitteth by, let the first hold his peace." (1 Cor. xiv, 31.) The gift was bestowed on the unlearned as well as the learned, and on women as well as men (Acts, xxi, 9); "On my servants, and on my hand-maidens, will I pour out my Spirit, and they shall prophesy." (1 Cor. xii, 8; Acts, ii, 18.)

To bow in lowly reverence and secret prayer before God, listening to his voice; to know Christ Jesus our Saviour as the real head and

director of our meetings; to preach or to offer prayer or praise according to the promptings of the Holy Spirit; such is the worship for which we plead and which we believe best promotes the spiritual growth of the worshipper, and the glory of God.—*The British Friend.*

Selected.

Mineral Resources of the Pacific States, as shown at the Centennial Exhibition.

Emigration to the Pacific coast of the United States was brought about primarily by the discovery of rich gold deposits. In this respect its history resembles that of many other countries and sections, two more recent instances being the discovery of diamonds in the south of Africa and the present disturbance in the Indian country caused by the thirst for gold which is supposed to exist in the Black Hills. The earliest date of any important influx of emigrants was 1849, whence all title to nobility in San Francisco must be traced through a "forty-niner"—blue blood of any other strain counts for naught.

Gold first attracted the attention of the public, and the free gold found in washings, gulches and river beds made mining comparatively profitable for the first few years; as the "wash-bowl" in the wet "diggings" and the "pan" in the dry were well adapted to separate the flakes of pure gold from the dirt. That kind of mining (to use the slang phrase to which the method gave rise) does not now "pan out" well, and the more expensive and scientific methods of extracting the metal from quartz rock have long since superseded it.

Silver.—The discovery, in late years, of silver ores of exceeding richness in California and Nevada turned the attention of capitalists in that direction, and at the present time the value of the metal produced nearly equals, if it does not exceed, that of the gold product. Silver ores in great variety of forms and richness are shown, representing very fully the well known mines and those of less note. From the Comanche mine, Mono county, California, a mass of ore, composed of silver and copper, weighing about 200 pounds, is shown. This ore assays about \$300 per ton of silver; it is not worked for copper. An argentiferous galena, which is worked for silver, is shown from Shasta county. An antimonial silver ore from the Rye Patch mine, Nevada, is said to assay \$400 to the ton. From the Belcher mine, on the Comstock lode, the "great bonanza," are specimens of ore which yield upwards of \$1000 a ton. The richest specimen was one of ruby silver from the Reese river district, which assays over \$2000 per ton. A specimen of argentiferous sulphate of lead from the DeFance mine, Inyo county, California, yields 80 ounces of silver per ton.

Mercury.—The next mineral deposit in value is that of cinabar and free mercury. It is found in many sections of the country. One of the best mines is the Wall Street Mine, in Lake county, California. A large specimen of rock from this mine is shown, which is literally dripping with free mercury. The red cinabar, sulphate of mercury, its usual form, comprises about one-third of the rock, and probably one-fourth the mercury in the stone is in a free state. The rock yields about 45 per cent. of mercury, an exceedingly rich yield. A very large variety of cinabar ore is shown, all representing productive and valuable mines, and including every kind of quicksilver ore known to the mineralogist.

Copper is found in abundance, but it is not extensively mined. A collection of ores of various degrees of richness has been made, including native copper, oxide of copper, sulphate of copper and the carbonate of copper. A nugget of pure copper, weighing eighty pounds, is in the collection.

Sulphur, pure, or nearly so, is found in many places. A specimen is shown from Pyramid lake, where it crops out of a hill in a layer several feet in thickness. In Humboldt county, Nevada, which is called "Inferno," on account of the sulphur, is a deposit some twelve miles long, two or three in width, and from four to twelve feet thick of pure sulphur. It is of a volcanic formation, and has oozed out of a mountain at the foot of hills of which it is found, or possibly is the deposit of hot springs. The collection and shipment of it is an important industry, many car loads being shipped every week. Specimens of this sulphur are in the collection.

Coal.—Bituminous coals of the tertiary formation are found in large and thick layers in Shasta county, California, and in Mount Diablo, near San Francisco. The specimens on exhibition do not appear to be as valuable as those from the well-known deposits of the Pittsburgh and Cumberland region, but are evidently of great value. They are said to be of coke well, and the former are used by some of the Cottonwood mining companies for smelting their ores. It is said that some of the richest coal deposits in the United States are found in the cretaceous deposits in the Rocky Mountains. One seam has 75 feet in thickness of solid coal, and there are thinner seams above and below it. The mines at Mount Diablo are chiefly worked to supply the San Francisco market, where the product is sold at about \$8 per ton. No anthracite coal has yet been discovered in this region.

Iron.—This mineral is said to be abundant in the mountainous sections of the country, though little has been done in the way of developing the iron industry. Ores are exhibited from Oswego county, Oregon, one of which is a rich bog iron, and other valuable hematites. It is easily worked, and is free from sulphurets. Three pigs of hard, medium and soft iron, smelted from these ores, are shown. Ores from the Sierra Mercedo, Durango, Mexico are shown, with the information that there exists in that locality a seven-tain of this ore five miles square and seven hundred feet thick, which will assay 67 per cent. of metal and yield in actual blast 55 per cent. The mine is at present of a nominal value on account of the lack of transportation.

Borax.—A deposit of this mineral, found near the slate range district of California, near the border of Kern county, is so large that the price of borax has fallen twenty per cent. since the product has been put on the market. There is no other known deposit equalling it in extent.

Tin ores, yielding 60 per cent. of pure tin, are exhibited from San Jacinto.

Other Minerals.—Phosphate of lime is found in Southern California in a deposit which contains the fossiliferous remains of large marine animals. It covers an area of several acres. Asbestos is shown, and a beautiful quartz crystal, in which is a flake of tourmaline resembling a fly. Salt is found deposited in large quantities in the sink of the Carson river, in Nevada. It is being shipped over the road in sufficient quantities to nearly supply the

California market. When crushed, it makes a fine quality of table salt. Pumice stone is found in large quantities north of the lava beds. Several specimens of alabaster from Southern California are shown. They are green, gray, silver, blue, red, yellow and other colors. A specimen of realgar, a red sulphuret of arsenic, is shown from a deposit on Vancouver's Island. This is a very extensive deposit, four feet thick, sufficient to supply every demand.—*Public Ledger.*

For "The Friend."

Among the interesting articles which give value to the successive numbers of "The Friend," I have been pleased with that published in the issue of last week, under the caption of "The Decay of Conscience," by Charles G. Finney. It contains some important truths, conveyed in terse language, which should be pondered by the whole community.

There is abundant cause exhibited in the developments of every-day life—civil, political and military—for the opinion therein given, that the standard of morality recognized by the community at large, has become gradually lowered, until it now falls far short of that which is inseparable from the gospel of Christ. Conduct irreconcilable with the positive commands of the christian's Lawgiver and Judge, and with those of his inspired apostles, is not only tolerated by high professors, but those guilty of it are often received among them without any mark of disapprobation; indicating that a decay of conscientious sensibility has spread among "men and women in nearly all the walks of life."

It is true, as remarked in the article alluded to, when referring to some of the causes that have led to this deplorable state of morals, and the agency of the press in fostering it, "In a great measure the periodical press takes its tone from the pulpit." We may be pretty well assured, however, that upon subjects involving questions of morality, the ethics of the press will not often, or long, conflict with the sentiments of its patrons; witness the almost universal catering for the theatre, the race-course, and gambling in stocks. But if the press takes its tone more or less from the pulpit, does not the pulpit lower its tone to accord with the vitiated standard of morals that has obtained among very many of its supporters? If we judge from the tenor of the sermons which reach the public ear through the press, do they not too generally reflect the easy-going religion that is popular, or are very much made up of descants on themes that admit of rhetorical display, rather than portraying in clear and unequivocal language, the strict, self-denying, sin-denouncing, and sin-discarding doctrines of the New Testament.

We doubt not there are good men in different religious Societies, who preach from a conscientious conviction that they are divinely called to the work of the ministry, and who probably would continue in that work were they deprived of all temporal emolument therefrom, and it is such rare men as these, who have kept the common ministerial system from being long since discarded from the professing christian church.

While the "ministry" is generally looked upon as a genteel means of procuring a livelihood, and the work pertaining to it, is very much a matter of contract between preachers and hearers, it is to be expected that whoever

has been chosen to fill the pulpit, and to receive a stipulated salary, will be chary how he inculcates doctrines and insists on practices that may reflect severely on the conduct, or wound the self-esteem of those from whom he draws the means for the subsistence of himself and his family.

The system of a man-made ministry, drawing its candidates only from those who have devoted years in studying what is called Divinity, however it may have thrown around it the imposing ceremonies of ordination and laying on of hands; and the necessarily accompanying practice of restricting one preacher to a congregation, who must supply the weekly demand for sermons and prayers—all competitors being excluded—carries on its face the liability of the ministerial functions becoming a matter of merchandise; and we know that in England, where the system is worked by the government, the benefices are often offered to the highest bidder; showing the inherent evil of the system, however it may be modified by extraneous circumstances.

In looking over the religious periodicals of different denominations, it is not unusual to see complaints of insufficient provision being made for the proper and certain remuneration of ministers; rendering that calling less profitable than other professions, or than many mechanical employments. On this account, it is stated, there is a falling off in the number of young men studying to qualify themselves for the pulpit. It is not many years since a clerical dignitary in Philadelphia, addressing the members of the Society to which he belonged, observed, there was much complaint of deterioration in the literary character of the preaching in their churches. This he believed was correct, and the cause thereof was the general insufficiency of the salaries paid to the ministers, and that if they wished to have a better article, they must pay a better price. The columns of the periodicals alluded to, not unfrequently contain notices of "free-will offerings," "voluntary donations," &c., referring to presents made to ministers by members of their respective congregations, and holding them up as examples that might properly be followed by others. Of course no fault is to be found with the generosity of the donors, but we do not believe that the relative position of minister and congregation, impairs the comprehensive truth of the declaration in the Mosaic law, "A gift blindeth the eyes of the wise, and perverteth the words of the righteous."

However modern refinement may wish or attempt to smooth down the natural and legitimate features, or a sentimental charity seek to cover over the intrinsic defects of the man-made system of ministry that has so long prevailed in the visible church, dividing the members into clergy and laity,—the former drawing their incomes from the pockets of the latter,—there can be no doubt that it has been a mighty obstacle to the bestowal and exercise of the gifts which He who led captivity captive would have given to men, and prevented the extension of his spiritual kingdom. By too often "teaching for doctrine the commandments of men," and naturally yielding more or less when in the pulpit, to the known opinions and habits of their congregations, there is a deficiency in insisting on the simple, plain, incisive truths of the gospel, and the necessity of a life correspond-

ing therewith. This has contributed no little to the present low tone of religious faith among the professors of Christianity, and to the cold materialistic unbelief among many who see its inconsistency with the plain precepts contained in the New Testament.

The gospel can be availingly preached those only who have received a gift there from the Head of the Church. No man can take this honor to himself, but he who is called of God as was Aaron, and even such these must wait to be divinely directed whither and where to speak. To these the command "Freely ye have received, freely give," is imperative now, as it was when Jesus sent forth his disciples as sheep among wolves.

There never was a time when it was so important that Friends should faithfully maintain their testimony to a divinely qualified gospel ministry, and against a hired minister of man's ordination. Were this universally adhered to throughout the Society, the declaration of Admiral Penn might yet be verified: "Son William, if you and your friend keep you to your plain way of preaching and your plain way of living, you will make an end of the priests to the end of the world."

The Way of the Transgressor.—A convict embezzler from the treasury of one of the inferior counties of Pennsylvania has just made restitution to the amount of some ten thousand dollars. It is said that this is about all the money he has or can raise in the world. He was the incumbent of an honorable office of trust—that of County Treasurer—and purloined the public money entrusted to his care. His office is gone, his character is gone, he is a convict on the way to the penitentiary, and makes restitution in order to shorten his term of imprisonment, and now even that money is gone for which he wrecked character, office, contentment of mind, and all that make up real happiness in this life. Had he been able to retain the ill gotten money, it is all probability would have done him but little good. Such money rarely purchases anything worth the having, or that will stay. It is of the kind which the proverb tells us "comes over the devil's back, and disappears under his belly." What would that convicted and ruined County Treasurer not give now if he could buy himself back into the position he occupied among his neighbors before he soiled his hands and blackened his character by stealing the public funds?—*Public Ledger.*

Practical Education.—Very crude are the notions entertained by many persons with regard to what constitutes "a good education and not a few loose sippets of the great object of instruction and training, which should be able to enable those who are growing to manhood to provide by legitimate means for the wants of life. Learning "to read, write and cipher does not immediately fit one for producing articles of value, and the tuition of the high schools and colleges aims to prepare young persons for occupations which do not directly produce any substance.

The great majority of the people should be employed in industrial arts, for those who have learned to do good work in them are the most useful citizens, doing what is best for themselves without injury to their neighbors and what is best for the community.

One of the great mistakes in the ordinary

THE FRIEND.

NINTH MONTH 23, 1876.

re of education is in occupying all the of the children with their school lessons, any kinds of handwork can be learned more assiduously and more thoroughly by beginning practice there while children are young, and a more reasonable system of instruction in school lessons were introduced, the time the teacher would occupy might be so diminished to allow abundant time for work and for recreation also.

A leading defect in the common method of teaching, is that it fails to give young learners correct idea of the meaning of many words, repeating words in the manner in which children are usually taught to read, does not convey to their minds correct notions of the signification of the words; and their definitions of words not understood are equally imperfect. If pupils do not understand the words given by teachers, the instruction given orally will be very imperfect, and lessons committed to memory when the language is not comprehended are worse than useless, for the exercise begets a habit of reading without a promise of the perceptive powers of the mind, such exercise is mere drudgery and generally causes children to dislike books and schools. *Late Paper.*

Selected.

Thomas C. Upham, D. D., gives us this valuable testimony:—"I have carefully studied the Bible in the original languages. I have read the Holy Land—the places memorable in Scripture history, and the earthly life of Christ; and what is more important, I have many years' experience. The conclusion the whole matter with me is an abiding conviction that *Christianity is true*, and that the deity of Friends have produced the highest and best statement of Spiritual Christianity made. Their spiritual view of Christ, their doctrine of universal saving grace and atonement, are yet in advance of the age; and of views entertained by any other denomination on this important subject. I am an man, and could not at this time in life change my denomination, either with profit myself or the cause; but I entertain the views that were taught by the early fathers."

The last article in the *Westminster Review*, in relation of our Society, was not very friendly in tone, but the second of these two paragraphs make an important admission in its favor:

"No sect that has ever appeared in the world has met with a larger share of hatred and persecution than the Quakers. They were despised by the Ishmaelites of Christendom; every man's hand was against them, and in a certain sense, their hand was against every man; for their trine and Church government were such to give mortal offence to every Christian sect then existing. * * *

And yet in all this mighty storm of hatred and abuse, it is evident, to a distant observer, that George Fox, and his disciples, were benefactors of the human race, and the propagators many precious truths, which though sown blood, and nurtured in tempests, will not rot, but will fill the earth at last with fruits of righteousness and peace."—*The British Standard.*

The discourse, says Franklin, "is often better than the speaker, as sweet and clear water often comes through dirty earth."

Some weeks since we published an account of a Conference of Friends held at Belper in England; and more recently, of one at Plainfield, Indiana. So far as the published proceedings indicate, those participating in these meetings appear to have been actuated by a sincere attachment to the doctrines and testimonies of our religious Society, and to have refrained from taking any step which would place them in antagonism to the meetings to which they severally belonged. Yet the very holding of such conferences implies the existence of evils which are sought to be removed. We have recently seen a letter from a concerned Friend in another of our Western States, which says that a number of families in the settlement where he resides, have all come to the conclusion "to meet for Divine worship apart from those called Innovators, or in other words, Fast Quakers, * * * for the sake of striving to have a Friends' meeting that is held according to Friends' rules, and not according to the rules of other denominations."

Such occurrences are evidences of an uneasiness that exists to a greater or less degree in many parts of our Society, and which is the natural result of the changes which have been introduced in some places in the manner of holding religious meetings, as well as in other movements affecting the welfare of the body. Those who have found spiritual comfort and strength in the former practices of Friends, and who see no good result likely to follow from the substitution of new views and customs, must be expected to bear their testimonies against what they deem hurtful innovations, and they cannot be blamed for doing so in a Christian spirit and in a proper manner. The responsibility for the unsettled and breach of harmony in the Society rests upon those who are instrumental in making the changes, not on those who are seeking to keep in the path trodden by their forefathers in the Truth.

But it is a matter of great importance, that those who are contending for primitive practices and *faith* should do so in the meekness, wisdom and authority which the Head of the church gives to His followers. We use the term *faith*, because we believe it will become more and more apparent, that the changes referred to are connected with a departure from some of the original doctrines of Friends. They either grow out of, or gradually lead to such a departure, though those influenced thereby may not always be aware of the fact.

When the harmony of a meeting is disturbed, it may seem to some that the easiest way to obtain relief is to withdraw from communion with the disturbing element. Without denying that there may be cases, in which such a course may rightly be pursued; and recognizing the force of the query, "Can two walk together, except they be agreed?" we believe the experience of our Society has shown this remedy to be attended with many evils. It was the testimony of that eminently wise man, the late Samuel Bettle, that separations had never been the true remedy for the church's troubles from the days of George Fox down to the present times.

Trying as it is to live in an atmosphere

where much that is unwholesome in a religious sense is found, yet the humble and sincere followers of the Lamb still know the Lord to be their protection and defence. If these are watchful and faithful in maintaining a steady testimony to the Truth in the congregations with which they are connected; and stand in unwavering opposition to all hurtful innovations; they will often be found to give an effective support to sound principles as could be done in any other way. Where this course is joined with prudent conduct and a holy life and conversation, consoled with that charity that suffereth long and is kind, it will have a restraining and preserving effect on others; and it may be the means, under Providence, of saving many who would otherwise be led astray.

We trust we are not deficient in sympathy with those who are placed in such trying circumstances, nor do we wish to decide for any what may be their individual duty. To their own Master they must stand or fall. It is as true in those days, as it was in those of the Apostles, that the sincere disciples of our Lord have "an unction from the Holy One," which is able to teach them all things necessary for them to know—but it is often the experience of the Christian to be compelled to walk as it were in darkness for a season, before the light shines on his path. It is easy at such times to make mistakes, if we be not preserved in a humble, teachable, patient spirit. It is very needful in times of trial to be on our guard, that we do not become weary of suffering for the good cause, and too hastily seek for relief from those exercises we are bearing for the church's sake.

SUMMARY OF EVENTS.

FOREIGN.—The Turkish government has declined to grant an armistice, as requested by the great Powers, but is willing to accept peace on condition of the occupation of the principal Servian fortresses and the retention of the Seretza from Belgrade to London. The Porte insists chiefly upon the necessity of the occupation of the principal Servian fortresses, so as to prevent fresh aggression, and leaves the negotiation of a treaty on the above basis entirely in the hands of the powers. The Porte expresses its disapproval of the excesses and outrages in Bulgaria, and is taking measures to punish some of the officials who contended them.

The Turkish army in Servia does not appear to have obtained any important advantages since the defeat of the Servians at Alexinatz, nor has it yet got possession of that stronghold which is occupied by a strong garrison. A dispatch from Belgrade to London, *The Times* says, that the Servian army between Delgrade and Alexinatz numbers about 55,000 men. Popular feeling still favors a continuance of the war in preference to accepting humiliating terms of peace.

The general committee of the Turkish bondholders in England have issued a circular embodying a scheme for permitting the Turkish government to issue paper money to the amount of \$40,000,000, to be legal tender and bearing no interest. The whole amount is to be redeemed in ten years by half-yearly drawings of \$2,000,000 each, and that sum is to be provided for by a deduction of 10 per cent. from the interest paid to existing bondholders.

A Belgrade dispatch of the 16th says, that an agreement to suspend hostilities for ten days has been signed. Simultaneously with the delivery of the reply to the powers containing the peace conditions, the Porte issued orders on its Seretza for the immediate cessation of all hostilities on the assumption that Servia and Montenegro would issue similar instructions.

There is some danger of renewed disturbances in the north of Spain, the inhabitants of the Basque provinces being violently opposed to the measures which the Government intend to put in force the present month. These measures include military conscription, the collection of arrears of taxes and the exaction of supplies of provisions for the army occupying the provinces. It is however not unlikely that the people will feel the

hopelessness of resistance and submit to the changes proposed.

A Paris dispatch states that the scheme for making a new cable between Paris and New York has failed. The proposed capital was \$600,000, but the necessary subscriptions have not been offered. It is apprehended that there are now as many ocean cables across the Atlantic as can be profitably maintained.

An evidence of the remarkable thrift of the French people is shown in the fact that no fewer than 4,472,313 of them have investments in the various loan ventures.

The Japanese government is about to prohibit all business partnerships between natives and foreigners. The Spanish government has issued a circular in relation to the complaints of the Protestant ministers. It claims that it is only enforcing the article of the constitution which forbids religious public manifestations. Similar manifestations by Roman Catholics are likewise interdicted. Don Carlos, after a visit to Mexico and the United States, has returned to Pau in the south of France, where his wife has her residence.

The business depression in Great Britain gives rise to commercial failures which are frequently reported in the English papers.

It is stated that Great Britain has been requested to accept the Transvaal territory which more than twenty years ago was permitted to establish an independent republic. The Boers, who form its white population, have frequently petitioned the government, and with the Tulu Kafirs were recently renewed and resisted disastrously for the whites, who were completely defeated. The Transvaal Republic is in South Africa, immediately north of the Orange Free State and the British colony of Natal.

A London dispatch of the 18th says: An immense meeting on the Eastern question was held at the Guildhall to-day, over which the Lord Mayor presided. An address to the Queen was voted, deploring the outrages of the Turks and praying England no longer to support Turkey from considerations of political expediency. An amendment expressing confidence in the government was rejected by an overwhelming majority. A motion in favor of an immediate convocation of Parliament was carried. The crowd was so great that a number of persons were unable to get into the Guildhall, and another meeting was held outside the building.

Madrid, July 26. The Madrid Herald says: It is semi-officially stated that no notes have passed between Spain and foreign governments with reference to the recent orders in regard to placards on Protestant churches. The British Minister merely had a confidential interview with the Foreign Minister, but as the government acted according to the instructions of the cabinet without result. The *Diacono Español* states that the authorities of Castile have prohibited the sale of Protestant Bibles.

Wm. M. Tweed and his Secretary, are now imprisoned in Fort Castro de Vigo, where they will remain until their departure for Cuba. The Madrid Herald in an editorial alludes to the fact that no extradition exists between Spain and the United States, and says it knows not what judicial course is to be taken by the Spanish authorities in the case of Tweed. It adds that European governments would desire to see some definite legal arrangement made for dealing with such matters.

UNITED STATES.—The Republican majority in Maine at the recent election exceeded 15,000 on the vote for governor. The Legislature will stand: Senate, 29 Republicans and two Democrats; House of Representatives, 129 Republicans and 34 Democrats. The vote was the largest ever given in the State.

The intemperate in Philadelphia last week numbered 331. During the six days ending the 16th inst., the International Exhibition was visited by 407,300 persons who paid for admission.

The commercial and the present outlook on the commercial paper market indicates of a gradual and moderate revival of trade and business throughout the country generally. Prices of most manufactured articles remain at low figures, though a few are higher than they were last month. The Internal Revenue receipts for the first three months show a decided increase over the corresponding months of last year, thus showing that there must have been a revival of business to an appreciable extent. Prices are much lower than in 1873, cotton and woolen goods having declined from 15 to 35 per cent, and groceries, bread-stuffs and most other articles being 20 to 25 per cent lower.

The revival referred to has not been sufficient to give employment to all the hands usually employed in manufacturing industry, and many thousands of persons are still out of work.

At the latest dates there had been no abatement of the disease.

The cash admissions to the International Exhibition on the 14th inst. were 91,996. The Exhibition will be open only about seven weeks longer, and the interest in it appears to increase from week to week. All the cars of the Pennsylvania Railroad are crowded with passengers, and it has been found necessary to obtain the use of a large number from other railroads.

On the 14th inst. a violent gale, accompanied with heavy rain, visited the Atlantic coast from Maine to North Carolina. Many marine disasters were caused by it, and considerable damage on land in various places.

The Markets, &c.—The following were the quotations on the 18th inst. New York—American gold, 109 1/2; U. S. reg. gold, 109 1/2; New York City, 109 1/2; 115 1/2; do, 1887, 116 1/2; new five per cents, 115 1/2. Superfine flour, \$3.60 a \$4.70; State extra, \$4.85 a \$5.30; finer brands, \$5.50 a \$8.50. White winter wheat, \$1.30; new red winter, \$1.21; No. 2 Milwaukee yellow, \$1.15; No. 3 Chicago, \$1.00. State rye, 84 a 85 cts. Spring corn, 50 a 60 cts. Oats, 40 a 48 cts. Philadelphia—Middlings extra, 1 1/4 a 1 1/2 cts. for uplands and New Orleans. Superfine flour, 4; extra \$4.25 a \$4.75; finer brands, \$5 a \$8.25. Western white wheat, \$1.25 a \$1.30; southern amber, \$1.25 a \$1.27; red, \$1.15 a \$1.20. Rye, 75 cts. Yellow corn, 59 a 60 cts. Oats, 37 a 40 cts. New York clover, \$3.00 a \$3.50. Hops, 100 a 1 1/2 cts. About 4000 head cattle sold at 6 a 6 1/2 cts. per lb. gross for extra, 5 1/4 a 5 1/2 cts. for fair to good, and 4 a 5 cts. for common. Sheep, 5 a 6 cts. per lb. gross. Receipts 11,000 head. Hogs, \$5.50 a \$9.25 per 100 lb. net for corn fed. Receipts 4000 head. Cincinnati.—No. 2 Spring wheat, \$1.04 1/2; No. 3 do, 91 cts. No. 2 corn, 48 cts. Oats, 33 1/2 cts. Barley, 78 a 79 cts. Rye, \$1.20 per 100 lbs. Baltimore.—No. 2 western red wheat, \$1.23; No. 3 do, \$1.18; Pennsylvania and Maryland red, \$1.22 a \$1.25; amber, \$1.30. Southern corn, white and yellow, 52 a 54 cts. Oats, 35 a 38 cts. Cincinnati—Family flour, \$3.20 a \$5.40. Superfine flour, \$3.60 a \$4.12. Oats, 35 a 42 cts. Rye, 68 cts. Barley, 95 cts. a \$1.00.

RECEIPTS.

Received from John L. Kite, Agent, O., \$2.10, vol. 50, and for Edwin Fogt, Joseph, Joseph Lynch, Lindsey, John W. Warrington, Eliza A. Fogg, Wm. Ellyson, John H. Stanley, Sarah Woolman, Robert Ellyson, James A. Cope, Abner Woolman, Jane Woolman, Edwin Holloway, and Margery Crev, \$2.10 each, vol. 50; and for Lydia Warrington, \$2.10, to No. 18, vol. 50; and for Levi Varrig, Canada, \$2.10, vol. 50, and \$2.10, vol. 50; and for Henrietta W. Heath, Pa., \$2.10, vol. 50; and for Deborah C. Hutton, Pa., \$2.10, vol. 50; and for James R. Cooper, Pa., \$2.10, vol. 50, and for Charles Cooper, Thomas B. Hoopes, and Lettice Thompson, \$2.10 each, vol. 50; and for Thomas M. Harvey, Agent, Pa., for Susan H. Hoopes, Pa., and Mary J. Chambers and Susanna Chambers, Del., \$2.10 each, vol. 50; and for Susan Worrall, Pa., and E. Rhoads, \$2.10, to No. 12, vol. 51; from Dr. Stephen Wood, L. I., \$2.10, vol. 50; from John M. Stratton, O., \$2.10, vol. 50; from Sarah G. Yarnall, City, \$2, vol. 50; from Rachel W. Griffith, City, \$2, vol. 50; from Mary D. Maris, Del., \$2, vol. 50; from John D. Smith, Pa., \$2, vol. 50; from J. Parker, \$2.10, vol. 50; from Samuel Morris, City, \$2.10, vol. 50, and for Jonathan Cox, N. J., \$2.10, vol. 50; from Samuel F. Balderson, City, \$2, vol. 50; from William J. Jeoks, City, \$2, vol. 50; from Moses Callender, Pa., \$2, vol. 50; from C. C. Balderson, Pa., \$2, vol. 50; from Jane Deane, Pa., \$2, vol. 50; from De-Cun, \$2.10, vol. 50; from Jordan Ballard, O., for Elijah Haworth and Seth Compton, \$2.10 each, vol. 50; from Daniel Nichols, N. Y., \$2, to No. 18, vol. 50; from Mary Ann Shale, Mass., per Isaac P. Wilbur, \$2, vol. 50; from John W. Warrington, Agent, Io., \$2.10, vol. 50, and for Jonathan Briggs, E. I., \$2.10, vol. 50; Homer Gibbons, Lemuel Brackin, John Ilge, and Edward Spencer, \$2.10 each, vol. 50, and for John Q. Spencer, \$2.10, to No. 17, vol. 51; from William C. Taber, Mass., \$2.10, vol. 50; from Eli Johnson and John H. Johnson, N. Y., \$2.10 each, vol. 50; from \$2.10 each, vol. 50; from John W. Foster, R. I., \$2.10, vol. 50; from Millin Cooper, Pa., \$2.10, vol. 50; from John Tyler, N. J., \$2.10, vol. 50; from Mark Billinger and Charles Ballinger, N. J., \$2.10 each, vol. 50; from Tracy R. Satterthwaite, Pa., \$2.10, vol. 50; from Thomas

Wilkins, N. J., \$2.10, vol. 50; from Sarah H. Ma, Pa., \$2.10, vol. 50; from Samuel Trimble, M. D., \$2.10, vol. 50; for Amelia Riley, O., \$2.10, vol. 50; from Nathaniel McDonald, Ill., \$2.10, vol. 50.

Remittances received after Fourth-day morning will appear in the Receipts until the following week.

WESTWON BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westwton, will be held in Philadelphia, on Sixth-day, Ninth month 29th, P. M.

The Committees on Instruction and Admission meet at 10 A. M. of the same day.

The Visiting Committee, appointed to attend the meeting of the School, meet there on Second-evening, 9th mo. 25th.

For the accommodation of this committee, connections will be at the Street Rail Station on the 31st inst., to meet the trains that leave Philadelphia at 4 and 4 1/4 P. M.

SAMUEL MORRIS, *Clk.*

Philad., 9th mo. 19th, 1876.

WESTWON BOARDING SCHOOL.

THE WINTER SESSION of this Institution opens Second-day, 10th mo. 30th. Parents and others invited to send pupils will please make application to BENJAMIN W. PASSMORE, *Supt.* (Address Street E. P. O., Chester Co., Pa.), or to CHARLES J. ALL, *Treasurer*, No. 304 Arch St., Philadelphia.

THE CORPORATION OF HAVERFORD COLLEGE.

A Stated Annual Meeting of The Corporation Haverford College will be held at the Committee Room of Arch Street Meeting-house, Philadelphia, on Second-day, Tenth month 9th, 1876, at 3 o'clock P. M.

EDWARD BETTLE, Jr., *Secretary*.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Chester-ward Ward), Philadelphia.

Physician and Superintendent—JOSHUA H. WOODSTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 15th of Second month, 1876, at his residence, New Hope, Pa., OLIVER PASSON, in the 5th year of his age, an esteemed member of Bucking Monthly Meeting.

—, at the residence of his parents in the neighborhood of Springville, Linn county, Iowa, HARRY DA EMMONS, son of Micajah and D-elitha Emmons, in twenty-fifth year of his age, a member of Spring Monthly and Particular Meetings. He had sustained a good moral character amongst men; but when he was brought to a sick bed, and that Divine Word that sharper than any two edged sword appeared, with quickening, searching power, he found the moral righteousness in which he had rested was only a rag; and that every work must be brought to judgment with every secret thing. He then clearly saw that had too much overlooked his duty to his God, which when brought into deep exercise and conflict of spirit he said was enough to take any one to hell; verified the truth he had heard, that they who forget God, as well as the desperately wicked, shall be turned to hell." He said he felt as if his whole life had been spent in vain; just foolishly thrown away. To one who advised him to come to Christ, and to believe he was saved and saved now, and he would be happy, he replied: "I will not believe that way, but only in an overwhelming sorrow to seek repentance and reconciliation through Christ." which, after passing through deep baptism and conflict of spirit for many days, was favored to attain; and after imparting much satisfactory counsel to many who attended him, he peacefully departed the 21st of 7th mo. 1876.

—, on the 29th of 7th mo. last, near Lincoln New Jersey, CATHARINE M. AARONSON, a member Upper Springfield Monthly Meeting, in the fifty-sixth year of her age.

For "The Friend."

Quakers and Quakerism.

(Continued from page 42.)

The work of the Society of Friends in the melioration of our penal code and the improvement of the state of our prisons is well known in connection with the honored name of Elizabeth Fry and others. It is difficult to count for the disgraceful state of our prisons fifty years ago. The prevalence of skepticism and religious deadness, the engrossing interest of public events on the Continent, the heavy rain on national resources of the French wars, seem all inadequate to account for the credible abuses that prevailed. For centuries as well as boroughs, an old gate-house, an ancient feudal castle, with its dungeons, damp, narrow cells, and its windows overlooking the street, often formed the common prison of offenders of either sex, and of all grades of crime. The danger of escape was avoided against by heavy irons. Dirt and disease abounded; gambling, drinking, and wearing were habitual. The London prisoners were still worse. The state of Newgate on occasion of Elizabeth Fry's first visit is thus described: "At that time all the female prisoners in Newgate were confined in the part now known as the nether side." The wards and two cells of which the women's division consisted, comprised about one hundred and ninety square yards, into which nearly three hundred women with their numerous children were crowded, tried and untried, misdemeanants and felons without classification, without employment, and with no other superintendence than that given by a man and his son, who had charge of them day and night. Destitute of sufficient clothing, for which there was no provision, in rags and dirt, without bedding, they slept on the floor, the boards of which were partly raised to supply a sort of pillow. In the same room they lived, and cooked, and washed.

With the proceeds of their clamorous begging when any stranger appeared amongst them, the prisoners purchased liquor from a regular tap in the prison. Spirits were openly drunk, and the ear was assailed by the most terrible language; military sentinels were posted on the leads, but such was the lawlessness prevailing, that even the governor entered this part of the prison with reluctance. Into "this hell above ground," Elizabeth Fry and her small band of devoted fellow-

workers entered, the love of Christ constraining them. On her second visit, at her own request, she was shut up alone with these outcasts from God and man, beginning her work among them by reading the parable of the laborers in the vineyard, and holding up before them the divine, pitiful Saviour of the lost—

"Christ, the brother of rejected persons, brother of slaves, Felons, idiots, and of insane and diseased persons."

She then appealed to the mother in them, pointed out the grievous consequence to their children of living in such a scene of depravity, and proposed to establish a school for them, to which they acceded with tears of joy. But one of the great secrets of her power is seen at once; true to her Quaker belief in a "divinity in man," a "light that lighteth every man," however degraded, she treated them at once as fellow-beings, and fellow-workers, and not as the wild beasts they seemed, desired them to consider the plan, as without their hearty co-operation she would not undertake it, leaving it to them to select a governess from their own number. This they did, choosing a young woman named Mary Connor, who proved admirably qualified for her work. An unoccupied cell was appropriated for a school-room by the permission of the prison authorities, who, however, looked upon it as a hopeless experiment; and Elizabeth Fry, accompanied by her friend Mary Sanderson, and the prisoner Mary Connor, formally opened the school. Mary Sanderson thus describes the scene, writing to Sir Fowell Buxton: "The railing was crowded with half-naked women struggling together for the first places with the most boisterous violence, and begging with the utmost vociferation. I felt as if I were going into a den of wild beasts, and well recollect the shuddering when the door closed upon me, and I was locked up with such a herd of novel and desperate companions."

At first the children were chiefly thought of, the idea of the reformation of adult women so sunk in degradation being abandoned as hopeless. But soon Elizabeth Fry and her heroic little band of Quaker workers became convinced that much might be done to introduce habits of industry and order among them, the poor women themselves being most earnest in requesting that the experiment might be tried.

Her first step was to procure remunerative employment, for it need scarcely be said that Elizabeth Fry was not one to begin her work of reformation by deliberately stubbing up the very principle of industry, on the development of which she knew all reformation must depend, through the adoption of that "unproductive labor" which is surely one of the cruelest violations of the God-given instincts of human nature invented by man. Looking upon all punishment as corrective and not penal only, one of her fundamental principles was that the convict should enjoy a portion of the fruits of her labor in order to cultivate

in her a sense of the advantages of industry, knowing that one good habit formed is a greater deterrent from evil than ten thousand fears of possible future punishment. She accordingly sought out the manufacturers who supplied Botany Bay with clothing, laid her views before them, and they at once engaged to provide work. A room in Newgate was granted her by the sheriff for her desperate experiment, as it was considered, a committee of twelve ladies was formed, and all the tried prisoners assembled. Elizabeth Fry again explained to them that the ladies did not come with any absolute authoritative pretensions; that it was not intended that they should command and the prisoners obey; but it was to be understood that all should act in concert, that not a rule should be made or a monitor appointed without their full and unanimous concurrence, and that for this purpose, each of the rules should be read and put to the vote. This was then done, the rules were passed enthusiastically, the women divided into classes, each class with its own monitor, and a matron appointed over the whole. A portion of Scripture was then read, and the classes withdrew in the greatest order to their respective wards.

The experiment exceeded the most sanguine expectations. The courtyard, instead of being peopled with being scarcely human, blaspheming, fighting, tearing each other's hair, or gazing with a filthy pack of cards for the very clothes they wore, which after all did not suffice for decency, presented a fortnight after a scene where stillness and propriety reigned, while the countenances of the women wore an air of gravity and self-respect as they sat busily working and listening to one of the ladies reading out. Though a refractory ward was placed at Elizabeth Fry's disposal, she never had occasion to use it.

This, then, was the beginning of that remarkable work which Elizabeth Fry afterwards extended to all the prisons of the United Kingdom, and to many on the Continent. It proved what might be done by Christianity and wise Christian methods with even the most abandoned, and formed the foundation of that continuous reformation which has resulted both in an amelioration of our criminal code, and in a steady improvement of our prison systems. But it is to our shame that the Friends have hitherto protested in vain against the incredible folly of unproductive labor, thousands of our criminals still "grinding the wind" by treadmill or crank, still lifting heavy weights to one side of a courtyard, to lift them back to the other, and presenting the nearest earthly embodiment of one of the circles of Dante's *Inferno*, "the fruitless toil that never overtakes its end!"—

Behold the human squirrels, round and round
Tramping the never-ending cylinder,
The incorrigible rogues? that wise men send
To houses of correction, there to learn
That honest labor is indeed a curse.
"Well, I always did think working for

one's living was by no means pleasant," exclaimed a criminal on leaving prison, "and after the dose I have just had of it, blessed if I ain't convinced of it."

But even the services the Friends performed in prison discipline, and in protesting against the abuses of capital punishment, pale before that great service England owes them for having been the first to introduce the mild treatment of the insane, a few months prior to Pinel's great movement in France. We must apologize to our readers for entering into some painful details, since unless we realize what was the recognized treatment of the insane up to the period when Pinel flourished in France, and William Tuke in England, it is impossible to form any adequate idea of what we owe the Quakers in this respect alone.

"The mere enumeration," says Dr. Hack Tuke, "of the means employed to tame the fury of the maniac, whether on the Continent or in England, would subject the historian to the charge of gross exaggeration from a stranger to the actual history of insanity up to about fifty years ago. The practice of flogging was in some establishments, at least, resorted to, about a dozen lashes being daily administered to the unfortunate patient. The maniac was almost always chained, and frequently was in a state of entire nudity; he was consequently filthy in the extreme. Often placed in a cage of iron, each revolving gear still found him crouching like a wild beast immured within his iron-bound cell, the dim-eyed tenant of the dungeon gloom," his limbs moulded in one position, and whatever of mind or feeling remained, crushed to the lowest pitch by changeless monotony, or maddened by intolerable despair." But whips and fetters were not inhumanly cruel enough. Chairs were so constructed that all movement of the limbs was prevented; and others were devised to whirl the patient round at a furious speed in order to produce extreme vertigo and sickness. German writers proposed dragging the patient up to a tower, and then suddenly letting him plunge down, thus giving him the impression of entering a cavern; naively adding, "that if the patient could be made to alight among snakes and serpents, it would be better stilling." The bath of surprise was another very favorite remedy: the loose boards covering a cistern being so arranged as to give way, the unfortunate patient finding himself suddenly submerged and in danger of being drowned." The wonder is that any human being survived this system of accumulated torture acting on the already diseased and irritable brain. Yet Elizabeth Fry, who interested herself in the cause of the lunatic as well as of the prisoner, on visiting a public building at Amsterdam, noticed among many other miserable objects, one unhappy woman, heavily ironed, perfectly naked, and groveling in straw. Whether the look of compassion on the beautiful face, or the voice that had caught the echoes of heaven from constantly comforting the wretched, attracted her, we know not; but she dragged herself to the length of her chain and endeavored to reach her visitor: the hand she desired to touch was yielded to her, and she covered it with her kisses, bursting into an agony of tears. Surely the darkest chapter in the history of man is his treatment for so many ages of those afflicted ones, "smitten of God and afflicted" with a mysterious malady which

most depends on kindness and wise sympathy for its cure, and love.

"That tender thought clothes like a dove,

With the wings of care."
(To be concluded.)

Selected.

The "True Story" of "Mary's Little Lamb."

There are floating about in the great ocean of literature, stray chips of song or story, which from their wit or wisdom, or from some unaccountable reason, become popularized and cherished more carefully than whole navies of world-renowned authors. Their parentage unknown, they come as literary foundlings to our doors, and, once admitted, command their own place in our affections. Among such is the poem "Mary had a little lamb." There is hardly a child in the land who has not become familiar with the verses. It is, perhaps, in the truth of the story that the popularity lies. For it is the true account of an incident that happened sixty-one years ago, not fifty miles from the Cradle of Liberty. And "Mary," a delightful old lady of threescore and ten, still lives and cherishes the memory of the event. The writer, on a recent visit, craved from her own lips the true story of the affair, and will reproduce it as nearly as possible.

"It was when I was nine years old," she said, "and we lived on the farm. I used to go out to the barn every morning with father to see the cows and sheep. One cold day we found that during the night two lambs had been born. You know that sheep will often disown one of twins, and this morning one poor little lamb was pushed out of the pen into the yard. It was almost starved, and almost frozen, and father told me I might have it if I could make it live. So I took it into the house, wrapped it in a blanket, and fed it on peppermint and milk all day. When night came I could not bear to leave it for fear it would die, so mother made me up a little bed on the settle, and I nursed the poor little thing all night, feeding it with a spoon, and by morning it could stand. After this we brought it up by hand until it grew to love me very much and would stay with me wherever I went unless it was tied. I used before going to school in the morning to see that the lamb was all right, and securely fastened for the day.

"Well, one morning, when my brother Nat and I were all ready, the lamb could not be found, and supposing that it had gone out to pasture with the cows, we started on. I used to be a great singer, and the lamb would follow the sound of my voice. This morning, after we had gone some distance, I began to sing, and the lamb hearing me, followed on and overtook us before we got to the school house. As it happened, we were early, so I went in very quietly, took the lamb into my seat, where it went to sleep, and I covered it up with my shawl. When the teacher came and the rest of the scholars, they did not notice anything amiss, and all was quiet until my spelling class was called. I had hardly taken my place when the patting of little feet was heard coming down the aisle, and the lamb stood beside me ready for its word. Of course the children all laughed and the teacher laughed too, and the poor creature had to be turned out of doors. But it kept coming back, and at last had to be tied in the wood shed till night. Now, that day, there was a young man in school, John Roulston by name, who

was on a visit to one of the boys, and came as a spectator. He was a Boston boy a son of the riding-school master, and was waiting for Harvard College. He was very much pleased over what he saw in our school, and a few days after gave us the first three verses of the song. How or when it got into print I don't know."

Thus she ran on, telling of the care she bestowed upon her pet until it grew to be sheep, and she would curl its long wool over a stick; and it bore lambs until there was flock of five, all her own; and finally how was killed by an angry cow. Then she brought out a pair of her little girl's stockings, knit of yarn spun from the lamb's wool, the heel of which had been raveled out and given away piecemeal as mementoes. No one can doubt that she, whose youth was rendered famous by love for an unfortunate animal, had lived a life of beneficence and charity. With a heart overflowing with love toward all God's creatures, she has indeed lived to care for the needy and destitute, and be a mother to the motherless. And now, in a green old age, she is surrounded by those whom her warm heart long since taught to cling to her and follow as the lamb in her youth. John Roulston died before entering college.—*Springfield Republican*.

What a change has come over Sweden! When the project of a Swedish-American colony was first broached to her famous king Gustavus Adolphus—and for a hundred year after that—Sweden, with a million and a half of inhabitants, was one of the foremost military powers of Europe, and, to a large extent, dominated the northern part of that continent. In her later history, with a population of from two and a half to four and a half millions, she has had no war for more than sixty years. She does not trouble herself about the "Turkish question" or the "balance of power," but attends to her own internal affairs, promoting her own industries, and fostering morality, sobriety and education among her people. They are experiencing the difference between the "military glory" of their past history and their long reign of prosperous peace. It used to be said that no patriotic Swede could pronounce the name and recall the memory of Charles XII without tears in his eyes. But what Swede would wish to exchange the Sweden of Oscar II for that of Charles XII bright as those days were with conquest and military renown? Sweden, with her prosperous agriculture, with her skilful artisans with her developing mines, with her fifteen hundred miles of railway, with her unsurpassed products of iron and steel, with her churches and her schoolhouses, with her contented and industrious people—among whom there is scarcely an adult, man or woman who cannot read—where education and intelligence are universal—such a Sweden is a much grander subject of contemplation than that of the most famous of her great military monarchs.—*Ledger*.

The way to heaven is narrow and difficult. Sin is to be forsaken, the world overcome, Satan resisted, self denied, duties diligently performed. Few go in this way. But the way to hell is open, broad, and thronged. To walk in it is easy; but the end is death. The narrow way demands effort, but it leads to life everlasting.

Selected for "The Friend."

The Golden Cord of Love.

This commandment have we from Him, that he who loveth God love his brother also."—1 John iv. 21. The great commands of our holy lawgiver, Christ Jesus, "Judge not, that ye be not judged," and "First cast out the beam out of thine eye," are of binding obligation upon those who are waiting for the coming of his kingdom, and very needful to be practised by all who are making profession of his mild and merciful religion.

Consider, every one has his constitutional firmity; and it is of that description that he sees it least in himself, because it is the secret of the enemy has in corrupt nature. This weight and sin which most easily besets him, and that in which the god of this world chiefly blinds him. Here, then, charity must all times make the greatest allowance.

Think not of ever conquering the wrathful, the earthly and selfish spirit, in its own way and principle, by opposing wrath to wrath, and self to self; but get out of their dominions, and stand in the principle of love.

In the greatest exigences, and under the greatest pressures, resign, stand still, and you shall see the salvation of God.

Judgment, opposition, and contention begin at the lower end; let the inferior part love; bear, forbear, suffer under and through the weakness of thy brother, and reach and begin with him at the other end, or the good art in him; and so uniting with him with that there is of God and Christ, you may one down towards the inferior part, and more easily conquer and supplant the evil or aim against. One word in the love, will do more than a thousand censures and reproofs out of it.

Take heed of anger, resentment, and indiscreet zeal; for these prey most ravenously upon the life of the Lamb in us.

How many difficulties are to be passed; how many things to be suffered! How many battles to be fought! How many labors and hard travails to be undergone, before the conquest and the crown can be obtained! Yet, courage! they will more than abundantly compensate. Oh! let not the fellow-sufferers and fellow-travellers fall out by the way; but in love, wait and labor, and bear together their cross, as they are invited and consigned to sit down in the throne of love together. If thy brother or sister in Christ fall under the violence of the enemy, pity them; where he has pierced them deeply already, do not wound them deeper; but here, especially, act the part of the true Samaritan, take the care of them upon thee, when no one else will; cement and heal as much as possible, and pour oil and wine into the wounds; and value not what expense of spiritual life and strength it may cost thee; it shall all be answered, yea, abundantly rewarded, in the multiplied blessings from the everlasting fund and treasury of grace.

Can we take an affront, and presently turn off our thought and mind from it, without resentment? Can we receive a wound from a friend without returning another? Can we be despised or injured, and spoken evil against falsely, without ruffle and disturbance of mind, and put it presently on the account of Christ, accepting it for his sake, and return nothing but pity, prayer, and blessing, even for cursing; and stand nevertheless, ready to do our enemy all the good that lies in our way? By

examining ourselves on these points, we may take the altitude of our advance towards perfection.

Those who pretend to Christianity must especially take heed not to be found defective in morality; and those that make the highest profession of love must take heed, above all others, that they be not found defective in the rules of common courtesy and civility; for these are all good and necessary in their proper places and order; and a due and exact regard to these lower steps may sometimes save the Christian many a trip and even foul stumble, and prevent many an offence, both to his own friends, and also to others without. This is good for experienced Christians to have regard to, who having shot up high, as towards the top of the ladder, have too often left through haste, some rounds deficient in the lower parts, while bending their strength and aim chiefly at the cultivation of the better and superior part.

No victory like that of overcoming our own passions, and becoming masters of ourselves. "Greater is he," says the wise man, "that restraineth his anger, than he that taketh a city." (Prov. xvi. 32.) He that can rule and govern his little world, so as to keep it in peace, order, and harmony, is a greater king than if he were monarch of the whole globe.

How great an enemy and opposer of the true love, both of God and the brethren, is the spirit of self in man, self-will, self-act, self-end. God is one, and thy end and happiness is to be one with him, and in him with thy brethren; but as far as thou art found in this spirit, and standing on thy own bottom, God and thou art two, and thou and thy neighbor are two, and have two contrary interests; and thus far thou defraudest God and thy brother of the right they have in thee. This self-love is a flat contradiction to Christian love. The one is poor, narrow, and particular; the other noble, generous, and universal; self-love breaks and divides the world into as many parts and interests as there are individuals; but Christian love unites all mankind, all hearts, and all interests into one. If, then, thou wouldst learn to love God and thy brother, pray and labor, and believe in God constantly and earnestly for the rooting out of this enemy; for it is the anti-Christian part, yea, the *Anti-christ* within thee: "Put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; and be renewed in the spirit of your mind; and put ye on the new man, which after God is created in righteousness and true holiness."

The apostle exhorts to "speak the truth in love." There are enough reprovers in strict severity, with a mixture of their own resentment and passion, which often defeats the true end of reproof; but here is shown the great strength of the children of love, as speaking the truth, expostulating, arguing, touching the defective part in a brother, out of a principle of tenderness and love for his instruction and direction, without giving offence or exasperation; and that because it is done without moving the natural man in themselves, without contempt, or taunt, or reflection, without an angry sting in their words, and without a blow or stroke intended and given in spirit, which always kindles a like passion, and engages a return in kind. He that would bring forth truth unto victory, for conquest of his opponent, must first con-

quer within himself, by the curb of his own passion and resentment, and by the prudence and moderation of his zeal. This is not weakness, or tameness, as some may think, but is truly the wisdom, strength, and conquering power of love; which though it carries the lamb outwardly, has also the lion within, which it can rouse on occasion; yet so as to act in conjunction and harmony with the Lamb. Thus we see Jesus, the Lamb of God, is also the Lion of the tribe of Judah, and is made Lord and Ruler in the power of the Divine justice and judgment; to a concurrence in which, by this conquest in themselves, and command of the fiery properties in their own souls, the children of love are to be advanced.

Christian! thou hast pointed out to thee thy way to conquest, thy way to perfection, and to the crown of thy high calling of God in Christ Jesus.

If thou hope for the great reward, which is the fruition of God, and thy part in the consummate union of the Lamb and Bride, or the state of *love triumphant*, thou must be found faithful in the state of *suffering love*, and hold it fast through all the various probations of it; and this, through the power of Christ in thee, carrying thee victorious through his whole process.

The greatest demonstration of thy love to Christ, and the greatest trials of it, prove to be, in the performance of this his peculiar command of love to his members; and this can only be done by the strength of his love in thee: hold thou fast to this point of faith; let the great love of God to mankind, the love of Christ the Bridegroom to his spouse, the Church, be both the pattern and the spring of thy love to thy brethren also. So, go on, and prosper, with Christ thy King; holding fast what thou hast received, until thou become "more than conqueror through Him who hath loved thee."

Selected.

The Bobolink's Song.—I have noticed that the bobolink does not sing the same in different localities. In New Jersey it has one song; on the Hudson a slight variation of the same, and on the high grass lands of the interior of this State, quite a different strain,—clearer, more distinctly articulated, and running off with more sparkle and liltiness. It reminds one of the clearer mountain air and the translucent spring water of those localities. I never could make out what the bobolink says in New Jersey, but in certain districts in this State his enunciation is quite distinct. Sometimes he begins with the word *gogoo*, *gogoo*. Then again, more fully, *Be true to me, Clarsy*. *Be true to me, Clarsy, Clarsy*, thence full tilt into his inimitable song, interspersed in which the words "kick your slipper, kick your slipper," and "temperance, temperance," (the last with a peculiar nasal resonance,) are plainly heard. At its best, it is a remarkable performance, a unique performance, as it contains not the slightest hint or suggestion, either in tone, or manner, or effect, of any other bird-song to be heard. The bobolink has no mate in any part of the world. He stands alone. There is no closely allied species. He is not a lark, nor a finch, nor a warbler, nor a thrush, nor a starling. He is an exception to many well-known rules. He is the only ground-bird known to me of marked and conspicuous plumage. He is the only black and white bird we have, and what is still more odd, he is black

beneath and white above—the reverse of the fact in all other cases. Pre-eminently a bird of the meadow during the breeding season, and associated with clover and daisies, and buttercups, as no other bird is, he yet has the look of an interloper, or a new-comer, and not of one to the manor born.

The bobolink has an unusually full throat, which may help to account for his great power of song. No bird has yet been found that could imitate him or even repeat or suggest a single note, as if his song were the product of a new set of organs. There is a vibration about it and a rapid running over the keys that is the despair of other songsters. It is said that the mocking-bird is dumb in the presence of the bobolink. My neighbor has an English sky-lark that was hatched and reared in captivity. The bird is a most persistent and vociferous songster, and fully as successful a mimic as the mocking-bird. It pours out a strain that is a regular mosaic of nearly all the bird notes to be heard, its own proper lark song forming a kind of bordering for the whole. The notes of the phoebe-bird, the purple finch, the swallow, the yellow-bird, the king-bird, the robin and others, are rendered with perfect distinctness and accuracy, but not a word of the bobolink's, though the lark must have heard its song every day for four successive summers. It was the one conspicuous note in the fields around that the lark made no attempt to plagiarize. He could not steal the bobolink's thunder.—*Scribner's Magazine.*

For "The Friend,"

"War from the point of view of Christianity and good sense. Translated from the English of Jonathan Dymond, with a Preface by Rousseau St. Hilaire. Paris, 1876."

We have been interested in seeing a pamphlet of nearly 100 pages under the above title, written in French, compiled from the "Inquiry into the Accordancy of War with the Principles of Christianity," by Jonathan Dymond. It has been translated from the English by a young man in profession with Friends, residing in the south of France.

The editor, who, we are informed, is a learned and serious man, and a member of the French Institute, has added some narratives, showing the results of obedience to the pacific precepts of the gospel in the midst of war and bloodshed, taken from Thomas Hancock's account of the preservation of Friends through extraordinary dangers at the time of the Rebellion in Ireland, in 1798; and also some painfully interesting incidents in the experience of two young men, one of them from North Carolina, who remained faithful to their principles, as Friends, during the late civil war in this country.

In the preface, the editor alludes with grateful feelings to the generous contributions of Friends in England, to the sufferers by the late war in France; and the desire, expressed by a member of the "Society of the Friends of Peace," that Dymond's Essay should be circulated in that country: to facilitate which, he has condensed its contents, and put them into a somewhat different form; and adds:—"This work addresses itself to Christians of all denominations, Catholics as well as Protestants, for it is the spirit of Christianity, and not that of a sect, which has produced it. But this does not imply, that men of the world, unbelievers, and the indifferent, may

not read it with profit, for war touches all of us, in our affections or in our interests. It has knocked at all our doors; it has caused all our hearts to bleed. To turn it aside; to oppose it, now as well as in the future, to seek in the Gospel the precepts which condemn it, and to seek to destroy from the bottom of our hearts those evil inclinations which produce it, is the duty imposed upon all—the holy crusade, in which all ought to engage without distinction of sect, nationality, or party."

Let us say boldly, in the name of Christianity and good sense, *It is necessary to abolish war.* It is necessary to end once for all those bloody massacres which dishonor our era of progress. The modern world aspires not only to liberty, it aspires to order, that is to peace. Already in those rare intervals in which war has ceased to exist, the most agreeable and pleasant relations have been established between even the most distant peoples. * * In the face of all this progress of the reign of peace, which is being accomplished without noise, but without cessation over all the face of the earth, which is on its way to abolish slavery among barbarians, as it has done among civilized people; can war still exist? We appeal to the good sense, the conscience, the heart of every man, whether he is a Christian or whether he is not. Europe in its ineffectual efforts to substitute arbitration for war, and thus to realize the noble dream of Sully, the *Christian Republic*, has shown the goal, but it has not yet found the way. It is indeed for Christianity to realize this dream, which so many sages have proclaimed a chimera. It, only, can satisfy that long groan of humanity, which for so many ages, asks of God that peace which kings cannot give. War to war; peaceful but ceaseless war to this bloody and detested legacy which the old world has transmitted to the new; and which causes an unanimous cry to arise from all the ends of the earth, from the bottom of all hearts—a cry which Christians had the honor of first uttering,—"It is necessary to abolish war."

The accounts which the editor has appended derived from this country, are as follows:—"During the long and terrible war called the *Secession*, which set the South against the North, in the United States, and the advocates of slavery against those of abolition, the faith of the American Quakers and their fidelity to their principles, were yet more rudely tried; we will cite some examples.

In North Carolina, a young Quaker enrolled by force in 1861, having refused to take a gun, was exposed for two hours to the brutal punishment, known in the army under the name of *backing*. The sufferer is condemned to keep himself bent, his head almost touching the ground, his hands bound and fastened to his knees, and a stake passed between his arms and elbows. * * During the night, he was kept chained, and the following morning he was suspended for two hours by his hands tightly bound together. We abridge the repulsive account of all these tortures, inflicted by skillful hands, accustomed to martyrize the blacks; tortures which lasted many weeks. Foiled by the invariable sweetness which the victim showed towards his tormentors, the officer who presided over this slow punishment, finished by leaving the place, saying to his men, "See if you can force him to fight, for my part, I give it up." Then the

soldiers came to offer him a gun, telling him it was necessary he should decide to carry or die. "To-day is the day of the sabbath he answered, with serene air, "It is the day which I should choose to render up my soul to God." Finally, not knowing what more to do with him, after new tortures, always supported with the same constancy, he was brought to the Colonel, who, through pity sent him to prison, where, by the interposition of Friends, he was liberated and restored to his family. It is thus to be seen that Christian courage belongs to all time and to all countries, and that America, if it has had its cruel persecutors, has also its martyrs.

Another Friend, arrived at camp, refuse also to bear arms. His first punishment was to be deprived of sleep for two nights. The having for a week endured every day the punishment of bucking, he was suspended by his thumbs for an hour and a half. Continuing firm in his refusal, he was brought before a court martial, and condemned to be shot. The soldiers were in line to execute the sentence, when he was heard to pray aloud a our Saviour, "Father, forgive them, for they know not what they do." In hearing these words, and seeing so much resignation, the soldiers were moved, the guns were lowered and he was remanded to prison. But though his spirit was strong, his body was not sufficiently so to withstand these cruel trials. Taken to the hospital, he languished there some time, and his hour of deliverance finally came. Observe what the officer who had charge of the hospital wrote:—"W. L. died at Richmond, the 6th of December, 1864. He died as he had lived, a true, humble and devout Christian, faithful to his convictions. We have pitied him, we have sympathized with him; but he has now received his reward, and he rests in the bosom of his Father."

Sub. ed.

Use this world as not abusing it—I Cor. vii. 31. Do I bear in mind that if I fail to use the world, as God commands, to his honor and glory, then I abuse it; and for this he will soon call me into judgment? Is it not abusing the world, making a wrong use of it, if I allow it to be the master instead of the servant—if I give it the place in my heart that should be kept sacred for God alone? Do I not abuse the world, if I fix my affections on it, or if I live in it as if there were no world beyond?

The world is good in its place. If kept without the heart, like the water outside of the ship, it may aid to bear us on to the haven of eternal rest. But as the water, if allowed to come within the ship, soon fills and sinks it; so the world, if it gets into the heart, will be its ruin. To possess the world, may not be injurious—to be possessed by it, is destructive alike to character, to happiness, and to the soul.

Rich Without Money.—Many a man is rich without money. Thousands of men with nothing in their pockets are rich. A man born with a good sound constitution, a good stomach, a good heart, good limbs, and a pretty good head-piece is rich. Good bones are better than gold; tough muscles better than silver; and the nerves that flash fire and carry energy to every function, are better than houses or land.

At the request of a Friend in Ohio, we re-
peat the following, which appeared in our
columns in the 4th month, 1859.]

From "The British Friend."

FRIENDS' MEETING IN THE COUNTRY.

A simple porch—an ancient pile,
Of no especial mark or style—
Green graves, and slumbering trees without—
Bare walls within, and timbers stout—
Here, at this evening hour, a band
Of silent worshippers have met;
Female and male on either hand;
A narrow aisle between them set,
As though 'twere danger or disgrace
To mingle in this sacred place.
It is, indeed, a little band—
Long forms around a tenant stand,
And seats that ancient valiants bore—
Departed—know them now no more!
Yet over all a stillness dwells
Than empty silence far more deep;
In which the heart with fervor swells,
And love and joy together creep.
But all are not alike engaged:
To bow their souls in praise or prayer
The thoughts of some, like birds uncaged,
Are wandering here or wandering there,
Unmindful of life's narrow way,
Unconscious of the debt they owe
For every breath since life began,
And every good joy'd below!

What contrasts, both of mind and face,
Of youth and age are in this place!
What different thoughts and feelings stir,
The brain of him—the heart of her!
That tender mother's fervent look
Is winning as an open book;
Her features are of Roman form,
Unmould'd by any sun so warm;
Her face, indeed, is saintly fair—
Dark are her eyes; her silvery hair
Worn short beneath her muslin cap
Peeps forth in little natural waves;
Her hands are folded in her lap,
She is not one of Fashion's slaves;
Alike her countenance and dress
Her loyalty to Heaven express.

This upright man of sanguine hue,
And stern, yet sorrow-stricken face,
Appears like one still struggling through
The briars and thorns that mar life's race.
But though his head is crisped with gray,
And though his brow is wrung with care,
Hope lights his features with her ray,
And faith defends him from despair.
Fighting in faith the fight of life,
Through grace he triumphs in the strife.

A girl is sitting by the wall
Still young, but as a woman tall;
With face as dark, if not so sad,
As, haply, Jephthah's daughter had.
How still she sits, in soul retired,
With peaceful thoughts of Heaven inspired!
Her eyes are wedded to the ground,
Moreless to either sight or sound.
Beside her sits a tinner girl,
Complexioned like the ocean pearl;
The same in tippet and in frock—
In mind how different seems the stock!
The ardent face, the bright start
Reveal the young enthusiast's heart.

This stripling here with forehead high,
With pallid cheek and serious eye—
So fair a man gives promise soon
To usher in a glorious noon,
Next him there sits a pretty boy,
Perhaps of ten years old or less;
To gaze upon him is a joy,
Though young and homely is his dress.
The rose's blush is on his cheek,
The diamond's light is in his eye,
His lips though silent seem to speak,
His curly locks around him fly,
To sit with stillness is, to him,
An irksome task to every limb.
And so, the moments to beguile
He calls his fancy to his aid;
With Xory sails full many a mile—
With Crusoe wanders, half afraid;

See in the waincoat's knotted boards
Exploding ships and flaming swords;
The Slough that Christian struggled thro'—
The Lions crouching in their lair—
Apollyon, terrible to view;
The Doubting Castle of Despair!

Here sits a man, whose heavy face
Of thought or feeling shows no trace;
A man of long-descended wealth,
And richer still in changeless health;
And richer still in changeless health;
Respected in his daily walk,
But fitted for no higher talk
Than that of bullocks—or of crops—
Or how the grass creeps up—or drops;
Contented in his rural sphere;
To one indulgent bosom dear.

Yon row of maidens young and fair
Have surely known no mother's care;
In various colors sprucely dight,
With bonnets gay, and tresses curled,
They seem just felled to take their flight
Into the giddy outside world.

Here sits a young and lumpy man
Asleep—disguise it if he can,
How ill appears, in such a place,
The drowsy, idiotic face!

Yon female friend, in middle life,
Though handsome, is not yet a wife;
Though love in her benignant eyes
In gushing fountains seems to rise,
Unsolled as the silk she wears
Her soul a sacred impress bears.
She never loved—but because unsought!
Or love too rashly set at naught;
Or if she lov'd, 'twas unrecal'd,
And thrown away because concealed!
And so her warm affections find
Solace in helping all mankind—
The poor at home—the slave abroad—
All who can yield her no reward!

On the raised benches at the end,
Facing the meeting, sits a Friend
Of reverend age. His visage meek
Seems a glad spirit to bespeak.
Goodness, untinged by worldly guile,
Has framed his features to a smile.

A female preacher by his side
Sedately sits. Her forehead wide,
And short round features, full of lines,
Show by indubitable signs,
Her mental energy and power;
Fitted for any place or hour.
She rises, in her form and mien
A natural dignity is seen.
Her simple bonnet, backward thrust,
Reveals her massive face; her bust
Swells with her mission; slow she speaks;
Her lifted hand due audience seeks;

"When Christ—on earth—in person came,
He promised that where two, or three,
Were met together in his name—
Which is his power—there He will be!
This day this promise we behold
Fulfilled amongst us. O'er Christ's fold
The hovering wing, it may be said,
Of ancient goodness still is spread!
God is a Spirit!—Boundless space
Is His eternal dwelling-place!
The earth is with His presence filled!

Yet such is His mysterious plan,
His sacred pleasure is to build
His temple in the heart of man!
And in spirit to be sought—
In earth worshipp'd and obeyed—
Until salvation shall be wrought;
And man is in his image made!
Nor is it strange that He who woeled
These worlds into the empty sky;
Yet paints the lilies of the field,
And feeds the ravens when they cry,
Should condescend his works to own;
And thus the chiefest of the whole;
And cause His presence to be known
In man's immortal quicken'd soul!

"This revelation from above,
Within us, shows the Father's love
To fallen man. It is a lamp
To every soldier in his camp;

It is the hidden manna, given,
From day to day, direct from Heaven;
Yet daily to be sought—a brook,
As by the way—a shepherd's crook,
To draw us to himself—a well,
Pure, sweet, and inexhaustible,
Of living waters. O, how great

The privilege! How good the gift!
How excellent the Giver! Wait
In faith before Him. He will lift
Our hearts in hope. We shall rejoice
As in His presence, with His joy;
Shall listen to His gracious voice,
And feel in truth that God is near.
In this communion we shall know
No need of outward form or sign,
Or ceremonial, pomp, or show,
Or sacraments bread and wine.
The blessed substance being ours,
These empty forms are worthless dross;
They yield to Christ's superior powers,
Who, dying, nailed them to His cross!

"What is true worship? Let each one
Ask his own heart. Is it to run,
With eager crowds, on worlds to feed?
Is it to hear a parson read?
Is it dependence on a priest?
Is it to bow towards the east?
Is it to listen to the sound
Of artificial music swelling round?
True worship is an inward, pure,
And reverent exercise of mind
Before the Lord! Who doth adore
The waiting suppliant; who will find
That God is gracious to the meek,
And unto him who own his way,
And unto Him in spirit seek.

Through Jesus Christ, the living way,
This worship was our ancient right,
Each in our own peculiar sphere;
Amidst the raging of the storm,
When evil men are struck with fear;
Or in the calm of daily life,
Whatever cares engage our hands—
Amidst the tower's commercial strife,
Or by the ocean's changing sands—
Though o'er 'er the sea we steer our course,
Or toil within the dangerous mine,
The soul may gather to the Source
Of love, and light, and life divine.

"Jesus is our High Priest. His word
Within the waiting soul is heard,
Teaching as no man ever taught.
The power to such cannot be bought;
It is the gift of God. In vain
Men seek by study to attain
To heavenly knowledge. Learning fails
To pluck from human eyes the scales
That blind men to the truth. No doubt
This people were raised up of old
To make resistance, meek yet stout,
To tyrant priestcraft, and uphold
A purer standard to mankind,
Of life and doctrine, and God's free grace,
And man's free will. But they were blind,
And mocked, and scourged from place to place;
Robbed by informers, rudely thrown
Into foul dungeons, suffering through
Long months and years; not men alone,
But likewise tender women too,
Yet could they glory in their wrongs,
Nor hope, nor confidence would yield,
But raised to Heaven triumphant songs,
And with their lives their witness sealed.
Oh, that in this more peaceful day,
Those times by none may be forgot;
Why should we wait our old ennobled way,
As though with oil anointed ear?
May neither pride nor sloth deter
The heavenward progress of your youth.
Sell not your birthright! nor prefer
A mess of pottage to the truth!"

"Thanks be to God! who would that all
Should turn to Him and live. The call
Is universal. He had chosen you,
His part, in that He gave his Son
To die for sinners, and hath placed
His Spirit in our hearts. Then haste
To seek this inward light. Obey
Its guidance in the heavenly way.
It leads into the truth. It shows
The vanity of earthly things;

Reveals to man his inward foes,
Perhaps unknown before; and brings
His soul from bondage. It destroys
All false deceitful colors; rends
The specious veil from worldly joys,
And shows in what man's glory ends!
That blessed light of truth discloses
All fraud—all violence—all wars—
All tyrannies of states and thrones—
All harsh, unjust, oppressive laws!
It yields alone true peace of mind—
It governs every wish and desire—
Leads to truth-speaking with mankind—
Plainness of language and attire—
Brings into unity and love,
That bond of love which naught can break—
Binds us at once to Christ to love,
And to each other for His sake!
It is the diadem and crown
Of our assemblies, when we meet,
When all within us is laid down
In nothingness at Jesus' feet!
It is the union from on high!
The true Anchor, on which alone
Can rightly fit and qualify
To make the glorious gospel known!
To this, dear Friends, in love unfeigned,
I now commend you, one and all,
With mine own soul! I feel constrained
Thus to invite you. Heed the call!"

She ceases. She resumes her seat;
Yet still would seem the cadence sweet
To melt upon the ear. Around
A silence settles—calm—profound.
A glow of heavenly love arrays
Her face;—but soon she kneels—she prays.

"O Thou! whose dwelling is on high,
Look down upon us with an eye,
Of love and mercy; and preserve
A remnant who shall never swerve
From thy true service; but uphold!
Thy standard in the earth, with bold
And faithful hearts; shed forth thy light,
And vindicate in all men's sight
Thy blessed truth. And, for the sake
Of Christ our risen Lord, O take
Upon thyself thy mighty power!
Let not the barbarous sword devour
Forever; but be plenteous rain
The hearts of men away from war,
To worship Thee!—O God! subdue
Our stubborn wills! Do thou renew
Our spiritual strength. Forgive
Our erring hearts, and bid us see!
Be Thou our guide from day to day!
Thy law, O Lord, within us write!
Be thou our hope—our help—our stay—
Who art the Truth—the Life—the Light,
That we may know a second birth,
For all men may be saved again,
Who seek to be redeemed from earth;
The second death will then obtain
No power to harm us. Cause, O Lord!
Thy truth to prosper here and more
In every land—at home, abroad—
That men Thy goodness may adore!
That holiness may yet increase,
And spread through earth from sea to sea;
And men may live in love and peace,
And welcome incense rise to Thee!
To Thee, O Father! and Thy Son,
The First Begotten from the dead,
And to the Holy Spirit—our
True God! our ever living Head!
High praises be ascribed, both now
And all eternity; for Thou
Art worthy!—worthy!—worthy!"

The sunset's soft and yellow beam
Along the wall begins to gleam.
The sparrows on the fir-trees high
Have ceased to sing. By and by
The little company depart,
Some tendered and refreshed in heart. S. D.

Bucks, twenty-seven feet in diameter, 2300 years.—*Late Paper.*

For "The Friend."

In the report adopted by the "Conference" of Friends of Western Yearly Meeting, held at Plainfield, Eighth month 22d, 1876, among other things, there is the following: "And we believe it incumbent on all who desire to maintain the original doctrines, testimonies, and peculiarities of our Society, as given forth by ancient Friends and handed down to us, to stand unflinchingly by them, disclaiming in christian meekness and forbearance, all unsoundness in doctrine and practice," "which doctrines we believe are the true doctrines of the Scriptures, and that the usages which they adopted, are the legitimate outgrowth thereof."

Taking them at their word, will not the "Conference" have to testify publicly and unequivocally against the unsound doctrines of Joseph John Gurney, who, Thomas Shillitoe said, "has spread a linsey-woolsey garment over our members, but in a future day it will be stripped off, it will be too short for them, as they will be without Jesus Christ, the Lord." And further, he said, "it is my firm belief," that "the Society will go gradually down, if it yields to the further circulation of that part of his works, which they have in their power to suppress." How lamentably has this been fulfilled, not only in his native land (England), but also in America. And will not the "Conference," have to make the like justification against the oppressive acts of the "Larger Body in New England," in violation of their own discipline, in order to bring about the disownment of sound Friends and faithful watchmen, for no other offence than that they labored in accordance with the discipline of New England Yearly Meeting, to prevent the reception and spread of the unsound doctrines alluded to.

Doubtless if the "Conference," stands unflinchingly for the doctrines and testimonies of the Society, and disclaims against "all unsoundness in doctrine and practice," they will have a humiliating work to perform; but no matter, if thereby they can experience a being stripped of the linsey-woolsey garment, (if in anywise they have it on), and have their lives given them for a prey. Oh, that the Western Yearly Meeting, as well as all the others that have assisted in healing the hurt of this people (Friends) slightly, and crying, "peace, peace, when there is no peace," might wake up to their accountability and to the awfulness of the subject, before it be too late; that the language be not incurred, "Inasmuch as ye did it not to one of the least of these, ye did it not to me." The apostle says, "Have no fellowship with the unfruitful works of darkness, but rather reprove them." Has there been any reproof of the unfruitful works of darkness, sanctioned by the "Larger Body in New England," by any of the Yearly Meetings, except Philadelphia and Ohio?

Will the members of the "Conference" read the report in relation to the facts and causes of the division which occurred in New England Yearly Meeting in 1845, adopted by Philadelphia Yearly Meeting? I quote one paragraph: "The obstruction which exists in our Yearly Meeting to the holding of a correspondence with that body in New England, which has authorized or sustained the proceedings upon which we have unadvisedly,

does not arise from any feelings of hostility to them, nor from partiality to any man, from a conscientious belief, that what may have been the motive, their acts have gone to condemn many who have been standing for the ancient faith of Friends, i. against the introduction of error; that in doing wrong opinions have received support and the discipline and rights of mem have been violated; and that it was the course pursued by them in these transactions, which led to the separation. Until, therefore, the proceedings shall be rectified or annulled, see not how unity is to be restored."

The "Binns party" worked a separation Ohio Yearly Meeting, in order to correspond with the "Larger Body" in New England thus giving support to unsound doctrines and practices, as also all the Yearly Meeting which have fellowship with them. It is worthy of particular notice that in all Yearly Meetings which have affiliated with the "Larger Body" in New England, they have been those wide departures from primitive doctrine and practice, till their meeting in many places are not characteristic of meetings of Friends. What then can be done for backsliding Israel? Will they return to the Lord, if they may return? But perhaps they will say, "Wherein shall we return? Be not deceived; God is not mocked," "whatsoever a man soweth, that shall he also reap." "For he that soweth with his flesh, shall of the flesh reap corruption, but he that soweth to the Spirit, shall of the spirit reap life everlasting." A

Ohio, 9th mo.
We give place to the above because: think it is the product of one who is honest concerned for the welfare of the cause. Truth: but we apprehend it is best to let the deeply tried members in the West, to multiply as the Head of the church may be pleased to direct their steps.—[E. R.]

The China papers continue to notice a alarm which prevails in many Chinese cities respecting the supposed cutting off of queer by some supernatural agency. The *North China Herald* says:—The phantasy that has been lately prevalent in the cities of Shichow, Chinkiang, Yangchow, and Nankin touching the pranks of mischievous spirits who have taken to cutting off the legs, queues, has spread to Shanghai. For several weeks little else has been talked about in tea shops of this province and city. The sprites are of paper, cut by magicians resemble the human figure, and despatch after certain incantations to create amoyano. On this occasion they have been directed cut the queues of numerous persons in large cities. They always presage trouble in the State, rebellion or something of the kind being sure to follow their appearance. They became conspicuous, for example, a few years before the Taeping rebellion, and hence it is that officials are not a little perturbed by the present panic, seeing that it is but one of what are popularly regarded as portents of a revolution. The saw, "A prosperous Government is known by felicitous occurrences; a Government about to be overthrown has ominous portents," is in every body's mouth, and tend to effect such an overthrow. When drought, floods, epidemics, defeats, and such calamitous occurrences begin, magic comes as an aid in producing further confusion. As an instance

The yew trees of Britain are of wonderful longevity. One lived at Fountains Abbey, Ripon, for 1200 years. There are some yews at Crowhurst, in Surrey, 1100; a yew at Fontigal, Perthshire, 2000 or 2600; a yew at Broadburn, Kent, 3000, and a yew at Hedsor,

excitement which the queue cutting mania causing among the Chinese, we may mention that the circulation of the *Shenpa* has ceased by several hundreds since it began. A man relates that he was walking near the North Gate, and suddenly he heard a sound of a rushing wind, when lo! his queue was gone. Another case related is of a child who went out to play, when in a moment his queue was gone, and he came home, crying, to relate the loss. However all this may be, there is doubt that a number of queues do get cut and that great alarm exists in consequence. It heightens the panic, is a saying that an only lives one hundred days after the catastrophe has happened to him.—*Public Ledger*.

Selected.

The Death-bed of Thomas Paine.—Stephen Elliot in his journal thus notices the death his notorious and unhappy man:—
I may not omit recording here the death of Thomas Paine. A few days previous to his leaving home on my last religious visit, hearing that he was ill, and in a very delicate condition, I went to see him, and found him in a wretched state; for he had been neglected and forsaken by his pretended friends, that the common attentions to a sick man had been withheld from him. The skin of his body was in some places worn off which greatly increased his sufferings. A nurse was provided for him, and some useful comforts supplied. He was mostly in a state of rapture, but something that had passed before us had made such an impression upon him, that some days after my departure, he met for me, and on being told that I was gone from home, he sent for another Friend, is indeed a valuable young Friend (Mary See), who had resided in my family, and continued at Greenwich during part of my absence, frequently to go and take him some refreshment suitable for an invalid, furnished by a neighbor. Once when she was here, three of his distasteful associates came to the door, and in a loud, unfeeling manner said, "O Paine, it is said you are turning Christian, but we hope you will die as you have died," and then went away. On which, turning to Mary Rascoe, he said, "You see what miserable comforters they are."
Once he asked her if she had ever read any of his writings. And on being told that she had read but very little of them, he inquired that she thought of them, adding, "from such one as you I expect a correct answer." She told him that when very young his "Age of Reason" was put into her hands, but that she more she read in it, the more dark and distressed she felt, and she threw the book to the fire. "I wish all had done as you," he replied, "for if the devil has ever had any agency in any work, he has had it in my writing that book." When going to carry him some refreshments, she repeatedly heard him uttering the language "O Lord! Lord!" and "Lord Jesus! have mercy upon me!" It is well known that during some weeks of his illness, when a little free from bodily pain, he wrote a great deal; thus his nurse told me; and Mary Rascoe repeatedly saw him writing. If his companions in infidelity had found any thing to support the idea that he continued on his death-bed to espouse their cause, would they not have eagerly published it? But not a word is said; there is a total

secrecy as to what has become of these writings.

THE FRIEND.

NINTH MONTH 30, 1876.

In contemplating the probable future of our religious Society, it is natural that attention should be directed to the generation just coming on the stage of action, from among whom we should rightly expect the consistent successors of those who are now faithfully supporting the doctrines and testimonies of Truth, and bearing the heat and burden of this day of trial. While we believe the call of the Lord has been extended to many of the youth, inviting them to become chosen for his service, it is cause for unfeigned sorrow, to recognize in how few comparatively, the evidence is given that they are willing to submit to the re-training, convicting and converting power of the Holy Spirit, which alone can implant a sincere love for the self-denying principles of the gospel, and produce a right qualification for setting the example of genuine Quakerism before the world.

The introduction within the Society, of the lax and spurious notions respecting the mortifying restraints of the religion of Christ, and the propriety of our members conforming more nearly to what is deemed admissible by other religious professors, has added greatly to the difficulties and exercises of religiously-concerned parents, who are watching for the preservation of their off-spring, as those who must give account; and with sorrow, they often see that, notwithstanding all their care, and their many prayers, the precepts openly taught and the example set, by many of those who have assumed to be leaders of the people, coinciding as they do with the prompting of the carnal mind—thwart their godly concern, and draw the immature minds of their children away from the simplicity of the truth, and entice them to indulge in hurtful departures from the strait and narrow way.

The power of example is insidious and great. Where those who are entrusted with shepherding the lambs of the flock leave the sacred enclosure themselves, speaking lightly of, or disregarding, those testimonies, which, however the world or carnal professors may despise and ridicule them, are important as teaching self-abasement in the school of Christ, it cannot but be expected that those who are looking up to them for protection and help, will follow in their footsteps, and be exposed to become a prey to the spirit of the world. Hence, we see that where parents have adopted the "liberal" religion, now so much in vogue among us, not only themselves, but the younger branches of their families also very generally join in league with the spirit of the world, adopting its fashions, copying its manners and, more or less, indulging in its amusements. Thus the command is set at naught, "Be ye not conformed to this world, but be ye transformed by the renewing of your minds." Wearing plain clothes and using the plain language, will not make a Christian or good Quaker; but the Truth would lead all our members into them, did they not despise the day of small things; and they are often an effective preventive of much that is evil; and the restriction they impose, not infrequently prepares the way

for heart-felt obedience to the gentle intimations of the Holy Spirit. They make a great mistake—both older and younger—who suppose they are more highly esteemed, by compromising with worldlings in these respects; while other religious professors are alive to the inconsistency and paltriness of those claiming to be Friends, aping the language and fashions of the world; and considering it as a phase of hypocrisy, it is better fitted to excite their contempt, than to heighten their respect.

The living members preserved throughout the Society, mourn over these things, and many of them, we doubt not, are at times exercised in fervent prayer to the Father of all our sure mercies, that He would turn his hand upon us as a people, working for us deliverance from our captivity, from unwatchfulness and disobedience to the manifestations of his holy will concerning us. But though there is so general a departure from the simplicity of the truth as it is in Jesus, among both the older and younger members, there is no cause to despair of the broken ranks of the faithful being again filled. It was by the powerful operation of his own holy Spirit on the minds of one here and another there, that the blessed Head of the Church brought forth, and equipped and commissioned those who first filled the ranks of true Quakers; and He is as able now to raise up children unto Abraham from the stones of the street, as He was in that day of extraordinary grace. He told those Jews who persistently refused to own him as the Son and Sent of the Father, that "The stone which the builders rejected, the same has become the head of the corner," and that "The kingdom of heaven shall be taken from you, and given to a nation bringing forth the fruits thereof." If those who have a right of membership in the Society, be their profession what it may, practically reject the secret manifestations and self-denying requirements of the spirit of Christ within, small and trivial as they may be esteemed by the natural man—and are determined not to maintain all the testimonies of Truth which He has called Friends to illustrate before the world by example, He will bring in others from the high-ways and hedges, who will take the seats of those who will have been cast off.

We believe, however, there are yet preserved among our young members, both male and female, those who are far from despising the day of small things; and who, if they continue watchful and obedient to do the little, will be made rulers over more; and we may trustfully hope, that, as the watchmen and watchwomen are removed one by one, from rewards to accord a protracted armistice provided Austria suspends the dispatch of officers and soldiers to Belgrade. There are already 15,000 Russians in Servia. The Austrian ambassador at Constantinople is negotiating relative to the conditions of peace between the Porte and Moscow.

SUMMARY OF EVENTS.
FOREIGN.—A special dispatch to the London Times from Santander, Spain, states that William M. Tweed had been sent to Corunna where he was embarked for Cuba, to be surrendered, on his arrival there, to the United States officers.

The London Times says Berlin telegram says: The Porte is ready to accord a prolonged armistice provided Austria suspends the dispatch of officers and soldiers to Belgrade. There are already 15,000 Russians in Servia.

The Austrian ambassador at Constantinople is negotiating relative to the conditions of peace between the Porte and Moscow.

The London Standard reports that a treaty of peace

has been entered into by the Liberator government for the natives of Cape Palmas, who, when a declaration of war had been made by the United States, the natives believed that England would render them assistance; but the Foreign Office impressed them with the utter groundlessness of such expectations.

The London Times has intelligence from Cape Town of the complete disorganization of the Transvaal Republic. High officials were asking for British intervention. It was expected that a motion in favor of British annexation would be soon brought before the Legislature. Intelligence from another quarter asserts that the inhabitants of the Republic do not generally favor annexation, and would not generally rise in arms against the hostile natives. The whites number only about 50,000 persons.

The wheat crop of the United Kingdom this year is estimated at about 99,000,000 bushels, which leaves a deficiency of twenty-five or thirty millions of bushels to be supplied from other countries. The land in wheat is about 3,136,000 acres, which is twenty-five per cent. below the acreage of 1874 and the preceding seven years.

Business depression in England continues, and more commercial failures are announced from time to time. The recent Freeman's election has been elected to the British House of Commons, to fill the vacancy caused by Disraeli's elevation to the peerage. He received 2735 votes, and the Liberal candidate 2539.

A dispatch from Barcelona to the London Times notices the growing desire of the Spanish clergy to discontinue the support of a Protestant hierarchy. They argue that the people, until they are of full age, have no right to be instructed in any religion save the Catholic.

Railway statistics in Great Britain show that 1280 persons were killed and 3755 injured on the various routes during the year 1877.

Great Britain has sent an accredited diplomatic representative to the Transvaal Republic, authorized to inform the government and people that if they desire to be annexed to Great Britain as a colony the British authorities will consent thereto.

U. S. sixes, 1857, 1087.

Liverpool.—Midwiltuph uplands cotton, 5 15-16d. Orleans, 6d.

The proclamation of Prince Milan, as King of Serbia, is enthusiastically received by the population. It is believed that the king will be crowned in 1878.

The cause of the strong diplomatic pressure exercised by the powers, particularly Russia.

The plague has broken out among the Turks before Alexanz. They are compelled to change their positions every three days, and burn their tents and beds.

Mexican advices to the 13th say the city of Vera Cruz was captured on the 24th ult., by Garcia de la Cadena at the head of fifteen hundred insurrectionists. The same night he turned the city over to the American, German and Spanish Consuls, and evacuated it. The government troops occupied the place on the 28th.

Mexican advices to the 13th say the city of Vera Cruz was captured on the 24th ult., by Garcia de la Cadena at the head of fifteen hundred insurrectionists. The same night he turned the city over to the American, German and Spanish Consuls, and evacuated it. The government troops occupied the place on the 28th.

All indications favor the final triumph of Lerdo de Tejada in the Presidential contest.

UNITED STATES.—During the six days ending 9th mo. 23d, the International Exhibition at Philadelphia and the display of the world in connection therewith, was visited by 553,393 persons who paid for admission.

The daily number of visitors varied from 62,497, on the 18th, to 122,063 on the 21st. It is noticed as a remarkable fact that such vast numbers of people have been transported back and forth on the railroads without any injury from other countries. The land in wheat is about 3,136,000 acres, which is twenty-five per cent. below the acreage of 1874 and the preceding seven years.

schools and teach them mechanical and agricultural arts, provided for by treaty, and shall also provide subsistence until said Indians are self-supporting, and whenever the government shall have provided schools on their permanent reservations no children between the ages of six and fourteen years shall draw rations unless they regularly attend school, sick and infirm children excepted; and as an incentive to industrious habits, the Commissioner of Indian Affairs may provide that they shall be furnished in payment for their labor such articles as are necessary for civilized life.

Whenever the head of a family in good faith shall select an allotment of land, and engage in the cultivation thereof, the government shall, with his aid, erect a comfortable house thereon.

The Chinese immigration which was recently so much complained of, appears to have been checked without legislative action. There are still some arrivals at San Francisco, but for the last two months the departures of Chinese were in excess of the arrivals, and the steamships find their most profitable passages outward.

The yellow fever epidemic at Savannah had not abated up to the close of last week.

The new United States 4 per cent. loan is quoted in London at one half to one per cent premium.

The coinage of the U. S. mints for the Seventh and Eighth months amounted to \$13,003,170. Of this amount, \$9,406,000 was made in the San Francisco mint.

On the 24th inst. the blasting of the rocks at Hell Gate, for which preparations had been in progress for the past seven years, was made, it is believed with entire success, and without accident or injury to any one. Over twenty-six tons of dynamite and vulcan powder were employed on the occasion, which was one of the greatest feats ever witnessed by about 200,000 spectators.

On the 23d inst. a fire occurred in Baltimore, for which property on Frederic and Baltimore streets, to the estimated value of \$300,000, was destroyed.

In New York last week there were 463 births and 487 deaths.

MARKETS, &c.—The following were the quotations on the 23d inst. *New York*.—American gold, 110. Superfine flour, \$3.60 a \$4.80; State extra, \$4.85 a \$5.35; finer brands, \$5.50 a \$8.50. Choice white winter wheat, \$1.29; amber winter, \$1.23 a \$1.29; red and amber Texas, \$1.18; No. 2 Chicago spring, \$1.00. Yellow corn, \$1.00; white, \$1.00; mixed, \$1.00. Rye, 76 cts. Yellow corn, 62 a 65 cts.; mixed, 58 a 60 cts. Oats, 37 a 50 cts. New York cheese, 12 a 12 1/2 cts.; western fine, 10 a 10 1/2 cts. Clover-seed, 11 cts. Timothy, \$1.75 a \$1.90 per bushel. Linseed, \$1.30 a \$1.60. Spring wheat, \$1.15 a \$1.22; good do., 85 cts. No. 2 corn, 46 cts. No. 2 oats, 31 cts. Barley, 82 cts. Rye, 62 cts. *Lard*, 103 1/2 per 100 lbs. *Cincinnati*.—Red wheat, \$1.05 a \$1.14. Corn, 49 a 50 cts. Oats, 35 a 40 cts. Rye, 68 cts. *Burlington*, 95 cts. a \$1.05. *Louis.*—No. 2 red fall wheat, \$1.17; No. 3 do., \$1.07. *St. Louis*.—No. 2 red fall wheat, \$1.03 a 3/4. Rye, 58 cts. Barley, 85 cts. a \$1.00. *Lard*, 102 cts.

WESTTOWN BOARDING SCHOOL.

The Winter Session of this Institution opened on Tuesday, 10th mo. 30th, 1877, and others are invited to send pupils will please make application to BENJAMIN W. PASSMORE, Supt. (Address Street 1 P. O., Chester Co., Pa.), or to CHARLES J. ALD, Treasurer, No. 304 Arch St., Philadelphia.

THE CORPORATION OF HAVERFORD COLLEGE.

A State Annual Meeting of The Corporation Haverford College will be held at the Committee Room of Arch Street Meeting-house, Philadelphia, on Tuesday, Tenth month 9th, 1876, at 3 o'clock P. M.

EDWARD BETTLE, Jr., Secretary.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 29th of 4th mo. 1876, at Friend's Boarding School for Indian children at Tununesau, Cattaraugus Co., N. Y., MARY MILLHOUSE, a member of Springville Monthly Meeting of Friends, Lenox Co., Ga., the 40th year of her age. Being deprived of both parents when quite young, she was left in the responsible position of governess of the remnant of the family which duty she discharged with becoming fidelity ever since to those under her care and to others, that chief object of her life, the promotion of our Christian brother's kingdom on earth. She has left to survive by her example the impressive instruction, follow as I have followed Christ.

—, at Westery, R. I., 30th of 7th mo. 1876, ST. C. RAY, a member of South Kingston Monthly Meeting of Friends, 70th year of her age. She was a faithful laborer in and consistent supporter of the ancient principles and testimonies of the early Friends, which faith, as she had lived so she died. She was eminently one of the little and lowly, never aspiring promotion either in the church or the world. Died quietly away, we doubt not, to the enjoyment a better and more enduring inheritance.

—, in Jacksonville, Fla., on the 5th of 8th mo. 1876, JOHN B., son of James H. and Elizabeth Moon, in the 20th year of his age, a member of F. Monthly Meeting of Friends, Bucks Co., Pa.

—, on the 16th of 7th mo. 1876, CHESTER C. PA., on Seventh-day, the 16th of 9th month, 18 DANIEL PENNINGTON, a member of New Garden Monthly Meeting, in the 68th year of his age. This dear Friend endured a protracted and painful illness with patience and resignation, and the surviving remnant of his family, in the full assurance of the precious mercy of God in Christ Jesus, our Lord, his pure spirit has been joined to that innumerable company that surround the Throne of God.

—, on the 16th of 9th month, 1876, LETITIA, wife of John E. Byleson, an esteemed elder and member of Falls Monthly Meeting, in the 73d year of her age. Her peculiarly meek and quiet spirit enlured her many friends, while her uniformly careful and exemplary though unobtrusive walk through life, gave convincing evidence that her mind was preserved unto the regulating influence of the Holy Spirit.

—, on the 24th of 9th mo. 1876, ELIZABETH GARRISON, in the 90th year of her age, a member of Springville Particular and Monthly Meeting of Friends, Iowa. She bore a protracted illness with Christian patience and resignation. She was firm attached to the principles of the Society of which she was a member, and during her illness many times expressed her confidence in the promises of our Christian friends, having the consoling belief that, as she shook her coffin fully ripe, she is gathered into the heavenly garner, there to rest the rest prepared for the people of God.

For "The Friend,"

Quakers and Quakerism.

(Concluded from page 50.)

It was in 1792 that the great and good physician Pinel began his revolution in the treatment of the insane by unchaining fifty of the maniacs of the Bicêtre, one of the public asylums of Paris. The first man on whom the experiment was tried was an English captain, whose history no one knew, as he had been chained forty years. He was supposed to be one of the most dangerous, having in a fit of fury killed one of his keepers. He was set at liberty after having consented to put on the *camisole*, the long sleeves of which fasten up behind. He raised himself many times from his seat, but fell back again; for he had been in a sitting posture so long, that he had lost the use of his legs; but after a quarter of an hour he managed to keep his balance, and tottered to the door of his dark cell. His first look was at the sky, and he cried out enthusiastically, "How beautiful!" During the two succeeding years he spent in the Bicêtre, he had no return of violence; and he made himself useful in managing the other patients. In the course of a few days Pinel released fifty-three maniacs from their chains; among them were men of all conditions and countries. The result was beyond his hopes. Tranquillity and harmony succeeded tumult and disorder, and the whole discipline was marked by a regularity and kindness which had the most favorable effect on the insane themselves, rendering even the most furious more tractable.

A year before Pinel began this reform in France a circumstance occurred which turned the attention of the Friends to the same subject. "In 1791," to quote from a speech of Dr. Conolly's, at Willis's Rooms, "a member of that society sent one of their family, a lady, to care to the York Asylum. The rules of that Asylum forbade her friends to see her; she died; something wrong was suspected; and from that day the Society of Friends, acting as always in conformity with Christian receipts, and never hesitating to face a right work because of its difficulties, determined to establish an institution in which there should be no secrecy. William Tuke was the great founder of the new asylum, and from the first he and his friends pursued in that institution those principles of moral treatment which are now universally acknowledged."

The great revolution in the treatment of the insane thus inaugurated in England a little prior to Pinel's great movement in France is the more remarkable, in that the founder of the York Retreat was not guided to it by medical knowledge and a long course of study of psychological therapeutics, but simply by the common principles of religion, humanity, and common sense, slowly but steadily feeling his way to the application of those principles to the insane, aided by Jepson and Fowler, introducing settled employment, cheerful amusements, gardening, tea-parties, and above all, "the strengthening and consolatory principles of religion and virtue;" and this at a time when the great medical authority, Dr. Cullen, was writing in favor of the employment of fear in the treatment of the lunatic, and prescribing stripes in some cases of mania!

Gradually this great experiment began to attract the attention and curiosity of medical men and philanthropists; and twenty years after its projection, an account of the retreat was published by Samuel Tuke, grandson of the founder, and reviewed by Sydney Smith in the *Edinburgh*. "In this able work the author forcibly remarks, 'If it be true that oppression makes a wise man mad, is it to be supposed that stripes and insults and injuries, of which the receiver knows no cause, are calculated to make a mad man wise? Or would they not exasperate his disease and excite his resentment?' May we not hence clearly perceive why furious mania is almost a stranger to the Retreat?"

This publication was quickly followed by an exposure of the incredible atrocities and abuses of the York Asylum, among which down-right murder was not an infrequent incident. The public feeling was at length aroused and alarmed, a committee was appointed by the House of Commons, and in the next five-and-twenty years fifteen asylums were built and opened on the new principles of treatment.

In 1837, the important step was taken in the Lincoln Asylum of the total abolition of mechanical restraint, always so liable to abuse, and the substitution of the padded room in cases of violence. This principle, hotly contested, but never fairly tried, on the Continent, was adopted by Dr. Conolly in the large lunatic asylum of Hanwell, containing one thousand patients; and in 1844 he gave it as the deliberate conclusion of his immense experience "that there is no asylum in the world in which mechanical restraint may not be abolished not only with safety, but incalculable benefit." So rapid was the spread of these merciful principles, that in the same year seventeen English asylums had, when visited by the commissioners in lunacy, only twenty-four patients out of 2,368, mechanically restrained.

All honor to our Quakers in England, and to Pinel and his coadjutors in France, who, in the teeth of every difficulty and opposition,

brought about this grand revolution, and removed the deepest blot on our common humanity.

Our space only allows us to touch briefly on the three remaining points on which Quakerism strikes us as in advance of other Christian communities.

First, with regard to the vexed question of the rights of women, the position of women is undoubtedly higher among the Friends than in any other society. From George Fox's time an equal place has been assigned them in the family of God, as in the human family, in the Church as well as in human society. Their divine commission, "Go tell my brethren that I ascend to my Father and their Father, to my God and their God," has been recognized and narrowed down by no human limitation. Without committing ourselves to the bold rationalizing exegesis of the Quakers, who, when hard pressed by certain Pauline texts relative to women keeping silence in the church, replied, "Thee knows Paul was not partial to females," we may say that the Friends alone have proved themselves free from the old tendency to stick to the letter of Scripture, and sin against its divine progressive spirit, binding women, after nineteen centuries of freedom, with precisely the old worn-out bandages and restrictions which were necessary to preserve social order when first Christianity enfranchised women, and proclaimed the equality of the sexes. And perhaps that laborious Society for the Protection of Providence which exists in our midst, might study the result with advantage, and might even learn in time that, as we do not make laws to prevent weak-armed men from being blacksmiths, to quote from John Stuart Mill, so we need not in the long run make restrictions to keep women from spheres for which Providence has unfitted them, nature being abundantly strong enough to preserve the order of the sexes without the help of our crutches. Free to exercise any exceptional gift in public, and taking their regular share in the business of the Church, the Quaker women are profoundly domestic, though with a certain largeness of mind, and absence of feminine littleness, which doubtless springs from their wider training.

Again, the Quakers are exceptional in their treatment of heretics. In dissenting communities the orthodox brother is too often summarily kicked out like a ball. In the Established Church we reserve him for the charity of our law courts; or, if a layman, scourge him with caustic controversy in our public prints. The Church of Rome clothes him in curses from head to foot. The Quaker alone treats him as a "brother in perplexity." On one occasion an outburst of heretical views took place in a large congregation of Friends. The evil grew public and alarming. A few of the leading and most intelligent members of the Society were at once told off to meet the difficulty. Leaving their various voca-

tions at great personal inconvenience, they proceeded to the heretical centre, and there day after day, patiently met their erring brethren, made themselves acquainted with their difficulties, sympathized with them, reasoned with them, implored the Divine guidance for them and with them, and finally won some back to a firmer grasp on

The mighty hopes that make us men; and even those whose opinions they failed to influence, confessed that Christian brotherhood had become a living fact to them—surely a fact which would keep them from ever making total shipwreck of faith. Has not the Christian Church still something to learn from Quakerism?

And, lastly, it has often struck us as a curious fact that, of all religious bodies, the Quakers alone have recognized the religious uses of silence. In these days of high pressure we have often wondered how many overwrought brains would annually be saved, if we had, like the Quakers, to sit for some four hours weekly in silence before the Lord, enjoying "a sermon not made with hands," as Charles Lamb quaintly expresses it, and bathing the sore-fretted spirit, "tired even to sickness of the nonsense noises of the world," in a religious stillness.

Our space obliges us to pass over the teeny activities of Quakerism in the promotion of temperance, sanitary measures, adult Sunday-schools, drinking fountains, &c.; but we have said enough to show the advanced position Quakerism occupies in the modern Church, the standing witness it must ever be against sacramentalism and priestcraft, the wonderful works it has accomplished through its vital grasp on the old mighty truth, "I believe in the Holy Ghost, the Lord and Giver of Life." ELLICE HOPKINS.

From "The British Friend."

In Time of War Prepare for Peace.

In exchange for the well-known but very objectionable recommendation—"in time of peace prepare for war," we would propose the reverse as much more sensible—in time of war prepare for peace, that being the most seasonable period for the good purpose—the fearful atrocities necessarily connected with war, its enormous expense, and above all, its essentially iniquitous nature, so wholly opposed to the letter and spirit of Christianity, coming then so much more prominently to view.

The present war in the East has probably been marked by as frightful atrocities as any on record, as the subjoined extract so painfully and yet so partially illustrates: more minute detail of the barbarities perpetrated we shrink from narrating:—

THE RETREAT FROM SAITSCHAR—TERRIBLE SCENES.

The *Daily News*' special correspondent thus describes the retreat of the Servians:—It was a horrible nightmare, that march from Saitschar. Cannons roaring, flames lighting up the valley, gusts of thick smoke driven athwart the hillsides, the heaven's lightning flashing against the lightning of man, a narrow steep road crammed with fugitives fleeing from the cannon thunder, blinding smoke, women clamoring wildly that the Turk is close behind them, children shrieking or sobbing, animals—oxen, sheep, goats, swine, poultry—in an inextricable entanglement on the

Via Dolorosa. Ask these miserable panic-stricken fugitives, crushing forward as if the plague chased them, how they liked the war. No; ask this man with knitted brow and quivering lips, who, musket on one shoulder, child on the other, strides on through the mud, thinking of the crops on his acres that he leaves behind already golden with harvest hues. Ask these two soldiers, each with bullet-hole through their band, how they relish war, now as they tramp homewards—certainly not to glory. Is it not time to interfere in a struggle which is not war—breast to breast, man to man, weapon to weapon—but agony to fugitive women and children? To the nightmare of horror succeeded a day even more heartrending. For hours there raged on the lofty shoulders of Urtang, above thousands of exposed fugitive families, a thunderstorm of a violence I have never seen equalled in the tropics. Hailstones as big as walnuts dash down among the miserable creatures, already drenched and standing or lying in pools of water. The wail of children, the shrieks of the women, the rushing of horses and cattle amid the lurid gloom of this terrible storm seemed like a foretaste of the day of judgment.

As further assisting to prepare for peace, the following document seems calculated for good service, and we commend it to the thoughtful consideration of the electors in whose hands unquestionably the remedy rests for the extinction of so dangerous an element in the legislature of our country:—

THE HOUSE OF COMMONS IN 1876.

A careful analysis (by William Stokes) of the official returns for the present House of Commons gives these startling particulars:—

War members,	240
Commercial members,	142
Agricultural members,	133
Lawyers,	125
The war members consist of the following:—	
Captains,	77
Lieutenant-Colonels,	40
Colonels,	12
Majors and Major-Generals,	28
Lieutenants and Cornets,	19
War members by close family relationship,	17
Naval service,	9
Officially connected with the "Services,	38
	240

The representation of the people of Great Britain by the members of the present House is in the following proportions:—

	Population.	Electors.
The war members represent	12,750,769	969,720
The commercial members do.	7,960,076	929,383
The agricultural members do.	6,900,417	445,844
The legal profession represents	3,351,833	551,280

These calculations make it evident that the preponderating element in the Commons must ever be in favor of a large war expenditure!

The interest of the War Debt in 1876 is £27,700,000
The cost of the Army and Navy in 1876 is £27,035,000

Total, £54,735,000

It is thus evident that the British people are spending, for war purposes alone, above six thousand pounds an hour, by night and day, throughout the whole year! Is it wonderful that an increased income-tax is imposed upon the country? What besides can be expected

of such a policy? Englishmen! Do your duty and don't send more war members to the House of Commons.

The above may well be followed up by the speech of J. W. Pease, M. P. for South Durham, when in view of the recent extravagant which has not only prevented remissions taxation, but increased the income tax, said, that the present British army of regulars and auxiliaries of 526,000 is the largest peacetime establishment which this country has ever been asked to provide, and certainly, in his opinion, larger than the country requires. In 1873, the last year of Lord Cardwell's administration, the cost of the army was £13,200,000; and now, in 1876, it has risen to £19,989,000, being an increase in three years of £7,500,000. The army estimates having increased by three-quarters of a million, the navy estimates have also gone up £1,500,000 during the same time, besides a deficit of £281,000 in the navy appropriation accounts, being altogether an increase in these two services of £2,400,000.

At present it appears that there are 95,000 regular troops at home, besides 30,000 of the reserved forces, and the militia, volunteers and yeomanry, are all declared to be in an efficient and satisfactory state. These men are kept up in order to secure us against panic of which we have had three or four of late years. In 1858-9 there was the panic of French Invasion, when 180,000 volunteers were raised to keep out the French, and they still remain a standing memorial of the event. Another panic occurred at the outbreak of the Franco-German war, when Lord Cardwell asked Parliament to vote £2,000,000, and to increase the army by 20,000 men, who still remain on the army list.

The argument now is that the army is to preserve us from invasion. But we look around in vain to discover from what quarter we are to be invaded. In her speech from the throne, the Queen spoke of her relations with foreign powers as being "most cordial." But what can be more insulting to those powers than to say that, to guard ourselves from invasion from them, it is necessary to raise an army of 526,000 men? There are only three or four powers who can possibly invade us, namely, Germany, France, Russia, or America, and there is no human probability that any of them, in the lifetime of the present generation, will ever attempt the invasion of this country. France and Germany are arming against each other, and in Germany the people are almost rebelling against the strictness of the military rule which is enforced in order to maintain the country's position.

As regards this country, the panic argument and the invasion argument fall together. There never was a time when, apparently, we were more free from attack and when our diplomatic intercourse was carried on in a more conciliatory spirit than in 1876. The honor and dignity of the country are not consulted by maintaining unnecessary armaments in time of peace. By so doing we are acting in violation of the teaching of political economy, and we are inflicting upon our population the evils of war in time of peace. An army expenditure of £15,000,000 is an insurance premium out of all proportion to the risk we are running. We are asked to spend a million more than last year and £2,400,000 more than four years ago, and that at a time when the

of trade made it absolutely necessary that we should economise.

From the "London Friend."
Oath-taking and Truth-speaking.

For a century and a half Friends have not been greatly troubled in the matter of oaths. The case was widely different in the first fifty years of their history. During that period the sufferings entailed by their testimony against judicial swearing were severe indeed. Instances occurred where thieves who had stolen property were acquitted by the courts, and the prosecutor sent to prison because he objected to substantiate his evidence by oath. No device of persecutors was more successful in consigning innocent men to dungeons, and sometimes to death, than that of tendering to Friends the Oaths of Allegiance and Supremacy during the reign of Charles II. Men who never took any oath hatered had, on that account, to refuse to swear not to fight against the king, though, as well known, nothing would have induced them to bear arms for any purpose hatered.

At last the revolution of 1688 brought in a strain relief for tender consciences, who accepted the words of Christ, "Swear not at all," as of binding force and permanent obligation. The Parliament of 1696 passed a measure permitting Friends to give judicial evidence on simply affirming its truthfulness. This measure bestowed on Friends a great and well-deserved mitigation of suffering. It never introduced them to difficulties only as perplexing than those from which they had escaped. Instead of outside persecution, they were threatened by internal dissension. The controversy turned upon the definition of an oath.

An oath, according to John Milton, "is that whereby we call God to witness the truth of what we say, with a curse upon ourselves, either implied or expressed, should it prove false." The Affirmation Act of 1696, directed Friends to affirm their evidence in the words: "I do declare, in the presence of Almighty God, the witness of the truth of what I say." In the view of a large body of Friends these words did not constitute an oath. They contained no open imprecation for false speaking. No kissing of the Testament was required. This concession of the legislature to tender consciences was gratefully accepted by leading men like George Whitehead, and honorable women like Margaret Fox. An influential body of Friends, however, amongst whom was Thomas Story, thought this affirmation so near an approach to an oath that they could not conscientiously employ it. Thomas Story proved the reality of his scruples by suffering protracted imprisonment in the Fleet prison rather than take the affirmation. For more than twenty years London Yearly Meeting was greatly disturbed by this difference of view. It seemed as though the Society might have been rent in twain by the dissension it caused. Especially earnest were the two parties in the Yearly Meeting of 1715: one asking that the affirmation "should be established over all as the testimony of truth;" the other, that it should be testified "against as short of the testimony of truth." Thomas Story tells us how he and other like-minded men labored for peace, and in the end had the satisfaction of witnessing the fruits of their labor in this "good issue, that such as could

take the affirmation might have the benefit of it without censure of their brethren, and such as could not take it should not be reproached by them." In 1721, very much through the efforts of Friends who were satisfied with the affirmation of 1696—amongst others, John Gurney, Jun., John Eccleston, and Richard Ashby—an act of Parliament passed granting a form of affirmation acceptable to all Friends. So an occasion of extreme disquiet ceased, and a cause of offence was removed that had imperilled the unity of the Society. The Epistle of 1722, signed by Alexander Arscott, reflects the grateful feeling evoked by this happy termination of strife and dissension:—

"This one solemn assembly, with the affairs properly pertaining thereto, hath been held and managed in great love and peace, to our comfort; and living praises with humble thanksgiving have been herein rendered unto our merciful God, through His dear Son Jesus Christ, for His tender mercies and privileges we enjoy respecting our religious liberties.

"And, dear Friends, we cannot but with great humility acknowledge the goodness of God, in disposing the Legislature to grant us, the last session of Parliament, such form of affirmation as, by accounts received, we find very satisfactory to all the brethren, for which we are truly thankful to God, and to those in authority. And as we are well satisfied with the care of Friends in London, in their addressing the king thereupon, and thankful for his excellent and favorable answer, so also with their care in writing and dispersing the late Epistle of caution concerning the use thereof, which good advice this meeting recommends with the greatest earnestness, that there be no other than an honest and conscientious use made of this further indulgence granted to us.

"And, dear Friends, as the united solicitation for this case ought to be esteemed a token of the goodness of God, and to which the success we have been blessed with is greatly owing; so we earnestly desire that all Friends will thankfully embrace the present opportunity of cementing in a very close and brotherly fellowship one with another in the divine Spirit, and therein watch against all occasions of discord or breach of unity in any Quarterly, Monthly, or Particular Meeting; to the end Zion may continue a quiet habitation, the glory and presence of God rest and remain on her, and the spirit and doctrine of the Gospel may be lived in and maintained; and then we need not doubt of seeing truth prevail in the earth in our days, and the glorious and spiritual kingdom of our blessed Redeemer established in the hearts of men."

This chapter in the history of Friends is less widely known than it deserves to be. It constitutes a striking illustration of the excellence of patience and tolerance of conflicting views in respect to the application of a principle. The principle of truth-speaking under every circumstance, and of refusing to swear under any circumstance, were dear to all Friends. They differed as to the way of carrying out the principle. When a dispute is so embittered that it results in a disruption, like that which created the Free Kirk in Scotland, it is sure of lasting record in the pages of historians and the memories of men. In a smaller sphere the same thing holds good in respect to secessions that have occurred in the annals of Friends. The triumphs of forbearance and

mutual concession are at least as worthy to be remembered, and are not less teaching in their lessons. But, in the nature of things, they leave behind them less sharply-marked memories, and they more quickly fade into oblivion. Incidents, however, like that we have been speaking of, should be standing incentives to the cultivation of a large tolerance amongst those who do not see eye to eye in respect to the application of abstract principles approved by all. They warrant the hope that elements of difference that sometimes seem formidable may disappear, and be forgotten as completely as did one of the chief troubles to the Friends who lived under William of Orange, Queen Anne, and the First George.

For "The Friend."

The great Submarine Blast at Hallett's Point Reef or Hell Gate, in the East River, New York.

The explosion of near 50,000 pounds of dynamite and vulcan powder, at the depth of 30 feet below the surface of the water, on the 24th ult., whereby nearly three acres of rock were demolished, is an event in mining and blasting that is perhaps without any parallel hitherto, and deserves more than transient notice. For a full understanding both of the object, the modus operandi, and the results of this stupendous undertaking, it is necessary to advert to the condition of the locality and the history of the efforts made in past years to improve the navigation of this narrow but important passage between New York City and Long Island Sound. The following account is extracted from "The Science Record," for 1872, and the newspaper narratives of the later progress of the work.

"The Dutch skipper, Adrian Blok, in his new-built yacht, the *Ornust*, called that beautiful passage, which he was the first to explore, the *Helwegat Riviere*, after a branch of the Scheldt in his native Flanders. This was in 1615, six years after Hudson discovered the great river which now bears his name.

"Fifty years after, another Englishman wrote a description of the place called Hell Gate,* which being a narrow passage, there runneth a violent stream both upon flood and ebb, and in the middle lyeth some islands of rocks which the current sets so violently upon that it threatens present shipwreck; and upon the flood is a large whirlpool which continually sends forth a hideous roaring, enough to affright any stranger from passing that way, and to wait for some Charon to conduct him through.

"Through the main ship channel the water runs from two to two and a half miles an hour; through the middle channel, from four to seven miles; through the eastern channel, about three miles. Off Hallett's Point the tide sweeps at the fearful rate of eight or nine miles an hour; between Shell Drake Rock and Holme's Rock, from four to eight miles; below Pot Rock, from two to five. Unless favored with a commanding breeze, the early navigator found it impossible to control his vessel when once fairly caught in these furious currents, which were made ten-fold more perilous by cross-currents and countless circular eddies running into and overlying each other. To steer a vessel through these intricate passages, through which the water runs with such speed, breaks noisily even in the calmest

* From the German *Hort-Gat*, meaning whirl-passage or whirlpool-strait.

times upon the rocky shores and islands, and whirls in a thousand dizzying eddies, requires," says the government surveyor, "a cool head and a steady hand, even with the superior help of steam. But in a sailing vessel the greatest skill and self-possession, without a commanding wind, prove insufficient to guard against certain danger." More harm is suffered and more risks incurred here in a space of 2000 yards, than in all the rest of the navigable waters this side of New York to the farthest extremity of the Sound. Before any improvement was made in the channel, a thousand vessels a year were wrecked or seriously damaged by collision with its projecting rocks. Even now it is no uncommon thing to see two or three vessels go ashore on Fryng-Pan, Gridiron, or some other of its treacherous reefs, in the course of a single day.

But it is not so much the damage done to the light coasters that frequent the passage, as the exclusion of larger craft from this much needed entrance to the harbor of New York, that make the bars of Hell Gate so hurtful to our commerce. The fleets of ships and steamers that do our European carrying trade are now compelled to enter by way of Sandy Hook. The approaches to this entrance are stormy and perilous. The entrance is obstructed by a sand bar, over which vessels of large draught can not cross except at high tide, causing constant vexations, and expensive delays. The inner channel is crooked, shallow, and subject to shifting shoals, which make the passage uncertain and troublesome, if not dangerous. It was natural that the master minds of our commercial interests should covet the shorter and safer entrance through the Sound, so provokingly barred at Hell Gate. These obstructions once removed, a hundred miles of exposure to a dangerous coast would be shunned and an equal distance of smooth sailing gained; the route to Europe would be shortened by fifty miles; the tedious waiting for high water at Sandy Hook would be avoided, and a full day's time gained on every voyage. The far-reaching importance of these advantages, and the possible effect of them on the future of the city and country are simply incalculable.

In 1851, Mons. Maillefer submitted to the Chamber of Commerce an offer to remove three small but dangerous reefs—Pot Rock, Fryng Pan, and Way's Reef—for the sum of \$15,000, which proposition was formally accepted on the 18th of June following. His plan was entirely new. He dispensed with the slow and costly process of drilling—a process that seemed well-nigh impracticable in the furious tides of Hell Gate—and exploded his charges against instead of within the rocks to be broken up. When exploded in open air, gunpowder, it is well known, flashes upward and outward, doing little or no harm to bodies beneath. Under water the action is different. The superincumbent stratum offers such resistance to the passage of the gas evolved, that the shock of the explosion is determined in all directions, making it possible to shatter subaqueous rocks by surface concussion. The process was remarkably simple and within certain limits quite successful. The first blast was made on Pot Rock, on the 19th of August, knocking off some four feet from its highest projection. Originally, this obstruction rose to within eight feet of the surface at low water, and stretched like a dam across the

Gate, broadside to the current, at an average depth of ten feet, for a distance of 130 feet.

Mons. Maillefer's operations were continued intermittently, as funds were forthcoming, until March 26th, 1852, when, by a misplacing of battery connections, a canister of powder was exploded under his boat, instantly killing three men and disabling their chief. During this period 284 charges, containing in all 34,231 pounds of powder, were exploded on Pot Rock, removing 104 feet, and giving a depth of 184 feet. On Fryng-Pan and Way's Reef, 240 charges, containing nearly 27,926 pounds of powder, were fired, knocking off several feet from each. Six discharges of 125 pounds each reduced Shell Drake from 8 to 17 feet. A single discharge on Bald Heated Billy, a small but dangerous boulder, dry at low water, was sufficient to dislodge it, when it was split by drilling, and the two parts separately removed. Mons. Maillefer also destroyed, by eight discharges, two other small rocks in the neighborhood of Woolsey's Bath-House. The cost of these operations was about \$13,000, a small sum for the great improvement effected in the channel. The principal result came from the removal of the projection of Pot Rock. That secured a safe way for vessels drawing sixteen feet of water, and gave such increased facility for the passage of the rapid flood current that the violent boiling of the pot was greatly reduced, and the destructive whirlpool almost completely disappeared.

"Hell Gate has lost its terrors," was the jubilant report of Mons. Maillefer and his Danish co-partner, Captain Raasloff, in Aug. 1852, adding that it might be made the safest entrance to the harbor of New York, "if the necessary means be found to continue operations, which, from the very outset, have given such beautiful and important results."

Shortly after this appeal, an appropriation of \$20,000 was made by Congress for carrying on the work under the supervision of Lieutenant Bartlett, and subsequently of Major Fraser, of the Engineer Corps. This fund was soon exhausted, together with Mons. Maillefer's private capital, and the work came to an end.

When the war was over, the conversion of Hell Gate into a safe highway for commerce was again demanded; and the demand was so urgent, and so reasonable withal, that it could not be denied.

In the summer of 1866, Brevet Major General Newton was assigned by the War Department to the duty of examining these obstructions, with a view to their removal. His first report was made in January, 1867, giving elaborate estimates of the work required to make the channel what it should be—a safe passage way for all shipping, not a mere coaster's channel.

In June, 1868, an appropriation for public works for rivers and harbors was agreed to in Congress, from which an allotment of \$85,000 was made for the needs of Hell Gate. The lowest bidder was Sidney F. Shelbourne, of New York, to whom the contract was awarded in October. Mr. Shelbourne proposed to do the work by drilling and blasting, the machinery to be placed on the bottom and driven by a steam-pump placed on a vessel above. The rock was to be pierced by a rotating diamond drill driven by a small turbine wheel inclosed in a turtle-shaped chamber, blasted by charges of nitro-glycerine, and the

debris removed by a grappling machine. The current of water by which the first drill was driven did not give power enough on trial and the drill was abandoned for a larger one—the 'Mushroom,' of similar construction driven by steam. This drill was tried with partial success on Fryng-Pan, but it proved too delicate and uncertain of continuous action under the trying requirements of a rough work at Hell Gate, and one of entire different construction was substituted.

(To be continued.)

Selected.

Doth Satan tempt thee, either by pleasures dignities, or profits? O my soul, stand upon thy guard, gird on thy strength with sue thoughts as these:—What can the world profit me, if the cares of it choke me? How can pleasures comfort me? or, what advancement is this, to be triumphing in honor before the face of men here, and to be trembling with confusion before the throne of God hereafter? What are the delights of the world, to the peace of my conscience, or the joy that is in the Holy Ghost? What are the applauses of men, to the crown prepared by God? or, what is the gain of the world, to the loss of my soul? The vanity of the creature is far beneath the excellency of my soul; and the things of time not worthy to be mentioned with the things of eternity. Two masters, of such opposite principles as God and Mammon I cannot serve.

Two masters are too much for me;
Nor can the world with God agree;
Then, tempting Mammon, get thee gone,
And let me serve my Christ alone.

—Boagathy's Golden Treasury.

Danger of Kerosene.—It has been the hitherto almost undisputed doctrine that the safety standard of kerosene was the flashing point, the temperature at which it would give off an invisible vapor. It will not surprise those of our readers who take pains to think a little about the matter, to be told that, according to a recent address of Mr. Rufus Merrill, of Boston, before the American Chemical Society, every lamp in the land burning in a temperature of 75 or 80 degrees, oil of the igniting test required by law, 110 deg., is in an explosive condition, and liable, after burning for some time, to produce disaster. This he demonstrated by experiments, and also that oil of 150 deg. is in the same condition when burned inclosed in lanterns on shipboard and in railway cars. Between 5,000 and 6,000 persons, he alleged, perished last year, victims of kerosene, which should stand a test of 300 deg. to be safe. The explanation we presume to be that an oil so volatile as kerosene under continued heat, will give forth the explosive gas much below its actual flash point, much as spontaneous combustion may occur under favoring circumstances at temperature where ordinary instantaneous ignition would fail. It seems certainly reasonable that such should be the case, and, unless the statements of R. Merrill can be disproved, kerosene must be regarded as far more dangerous than the most earnest advocate for legal restrictions has heretofore supposed.—*Ins. Monitor.*

Sermons that proceed from the heart over even an unpolished tongue are likely to reach the heart, especially when they are seasoned with love and have the accompaniment of the Holy Spirit.

From "The British Friend."

The Present Depression of Trade, its Causes and Cure.
This question is thus ably treated by our friend James Cadbury, in an address just issued to the electors of Banbury.

We all know, I believe (says he), how bad is the home trade of the country is.

William Hoyle tells us that the cotton trade, which he calls the staple trade of the country, had a fair test of most if not all the other industries, has fallen off nearly 14 per cent. from 1860 to 1875, if we take into account the increase of the population during that period, or an increase of only $\frac{1}{2}$ per cent.; whilst the foreign trade "has been increased 36 per cent., or more than a third more in 1875 than was in 1860, or, in other words, an absolute increase of 50 per cent. loss of the home trade in 15 years as compared with the increase of the foreign trade.

The wealth of the United Kingdom in the year 1853-4 was rated to the Income Tax at £308,282,191, and in 1871-2 at £482,338,317; or an increase in 18 years of 56.46 per cent., or more than one-half. The rates of wages have increased perhaps in the same proportion, I say, at least, a quarter more.

We have now to look how this increase of property and income has been used, and whether there ought not to be abundance instead of want, and prosperity and increase instead of badness of trade. And we find that £1,500,000 was expended for cotton goods in 1875, but alas! alas! £143,000,000 for intoxicating drinks; that is, at the rate of 7s. 1d. per head upon cotton, and £4 7s. 4d. on drink, and this latter sum is proved as the drink bill of Great Britain, for the five years ending 1861 and 1875, shows:—

1857.—	£92,319,147	1871.—	£118,906,066
1858.—	88,148,335	1872.—	131,601,402
1859.—	92,892,557	1873.—	140,614,712
1860.—	86,897,683	1874.—	141,342,997
1861.—	94,942,107	1875.—	142,876,669
£155,199,829		£674,741,846	

We know that if 30 or 40 millions per annum are spent in consequence of a bad harvest and dear food, that our home trade suffers in proportion. What must it be with 43 millions abstracted from the labor and wealth of the country every year for alcoholic drinks, and all the burdens of increased taxation consequent thereon? If our foreign trade could lessen from its present enormous amount of £250,000,000 per annum (which means so much ready money brought into the country)—say of 70 or 80 millions, or even 100 millions, it would involve the country in ruin. But if we transferred the amount spent in drink to the home trade for the purchase and use of our own manufactured goods, we should be proportionally enriched; and seeing that in 15 years we have increased our drink bill from 92½ millions per year to 142½ millions, there is ample margin to do without foreign trade and to be the richer. Is there any satisfactory reason why the change should not be made? and, instead of spending on very man, woman, and child in the kingdom 5s. 1d. for cotton goods, and £4 7s. 4d. for strong drinks in the year, the figures should be reversed.

My good friends and neighbors, the remedy is in your own hands. Every man ought to be able to say whether he likes to have the drink shops next door to him or not, swallow-

ing down, as these are, such monstrous proportions of our wages and wealth; it being more than twelve times what is spent in drinks than for cotton goods, and other things in proportion. But you will say, How is this to be done? The answer is, to alter the law of the land, and give the ratepayers, instead of the magistrates, the right to determine how many, or if any, drink shops shall be established in one parish or district, or not.

Sel. ed.

CHRIST OUR PORTION THROUGH LIFE AND IN DEATH.

When, streaming from the eastern skies,
The morning sun salutes my eyes,
O, Sun of righteousness divine,
On me with beams of mercy shine!
Chase the dark clouds of guilt away,
And turn my darkness into day.

When to heaven's great and glorious King
My morning sacrifice I bring;
And, grieving o'er my sin and shame,
Ask pardon in thy Saviour's name;
Then, Jesus, cleanse me with thy blood,
And be my advocate with God.

As every day my weary spires
Will bring thy trials and thy cares,
O Saviour, till my life shall end,
Be thou my counsellor and friend:
Teach me thy precepts all divine,
And be thy great example mine.

When pain transfixes every part,
And languor settles at the heart;
When, on my bed, I lie in grief,
I turn and sigh, and long for rest,—
O, great Physician, mark my grief,
And grant thy servant sweet relief.

Should poverty's consuming blow
Lay all my earthly comforts low,
And neither help nor hope appear,
My steps to guide, my heart to cheer,—
Lord, pity and supply my need,
For thou on earth wast poor indeed.

Should Providence profusely pour
His various blessings on my store:
Oh! keep me from the ills that wait
On such a seeming prosperous state;
From hurtful passions set me free,
And humbly may I walk with thee!

When each day's scenes and labors close,
And wearied nature seeks repose,
With pardoning mercy richly blest,
Guard me, my Saviour, while I rest;
And as each morning's sun shall rise,
Oh! lead me onward to the skies!

And, at my life's last setting sun,
My conflicts o'er, my labors done,
Jesus, thy heavenly radiance shed,
To cheer and bless my dying bed;
And from death's gloom my spirit raise
To see thy face and sing thy praise.

—Grant.

Frosty Mines.—The *American Journal of Science and Arts*, contains an account of a curious fact, that the miners in Clear Creek county, Colorado, have discovered. It is particularly noticeable in the Stevens Mine, about 12,500 feet above the level of the sea, on McClellan Mountain. After a depth or distance of ninety feet from the surface, the crevice matter, in which the silver is found, is frozen solid. Summer and winter have no visible effect to change its temperature, nor is there ever any perceptible thaw. Pick and drill fail to work the frozen mass, and the only way the workmen proceed is to kindle a large fire at night against the matter, and in the morning to pick at the disintegrated ore. After this curious fashion the mine has been profitably conducted for two years.

From ninety feet, where the cold was struck, the tunnel has proceeded inward, now nearly 200 feet, and the cold is in no way diminished as yet. Other mines in the neighborhood show the same singular condition, and in all of them the depth under ground is such that the frost cannot possibly have penetrated there. The conclusion reached by the contributor of the article is, that it is a relic of the glacial era. Whatever its origin, it is certainly a singular and interesting fact, and the method of mining, although profitable, is as simple and primitive as could well be devised.

For "The Friend"

Copy of a Letter from John Thorp to Richard Reynolds.

Manchester, 8th mo. 1st, 1811.

My dear friend, It was very pleasant to me to receive a letter from thee, and such a letter in thy seventy-sixth year. I, who am seven years younger, feel the effects of old age both in body and mind; but let us not accuse ourselves or listen to the accuser of the brethren, because our faculties and powers are on the decline. Meekness, humility, and patience are a cure for all sores; our strength and powers are equal to all we have to do, or to all that is required of us. It is our departure from humble submission, and wanting to feel more of the fervor of devotion, not willing to live by faith, and possess our souls in patience, that is a fruitful source of much unprofitable anxiety. How much of this appears in the few diaries we have published; and, I am persuaded, in the experience of many pious people who suffer greatly, because they are unskillfully taught to believe, that if it were not owing to some omission of duty, they would more frequently, perhaps always, (particularly in meetings) be favored with these sensible feelings and enjoyments of heavenly goodness. Many, many, I believe, put on a much more painful pilgrimage, and experience many doubts and tossings, which would certainly be avoided by a wise attention to that holy precept, "in your patience possess ye your souls." To how many religious people might it be said by the blessed Master, as formerly to Peter, "O thou of little faith, wherefore didst thou doubt?" though it is by no means in our power to put ourselves into possession of those Divine consolations, that sometimes, in unmerited mercy, are vouchsafed. I wish to be thankful, truly thankful, to be favored to feel no condemnation. There is, I think, a great deal of comfortable instruction and truth in the remark, that "the Christian's crown in this life is hid under the cross, that we cannot see it," and doubtless laid up safely there for us when our warfare is accomplished. What cause have I to be thankful for this and a thousand other mercies; but to feel suitably thankful for favors, or compensation for our infirmities, is not at our command. How earnestly do I sometimes desire a more fervent, sensible feeling of gratitude for favors I have not deserved, and repentance for all I have done amiss; but, as I have said before, perhaps we may be too solicitous for these sensible fervors of devotion; my mind hath often been staid and comforted, in recollecting these observations of an experienced Christian, "Do not look for or expect the same degrees of sensible fervor; the matter lies not there; nature will have its share, but the ups and downs of that are to be overlooked; whilst your will-spirit

is good and set right, the changes of creaturely fervor lessen not your union with God." Farewell, my dear friend; may the Divine blessing comfort and support our declining years, and enable us to finish the little work that may remain for us to do: that finally we may be found worthy to enter into the joy of our Lord.—*John Thorp.*

From "The Atlantic Monthly."

Liberal Education for Women.

Unquestionably, when Matthew Vassar endowed the college at Poughkeepsie, in the hope of being "the instrument in the hands of Providence of founding and perpetuating an institution which shall accomplish for young women what our colleges are accomplishing for young men," he believed that the largest provision that could be made for students would be none too much. The men of two generations ago would not have been more incredulous of the possibility of colleges for women than the trustees of Vassar would have been incredulous had they been told, in 1861, that at the end of fifteen years the college would still be unable to sustain itself without the aid (or the encumbrance) of a preparatory department numbering nearly forty-two per cent. of all the students within the college.

No question of like importance and interest has ever changed its ground so completely in so short a time. The "Wanted, a liberal education for women" of ten years ago, becomes to-day, "Wanted, young women upon whom to bestow a liberal education."

It is idle to say that if the highest standard were off-red, young women would come forward. In the strong rivalries now existing between the colleges, that would have been done long ago, if it had been worth while. Michigan and Cornell and Smith would do it to-morrow if it were of any use. At Cornell, the great Sage College is ready for one hundred and forty students, but there are in all departments of the university but forty-three young women. Smith could minister but fifteen for its Freshman class. Wellesley, without Greek, found but sixty five for college students. At Michigan, in the whole undergraduate department there are but fifty-seven, and only twenty-five of these take the classical course. At Cornell there are but ten, and in the course requiring no Greek, only twelve. (These numbers are taken from the last catalogue.) For 1875, there were in the College of Liberal Arts of Boston University, sixteen.

We need hardly count in a review of "liberal education" those medical schools, &c., which only demand "a good English education" for a *resumé*.

Such a *resumé* may be discouraging to the enthusiasts of ten years ago, who resolutely closed their eyes to all but their own hopeful visions. That there are to-day but a hundred students where a thousand would be welcome by no means proves that the attempt for the liberal education of women is a failure. He who interprets thus reads the story only in the light of his own disappointment, or chafes in his impatience at finding that what he deemed only a sudden leap to a higher plane is a long and toilsome upward march. Still less will he render a just verdict who, mistaking the first stage of the movement for its last result, insists that because only the hundred come to-day, the thousand never will.

The over-sanguine hope and the too persistent doubt are alike wide of the truth.

It is almost a truism that all social progress is on parallel lines. There can be no great development in the education of women without corresponding opportunities for using it. To answer the question, "What shall we do with our girls?" at eighteen, by the reply, "Send them to college," only postpones it to return at twenty-two in the more emphatic form, "What shall these young women do?" The answer to the question can be inferred by putting another: "What would be the effect upon the colleges generally, if there were no greater number of *special* uses for college education by men than there now are for women?"

We have not space to follow out the argument, but whoever does will soon see plainly that until the future possibilities of life set the same premium upon college education for women which they now do for men, it is vain to expect that women in great numbers will have the firmness and the patience to overcome the hindrances, far greater than for men, which lie in their way.

There is another phase of the matter which merits attention. So long as the young women in college are pioneers in the work, there is a certain isolation which repels. There is a necessity, too, for a kind of mental armor against various contingencies, and though it is as likely to take the form of shyness and self-depreciation as of bravado, natures of finer grain are apt to shrink from it, unless impelled by an absorbing enthusiasm. Extreme theorists on the subject will scout the suggestion, but it is not to be lightly regarded.

The inability to meet expenses is of course a potent reason why so few women are yet in college. This is, however, only another form of the difficulty which we have stated as want of future opportunity. Whether this generation or the next will see the solution of the questions about occupation and remuneration may be doubted, but it is clearly the duty to-day of all friends of the higher education of women to unite their efforts to bring about two results. First, that we enter on no new experiments. Each theory is sufficiently on trial: let there be no further division of interests. Let it be said clearly enough and emphatically enough to reach the ear of every man or woman with a dollar to spare or to bequeath: found no more new colleges. Choose the best, or the nearest to you, of those we now have, and help that. The second is only the closer application of the first. Spend no more in walls and roofs. Give life, the living soul, to the colleges in professors and in students. Scholarships for women in any of the colleges we have named will be filled as fast as they are founded. The expense varies from about three hundred and fifty dollars at Michigan or Boston to five hundred and fifty at Vassar. Tuition at Michigan is of course free to students from that State. The large number of State scholarships at Cornell pays for the tuition there, but they are of course limited to New York students. Tuition at Boston or Smith is limited to all needing such help, so that the amount of help required by a student at any one of these places need not be much above half the cost of living. We place it thus low, far as it is agreed by all who have had experience in the matter that better material is obtained by offering less than the whole ex-

pense. Really promising students are sufficient enough to obtain something from their own exertions or from friends. It is the second hundred that they need. Not the first.

We specify *scholarships* because it is almost important that the aid be permanent. It ought to be in view of the student for years before she reaches it. If we may reason from the experience of Harvard as to the perennial good of this form of charity (witness the Penoyer scholarships), three thousand such letters entrusted to any one of these colleges will make possible the college education of one woman every four years for the next century. Nor are we thinking only of the personal gain of these students. No power so strong could be brought to bear upon the standard of the colleges, as the gift of a large number of scholarships, for nothing will so soon bring to the colleges themselves the ablest young women. We can think of no form of benevolence more attractive to ladies of wealth than this, for if but the half that is said of the power of an educated woman be true, nothing can so surely elevate the whole sex as the pursuit of liberal studies.

Selected for "The Friend."

When Cyrus took the king of Armenia and his son Tigranes, and their wives and children prisoners, and upon their humble submission beyond all hope, gave them their liberty and their lives—in their return home, as he were all commending Cyrus—some for his personage, some for his power, some for his clemency,—Tigranes asked his wife, "What thinkest thou of Cyrus? is he not a comel and a proper man, as of a majestic presence?" "Truly," said she, "I know not what manner of man he is: I never looked upon him." "Why," said he, "where were thine eyes at the while? upon whom didst thou look?" "I fixed mine eyes," said she, "all the while upon him," (meaning her husband) "who, in my hearing, offered to Cyrus to lay down his life for my ransom." Thus, if any question the devout soul, once indeed captivated by the world, but now enamored of Christ her heavenly Bridegroom, whether she is not charmed with the riches, pleasures, and gaieties of the world?—her answer is, That her eyes and her heart are now fixed on a nobler object, even on him who not only made an offer, like Tigranes, to die in her stead, but actually laid down his life to ransom her; and as her desire Bridegroom is now in heaven, her looks rest on him, and she can esteem nothing in comparison of him.—*Bogart's Golden Treasury.*

Cultivate Early the Habit to Work.—There is scarcely anything of greater importance to a young man than that he should acquire early the habit of regular application to some pursuit. Many persons who are not of a indolent nature live on, from day to day, from month to month, from year to year, without accomplishing anything worth while. They wonder that others are successful, and they are not; that others progress and they remain stationary. The difficulty with them is that although they are not particular,averse to labor, they have never learnt how to work to advantage. They have never formed the habit of regular, systematic application.

Desultory and merely impulsive efforts are attended by very insufficient and unsatisfactory results. The first requisite is to know

that you want to accomplish.—Have some purpose—some plan. Then see to it that the end does not set on a day in which something is not been done to promote that purpose, save, so far as possible, regular hours of work, and let no light interruption interfere with them. If you take a day's recreation, insure that on the morrow you promptly renew your work, and give to it the benefit of fresh strength and renewed vigor.

At the end of every week, regularly review your work. Consider just how much you have accomplished. If you are satisfied with what you have done it will bring to you a feeling of repose and content. If you find you should have done more, then make sure at the coming week shall show an improvement on the past.

If all young men now coming on the stage could scrupulously observe these simple directions, what an increase of success and of happiness there would be!—*N. Y. Letter.*

For "The Friend."

Having noticed in the 5th number of "The Friend," the article referring to an incident in the ministerial services of Spurgeon, the noted London preacher, it has recalled to my memory a circumstance which transpired when I was young; the relation of which I propose to give as affording another illustration of the Scripture declarations: "The preparations of the heart in man, and the answer of the tongue, are from the Lord." "The words of the wise are as goods and as nails, fastened by the masters of assemblies—*which is given from one Shepherd.*"

I give the substance of the occurrence. My father, who was an elder among Friends, resided in the city of Baltimore, a few dwellings below the late Dr. Thomas E. Bond, and on the same street. The doctor was a local teacher in the Methodist Society, and some time before his death senior editor, I believe, of the New York "Christian Advocate." On a summer evening my father was in the act of sitting in his arm chair on his front steps with more or less of his family about him. As Doctor Bond passed along going returning from his professional duties, he could often stop and have some pleasant or interesting conversation with him. One evening having stopped, he said to my father, "You did not know that I turned Quaker teacher last Sunday."

"Why no," said my father, "how was that?"

"Well, I will tell you. You know in the western section of the city we Methodists have a meeting-house called Caroline Street Meeting-house. To this place of worship it has become the fashion for young persons to largely sort on Sabbath afternoons. Well, last Sabbath afternoon I had an appointment to each there, and as the occasion was uncommon one, I thought I had better make more preparation in order to do it justice; for which purpose I selected my subject and text, and began to consider it, but did not get along with it. I could make nothing out of it; my mind became confused, and I thought perhaps was sick. I then concluded to try what making a few notes would do for me, but it amounted to nothing; the more I tried the more perplexed and confused I became, until last I was *sure* I was sick. Well, you may see I felt pretty bad and anxious; and but I could not do to turn aside from the appoint-

ment; and the people would be there and I'd have to go. So the prior week days passed along, and no relief came, and finally I concluded that I would make no further essay at preparation, but trust to Divine Providence for his help on the occasion. Accordingly I went to the meeting not knowing what might befall me. As perhaps you know, it is our practice to have some exercises in singing before the sermon. Entering the pulpit I gave out a hymn; still not knowing what I should do. While the congregation was engaged in singing this hymn, a passage in the Psalms suddenly presented itself to me with life or light, and I at once determined to make use of it for my subject and do the best I could. Accordingly I did so, and delivered my discourse from that text, and I do assure you I never preached a sermon more to my own satisfaction or the satisfaction, as I believe, of an audience, than I did on that occasion."

"Now," said the doctor, "if that was not turning Quaker preacher I doat know what would be."

The Bank of France.—Opening on the Rue de la Verilliere, and surrounded by the Rues Radziwill, Bailif, Croix-des-Petits-Champs, the Bank of France has occupied, ever since 1811, the ancient hotel of the Count of Toulouse. Its general aspect is that of a prison for good society. It shows many prospects of iron railings and iron doors, the latter being abundantly garnished with bolts and bars. Its high and solid walls would defy any attempt to scale them, and every issue of the building is made for a defence which could only be vanquished by a regular siege proceeding with the engines of war. Within, the place is as active as an ants' nest. Every passage and staircase of the building is crowded during all the business hours of the day, and an incoming multitude elbow an out-going host in each direction. None but people in a hurry are to be seen there; so at every door and landing place are posted ushers ready to reply immediately to questions asking the way to different points in the labyrinth. Yet the edifice is daily growing larger, and the palace which sufficed for the wants of legitimate princes is too small for this temple of trade. Nowhere are so many varieties of people to be met with as within the precincts of this universal assembly house. Every class of society is represented there—soldiers, artisans, shopkeepers—from the capitalist who comes to receive the dividend on his shares, to the workman who has to pay an acceptance for a few francs which he has given for his tools. The first impression made on a stranger by the Bank of France is one which inspires good will for an establishment which, having only in view the public interest, impartially tries to be useful to every section of the community.

It was in 1800, the 24th Pluviose, year VIII, that certain bankers formed themselves into a company which became the Bank of France. The principal of them were Perregraux, Le Conteux-Canteleu, Mallet, the elder, Lecamier, husband of the charming wife, and Robillard, a tobacco manufacturer. The commercial gentlemen speedily agreed upon the statutes of a financial institution, which was to have a capital of 30,000,000 francs, or \$6,000,000, divided into 30,000 nominative shares. The business of the company was restricted to discounting, collecting bills, re-

ceiving deposits and consignments, keeping current accounts, and issuing drafts at sight to bearer; all other trade but that in gold and silver was forbidden. In the primitive statutes of the bank may still be observed, in a rudimentary state indeed, but very clearly, the system which has secured to it an almost uninterrupted career of prosperity to this day. On the 28th of Nivose, or as early as the 18th January, 1800, a Consular decree deposited a large amount of government money with the new bank, and on the 24th Germinal, year XI, or 14th April, 1803, it was definitely organized by law, under the style and title of the bank of France, its capital being raised at the same time to 45,000,000 francs, or \$9,000,000.—*Ledger.*

The famous Edlystone Lighthouse, off the coast of Cornwall, England, was first built in a fanciful way, of wood, by the learned and eccentric Winstanley. On its side he put various boastful inscriptions. He was very proud of his structure, and from its lofty balcony used boldly to defy the storm, crying:—

"Blow, O wind! rise, O ocean! break forth, ye elements, and try my work!"

But one night the sea swallowed up the tower and its builder. It was built a second time of wood and stone, by Rudyard. The form was good, but the wood gave hold for the elements, and the builder and his structure perished in the flames.

Next the great Smeaton was called in. He raised a cone from the solid rock on which it was built, and riveted it to the rock, as the oak is fastened to the earth by its roots. From the rock of the foundation he took the rock of the superstructure. He carried upon it no boastful inscriptions like those of Winstanley, but on the lowest course he put,—"Except the Lord build the house, they labour in vain that build it;" and on its keystone above the lantern, the simple tribute, "*Lus Deo!*" and the structure still stands, holding up its beacon light to the storm tossed mariner.—*Lute Paper.*

Teach me to live Thy purpose to fulfil;
Bright for Thy glory let my taper shine—
Each day renew, remind this stubborn will;
Closer round Thee my heart's affection twine—
Keep me unspotted while a pilgrim here;
Then bring me, sinless, to the heavenly sphere!

Love descends, not ascends. The might of a river depends not on the quality of the soil through which it passes, but on the inexhaustibleness and depth of the spring from which it proceeds. A parent loves the child more than the child the parent, and partly because the parent's heart is larger, not because the child is worthier. The Saviour loved his disciples infinitely more than his disciples loved Him, because his heart was infinitely larger. Love trusts on, ever hopes and expects better things, and is a trust springing from itself, and out of its own deeps alone.—*Roseland Hill.*

Men bear with each other's faults and virtues for years, and shoot each other for a careless remark. A man bears with his wife's faults, and the wife with her husband's shortcomings, for a score of years, and flash up in an unlucky minute about the merest nothing, to undo the work of all the year—to forget the tender memories—to repudiate the affection

—to sneer at the idea of love.—*Church Ad- vocate.*

THE FRIEND.

TENTH MONTH 7, 1876.

Information has been received of another Conference having been recently held, this time by a number of Friends, members of the Kansas Yearly Meeting; in which the condition of the Society in their own and other Yearly Meetings, produced by departures from the faith of Friends, was seriously considered. Also what is called for at the hands of those, who—to use their own words—feel "the necessity of Friends every where becoming more earnest to stand unflinchingly in the maintenance of our principles and testimonies, as a Society." Firmly believing that if we be found building up the things which God commanded our early founders to destroy, or destroying the things which He commanded them to build up, we make ourselves transgressors."

We rejoice that the time has come, or appears to be close at hand, which has long been seen by the eye of faith, when true Friends in other Yearly Meetings than Ohio and Philadelphia, did it laid upon them to come forth boldly, in support of the doctrines and testimonies which the Head of the Church raised before the world; also to bear an "unflinching" testimony against the spurious religion that many in high places have been industriously and persistently striving for years to substitute for the original faith and practices of Friends.

It is of the highest importance that all everywhere who may thus stand forth in the defence of the truth, may know their own spirits to be seasoned with Grace, and be kept out of the snare of the fowler; possessing their souls in patience; willing to suffer at the appointed time whatever the Lord may permit to come upon them; that so they may know every step to be taken in the meekness of wisdom, and the arm of the Lord to support and protect them. The Lord will work for his own blessed cause and who can let or hinder him?

SUMMARY OF EVENTS.

FOREIGN.—The prospect of an early termination of the war between Turkey and Servia and Montenegro is again clouded. At the request of the great Powers Turkey offered a short extension of the armistice, but both Servia and Montenegro declined to accept it, preferring a continuance of the struggle.

A dispatch from Belgrade says the English Consul renewed his peaceful representations and urged the Servian government to accept a prolongation of the armistice for four days. The government refused. The Serbian forces under General Thermagey and Popovich simultaneously attacked the Turks and pursued them beyond Tschitz. During the engagement fire from the Servian artillery ignited seven caissons of gunpowder in the Turkish ammunition depot. The explosion caused fearful havoc among the Turks. The Servians lost about 2000 men in this battle. The assumption of the title of king by Prince Milan of Servia, is objected to by both Russia and Austria. The Austrian Prince Minister has demanded I Prince Milan's positive refusal of the royal title which the army and people wish him to take.

The Porte has asked to be relieved of the Bulgarians and has also taken measures for the rebuilding of their villages which the Turks had destroyed.

A Berlin special says: The Porte has given Baring, Secretary of the British Legation, a seat in the mixed tribunal trying persons accused of participation in the

Bulgarian atrocities, with all the rights accorded the other judges.

It is stated that Queen Victoria has seen a change in the occupancy of every European throne since she became sovereign.

A Melbourne, Australia, dispatch says, the Daningon, from Melbourne to Sydney, foundered near the Bay Bridge, near Inverurie on the 21st. Sixty of the crew and passengers were drowned. Jervis Bay is on the east coast of Australia, 85 miles south of Sydney.

At a recent meeting of the Reform Club in Manchester, John Bright said he thought the meeting of Parliament was desirable. It would result in a new policy in regard to Turkish affairs, and make a solemn decision that the blood and treasures of England should never again be wasted in behalf of the Ottoman power. Turkey should be left to the fate which Providence had decreed for her corruption and tyranny.

The United States Frigate Franklin having been authorized by the Navy Department to receive William M. Tweed as a passenger, the Spanish authorities at Vigo put the fugitive on board that vessel which is now on the passage to New York.

It is stated that Don Carlos has informed the French Emperor that he would not re-enter Spain at the cost of another civil war, and will quit Paris for Belgium or Switzerland in a few weeks.

The Colorado potato beetle has made its appearance in Sweden and commenced its usual ravages. The insect is supposed to have been brought from the United States to the continent of Europe.

A sanguinary battle occurred on the 31st of eighth month, in New Granada, between the government forces and those of the revolutionary or conservative party. After a fierce contest the latter were completely routed with the loss of a thousand men killed and a million dollars worth of arms and munitions.

According to recent enumerations the population of Peru is now 2,720,735, that of Norway 1,515,000, and Sweden 1,383,291.

The island of Porto Rico was visited on the 13th ult. by a very violent hurricane which caused great damage to the island and its lands. Numerous villages were wrecked and many lives lost.

London, 10th mo. 2d.—Consols 95 11-16. U. S. sixes, 1867, 108 3/4.

Liverpool.—Middling uplands cotton, 5 15-16d. Orlean, 5 1/2.

UNITED STATES.—The International Exhibition was visited during the week ending 9th mo. 30th, by 678, 893 persons who paid for admission. The receipts at the gates from the opening up to 9th mo. 29th, had amounted to \$2,158,945.

The total number of interments in Philadelphia for the week ending 9th mo. 23d, and 281 for that ending the 30th ult.

The decrease in the national debt between 31 mo. 1st, 1869, and 9th mo. 1st, 1876, a period of six and a half years, has been \$490,254,318. The decrease in the annual interest has been \$31,253,548.

The yellow fever which for some weeks past has been so fatal in Savannah, Geo., has appeared in other southern towns also. Brunswick, Geo., about 80 miles from Savannah, has been desolated by the pestilence.

The Commissioners to treat with the Sioux Indians have obtained the assent of those residing near the Spotted Tail agency, to the agreement recently made by them with those at the Red Cloud Agency. The Indians gave their consent very reluctantly, and complained of the broken promises of the government and the injustice with which they were treated.

The U. S. Treasury Department has paid out between nineteen and twenty millions of dollars in silver coin for the redemption of fractional currency, &c.

The total number of exhibitors at the International Exhibition is 30,864. Of these 3822 are Spanish, 2580 French, 2100 American, 1422 Prussian, 1077 Prussian, 1083 Germans, 1144 Italians, and 1397 Argentine Republic. Beside these China, Japan, Brazil, Mexico and many other countries send collections. Eight thousand one hundred and seventy-five of the exhibitors belong to the United States, and 22,089 are foreigners. On the 28th ult. the exhibition received by no less than 251,332 persons who paid for admission, being 5387 at the cattle show.

The U. S. States Signal Office at Philadelphia reports a rainfall of 8.77 inches during the Ninth month. The highest temperature of the month was 88 deg., and the lowest 46 deg.

There were 450 deaths in New York city last week. The sub-marine operations upon the rocks at Hell Gate, New York, are reported successful. Soundings were taken on the 30th ult. in ninety places and beyond the

distance of 150 feet from the shore a depth of 25 fms.

The total number of interments at Savannah on the 30th ult. and 1st inst. was 61, of which 34 were for yellow fever. On the 21st inst. there were 42 interments of which 28 were from the fever.

The monthly statement of the national debt shows a reduction of \$2,936,267 at the Ninth month. The cash in the Treasury consisted of \$64,091,124 in gold and \$12,524,945 currency.

The Markets, &c.—The following were the quotations on the 2nd inst. New York.—American gold, 1 Superfine flour, \$4.70 a \$3.05; State extra, \$3.25; \$3.90; finer brands, \$3.75 a \$3.50. Amber wheat, \$1.25; No. 2, 1.20; Milwaukee spring, \$1.21; No. 3 do., \$1.20. No. 2 Chicago, old, \$1.12. Yellow and mixed corn, 58 1/2 cts. Canada barley, \$1.19 a \$1.20; State, 95 cts \$1.00. Oats, 38 a 45 cts. Philadelphia.—Cotton, 1 a 1 1/2 cts. Superfine flour, \$5.25 a \$4.00. Family flour \$6.50 a \$5.00. finer brands, \$7 a \$8.50. Best wheat, \$1.12 a \$1.22; amber, \$1.23 a \$1.25; white, \$1.28 a \$1.24. Rye, 78 cts. Mixed corn, 57 a 58 cts; yellow 59 a 60 cts. Oats, 36 a 50 cts. Clover-seed, 10 1/2 a 11 cts. 1 lb. New York fine cheese, 12 a 13 cts. About 58 beef cattle sold at 5 1/2 cts. per lb. gross weight, a few of the finer brands, \$3 a \$3.50. Cows, 10 a 12 cts. for common. Sheep, 5 a 5 1/2 cts. per extra. Receipts 13,000 head. Hogs, \$8.75 a \$9.25 per 100 net. Receipts 5000 head. Baltimore.—No. 2 western wheat, \$1.23 a \$1.25; No. 3 do., \$1.18 a \$1.2. Maryland amber, \$1.30 a \$1.32. Yellow corn, 56 a 57 cts. Oats, 40 a 45 cts. Cotton, No. 2 spring, \$1.07; No. 2 do., 30 cts, 91 a 91 1/2. No. 2 corn, 44 1/2 cts. No. 2 oats, 33 1/2 cts. Barley, 83 1/2 cts. Lard, 10 1/2 cts.

RECEIPTS.

Received from Lydia T. King, Pa., \$2, vol. 50, and from Joseph E. Mickel, Jr., Jones, from William W. ster, Pa., per Joseph W. Jones, \$2.10, to No. 11, v. 51; from Hannah Roberts, Pa., \$2.10, vol. 50; from Pemberton Moore, Pa., \$2.10, vol. 50; for Mary I. Humbleton, Io., and Amy C. Hoopes, Edward H. Ha and James G. Johnsons, Pa., \$2.10 each, vol. 50; from Isaac A. Agert, Jr., Pa., \$2.10, vol. 50; and for Lewis and Bye, Fleming Crew, Amy John, Burwell Peck, Henry Crew, Ann Smith and Jesse Hutt, \$2.10 each, vol. 50; from John Boadle, N. J., \$2.10, vol. 50; from Abel J. Hopkins, D., \$2.10, vol. 50; from Elizabeth Beall, Pa., \$2.10, vol. 50; from John A. Resder, Io., \$2.10, vol. 50, and for R. B. Cox, \$2.10, vol. 50; from Henry Wood, N. J., \$2.10, vol. 50; from Anna Mae, Io., per Stacy Cook, \$2.10, vol. 50; from James Cooper, Pa., per S. A. Cooper, \$2.10, vol. 50; from Joseph W. Lippincott, City, \$2, vol. 50; for Hora Sumner, Pa., \$2.10, vol. 50; for Isaac C. K. Felt, \$2.10, vol. 50; for Richard Chambers, City, at Richard M. Chambers, Pa., \$2 each, and George J. Chambers, Pa., \$2.10, vol. 50; from George Babb N. J., \$2.10, vol. 50; from Benjamin Ellison, Io., \$2.10, vol. 50; from Owen Evans, Pa., \$2.10, vol. 50; from John W. Pugh, Pa., \$2.10, vol. 50; from Henry W. Babb, N. J., \$2.10, vol. 50; from Thomas C. Hogue, Pa., \$2.10, vol. 50; from Ephraim Tomlinson, N. J., \$2.10, vol. 50; from Richard W. Hutton, Pa., per Benjamin W. Passmore, \$2, vol. 50; from Samuel Woolman, De \$2.10, vol. 50, and from Barzillai French, O., \$2.10, vol. 50.

THE CORPORATION OF HAVERFORD COLLEGE.

A Stated Annual Meeting of The Corporation of Haverford College will be held at the Committee Room of Arch Street Meeting-house, Philadelphia, on Monday, Tenth month 16th, 1876, at 3 o'clock P. M.

EDWARD BETTLE, Jr., Secretary.

WEST-TOWN BOARDING SCHOOL.

The WEST-TOWN BOARDING SCHOOL, which Institution opens a Second-day, 10th mo. 30th. Parents and others intending to send pupils will please make application to BENJAMIN W. PASSMORE, Sup't. (Address Street Room No. 4, Chester Co., Pa.) or to CHARLES J. ALLEN, Treasurer, No. 304 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

For "The Friend."

Mission of George Bogle to Tibet.

Tibet is a country so inaccessible to Europeans from the jealous policy of the Chinese to whom it is subject, as well as from its actuality on the most elevated plateau on the surface of the earth; that one naturally turns with eager curiosity to every new publication throwing light on its history and the character of its people. The narrative of Bogle's ventures is now first given to the world, though the mission itself dates more than a century back.

Commercial intercourse between Bengal and Tibet had existed for many generations; and was dependent on the friendliness of the tribes inhabiting the southern slopes of the Himalaya mountains; which lie between the plains of Bengal and the high lands situated between the different ranges of the mountains. This intercourse was greatly interrupted in the latter part of last century, by the extension of the power of the Gorkhas, a warlike tribe who obtained possession of the valleys and mountain passes of Nepal, by which much of the traffic had been carried on. Warren Hastings, who was then Governor General of the possessions of the East India Company, was a statesman of great ability, though somewhat unscrupulous in his proceedings. He saw the importance of cultivating the trade with Tibet; and with this object selected George Bogle, a young Scotchman, and sent him on a mission to that country.

The materials for the present narrative were principally found in the journals, memoranda and correspondence of G. Bogle, which have been carefully preserved by his family in Scotland, and were placed in the hands of the editor, Clements R. Markham.

In 1772 the people of Bhutan had made warlike incursions into the plains, but were driven back by the English troops which followed them into their own mountains, and so alarmed the Bhutan Government, that they requested the intercession of Tesbu Lama, of Tibet, who claimed supremacy over them. He, in consequence, wrote to Warren Hastings, who graciously acceded to his request. The letter which was received in the Third month of 1774, is here inserted, as an interesting specimen of Eastern correspondence, and as furnishing evidence of the mild and amiable character of the Tesbu Lama.

"The affairs of this quarter in every respect flourish. I am night and day employed in prayers for the increase of your happiness and prosperity. Having been informed by travellers from your quarter of your exalted fame and reputation, my heart, like the blossom of spring, abounds with gaiety, gladness, and joy; praise that the star of your fortune is in its ascension; praise that happiness and ease are the surrounding mollest of myself and family. Neither to molest nor persecute is my aim; it is even the characteristic of my sect to deprive ourselves of the necessary refreshment of sleep, should an injury be done to a single individual. But in justice and humanity I am informed you far surpass us. May you ever adorn the seat of justice and power, that mankind may, under the shadow of your bosom, enjoy the blessings of happiness and ease. By your favor, I am the Rajah and Lama of this country, and rule over numbers of subjects, a particular with which you have no doubt been made acquainted by travellers from these parts. I have been repeatedly informed that you have been engaged in hostilities against the Deb Judhur, to which, it is said, the Deb's own criminal conduct, in committing ravages and other outrages on your frontiers, has given rise. As he is of a rude and ignorant race (past times are not destitute of instances of the like misconduct, which his own avarice tempted him to commit), it is not unlikely that he has now repented those instances; and the ravages and plunder which he may have committed on the skirts of the Bengal and Bahar provinces have given you provocation to send your vindictive army against him. However, his party has been defeated, many of his people have been killed, three forts have been taken from him, and he has met with the punishment he deserved; and it is as evident as the sun your army has been victorious, and that, if you had been desirous of it, you might, in the space of two days, have entirely extirpated him. For he had not power to resist your efforts. But I now take upon me to be his mediator, and to represent to you that, as the said Deb Rajah is dependent upon the Dalai Lama, who rules in this country with unlimited sway (but on account of his being in his minority, the charge of the government and administration for the present is committed to me), should you persist in offering further molestation to the Deb's country, it will irritate both the Lama and all his subjects against you. Therefore, from a regard to our religion and customs, I request you will cease all hostilities against him, and in doing this you will confer the greatest favor and friendship upon me. I have reprimanded the Deb for his past conduct, and I have admonished him to desist from his evil practices in future, and to be submissive to you in all matters. I am persuaded that he will conform to the advice which I have given him, and it will be necessary that you treat him with compassion and clemency.

As to my part, I am but a Fakir, and it is the custom of my sect, with the rosary in our hands, to pray for the welfare of mankind, and for the peace and happiness of the inhabitants of this country; and I do now, with my head uncovered, entreat that you may cease all hostilities against the Deb in future. It would be needless to add to the length of this letter, as the bearer of it, who is a Gosain, will represent to you all particulars, and it is hoped that you will comply therewith. In this country worship of the Almighty is the profession of all. We poor creatures are in nothing equal to you. Having a few things in hand, I send them to you by way of remembrance, and hope for your acceptance of them."

The people of Tibet are disciples of Buddha. This religion inculcates peace and good will to man, and to all the animated creation. It became firmly established in Tibet in the seventh century of the Christian era. The peculiar phase of it which the Tibetans adopted, taught that certain intelligences had been created, who continued to remain in existence for the good of mankind, by passing through a succession of human beings from the cradle to the grave. In the fourteenth century, two distinguished reformers arose among them, who were believed to be incarnations of these beings. On the death of these, successors were found in infants possessing certain marks which are believed to indicate their divinity. There are thus two concurrent Lamas; one resides at Lhasa, the capital of the country, and is regarded as both the spiritual and temporal ruler of the nation; possessing power somewhat analogous to the medieval Popes; the other resides at Tesbu Lumbö. The inferior Lamas—corresponding to the priests, monks and nuns of the Catholic hierarchy—are very numerous, more than 10,000 monks being congregated in one monastery alone.

Their religious services consist of recitations and chanting of moral precepts and rules of discipline to the sound of musical instruments. Incense is burnt during the services, and there are offerings of fruits and grain to Buddha and his incarnations. Mystical sentences and titles of Buddha are also recited. The bell is used during the performance of service; and prayer-wheels,—metal cylinders, containing printed prayers in rolls, with the axes prolonged to form handles—are in constant use, not only during the service, but on every occasion, being fixed in rows on the walls of temples, near villages, and in streams to be turned by water. The prayer-wheels have been in use for more than a thousand years.

The Tibetans possess a vast literature. For many centuries they have known the art of printing, by means of engraved stereotyped wooden blocks. Their paper is made from the inner bark of the *Daphne cannabina*, and is remarkable for its toughness, as well as smoothness. Each monastery possesses a library of their religious works.

Warren Hastings, in his reply to the letter received from the Teslu Lama, proposed a treaty of amity and commerce between their respective States; and it was to promote this object that he sent David Bogle on his mission.

He reached Babar, the N. E. boundary of Bengal about the last of the Fifth month, and entered the mountainous country of Bhutan, through which his route lay. The following extracts are taken from his journal:

"On the 9th of June I entered the hills, and being now out of Bengal and beyond the Company's jurisdiction, I was furnished with a passport from Deb Rajah, who is the chief of the country. The following part of the journey was a perfect contrast to the former.

"The only way of transporting goods in this hilly country is by coolies. The roads are too narrow, steep and rugged for any other conveyance, and the rivers too stony and rapid for boats. There is no particular class of people who follow this profession. The carriers are pressed from among the inhabitants, receive an allowance for victuals at the pleasure of the person on whose service they are employed, and are relieved by others procured in the same manner at the next village by order of the headman, without which not a coolie is to be had. This is a service so well established that the people submit to it without murmuring. Neither sex, nor youth, nor age exempt them from it. The burden is fastened under the arms upon their backs, with a short stick to support it while they rest themselves. Naturally strong, and accustomed to this kind of labor, it is astonishing what loads they will carry. A girl of eighteen travelled one day 15 or 18 miles, with a burden of 70 or 75 pounds weight. We could hardly do it without any weight at all.

"We were provided with two tangu ponies of a mean appearance, and were prejudiced against them unjustly. On better acquaintance they turned out patient, sure footed, and could climb the mountain. Many a time afterwards, when on the edge of a precipice, I was mounted on a skittish young horse, by a man holding him by the head and another steering him by the tail, have I thought of them. We had to cross the mountain Pichakonum, which hangs over Buxa-Duar; the way a narrow path, extremely steep, which went winding round the side of it; the upper part paved with stones of bastard marble, put together like ill-formed steps. Midday, cold and chilly; very high precipices, but not frightful, because covered with trees. Indulged in the pleasure of tumbling down stones.

"The road led almost to the top of the mountain, and before we crossed it I turned to take another look at Bengal. It is impossible to conceive any change of country more abrupt, or any contrast more striking. To the southward the atmosphere was clear. The eye stretched over a vast tract of land, and the view was bounded only by the circular horizon. This part of the view, however, is striking only because it is extensive. There are no hills, spires, or other objects to distinguish it. The country—one continued flat—is marked only by its being cleared or woody, by the course of the rivers, or by some smoking villages. Whether it be that I am partial to hills or not, I beheld the opposite part of the prospect with much greater pleasure. The rapid descent, the deep gneiss,

the hills covered with trees the most lofty and luxuriant, the town of Buxa-Duar immediately below at a great distance, and behind nothing but mountains with their tops hid in the clouds."

"They shelter Bengal from the northerly winds which blow over Tartary, all the way from Novaya Zemlya, and give them moderate winters; and they serve to keep off the hot southerly monsoon from the Bhutanese, and preserve them cool when the sun is within six degrees of them. The climate accordingly changes in the most rapid manner, and Muring, which is not above two days' journey from the entrance into the hills, produces apricots, peaches, apples, pears, mulberries, and even oaks.

"At the place where the road crosses the mountain, standards or banners are set up, of white cloth, with sentences written upon them. They denote something religious, and are common at the tops of hills."

(To be continued.)

From "Piety From A. D."

John Thorp.

John Thorp was born at Wimslow, in the county of Chester, on the 5th of the Eleventh month, 1742. He was the youngest son of Jonathan Thorp, a farmer, who left but little property. His father dying before he was born, the charge of his maintenance and education, with that of several other children, devolved upon his mother, whose maternal care and affectionate solicitude under the trying circumstances in which she was thus placed, he frequently mentioned with feelings of filial gratitude. His parents were members of the Church of England, in profession with which he was educated. He was, from very early life, sensible of the workings of the evil of his own heart, and also of the manifestation of the divine principle of light and grace, which showed him the evil. He felt that this world is not the place of rest for man, but that it is designed by Infinite Wisdom, as a preparation for a state of uninterrupted happiness; and that this great work can only be effected by taking up the cross to all the corrupt desires and passions of our fallen nature.

Under these religious impressions, he believed it to be required of him to decline the practice of singing, in which he had taken great pleasure; he had been a noted singer in that called the parish church of his own village. He continued some time longer to attend that place of worship; but being convinced that as God is a spirit, they who worship Him must worship him in spirit and in truth, the forms and ceremonies practised there did not furnish that edification and comfort which his soul longed for. His regard, however, for, and his sense of duty to his tenderly affectionate mother, made the thoughts of separating from her in the solemn and important duty of public worship, very trying to him; though at times, when present with her, he was so much distressed, and felt such strong convictions that his was not in his proper place, that, to use his own words, his knees have been ready to smite together.

In a lively remembrance of this season of early and divine visitation to his soul, he remarked a few days before his decease, that he had never since, for a moment had to doubt the certainty of those convictions which were thus at a very early age, so remarkably and indelibly stamped on his mind; and that

shortly afterwards he attended a meeting at Friends at Morley, a village about two mil distant from his native place, where he four publicly professed and advocated, as the principles of a religious community, doctrine consonant with the convictions which he operated so powerfully on his mind. He added, at the time when he made these observations, that if he were only preserved in the way of his duty to the end, he should have cause to rejoice that his lot had been cast amongst them.

Continuing to attend the meetings of Friends, he was, when at the age of twenty admitted a member of our religious Society Soon after he removed to London, where he resided about four years; and in 1767 he settled at Manchester, was married not long after, and was an inhabitant of that town the remainder of his life.

During his residence in the metropolis he lived much retired. A relation who accompanied him from the country, and with whom he had joint lodgings, and his eldest brother an officer in the army, a man of talents and general knowledge, formed, for some time nearly the extent of his acquaintance. With these companions who were his superiors in information and learning, he at times delighted to converse; but through divine help, he inflexibly resisted all their persuasions and entreaties to deviate, in any one instance from that steady and uniform religious practice of life and manners which he believed it to be his duty to adopt. He occasionally accompanied them in an evening walk; but they gave way to any levity of conduct, or turned aside into any tavern or place of diversion, he immediately left them and returned to his lodgings.

This decision of character appears to have been blessed. May it encourage others who are exposed to similar temptations, to adopt and persevere in the same holy resolution. Young men who are thus circumstanced, have a claim on the kind notice of their friends; but if they do not always receive this attention, let them remember that if, with fervency and humility of heart, they look unto their gracious Redeemer, he will guard them from all that is evil.

For some years after his admission into our Society, John Thorp had to pass through much spiritual conflict; continuing to find that there were in his heart propensities opposed to that state of humble resignation which, by the divine light, had been so clearly shown to him as necessary to be attained; but through the effectual operation of the grace of God, he was enabled to persevere in taking up his cross and prepared for service in the church of Christ.

He first appeared as a minister about the thirty-second year of his age. He was reverently concerned to wait before the Lord, in the exercise of the gift entrusted to him; his powers of expression were strong and persuasive; and these being sanctified by divine grace, he was qualified affectionately to entreat others to come to that Fountain of mercy, by which he had been often refreshed and strengthened. But the most prominent and frequent subject of his gospel labors was, closely recommending to all an earnest, serious, and impartial examination into the state of their own hearts, in order to see how their accounts stood with God; and setting forth how great and irreparable would be the loss,

to those who unwisely neglect the opportunity afforded, of embracing the all sufficient means appointed for their redemption.

Being early convinced of the danger of seeking for the treasures of this world, he was content to remain in a comparatively low station. That he might not be unnecessarily encumbered with the cares of trade, and that he might be more at liberty for the service of his Divine Master, he steadily declined, though with an increasing family, the offers that were made to him to enter more extensively into business, and the repeated and earnest solicitations of his friends that he would accept them. But he was favored to experience the fulfillment of the heavenly promise that to those who seek first the kingdom of God and his righteousness, all things necessary shall be added.

He was much beloved; and among his more intimate friends, his natural cheerfulness, tempered with Christian gravity, and his deep experience and sound judgment in Divine things, rendered him an interesting and instructive companion.

He spent much time in retirement; and it was his practice, during a great part of his life, to take a walk, mostly alone, in the fields of the day, generally into the fore-part. These walks, there is reason to believe, often proved seasons of religious exercise and devotion; and some, who have casually met him, have been struck with the solemnity of his countenance. His reading had been extensive and various; but the writings which he perused most frequently, next to the Holy Scriptures, were those which recommended religion as an individual, experimental work; consisting in faith and obedience, not in speculative knowledge, or in a mere profession. Yet, notwithstanding the satisfaction this reading afforded him, he often remarked how little all the knowledge that can be obtained, even from the best of books, will avail those who neglect a reverent attention to the divine law written in their own hearts.

In the summer of 1806, he wholly declined his business, which had been that of a tailor, having through a blessing on his honest industry, acquired a sufficiency for his future support. In the course of that year he was deprived by death of his second wife, who had, for thirty-one years, been his faithful and affectionate companion.

Having through life, whilst encompassed with human infirmities, kept his eye steadily on the Captain of his salvation, he was remarkably favored, at times, as he approached the confines of mortality, to look, in faith, to that state of undisturbed happiness which is beyond the grave, as the subjoined extracts from letters to his long loved and intimate friend, Richard Reynolds, exhibit.

1805. Tenth mo. 22d.—“At seasons, I feel a degree of consolation and Divine peace, that cannot be expressed in words, which I would not exchange for a thousand times the treasures of both the Indies; in comparison of which I should esteem, I do esteem, crowns and sceptres as dung and dross. And at the much more frequent seasons, when heavenly good is least sensibly felt (I hope I write it, with humble heartfelt gratitude) my faith and hope, and confidence are so firmly anchored on the everlasting rock, Christ Jesus, that when the rains descend, and the winds and the storms beat, I am not greatly moved. I know Him in whom I have believed, and that he

will in mercy, keep all those who have committed themselves to Him.”

1813. Sixth month 10th.—“With regard to myself, I am not destitute of hope; for though many have been better stewards of the manifold grace of God than I have been, I am not conscious, at any time, in my religious labors, of having done the work of the Lord deceptively. Yet I might have been more diligent; I might have watched more frequently at Wisdom's gate; I might have been more devoted, and like the holy prophet, more ready to say, 'Here am I, send me.' But I trust in divine mercy, knowing 'in whom I have believed'; and I am persuaded that he is able to keep that which I have committed unto Him against that day.”

1814. First mo. 28th.—“With regard to myself, I am moving on in my Christian pilgrimage in a low way; yet not destitute of hope, that the dispensations I have or may have to pass through, may be graciously intended for my further refinement, of which I have great need; so that in the solemn choice, I may be numbered amongst all those, who, through faith and patience, inherit the promises. 'But if I should be thus happy to find acceptance with God, in the awful day of decision, I am sure it will be the effect of his unfeeling mercy in Christ Jesus; for I have no claim on merits, to rewards.”

He enjoyed an excellent constitution, and mostly uninterrupted health, until the autumn of 1815, when he had a slight attack, which assumed the appearance of a paralysis. This, in some degree, impaired his powers of body and mind; yet his understanding remained clear to the last, and he continued to attend his own meeting. He was able to walk about, and call on his friends; and his mind was often filled with divine love. A few days before his death, he was seized with a severe spasmodic affection, when he manifested great composure of mind, saying, that whichever way it might terminate all would be well.

The evening before his decease, he related to his family the following circumstance of his early life: “When a boy, about fourteen years of age, my attachment to music and singing was such, that when walking alone in the lanes and fields of an evening, I frequently gratified myself by singing aloud; and indulged therein, even after my mind became uneasy with the practice, until, in one of my solitary evening walks, and when in the act of singing, I heard, as it were, a voice distinctly say, 'If thou wilt discontinue that gratification, thou shalt be made partaker of a much more perfect harmony.'” So powerful was the impression then produced, that he added, he never afterwards indulged in the practice. In relating this short anecdote, he was, towards the latter part of it, considerably affected, and could not suppress his tears, which appeared as the tears of gratitude to God, at this remembrance of his early merciful visitation.

He conversed cheerfully with his family the remainder of the evening, and said he thought it a great favor to be removed without much bodily suffering. The following day, the 30th of Ninth month, 1817, while sitting in his chair, he closed his eyes and quietly departed.

A man is not so likely to deserve or win the blessing of his children by giving them much, as by teaching them how to live on little.

For “The Friend.”
The great Submarine Blast at Hallett's Point Reef or Hell Gate, in the East River, New York.

(Continued from page 66.)

DISASTER TO THE SHELBORNE DRILL.

This new machine was 35 feet high, 27 feet in diameter at the base, and weighed 28 tons. The drilling engine was above water, the rock being pierced by the continual falling of a heavy drill-bar. The preliminary trial of this drill was entirely successful. When placed on Frying-Pan, it stood firmly on the rock, unmoved by the current, until the necessary preparations were made for putting it in operation. But that very day it was run down by a brig, a tug, and a canal-boat, and completely demolished. The time of S. F. Shelburne's contract had been twice extended. As the final period expired three days after the destruction of the last drill, no application for renewal was made. S. F. Shelburne had labored faithfully and well; but luck was against him, his last misfortune leaving him some twenty thousand dollars out of pocket, and the public so much the richer for the experiments he had made.

While these unsuccessful but not fruitless experiments were making, the general charge became convinced that the work could be done more economically if conducted directly on behalf of the government.

The removal of Hallett's Point was the largest and most pressing operation thus far authorized. This point projects three hundred feet into the stream in such a way as to throw the Sound tide straight upon the Grid-iron, over which it breaks with destructive violence.

The only feasible plan of operation was to work from the shore by sinking a shaft, out of the way of shipping and, after undermining the reef with radiating headings connected by concentric galleries, and removing all the rock that could be safely taken out, blow up the roof and its supporting columns at a single explosion, the *debris* to be either buried in the excavation or removed by grappling, as might be most economical.

This plan had the advantage of being known and tried. The only risk was the possible flooding of the mine through fissures in the roof; but even if such an accident should occur, and the completion of the work by dry blasting prevented, every foot of rock taken out would be so much gained; and what remained could be removed without increased difficulty by whatever process might be adopted for the removal of the channed rocks.

The first step was to construct between high and low water around the mouth of the proposed shaft a strong coffer-dam, 310 feet in length, extending along four sides of an irregular pentagon, the fifth, or shore line, of which was about 145 feet. This dam, consisting of a double shield of heavy timbers securely fastened to the rocks by bolts passing through the structure, the space between the walls filled water-tight with sand and clay, was completed and pumped out, so that operations could be begun in the interior.

In June, 1870, the funds appropriated for the improvement having been exhausted, the work on the shaft was suspended. At that time 484 cubic yards of rock had been taken out, at a cost of \$5.75 per yard. In the latter part of July operations were resumed, and the shaft was sunk to a depth of thirty-three feet below mean low water. Ten diverging tun-

nels were then commenced, and opened to distances varying from fifty-one to one hundred and twenty-six feet. As these were sufficiently advanced concentric galleries were excavated. The amount of rock taken out during the year was 8,306 cubic yards; the drilling being all done by hand. In 1871 the work was pushed on more rapidly, steam drills having been introduced. The number of feet of tunnel driven during the year was 1,653, and of transverse galleries 653.75. The quantity of rock removed was 8,293 cubic yards. In November, 1873, operations were again suspended for want of funds. At the end of the fiscal year, June 30, 1874, work having been carried on for four and a half months only, 896 linear feet of tunnels were opened, and 4,648 cubic feet of rock taken out. The total length of tunnels and galleries then amounted to 6,780 feet. The tunnels are intersected at short intervals by the concentric galleries, leaving pillars for the support of the upper portion of the rock. Of these there were 173; the shell or roof of the excavation varying from six to sixteen feet in thickness. The aggregate length of the tunnels and galleries, which were finished in June last, was 7,425 feet—4,857 feet of tunnels and 2,568 feet of galleries. The total amount of rock taken out was 47,461 cubic yards. The rock is a tough hornblende gneiss, and lies in strata of various degrees of inclination, presenting interesting problems. During the progress of the work topographical surveys were continually made to determine the direction and extent of the excavation, the usual methods of triangulation and leveling being employed. A detailed survey of the upper part of the shaft was made in 1871, by William Prosser, assisted by F. Sylvester. More than sixteen thousand soundings were taken, each separately located, by means of instruments from the shore. The reef is in the shape of an irregular semi-ellipse, the major axis, which lies along the shore, being 770 feet in length, and the minor axis, projecting straight into the channel, about three hundred feet. The cubic contents above the depth of twenty-six feet at mean low water amount to 51,000 yards. The explosives used in tunneling the reef have been nitro-glycerine and its compounds, and gunpowder, the latter being used only when the rock was weak and sandy. As great care had to be taken not to shake the structure overhead by too heavy vibrations, only one blast was exploded at a time. After the excavation was completed the work of preparing for the blast was begun, and the roof-plats were pierced with 3,680 drill-holes to receive the cartridges of gunpowder, volean powder, and dynamite. The holes were made from two to three inches in diameter, and from six to ten feet apart, with an average depth of about nine feet. The size of the holes, and their direction and distances apart were made to vary according to the character of the rock to be broken. Every thing being prepared, the charging of the mine was begun. Cartridges of gunpowder, rendroek, and dynamite were carefully placed in the holes, the explosives being distributed according to the nature of the service required to be performed. At the mouth of each hole was placed a small exploder cartridge, composed of fulminate of mercury and dynamite, with wires to connect it with a galvanic battery. When all the holes were loaded, these wires were connected with those running to

the battery, standing near the opening of the shaft, and placed in position. Including the leads, the connections, and the fuses, about one hundred and twenty-two thousand feet of wire were employed. Owing to delays on the part of the contractors in furnishing the explosives, the work of charging the holes was not completed until Friday evening. The wires then having been placed in position and the shaft cleared out, the large siphon connecting with the river was opened, and the water was let into the excavation, in order that it might be filled in time to allow the blast to be made at the appointed hour.

THE COST OF THE WORK.

Following are the different appropriations made by Congress for the Hell Gate and East River improvements:

1868,	\$ 85,000	1873,	\$225,000
1869,	180,000	1874,	250,000
1870,	250,000	1875,	250,000
1871,	225,000	1876,	250,000
1872,	225,000		

Total, \$1,940,000

The total amount expended by Gen. Newton up to Aug. 1, 1876, was \$1,686,811.45. The estimated cost of completing the entire work of improving Hell Gate and the East River is \$5,139,120.

HOW IT WAS DONE AND THE RESULTS.

At 8 o'clock in the morning, Mr. Streidenger and his corps of workmen resumed work on the connection of the groups of wires with the batteries. This was soon completed, and the filling of the battery cells with the chemicals was at once commenced. The compound was what Mr. Chester, the electrician, calls electropin, a mixture of bichromate of potash, sulphuric acid, and water; a mixture which is essentially that used in the Grenet battery. One hundred and fifty gallons were distributed into the 800 battery cells, giving just a pint and a half to each cell. By noon the cells were all filled, and Mr. Streidenger proceeded to make a most careful and searching inspection of the minutest detail of the battery. No less than 275,000 feet of insulated copper wires were used in connecting, directly and indirectly, the 3,680 charges with the batteries. The efficacy of the batteries to fire the mine had been previously tested by firing the number of fuses necessary to explode one group; and as each group had a separate leading wire to the batteries, the testing of one was a test of the aggregate groups. In the meantime, Mr. Boyle, the mine overseer, found that the water in the shaft did not rise so rapidly as the water in the channel as the hour of high tide approached, and he was anxious to have every gallon of water in the shaft that could be drawn in. He at once set a gang of men to work lowering out the muffled clay from a small hole between the two timber-plats of the coffer-dam, and, shortly afterward, a young Hercules was wielding an axe on the timbers in a style which quickly let in a flood of water sufficient to satisfy even Mr. Boyle. The mine was full before slack tide. A good many jokes passed at the expense of one of the watchmen for carefully opening the windows of the wooden shed hanging over the brink of the shaft, which did duty for the overseer's office. After the explosion that watchman had the best of the laugh, for, though the shed was moved some twenty-five feet by the explosion, the glass in the windows was not broken.

Soon after 1 o'clock the steamers carrying

the invited spectators of the explosion began to put in an appearance. The first to arrive was the large steam-tug Juniata, bringing Mrs. Newton and a large party from Brooklyn who were all transferred to the government scow lying off Ward's Island. Then came the Fletcher, chartered by the Society of Mining Engineers; the Seneca Police boat, t Henry Smith, with a large congregation of officers from the different harbor garrisons the Pleasant Valley, which took up her position as a guard-boat between Ward's Island and Pot Cove, on the Long Island shore; three other guard-boats, Neversink, Eli Hancock, and Arrowsmith, which all took their allotted stations; and lastly came the Sylvan Dell, Harlem Sunshine, and a number of small steamers and tugs. Every vessel was crowded, and the spectators naturally flocked to the side of the vessels affording a view of the flooded shaft, though nothing but the feet of the coffer-dam and the heap of rock excavated from the mine outwardly represented the great submarine work. After the explosion some of the pilots took their vessels dangerously near the broken reef, in spite of Gen. Newton's warnings to the contrary; the pilot of the Neversink, especially, steering his boat clean over the point of the reef, and some of the vessels careening to an extent which bid fair to throw those who stood on the slippery surface of the permanent awnings of the upper decks into the water.

(To be concluded.)

Selected for "The Friend."

Daniel Wheeler in Van Drieman's Land.

During this time we were present at two conferences with members of the Wesleyan connexion; at the latter of these, most if not all of their preachers were collected. Some time back the Wesleyans were very favorable to our friends J. B. and G. W. W., and disposed to render them every assistance in their power; supposing although they were walking among men under a different name from themselves, that still in Christian doctrine they were nearly agreed, or that the difference was so trifling as to be unimportant. But finding that of late some of their members have become convinced of Friends' principles, a marked shyness has begun to show itself, and several attempts have been made to prove that the principles which we profess are not fully supported by Scripture authority. The perceptible guidance of the Spirit, it seems, they cannot believe in, notwithstanding they profess to be continually under its influence in all their religious proceedings. We cannot therefore wonder, that our mode of worship and silent waiting upon Almighty God, are disapproved of and incomprehensible to them. These conferences have served to show that there is a much wider difference between them and us, than they had previously supposed.

However we may be disposed to cherish Christian charity one toward another as religious professors, yet I am fully persuaded that whenever the principles of our religious Society are thoroughly understood, they will always be found striking at the root of a tree, upon which most other denominations are feeding, and this must and will be the case, so long as the preachers and teachers of the people are paid for the performance of their offices and are trained up for them. I am far from asserting that there are not individuals

Other societies, who are truly called to the work of preaching the gospel, and who are laboring in the noble cause from pure and interested motives; but I do fear that the number of these is comparatively small; and it is my belief, that if no money was permitted to circulate in connexion with the outward performance of any religious service, the region of Jesus would soon shake off the deficiencies with which it has been sullied, and gain shine forth in primitive purity and stre, "clear as the sun, fair as the moon, and terrible, 'to sin and iniquity' as an army with banners." O! that men would come to that true teaching of the heavenly anointing within them, which would abide in them, and teach them all things; and which is truth itself, and no lie. Then would they be sensible that they needed no man to teach them; or the teachings of man would be to them as at water of which, "whosoever drinketh shall thirst again;" but where they have tasted of the water given them by the Prince of life himself, which shall be in them "a well of water springing up unto everlasting life," "whosoever drinketh of this shall never thirst."—*Friends' Library.*

Temperance and Long Life.—A curious point has been raised about the United Kingdom Temperance and General Provident Institution. This society insures total abstainers at lower rate of premium than non-abstainers, and with such excellent results that actually the expectation of deaths is above the realization. It was, for instance, expected that 723 of the total abstainers would die in five years and £140,000 be paid to the survivors, instead of which only 511 persons died and only 97,000 was paid. On the "general" side of the office 1266 deaths were anticipated and 30 occurred. Nevertheless, the general side insures more than the total abstinence; and when the bonus came to be distributed there was great dissatisfaction that quite half of it went to the temperance section. At the annual meeting this fact was dilated upon with me warmth. But the actuary at once set matters right. He pointed out that the distribution of bonus was a mere matter of arithmetic. It has nothing to do with principles or practices; and then, turning round to the malcontents, "I cannot help you dying. The act is, you die faster than those who don't drink, or they do not die so fast as you. They are, therefore, entitled to the larger bonus." The malcontents could not say a word more.

Selected.

My Father, it is good for me
To trust and not to trace,
And wait with deep humility
For Thy revealing grace,
Lord, when Thy way is in the sea,
And strange to mortal sense,
I love Thee in the mystery,
I trust Thy providence,
I cannot see the secret things
In this my dark abode;
I may not reach with earthly wings
The heights and depths of God,
So faith and patience wait awhile!
Not doubting, not in fear;
For soon in heaven my Father's smile
Shall render all things clear.
Then Thou shalt end Time's short eclipse,
Its dim uncertain night;
Bring in the grand assembly rose,
Reveal the perfect light.

—Rasson.

THE ILLUSTRATED BIBLE.

Selected.

[The following is a very literal and happy rendering by "S. M." of a poem of Freiligrath, little known in this country.]

Thou old and time-worn volume,
Thou friend of childhood's age,
How frequently read hands for me
Have turned the pictured page!
How oft, his sports forgetting,
The gazing boy was borne
With joyous heart, by the sweet art,
To tread the land of morn.

Thou didst cling wide the portals
Of many a distant zone;
As in a glass I saw them pass,
Faces and forms unknown!
For a new world I thank thee!
The camel wandering free,
The desert calm, and the stately palm,
And the Bedouin's tent, I see.

And thou didst bring them near me,
Hero, and saint, and sage,
Whose deeds were told by the seers of old
On the Book of books' dread page:
And the fair and bird-like maidens
Recorded in thy lines,
Well would I trace each form of grace
Amid thy rich designs.

And I saw the heroic patriarchs
Of old and simple days,
An angel-band, on either hand,
Kept watch upon their ways:
I saw their meek herds drinking
By fount or river shore,
When mate I stood in thoughtful mood,
Thine open page before.

Methinks I see thee lying
Upon thy well-known chair;
Mine eager gaze on more surveys
The scenes unfolded there;
As years ago, I saw them
With wonder and delight,
Each form renews its faded hues,
Fresh, beautiful, and bright.

Again I see them twining
In ceaseless shapes of change,
Bright and grotesque each arabesque,
Mazy, and wild, and strange;
Each fair design encircling
In varied shape and dress,
A blossom now, and then a bough,
But never meaningless.

As in old times, entreating,
I seek my mother's knee,
That she may teach the name of each,
And what their meanings be;
I learn, for every picture,
A text, a verse, a psalm;
With tranquil smile, my sire the while
Watches, well pleased, and calm.

Ye seem but as a fable,
Of days that are gone by!
That Bible old, with clasps of gold,
That young, believing eye,
Those loved and loving parents,
That childhood blithe and gay,
That calm content, so innocent,
All, all are passed away!—*Our Own Fireside.*

The Value of Occupation Tested.—Dr. Henry Edwards remarks,—as probationers for an eternal state, it must be palpable to the plainest understanding, that everything in time must be more or less important, precisely as it has to do with our future destination. Hence the most trivial occurrence which has a sure connection with our eternal interests is great; and the greatest which has no such connection is trivial. John Wesley wrote to a student—"Beware you are not swallowed up in books. An ounce of love to God is worth a pound of transient knowledge. What is the real value of a thing but the price it

will bear in eternity. Let not study swallow up, or entrench upon the hours of private study. Nothing is of so much importance as this. 'For it is not the possession of gifts, but of grace; nor of sound knowledge and orthodox faith, so much as the principle of holy love and the practice of Christian precepts; which distinguish the heir of glory from the child of perdition.'"

For "The Friend."

Extracted from the life of John Fothergill.

There was in our meeting an ancient and truly valuable minister; and when I was about sixteen or seventeen years old, I was often affected with discouraging reasonings in myself; how we should do, and what would become of us when he died? Under this anxious thoughtfulness I was induced to consider, how and by what means he was made so valuable and serviceable. That it was through his faithfulness, his waiting to feel after, and adhering to that manifestation of divine power and life from Almighty God, whereof he declared, that this Holy Spirit, to which he labored to turn and gather people's minds, appeared in all; and as hereby he was made truly serviceable, so that heavenly living principle was well able to help, feed, fit and preserve all who truly sought to know and be subject to it, and make them serviceable also. This consideration both instructed and encouraged me to look to the Lord, and beyond outward instruments. And I have reason to believe, the like thoughts affected some others of our youth in that meeting also, to advantage.

The said minister was taken away by death in about a year after, and the heavenly and merciful springings of divine life, so owned and relieved many of us, in our humble hungerings after it, though much silent in our meetings, that there soon appeared a lively and truly religious growth among us; and in little more than two years after the aforesaid Friend's decease, there were five of us engaged by the Truth to open our mouths in the ministry of the gospel, to the satisfaction and comfort of the meeting. So that instead of a decay and a declension, about which I had been distressed with fear, our meeting increased in number and in true godliness.

Discouraging thoughts may at times attend some well-disposed minds, and the evil spirit may be busy in making use of them to their hurt, and weakening their faith; so that it is necessary to endeavor to watch against him, and call to mind with sincere devotedness, wherein the alone sufficiency of God's people is. By duly seeking to witness divine help and succor from Christ the good Shepherd, even one person, though poor and often dejected, may become instrumental to incite and encourage others in a rightly religious application, drawing down more of divine and truly strengthening help: by which means many people and meetings have been revived and helped, and have become more fruitful, to the praise of God.

I have sometimes heard complaints, or a bemoaning of the state of some places, for the fewness of ministers, and truly religious helpers in the churches, and I believe not without cause. Yet it hath long been my judgment, that this is principally owing to too many of our brethren in profession, neglecting a proper labor to improve the gift or manifestation of the Spirit of Truth, given to

every man to profit with; and holding their profession of the doctrines of Truth, in a barely rational apprehension and carnal understanding. This, as our Saviour, Jesus Christ, taught in the parable of the unprofitable servant, is attended with taking away that which he had, and so came on a dark, restless condition. Those who diligently regard the Giver's direction, to attend upon the gift, improve it, and more is given. It is promised to the faithful in the little, that more shall be entrusted to them; which often hath been, and yet will, I believe, be fulfilled to the honest, diligent and spiritually minded. Thus many persons and meetings, by laboring to be found in their duty, seeking their souls' interest, have been regarded; and by degrees, through the humbling operation of the Power of Christ, the blessed and everlasting High Priest, fitted for and engaged in the service of the Lord in his wisdom; some in one station and some in others, to the edification of the body, and the building up and beautifying his city Zion in the sight of the nations. Oh! that this right thoughtfulness and application of the heart, which is both the duty and certain interest of mankind, may more and more prevail when I am no longer here; and be a means of such fruitfulness in righteousness, and heavenly qualifications, to show forth the praise of God to the earth, that multitudes may see and flock to Zion with everlasting joy upon their heads. Amen.

Inspiration or Perspiration.—No man now standing on an eminence of influence and power, and doing great work, has arrived at his position by going up in an elevator. He took the stairway step by step. He climbed the rocks often with bleeding hands. He prepared himself by the work of climbing for the work he is doing. He never accomplished an inch of his elevation by standing at the foot of the stairway with his mouth open and longing. There is no "royal road" to anything good—not even to wealth. Money that has not been paid for in life is not wealth. It goes as it comes. There is no element of permanence in it. The man who reaches his money in an elevator does not know how to enjoy it; so it is not wealth to him. To get a high position without climbing to it, to win wealth without earning it, to do fine work without the discipline necessary to its performance, to be famous, or useful, or ornamental, without preliminary cost, seems to be the universal desire of the young. The children would begin where their fathers leave off. What exactly is the secret of true success in life? It is to do without flinching, and with entire faithfulness, the duty that stands next to one. When a man has mastered the duties around him he is ready for those of a higher grade, and he takes naturally one step upward. When he has mastered the duties of the new grade, he goes on climbing. There are no surprises to the man who arrives at an eminence legitimately. It is entirely natural that he should be there, and he is as much at home there, and as little elated, as when he was working patiently at the foot of the stairs. There are heights above him, and he remains humble and simple.—Preachments are of little avail, perhaps; but when one comes into contact with so many men and women who put aspiration instead of perspiration, and yearning instead

of earning, and longing for labor, he is tempted to say to them: "Stop looking up, and look around you! Do the work that first comes to your hand and do it well. Take no upward step until you come to it naturally, and you have the power to hold it. The top in this little world is not so high, and patient climbing will bring you to it ere you are aware.—*Lucknow Witness.*"

For "The Friend."

Circular of the Bible Association of Friends in America.

In again calling the attention of Auxiliaries to the Annual Queries to be answered previous to the general meeting of the Association on the 1st of Eleventh month, the Corresponding Committee would press upon Friends, who have been engaged in the distribution of the Holy Scriptures, the importance of furnishing full and accurate answers to all the Queries, and of forwarding their report seasonably to the Depository.

It may be recollected, that in making donations to Auxiliaries, the Board are guided in deciding what number of Bibles and Testaments shall be sent to each, by the information given in its report. Hence those Auxiliaries that do not report in time, are liable to be left out in the distribution.

Specific directions should be given in every case, how boxes should be marked and forwarded; and their receipt should always be promptly acknowledged.

Address John S. Stokes, No. 116 N. Fourth Street, Philadelphia.

SAMUEL BETTLE,
CHARLES RHOADS,
ANTHONY M. KIMBER,
Committee of Correspondence.

Phila., Tenth mo. 1876.

QUERIES.

1. What number of families or individuals have been gratuitously furnished with the Holy Scriptures by the Auxiliary during the past year?
2. What number of Bibles and Testaments have been sold by the Auxiliary within the past year?
3. How many members, male and female, are there belonging to the Auxiliary?
4. What number of families of Friends reside within its limits?
5. Are there any families of Friends within your limits not supplied with a copy of the Holy Scriptures in good clear type, and on fair paper; if so, how many?
6. How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?
7. How many Bibles and Testaments may probably be disposed of by sale within your limits?
8. Is the income of the Auxiliary sufficient to supply those within its limits who are not duly furnished with the Holy Scriptures?
9. What number of Bibles and Testaments would it be necessary for the Bible Association to furnish gratuitously, to enable the Auxiliary to supply each family?
10. What number would be required in order to furnish each member of our religious Society, capable of reading, who is destitute of a copy, and unable to purchase one?
11. How many Bibles and Testaments are now on hand?

Stammering Providence.—What a habit we have of crediting all our ills to Providence! We are never willing to admit that our own inactivity, folly, and self-love have wrought out the dire results over which we mourn. We only see the shipwreck of our lives; we only hear the voices of the storm; and instead of owning that it was our indifferent and unskillful navigation that brought our craft upon the rock, we fold our hands and cry out blindly, "Strange and mysterious are thy

ways, O Providence!" It is well to be faithful and trust. It is well to be resigned to trials that cannot be avoided; but it is not well to hide our talents in a napkin, to be our fill of ease and pleasure and bow down to the gods of pride and fashion, then shrink back from the consequences and say that the work is none of ours.

Some of us really imagine that we are offering the will of the Lord, because the flour barrel is empty and our coat is out at the elbows, when a little more self-denial, a little less folding of the hands to rest, would raise us out of the slough of poverty, and set us on our feet, crowned with the gift of a good heritage. We eat rich, unwholesome food, keep late hours, transgress all the laws of health; and when we pay the penalty we shatter nerves and broken constitutions, wonder why we are not strong and vigorous as our neighbor, who has lived moderate all his days. Because the neck and arms of our tender infants are soft and white as dimpled, we let them go bare and unprotected; then when some day we leave the little one out under the snow, we murmur that our Father hath been unkind. In too many cases with a little more flannel, the family cry might be kept unbroken for many a year.
Late Paper.

For "The Friend"

Colored Laborers of Virginia.

The following extracts are from a letter written last spring, by Dr. Patterson of Michigan, to the *Tecumseh Herald*. He has purchased a tract of land on the James River about nine miles from Richmond, which calls "Spring Brook Farm."

"Looking below the surface of Virginia society, in its broadest sense, a careful observer, although a stranger, may soon discover peculiar antagonism, or to use a milder, perhaps a more appropriate word, 'disagreement,' between a large body of the white citizens of the State and the negroes,—a however manifested by open violence, or ruse, or bluster, and never endangering life or property. This antagonism is not confined to the native white citizens, as it is participated in by very many white men from the original Free States, who have resided in Virginia a few years. The main cause of disagreement on the side of the negroes, explained by their open assertions in the most positive terms, that most of the white who hire them to labor under a straight pledge to pay them in money when the work is done, have no regard to their pledges; put the offer from time to time with delusive promises or offer them country store pay, old clothes, &c., on which they know that they will sustain a heavy loss. But very many of the white citizens of the South do not regard it in this light. They assert the colored people are heedless, improvident and inclined to idleness and gross self-indulgence, whenever they are paid for their services more than their immediate necessities require to give them a comfortable living, it is a temptation to leave their employers without warning, and frequently at the most hurried seasons of the year, in order to gratify their animal passions and that they will not return to their work until the last cent is gone. Thus it happens that any excess of means inevitably tends to increase their vices.

"Having previously engaged the service

(a respectable and intelligent farmer, originally from Wellsville, Ohio. I requested him to engage some negro choppers to cut and pile up as cord-wood, a considerable quantity of the tops of trees from which the butt logs had been cut and drawn to an adjacent saw-mill. Within a few days, seven colored men contracted to do this work at an average of fifty-six cents a cord, boarding themselves. I was an experiment on my part, and after that has been said apparently with truthfulness and candor respecting the negro laborers, unless you feel some interest in the result. A reasonable time, all the tops of any value were cut up in lengths of four feet and completely and neatly piled in the best cord-wood pile, and I have never seen similar work at the same time done up under contract or by the day or honestly or left in better condition. During the whole time, the choppers were under the observation of Mr. Boyce and myself; no evidence of drinking intoxicating liquors was observable, no signs of idleness, noisy vulgarity or rudeness were manifested. Do you ask what stimulated these men to do their work so seasonably and thoroughly? Simply this; they were told that when the work was done they would be paid according to agreement promptly and in money. They worked under this belief, and it is scarcely needful to add they were not disappointed.

"On Spring Brook Farm there is now an average of five hands regularly employed. At intervals the labor of a carpenter, a stone mason and tender, as well as several ditchers, colored men, have been employed, and a white-washer, making seventeen colored men all. The hands are under the immediate supervision of Mr. Boyce when other duties will permit, who not only supervises, but works with them, thus teaching by example the precept to labor steadily, and what is of still more importance, systematically. Many of the best farmers of Virginia are doing this, and all must do it or abandon the business as hopeless.

"That the colored people of the South in their present condition, require peculiar and their cautious management on the part of the whites cannot be questioned. If they are managed, and as circumstances will permit, light the social and Christian duties even to the extent of their capacity to acquire this knowledge by the precept, and above all, the example of those whose duty it is to teach them, they will become a blessing to the country, but if neglected and constantly exposed to bad examples, and bad influences, they will assuredly deteriorate and become a curse to themselves and to the whole country. As far, Mr. Boyce and myself, have had but the reason to complain of those under our immediate observation.

"I pay the customary wages of the country, that is \$8 a month during the three short months of day-light, and \$10 a month during the remainder of the year, with certain perquisites, amounting in all to about \$12 a month for nine months. I am convinced that if properly treated, and taking the year together, our colored men will do as much profitable farm work, if not more, than our returned farm help. The cause is obvious; the climate usually admits of ploughing and preparing most of the ground for spring crops during the winter, and no white man can labor as hard and as many hours during the extreme heat of summer as a negro."

Three Good Lessons.—"One of my first lessons," said Mr. Sturgis, the eminent merchant, was in 1813, when I was eleven years old. My grandfather had a fine flock of sheep, which were carefully tended during the year of those times. I was the shepherd boy, and my business was to watch the sheep in the fields. A boy who was more fond of his book than the sheep was sent with me, but left the work to me, while he lay under the trees and read. I did not like that; and finally went to my grandfather and complained of it. I shall never forget the kind smile of the old gentleman as he said:

"Never mind, Jonathan, my boy; if you watch the sheep, you will have the sheep."

"What does grandfather mean by that? I said to myself. 'I don't expect to have sheep.' My desires were moderate; and a fine buck worth a hundred dollars. I could not exactly make out in my mind what it was, but I had great confidence in him, for he was a judge, and had been in Congress in Washington's time; so I concluded it was all right, and went back contentedly to the sheep. After I got into the field I could not keep his words out of my head. Then I thought of Sunday's lessons: 'Thou hast been faithful over a few things, I will make thee ruler over many things.' I began to see through it. 'Never you mind who neglects his duty; be you faithful, and you will have your reward.'

"I received a second lesson soon after I came to New York as a clerk to the late Lyman Reed. A merchant from Ohio, who knew me, came to buy goods, and said: 'Make yourself so useful that they cannot do without you.' I took his meaning quicker than I did that of my grandfather.

"Well, I worked upon these two ideas until Mr. Reed offered me a partnership in the business. The first morning after the partnership was made known, James Geery, the old tea merchant, called in to congratulate me, and he said: 'You are all right now. I have only one word of advice to give you: Be careful who you walk the streets with.' That was lesson number three."

"And what valuable lessons they are:—Fidelity in all things; do your best for your employers; carefulness about your associates. Let every boy take these lessons home and study them well. They are the foundation stones of character and honorable success."

THE FRIEND.

TENTH MONTH 14, 1876.

OHIO YEARLY MEETING.

The meeting for business convened on Sunday, the 25th ult.; and closed on Saturday, the 29th. From several accounts which have been received, it appears to have been a profitable and comfortable season. One letter, received by a Friend in this city, says: "The plain appearance, and solid quiet deportment of many of the younger members in attendance, together with the interest that was manifested in the various subjects that came before the meeting for consideration, gave evidence that they are travelling in exercise with their older brethren and sisters, for the support of the Christian principles and testimonies given to this people to bear before the world.

"The important concerns of the church were resorted with much harmony and concision, bearing some evidence of true discipleship. By this shall all men know that we are my disciples, if ye have love one for another."

"Two public meetings were held on Friday, the 24th, and one on Fourth-day. These were occasions long to be remembered by many, wherein evidence of the Divine presence and favor were manifest, in what was delivered, as well as the solemn stillness that prevailed when no words were being uttered.

"An interesting report from the Building Committee of our new Boarding School, showing the progress and almost the completion of the work; also a report from the School Committee, showing two satisfactory sessions of school in the new house within two years after the committee was appointed to circulate subscriptions, and if sufficient could be obtained, to proceed with the work. It is gratifying to learn that there is a prospect of as many scholars for the coming winter session, as the house will accommodate.

"A minute of advice was prepared to accompany our minutes, more particularly for our absent brethren and sisters, who had not the privilege of participating in the concern and exercise of the meeting on account of the deficiencies apparent during the consideration of the state of society."

From other sources we learn that a proposition to change the place of holding the Yearly Meeting to some locality more easily accessible, was referred for consideration to a committee—but that way did not open to decide upon the change at this time. A similar conclusion was arrived at in reference to a proposal to prepare an epistle to Philadelphia Yearly Meeting.

When the printed minutes of the meeting are received, we may be able to give our readers further and more definite information.

We wish to call the attention of our readers to the importance of a lively interest in the spread of the principles we profess. The valuable extracts from the Life of John Pothergill, which have been sent to us for insertion in "The Friend," and which will be found on another column of this number of our journal, show how a true growth in religious life is experienced—even by "the heavenly and merciful springings of Divine life," and the "humble hungerings after it." Those who faithfully and steadily seek "to witness Divine help and succor from Christ, the Good Shepherd," will be made instrumental "to incite and encourage others in a rightly religious application, drawing down more of Divine and truly strengthening help; by which means many people and meetings have been revived and helped, and have become more fruitful, to the praise of God."

Our blessed Redeemer, when personally on earth, said to Peter, "When thou art converted, strengthen thy brethren." It is difficult to imagine a true Christian, one who has known the heart-changing power of Divine Grace, and been made partaker of the Spirit of Christ; who is not animated with a degree of that love which seeks to gather to the fold of rest and peace, those who are wandering astray. If we were more heavenly-minded, if we were less concerned to promote our own

selfish ease and comfort, we believe there would be more spiritual fruit to be seen among professing Christians. We should travel in spirit for the welfare of others, both individuals and communities; and would be prompt to embrace all right openings which might present for doing them good; while at the same time we would be preserved from running into labors which were not required at our hands, and which might mar the work of the Lord through efforts on which no blessing rested—for it is the Lord's blessing only that enriches.

One channel of usefulness, of which our early Friends largely availed themselves, was the distribution of religious writings, and we believe an increased interest in this concern might profitably be exercised at this time. Several works have recently been added to the collection of books published by the Society, and kept for sale at their Book Store (No. 304 Arch St.) in this city. Some of these are in the French, German and Spanish languages, and the present influx of strangers to our city presents an unusually favorable opportunity of scattering a knowledge of sound principles, which may prove as a seed sown, that may spring up and bear unexpected fruit in many parts of the world. May all who read these lines consider, what duty rests upon them individually in aiding the good cause.

SUMMARY OF EVENTS.

FOREIGN.—The depression in business and financial matters in London remains unchanged.

The Industrial Bank of Newcastle-on-Tyne has stopped payment.

The cotton operatives at Blackburn, England, having decided to be no longer bound by the arrangement by which their wages have hitherto been regulated, some of the largest spinners have posted notices stating that they had themselves resolved to close the spinning departments of their mills without warning.

Lord Derby has sent a dispatch to Constantinople regarding the Bulgarian atrocities. The British Ambassador is directed to demand a personal audience with the Sultan, to communicate the King's remonstrance and request justice, and urge the immediate rebuilding of houses and churches, to provide for the restoration of industries, and give assistance to persons who have been reduced to poverty. Lord Derby says that the disturbed districts in Bulgaria should be placed under an energetic commissioner who should either be a Christian or be aided by Christian counsellors.

A leading grain circular published in Liverpool, says that the wheat trade was animated during the last week with a small advance in prices. The stock of white wheat is diminishing and American had become quite scarce.

Captain Johnson, the daring seaman who recently crossed the Atlantic in a small boat, is an object of attention and interest at Liverpool where the boat is on exhibition. He says that no inducement would tempt him to repeat his experiment.

The London Daily News has a letter from Iceland, which reports that the fishing season has been a failure. The privations of the laboring people are great, and 1800 have emigrated to Canada.

Advices by mail at London from Cape Town, report that affairs in the Transvaal Republic were alarming. Owing to the death of the Dutch king, the natives had become unmanageable. The Zulu King was about to head 40,000 men to attack the Transvaal, and threatened a wholesale massacre of the Boers.

A special from Madrid says: The appointment of so important a personage as General M. Martinez Campos to the governor of Cuba, will be regarded by the natives as government is making every sacrifice to crush the Cuban insurrection. The nomination was totally unsolicited. Gen. Martinez Campos will nominate his principal officers.

The Cuban insurgents under Viescra Garcia have captured 1000 men, with two hundred and forty prisoners, and one hundred and five wounded.

A Spanish journal states that the authorities in the

north of Castle have prohibited the sale of Protestant Bibles. It calls upon the government to investigate the measures the authorities if they have violated the constitution of Spain.

Count Von Arnim, whose case has been so long before the German courts, has at last been found guilty of high treason, and sentenced to penal servitude. The Count is now in Switzerland and will, it is supposed, not return to Germany.

A large number of dangerous icebergs are reported to be drifting off the coast of Newfoundland, in latitude 46 deg., and between longitude 50 and 49. Some of the masses of ice appear to have grounded.

The plans for peace conferences and truces in the Turkish-Serbian struggle are as conflicting as ever, and nothing is decided.

It is stated that fifteen thousand Bashis-Bazouks have deserted the Turkish army.

Prince Nicholas, of Montenegro, has, through the influence of a British Consul, consented to a suspension of hostilities with arrangements for an armistice are pending, providing that the forts held by the Turks are only revictualled for immediate requirements.

Since the renewal of hostilities several sanguinary engagements have occurred between portions of the hostile forces.

The Powers continue their efforts to end the war. According to a Berlin dispatch the British cabinet has made a formal proposal to the Powers for a conference. Russia also favors holding a conference.

The Servian commander-in-chief, General Teberhnyeff, has demanded that all the men between eighteen and thirty years of age be called up in anticipation of the war being renewed in the spring.

The internal disorders in China are increasing. Insurrections in numerous provinces and numerous assaults upon Christian natives are reported from all quarters. The northern district is still desolated by famine.

It seems to be a well-established fact that the last three or four years have witnessed a return of the Jews to Palestine from every quarter of the globe. The number going from Russia is entirely unprecedented. The Hebrew population of Jerusalem is more than double what it was ten years ago, and the movement is going on rapidly. Most of this city property is now in the hands of Jews, who have gone there from other countries, and in a few years' time they will probably be the owners of the whole city.

An imperial edict has been published in China, expressing regret for the murder of Marysey the British consul, and affirming the right of foreigners to travel through the country and enjoy the protection of the authorities. An envoy with a letter of apology for the Yunan outrage, is to go to England at once.

The insurgents of Cuba proclaimed the independence of the Island on the 10th of Tenth mo. 1868, and an obstinate and fiercely continued struggle has been in progress ever since. The insurgents are numerically the weaker party, but as the topography of the eastern end of Cuba is favorable for the guerilla warfare they have adopted, it now seems as if the war might be prolonged indefinitely with incalculable destruction of life and property.

UNITED STATES.—During the week ending the 7th inst., 477,510 persons paid for admission to the International Exhibition at Philadelphia. The receipts at the gates, from the opening up to the 5th inst., had amounted to \$14,641.

The subscriptions received for the new United States four and a half per cent. bonds, have already exceeded fifty millions of dollars, and there appears to be a steady and growing demand for them.

The total number of immigrants landed at the port of New York during the first month ending 9th mo. 30th last, was 25,886, as compared with 52,710 for the corresponding period of 1875.

A commission of Americans has arrived at Valparaiso for the purpose of working the gold mines at Cautines, and representing a company organized in California with a capital of \$1,000,000.

The coinage of the United States mint in the Ninth month consisted of \$6,12,193 pieces of the value of \$7,022,610. Of this coinage \$1,443,860 was in gold \$20 pieces.

State election in Colorado last week was carried by the Republicans, who have a majority of not less than 1200.

The steamship Illinois, of the Philadelphia and Liverpool Line, arrived at her dock in Philadelphia on the 7th inst., having made the passage from Liverpool in eight days and two hours, and in 24 hours, the shortest passage yet made by any ship of this line.

The British steamer John Bramall, cleared at New

Haveen, Conn., on the 7th inst., with a cargo of five million cartridges for the Turkish government.

The late explosion at Hallett's Point, New York, already secured a depth of twenty feet of water, and it is expected that the dredging machines will add at least six more. This is all that was desired or expected.

The interments in Philadelphia last week were 329, including 17 of diphtheria and 29 typhoid fever.

The Markets, &c.—The following were the quotations on the 9th inst.—New York.—American gold, \$20. Superfine flour, \$4.70 a \$5.05; State extra, \$5.25; \$5.40; finer brands, \$5.50 a \$8.75. White winter wheat, \$1.34; amber, \$1.25; No. 2, \$1.10; red, \$1.20 a \$1.21. Yellow corn, 50 a 60 cts.; mixed, cts. Barley, 95 cts. a \$1.00. Oats, 35 a 45 cts. 1 1/2 cts. *Philadelpa.*—Middlings cotton, 11 a 11 1/2 Flour, 54 a 58.50 according to quality. Pennsylvanian red wheat, \$1.22 a \$1.25; Delaware amber, \$1.21; \$1.23; white, \$1.30 a \$1.32. Rye, 70 a 75 cts. Yellow corn, 58 a 59 cts.; mixed, 50 cts. Oats, 35 a 40. New York cheese 10 a 13 cts.; western 8 a 11 1/2 Clover-seed, 10 1/2 a 11 cts. Sides of 4100 beef cut 5 1/2 a 6 cts. per lb. gross for extra; 4 1/2 a 5 cts. for good, and 3 a 4 cts. for common. Sheep, 4 1/2 a 5 1/2 per lb. gross. Receipts 13,000 head. Hogs, \$8.50 a \$9.25 per 100 lb. net. Receipts 5000 head. *Baltimore.*—Flour, \$3.75 a \$8.25 per bbl. No. 2 western wheat, \$1.20; Maryland red, \$1.30 a \$1.35; am \$1.37 a \$1.40. Yellow corn, 58 a 59 cts.; south white, 54 a 57 cts. Oats, 40 a 42 cts. *Chicago.*—No. 1 spring wheat, \$1.07; No. 2 do, \$1.05; No. 3 do, 95 cts. No. 2 corn, 46 1/2; No. 3 do, 45 1/2 cts. Barley, 87 a 90 cts. Lord, \$1.20 per 100 lbs. *London.*—No. 2 red fall wheat, \$1.20 a \$1.21; No. 3 \$1.10. No. 2 corn, 41 cts. Oats, 33 a 33 1/2 cts.

NOTICE.

The Annual Meeting of the Auxiliary Bible Association of Friends of Philadelphia Quarterly Meeting, will be held on the 10th inst., at 717 Chestnut street, on Thursday evening, 25th inst., at 7 1/2 o'clock.

Members of the Female Branch are invited to attend. A. M. KIMBER, Secretary.

Philadelphia, 10th month 9th, 1876.

WESTTOWN BOARDING SCHOOL.

SPECIAL NOTICE TO PARENTS AND OTHERS. Committee having concluded to divide the School into distinct classes more fully than has hitherto been done, and in such manner that all the pupils of each class, so far as practicable, recite together in their own studies, this change will take effect at the opening of the next session; and it is believed that it will so facilitate the classification of the School that the class may commence reciting on *Fourth day morning, 1st of Eleventh month.* It is therefore particularly requested that all the pupils be at the School by that day evening, and that all those who were not at Westtown during the past session present themselves for examination on Second-day, or not later than 7 o'clock Third-day morning.

WESTTOWN BOARDING SCHOOL.

The Winter Session of this Institution opens Second-day, 10th mo. 30th. Parents and others interested in such matters will please make application to BENJAMIN W. PASSMORE, *Sup't.* (Address Street B. P. O., Chester Co., Pa.) or to CHARLES J. ALL Treasurer, No. 301 Arch St., Philadelphia.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward), Philadelphia

Physician and Superintendent—JOSHUA H. WOODRUFF, M. D.

Application for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' meeting-house, Maney, Penn. on Fourth-day, 10th mo. 4th, 1876, JOHN M. SHUPARD, of Greenwich, N. J., to CATHERINE, daughter of Edward and Sarah Whitacre, of Maney, Penna.

DIED, at Friends' Asylum, Frankford, Penna., the morning of the 20th of 8th mo. 1876, DEBORAH widow of the late Jehu Fawcett, in the 70th year of age, a member of Salem Monthly Meeting, Columbia Co., Ohio.

WILLIAM H. PILE, PRINTER,

PHILADELPHIA.

For "The Friend."

Mission of George Bogle to Tibet.

(Continued from page 65.)

Tassissou, the capital of Bhutan, is situated in a valley, surrounded by high mountains. The character, government and religion of the people, are very similar to those of Tibet, with which it is closely connected, and which it is partially subject. The priests are a numerous and influential body. When admitted into orders, they take a vow to live chaste, to kill no living creature, and to abstain from eating animal food on the day on which it is killed. Though marriage is not absolutely prohibited to those connected with the government, yet finding it a bar to preferment, they seldom enter into that state. In the palace at Tassissou there were 3000 men and not a woman. As an illustration of the unwillingness to take animal life, Dr. Bogle mentions that one day on a visit to the Lama-timboché, who was then at the head of ecclesiastical affairs in Bhutan, his companion, Dr. Hamilton, exhibited a microscope. His effort to catch a fly to put under the glass, threw the whole room into confusion, and the Lama was greatly frightened lest he should have killed it!

His reception by the Rajah is thus described in a letter to his sister: "On the day fixed to receive me I walked to the palace of the Deb Rajah. If there is any pleasure in being amazed at, I had enough of it. Being the first European they had ever seen in these parts, the windows of the palace and the road that led to it were crowded with spectators. I am sure there were 3000. After passing through three courts, and climbing two iron-ladders, I was carried into an antechamber hung round with bows and arrows, words, matchlocks, cane-coiled targets, and other implements of war, and filled with a number of priests, servants, &c., squatted down in different places. Having waited here about half an hour, I was conducted to the Rajah. He was seated upon a throne, or pulpit, if you please (for that is what it is like), raised about two feet from the ground. At entering I made him three low bows, in stead of as many prostrations, with which, according to the etiquette of this court, I ought to have approached him. I then walked up and gave him a white satin handkerchief, while my servants laid my presents of spices, cloths, cutlery, &c., before him; after which I

was conducted to a cushion prepared for me at the opposite end of the room. As all this passed in a profound silence, I had now time to get over a kind of flurry which it had occasioned. In the meantime several copper trays, with rice, butter, treacle, tea, walnuts, apricots, cucumbers, and other fruits, were set before me, together with a little stool and a china cup. But it is time I should make you acquainted with the company, and let you know where you are.

"The Deb Rajah was dressed in his sacerdotal habit of scarlet cotton, with gilded mitre on his head, and an umbrella with fringe-twirling over him. He is a pleasant-looking old man with a smirking countenance. On each side of him his principal officers and ministers to the number of a dozen were seated upon cushions close to the wall, and the rest of the company stood in the area or among the pillars. The panels of the room and also the ceiling were covered with Chinese sewed landscapes and different colored satins; the pulpit was gilded, and many silver and gilt vases about it; and the floor all around was laid with carpets. At the opposite end of the apartment, and behind where I sat, several large Chinese images were placed in a kind of niche or alcove, with lamps of butter burning before them, and ornamented with elephants' teeth, little silver temples, china-wares, silks, ribbons, and other gewgaws."

"In came a man carrying a large silver kettle, with tea made with butter and spices, and having poured a little into his hand and drank it, he filled the Deb Rajah a cup, then went round to all the ministers, who, as well as every other *Boot*, are always provided with a little wooden cup, black glazed in the inside, wrapped in a bit of cloth, and lodged within their tunic, opposite to their heart and next their skin, which keeps it warm and comfortable; and last of all the cup bearer filled my dish. The Rajah then said a grace, in which he was joined by all the company. When we had finished our tea, and every man had well licked his cup, and deposited it in his bosom, a water tabby gown, like what Aunt Katty used to wear, with well-plated haunches, was brought and put on me; a red satin handkerchief was tied round me for a girdle. I was conducted to the throne, where the Deb Rajah bound my temples with another satin handkerchief, and squeezing them hard betwixt his hands, muttered some prayers over me, after which I was led back to my cushion. We had next a cup of whisky fresh and hot out of the still, which was served round in the same manner as the tea, of which we had also two more dishes, and as many graces; and last of all betel nut.

"During these different refreshments a great deal of complimentary conversation passed between me and the Deb through the means of an interpreter, which, however brilliant and witty, I will not here set down. At taking leave the Rajah tied two handker-

chiefs together, and threw them over my shoulders by way of a sash. Thus attired, I paid two or three visits to some of the officers in the palace, and walked home, like Mordecai, in great state to my lodgings."

While in Bhutan, a letter was received from Teshu Lama of Tibet, prohibiting the further advance of the mission, on the ground that the country was subject to the Emperor of China, who had ordered that no Moghul, Hindustani, Patan, or Fringy [European], should be admitted. This was accompanied with presents and a letter to Warren Hastings, which Bogle steadily refused to receive. He found there was much jealousy of Europeans; and was compelled to remain several months in Bhutan before permission could be obtained to go on to Tibet. During his stay here, Bogle endeavored to open the way for the traffic he was attempting to establish between Bengal and Tibet, by representing to the Bhutan government the advantages that would result to it from the passage through its territory of an extensive commerce.

Our traveller left Tassissou on the 13th of 10th mo., on his Tibetan journey. A shower of snow which had whitened the tops of the mountains greatly surprised his Bengalese attendants, who had never seen such a thing before. They asked what it was of the Bhutan people, who told them it was white clothes, which the Almighty sent down to cover the mountains and keep them warm. Bogle adds: "This solution required, to be sure, some faith; but it was to them just as probable as that it was rain, or that they were afterwards to meet with water hard as glass, and be able to walk across a river."

"We arrived at Essana after midday on the 15th of October. This is a village situated in a small but fruitful valley. Everybody was busy with the harvest. As soon as a field of rice is ripe the water is drained off, and the stream that supplied it diverted into a different channel. It is then cut down with toothless sickles, and is either placed against the narrow ridges which surround the fields and separate them from each other, or it is laid flat upon the stubble ground. In a few days it is built up in little ricks, regularly, but without being bound. From these it is taken down; a beam is raised breast high, and supported upon two posts; under it a large mat is spread, and the men and women, leaning upon it, tread out the rice with their feet. A different method is used with the wheat, which is bearded. It is tied up in small sheaves. In some places (Kepta) they separate the grain from the straw by burning it; in others (Tassissou) they thrash it out with flails. The wheat is reaped in the beginning of June.

"In all these different occupations of husbandry the heavy burden lies upon the fair sex: they have a hard lot of it. Besides all this, the economy of the family falls to their share. They have to dress the victuals and

feed the swine. They are not much troubled indeed with washing or scrubbing; the fashion of the country renders this quite unnecessary."

"On the 23d they arrived at the boundary of Bhutan, which is marked by six heaps of stones with banners. Before them lay the elevated plain of Tibet; and to the east and south, the mountains over which they had been passing.

"The first object that strikes you, as you go down the hill into Tibet, is a mound in the middle of the plain. It is where the people of Pari-jong expose their dead. It happened, I hope not ominously, that they were carrying a body thither as we came down. Eagles, hawks, ravens, and other carnivorous birds were soaring about in expectation of their prey. Every village has a place set apart for this purpose. There are only two exceptions to it. The Lamas are burnt with sandal-wood, and such as die of the smallpox are buried, to smother the infection.

"As we advanced a little farther, we came in sight of the castle of Pari-jong, which cuts a good figure from without. It rises into several towers with the balconies, and having few windows, has the look of strength; it is surrounded by the town. The houses are of two low stories, flat-roofed, covered with bundles of straw, and so huddled together that one may chance to overlook them. There is little to be said for them. The ceilings are so low, that I have more than once been indebted to the thickness of my skull; and the beams being very short, are supported by a number of posts, which are little favorable to chamber-walking. In the middle of the roof is a hole to let out the smoke, which, however, departs not without making the whole room as black as a chimney. This opening serves also to let in the light; the doors are full of holes and crevices, through which the women and children keep peeping. I used to give them sugar canny, and sometimes ribbons; but I brought all the children of the parish upon my back by it. The straw upon the top keeps the house warm. The same style of architecture prevails in the villages upon the road. It has a mean look after the lofty buildings in the Deb Rajah's country; but having neither wood nor arches, how can they help it?

"There is no walking out after it is dark, on account of the number of dogs which are then let loose; they are of the shepherd breed, the same kind with those called Nepal dogs, large size, often slaggled like a lion, and extremely fierce."

"On the 27th they left Pari-jong, under the escort of one of the Tesha Lama's officers named Paima. On arriving at a heap of stones in the plain opposite to a high rock covered with snow, the following ceremony was performed: "Here we halted, and the servants gathering together a parcel of dried cow-dung, one of them struck fire with his tinder-box, and lighted it. We sat down about it, and the day being cold, I found it very comfortable. When the fire was well kindled, Paima took out a book of prayers; one brought a copper cup, another filled it with a kind of fermented liquor out of a new-killed sheep's paunch, mixing in some rice and flour, and after throwing some dried herbs and flour into the flame, they began their rites. Paima acted as chaplain. He chanted the prayers in a loud voice, the others ac-

companying him, and every now and then the little cup was emptied towards the rock. About eight or ten of these libations being poured forth, the ceremony was finished by placing upon the heap of stones the little cup, sign,* which my fond imagination had before offered up to my own vanity. The mountain to which this sacrifice was made is named Chumalhari. It stands between Tibet and Bhutan, and is generally white with snow. It rises almost perpendicular like a wall, and is attended with a string of smaller rocks, which obtain the name of Chumalhari's sons and daughters.

"As the water of the Ganges, or of some refreshing brook, is considered holy among the sun-scorched Hindus, so rocks and mountains are the objects of veneration among the Lama's votaries. They erect written standards upon the tops of them, they cover the sides of them with prayers formed of pebbles, in characters so large * that those that run may read."

(To be continued.)

For "The Friend."

An Epistle of George Fox.

Although the following epistle of George Fox was written to Friends in his day, I believe it to be applicable to some in this our day. Many who go under the name of Friends, have let fall this testimony to "plainness of speech, behaviour and apparel," and are copying after the fashions of a "vain and perishing world," not only the young, but others in more advanced life, who ought to be good examples to their younger brothers and sisters. "Be not conformed to this world," are told in scripture, "but be ye transformed by the renewing of your minds, that ye may prove what is that good and acceptable and perfect will of God concerning you." And there was another class, viz. the old people, who were going into the earth, whom he also warned; so that all might beware and keep out of those snares.

J. S.

Ohio.

"While I was in the city I had a concern upon my spirit with respect to a twofold danger that attended some who professed truth; one was of young people's running into the fashions of the world, and the other was of old people's going into the earth. And that concern coming now again weightily upon me, I was moved to give forth the following as a reproof to such, and an exhortation and warning to all Friends to beware of and keep out of those snares.

"To all that profess the truth of God.

"My desires are that you walk humbly in it; for when the Lord first called me together, he let me see that young people grew up together in vanity and the fashions of the world, and old people went downwards into the earth, raking it together; and to both these I was to be a stranger. And now, friends, I do see too many young people that profess the truth grow up into the fashions of the world, and too many parents indulge them; and amongst the elder some are declining downwards and raking after the earth. Therefore, take heed that you are not making your graves while you are alive outwardly, and leading yourselves with thick clay. Hab. ii. 6. For if you have not power over the earthly spirit, and

that which leadeth into a vain mind, and fashions of the world, and into the earth, though you have often had the rain fall upon your fields, you will but bring forth thistles, briars, and thorns, which are for the world. Such will become brittle, peevish, fretful spirits, that will not abide the heavenly doctrine, the admonitions, exhortations, and proofs of the Holy Ghost, or heavenly Spirit of God; which would bring you to be conformable to the death of Christ, and to the image, that ye might have fellowship with him in his resurrection. Therefore it is good for all to bow to the name of Jesus, theiraviour, that all may confess him to the glory of God the Father. For I have had a concern upon me, in a sense of the danger young people's going into the fashions of the world, and old people's going into the earth, and many going into a loose and false liberty till at last they go quite out into the spirit of the world as some have done. The house which hath been built upon the sand on the sea-shore, not upon Christ the Rock; that is so soon in the world again, under a pretence of liberty of conscience. But it is not a pretence of conscience, nor in the Spirit of God, nor Christ Jesus; for in the liberty in the Spirit there is the unity, which is the bond of peace, and all are one in Christ Jesus, in whom the true liberty; and this is not of the world for he is not of the world. Therefore all who stand fast in him, as they have received him; for in him there is peace, who is the Prince of Peace, but in the world there is trouble. For the spirit of the world is a troublesome spirit, but the Spirit of Christ is peaceable Spirit; in which God Almighty preserve all the faithful. Amen. G. F."

For "The Friend."

The great Submarine Blast at Hallett's Point Reef Hell Gate, in the East River, New York.

(Concluded from page 68.)

THE REEF DEMOLISHED.

By 2 o'clock Mr. Streidenger announced to General Newton that everything was read in his department, and that the dynamite cartridge to cut the rope suspending the circuit closer, occupied its all-important post. The general quietly expressed his satisfaction. Indeed, nothing throughout the day seemed to provoke him out of a condition of stolid cool-headedness, which must surely have been the result of a combination of confidence in his plans and a powerful will—for it may have been one of the most trying hours of his life. All whose services were not required were then ordered to leave the works and seek a safe and advantageous retreat in the direction of Mr. Ramsey's grounds. Mr. Streidenger and a chosen corps of assistants then proceeded to carefully lower the metal plates into the cells of the batteries by means of crane handles. This was at 2.25. At 2.30 Mr. Streidenger removed the wooden truss, which for safety's sake, had been placed between the pins and the cups of the circuit closer, in order in case of accident, to prevent the table, from which the pins depended falling and so closing the circuit and firing the mine prematurely. There were thirty-three pins and cups for general purposes, and an extra one for the use of Gen. Abbott in making his own delicate experiments as to the amount and force of the shock wave, the fall of the table and pins being about twelve inches. "Ready, Sir," cried Mr. Streidenger, and the next mo-

* A branch of a tree with a white handkerchief fastened to it.]

ent he, the general, and the few others remaining on their way in the steam launch, to the firing point at Mr. Ramsey's, where the general had his initiatory battery. The first and second warning guns had long since, and the third and last stopped all talking and caused a good many persons, who were not over sure of their nerves, to hold their breath. The general approached his instruments, carefully looked into the nine shells of his three batteries to assure himself once more that all was right, and then turned to the Morse key, which was to order the mash up of Hallett's point.

The tiny finger of little Mary Newton, guided by the firm hand of her father, pressed the magic key, and the explosion of the torpedo which severed the rope suspending the circuit loser was lost in the grand and magnificent explosion which almost simultaneously, to the unappreciable fraction of a second, followed.

Those who expected to see the bomb-proof and its silent occupants—the batteries—knocked to pieces were confounded. They were precisely as the general and Mr. Striedinger left them, and a visitor dropping from the clouds would never dream that they had been so recently in operation, much less of the tremendous explosion they had brought about. The hanging doors of the bomb-proof had not their slender props knocked away by any shock; not a drop of the chemicals was spilled from the 800 battery cells, and even the mercury, which had been pressed out of the cups by the sudden entrance of the ins, lay in small globules in distinct circles round each cup—just where the globules fell. Even the wooden crosshead, from which the rope with its dynamite torpedo hung, was not moved or shaken one jot.

The total absence of any trace of the effect of the shock about the batteries was remarkable even to the minds of those who undertake these things and expected very little sign of shock. It only shows how well Gen. Newton and his associates had laid their plans and made all their calculations, and how well Mr. Striedinger had carried out those plans when made. And yet the explosion must have been terrific in the mine. The gaseous coloring of the water showed that, and, if that were not enough, the odors of combusted nitro-glycerine which swept over unfortunate Corville—as though a hundred tallow factories were on fire—would have been ample proof of what had been going on below the water.

The result was just what he had confidently asserted weeks ago that it would be. An engineer who has had long experience in the use of explosives exclaimed, "The man was a prophet," almost before the detonation had ceased. A column of water was seen to shoot up to the height apparently of 75 or 80 feet, carrying a part of that distance a few stones of small size and several portions of sections of the coffer dam. Some imagined that huge portions of rock were thrown up, but spectators from both sides agreed in the statement that only small rocks and portions of the dam were projected into the air. The report followed instantly, and, at the firing station, was not so loud as that caused by the discharge of two or three pieces of ordnance, while the jar was no greater than that felt from such a discharge at the distance, say, of 100 feet. The commotion of the water was great for a few

minutes, and the earth of which the coffer dam was partially composed made it very muddy, while pieces of timber and boards were thrown over and over on its surface in such a manner as to show how greatly the element was stirred. For a few minutes after the explosion the people on the shore and on the vessels uttered not a word, hardly breathing, as they stood in perfect silence watching the spot where more than 50,000 pounds of powerful explosives had been fired. When the conviction at length forced itself upon their minds that the great explosion, which had been the subject of so many wild theories, and had been the cause of fear to thousands, was over, the cheers that broke from the crowds were deafening, while the whistle of every steamer was employed to increase the sounds of rejoicing. "Three cheers for Gen. Newton," some one exclaimed, and they were given and prolonged by loud and enthusiastic shouts.

It was impossible, after the explosion had taken place, to accurately sum up one's sensations. The four sensible effects were the noise, the wave of compressed air, the trembling of the earth, and the ejected mass of earth and rocks, and the uplifted water, but many of the spectators on Ward's Island did not observe all of these effects. A number of persons stated that they heard no noise, while others said that they were not aware of any commotion of the air. The disturbance of the atmosphere indeed was very slight, and was probably unfelt by those who had taken shelter behind the trunks of trees. While there was a great variety of opinions as to the probable results, it was believed that a tidal wave of considerable magnitude would be set in motion, and yet on this point, upon which all the spectators were agreed, all were alike mistaken. The commotion was concentrated immediately over the mine, and the surrounding surface was unaltered. It had been thought probable that windows on the island would be broken, and many persons had feared that frail structures would be demolished. Investigation showed, however, that not a pane of glass was broken, that not even a dead limb fell from any tree, and that the only damage caused was to an old frame shanty, where two or three bricks were jarred from a dilapidated chimney.

The appearance of Hallett's Point when it was reached was so changed that it was hardly recognizable. Two or three hundred row boats and numerous steamers reached the spot almost as soon as General Newton. The building containing the office of Superintendent Boyle, which stood formerly upon the very edge of the shaft, had been thrown back from its former position in shore about 10 feet and partially overturned. The steps that led down into the shaft had been thrown up on the bank against the office, showing with what power the water had rushed upward. The condition of the ground and the buildings showed the manner in which the water had fallen over them after its fountainlike ascent. The bomb-proof building was uninjured, and nothing was materially displaced within it. The break-water, which extended each way from the coffer-dam, was badly shaken in places, and plank and pieces of timber were thrown about. Otherwise there was little damage. Windows in the boiler and engine-houses facing the mine, and only about 50 feet distant, were not broken. The people who moved out of the neighbor-

ing house might have remained, as it was not injured.

THE SUBSTANTIAL SUCCESS OF THE EXPLOSION.

With regard to the more substantial success of the explosion, Gen. Newton and all the engineers who were present say that nothing can be definitely known till the reef has been carefully surveyed and sounded, though they have every reason to hope that the reef was entirely blown to pieces. One piece of indirect testimony can be adduced by the writer in favor of this surmise. In addition to being well acquainted with the position and general outline of the reef and the arrangement of the headings and galleries of the mine, he had taken the precaution to have in his hand at the moment of the explosion, a small diagram of the reef. When the small columns or series of jets of water first thrown up by the explosion had fallen, but while the disturbance of the water was still in full bubbling activity from the escape of the remaining liberated gases, he was enabled to compare momentarily, the shape of the water disturbance with the shape of the original reef. They correspond in a remarkable degree, the only notable difference being a lesser surface disturbance as the depth of water increased over the reef. This would appear to point to an equal action in the mine of the explosives and to a correspondingly equal break up of the rock. As to the success of Gen. Abbott's interesting experiments with regard to the shock wave nothing can be known till he has collected his data from his various points of observation and made his calculations and deductions. This is impossible for a day or two, and any statements of the results of his labors will be mere guess-work and totally unreliable. As a mere matter of science, Gen. Abbott's deductions will be most interesting and valuable; for practical purposes the Hell Gate explosion has shown, by its innocence of all harm, that they are unimportant. No one will again fear any great shock from submarine explosions of dynamite.

General Newton, in a communication to the New York Commissioners of Pilots regarding the blasting of Hell Gate, says the reef at Hallett's Point has been swept. "From 180 feet distant from the shore line to the line of buoys the bottom slopes gradually from eight feet of depth at near low water to twenty feet. Outside the line of buoys nothing less than twenty feet of depth at mean low water was observed. The divers have been examining the reef, and report a thorough break up."

To Youthful Readers.—There is a passage in the Memoirs of Charles Greville, that we earnestly commend to the attention of young readers. It does little good to read unless the right books are read, and unless they are read carefully and studiously. Even good books may be read in such a way that the time given to them is almost wasted. To read a bad book is of course worse than a waste of time. C. Greville was a man who saw life in every favored form, and who was on familiar terms of acquaintance with nearly all the distinguished men of his time. On one occasion, after he had been listening to the conversation of some learned men, he was led to contrast their knowledge with his own, and he wrote down his thoughts as follows:

"A painful sense came over me of the difference between one who was superficially read

and one who has studied, one who has laid a solid foundation in early youth, gathered knowledge as he advanced in years, all the stores of his mind being so orderly disposed that they are at all times available, and one who (as I have done) has huddled together a quantity of loose reading, as vanity, curiosity, and not seldom shame impelled. Reading thus, without system, more to cover the deficiencies of ignorance than to augment the stores of knowledge, loads the mind with an undigested mass of matter, which proves when wanted to be of small practical utility; in short, one must pay for the follies of one's youth. He who wastes his early years in horse-racing and all sorts of idleness, flitting away among the dissolute and the foolish, must be content to play an inferior part among the learned and wise. Some instances there are of men who have united both characters; but it will be found that these have had frequent laborious intervals; that though they may have been vicious, they have never been indolent, and that their minds have never slumbered and lost by disuse the power of exertion. Reflections of this sort make me very uncomfortable, and I am ready to cry with vexation when I think on my misspent life. If I was insensible to a higher order of merit, indifferent to a nobler kind of praise, I should be happier far: but to be tormented with the sentiment of an honorable ambition and with aspirations after better things, and at the same time so sunk in sloth and bad habits as to be incapable of those exertions without which their objects are unattainable, is of all conditions the worst.

Dear young friends, save yourselves from such regrets.—*Nat. Baptist.*

Only a Pin.

Only two or three days ago an overseer in an American mill found a pin which cost the company three hundred dollars.

"Was it stolen?" asked Susie. "I suppose it must have been very handsome. What was it, a diamond pin?"

"Oh, no, my dear?" not by any means. It was just such a pin as people buy every day, and use without stint. Here is one upon my dress."

"Such a pin as that cost three hundred dollars!" exclaimed John. "I don't believe it." "But mamma says it is a true story," interposed Susie.

"Yes, I know it to be true. And this is how the pin happened to cost so much. You know the calicoes, after they are printed and washed, are dried and smoothed by being passed over heated rollers. Well, by some mischance, a pin dropped so as to lie upon the principal roller, and indeed became wedged into it, the head standing out a little from the surface.

Over and over went the roller, and round and round went the cloth, winding at length upon still another roller, until the piece was measured off. Then another piece began to be dried and wound: and so on till a hundred pieces had been counted off.

These were not examined immediately, but removed from the machinery and laid aside. When at length they came to be inspected, it was found that there were holes in every piece throughout the web, and only three-quarters of a yard apart. Now, in each piece there were from thirty-five to forty-five yards, and

at twelve cents a yard that would count up to five hundred dollars.

Of course, the goods could not be classed as perfect goods, so they were sold as remnants, at less than half the price they would have brought had it not been for that hidden pin.

Now, it seems to me that when a boy takes for his companion a profane swearer, or a lad who is untruthful, and a little girl for her playmate one who is unkind or disobedient, or in any way a wicked child, they are like the roller which took to its bosom the pin. Without their being able to help it, often the evil influence clings to them, and leaves its mark upon everybody with whom they come in contact.

That pin damaged irreparably forty hundred yards of new print, but bad company has ruined thousands of souls for whom Christ died. Remember "one sinner destroyeth much good," therefore avoid evil companions.—*Selected.*

THE SPELL OF LOVE.

Whatever of good from earth be gone,
Whatever the human hand disgrace,
Still trust in God, and labor on,
And cherish kindness toward the race.

Regard with hopeful heart the worst;
Misguided may have been his youth,
Or his first childhood curse
With oft-seen breach of right and truth.

Or trained he may have been to theft,
And cruel ways and mean deceit;
Till slowly, but at last, bereft
Of all in earliest years so sweet.

Yet, since from God his being springs,
Somewhat his heart has still of good;
A latent love of better things,
A power at least of gratitude.

Then try him with the spell of Love;
Oh, show him there is one in thee
Who longs to win for heaven above
A brother sunk e'en low as he.

Be faithful, but upbraid him not;
For who, O fellow-man, art thou?
Had his but been the happier lot,
Say, which had been the holier now?

Like Him thou lovest, love display;
Through love the weak may grow the best;
And dear to God and blest are they
Who joy to multiply the blest.

ETERNAL BEAM OF LIGHT DIVINE.

Eternal beam of Light divine,
Fountain of uncharmed love,
In whom the Father's glories shine
Through earth beneath, and heaven above!

Jesus, the weary wanderer's rest,
Give me Thy easy yoke to bear;
With steadfast patience arm my breast,
With spotless love and lowly fear.

Thankful I take the cup from Thee,
Prepared and mingled by Thy skill—
Though bitter to the taste it be,
Powerful the wounded soul to heal.

Be thou, O Rock of Ages, nigh!
So shall each murmuring thought be gone;
And grief, and fear, and care shall fly
As clouds before the mid-day sun.

Speak to my warring passions—Peace!
Slay to my trembling flesh—Be still!
Thy power my strength and fortress is,
For all things serve Thy sovereign will.

—Charles Wesley.

D. liberate long of what thou canst do but once.

"Bibliotheca Anti-Quakeriana; or, a Catalogue of Books Adverse to the Society of Friends, alphabetically arranged, with Bibliographical notices of the authors, together with the answers which have been given to some of them by Friends, and others. B. Joseph Smith: author of a Descriptive Catalogue of Friends' Books. London, 1873."

We apprehend few of the members of our religious Society at the present day, have a adequate idea of the labors which our early Friends underwent in advocating the doctrines of the gospel, and in refuting the attacks made by opposers, through the press. The above-named publication, which has been prepared apparently with a view to facilitate the business of the compiler, who is a bookseller in London, may enable the reader to judge of the extent and variety of these labors which attacks, from almost every quarter brought upon faithful Friends at the rise of the Society, and upon many of succeeding generations. It consists of 462 octavo pages and contains the titles of considerably more than a thousand different volumes and smaller treatises. The compiler states in the preface "This work does not include (except in a few instances) any entry of books written by antagonists who once belonged to the Society such as Bugg, Keith, Crowdon, and others that being already done in my Catalogue of Friends' Books, lately published; but this contains an account of all books (as far as has come to my knowledge) written by those of other religious denominations, &c.; and the reader will perceive on examination, that the greatest adversaries the Society had to contend with in early days, were the non-conformist divines." A short biographical sketch of many of these writers is also given, taken "mostly from sources furnished by their own bodies, or favorable to them." Although we think that in some, perhaps many cases, these publications, particularly those of anonymous adversaries, might have been properly suffered to remain in oblivion, yet to those who are engaged in carefully examining into the origin and nature of the controversial writings of our early Friends, this catalogue will no doubt, prove of great convenience. By an index of the authorship of the replies made by Friends, we notice that, next to George Fox, George Whitehead appears to have been most frequently engaged to defend in this way the cause of Truth; who, as we learn from his Journal, was also often called upon in public assemblies to vindicate its doctrines and testimonies, and who thus records his sense of the qualifications by which he was enabled to perform these services:—"The Lord gave me to perceive when a proposition was false and when the inference was unjustly deduced from a proposition though in itself true; knowing that it is a principal part of true logic in disputations, to see that the proposition is true, or truly stated, and that the consequence naturally follows, so that they truly agree. After the Lord was pleased to give me a clear understanding in this matter, between the true and the false way of arguing between what was true logic and what was falsely so termed,—as there is a true science, and that which is falsely so called; then I was the more prepared to withstand all the empty opposition of pretended logic and syllogisms which I met with, both at Cambridge and other places, and valued them no more

man pedantry; and I could easily invert an adversary's absurdity back upon him by way of syllogism. I have met with many priests very dull at their acquired artificial logic, and ready to run into many absurdities, while they would often contemn and deride us as illiterate men; but when we have discovered and refuted their ignorance and absurdities, then they would cry out against us, and assure us as jests. Thus I have been often eaten by them."

Of the answers which have been enumerated, were written by George Fox, 47 by George Whitehead, 45 by William Penn, 15 by Edward Burrough, 11 by Francis Howgill, 23 James Naylor, 6 by Robert Barclay, and by Isaac Pennington. The total number of authors whose works are cited, including those of a late date, is over two hundred.

For "The Friend."

[We take the following from the present month's number of the *British Friend*, expecting we suppose from a foreign paper. It is gratifying to observe that some of those who profess with Friends in the south of France, are willing thus openly to suffer for their testimony against war, but we believe it would tend to their strength, as well as advance this righteous cause before the people, if only to refuse serving as a soldier, but to all office or hospital service as a substitute therefor.—Eus.]

A "Friend" Conscript in the French Army.

A court-martial sat recently at Marseilles a recruit who, as a member of the Society of Friends, positively refused to take up arms and go out to exercise. His name is Nisolle, age 28, and he belongs to a wealthy and just, benevolent family in the department of Gard. When called out for 28 days' training, M. Nisolle went to the regiment at Nismes on the 21st of last August. He permitted them to put uniform on him, but when he was handed a musket he positively refused to take it, saying his religion prevented him from serving under arms against his fellow creatures. It was explained that no such service was at present required; but he answered that he would incur the moral obligation in accepting the musket. On the 4th of September he was conducted to the military prison. When before the court the president, the usual French way, questioned the silent prisoner. "Suppose," said the officer, "that an assassin was about to kill your father, what would you do?" "I would reason with him and try to prevent the murder, without having recourse to arms." "But if you did not succeed, would you let your father be killed?" "I would." This caused a prodigious sensation and the prosecutor demanded severe punishment. Poor Nisolle's defender showed that in previous years three members of the Society of Friends, who were drawn into the army, were left free from active military service, but were placed as clerks in the offices or as wardsmen in the hospitals; and he asked the same privilege for his client. The court sentenced him to two months' imprisonment and the costs. It came out in a trial that the patriarchal family of Nisolle composed of six persons, but that the father planted laid every day for fifteen, nine angry poor persons being invited to partake of the meal. This is true goodness, and we do not help thinking the punishment of the young Friend too severe a penalty.

For "The Friend."

Circular of the Bible Association of Friends in America.

In again calling the attention of Auxiliaries to the Annual Queries to be answered previous to the general meeting of the Association on the 1st of Eleventh month, the Corresponding Committee would press upon Friends, who have been engaged in the distribution of the Holy Scriptures, the importance of furnishing full and accurate answers to all the Queries, and of forwarding their report seasonably to the Depository.

It may be recollected, that in making donations to Auxiliaries, the Board are guided in deciding what number of Bibles and Testaments shall be sent to each, by the information given in its report. Hence those Auxiliaries that do not report in time, are liable to be left out in the distribution.

Specific directions should be given in every case, how boxes should be marked and forwarded; and their receipt should always be promptly acknowledged.

Address John S. Stokes, No. 116 N. Fourth Street, Philadelphia.

SAMUEL BETTLE,
CHARLES RHOADS,
ANTHONY M. KIMBER,
Committee of Correspondence.

Philada., Tenth mo. 1876.

QUERIES.

1. What number of families or individuals have been gratuitously furnished with the Holy Scriptures by the Auxiliary during the past year?
2. What number of Bibles and Testaments have been sold by the Auxiliary within the past year?
3. How many members, male and female, are there belonging to the Auxiliary?
4. What number of families of Friends reside within its limits?
5. Are there any families of Friends within your limits not supplied with a copy of the Holy Scriptures in good clear type, and on fair paper; if so, how many?
6. How many members of our Society, capable of reading the Bible, do not own such a copy of the Holy Scriptures?
7. How many Bibles and Testaments may probably be disposed of by sale within your limits?
8. Is the income of the Auxiliary sufficient to supply those within its limits who are not duly furnished with the Holy Scriptures?
9. What number of Bibles and Testaments would it be necessary for the Bible Association to furnish gratuitously, to enable the Auxiliary to supply each family?
10. What number would be required in order to furnish each member of our religious Society, capable of reading, who is destitute of a copy, and unable to purchase it?
11. How many Bibles and Testaments are now on hand?

A New York secular paper gives the following incident, as a warning to the multitude of poor rich men whom we meet continually:

A gentleman died last week, at his residence in one of our up-town fashionable streets, leaving \$11,000,000. He was a member of the Presbyterian church, in excellent standing, a good husband and father, and a thriving citizen. On his death bed, lingering long, he suffered with great agony of mind, and gave continual expression to his remorse at what his conscience told him had been an ill-spent life. "Oh!" he exclaimed, as his weeping friends and relations gathered around his bed—"Oh! if I could only live my years over again, I would give all the wealth I have amassed in a life-time. It is a life devoted to money-getting that I regret. It is this which weighs me down, and makes me despair of the life hereafter." His clergyman endeavored to soothe him, but he turned his face

to the wall. "You have never reproved my avaricious spirit," he said to the minister. "You have called it a wise economy and forethought, but my riches have been only a snare for my soul! I would give all I possess to have hope for my poor soul!" In this state of mind, refusing to be consoled, this poor rich man bewailed a life devoted to the mere acquisition of riches. Many came away from his bedside impressed with the uselessness of such an existence as the wealthy man had spent, until he became a millionaire. All knew him to be a professing Christian and a good man, as the world goes, but the terror and remorse of his death bed administered a lesson not to be lightly dismissed from memory. He would have given all his wealth for a single hope of heaven.

From "Piety Promoted."

Hannah Hill, wife of Richard Hill, and daughter of Thomas Lloyd, formerly governor of the province of Pennsylvania, by Mary, the daughter of Gilbert Jones, of Welchpool, was born in Montgomeryshire, North Wales, at the seat of her ancestors, called Dolobran, the 21st of the Seventh month, 1666. She was a woman highly favored of the Lord, and possessed many excellent Christian virtues, as well as natural accomplishments. Coming over into Pennsylvania with her parents when young, soon after their arrival it pleased the Lord to remove her pious mother by death, when the care of the younger children devolved upon her. This close trial in the earlier part of her time was abundantly sanctified to her; for her mind being engaged to seek the Lord for her portion, and her father's God for the lot of her inheritance, he was graciously pleased, not only to favor her with the knowledge of himself, and the enjoyment of his living presence in the days of her youth, but also made her a singular instrument of good, and a blessing to her father's family.

As she grew in years, her conspicuous virtues, joined with a courteous deportment, justly gained the esteem and favor of most, if not all, of those with whom she conversed. Being earnestly solicited in marriage by John Delaval, who though a worthy man, was not at that time of the same religious communion, she, by her prudent conduct and pious resolution, to maintain the principles she professed, without deviating therefrom in a matter of such importance, did not agree thereto; until he after some time embraced the truth in sincerity of heart, and bore his cross like a humble follower of Christ. He received a gift in the ministry, and continued faithful therein to his death; concerning whom she gave this testimony, viz., "That he never used to her an expression of anger, or the product of a disturbed mind."

The decease of her husband proved to her a time of deep probation, having been heard to say, that in eight week's time she lost sight of her family by death, beginning with the decease of her beloved husband, and ending with that of her only child. Under these afflictive circumstances, as well as those which attended her during the remaining part of her life, of which she had a large share, she approved herself a shining example of patience in tribulation, and a meek, humble, self-denying follower of Jesus, her crucified and risen Saviour.

In the affluent station wherein Divine Pro-

vidence had placed her, her benevolent disposition was conspicuous in administering to the necessities of the indigent; her enlarged charity not being limited to those of her own profession. She was a true servant of the church, and in the sense of the apostle's expression, "one that washed the saints' feet," receiving with joy into her house the ministers and messengers of the gospel, for whom her love was great: The low, the poor and the mean, were objects of her peculiar care.

In her younger years she received a gift in the ministry of Christ's gospel, which she retained with faithfulness to the end; and though not large in her testimonies, yet they were with great modesty and soundness of expression. "Her doctrine dropped as the dew, and distilled as the small rain," and was therefore truly acceptable. She travelled in the service of the gospel to New England, and divers other parts of this continent, and was also concerned for the good order and discipline of the church, having for a number of years served in the station of clerk of the women's Monthly, Quarterly, and Yearly Meetings, wherein she gave satisfaction."

Although bodily weakness frequently attended her in the latter years of her life, it did not abate her love and zeal for the everlasting truth, which she experienced to be her support in every time of trial. When her dissolution drew near, she made many seasonable remarks and observations, and signified her acquiescence with the divine will, in the dispensations of his providence towards her; at one time particularly mentioning the expressions of the apostle, "That no chastening for the present seemeth to be joyous, but grievous; nevertheless, afterward it yieldeth the peaceable fruit of righteousness to them that are exercised thereby." This was her happy experience; and after a well-spent life, interpersed with a variety of exercising vicissitudes, she exchanged this state of existence, no doubt, for a blessed immortality in the regions of unmix'd felicity; after about three weeks' illness, on the 25th of the Twelfth month, 1726-7, in the sixty-first year of her age. Her corpse was respectfully attended by a large number of Friends and others, to the High street meeting-house in Philadelphia, where several living testimonies were borne, after which it was interred in Friends' burial-ground.

She was twenty-six years the wife of Richard Hill, who was a serviceable member both in church and state, and died in good esteem, the 4th of the Seventh month, 1729.

A young man entered the bar-room of a village tavern and called for a drink.

"No," said the landlord, "you have had the 'delirium tremens' once, and I cannot sell you any more."

He stepped aside to make room for a couple of young men who had just entered, and the landlord waited on them very politely. The other had stood by silent and sullen, and when they had finished, he walked up to the landlord and addressed him:

"Six years ago, at their age, I stood where these young men now stand. I was a man with fair prospects. Now, at the age of twenty-eight I am a wreck, body and mind. You led me to drink. In this room, I formed the habit that has been my ruin. Now, sell me a few glasses more, and your work will be done. I shall soon be out of the way;

there is no hope for me. But they can be saved. Do not sell it to them. Sell to me and let me die, and let the world be rid of me; but for Heaven's sake sell no more to them."

The landlord listened, pale and trembling. Setting down his decanter, he exclaimed: "God help me! this is the last drop I will ever sell to any one!"

And he kept his word.—*Late Paper.*

For "The Friend"

Notes on Algeria.

Algeria is constituted by a mass of mountains on the north coast of the African continent, extending from Morocco westward to the Pashalic of Tunis eastward, that is from longitude 8° west to 10° east, or 18 degrees, equivalent to 1,200 miles from east to west. The Atlas are told to the east in lower hills scarcely deserving the name of mountains, which form the back-ground of the Pashalic of Tripoli between the sea and the desert. Algeria is comprised between the 37th and 33rd degrees of latitude, and extends about 200 miles from the Mediterranean to the oases of the Desert, where mountains and raised plains disappear, and where the level is often only a few feet above the ocean. Mount Atlas, which constitutes this alpine country, instead of being formed by one range, as is generally supposed, is formed by three ranges, rather blended in the province of Constantine, but quite distinct in those of Algiers and Oran, with intervening valleys.

The northern part of Africa, from the shores of the Atlantic to the Red Sea and beyond, appears to have been inhabited from the dawn of historical times, by two distinct families of the Aramean branch of the white race, the Berbers and the Arabs; and the two families still exist in these countries. The Berbers have ever been mountaineers, agriculturists attached to the soil they cultivate, living in stone built cabins, owning flocks, but not horses, for which they do not care, as not adapted to their mountain residence. The Arabs have ever been nomadic, living in tents, owning the flocks which they drive from one region to another, from the plains to the lower valleys and *vice versa*. They attach great importance to the possession of horses and despise towns, which they destroy and do not rebuild.

The Carthaginians, the Romans, the Vandals, successively occupied the shores of Algeria and the fertile plains of the Tell, driving the original Arabs into the Great Desert, and the Berbers or Kabyles into the higher mountains, where both maintained their independence. When the religious and military migration of the Arabian Arabs took place after the death of Mahomed in the seventh century; the Arabs of the plains, reinforced by their eastern countrymen, occupied the entire country with the exception of the higher mountains, of which the Jurjura are the centre, where the Berbers or Kabyles successfully defended themselves. They, the Arabs, reigned supreme on the shore, on the plains, and on the lower mountain ranges, until the Turks took possession of Algiers (1516), of Tunis, and of Oran. Their power was destroyed in 1830, by the downfall of the Dey of Algiers, and their dominion in the three provinces of Algeria has fallen into the hands of the French. A recent traveller in this country, makes the following observations:

The Squill.—The bulb of the marit squill, the squill of druggists, varies in the size of the fist to that of a child's head, and it is, perhaps, the commonest plant Algeria. It extends all over the country, the highest mountains, in the driest, sandi hottest regions, and passing over the A descends into the desert itself, where it nearly the last plant seen. It is not used, ing considered poisonous by the inhabit

Date Palm.—The tree that constitutes riches of the Desert, that thrives the b and that more e-specially characterizes sandy plains beyond the great Atlas is date palm. It flourishes and ripens its fr in the most sterile sands—in sands all devoid of alluvial soil—if it can get water. believe it does not ripen its fruit out of Desert.

Grasshoppers.—The next morning I awakened at four in the morning by beating of drums, the blowing of bugles, and all the sounds of war. As Teniet is a c post of the French army on the borders the Desert, I thought it was some review military ceremony. On rising, however heard that news had arrived in the nig that an army of locusts were marching along the road, from the Desert, towards pass, and that a thousand soldiers had start as soon as it was daylight to meet the enem It appears that the locusts when they inva Algeria from the Desert, make for the pas through the Atlas, and if there is a road follo it, camping regularly at night. The locu we had met on our journey, two days be were no doubt the pioneers, the advan guard of the main army, now in full mar The troops were to endeavor to force the back in the day by noise and with branch of trees, and at night to make deep holes the ground, sweep them in and bury the I left the same day and heard no more on t subject. But later, whilst in Spain, I learn that the locusts succeeded in crossing t Atlas and spread over the fertile valleys the Chetif, doing much damage, and destru ing many of the magnificent crops which every where met my gaze. Thus the Fren soldiers whom I saw going out to fight th apparently contemptible enemy, must ha failed in their efforts, and have been signa defeated. They could conquer the Kabyle the Arabs, the wild denizens of the Deser but they were conquered in their turn by a army of grass-hoppers: a singular history.

Horses.—The horses driven were always pure Arab breed, and showed a speed and endurance that quite surprised us; they seeme to think nothing of twenty or thirty miles the full trot. I was told that with a light carriage they could easily do sixty or seven miles a day. One of the inspectors said he had repeatedly driven one of the horses the in the carriage a hundred and forty miles in two days in a light gig. Every kind of European horse has been tried on the roads i Algeria, but none can stand the climate an the work, the heat of summer, the moisture coolness and night fogs of winter. All breed down except the native Arab, which they drive exclusively. No doubt the constitution of the equine race has become modified in the course of centuries, so as to thrive and flourish under conditions inimical to more northern races. The country does not produce enough of these Arab horses for its own requirements so their exportation is not encouraged.

Keeping up False Appearances.—A great portion of the suffering which people in a peculiar circumstance have to endure, is brought upon them by their efforts to keep up appearances. They do not seem to be aware of the fact that the sting of pecuniary misfortune, if not extracted, is at least deadened by the mask and honest acceptance of the new situation.

Some families, when overtaken by misfortune, have the moral courage at once to admit the fact, and the practical wisdom to set about adjusting themselves to their changed circumstances. The costly house and furniture, the dresses and carriages, and the other appurtenances of an expensive and fashionable style of living, are sold, and the expenditures are brought within the reduced income. Such a family escapes the bitterest ills of misfortune. They are respected by their acquaintance; and, what is of far more consequence, they enjoy their own self-respect. They are not afraid to meet their butcher, the baker, and grocer, or anybody else who supplies them with the necessaries of life. They are not slaves to the requirements of a false position. Their economy, and prudence, and strength of character, build them anew; and in a few years they emerge from their troubles and rest themselves upon a surer foundation than ever before.

Nothing else does so well in any phase of life, as truth and honesty. And there are no other things that work so badly in social life for people who were once rich, but have come actually poor, to try and impose upon their neighbors by "keeping up appearances." *New York Ledger.*

Do I realize that time is both short and uncertain? And am I making a diligent use of the present, leaving nothing undone that I ought to do; trusting nothing to the uncertainties of the future, which to me may never come? Do I realize that my eternal welfare depends on the use I am making of the present? And am I diligent and earnest in working out my salvation, while God is waiting to work with me both to will and to do, that I may be saved?

The Habit of Saving.—It is a remarkable fact, that the habit of saving does not so much prevail in those counties where wages are the highest as in those counties where wages are the lowest. Previous to the era of the Office Savings Banks, the inhabitants of Wilts and Dorset—where wages are about the lowest in England—deposited more money in the savings banks, per head of the population, than they did in Lancashire and Yorkshire, where wages are about the highest in England. Taking Yorkshire itself, and dividing it into manufacturing and agricultural, the manufacturing inhabitants of the West district of York invested about twenty-five fillings per head of the population in the savings banks; whilst the agricultural population of the East Riding invested about three times that amount.—*Samuel Smiles.*

THE FRIEND.

TENTH MONTH 21, 1876.

We have observed with regret, the use, which we fear is increasing among members

of the Society of Friends in some neighborhoods, of certain words and expressions in a way inconsistent with their true meaning, and that weighty sense which we believe they are intended to convey.

We are well aware that the use of the term "Church," to indicate the building in which the congregation convenes is detected on the ground that it is nothing but a common and allowable figure of speech, and that the distinction is so wide between the two, that no one is liable to be led into error. Yet, we believe it is a fact, that the popular mind is being led by this form of speech to regard the building with something of that feeling which is only applicable to the body of sanctified believers in Christ. When George Fox began to preach the everlasting Gospel, he greatly moved the minds of many of his hearers by speaking of those buildings which they had been accustomed to style *beautiful and holy*, as men's piles of brick, stone and mortar. In holding fast the form of sound words, early Friends scrupulously avoided the use of the term in this sense, and thus were instrumental in bringing many away from these superstitious notions, in which it was the interest of the priests to imbue them. In one of the conferences of that undaunted advocate of the Truth, John Roberts, with the Bishop of Gloucester, he replied to the question, "Whether he went to Church?" by the remark, that "*Sometimes the Church comes to me*," which led to the following explanation of the views of Friends on this subject.

I call the people of God the Church of God, wheresoever they are met to worship Him in spirit and in truth. And when I say the Church comes to me, I mean the assembly of such worshippers, who frequently meet at my house. I do not call that a Church which you do, which is made of wood and stone; that is but the workmanship of men's hands, whereas the true Church consists of living stones, and is built up by Christ, a spiritual house to God." To this the Bishop replied: "We call it a Church figuratively, meaning the place where the Church meets." To which John answered:

"I fear you call it a Church hypocritically, with the design to awe the people into a veneration for the place, which is not due to it, as though your consecrations had made that house holier than others."

The Society of Friends has ever objected to speaking of the First-day of the week, as the Christian Sabbath. On this subject, Robert Barclay says: "We, not seeing any ground in Scripture for it, cannot be so superstitious as to believe, that either the Jewish Sabbath now continues, or that the First-day of the week is the anti-type thereof, or the true Christian Sabbath; which, with Calvin, we believe to have a more spiritual sense." From the frequency with which this term is misapplied, we think it behooves Friends carefully to observe the correct form of speech in relation to this subject.

The very common practice of speaking of the Bible, as "The Word of God," is one which Friends have frequently been called upon to testify against, as not sanctioned by Scripture; and tending to confusion of ideas. In a disputation which Thomas Story and his companion had on this point, this misapplication was thus clearly pointed out from the testimony of the apostle John: "In the beginning was the Word," but the Scriptures

were not in the beginning; 'and the Word was with God, and the Word was God'; but the Scriptures are not God; 'and the Word was made flesh'; but the Scriptures were never made flesh.

At the time when Friends first became a distinct people, it was customary to use the singular pronouns *thou* and *thee*, when speaking to one in an equal or inferior station in society; but to address one to whom it was intended to show especial deference or respect by the plural pronoun, *you*. This custom still continues in many of the rural parts of England. George Fox was shown, that a practice which had its root in the desire to flatter a fellow-mortal, was inconsistent with the purity of the Christian religion, which requires that every man should speak the truth to his neighbor; and he therefore used the same language to all. Wonderful indeed was the amount of ill-usage which our early Friends received for their faithful observance of this form of speech. At the present time, the more general adoption of the plural pronoun in speaking to all, whether high or low, has been made an excuse by some members of our Society for its use; and there has, in consequence, been a growing laxity in regard to it, in some quarters, though the root of the objection remains unchanged.

We are aware that the maintenance of these and others of what are called the minor testimonies of the Society, has often exposed Friends to the criticisms, and it may be, scorn, of the world and worldly professors, but we believe that their faithful observance is intimately connected with the best welfare of individuals, and that an unwillingness to support them often paves the way for other departures and inconsistencies. We would therefore encourage all steadfastly to follow the apostolic injunction, "Hold fast the form of sound words," knowing that it is declared, "he that is faithful in that which is least is faithful also in much."

In the first number of the present volume we published a letter of Ann Gilbert on the extension of the elective franchise to women, which a correspondent in England informs us does not deal with the question as it exists at the present time, and calls our attention to the following postscript to the letter alluded to, that was then omitted, viz: "It will be seen that this letter does not apply to the aspects of the question at present mooted. When a woman is sole head of a household, the family is entirely unrepresented, and voting for members of Parliament is a widely different thing from sitting as a member."

An obituary notice has been received from a subscriber at a distance whose signature is not given. We would again remind our contributors that these and other communications designed for publication in our columns should be accompanied by the name of the Friend who sends them.

SUMMARY OF EVENTS.

FOREIGN.—The efforts of the great Powers to end the insurrectionary war in European Turkey have thus far failed. The Porte refuses the peace conditions submitted to it by the great Powers, but has offered Servia an armistice of six months; and Montenegro one of five months, but in both cases the offer has been rejected. The Porte has handed to the ambassadors of the Powers a communication containing a scheme of re-

forms which provides that a legislative body consisting of 150 elected deputies, with a Senate of 50 government nominees, should be created and have control over the provincial administration exercised by fixed councils, the coming deputies from the various communities, the system to apply to the whole empire.

The Montenegrin official journal declares that Montenegro will not accept either an armistice or peace except in concert with Servia, because Montenegro, like Servia, is bound to continue the fight until the Christians are accomplished. The Serbian Prime Minister has informed the British Consul at Belgrade that Servia would consent to an armistice till Twelfth mo. 31st, but not for any longer period.

The Russians continue coming in great numbers to the aid of the Servians. The arrival of 500 men in a day.

A Berlin dispatch says Count Von Arnim's sentence to five years imprisonment in the House of Correction involves the forfeiture of his title and possibly his property.

A decree has been issued at Paris summoning the French Senate and Chamber of Deputies to assemble on the 30th inst.

The French Minister in China has demanded punishment of the mandarin who is considered responsible for the massacre of a Catholic priest and others at Ning-Kou-Fou.

The German Minister of Public Worship has issued an order directing that all orphanages in Germany at present under the exclusive control of Roman Catholic communities be placed under lay direction.

The emancipation of the serfs in Russia has resulted in great poverty among their former owners. In the Prussian government of Kutais the last census gives 105 nobles to every 1,000 of the population, or in all 30,000 members of the nobility, of whom 24,000 are without any means of support, the act of emancipation having deprived them of the greater part of their estates as well as the ownership of the laborers.

The population of Russia has been taken. The total population is 9,920,000, including 1,510,000 slaves, and 243,000 foreigners.

A Madrid dispatch announces the departure of Gen. Campos with a large force for Cuba, in order, if possible, to end the insurrection in that island. It is understood that the General will keep the Captain Generalship, but be under the orders of Campos as commander-in-chief. It is said that favorable terms will be offered to the insurgents. Campos is accompanied by several distinguished commanders.

Private information received in London states that the French Protestants are in a state of great alarm and actual peril, being threatened by a fanatical mob. A Madrid dispatch states that the Bishop of Minorca has issued a new circular enjoining on masters of primary schools not to admit the sons of Protestants.

From Calcutta it is reported that distress prevails in the Decan and Southern Mahratta because of failure of the crops. The government have opened relief works. Secrecy is also expected in other districts.

UNITED STATES.—State elections were held in Ohio, Indiana and West Virginia on the 10th inst. The voting in these States was watched with great interest as it was expected to result in the election for President next month. It was found that there was a Republican majority of a few thousands in Ohio, that in Indiana the Democrats had a small majority in the popular vote, and a much larger one in West Virginia. In Ohio and Indiana the Republicans elected most of the assemblies.

The yellow fever has abated in Brunswick, Geo., and does not prevail elsewhere to any serious extent except in Savannah, where its ravages continued up to the close of last week.

The interests in Philadelphia last week numbered 316. Among the new arrivals at the late the International Exhibition was visited by 504,552 persons who paid for admission. The total cash receipts up to that time had been \$2,688,500.

Several destructive fires occurred last week. Among them the following:—One at Pine Hill, Ariz., with an estimated loss of \$250,000, one at Study Hill, N. Y., with a loss of more than \$200,000, and another at Toledo, Ohio, loss over \$100,000.

The cotton manufacturing corporations of Manchester, N. H., recently declared semi-annual dividends of three to four per cent. This is one of many indications that the manufacturing industry is recovering from its long and severe depression.

The steambot Southern Belle was burned on the Mississippi, above New Orleans, the 9th inst. A large number of passengers perished in the flames. The cargo consisted of cotton.

The gross receipts of the Western Union Telegraph Company for the past year were \$10,034,984, and the net receipts \$3,999,530.

The boilers in Ziv & Co.'s mill mills, Pittsburgh, Pa., exploded on the 12th inst., destroying a large part of the buildings, and causing the death of twenty persons and the serious injury of twenty-nine others.

Snow fell in Boston, Providence, and various other places in New England, to the depth of two or three inches on the 14th inst. The storm commenced at Quebec, Canada, on the night of the 13th inst., and continued all the following day. Fully six inches of snow fell, and sleighs were brought into general use. Six inches of snow fell at Marquette, Michigan, in the same storm. Snow fell at Richmond and Norfolk, Va., with a temperature of 31 deg.

During the year ending 6th mo. 30th last, 6,524,356 acres of the public lands were disposed of, of which 2,875,910 were absorbed by homestead entries for actual settlers.

There was a public sale of short horn cattle at Winchester, Kentucky, on the 13th inst., and the following were the highest prices obtained, \$3,400, \$2,300, \$2,200 and \$1,300. Eighty animals were sold, and \$45,000 were obtained for them.

The Indians at Standing Rock Agency have agreed to renounce their claims on the Black Hills. The treaty was so far modified as not to insist upon their removal to the Indian Territory.

The Markets, &c.—The following were the quotations on the 16th inst. *New York*.—American gold, 109½; Superfine flour, \$4.70 a \$5.00; State extra, \$5.25; fine, \$5.00; their claims, \$3.75. Extra white winter wheat, \$1.34; amber Indiana, \$1.27; No. 2 Milwaukee spring, \$1.29 a \$1.27; No. 2 Chicago spring, new, \$1.22; Western rye, 73 cts.; State, 86 cts. Yellow corn, 59½ cts.; mixed, 58 cts. Canada barley, \$1.22; State, 90 cts.; lard, 15.35 a \$16.50 per 100 lbs. Carolina rice, 5 a 6½ cts. Sugar, \$5 a 9½ cts. Philadelphia—Wheat, \$1.11; for flour, \$1.11; for flour and New Orleans, flour, 74 a \$8.50. Western white wheat, \$1.30 a \$1.35; Pennsylvania amber, \$1.27 a \$1.30; red, \$1.22 a \$1.23. Rye, 75 cts. Yellow corn, 58 cts.; mixed, 57 cts. New York fancy cheese, 12 a 13 cts.; western, 10 a 11 cts. About 3500 head cattle sold at \$1.00 per lb. gross for fair to 5½ cts for fair to good, and 3½ a 4½ cts. for common. Sheep, 4½ a 5½ cts. per lb. gross. Receipts 12,000 head. Hogs, \$8.75 a \$9.25 per 100 lb. net. Receipts 5000 head. *Chicago*.—No. 2 spring wheat, \$1.09½; No. 3 do, 95 cts. a \$1.01. No. 2 corn, 42 cts. Oats, 32½ cts. Barley, 92 cts. *Louisville*.—No. 2 Louisiana red fall wheat, \$1.22; No. 3 do, \$1.11. Corn, 40½ cts. Oats, 34 cts. Rye, 58 cts. Barley, 80 cts. a \$1.20. *Cincinnati*.—Family flour, \$5.50 a \$5.75. Red wheat, \$1.10 a \$1.18. Corn, 47 a 48 cts. Oats, 30 a 37 cts.

NOTICE.

The Annual Meeting of the Auxiliary Bible Association of Friends of Philadelphia Quarterly Meeting, will be held at No. 109 South Tenth street, on Fourth-day evening, 25th inst., at 7 o'clock.

Members of the Female Branch are invited to attend.

A. M. KIMBER,

Secretary.

WESTTOWN BOARDING SCHOOL.

SPECIAL NOTICE TO PARENTS AND OTHERS. The Committee having concluded to divide the School into distinct classes more fully than has hitherto been done, and in such manner that all the pupils of each class shall so far as practicable, recite together in their various studies, this change will take effect at the opening of the next session; and it is believed that it will so far facilitate the classification of the School that the classes may commence reciting on Fourth day morning, the 1st of Eleventh month. It is therefore particularly requested, that all the pupils be at the School by Third-day evening, and that all those who were not at West-town during the past session present themselves for examination on Second-day, or not later than by 10 o'clock, Third-day morning.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

WESTTOWN BOARDING SCHOOL.

The WINTER SESSION of the School will commence on Second-day, the 30th inst. The Boys' School is full. Application for the admission of girls may be made to BENJAMIN W. PASSMORE, *Supt.*, (Address *Street Row P. O., Chester Co., Pa.*) or to CHARLES S. ALLEN, *Treasurer*, No. 304 Arch St., Philadelphia.

Pupils who have been regularly entered and who by the care from Philadelphia, can obtain tickets at the depot of West Chester and Philadelphia Railroad corner of Thirty-first and Chestnut streets, by giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. These tickets may also be obtained of the Treasurer, at 30 Arch St. In such case the passage, including the stage fare from West Chester, will be charged at the School, to be paid for with the other incidental charges at the close of the term. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 30th at 3:45 and 10 A. M., and at 12:30 and 2:30 P. M.

Trunk Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at the latter place, it will be under the care of a Alexander, the driver, who will convey it to Third and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the City, by sending word on the day previous (through the post-office or otherwise) to Alexander and S. R. N. Monthly and trunk will not interfere any attention from the owners, either at the West Philadelphia depot, at the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Son reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the train, every day except First-day and small packages for the pupils, if left at Friend Book Store, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock, except on the last two Sixth days in the Twelfth month, and the expense charged to their bills.

Tenth mo. 18th, 1876.

DIED, at the residence of her son-in-law, Francis P. Pyle, on the 8th of Eighth month, 1876, PRISCILLA wife of Thomas Wickesham, a member of New Garden Monthly Meeting, in the 64th year. During the latter years of her life, this dear Friend was permitted to pass through a succession of deep afflictions and peculiar trials, respecting which she remarked, "I do strive for patient submission; deep humiliation, amid these close proprivings. I sought, in my own weakness, for a measure of final comprehension. Yet I feel that I have been great sustained; and it may have a refining influence, truly as it is to flesh and blood to yield to the turnings and overturnings of His mighty hand upon us. But what would it signify if we should gain the whole world at the cost of our own souls? Her last sickness was of only nine days' continuance, during which she evinced much patience and entire resignation, under extreme bodily suffering; expressing a belief from the first that she would not recover, and desired to be in the quiet. She gave much good advice to her children, saying that she would be glad to see them all united in the same sweet it would be to pass quietly away; you should not wish my stay, it would be such a happy release." Her close was quiet and peaceful, and we feel no doubt through redeeming love and mercy, her spirit has been permitted to join that company who came out of tribulation, in the 64th year of her age, a member of New Garden Monthly Meeting, West Grove Particular Meeting.

WILLIAM H. PILE, PRINTER,

For "The Friend."

Mission of George Bozle to Tibet.

(Continued from page 74.)

"The coldness of the climate renders furs a very essential article, and as no wood is to be had, the Tibetans are obliged to use cow-horn, which is carefully gathered from the hills. This is built up in a circular form, or cut into a pot with a hole in the bottom. It takes a cheerful and ardent fire when well kindled, and the people are abundantly skilful in the art of managing it, which my own ill success has often shown me to be a very difficult science.

"We arrived at Tanno, our next stage, about three o'clock. Some of my servants no longer walked, so tired that they were brought home on peasants' backs, as I had not been able to find horses for them all. I next got cow-tailed bullocks, but the Hindus would not ride on them, because if any accident should happen to the beast while they were on him, they would be obliged, they said, according to the tenets of the Shaster, to beg his bread during twelve years, as an expiation for the crime. *Memo.*—Inconvenient carrying Hindu servants into foreign parts.

"Our road next day (October 25) led us along the banks of the lake called Shiam-chu filling. It is fed by a large mineral stream, which issues out of the side of a mountain, and extends about eighteen miles from the north to south. It was half frozen over, and full stocked with wild ducks and geese. We so met with some hares, and a flock of antelope, besides a herd of wild animals called kangars, resembling an ass, and which I shall afterwards have occasion to describe more particularly.

"We should have had excellent sport, but my friend Palma's scruples. He strongly opposed our shooting, insisting that it was a real crime, would give much scandal to the inhabitants, and was particularly unlawful (within the liberties of Chumalbari). We had any long debates upon the subject, which were supported on his side by plain common sense reasons drawn from his religion and customs; on mine, by those fine-spun European arguments, which serve rather to perplex than convince. I gained nothing by them, and at length we compromised the matter. I engaged not to shoot till we were fairly out of sight of the holy mountain, and Palma consented to suspend the authority of the gawls, in solitary and sequestered places.

"The religion of the Lamas is somewhat connected with that of the Hindus, though I will not pretend to say how. Many of their deities are the same; the Shaster is translated into their language, and they hold in veneration the holy places of Hindustan. In short, if the religion of Tibet is not the offspring of the Goutos, it is at least influenced by them. The humane maxims of the Hindu faith are taught in Tibet. To deprive any living creature of life is regarded as a crime, and one of the vows taken by the clergy is to that effect. But mankind in every part of the world too easily accommodate their consciences to their passions, and the Tibetans find no difficulty in yielding obedience to this doctrine. They employ a low and wicked class of people to kill their cattle, and thus evade the commandment. The severe prohibition of the Hindus in regard to eating beef is likewise easily got over. The cows of Tibet are mostly of the bush-tailed kind, and having therefore set them down as animals of a species different from the cow of the Shaster, they eat, asking no questions for conscience's sake. The general principle by which they determine the degree of culpability in depriving an animal of life is very ingenious. According to the doctrine of transmigration, there is a perpetual fluctuation of life among the different animals of this world, and the spirit which now animates a man may pass after his death into a fly or an elephant. They reckon, therefore, the life of every creature upon an equal footing, and to take it away is considered as a greater or smaller crime, in proportion to the benefit which thereby accrues to mankind. According to this doctrine, the ox who clothes the ground in all the pomp of harvest, the sheep who lends them his own coat, and yields them milk in luscious streams, are slaughtered without mercy; while the partridge and wild duck enjoy the protection of government, and the trout lives secure and unmolested to a goodly old age. The musk-god is condemned, on account of its perfume. The deer and the hare are tried on a double charge, and suffer for their skin as well as their flesh."

The valleys only are cultivated, producing barley and wheat; and the streams descending from the hills furnish water-power to turn the mills in which their grain is ground. Dr. Bozle mentions meeting with a machine for cutting straw for cattle; and describes a Tibetan churn, which seems to have been an effective instrument in separating the butter from milk. On one occasion they met "a flock of sheep which had come from the Dospa country with a cargo of salt, and were then returning, loaded with barley and wheat. They were of a large breed with horns extended horizontally. There were about 1200 of them, and each sheep carried two bags of grain, which might be about 20 or 25 pounds. They were very obedient to their drivers' whistles, and if any of them happened to get

out of the road were easily brought back by the shepherd's dogs."

The usual home of the Lama was at Teshu Lumbo, but owing to the prevalence of the small-pox at that place, he had for several years occupied a small palace at Desherpigay, where our ambassador found him. He says: "He received me in the most engaging manner. I was seated on a high stool covered with a carpet. Plates of boiled mutton, boiled rice, dried fruits, sweetmeats, sugar, bundles of tea, sheep's carcasses dried, &c., were set before me and my companion, Mr. Hamilton. The Lama drank two or three dishes of tea along with us, but without saying any grace; asked us once or twice to eat, and then threw away Pelong handkerchiefs over our necks at retiring. After two or three visits, the Lama used (except on holidays) to receive me without any ceremony, his head uncovered, dressed only in the large red petticoat which is worn by all the gylozes, red Balgar hile boots, a yellow cloth vest, with his arms bare, and a piece of coarse yellow cloth thrown across his shoulders. He sat sometimes in a chair, sometimes on a bench covered with tiger skins, and nobody but the *Sopon Chambo* present. Sometimes he would walk with me about the room, explain to me the pictures, make remarks upon the color of my eyes, &c. For, although venerated as God's vice-gerent through all the eastern countries of Asia, endowed with a portion of omniscience, and with many other divine attributes, he throws aside, in conversation, all the awful part of his character, accommodates himself to the weakness of mortals, endeavors to make himself loved rather than feared, and behaves with the greatest affability to everybody, particularly to strangers." "I endeavored to find out, by his character, those defects which are inseparable from humanity, but he is so universally beloved that I had no success, and not a man could find in his heart to speak ill of him."

"Being the first European he had ever seen, I had crowds of Tibetans coming to look at me, as people go to look at the lions in the Tower. My room was always full of them from morning till night. The Lama, afraid that I might be incommoded, sent me word, if I chose, not to admit them; but when I could gratify the curiosity of others at so easy a rate, why should I have refused it? I always received them, sometimes exchanging a pinch of snuff, at others picking up a word or two of the language."

"On the 12th of November a vast crowd of people came to pay their respects, and to be blessed by the Lama. He was seated under a canopy in the court of the palace. They were all ranged in a circle. First came the dray folks. Every one, according to his circumstances, brought some offering. One gave a horse, another a cow; some gave dried sheep's carcasses, sacks of flour, pieces of cloth, &c.; and those who had nothing else presented a white Pelong handkerchief. All these offer-

ings were received by the Lama's servants who put a bit of silk with a knot upon it, tied or supposed to be tied, with the Lama's own hands about the necks of the votaries. After this they advanced up to the Lama, who sat cross-legged upon a throne formed with seven cushions, and he touched their heads with his hands, or with a tassel hung from a stick, according to their rank and character."

"Among all offerings, dried sheep's carcases always form a principal article. They are as stiff as a poker, are set up on end, and make, to a stranger, a very droll appearance. I was at some pains to inquire about the method of preserving them, as it is a practice common to Tartary as well as Tibet; but I could discover no mystery in it. The sheep is killed, is beheaded, is skinned, is cleaned; the four feet are then put together in such a manner as may keep the carcass most open. During a fortnight it is every night exposed on the top of the house, or in some other airy situation, and in the heat of the day it is kept in a cool room. After it is fully dried it may be kept anywhere. In this way they preserve mutton all the year round. The end of autumn, when the sheep are fattened with the summer's grass, is the usual time for killing them; and the difficulty of supporting the flocks in the winter time is, I believe, the reason for adopting this method. In the hot and rainy season it is necessary to use a small quantity of salt; but few carcasses are then dried. I found the dried mutton generally more tender than that fresh killed, but not so juicy and high flavored. The Tibetans often eat it raw, and I once followed their example; it had much the taste of dried fish. The facility with which meat is preserved from putrefaction in this country may be owing partly to the coldness of the climate, partly to the uncommon dryness of a gravelly and sandy soil, and partly to the scarcity of flies and other maggot-breeding insects.

(To be continued.)

A man who prided himself on his morality, and expected to be saved by it, was constantly saying, "I am doing pretty well on the whole. I sometimes get mad and swear, but then I am perfectly honest. I work on Sunday when I am particularly busy, but I give a good deal to the poor, and I never was drunk in my life." This man hired a canny Scotchman to build a fence around his pasture lot. He gave him very particular directions. In the evening when the Scotchman came in from work, the man said, "Well, Jock, is the fence built, and is it tight and strong?" "I canna say it is all tight and strong," Jock replied, "but it is a good average fence, anyhow. If some parts of it are a little weak, other parts are extra strong. I don't know but I may have left a gap here and there, a yard or so wide; but then I made up for it by doubling the number of rails on each side of the gap. I dare say that the cattle will find it a good fence on the whole, and will like it, though I canna just say that it is perfect in every part." "What?" cried the man, not seeing the point. "Do you tell me that you built a fence around my lot with weak places in it, and gaps in it? Why, you might as well have built no fence at all. If there is one opening, or a place where an opening can be made, the cattle will be sure to find it, and will all go through. Don't you know, man, that a fence must be

perfect, or it is worthless?" "I used to think so," said the dry Scotchman, "but I hear you talk so much about averaging matters with the Lord, it seemed to me that we might try it with the cattle. If an average fence will not do for them, I am afraid an average character will not do in the day of judgment."

Selected for "The Friend."

A General Epistle to Friends by Charles Marshall.

London, Second month 25th, 1697.

Dear Friends and brethren, who with a high and heavenly calling have been called out of darkness, and all the ways and works thereof, to walk in the marvellous light of the glorious day of God, that hath precious dawned; grace, mercy and peace be multiplied in and amongst you.

Friends, the great Husbandman of the whole earth having, in the riches of his love, planted a vineyard with the choicest vine, in a fruitful hill, in this age of the world which he hath pruned, dressed and plentifully watered, is coming to take a view thereof, to see what fruit it bringeth forth, and therefore it weightily concerns you to see with the light of the Lord, how you have answered his great and inexpressible love, which for many years hath been abundantly extended unto you; and prize your time whilst you have it, and it is called a day of mercy.

Oh! have a care that you give no room to the spirit of the world, that blinds the eye of the mind and subjects the affections to things below, and raiseth up the old love to the world again. Beware of going out of the simplicity of the Gospel, and let there be a tender inward care to watch against all thoughts that darken you and grieve the Spirit of the Lord, and let your words be few and seasoned with heavenly grace. Go not out of the exercise of the precious cross of Christ Jesus, into any excess in meats, drinks or apparel which are superfluous, and make no provision for the flesh to fulfil the lusts thereof; let not your gold or silver, lands or living, furniture or apparel, any way ensnare you, or entangle or overcharge you.

For oh, Friends, the enemy of Zion's prosperity hath laid deep snares in the spirit of the world to those things, to draw out the mind from the pure innocent life, obtained and enjoyed through the spiritual exercise of the cross of Christ Jesus, which crucifies us to the world, and the world unto us; but if the mind goes out of the fear of the Lord, and the holy cross and heavenly watch, into a false liberty, then you will live to the world and the world to you; and here is the way that death comes over again.

Therefore, dear Friends, this is the word of Truth to all the professors thereof, Abide in the spiritual watch-tower where you will receive manifold spiritual advantages, and will see the approaches of your soul's enemy, when, where, how, and in what he works; and here you see clearly how sin is conceived in the thoughts, and when it is finished it brings forth death, and so you receive an understanding how sin is strengthened and how overcome, and how it is finished and brought to an end, and the everlasting righteousness of Jesus Christ brought in, and how the knowledge of God increases and comes to cover the earth as the waters cover the sea, and so shall your peace flow as a river.

And, dear Friends, keep the unity of the Spirit in the bond of peace, and grow up in

it; for whilst the churches kept in the purity they were in the greatest unity; here they were with one accord, and great grace was upon them, under the dominion and beauty of the glorious power of the Lord; for Zion is a city at unity with itself, and the bodies itself with love. But when the enemy prevailed to draw out of the love of Christ Jesus, where all the members that hold the Head are knit together as with joints and bands, then other fruits appeared. As the pure unity of the churches is in the Spirit, which is increased as all grow up in the nature of Christ Jesus, who is meek and lowly so here all are preserved in the dominion of the edifying love of God, and in unity of with another, let there be ever so many thousands; but when the enemy prevailed to draw out of the quickening spirit of the second Adam, and out of his nature, wherein all follow his blessed example in washing one another's feet, and led into another spirit of wisdom which is from beneath, therein arose those bitter fruits mentioned in the Scriptures of Truth.

Therefore, dear Friends, everywhere, keep in the name and pure fear of the Most High, and grow up in the sweet nature and wisdom of the Ancient of Days, and watch against the least appearance of that which would break the unity; and if anything of this nature hath broken in anywhere in the name of the Lord God let it be driven out of the camp, it being one of the greatest enemies of Zion's peace and growth; for unity is our strength, and keeping our ranks here, all the enemy's endeavors without will not be able to prevail.

Friends, dwell in the spirit of meekness which keeps in a sound judgment and spirits discerning, where no wrath, fleshly passions, envyings or emulation can have any place for as all grow up in the Divine nature, in the faith of Abraham, no strife can have room. And here all controversies are ended at a stab out.

And now, dear Friends, with the light of God's holy day, search and see how it is with you, that so if the enemy of Zion's prosperity hath gotten any entrance to impede or hinder the precious work of the Lord from prospering in your souls, by turning aside into an by-path or setting down by the way, or taking up a false rest, with the glorious light of the Lamb, you may see and discern it, and speedily retire inward to hear the voice of the good Shepherd; that by him you may be led out of all the enemy's snares. Friends, make use of your time and day, and all keep in your spiritual tents, in the sweet valley of humility, where you will not only see all the devices and snares of the unwearied enemy of your souls, but will also enjoy the descendings of the glory of God, in the daily openings of his Divine hand, which is full of blessings. Here you will be tenderly concerned in spirit to render fervently to Him for yourselves and families, and for a people that have not hearts to see nor cry to God for themselves, that in tender compassion he would open their hearts, that they might see and be sensible of the mercies of a long-suffering and long-provoked God, who hath often shaken his hand, and threatened his terrible judgments, and on the other hand, largely and wonderfully extended his mercies. In this tender exercise of spirit you will approve yourselves the true friends of your neighbors, and you will have a hiding place in the day of his consuming judgment.

which he will assuredly bring to pass upon all the professors of Christianity, that are out of the nature thereof, unless they repent.

And now, Oh Friends! let a true silence and sweet stillness come on all your spirits, shall your inward ear be opened to his heavenly counsel, and you will be ready, in the bowdown of spirit to say, that the Lord hath commanded and required, that will we, through his Divine strength; and you will be preserved in all the various exercises of the day, and out of the hurries of the people, and as you are inwardly staid upon the Lord, in his eternal light, you will feel help from him in all your straits.

Gather to the munition of rocks; where your bread shall be sure and waters never fail. Be faithful in the Lord's work, and keep our meetings as the Lord requires, and that diligently, week days as well as first-days, and the Lord will appear in the brightness of his power; and the glory of his presence you shall enjoy more and more.

So to God Almighty I commit you; and having done his will, I rest in my Father's love, your tender friend and brother in the labor and travail of the Gospel.

CHARLES MARSHALL.

From the "New York Tribune" of 10th mo. 4th.

Preparing Salmon for Market.

As the season for salmon fishing has just ended, the presentation of some facts relating to the catching, canning, and preserving the fresh fish for the market is not inappropriate at this time. The Western rivers of this country in a great measure supply the world with canned salmon, and the industry has attained important proportions. The great canning centre is at Astoria, about 12 miles from the mouth of the Columbia River in Oregon. This river, draining a vast territory in the great North-West, is fed entirely by mountain streams, which are formed by the continuous melting of snows on the peaks among which they have their sources. In consequence, the waters of the Columbia are icy cold at all seasons of the year—the temperature best adapted to maintain the fish in excellent condition. The months from April to August form the spawning season, and the salmon in enormous numbers leave the ocean, making their way up the river and its tributaries to deposit their millions of eggs in the shallower parts of the stream. This is the beginning of the busy season for the large canning establishments on the river, and the work of catching begins. As the fish do not take bait during this season, the catching is done with nets, and always at night, because the water of the river being very clear the fish see the nets during the day and either swim over or under them. When the fish are brought in at early morning the packers immediately take charge of them and clean them. The fish are then soaked in brine for a certain time, after which they are cut up in pieces of the right size for the cans. These are then filled, and the operations of boiling and sealing are done as rapidly as possible to prevent the spoiling of the fish. Each can is carefully tested after this work is done, and those cans which are imperfectly sealed are not allowed to pass out of the establishment.

For this year the product of the Columbia River alone has been estimated at the enormous total of 20,000,000 pounds of canned salmon, and when the loss of weight from

cleaning and cooking, the quantity salted in barrels, and the amount consumed by the white people and Indians in the vicinity are taken into account, the aggregate is increased nearly to 40,000,000 pounds' production for one year. Yet with such an immense field the demand for canned salmon is greater than the supply, and the seasons are always anticipated, the production being bought ahead before the catching begins. The cans are shipped to all parts of the world. They are packed in cases, each of which contains four dozen cases weighing a pound and a quarter apiece. England alone takes 165,000 cases; New Zealand, 2,400; South America, 1,500; Australia, 14,000; New York and the Atlantic coast, 58,000. The value of the canned salmon of the Columbia River is estimated at \$3,000,000 annually.

The greatest demand for salmon preserved in this manner is upon the Pacific coast and among the frontier settlements of the West. From the gold mines of California to the Sierra Nevada range of Colorado the larder of no miner's cabin is considered complete without its store of canned salmon.

When any accident occurs in the process of preparing the salmon, such as imperfect canning, the fish are taken out and salted in barrels, each containing about 200 pounds. The salted fish are shipped East, where they are freshened and put through a process of smoking, being then sold in the markets as smoked salmon. From the catching of the fish to the completion of the work of canning 100 operations are performed.

In consideration of the great demand, and the enormous production of canned salmon each year, and the fact that salmon in Eastern waters have so diminished in numbers that they require the protection of the law, the question is naturally asked, How long can this great drain continue without exhausting the Western streams, and what are the probabilities of future supplies? Those in charge of the fisheries say that people residing in that part of the country for many years are unable to see any decrease in the number of fish annually going up the river, and that their nets, having meshes 8 inches in size, only catch the largest fish, the smaller escaping. Moreover, as the fishing is always done at night, enough salmon pass up the river during the day to keep up the supply. Travellers state that the territory of Alaska possesses all the conditions for successful salmon fishing, and that the rivers there are nearly inexhaustible in the abundance of that fish. Hence it is asserted that the supply will not be diminished for many years to come. Perhaps some may inquire why, if the production is so great and the supply almost inexhaustible, should the price of fresh salmon remain so high? The transportation of fresh fish for a great distance is impossible, even with refrigerator cars, which are at best very imperfect. The fish would not bear the transportation from the Columbia River to San Francisco in any other shape than as canned or salted. Although the cost of the fish when caught is merely nominal, the number of processes they go through, and the expense of freight enhance their value, and the cost in this part of the country is not considered excessive by the men best qualified to give an opinion in the matter.

Fresh salmon as they are seen on the fish stalls of the New York markets, are brought

from the large rivers running into the Atlantic along the coast of Maine and north of it. The largest sold in the New York markets are from the waters of New Brunswick, Nova Scotia, St. John's Bay, Miramichi River, Restigouche River, and the Bay of Chaleur. The "catch" of salmon varies from year to year, as the fish run in the rivers when they are taken, and generally continues from May 1st to Aug. 15th, when it ceases by order of the Fish Commissioners of Canada. The "best catch" is usually between May 1st and Aug. 1st, the largest fish running at that time. The total quantity of salmon caught in the Canadian waters this year was about 950,000 pounds, of which 450,000 pounds came to the New York market. The best of the fresh fish came from the Restigouche River, which furnishes an annual "catch" of 380,000 pounds. The rivers of Maine do not produce largely, only about 1,000 pounds reaching New York from the season's work on the Penobscot and Kennebec rivers.

For "The Friend."

Extract from a Letter of Richard Shackleton.

"The continuance of our Christian Society, as a light in the world, depends much on the visited youth giving up all, surrendering at discretion, without any capitulating, in order to preserve this or that favorite object alive, which ought to be slain. We have many half baked cakes, fitting morning clouds, and momentary early dews among us. All states have their trials and temptations, and in faithfulness or disobedience lies our increasing strength or weakness. Little trivial circumstances of dress or other light matters are prescribed by the enemy to young and tender minds. The sure friend and monitor in their bosom delirio from entering into the temptation; *here the conflict begins*, army against army; the free agents have to make the choice which standard they will join, *and in this choice is involved their safety*, their preservation and capacity for further growth in holy stability and religious experience. In their making a right choice, and in their diligent waiting for renewed help to persevere in that choice (through Divine mercy) consists their happiness in time and eternity."

May not the foregoing remarks of this worthy and beloved elder in the Truth, who felt the great importance of them, apply to the youth of our day? who, it is to be feared, are often too slow in yielding up their wills to the Divine will, and making that wise choice: which would, if faithfully maintained, not only enable them to make "straight steps for their feet," as they pass along through the "slippery paths of youth," but in the end would lead unto eternal rest.

Would that all could see the great necessity of giving up *unreservedly*, to that convicting influence which silently and secretly works in all hearts; which, as there is a yielding unto it, will enable every one to obey its inward teachings. It was the same Spirit of Truth which wrought of old in the hearts of our forefathers, (and in all of the faithful servants of the Most High,) showing to them the necessity of withdrawing from the fashions and customs of the world, if they would obey Him, who hath said, "Ye cannot serve two masters."

Why should the apostle Paul, in writing to the Romans formerly, have said, "Be not conformed to this world," if he had not him-

self know the importance thereof? know that they who followed the world's ways, customs and fashions, could not be the true disciples of the meek and lowly Jesus; that those whose thoughts and whose time was taken up so much in caring for the poor body, and the perishing things of time, could not have an undivided heart; these could not be loving the Lord their God, with all their heart, with all their soul, and with all their mind, thus keeping the first and great commandment.

How true it is that the unwearied adversary, remains to be the same artful intriguing enemy that he ever was; and that he is just as ready to meet us with his plausible reasonings, and stifle whenever he can, those convictions for good, which the Spirit of Truth is pleading for within the heart; so that there is the very same need in the present day, for each one to make that choice which will be for their eternal good. And true it is, that here, as Richard Shackleton remarks, "the conflict begins," and that, "in this choice, is involved their safety and preservation."

There is a certain *Guide*, a *sure Friend*, unto whom all may go when perplexed and buffeted by the enemy, and none shall seek unto Him in vain. The Omnipotent One knows every secret thought; He knows who they are that are sincerely desirous to be led in the right path; and the poor, weary, and heavy-laden one, who is distressed on all sides, scarce knowing which way to turn, will find, as there is an earnest longing begotten in the heart to yield obedience to the "still small voice," that there is a power far beyond the power of the enemy, which will give ability to bow in submission to the Divine will, and strengthen to perform all His requirements.

None need be discouraged because of the way, nor think their trials and provings are greater than those of around them. All have their own peculiar trials and temptations, their seasons of affliction; and their cups of sorrow to drink; for in this world we shall have tribulation. But as there is a willingness wrought in the heart, a submission to these needful baptisms, which an All-wise Providence sees meet to dispense, in order for the cleansing and purifying of the temple of the heart within. He would reign, the obedient, trusting one, who leans on the strong Arm of Power for support, will, in great mercy, find that His grace is sufficient in every time of need; and that His strength will be made perfect, in their weakness.

The Dry Season of Brazil.—As an illustration of the extreme dryness of the soil during the early season in Brazil, it is stated that, in June, all vegetation ceases, the seeds being then ripe or nearly so. In July the leaves begin to turn yellow and fall off; in August an extent of many thousands of square leagues presents the aspect of a European winter, but without snow, the trees being completely stripped of their leaves; the plants that have grown in abundance in the wilderness drying up, and serving as a kind of hay for the sustenance of numerous herds of cattle. This is the period most favorable for the preparation of the coffee that grows upon the mountains. The beans are picked and laid on the ground, which gives forth no moisture, but on the contrary absorbs it, and being surrounded by an atmosphere possessing the same desiccating properties, the coffee dries rapidly without

becoming mouldy. — From *Baird's Annual Record of Science and Industry for 1875.*

Selected.

ABIDE WITH ME.

"Abide with us; for it is toward evening and the day is far spent."

Abide with us; fast falls the eventide;
The darkness deepens; Lord, with me abide;
When other helpers fail, and comforts flee,
Help of the helpless, O abide with me.

Swift to its close ebbs out life's little day;
Earth's joys grow dim; its glories pass away;
Change and decay in all around I see;
O Thou who changest not, abide with me.

I need Thy presence every passing hour;
What but Thy grace can foil the tempter's power;
Who like Thyself my guide and stay can be?
Through cloud and sunshine, Lord, abide with me.

I fear no foe with Thee at hand to bless;
I have no weight, and tears no bitterness;
Where death's long shadow, where, grave, thy victory?
I triumph still, if Thou abide with me.

Hold Thou Thy cross before my closing eyes;
Shine through the gloom, and point me to the skies;
Hallelujah! morning breaks, and earth's vain shadows flee;
In life, in death, O Lord, abide with me.

The White Whale.

The *New York World* of 10th mo. 11th says: Almost before it was fairly light yesterday morning a crowd had gathered in front of the Aquarium at Twenty-fifth street and Broadway, waiting for the coming of a whale. The maternal milkman, the early laborer going to his work, the cartmen, newsboys and all the night denizens of the streets had joined the gang of workmen regularly employed in the guiding, and anxiously looking for the arrival of his whaleship. Manager Coup and Professor Butler stood at the door of the establishment. They had been up through all the long watches of the night, for it was not known at just what hour the train bearing this curious freight would reach the city.

It was about five o'clock that the heavy rumbling of some large vehicle was heard, and a shout of "There she blows" from the crowd without gave token that the patient waiting and anxious expectation of the last few days was at an end. The monarch of the deep made his entry into the metropolis boxed closely up, like the most ordinary of fish.

With but little delay the wooden inclosure was transferred from the truck to the interior of the Aquarium, and the doors closed on the crowd that thronged around the entrance. The perforated lid was removed, and there lay his marine majesty in admirable condition, and apparently perfectly aware that the quieter the better it was for him. The box was rolled up to the huge tank which is to be his future home, and bands were passed around the body at various points. These were joined together and made fast to the hoisting apparatus, consisting of a series of pulleys and ropes dangling from the huge centre of the roof. All was announced to be in readiness, and with a slow, steady movement, the great inert mass was raised in the air. By an ingenious arrangement the hoisting apparatus was shipped forward until it was just over the centre of the tank. The whale was then lowered, and advantage taken of his dormant state to slip the bands as soon as he touched the surface of the water. A shout arose from the employes as soon as the feat was success-

fully accomplished, and an enthusiastic Canadian, who had accompanied the stranger's travels, exclaimed, "He shall be called 'Le Grand Coup!'" For a moment he was quiet, and then began a "smelling investigation" of his new home. After nosing about a little while he seemed to come to the conclusion that all was well, and devoured with infinite relish his breakfast of eels. He met himself quickly at home, and during the evening frolicsome tokens that everything was correct, so far as he was concerned.

The present is the third whale that has been in the Aquarium since it was started. The first two were brought to the city in the month last, but met with untimely death, striking their flukes against a projecting pipe to the tank. The recurrence of a like accident has been avoided by protecting every exposure of iron with buffers of sponge. "Le Grand Coup," the present occupant, was captured about the latter part of 7th mo. at St. Paul's Bay, on the lower St. Lawrence, by Coup, brother of the manager, and a party of Canadian fisherman. After the death of the first two whales Z. Coup returned in 6th mo. to the scene of his spring labors. An immense pit was dug at low tide, surrounded by stakes, with a coral leading from it. About a month later the whale, now in this city, made his way at high tide into the inclosure and was captured when the tide fell. During this time the hunters had captured a ca whale, too young to feed, and a sperm whale forty feet in length. The latter was so violent that he had to be harpooned, and he died for want of nourishment. During "Le Grand Coup's" captivity he was fed on sm eel and herring. About a week since he was taken to Quebec in a schooner. Here he was transferred to a special car, being placed in a large box for easier handling. Another ca was provided with barrels of sea water, the content of which were used to keep his fluke wet. In this manner he was carried from Quebec to Montreal, where he remained Saturday. On Sunday he again started by special train by the way of the Grand Trunk and Vermont Central and Harlem to New York. His journey was heralded in advance, and a every station crowds of sightseers were gathered, and in conjunction with the local press grew enthusiastic over his progress. Le Grand Coup is about eighteen feet in length, of a grayish white, and unknown weight. His present home is thirty feet in diameter, contains 30,000 gallons of sea water, and is emptied and filled every twenty-four hours. He seems to be sociable and to be willing to afford his numerous visitors perpetually recurring glimpses of his royal person. He is a good feeder, and, as he devours a bushel and a half of eels daily, threatens, in conjunction with the sea lions, to create a famine in the fish market.

Rainfall and Solar Spots.—In the monthly notices of the Meteorological Society of Mauritius, Mr. Meldrum, that of island, concludes that whether we take the annual rainfall for the largest possible portion of the globe for short periods, or for a small portion of the globe for a longer period, we arrive at the same result, viz: an increase of rain at or near the epochs of maximum sun spots, and a decrease of rain at or near the epochs of minimum sun spots. The exceptions to this law are few and trifling, and disappear from the

ults as the enquiry is made to cover more extended portions of the earth's surface and longer interval of time.

Selected for "The Friend."

From our Yearly Meeting of Women Friends held in London, by adjournments, from the 25th of the Fifth month to the 30th of the same, inclusive, 1776. To the ensuing Yearly Meeting of Women Friends, to be held in Philadelphia.

Dear beloved Friends:—Under a renewed and pleasing sense of the continued extending merciful regard, yet reaching for the gathering in the revelling children; the scattered our Israel, as well as uniting the hearts of tried children in his holy fear; owning and crowning our assemblies with his life-giving presence, do we nearly and affectionately salute you.

Your Epistle of the Ninth month last was very acceptable to us, as it conveyed an account of your being once more permitted to attend the usual Annual Assembly, and were therein favored in good degree with the presence of Him, who graciously condescends to us, to strengthen and assist by his counsel those who are asking of Him wisdom; and to help those never was more need of dwelling upon, of abiding in true watchfulness and humility, than in this trying day, when the judgments of the Lord are in the earth.

Yet it is cause of real rejoicing to some amongst us, that there is preserved amongst us, a few whose eye is kept single to God, and in calmness and patience are waiting in faith, that all things will work together for good to them that love and fear; and our own breathings to the God of all comfort and consolation, is for your preservation, and that the afflictions of the present time, may work for you a far more exceeding and eternal weight of glory. The living and truly numbered members of this our Annual Assembly salute you in the love of the gospel, under a deep sense of your present tribulations, which we hope, through divine succor and continued support, may at last terminate in the glory of God, by your patient continuance in well-doing. Though such as do wickedly against the covenant, may be corrupted by self-battery; yet the remnant that know their God, shall be strong, and suffer patiently under the refining hand, that they may be effectually purged and made white.

We feel fervent desires that your dwelling may be deep in the life that conquers through offerings; that bearing about in your bodies the dying of the Lord, the holy life of the Lord Jesus may be made manifest in your mortal flesh.

We see with sorrow, and confess with the prophet, that many have sinned, committed iniquity and rebelled by departing from the precepts and judgments of the Shepherd of Israel; neither have they hearkened to the messengers that have been sent to labor and await in spirit night and day, that Christ might be truly formed in them; for which use He has greatly sinned us, and called any of his faithful laborers from works towards; a sense of which calls for deep mourning. Yet we renewedly witness, that the Lord our God belongs mercy and forgiveness, though many have rebelled against Him, and it is cause of humble thankfulness, that at such a time and deep abasement being to us, yet his regard is still extended, and

his holy Arm made bare for our help in this dark and cloudy day; yea, He is still graciously visiting his heritage, and forming vessels for his service, through great tribulations, for you know this remains to be the way to the kingdom.

We fervently desire that none may turn aside from the fire because of its heat, but endure hardness as good soldiers. Put on strength, we beseech you, in the name of the Lord, and call to remembrance the days that are past, in which He manifested his power; and carried our worthy predecessors through a fight of afflictions from the combined powers of this world, as they patiently relied only upon Him, in whom is everlasting strength.

We feel bowels of compassion (even the compassion which we ourselves have partook of) to flow towards you, under your present trials, and we sensibly feel in measure your deep exercise—yea! the cry of the truly poor in spirit amongst you; our hearts are bowed and our cries ascend for your preservation and perseverance in the holy, humbling path of true self-denial, that the flesh may be nailed to the cross, and no beast suffered to approach the holy mount, either amongst us or you; lest the fires that consume God's adversaries increase hotter and hotter. Oh! that an honest search may run through ourselves and families, to find out the accursed thing, that the Lord has so contemned by us. Be ye strong therefore, and let not your hands be weak. O, ye elders of Israel, and rulers of the people, for this work will certainly be rewarded, for the Lord is with us while we keep close to his counsel, for his eyes, as saith the prophet, run to and fro throughout the whole earth, to show himself strong in the behalf of them whose heart is perfect towards Him.

Dear beloved youth, whose hearts are in measure inclined to seek counsel of the God of our salvation, be not discouraged, nor soon shaken in mind, because of the present troubles that surround you, in the midst of which retire to the Rock that was never shaken, and know ye the God of your fathers, and serve Him under all your trials with a perfect heart, and with a willing mind; for surely He that carried his people through a waste wilderness, and bore them on eagles' wings (yea, took Ephraim by the hand teaching him to go) will hide you in the secret of his presence from the pride and rage of men, and be as the shadow of a mighty rock in a weary land.

We trust the Lord will appear for your help and consolation, and the enemies of Zion's peace will be confounded, and we beseech you hear attentively the language of the rod, and consider deeply who has appointed it, and for what end. Is it not in measure to try his people? and what is the fruit expected? but the taking away our sins, that we may be found to the praise, honor and glory of his excellent name, as a people formed for himself, to show forth his praise.

Dear tender young people, prize the day of your visitation, and humble yourselves under the mighty hand of God, casting all your perplexity and care upon Him, who will, (we are persuaded,) as you abide there, strengthen, establish and settle your minds, though it may be after you have suffered awhile. Therefore, consider Him who endured such contradiction of sinners against himself, lest you be weary and faint in your minds.

And now, dear Friends, we may inform

you, our Annual Assembly hath been very large, and the gospel showings shed plentifully upon us, and a pleasing appearance of promising youth, give a pleasing prospect of hope, that if they wisely submit to the operations of Truth in their own hearts, they may be a succession of such as may fill the vacant places of those who are removed from works to rewards, and we believe a care remains on the minds of Friends for the revival of discipline, and that the breaches in the wall of our Zion may be repaired; and in a sympathetic sense of your present trials and deep sufferings (for your encouragement) we say trust in the Lord, his power is the same as in former ages, when he delivered his people from the Egyptian host; and in the words of an apostle to the primitive churches, we recommend you unto Him who is able to keep you from falling, and to present you faultless before the presence of his glory with exceeding joy. To the only wise God our Saviour, be glory and majesty, dominion and power both now and evermore.

In the love of the gospel we salute you, and remain your affectionate sisters.

The Wheat Crop of 1876.

Dispatches from London have been received in this city stating that there will be a deficiency in the corn supply of England, and that much interest is felt in the American crops of cereals. Much of the English wheat went into market in a damp condition, but drier weather has allowed the threshing to proceed under better circumstances. Much attention is now given to the ingathering of Scottish grain crops, and considerable anxiety in regard to them has been felt for some time. The conditions under which the crops have been harvested have been unfavorable, and the publication of the agricultural returns for 1875-6 has forced those interested in the matter to the conclusion that the United Kingdom will be more than usually dependent upon foreign importation for her bread supply. The question which arises from these facts are, whence is the supply to come, and how will the demand affect the fall and winter grain trade of the United States? Mr. Walker, superintendent of the Produce Exchange, furnishes *The Tribune* the following facts:

Europe will demand from abroad a supply of 120,000,000 or 150,000,000 bushels of grain. The United Kingdom will need for the cereal year, from September 1, 1876, to August 31, 1877, an estimated supply of 104,000,000 bushels, including her present stock and the amount now in transit, which are about 18,000,000 bushels; consequently 88,000,000 bushels must be drawn from foreign sources. The following are the countries which usually import grain with the amounts of the importation: Belgium and Holland, about 12,000,000 bushels; France imports and exports, but her imports have exceeded her exports for the past few years by from 10,000,000 to 30,000,000, depending upon the paucity or abundance of her own crop—just what France will raise this year is not yet known; Switzerland takes 3,000,000 or 4,000,000 bushels, which go by way of Marseilles; it will import more than usual, her southern crop being light and her northern crop only an average one; Germany will also import more than usual, for her crop is fully 20 per cent. short. The rye crop all over Europe is undoubtedly very short, and this fact will also increase the demand for wheat.

The countries whose grain crops exceed their necessities, with the amounts which they furnish, are as follows: Russia's supply for export is from 30,000,000 to 70,000,000 bushels. Her average exportation to all foreign countries for the past ten years has been about 50,000,000, of which the United Kingdom has taken 20,000,000, and the other European countries 30,000,000. Her crop this year in the north is estimated to be 70 per cent. short; Russian Poland and Central and Southern Russia will furnish an average crop. In the vicinity of the Sea of Azov, and in the Crimea, the crop is short. The countries which will be called upon to supply the deficiencies of Europe will be Chili, which will furnish 4,000,000 and 5,000,000 bushels; the United States, 70,000,000; Australia, 3,000,000; British India, 5,000,000; Austria and Hungary, 8,000,000; and Russia, 50,000,000. The total supply from these countries amounts to 141,000,000 bushels, and the United States, therefore, will have a very fair opportunity to push the surplus of the crops to market, but the demand will not justify exceedingly high prices. These inferences from the statistics are supported by the opinions of prominent dealers in wheat and flour, exporters, and shipping agents of this city, whose conclusions in the matter have been drawn from different sources.—*N. Y. Tribune.*

Collins and the General.

Among the mighty men of God who labored to spread the gospel of Christ in the newly-settled portions of America, was John Collins, who was born in New Jersey, in 1763, and died in Maysville, Kentucky, August 21st, 1845. Earnest, logical, devout and eloquent, many souls were given to him as seals of his ministry, among whom was John McLean, afterwards Judge of the United States Supreme Court, to whose pen we are indebted for a sketch of Collins' life, and various incidents connected with his ministry.

Unlike many of the present day, Collins could not harmonize in his own mind the practice of war with the gospel of peace, and hence, when he would follow Christ, he forsook the world. When he was converted, he held the office of major of militia; this he laid down when he received a commission in Linnane's army. The one who succeeded him came to purchase his uniform and arms, and Collins said to him, in his own peculiar style, "*My friend, when you put these on, think of the reason why I put them off.*" The remark made an indelible impression upon his mind, sunk deep into his soul, and led to important results. It led him to reflect, and his reflections led him to act. He also renounced his commission, and became a man of prayer; he yielded to the most illustrious of conquerors, enlisted in the army of the redeemed, and fought under the great "Captain of our salvation."

In the experience of Collins, there were frequent instances which illustrate the direction of the Guiding Hand. The following interesting instance is an example:—

When the country was new and but thinly settled, J. Collins was riding upon the banks of the Ohio River, some thirty or forty miles above Cincinnati, in company with a friend, when they came to the forks of the road; the left hand road led more directly to their place of destination, the right was more circuitous; but J. Collins, against remonstrance, preferred the latter, from an impression which he did

not particularly define. It led to the mouth of Red Oak, where the town of Ripley is now situated.

As they approached this point they saw a funeral procession, which they immediately joined, and followed it to the grave. It was the first funeral in that place. The corpse was the wife of Bernard Jackson, an avowed infidel. The scarcity of ministers in a newly-settled country often prevents the holding of religious exercises in connection with the burial of the dead, and the skepticism of Jackson may have tended to the same result. But whether he desired it or not, God had purposed that to those people who had gathered to open the first grave in their forest settlement, the gospel of Him who brought life and immortality to light should be proclaimed for the salvation of those whose probation was yet extended. The hour had come, and the messenger of God was ready with his tidings. After the grave was covered, J. Collins stepped forward and made known to the people that he was a preacher of the Gospel, and would then preach a sermon to all that remained. No one went away. Solemnly and seriously they stood around the new-made grave, where one of their number had just been laid, and listened while he read for his text, "I am the resurrection and the life: he that believeth in me, though he were dead, yet shall he live;" and preached to them the word of everlasting life.

The word was quick and powerful, and sharper than a two-edged sword. The circumstances of the occasion, and the manifestation of the hand of God in guiding his servant to that mourning group, added to the solemnity of the hour; and while death and judgment, and life and immortality, were set before the people, all hearts were moved by the power of the truth. There were many tears and sobs in the congregation. The infidel husband was overwhelmed; and from that day and hour he renounced infidelity, shortly after became a member of the church, lived to adorn the Christian religion, and died in peace. He had one son, who is now a traveling preacher in the State of Indiana.

John Collins believed in a special Providence. The inclination to take the right hand road, he believed was prompted by it, of which he could entertain no doubt when he saw the funeral procession and preached to the mourning crowd.

"And is this," says Judge McLean, who relates this incident, "too small a matter for Deity? Peter was called to preach to Cornelius; and his objections were overcome in an extraordinary manner. Philip, being prompted by the Spirit, joined himself to the chariot of the eunuch, and 'preached to him Jesus.' And who that believes the Bible does not believe that the same Spirit operates more or less upon Christians at the present day?"

Would that this inward guiding was more devoutly sought and teachably accepted; then where we now see sinners scoffing at a money-seeking ministry, we should see them filled with solemn awe at the providence which guides the servants of the Lord, and the power that clothes and seals his quick and powerful Word.

I have known instances wherein meekness and forbearance, and charity, and brotherly love, have reclaimed a wanderer from his way of error; but no instance has yet reach-

ed me of fierceness, and intolerance, uncharitableness, and apparent hatred, having convinced the judgment, or won the affections of an offending brother.

American Forestry.

The supply of railroad sleepers and graph poles is a question of as great significance as that of fences. When the vast road and telegraph system shall have attained full dimensions, we may conjecture an amount of durable wood we shall need the purposes of that huge organization motive and electric power. The remedy would here suggest is already in force, we find it announced that the Atchafalaya and Santa Fe Railroad Company have contracted for the planting of a quarter section of trees every ten miles along the line of the road from Atchison to the western of the State, about 300 miles. Chestnut white oak sleepers are in most request the railroad companies, although they said to stand the hard service to which they are subject not longer than six to eight years. For telegraph poles no timber is more accessible than locust or red cedar, woods of so remarkable endurance that they are known last for three-score years. It is a somewhat rare propensity to forecast the future, and secure a supply of timber for twenty-years in advance seldom falls within the scope of our great railroad projects. The mar is always supplied with an abundance; statistical knowledge in regard to the decay of the forest is either unsought or disregarded. Planting the hard timbers, and these will answer railroad purposes, will soon come up as a measure of necessity, and when the trees of artificial growth make their appearance, they will undoubtedly be utilized through sheer necessity, long before they have arrived at maturity.

But a more important subject than all this we shall certainly find in the increasing distribution of the white pine. Hitherto this known timber has been the desirable material used to meet all our architectural wants. The ease with which it can be worked and durability render it almost indispensable, and its adaptability to other than architectural purposes has scarcely any limits. All statistical information, all knowledge derived from dealers in lumber and men whose abode is the white pine forest, give us to understand the consumption of this cherished wood will soon outrun the supply. The time is at hand for laying up a reserve for all the future want of building and various mechanical appliances is past, and the opportunity we once possess of doing it cannot be recalled.

The white pine, in common with the tulip tree (*Liriodendron tulipifera*), cottonwood, bass-wood and other soft woods, can be planted and reared, but it cannot be made of much service until grown to maturity, and when this tree is gone, we shall find our refuge in chestnut, and the numerous soft woods at the fragile and more evanescent varieties of timber that are now in partial use and only serviceable when combined with white pine. Should the white pine, or hemlock, or spruce be cultivated for future supplies of the valuable material they afford us, we shall find in nature herself our best instructor as to the chemical elements required for the successful propagation of the pine, spruce and fir. * * * *

The substitution of chestnut for white pine in an event in the history of American timber which does not await realization, for it has already begun. This wood grows in almost all soils, is a successor of the oak, whenever makes its spontaneous appearance, and is ready to be hewn for the uses we are now availing upon, such as ordinary building and monumental architecture, in seventy years. A point of utility it will never rival the white oak, but will only serve as a substitute for one of the most cherished of our lost woods. The inestimable black walnut, which is now rapidly disappearing from all its native seats, has been enhanced to an incredible price, and propagated and brought to early maturity. In applying this expression, we have recourse to the great perfection of quality it attains in the comparatively short period of fifty years, and we have to remark, as a general thing, the pursuits of dendrology and arboriculture will be governed by more deliberate action and the anticipation of later results than the American mind is accustomed to yield to; and as we enter this new field of cultivation and science combined, we shall have to exchange our restless decades for centuries of quiet anticipation. Two centuries are not an unrequited term among the forest culturists of Europe, and we shall have to adapt the thought to its resulting benefits contributing our energies to the future welfare of the nation.

Immense numbers of walnut trees that now stand gracing and beautifying many an aged homestead owe their origin to the wisdom of the planter, and are, in such situations, rarely of spontaneous growth. The selection for the tree, and the increased estimation that begins to attach itself to it, are rendering it an object of universal culture, and we hope to see an enthusiasm in its behalf spring up throughout the land.—From "European and American Forestry," in the Penn Monthly for September.

THE FRIEND.

TENTH MONTH 28, 1876.

"But one thing is needful."
In this age of intense activity, both of the mental and physical powers of mankind; in which the forces of inanimate nature have been so greatly pressed into service to minister to the demands of man for the accomplishment of great results in short spaces of time, there is a corresponding tendency to crowd on the mind the just contemplation of those objects which are unseen and eternal. The agency of steam has now so bridged oceans and continents as greatly to diminish those natural barriers which once isolated men of different nationalities, and thus renders the desire to please the eye and the taste by visiting distant countries of easy gratification. The ambition of different communities in our day to rival their cotemporaries, has brought together in one place those marvellous displays of the products of art, mechanism and industry, many of which were unknown to our progenitors who died within the first half of the present century; and the extension of the electric wires to most parts of the civilized globe has enabled journalists to furnish information of the doings of our fellow beings of almost

every clime and race in such detail, as to occupy the attention of their readers for hours, perhaps, of each day in their perusal. These and other features of the present progressive period, powerfully tend to absorb every faculty of the mind in their consideration or enjoyment, and to obscure almost insensibly, even to the Christian traveller, the "one thing needful," from his view.

We believe it is highly important for all, and especially for those to whom others may look for examples in religious life and conversation, that a jealous guard should be kept over their hearts and thoughts in respect to the advancing demands which the material world is making upon Christians, through the medium of the beautiful, and even the utilitarian. It is no less true now than when the Apostle John penned the declaration, that "if any man love the world the love of the Father is not in him;" and that "the lust of the flesh, and the lust of the eyes, and the pride of life, is not of the Father, but is of the world." If our thoughts and time are engaged from day to day in seeking the gratification of our physical senses, even though it may tend to the acquisition of material knowledge, and the cultivation of what is considered a refined taste, there is great danger that the life of the heavenly plant in the soul may be choked out by their too ardent pursuit, and these things prove to be such as our Lord declared were abomination in the sight of God, although highly esteemed among men. How unfit the reasoning faculties of the unsanctified heart are to decide upon the latitude which may be taken in this way, and the conclusions which may be properly drawn from the study of both nature and art, is lamentably indicated by the infidelity and skepticism into which many of the devotees of science, and men eminent for their knowledge of natural subjects, have fallen in this age; who whilst inventing ingenious theories to account for the phenomena of creation, and urging their acceptance upon mankind as the only possible solution of the secret operations of nature, set aside as unworthy of credence, the inspired revelation of the order of creation given to man by his Maker, because they see discrepancies between the few facts which their limited observation has discovered, and the text of the Holy Scriptures. As a late writer truly observes in reference to this subject, "The triumph of our nature lies in the carrying out of its own will, in identification with some great object, in adhesion to some lofty aim. The triumph of Christ is placed in the subjugation of that very will." * * * "The sober Christian may possibly feel a shock in finding Novalis describe his faith as a foe to art, to science, even to enjoyment, yet does not his own daily experience prove, that the holding of the 'one thing needful' involves the letting go of many things lovely and desirable [to the natural man], and that in thought as well as in action he must go on ever narrowing his way, avoiding much?" "And this not because his intellect is darkened to perceive beauty and excellence, or his affections dulled to embrace them, but because human life and human capacity are bounded things; the heart can be devoted but to one object; and the winning of the great prizes of earthly endeavor asks for an intensity of purpose, which in the Christian has found another centre."

We are not advocates for a system that would satisfy the cravings of the soul for

purity, and favor with the Almighty, by a self-imposed asceticism or a chilling rejection of the gifts of a bounteous Providence. He truly "giveth us richly all things to enjoy;" and "every creature of God is good, and nothing to be refused, if it be received with thanksgiving: for it is sanctified by the Word of God and prayer." The religion of Jesus, whilst it is one that leads in the narrow path that He casts up who is the Way, the Truth, and the Life, has its joys that the world knows not of. If the ambition of the follower of the Lamb of God for worldly fame is quenched by the power of His cross, there is a nobler and stronger aspiration substituted by Him, that fills the soul and directs all its energies. "These things have I spoken unto you, that my joy might remain in you, and that your joy might be full." But let us not forget the conditions of His discipleship, and on which alone we can share in these ineffable joys: "Whosoever he be of you that forsaketh not all that he hath, he cannot be my disciple." "And every one that hath forsaken house, or brethren, or sisters, or father, or wife, or children, or lands for my name's sake, shall receive a hundred fold, and inherit everlasting life."

SUMMARY OF EVENTS.

FOREIGN.—The troubles in European Turkey continue, and serious fears are felt that Russia will become involved in the quarrel. In Russia the people warmly sympathize with their co-religionists the Servians, and are urgent that the government should openly espouse their cause. Many of the Russians that are now arriving in Servia are all uniform.

Recent engagements between the insurgents and Turkish forces appear to have resulted to the disadvantage of the former. There is much sickness in the hostile camps. Last week a sudden outbreak of plague carried off 318 Servian soldiers. Their high clothing and bedding were set on fire, and the ground was ploughed up, when the pestilence ceased as suddenly as it appeared.

Russian securities fell nearly twenty per centum in the London markets last week in consequence of the universal impression that open war between Russia and Turkey was inevitable. The London Times in an editorial article says: "The hopes we have so anxiously cherished must we fear at length be abandoned, and we must recognise the fact that negotiations are practically at an end, and that the two belligerents, now face to face in European Turkey, must be left to the consequences of their own acts."

The semi-official North German Gazette of Berlin announces that it learns from a good source in St. Petersburg, that the Czarowitz will shortly leave Livadia for Vienna, Berlin and London, for the purpose of personally promoting unanimous action of the great Powers in the interest of a satisfactory solution of the eastern question. According to assurances given in St. Petersburg circles, the Czar still adheres to his resolution not to act singly or abandon his alliances.

A Rector telegram from Vienna says: "Russia has presented to the Porte an ultimatum embracing in substance the following points: First, a six weeks' armistice unconditionally; second, administrative autonomy for Bulgaria, Bosnia and Herzegovina; third, the execution of reforms under the supervision of commissioners named by the great powers, and to be protected by an armed foreign force."

A Vienna dispatch to the Daily News says, intelligence has been received from Constantinople that the Porte will accept a six weeks' armistice, on the condition that the reform projects be not interfered with, and that the status quo be maintained in Servia and Montenegro.

The missionary societies connected with Spain sent an address to Lord Derby representing to him the dangers to which the Protestants in Spain were exposed in consequence of the intolerance of the clergy and authorities, and suggesting that he should invite the co-operated States to protest against the existing persecution of Protestants, and to afford them protection. In reply Lord Derby says: "Our minister at Madrid is

taking such steps as he properly can to induce the Spanish government to put a lenient construction on the eleventh article of the constitution, so as to secure full religious liberty to Protestants in Spain."

The *Pall Mall Gazette* publishes a long statement which it says is by a person fully entitled to speak on behalf of the whole body of American missionaries in Asia. The paper, however, does not state that the missionaries do not hesitate to say that the Turkish government affords better assurance of religious liberty than some forms of Christian rule which might replace it. The missionaries have such dread of Russian ascendancy that they have requested me confidentially to lay before the German government certain proofs of Russian intolerance, and to solicit Germany to secure from Russia guarantees of religious liberty before consenting to the dismemberment of Turkey or Russian occupation.

A Manchester dispatch of the 17th says: At a meeting of the Cotton Spinners and Manufacturers Association of northern and northwestern Lancashire yesterday, it was resolved that the operative cotton spinners having given notice that they will be bound no longer by the arrangement by which their wages have hitherto been regulated, action which would give that body the right of the position of wages in the district, therefore the mill owners refuse to continue work under the proposed conditions, and decide to give a month's notice that they will close their mills on November 23d. On this decision being announced the operative spinners agreed to recede from the position taken by them, thus practically ending the strike.

The British Parliament has been further prorogued until the 12th of Twelfth mo. 1876.

It is stated that the German government proposes to submit to the next Parliament the propriety of largely increasing the silver coinage of the country, on the ground that the present amount in circulation is insufficient.

The insurrections are spreading in various provinces in China. Yakub Beg is reported to have crossed the extreme western boundary of China proper, the Imperial troops retreating before him to Lan-Chou-Fo, capital of the province of Kansuh.

It is remarkable that a time when the depreciation of silver is causing so much uneasiness, China is almost devoid of coin. Interest has run up to 20 per cent, and money is scarcely procurable at that rate in Shanghai.

The last invasion of Abyssinia like the previous one, resulted disastrously to the Egyptians. The London Press states it has been ascertained that the Khedives forces lost 2700 men in the recent campaign.

Much indignation is expressed by British residents in China at the terms agreed to by Sir Thomas Wade, the British Minister, for the settlement of the Margary affair. The result is generally pronounced unsatisfactory to English feeling, and a triumph for Chinese diplomacy.

Calcutta advices report famine and drought in many parts of India, and in consequence much suffering. It is supposed that 300,000 people will have to be provided with charity.

There will be shorn in New South Wales, Australia, this year 1876, upward of 25 millions of sheep. The value of the wool crop of 1876 is estimated between 31 and 32 millions of dollars.

UNITED STATES.—President Grant acting upon information given to him by the Military Division of the Atlantic, has issued a proclamation declaring that it has been satisfactorily shown to him that insurrection and domestic violence exists in several counties of the State of South Carolina, and that certain combinations of men against law, known as rifle clubs, exists in many counties of said State, who murder respectable citizens and individuals of other States. All persons engaged in those unlawful and insurrectionary proceedings are commanded to disperse at once and retire to their respective abodes. Supplementing the President's proclamation is an order from the Secretary of War directing General Sherman to forward all the available force to the Military Division of the Atlantic to General Ringer at Columbia, South Carolina, in anticipation that the President's proclamation may be disregarded by the "rifle clubs." Secretary Cameron closes by saying that it is the fixed purpose of the government to see that the laws are enforced upon all citizens, and that the military force will be used if the regular troops are insufficient in case of resistance by the riflemen, the militia of the States will be called into service. This proceeding of the President is strongly condemned by the Democratic journals, which insist that no such condition of affairs as the President alleges has taken place in South Carolina, and that his action is based upon false or evidently exaggerated

statements of political partisans. The friends of the administration on the other hand, contend that the measures complained of were necessary to prevent bloodshed and make a fair Presidential election in South Carolina possible.

The Mayor of Savannah has given notice that the no further issue of excursions from that city. He however cautions absent citizens from returning to their homes, as some yellow fever deaths occur every day.

The aggregate vote on the State ticket in Indiana is 433,403, of which Williams, Democrat, received 213,098; Harrison, Republican, 207,979; Harrington, Independent, 12,296. Williams majority over Harrison 5119. The Legislature stands: House—Republicans, 53; Democrats, 45; Independents, 2. Senate—Republicans, 23; Democrats, 25; Independents, 2. The Democrats elected only four of the thirteen members of Congress.

The Commissioner of Indian Affairs at Washington has received a letter from Indian Agent Mitchell, at Fort Peck, Montana, stating that Sitting Bull had sent a messenger to the agency inquiring whether the hostile warriors would be allowed to come in and trade for ammunition. Agent Mitchell says: I dispatched a messenger 12-296. Williams majority over Harrison 5119. The Legislature stands: House—Republicans, 53; Democrats, 45; Independents, 2. Senate—Republicans, 23; Democrats, 25; Independents, 2. The Democrats elected only four of the thirteen members of Congress.

Agent Mitchell has since received the following instructions: Inform Sitting Bull that the only condition of peace is his surrender, when he will be treated as a prisoner of war. Issue no rations except after such surrender, and when fully satisfied that the Indians can be held at the agency. Make early preparation to defend the property of the United States. The military will cooperate as far as possible.

Among the destructive fires of last week the most serious was that which occurred at Louisville, Ky., the 17th inst., in which many valuable buildings and much merchandise were destroyed. Total loss \$900,000.

The 18th inst. was a memorable one in Ohio as was 631,095, and the Republican majority 6,149. The Republicans elected twelve Congressmen and the Democrats eight. The popular vote was 35,000 higher than ever cast before in the State.

The Democratic Executive Committee of South Carolina has issued an address commending the President's proclamation. Attention is called to the notorious falsity of the statements upon which the proclamation is based, but in the interest of peace and order the committee calls upon the so-called rifle clubs to disband and obey every command from Washington.

There were 467 interments in New York last week, and 293 in Philadelphia.

During the six days ending on the 21st, the International Exhibition was visited by 620,814 persons who paid for admission. The largest number any day was 161,355, on the 19th inst., and the smallest 72,971, on the 1st of last week. The total cash admissions up to the close of last week were 6,375,493.

The whaling bark *Florence* arrived at San Francisco the 21st inst. from the Arctic ocean, with one hundred and ninety men on board, being a part of the crews of the Arctic whaling fleet, twelve of which had been lost in the ice, with portions of their crews. The remaining 190 were taken on board by the *Chileno*, and returned. The whole number of lives lost was uncertain, but probably from 50 to 60 men were left behind. The disaster which occurred near Point Barren, seems to have been caused by immense fields of drifting ice which surrounded and crushed the vessels.

The following were the quotations on the 23d inst. *New York*—American gold, 169; Superior flour, \$4.60; State extra, \$5.30; extra white, \$5.50; finer brands, \$6 to \$8.75. State white winter wheat, \$1.36; amber winter, \$1.32; No. 2 Chicago spring, new, \$1.27; amber, 92 cts. Mixed and yellow, 90 cts. *Philadelphia*—Flour, \$4.50; extra, \$5.00; extra, \$5.50; extra, \$6.00; extra, \$6.50. Oats, \$1.35; Pennsylvania red, \$1.20 to \$1.25. Rye, 72 to 75 cts. Yellow corn, 60 to 61 cts. Old white oats, \$1.00; yellow, \$1.00; red, \$1.05. Sales of 4700 head of cattle at 51¢ per lb. over live gross extra. 41 to 51 cts. for fair to good, and 31 to 41 cts. for common. Sheep, 41 to 61 cts. per lb. gross. Receipts 13,000 head. Hogs, 85 to 90¢ per 100 lb. net. Receipts 5500 head. *Chicago*—No. 2 spring wheat, \$1.10; No. 3 do, 95 cts, 90 cts. No. 2 corn, 43¢ cts. Oats, 32 cts. Lard, 9 cts.

BIBLE ASSOCIATION OF FRIENDS.

The next stated Annual Meeting will occur on Friday evening, first proximo, at 8 o'clock, in the mitee-room of Arch Street Meeting-house. Friends generally are invited to attend.

WILLIAM EVANS.

Tenth mo. 1876.

WESTTOWN BOARDING SCHOOL.

THE WINTER SESSION of the School will commence on Second-day, the 30th inst. The Boys' School Application for the admission of girls may be made to BENJAMIN W. PASSMORE, *Supt.* (Address Street P. O., Chester Co., Pa.) or to CHARLES J. ALDEN, *Treasurer*, No. 304 Arch St., Philadelphia.

Pupils who have been regularly entered and written by the cars from Philadelphia, can obtain tickets to ride to the West Philadelphia Railroad Station, at the corner of Thirty-first and Chestnut streets, by giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. These tickets can also be obtained of the Treasurer, at 304 Arch St. In such case the passage, including the stage fare to the Railroad station, will be charged at the School. Pupils who wish to attend on other incidental charges at the close of the term. Conveyances will be at the Street Road Station on Second and Third-days, the 30th and 31st insts., to meet the trains that leave Philadelphia at 7:35 and 10 A. M., and at 12:30 and 2:30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at the latter place, it will be forwarded to the depot at Alexander & Son, who will convey it thence to the First and Chestnut at a charge of 10 cents per trunk to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of City, by sending word on the day previous (through the depot or otherwise) to H. Alexander & Son, 304 Arch Street, and Market Sts., their charges. A case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same they will also collect baggage from the other railroad depots, if the checks are left at their office, corner 18th and Market Sts. Baggage put under their care properly, will not require any attention from the owners, either at the West Philadelphia depot at the Street R. Road Station, but will be forwarded by the School. It may not always go on the same to the school, but it will go on the same day, provided the notice to H. Alexander & Son reaches them in time.

DURING THE SESSION, passengers for the School will depart at the Street Road Station, on the arrival of the first train from the depot, except on the 30th and 31st, and small packages for the pupils, if left at Friend Book Store, No. 304 Arch street, will be forward every Sixth-day at 12 o'clock, except on the last two Sixth-days in the Twelfth month, and the expense charged their bills.

Tenth mo. 18th, 1876.

WESTTOWN BOARDING SCHOOL.

SPECIAL NOTICE TO PARENTS AND OTHERS. The Committee having concluded to divide the School in distinct classes more fully than has hitherto been done and in such manner that all the pupils of each class, so far as practicable, recite together in their various studies, this change will take effect at the opening of the next session; and it is believed that it will so facilitate the classification of the School that the classes may commence reciting on Fourth day morning, 1st of Eleventh month. It is therefore particularly requested that all the pupils be at the School by Friday evening, and that all those who were not at Westtown during the past session present themselves to the Superintendent of the School, or not later than 1 o'clock Third day morning.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

MARRIED, at Friends' meeting-house, London-Britain (Chester Co., Pa.), on Fifth-day, 9th mo. 21st, 1876, HENRY W. SATTERTHWAITHE, of Fallsington, Pa., the daughter of Charles and Mary A. Sharpless, the former place.

For "The Friend."

Mission of George Bogle to Tibet.

(Concluded from page 82.)

While George Bogle was with Teshu Lama, returned to his home at Teshu Lumbo, in which the small-pox had driven him away. He was accompanied by a numerous suite, and received those marks of respect and affection on his journey, which his station and personal character were calculated to produce. G. Bogle says, there was on the attentances of the spectators a look of veneration mixed with joy, "which pleased me beyond anything." "One catches affection sympathy, and I could not help, in some measure, feeling the same emotions with the lama's votaries."

It is very evident in reading the narrative of this mission, that a sincere friendship grew up between Bogle and his host. The varying kindness and attention with which he was treated, and the amiable character of the Lama, naturally awakened an affectionate interest in the mind of the young Scotchman. He was received without ceremony, and his frequent conversations with the Lama were one of the most pleasant sources of relief to the rather monotonous life he led while in a palace.

Desiring to make some return for the civilities he had received, he purchased some coral beads, which are much valued in that part of the world. He then called on the widow and daughter of a brother of the Lama, who were paying a visit to their uncle, and presented a portion of his purchase to them. But he found great difficulty in persuading them to accept the gift. With the two nephews of the lama, whom he had found to be pleasant companions, the same difficulty presented. "You," said they, "are come from a far country; it is our business to render your stay agreeable; why should you make us presents?" "This circumstance," adds Bogle, "serves to set the character of the Tibetans in a stronger and more favorable light than if I were to write volumes on the subject."

"About this time I undertook a work for the Lama which gave me a deal of employment and a good deal of trouble. It was an account of Europe, and I confess I found it a very difficult task, for I had to fancy myself a Tibetan, and then put down the things which I imagined would strike him. I had abundance of difficulty also in translating it into the Tibet language, being obliged to use

an interpreter, a kind of being who is generally more apt to follow out roundly his own ideas than to keep strictly to yours. I got through France, England, and such other countries as I have seen; but having no books to assist me, I was obliged to leave it unfinished. As it was, it afforded a great feast to the Lama's insatiable curiosity.

"As Mr. Hamilton was returning from Durjay Panno's he saw a crowd of people, in the midst of which a young gylong [priest] was being chastised for neglecting his lesson. He was extended upon the ground and held down by four people, while a fifth was bastinadoing him. Let no one who has been at a public school in Europe cry out against the Tibetans for cruelty.

"The Pyn Cushos [nephews of the Lama] used often to come and see me. To-day their sisters, the nuns, came along with them. They asked me to show them my fringed dress, and we prevailed on the youngest sister to put on my coat. We had a great deal of laughing and merriment. But who can repeat the little unimportant trifles which gladden conversation and serve to while away the time?"

"The priest, who every morning came to me with boiled rice and tea from the Lama, was called Debo Dingi Sampa. He was about fifty, marked with the smallpox, his eye mild and candid, and himself of great singleness of mind and simplicity. He came to understand my imperfect attempts to speak the Tibet language tolerably well, and we used to have long chats together. I grew very fond of him, and he, which showed his sagacity, took a great liking to me. He always kept a box of excellent snuff, and was not uggardly in offering a pinch of it. But with all Debo Dingi's good qualities, he was as averse to washing his hands and face as the rest of his countrymen. He happened one morning to come in while I was shaving, and I prevailed upon him for once to scrub himself with the help of soap and water. It gave him a new complexion, and he seemed to view himself in his shaving glass with some satisfaction. But he was exposed to so much ridicule from his acquaintances, that I never could get him to repeat the experiment."

In his despatches to Warren Hastings, David Bogle gives this character of the Lama: "He is of a cheerful and affable temper, of great curiosity, and very intelligent. He is entirely master of his own affairs; his views are liberal and enlarged, and he wishes, as every great man wishes, to extend his consequence. From his pacific character, and from the turn of his mind, naturally gentle and humane, he is averse to war and bloodshed, and in all quarrels endeavors by his mediation to bring about a reconciliation. In conversation he is plain and candid, using no flattery or compliments himself, and receiving them but badly if made to him. He is generous and charitable, and is universally beloved and

revered by the Tibetans, by the Kalmuks, and by a great part of the Chinese. The character I give of him may appear partial; but I received it in much stronger colors from his own subjects, from the Kashmiris, and from the fakirs; and I will confess, I never knew a man whose manners pleased me so much, or for whom upon so short an acquaintance I had half the heart's liking."

He entered heartily into the plans for opening anew the commercial relations between the two countries, and used much exertion to promote it by employing his influence with the regent of the Dalai Lama, who still retained many suspicions of the English; and by representations to the merchants who carried on trade with distant regions. The conversations, between them, which our author narrates, are numerous; and evince much liberality of sentiment, and statesmanlike views; and at the same time a degree of openness very different from the artful duplicity that marks many negotiations. The jealousy of the representatives of the Chinese Government residing in Tibet was greatly in the way of success; and the merchants feared the fatal effects of the hot climate of the low plains of Bengal on a people who had always lived in the cold and bracing atmosphere of their elevated country. They told him that of those who had made the journey, eight out of ten had died. Bogle replied, that they could employ agents more accustomed to the climate of the lower regions.

The final parting with the Lama is thus described: "Teshu Lama repeated his concern at my departure; the satisfaction he had received in being informed of the customs of Europe, and concluded with many wishes for my prosperity, and that he would not fail to pray to heaven in my behalf. He spoke all this in a manner and with a look very different from the studied and formal compliments of Hindustan. I never could reconcile myself to taking a last leave of anybody; and what from the Lama's pleasant and amiable character, what from the many favors and civilities he had shown me, I could not help being particularly affected. He observed it, and in order to cheer me mentioned his hopes of seeing me again. He threw a handkerchief about my neck, put his hand upon my head, and I retired."

In a letter to his sister, he thus refers to his leaving Tibet: "as the time of my departure drew near, I found that I should not be able to bid adieu to the Lama without a heavy heart. The kind and hospitable reception he had given me, and the amiable disposition which he possesses, I must confess had attached me to him, and I shall feel a hearty regret at parting. In spite of all my journeyings and wanderings over the face of the earth, I have not yet learnt to take leave, and I cannot reconcile myself to the thoughts of a last farewell."

"When I look on the time I have spent

For "The Friend."

among these hills it appears like a fairy dream. The novelty of the scenes, and the people I have met with, and the novelty of the life I have led seem a perfect illusion. Although my days have been spent without business or amusements, they have passed on without care or uneasiness, and I may set this down as the most peaceful period of my life. It is now almost over, and I am about to return to the hurry and bustle of Calcutta.

"Farewell, ye honest and simple people! May ye long enjoy that happiness which is denied to more polished nations; and while they are engaged in the endless pursuits of avarice and ambition, defended by your barren mountains, may ye continue to live in peace and contentment, and know no wants but those of nature."

At the earnest request of the Emperor of China, Teshu Lama, a few years after the visit of D. Bogie, consented to make a journey into that country and remain a few months there. About ten months were spent on the journey. He was received by the Emperor with great respect, and lodged in a magnificent house outside of the walls of Peking, and for several months there were constant interchanges of visits between the Emperor and the Lama. The native account says, "To the inexpressible grief of the Emperor and the whole people of China, the Lama was seized with small-pox, and expired on the evening of November 12th, 1780, as he sat at prayer between two large pillows, resting his back against the wall. His death was remarkably tranquil. The body was placed in a coffin of pure gold in the form of a temple, fixed on poles, and the Emperor ordered it to be conveyed to Tibet in charge of the Lama's brother. The gold temple was placed within a copper temple. The return journey occupied seven months and eight days from Peking to the mausoleum at Teshu Lumbo."

Cheer Him.—Moody tells a thrilling incident of the great Chicago fire. A child was in an upper room, seeking for help, while the devouring flames were wrapping the building in the fiery winding sheet of death. A stalwart fireman thrust his ladder against the wall, and began to ascend. A crowd gathered, and as the brave man was about to enter the window, volumes of smoke and fire burst forth, and he stopped, hesitated, faltered. Suddenly a man cried "cheer him," and loud exulting cheers immediately burst from every lip, which, like a thundering avalanche, urged the man forward, who, springing upward with renewed energy, dashed through the fiery billows, grasped the child, and bore it in triumph from the very jaws of death.

A man becomes almost omnipotent when a whirlwind of cheering bears him on. Fire may rage, and surge, and glow, and smoke may ascend, but who life imperiled, every impediment is swept aside, danger is faced, opposition overcome, and victory is ours. We little think how much a whispered cheer will nerve another. It may be echoed in life's success, and thunder in the choruses of heavenly song. Shall we not plant roses rather than thorns?

After the despondent soul intent on duty, and struggling like a hero for the right. The cheer may be taken up by others, and that which to-day is whispered hesitatingly, may to-morrow be the chief note of your battle song.

Testimonies to the Truth, having Application Now.

The following are selections from the Letters of that seer in Israel, the late Sarah Lynnes Grubb. Alas, how has that which she saw, and feared, and warned of, been lamentably experienced! But while a class, so given to unsettlement and innovation, are admonished, and, in the love of the gospel, labored with; there is another class—a meek, and constant, and change-fearing remnant—who are encouraged to keep fast hold of the ark of the covenant, and to not be moved, by any of the storms that either frown or fall, from a holy steadfastness that is in Christ Jesus.

The extracts are fraught with solemn admonition to all in our religious Society; and especially to such as are in danger of being captivated by the compromising spirit, the thirst for change, with the freedom from restraint, now so wide-spread, and which so insidiously tends to lead from the strait gate and the narrow way—the only ones to life.

She first thus instructively writes concerning herself: "Third month, 1831.—He who hath 'His way in the sea,' whose footsteps are not seen, hath been my help in suffering. I can say that I have risen at the midnight hour to supplicate His mercy, and to beg that *I might be kept by His power*; that for the sake of my beloved husband, for the sake of our dear children, but *above all*, for the sake of the truth itself, nothing might really prevail against me, to render me as a broken bow."

"Third mo. 1832.—It seems to me to be a day of perplexity and of treading down; a day of gloominess and of thick darkness; a time wherein *opinion takes the place of faith* to an alarming degree; which is manifest in the want of unanimity respecting our testimonies, and in the *contrariety of practice*, as relates to some of them in particular.* It is indeed a trying time many ways, and puts me in mind of that scripture, 'If the foundations be destroyed, what can the righteous do?' but surely the Lord knoweth the way of the righteous, and although He may permit these to be much tried for a season, He will *one day bring them forth as gold*; yea, I believe that the remnant among us, who *keep fast hold of their integrity*, will yet appear in the same brightness that the sons of the morning did, and show forth the praises of the Most High, as was the case with Friends before the gold became dim, or the fine gold was changed. May the simple-hearted therefore strengthen themselves in their God, even in this evil day, though it may yet show itself to be still *worse* an evil day, and notwithstanding terrible things may be spoken in righteousness, by the Judge of all the earth."

"Fifth mo. 30th, 1832.—To some of us this Yearly Meeting has been a trying time, beyond what I can remember; for the lowly life has, in my apprehension, been borne down by that which, with a *specious appearance*, seems to me to be much devoid of substance. I have once more been constrained to sound an alarm, and set forth our danger, which some believe, and many set at naught."

"Eleventh mo. 4, 1832.—The world seems to gain much ascendancy in the present day among us, as a people, both with parents and

* The reminiscence is almost incredible—that the lapse of which she writes, and the results of which have been so distressing, should have been noticeable forty-four years ago.

children; so that little room is left for simplicity, purity, and meekness of the Gos of Christ; and we have few noble stand-bearers, and few of our children promise by their humble deportment, to become valid upon earth, in the great and glorious cause of promoting the kingdom of the Redeem among men. Is it not so? I wish I could take a more encouraging view of things immediately relating to our Society than I am capable of doing, when my mind is in an distracted state; but fear takes hold upon me lest we should be assimilating more and more to spiritual Babylon, in too general a way.

Shall not we who are parents, endeavor see, in the light which deceiveth not, how is in our families, as well as in the church and is it not for us to labor with our dear children, to bring them to a just sense of the necessity of taking up their daily cross, they would have a crown of everlasting righteousness and joy; and if, indeed, they would be owned by the Saviour upon earth, as He people?"

"Twelfth mo. 11, 1832.—The righteous are indeed taken from a day of overturning at least among ourselves as a people; for seems to me our departure from the true and ancient standard *almost generally*, is becoming more and more apparent, from the forenoon rank down to the children.* Alas! I do not recollect to have been so much of a mourner in all my life, with respect to us; and will the Most High visit for these things? Be enough; there remains to us that which is irremediable and safe to attend to and build upon and there are preserved those who have our dependence, and who will prove themselves truly wise in their choice and in the obedience, when the sandy foundation will be discovered and shaken, and all will give way that has been erected on it."

"Sixth mo. 6, 1833.—On the whole, this Annual Assembly has proved more discouraging in the review of our state in this land than I have ever known it. I am sorry to say that I fear many of the most active among us, are going back into things which our community, in the beginning, suffered much in coming out of. Where this will end time must reveal. Surely we shall yet be a dis-

* And is not this the almost invariable result?—The parents eat sour grapes will not the children's be set on edge? For the former renounce from the vintage ground and safe-abiding of original Quakerism, will not the latter, encouraged by the example of those the love, be likely to relapse too? and give themselves over to the very congenial loss of the flesh, the lust of the eye, and the pride of life? Parents should see to it, that the leprosy they may sooner or later deplore in their children, had not its beginning in their own devious or wavering course; and the Christian discipline and the daily cross neglected on the part of the one the other.

Even the beckoning Pleasure leads them, wildly stray 'E'en to break the bands, and cast the yoke away."

† Lest any should say, that S. L. G.'s remarks and exercises had allusion *only* to what was then called "heavenism," we quote from the pen of her able contemporary, John Barclay, in the same year, 1832. "We have signs of the times enough to assure us, that there is that at work in our poor Society, which if not averted, may beguile and corrupt, if not shake us as in sieves, till we be reduced to a little remnant." 1837.—"Though the Society seems somewhat relieved, yet grievous exercises remain to be borne, and a great deal to be worked through and worked out, before this one self-denying and redeemed people, can be reinstated in their former brightness and ancient purity. The Lord waits to be gracious, and I believe will hasten this work in his time." 1837.—"Time rolls on and manifest things and persons appear." The conflict and con-

net people; at least this is my humble hope. The same testimonies will, however, be borne, and the same standard flocked unto, which have been upheld by this people; for they are ever-lasting, immutable Gospel of our Lord and Saviour Jesus Christ."

"Twelfth mo. 1833.—In the Select Quarterly Meeting in London, I felt constrained to speak of our dangerous state, and call for aid at which, however specious, was making me head sick and the heart faint, in our body as a Society. I felt a mighty current against my testimony, but was enabled to deliver it faithfully, and to invite from all that would sinuate itself as an evil disease, yea, a noxious pestilence walking in darkness—*were to dread* than that which laid low the earth's tabernacle, and brought it to the silent 'ave.'

"Second mo. 1834.—Oh! how is the innocent life now trampled upon! How is the mystical body of Christ despised within our Isle! Surely if the members are set at nought, he is the Head; and I am persuaded that the true Christ is crucified afresh, and put to open shame, under the very pretence of extolling him. We have indeed the 'lo here,' and the 'lo there,' come with power, but concerning which, we had need to attend to the warning and prohibition, 'Go ye not forth to meet me.'

"Whether these things will bring to any outward line of separation or not, is yet to be proved. Great want of unity is apparent. We who do not profess to see further than our first Friends did, and who consider that the boast of greater light on gospel truth than they were to speak of, is not safe, I say, we are styled 'ignorant,' 'prejudiced,' and 'uncharitable.' But is not the straitness in that which thinketh it knoweth any thing without the Spirit that searcheth all things, even the deep things of God? And is not that out of the true charity, which denies 'Christ with the hope of glory?' It has been my painful lot, from year to year, for many years past, to utter a warning voice in our annual assemblies, and at other times, against the very things that are come upon us; but I was told again and again that I must be mistaken, and recommended to endeavor to look on the right side of things, &c.; and even now, in effect, the cry is, 'Prophecy peace; prophecy moor things'; or else keep silence."

"Fourth mo. 1836.—We are indeed come to strange times (as regards our Society) but of this I am persuaded, that the standard of truth, ancient and new, cannot be lowered by the wisdom of man, or any of the devices of the serpent; though a disposition may prevail and be operated upon, to square things to the notions of such as are 'wise in their own eyes, and prudent in their own sight.' Let us be simple and humble; keeping with the lowly life of Christ Jesus in our own hearts; then will it keep us from all that could harm us."

"1837.—Oh! may all beware of choosing a path that looks pleasing to the unappointed eye, and as though it must end in life and

rest is pretty well over, with what was called Beacon; but there are those still remaining, who occasion the true Friends great exercise; being unwilling to go the whole length with our ancient primitive worthies, but are readily fine in fault. O! I trust this also shall in the end be broken up, and the testimony of Truth, in all its completeness and simplicity, rise and shine over all opposition. Modified quakerism cannot stand the fire."

salvation, but not being strait and narrow, to the aspiring, unsubdued mind of men, will, sooner or later, be found to diverge into the broad way that leads to destruction. An insidious spirit, ready to draw from the true fold, is still amongst us in different degrees; but the Lord will more and more discern it, by that which searcheth all things; however secretly, and with whatever subtlety it may now be at work. It hath done, and is still doing great injury to the rising generation of this people; 'a people near unto the Lord.' Its voice is causing many of them to go from hill to mountain, as scattered sheep; and great will be found to be the responsibility of those who have induced them to turn a deaf ear to the monitions of the Good Shepherd in their own hearts."

"Tenth mo. 1837.—Few seem to me to remain amongst us, who persevere in the path cast up for the self-denying followers of Immanuel crucified. Few indeed, in this good old way, in which our forefathers were as a shining light; and yet I hope we still have hidden ones secretly embracing, yea, purchasing the ever blessed, immutable truth, on its own terms; not wishing to enter into, or repair to argument, to convince them of that which is self-evident, but simply submitting to Divine grace, that what they are, they may be by it."

"Twelfth mo. 1837.—Above all have I sighed and mourned for the state of things among us, as a Society. * * Its acts, in some instances, have been utterly inconsistent with our principles; so that it may be confessed that, in our sanctioning what is irreconcilable with the truth, even in a Society capacity, we have given away our strength like Samson, and we have surely 'changed our glory for that which doth not profit us.' Some tell me to recollect 'the cause is the Lord's.' This I do not forget; but some of us are commended to sigh in measure, like the prophet, who was to sigh deeply; yea, to the 'breaking of his loins.' Others see nothing to sigh for."

"Sixth mo. 1839.—I wish that many may be induced to return, who have wandered as wandering stars in our day; but oh! the humility, the great mortification of the mere man that becomes necessary, almost brings me to the mournful language of the prophet, as regards some, 'there is no hope; and the wilful blindness of others leads to the painful conclusion, that they are not likely again to come out of captivity, or see their native country.'

"Second mo. 1841.—In my very secluded allotment here, I think my inward eye sees a covering in our Society that is prohibited in the truth; a mixture as surely disapproved in the sight of the great Head of the Church, as ever the forbidden linsey-woolsey garment was of old; and which must one day be taken off, for the all-scrutinizing eye will not wink thereat."

Removal of Dry Putty.—According to an English Journal, the difficulty of removing hard putty from a window sash can be obviated with great readiness by simply applying a piece of heated metal, such as a soldering-iron or other similar implement. When heated (but not red hot) the iron is to be passed slowly over the putty, thereby rendering the latter so soft that it will part from the wood very readily.

Roquefort Cheese.

Roquefort cheese, the finest of French cheese, is made from the milk of a peculiar breed of sheep. These sheep are tended with great care, being fed in the winter on preserved grapes, and their drink consisting of water whitened with barley flour. In the summer they feed on the choicest artificial pastures, and are watered at brooks warmed by the sun's rays; they are carefully guarded from all excitement from dogs or other animals, and every detail is studied that can affect the quality of their milk. The milk is taken from the sheep morning and evening, in iron pots lined with tin. It is carried in there to the farm-house, where it is skimmed, strained and warmed, though never above boiling point, the temperature depending upon the state of the weather. After this it is placed in large, deep pans for the cream to accumulate. A great amount of experience, as well as a fine discriminating sense, is required to decide as to the milk which is fittest for cheese and for butter respectively. This point having been settled, the morning and evening milk, which had hitherto been kept apart, is mixed, and the milk in the pans is then stirred with willow sticks by the milk maids. Then covers are put on the pans, and the milk is allowed to rest, rennet having been added. Following this are several processes, such as breaking, squeezing and filtering the curd, molding, milling and draining. In one of these processes the new cheeses are rubbed with moldy bread, the latter entering into the composition of the cheese, and imparting to it the necessary green ripeness. This bread is made from the finest wheat or barley; it contains a quantity of the strongest yeast; it is thoroughly baked; after the crust has been removed it is pounded in a mortar; it is then allowed to be in a damp place until every crumb is touched; it is sifted, and when so prepared the mold actually grows through the cheese like a plant. The remaining milk is next drained off, the cheeses being placed on grooved shelves for the purpose. After this the cheeses are turned twice a day for a week, and subsequently go to the drying room, an excavation facing the north kept perfectly clean and having metal or canvas blinds, for the exclusion of dust and flies, and lined with linen-covered shelves, on which the cheeses are kept warm by relays of pails of boiling water. The cheeses next pass into the cellar, being packed in cases of special construction, and loaded in vans slung below the axles to avoid the jolting which would ruin them. The transit to the cellar also takes place at night to avoid the heat of the sun. At the scale chamber the cheese are examined, weighed and registered. This, however, is not the last stage a Roquefort cheese goes through. They are covered with salt, one surface at a time, and after two days have elapsed the salt not absorbed is rubbed in with a rough Dutch cloth. The cheese is afterward scraped over to remove a glutinous covering or crust, and in a little over a month it is ready for the market. The removal of this coating of the cheese affords employment to numbers of girls called *Cabaners* from the ancient designation of the Roquefort cellar, which was "cabin." The chief brand of Roquefort cheese is that of the Societe des Caves Reunis, which brings from fifteen to twenty-five francs (French) per cwt. more than any other brand of the same. About 400,000 sheep contribute their

milk to make this cheese, which is the choicest French kind.—*Am. Grocer.*

Reading Meetings.

For "The Friend."

While I believe there will again be organized during the coming winter, in the limits of different meetings belonging to Philadelphia Yearly Meeting, reading circles so-called, I felt an impression on my mind, as one interested in those meetings, to call the attention of other Friends to this subject, that they may give it more deep and close examination and care. I believe it is very desirable at the present time, in viewing the state of the Society of Friends, that such meetings be established; in order that our young and also many older people among us, may become more thoroughly acquainted with the history of Friends in all its branches; and also with the Christian life, experiences and labors of many of their worthy ancestors, by reading the approved journals of ancient and modern Friends. The reading also the writings of some who were not members of our Society, but whose spiritual views in religion were nearly, and in some cases quite, in accord with our own; and the comparing these with those of Friends, may strengthen us and confirm us as to the correctness and truthfulness of our faith, and that to maintain it is our mission and duty. I believe if these meetings are conducted aright, under the care of judicious and weighty elders or other Friends, there will much good result from them in bringing our people up, with the assistance of Divine grace, to become sound Friends and true Christians; and to be more and more persuaded to live up to the pattern of the truth and gospel of Jesus Christ and his disciples in all times; that we may receive power to maintain those precious truths and testimonies before the world, under all circumstances and trials.

Those meetings have also the tendency to bring Friends in more harmonious feeling and social intercourse with each other in spiritual and in external matters. They will, I believe, bring us nearer in union and fellowship, and will unite us in the one cause, and will make us Friends indeed to each other, seeking each others' welfare, and working for the promotion of Christ's kingdom in the earth. So, I believe, will we be taught and baptized together in the one body, the church, and become living members of it, knit together in love by the Head of the church. Such was the state of Friends in the beginning of their existence as a people.

W. A.

Wilmington, Del.

Origin of the Aerolites.—During the last two or three years the discovery of energetic forces of eruption on the sun has demonstrated the occasional occurrence of convulsions so violent that they may suffice to project molten and gaseous matters to distances beyond the sphere of the sun's attraction. The existence of such forces and the evidence which the microscope affords that aerolites have had their origin among mineral masses in a state of fusion, if not of vapor, combine to support the theory formerly entertained by other writers, and recently announced very definitely by Mr. Proctor in England, and Professor Keilwood in America, of the a-tro-meteorological hypothesis of the origin of meteors and meteorites.

THE SHELTERED PLANT.

Selected.

Once as the shades of even fell,
A garden walk I trod,
And viewed with an admiring eye,
The handiwork of God.
The flowers that lie along our path,
Are tokens from above,
And if we have a heart to learn,
They teach us "God is love."
So bright-lined all, so sweet the breath,
I knew not which to choose,
Until at length I stood before,
A young and budding rose.
Whilst it I viewed, the gardener came,
And ere I was aware,
Had raised the flower and then I knew,
It hence he meant to bear,
I grieved to see the rose removed,
Its parting I would stay;
So said I to the gray-haired man,
"Why take the plant away?"
He turned and bent his eye on me,
And spoke in tones most mild,
"Behold yon dark and heavy cloud,
It bodes a tempest wild,
My other plants can bear the storm
And it will strengthen them;
But the blast would search this little one,
And break its tender stem,
And so in love I bear it hence,
Far from this open space,
That it may flourish 'neath my care,
Within a sheltered place.
Nought shall it know of scorching heat,
Of storm and winters cold,
But there the bank that you admire,
Will perfectly unfold."
The gardener paused, he turned to leave,
And since we have not met;
But long I thought of all his words,
I miss upon them yet.
"Oh, that it is, with cherished ones,
By death so rudely riven;
God sees the storm would be too rough,
And shelters them in Heaven.
Sweet buds of promise in that home,
* No cold winds 'er them blow;
They're fairer than our eyes have seen,
And still in beauty grow.
Oh ye whose little ones have gone,
Stay, stay, the falling tear!
Thank God that they are sheltered safe
From storms that we meet here."

Zollner's Theory of the Solar Spots.—The theory of Zollner as to the constitution of the sun and its spots has been thus described by him: The sun is a glowing liquid body surrounded by a glowing atmosphere; in the latter, at a certain distance above the fluid surface, there floats a covering, constantly renewing itself, of shining clouds, like our own cumuli. At those places where the cloud canopy is thinned or dissipated, there arise on the glowing surface, by means of powerful radiation, the slag-like products of cooling. These, therefore, lie deeper than the general level of the shining clouds, and form the nuclei of the sun spots. Above these cooled regions there are formed descending currents of air, which give rise to a circulation of the atmosphere around the edges of the islands of slag, to which circulation the penumbra owes its origin. The cloud-like results of condensation, which are formed within the region of this circulation, have their shape and temperature determined by the nature of the circulation itself, and must, therefore, in consequence of their lower temperatures, appear less brilliant than the other portions of the cloud canopy of the solar surface, and seem depressed like a funnel, by reason of their descending motion above the spot. The exterior edge of the penumbra is at the level of the shining canopy.

Martyrdom of a Friend under the late Modern Inquisition in Spain.

This Tribunal of the Faith, governed its own chief, and conducted on a system its own, is the old Inquisition under a new name. It has been fully described (chap. XX), and I have now only to record one two examples of its action since 1823.

How many deaths there have been on account of religion it is impossible to say; we have heard of two in 1826. The first was that of a Jew, burnt alive; but I have authentic information of particulars. The second was that of a schoolmaster of Busa, a village in the neighborhood of Valencia whom people considered to be a Quaker. I was accused before the new tribunal, condemned, thrown into the prisons of St. Nicetas, as they are called, and there detained for some time, together with the vilest felon. My informant, a priest of Valencia, and eyewitness of his martyrdom, says that "The Lords of the Tribunal of the Faith endeavor to induce him to make a solemn renunciation of his belief as a Quaker; but he said that he could do nothing against his conscience, nor could he lie to God. They condemned him to be hanged; and he was transferred to the condemned cell, and resigned himself fully to the will of God."

"On July 31st, 1826, he was taken from the prison to the scaffold, displaying the most perfect serenity. The crosses were removed from the scaffold. He was not clothed in the black dress usually put on culprits when brought to execution, but appeared in a brown jacket and pantaloons. With a serious countenance and unflinching mien, he ascended the scaffold conducted by Father Felix, a barefooted Carmelite friar, who exhorted him to change his views. But he only replied, 'Shall one who has end-avored to observe God's commandments be condemned?' When the rope was put round his neck, he asked the hangman to wait a moment, and, raising his eyes toward heaven, prayed. There can be no doubt of the accuracy of this account."

In April, 1838, I visited Valencia, was taken to the very spot where the gallows was erected, and there received ample confirmation of the fact, with many circumstantial details from persons who had stood around the victim as he died.—*From "History of the Inquisition by Wm. Harris Rule, vol. 1, page 330.*

Selected.

Bible Pavilion.—A few months before the opening of the Centennial Exhibition the Board of Managers of the Pennsylvania Bible Society resolved to erect a Pavilion on the grounds for the sale of Bibles and Testaments in all languages that could be obtained. A white flag floats from the top of the Pavilion with the inscription: "Peace, good will toward men." These and other impressive texts attract the attention of the many thousands who daily pass by.

Inside, the shelves are supplied with Bible and Testaments in one hundred languages that are for sale at prices that bring them within the reach of all who come there. Portions of many of them can be had as low as five cents each, and complete Testaments at ten and twelve cents.

Last month these were issued in thirty distinct languages.

A book of forty-six pages, published un-

ished by the American Bible Society, containing the sixteenth verse of the third chapter of St. John's gospel, in one hundred and fifty-four languages, is given out gratuitously, and ten thousand copies have already been made. Intelligence has been received from remote and remote sections of this country, these books being carried there by visitors. It is the only building devoted to religious work on the grounds, and it is gratifying to see the results are favorable.

It is well, too, that visitors to an exhibition, gotten up by a Christian nation, should be made to say that they have not gone over this vast area of wonderful exhibits of material things without coming across some such effort that is in behalf of the spiritual interests of men.

In the Main Exposition Building the American Bible Society exhibit an attractive case, containing Bibles in two hundred languages, ranged with open pages so that visitors can examine them.

There is one effect of tobacco alluded to by Dr. Lee to which I would especially call attention of professional men. It is this: It seems to relax, and unbind, as it were, the nervous energy, making man cowardly. It is, I am confident, is a common effect, though the cause is not often recognized. Says Judge Parker: "I have observed particularly the effects of tobacco upon students and members of the legal profession, and I am satisfied its habitual use has done more injury to them, personally and professionally, than can be justly ascribed to intoxicating drinks."

* It operates immediately upon the nervous system, and produces a timidity and want of self-reliance that effectually preclude the lawyer practitioner from venturing upon the rough walks of his profession. * * * This timidity will be found to exist in persons of all ages in the profession who use tobacco bitingly. I have found but few exceptions. The experience of Hon. Mitchell Sanford, furnished by himself in "Responses on the Use of Tobacco," forcibly illustrates this peculiar effect of tobacco, as well as its general effect upon the health. I can give but a brief extract. After alluding to the effect of tobacco upon his health when a student and a practitioner at the bar, he says: "I was compelled to abandon my profession, and went to the country on a farm; and I had such horror of a court-house that for several years it did not enter one. In 1840 I was elected to the Senate of the State of New York. My nervous system was so disordered, my general health so bad, that I was unable to discharge the duties of the station, and was compelled to retire from a position suited to my taste, profession, and age. Time passed, and the changes which it wrought rendered it necessary that I should return to a profession which I supposed I had abandoned forever. I found myself entirely unable to endure its excitement, as the trial of a single case would prostrate my strength for a week."

In this hopeless condition, with health broken up, spirits greatly depressed, and hope departing, I casually mentioned to the Hon. A. Parker, now Circuit Judge, that I must abandon my profession entirely. He replied, with great confidence and kindness, that if I could follow his prescription he would cure me entirely; "But," says he, "you will not,

you will not; you will die first.' I told him I would do any thing, no matter what, to be restored, at the same time saying that the thing was impossible. His simple prescription was: 'Abandon the use of tobacco, and I will guarantee your cure. I know it all; I have felt it all; I have loved the weed well but I have abandoned it forever, and the victory is gained when you will to gain it.' I engaged upon the spot never to use it again, and from that day to this I have never desired to use it. Three years have already passed, and I can say, 'I was sick, I am well; I was weak, I am strong; I was dejected, I am full of hope; the world was dark, it is now bright.' In a word, I am entirely cured; disease has fled, and nature triumphed over its ravages; and for all the gold tobacco ever got I would not return to its use."—*F. Merriek in Christian Advocate.*

A Reminiscence of Abraham Lincoln.

There was an interesting, though unimportant, scene in the life of Abraham Lincoln, of which I was an eye witness. It was on the occasion of the visit of about twenty Indian chiefs to the Executive Mansion, delegated by their respective tribes to treat personally with the Great Father in the adjustment of their affairs. They were habited in their attire of feathers and paint, and each one was impressed with the greatness of the occasion, the most eventful, probably, of their lives. Their interpreter placed them in the form of a crescent in the spacious east room, on the floor, as they would have been ill at ease on chairs. Thus they sat on the carpet in decorous silence, and waited the arrival of the Chief Magistrate.

At length Abraham Lincoln came into the room, and stood before the dusky crescent, while a group of well known men gathered behind him, to hear what was about to take place, space being made by ushers about the chiefs, the President, and the immediate group behind him. The interpreter occupied a place near Lincoln, to turn the aboriginal language into English as it fell from the lip. The ceremony began by a personal presentation of each chief to the Great Father, each one going up to the powerful white chief and shaking hands—not extending the hand after the Caucasian manner, but holding it high, and dropping it softly down into the Presidential palm. The names were furnished as they came forward, by the interpreter—White Bear, Big Wolf, Red Fox, and so on.

The face of Lincoln was plainly seen by most of the people present, for it was higher than that of any other. When he came into the room, it was, as usual, pale, and tinged with the sadness which was its principal characteristic in repose. He folded his hands before him, and stood rather awkwardly as he waited for the interview to begin. After making his compliments and shaking hands, each Indian returned to his seat on the carpet in the crescent of his brethren. When all had performed the ceremony, each in turn made his speech to the President, standing up for the purpose, and sitting down when done, in parliamentary fashion, probably through instructions from the interpreter. The first one who essayed to talk grew nervous, and in a hurried way asked for a chair, in the spirit of a wrecked mariner who seeks for a

plank. When it was furnished him, he took his seat, and resumed the entangled thread of his discourse. As this trifling incident took place, a smile passed over the faces of the spectators, and was reflected in that of Lincoln. This smile, indeed, deepened into an audible laugh in the rear; but when the ear of the President caught it, his face immediately straightened into seriousness and sympathy with the disconcerted Indian. He did not at once begin, and the interpreter said:

"Mr. President, White Bear asks for time to collect his thoughts."

The President bowed, and another smile went round at the plight of the perturbed Indian, but did not appear in the face of Lincoln.

Soon White Bear rose to his feet, went at it again, and, after a fashion, got through with what he wanted to say, at which there was a murmur of applause.

The burden of their speeches was the same. They had all come such a long distance, and so quickly, that they felt as if they were birds. To see the Great Father had been the wish of their lives. They were poor, and required help. They had always respected their treaties, and were the friends of the white man. They wanted to be prosperous and rich, like their white brother, Big Wolf, particularly, enlarged on this theme. He said he would like to have horses and carriages, sauguses such as he ate in the hotel in Washington, and a fine wigwam—"like this," added he, as he designated the highly ornamented apartment in which he stood. At this the President could not restrain the desire to share in the general smile.

Red Fox was the attorney and orator of the delegation. He dwelt on the gratification he experienced at seeing the Great Father. There was, however, a cloud in the otherwise clear sky of his enjoyment. He had an apprehension that when he returned to his people in the Far West, they might not believe that he had seen the Great Father, and talked to him face to face, as it was his great privilege to do them and there. Hence he would like to return to his people laden down with presents—"shining all over like a looking glass"—to prove the friendly relations which existed between himself and the Great Father.

There was no resisting this, and there was some good humored laughing, but the faces of all the Indians remained serious and reserved.

"Mr. President," said the interpreter, "the chiefs would be glad to hear you talk." To which Lincoln intimated that he would endeavor to do so.

"My red brethren," said Lincoln, "are anxious to be prosperous, and have horses and carriages, like the pale faces. I propose to tell them how they may get them."

At this the dusky men were all attention, and manifested their satisfaction by the usual Indian guttural sounds.

"The plan is a simple one," said the President, as the interpreter turned his words into the tongue of the red men. Their curiosity was fully aroused. Even the spectators looked inquiringly at Lincoln, to know how he was going to provide horses and carriages for those who thus bluntly asked for them.

"You all have land," said Lincoln. "We will furnish you with agricultural implements, with which you will turn up the soil—by hand if you have not means to buy an

ox; but I think with the aid which you receive from the Government, you might at least purchase one ox to do the plowing for several. You will plant corn, wheat, and potatoes, and with the money for which you will sell these you will be able each to buy an ox for himself at the end of the first year. At the end of the second year, you will each be able to buy perhaps two oxen and some sheep and pigs. At the end of the third year will probably be in a condition to buy a horse; and in the course of a few years you will thus be the possessors of horses and carriages like ourselves."

"This plan for becoming proprietors of horses and carriages was not relished, for it meant work, and the faces of the Indians bore a disappointed expression as the President unfolded it.

"I do not know any other way to get these things," added Lincoln. "It is the plan we have pursued—at least those of us who have them. You cannot pick them off the trees, and they do not fall from the clouds."

"Had it not been for the respect which they owed to the speaker as the Great Father, it was plain that they would have exclaimed against his words with the untutored energy of their Indian nature. As he was well acquainted with that nature, having served as captain in the Tippecanoe war, and spent his early life on the frontier, a suspicion entered my mind that he was blending with the advice a little chaffing. To change the subject and restore them to good humor, he requested one of the attendants to roll up a large globe of the world which stood in a corner, on a three-legged support on wheels. The President placed his hand on the globe, and turned it round, saying;

"We pale faces believe that the world is round, like this."

"At this point Lincoln caught the inquiring eyes of the Indians fastened like a note of interrogation on the legs of the globe.

"Without the legs," continued Lincoln, in answer to the mute interrogation, with a twinkle in his eye, "We pale faces can get into a big canoe, shoved by steam—here, for instance, at Washington, or Baltimore, nearly go round the world, and come back to the place from which we started."

"With due respect to the Great Father, they evidently thought, to give it a mild term, that he was given to exaggeration. He started off again, to tell about the North Pole, the torrid zone, the length and breadth of the United States, and how long it would take a man to walk from one end of it to the other, in which he got somewhat entangled; then, seeing a well known man of science on his right, Lincoln placed his hand on his shoulder, gently urged him forward to a position in front of the Indians, to whom he said:

"But here is one of our learned men, who will tell you all about it."

"Saying this, Lincoln bowed and withdrew, and the *savant* taken by surprise, endeavored to extricate himself from the difficulty as best he could, by continuing the theme where the President left off.

"One sombre event followed the Indian reception. Big Wolf, who had expressed the desire to have sausages like white men, satisfied his appetite in the hotel without stint, and it was this product of our civilization which was his bane. In a word, sausage killed him.—*St. Nicholas.*

Report of the Population of the Earth.—The number of Petermann's *Mittheilungen* for 3d mo. 1875, contains the annual report upon the population of the earth, made by Behm and Waguer. The footing for the year 1874 is as follows:

Europe,	302,973,000
Asia,	798,907,000
Africa,	206,007,000
America,	84,392,000
Australia and Polynesia,	4,563,000
Total,	1,396,842,000

THE FRIEND.

ELEVENTH MONTH 4, 1876.

[We have received a printed copy of the Minutes of Ohio Yearly Meeting, from which we make the following extracts.]

Ohio Yearly Meeting held at Mt. Pleasant, by adjournments from the 25th of 9th month to the 29th of the same inclusive, 1876.

The clerk of the select meeting produced a minute for our beloved friend Thomas Yarnall, a minister, from Chester Monthly Meeting, Pa., dated 8th month 28th, 1876, setting him at liberty to attend this meeting.

Also one for our beloved friend Deborah Rhoads, a minister, from Haddonfield Monthly Meeting, New Jersey, dated 9th month 6th, 1876, setting her at liberty to attend this meeting and a few of the meetings composing it.

Also one for our beloved friend Sarah Ann Cox, an elder, from Haddonfield Monthly Meeting, New Jersey, dated the 6th of the present month, as companion to our friend Deborah Rhoads; all of whom were acceptably in attendance.

Reports were received from all the Quarterly Meetings on the subject of primary schools, the following being a summary thereof:

There have been 15 schools taught within our limits the past year, under the care of meetings or committees, for terms ranging in time from three weeks to eight and one half months. 872 children are reported from the several Quarters of a suitable age to attend school, of whom 315 have attended Friends' Schools exclusively; 358 have attended District Schools exclusively; 54 have attended Friends' and district Schools; 40 have attended District and other Schools; 17 have attended schools taught by members but not under the care of our committees; 50 have not gone to school the past year, most of whom are reported to have been receiving instruction at home; 8 not definitely reported.

The subject is again referred to subordinate meetings, with an earnest request that they may use increasing efforts to have more of our beloved youth educated in schools under the care of Society, and send up explicit accounts thereon to this meeting next year as heretofore.

The committee with whom was entrusted the subject of the condition of our primary schools made the following report, which on deliberation was united with.

Report.—The committee to consider the subject of education as connected with primary schools, after giving the subject a careful consideration were united in proposing that the Yearly Meeting appoint a joint committee,

which shall consist of at least two Friends from each Monthly Meeting, whose duty shall be to cooperate with school committee in the different neighborhoods, make the selves acquainted with the condition of the schools, and render such encouragement as assistance (where needed) as the funds placed at their disposal will enable them to do. Also that the Yearly Meeting appropriate five hundred dollars for this purpose, and encourage Friends to be liberal in increasing the fund by free contribution.

Our Boarding School committee made the following report, which on being read was satisfactory to the meeting, and the propositions therein contained were adopted.

Report.—The committee charged with conducting the Boarding School report that agreeably to the instruction of the Yearly Meeting last year, the school was opened in the new building near Barnesville, the 3d of the first month last, and continued in session 16 weeks with an average attendance of 45½ pupils.

The summer session opened the 8th of 5 month, and continued 19 weeks, with an average attendance of 34 pupils.

Meetings for worship were regularly held on First days and on Fifth days, except the weeks when Quarterly and Monthly Meetings occurred, when the pupils were expected to attend at Stillwater unless excused by the Superintendent for sufficient reasons. We esteem it a favor that the health of nearly all the inmates was unusually good throughout both sessions.

The building committee of the Boarding School report, that there is now on the list admissions for next session over one hundred scholars, and as the present accommodation will only admit of about sixty, considerable additions will be necessary, particularly providing beds and bedding, and a further supply of desks. We trust the Yearly Meeting will make provision for the purchase of such articles as are indispensable for the accommodation of the school. The estimated amount necessary for the above purposes being \$355. For laying pavement, and other expenses connected with the putting on of the base-boards in the lower story, masonry, & an additional sum of \$194 will be required amounting in the aggregate to \$549, necessary to complete the work.

A committee has been appointed to examine the accounts of the treasurer, and approximate the financial condition of the funds, who report they examined his accounts on vouchers, and found them correct, a statement as contained on his books up to the 15th present month, being as follows, viz:

Subscriptions received from members of Ohio Yearly Meeting,	\$20,439.
Subscriptions received from Friends of Philadelphia Yearly Meeting,	16,308.
Borrowed funds,	6,909.
For surplus property sold,	261.

Making \$43,919.

Paid out for materials and labor,	\$39,429.
" " fencing and incidentals,	288.
" " on real estate,	3,042.
Discount, interest, and payments on borrowed funds,	947.
Cash on hands,	210.

Making \$43,919.

Subscriptions unpaid, \$6,834.

In conclusion, the committee desires to express the obligations they are under to our ends of Philadelphia Yearly Meeting for their kindness and liberality manifested in contributing funds to assist in the prosecution of the work; and more especially do we desire to feel thankful to the Great Master Builder, thus prospering the work in our hands, and we trust as our confidence and expectation are from Him, the Divine Blessing will sit upon it.

Report of Book Committee.—The joint committee continued last year in charge of purchasing and distributing the approved writings of Friends amongst our members and others, report, that we purchased at Friends' bookstore, Philadelphia, 358 volumes of books, 1122 pamphlets. And from the branch bookstore of Penrose Brothers, Iowa, 54 volumes of books, being the quota of Hickory-Grove quarterly Meeting.

We are encouraged to believe that now, even the standard of truth, as professed by Friends, is being lowered by some who profess the name, there is a service for truth in our concern, and we desire that the Yearly Meeting may not relax its efforts to make the eternal writings of our standard authorities accessible to all our members, and other earnest inquirers, according to our ability.

The following minute of advice was proposed by the Friends set apart for that purpose at a former sitting, which was read and approved by this and women's meeting, and ordered to be printed in connection with the minutes.

The Yearly Meeting having been afresh drawn into deep travail and exercise on account of the many deficiencies apparent amongst us as shown by the answers to the queries, it was the conclusion to prepare a minute to be sent down to subordinate meetings, in order, more especially, that those of our members who were not in attendance might know something of the exercises of the meeting, hoping and desiring that the weak and feeble knees may be strengthened by the Divine Hand, more faithfully to maintain and support the precious testimonies handed down from our worthy forefathers, to stand and uphold before the world. The attendance of all our religious meetings was particularly recommended; and Friends were encouraged not to let hindering things prevent them from regularly assembling with brethren and sisters when meeting day comes. Yes, my friends, if we omit this religious duty, it brings one owe to our Heavenly Father, and we assurely we shall not prosper in spiritual things. If we give up to stay at home on account of our business, it will be easier to do it again, and as this is repeated without a sufficient excuse, our desire will decrease, until finally, we will only go on First-days, or other occasions when nothing a little more than common is expected.

The enemy of souls is ever ready with his insinuations, persuading us that it is of no use to go so regularly to meeting, and we may as well feel as though we received no benefit therefrom. Yet if we continue faithful we will have our reward. Then do not let temporal business, either indoors or out, prevent from meeting with our brethren, remembering the dear Master "can bless the little as well as the much." Then be entreated not to settle down into a state of ease, and give

way to drowsiness and sleeping. Endeavor to have all business and things of an outward nature shut out from our minds, desiring above everything else to experience the dear Master's presence in our assemblies, and even though there may be but two or three, if gathered in His name, He will not fail to fulfill His promise, to be in the midst. "They that wait upon the Lord shall renew their strength, they shall mount up with wings as eagles, they shall run and not be weary, they shall walk and not faint." Once more may we earnestly desire that all who are tempted to sleep in our meetings may daily and hourly strive after and crave for ability from the Source of all good, to be enabled to overcome this weakness, which cannot be done in our own strength. "This kind goeth not out but by prayer and fasting."

"Behold how good and how pleasant it is for brethren to dwell together in unity, it is like the precious ointment upon the head, that ran down upon the beard, even Aaron's beard, that went down to the skirts of his garment, as the dew of Hermon, and as the dew that descended upon the mountains of Zion; for there the Lord commanded the blessing, even life forever more."

If it is our desire thus to dwell with our brethren and sisters we shall feel restrained from saying anything to the injury of another, and all differences and hard feelings will be eradicated, and we shall experience that precious love that is queried after, to flow as from vessel to vessel.

"We know that we have passed from death into life, because we love the brethren."

The wide departures among our members from that Christian simplicity which was exemplified by Him who wore the seamless garment and spoke the plain language, is cause of deep mourning. Then dear friends, let our adorning "not be that outward adorning of plaiting the hair, and wearing of gold, or putting on of apparel, but let it be the hidden man of the heart in that which is not corruptible, even the ornament of a meek and quiet spirit, which is, in the sight of God, of great price."

Indulgence in reading the light and fictitious productions of the press was discouraged as being prejudicial to a growth in the truth; it having a tendency to destroy a relish for books of a religious character. We desire that Friends everywhere within our limits, and especially parents, be very careful in their choice of reading, and avail themselves of the opportunity of obtaining Friends' books from members of our book committee, who hold them for sale or gratuitous distribution, that their children may be furnished with reading that is elevating in its tendency, and conducive to a sound mind. And of all reading, let the Holy Scriptures be first. Friends are encouraged to collect their families daily, and read a portion of them, with the mind turned inward to Him who gave them forth, with desires to be instructed and enabled to understand the sacred truths there recorded.

Attending places of diversion is another cause of concern to many minds, this having much the same effect upon the mind as light and fictitious reading; lessening our interest in society, and creating a disrelish for attending meetings for divine worship. We affectionately recommend all who incline to indulge in this way seriously to consider the effect such places have upon the mind. Fairs,

shows, and many kinds of exhibitions are not suitable for Friends to attend. And participating in the exciting spirit and parade of the political campaigns we also desire to discourage. "Israel must dwell alone," is much what is required of us as a people. "Ephraim, he hath mixed himself among the people, strangers have devoured his strength and he knoweth it not."

A belief in a true, living, and free gospel ministry, neither taught by man nor learned from books or men, but emanating immediately from our great and adorable Head, has ever characterized our religious Society. With our minds turned to the Source and Fountain of all good, we shall be preserved from wandering thoughts, and instructed by the Minister of ministers, and from time to time fed with a little portion of that living bread that cometh down from God; and being thus strengthened together with might by His spirit in the inner man, witness the promise to be verified, "Thy children shall all be taught of the Lord, and great shall be the peace of thy children." We shall then have no desire to attend those places of worship where a hireling ministry is maintained, or a ministry that may be exercised in the will and wisdom of man, or in the activity of the human will.

May all our dear friends every where, be renewedly concerned so to walk with circumspection and lowliness of mind, in meekness and fear, as to adorn the doctrine of God our Saviour. "Finally brethren, farewell. Be perfect, be of good comfort, be of one mind, live in peace, and the God of love and peace shall be with you."

The following is the concluding minute: "Under a renewed sense of the continued regard of our Heavenly Father, this meeting having brought its business to a close, solemnly concludes to meet again, at the same time and place, next year, if permitted so to do.

WILSON HALL, Clerk."

We have received from the clerk of Kansas Yearly Meeting a printed copy of a minute of advice to its subordinate meetings and members, which was written as a summary of the exercises expressed while the state of Society was under consideration, in reviewing the answers to the Queries. The letter accompanying it refers to the "diversities of sentiment" existing among the members of that Yearly Meeting; and adds, that thus far "nothing has occurred to mar our harmonious working together in peace and love." The minute itself is of considerable length—we extract the following passages from it, relative to worship and ministry.

"The subject of public worship is of peculiarly great importance to a people who hold that it may be performed without any outward or vocal ministrations under the immediate influence of the Holy Spirit, in full faith in the High Priesthood and mediation of the Lord Jesus, who has opened a way into the sanctuary for the humblest and poorest of his children, who, without human instrumentality, may enter into the presence of the Most High, and in such access may find pardon, peace, comfort, help, strength, or any other need. It is important that we should hold fast this testimony, both for our own safety and help and for its leavening influence upon the views and practices of our Christian brethren of other denominations."

"There is danger in the conflict of opinion and thought and feeling of the present day lest we be tempted to undervalue those silent, unseen influences of the Divine Spirit, so far as to conclude that there can be no congregational worship where there are no vocal utterances, and especially that the unconverted cannot receive any benefit without such utterances. It is well for us to remember that the resources of God are infinite and the processes by which both in nature and in grace, He works out the greatest results, are often such as no man can fathom—hidden, unseen, silent." "He actually does influence for good, when there is a real exercise of soul to give ourselves up to His ministrations—to draw nearer to him in filial confidence and real faith through Christ our sacrifice and propitiation. But this requires effort on our part. George Fox exhorts, 'War against that Philistine who would stop up your wells and springs.' We must watch against earthly desires and imaginations and pray for help to silence the suggestions of the carnal mind. If we do this each will be enabled to take his place as a priest in God's house, to offer spiritual sacrifice, acceptable to God through Jesus Christ. George Fox says again, 'If thou art a priest, thou wilt have somewhat to offer—else thou art no priest.' Words of prayer and thanksgiving, the fruit of the lips, will often rise out of the fulness of the heart, and under the fresh anointing, the mouth will speak as influenced thereto, in exhortation, warning, comfort or teaching, to the help of those assembled. But there are other acceptable offerings besides those that are vocal. It does not follow because all are priests that therefore all must speak. In silent brokenness of heart, in contrition of spirit, in prostration of soul, in quiet and holy meditation, in secret prayer for ourselves and others, and in many other ways, true offerings are made to that unseen but real Presence, and even the unconverted soul may secretly cry for mercy.

"But whilst we are earnestly concerned to commend our testimony to the practicability and value of silent worship, to the common priesthood of believers, and to the open door of access which God has opened to himself through Christ for even the humblest and poorest of men, yet we have no disposition to undervalue a truly anointed ministry." "In testifying against the unwarranted and pernicious assumption that human learning and human ordination are sufficient to constitute Christian ministry, we would not lose sight of that ordination of Faith in which the Holy Ghost sets apart whom He will, for the work whereunto He has called them and by which he is still pleased to give apostles and prophets, evangelists, pastors and teachers, for the work of the ministry, for the perfecting of the saints, and for the edifying of the body."

SUMMARY OF EVENTS.

FOREIGN.—The British Arctic expedition, consisting of the naval steamers Alert and Discovery, under Capt. Nares, has returned to England after an absence of sixteen months with the loss of only one man. The highest latitude reached was 83 degrees 29 minutes, northward of which no land was visible, but further progress toward the North Pole was found to be impracticable. During the sledge journey the ice was so rugged that it was only possible to advance one mile a day under the water. Excellent winter was found near the place where the Discovery wintered. The expedi-

tion experienced extreme cold, the temperature being 59 deg. below zero for two weeks and falling once to 72 deg. Below. The interpreter was badly frozen and died in forty days after both his feet had been amputated.

The master cotton spinners of north and north-east Lancashire, Eng., in a meeting at Manchester, agreed to urge all the masters to enforce a general lock-out, and they consider the terms of the resolutions adopted by the above satisfactory.

The number of native Christians in British India is now 266,391, or 224,258 four years ago.

In a dispatch to the Admiralty Capt. Nares expresses his belief that the Polar Sea is never navigable. The ordinary ice averages eighty feet in thickness. Equinoctial tides prevail on the west shore in late Aug. and Sept., when the water rises to 100 feet. Animals, birds and the northerly migration of birds end before this latitude is reached.

The total number of Irish proprietors is 19,288 representing a valuation of £10,182,681. One hundred and ten persons hold one-fifth of the soil. Ulster has 5767 proprietors; Leinster, 5350; Munster, 5691; Connaught, 2480. Only 1443 proprietors are returned as rarely or never resident in Ireland.

The Servian government in consequence of recent defeats and disaffection in the army, has again asked for the assistance of the powers in favor of peace. It is reported in London that Turkey is endeavoring to treat directly with Servia.

The London Standard's Belgrade dispatch reports that the Servians are enduring fearful privations. On the 15th six hundred wounded men were lying at inns and cafes which were used as hospitals. Half of these men it was thought had wounded themselves in order to procure their discharge. Other dispatches assert that the number of Russians in the Servian army is by no means so large as has been represented, the Servian officials having wilfully exaggerated the arrivals from Russia in order to intimidate the Turks. It is said that 40,000 Russian Essaks altogether have entered the Servian ranks. Many of the Servians have, it is alleged, a great dread of fighting, and can only be kept in the ranks by the bayonets of their Russian allies.

Prince Milan has assumed command of the Servian forces. General Tchernoff, who is disabled by a fall from a horse, has appointed Prince Milan to organize and prevent the army from crumbling entirely to pieces. By recent battles with the Turks, the Servian army has been cut in two and completely demoralized.

At the election of the Prussian Chamber of Deputies last week, the National Liberals elected 177 members; Conservatives, 141; and the remainder were of various attitudes of the Legislature is not materially changed.

The Madrid Official Gazette publishes a circular strictly limiting non-conformist worship to the interior of chapels and cemeteries.

The Spanish Foreign Minister proposes the conclusion of an extradition treaty with the United States. The circular just issued regulating non-conformist worship is especially strict in its provisions regarding Protestant schools. It prescribes that such schools shall remain subject to the direct interference of the government, and that the school-masters must be Spaniards, with no other than Spanish degrees.

About 1,500 Irishmen have emigrated to Manitoba. A severe cyclone passed over the States of Central America on the 3d and 4th of Tenth mo. The town of Managua in Nicaragua was inundated, and many hundreds of houses were blown down. The coffee crop was ruined, and there was great destruction of property in various respects. The total loss is computed by millions.

The Pope having desired to divide the Archdiocese of Lyons, France, into two dioceses, the French government has issued a decree forbidding such division until the 1st of January next.

The session of the French Chamber was opened on the 20th ult. There was no speech by President MacMahon. The Chamber of Deputies assembled on the 21st inst. and the Senate until the 6th.

UNITED STATES.—The Commission to treat with the Sioux Indians have completed their task, and report that the result has been satisfactory and successful. They held councils at all the agencies on the upper Missouri, and the treaty was signed by the head chiefs of all the different bands. The section proposing to relinquish the rights to the Indian Territory was struck out at the request of the Indians, who assented to all the other propositions.

It has been suspected that the Indians at the Red Cloud Agency were many of them disposed to aid the hostile bands, and the United States troops under Gen. Merritt were therefore directed to surprise and disarm

the entire body. This was successfully carried out. Red Cloud was deposed as chief of the Sioux and Spotted Tail was formally installed in his stead by the authority of President Grant. General Terry sued a similar course with those at the Standing Agency. About 600 horses were captured at the Agency, but only about two hundred stand of arms could be found, the Indians, who had a day's warning, had concealed most of their guns and rifles.

The number of prisoners on the 29th ult. on the 6th mo. 30th last was 234,821, or 2,684 less than it one year previously. There are still 15,757 survivors of the war of 1812, who continue to draw pensions.

There were 424 deaths in New York city last week and 323 in Philadelphia.

The number of persons on the 29th ult. at the International Exhibition was visited by 59,687 persons who paid for admission. The largest number in one day was 122,719, and the smallest was 73,911.

The depth of the Mississippi was recently carefully measured by engineers at New Madrid. They found the channel was one hundred and eight feet deep opposite Main street, New Madrid, and from that point decreased to a uniform depth of eighty feet as far as the measurement was made.

The gold fields of Northern Georgia are not entirely exhausted. According to the Atlanta Convention, fit \$30,000 to \$50,000 in gold remains in that city every month, together with considerable quantities of silver.

The Markets, &c.—The following were the quotations 10th mo. 30th last. New York.—American gold, 10 Superfine troy, \$450 a \$485; State extra, \$5.3 \$5.55; finer brands, \$6 a \$8.75. Extra white wheat, \$1.37; fair white State, \$1.33; amber win Michigan, \$1.35; No. 2 Milwaukee spring, \$1 White and yellow corn, 59 a 61 cts.; mixed, 59 State oats, 45 a 49 cts. Lard, \$9.80. Philadelphia. Cotton, 11½ a 11½ cts. for middling uplands and N Orleans. Flour, 4 a \$8.50. Pennsylvania red, \$1.27 a \$1.30; amber, \$1.33 a \$1.36; white, \$1.3 \$1.35. Corn, 75 cts.; No. 2 Milwaukee spring, \$1 Yellow corn, 58 cts. Oats, 31 a 50 cts., the latter for white. New York fancy cheese, 13½ a 14 cts.; western 12½ a 13 cts. About 3600 beef cattle sold at a 61 cts. per lb. gross for extra; 4½ a 5½ cts. for fat good, 3 a 4½ cts. for common. Sheep, 4½ a 5½ cts. per lb. gross. Receipts 12,000 head. Hog, \$8.2 \$8.75 per 100 lb. net. Receipts 5000 head. Baltimore.—No. 2 western red wheat, \$1.29 a \$1.30; Maryland, \$1.28 a \$1.35; amber, \$1.38 a \$1.40. White corn 55 a 58 cts.; yellow, 53 a 57 cts. Southern oats, 38 c western, 34 a 36 cts. Chicago.—No. 2 spring white \$1.10; No. 3 do, 97 a 98 cts. Oats, 52 cts. Barley, 81 cts. Lard, 9-10 cts. St. Louis No. 2 red fall wheat, \$1.21; No. 3 do, \$1.12. No mixed corn, 40½ cts. Oats, 31 cts.

NOTICE.

A State Meeting of the Female Society of Philadelphia for the Relief and Employment of the Poor will be held at the House of Industry 112 N. Seventh street, on Seventh-day, 11th mo. 4th, at 12 o'clock.

WANTED

A teacher for a family school. Address JESSE GARBETT, Willistown Inn P. O., Chester Co., Pa.

A young woman Friend desires a situation as teacher in a small family school. For information address S. A. H., 302 Arch St., Phila.

FRIENDS ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DEED, at Concord, Belmont Co., Ohio, on the 26th First mo. 1876, MARY BRACKEN, widow of the late Caleb Bracken, in the 69th year of her age.

—, suddenly, on the evening of the 29th inst., his residence in Kanawha, N. Jersey, JAMES HILYARD, in the 61st year of age, an occasional member at elder of Rencocap Preparative and Burlington Month Meeting.

WILLIAM H. PILE, PRINTER,
No. 422 Walnut Street.

PHILADELPHIA.

For "The Friend."

The Life of John Hooper, Bishop of Gloucester.

The following narrative is condensed from Fox's Book of Martyrs, and from a book entitled "Bishops and Clergy of other days"—written by J. C. Ryle, a clergyman of the Church of England. His object in writing the biography was, to show that the life and opinions of this eminent reformer and martyr give no countenance to that remarkable growth of modern ritualism in the Church of England, which is leading so many of its members back into the errors and practices which were rejected by the early reformers. The character and history of Hooper himself as seemed to the writer of sufficient interest warrant the placing of an outline thereof in the columns of "The Friend."

He was born in 1495 when Henry the seventh sat on the English throne, lived through the reigns of Henry the Eighth and Edward the Sixth, and was burned in 1555, under the rule of Queen Mary.

He was educated at Oxford College, where he took his degree in 1518, at the age of 23. But little is known of the twenty-one years of his life which followed this event, except that during this period he relinquished his attachment to the peculiar doctrines of the Roman Catholic religion in which he had been educated. He says, in a letter to Bullinger, the Swiss Reformer, that "when he was a courtier, and living too much of a court life in the palace of the king," he met with certain writings of Zwingle, and certain commentaries of Bullinger on St. Paul's Epistles, and that to the study of these books, he owed his deliverance from papacy.

In 1539 he was obliged to leave Oxford in consequence of his known attachment to the principles of the Reformation, and for a short time acted as steward and chaplain in the household of Sir Thomas Arundel. Not liking his opinions, his master sent him to Bishop Gardener with a private letter, in which he requested him to "do his chaplain some good." Gardener, however, after four or five days conference, could make nothing of the sturdy Reformer. The end of the matter was (says Fox), "that he sent Sir Thomas his servant again, right well commending his learning and wit, but bearing in his heart a grudge against Master Hooper." This grudge, unhappily, was not forgotten, and bore bitter fruit after many days.

The connection between Hooper and Sir Thomas Arundel did not last long after this. Finding his life was not safe in England, he withdrew to the Continent, like many of the good men of the day.

In 1547 Henry the Eighth died, and Edward the Sixth ascended the throne. He was in full accord with the Reformers in their views, and gave them the ecclesiastical control of the church. Hooper soon felt it his duty to return to England and assist in carrying the Reformation forward. His parting with his friends at Zurich, where he was then residing, was somewhat remarkable. They told him they fully expected that he would rise to a high position in his native land; they hoped he would not forget his old friends; they begged him to write to them sometimes. In reply, Hooper assured them that he should never forget their many kindnesses; promised to write to them from time to time; and concluded with the following memorable words: "The last news of all, Master Bullinger, I shall not be able to write. For there, where I shall take most pains, there shall ye hear of me to be burnt to ashes. This shall be the last news, which I shall not be able to write to you. But you shall hear it of me."

Soon after his arrival in London, he was appointed chaplain to the Protector, the Duke of Somerset. He devoted himself to the work of teaching, and generally preached twice a day, and this with such marked acceptance, that the houses for worship could not contain the crowds that flocked to hear him. Fox, the Martyrologist says of him: "In his doctrine he was earnest, in tongue eloquent, in the Scriptures perfect, in pain indefatigable. His life was so pure and good, that no breath of slander could fasten any fault upon him. He was of body strong, his health whole and sound, his wit very pregnant, his invincible patience able to sustain whatever sinister fortune and adversity could do. He was constant of judgment, spare of diet, sparer of words, and sparer of time. In housekeeping he was very liberal, and sometimes more free than his living would extend unto. Briefly, of all those virtues and qualities required of St. Paul in a good bishop, in his Epistle to Timothy, I know not one that was lacking in Master Hooper."

Within a year of his landing in England, he was nominated to fill the vacant bishopric of Gloucester. His tenderness of conscience here led to an unexpected difficulty. He refused to take the oath and wear the episcopal vestments, which were usually taken and worn by bishops at their consecration. The oath he regarded as unscriptural because it referred to the saints as well as God; and the vestments he looked upon as remnants of Popery, which should be clear put away. Nearly a year elapsed before this difficulty was settled, and for a time the Privy Council actually committed him to the Fleet Prison, for his persistent refusal! Finally, for peace

sake, Hooper consented to wear the vestments on certain public occasions; and the objectionable words in the episcopal oath were struck out by the king's own hand. Though in this matter he had been brought into collision with Cramer and Ridley, who differed from him in the points at issue; yet this difference does not seem to have caused any permanent alienation between these men, who afterwards suffered death for their adherence to a common faith. This is shown by a letter to Hooper written by Ridley when in prison in Queen Mary's reign, in which he says: "My dear brother, we thoroughly agree and wholly consent together in those things which are the grounds and substantial points of our religion, against which the world so furiously rageth in these days. In time past, by certain *by-matters* and *circumstances* of religion, your wisdom and my simplicity hath a little jarred, each of us following the abundance of his own sense and judgment. But now I say, be you assured, that with my whole heart, God is my witness, I love you in the truth, and for the truth's sake."

After his consecration as Bishop in 1551, he began at once to preach throughout his diocese with such diligence as to cause fears about his health. His wife wrote in the following month to his friend Bullinger, "I entreat you to recommend Master Hooper to be moderate in his labors. He preaches four or at least three times every day, and I am afraid lest these over abundant exertions should cause a premature decay." The deplorable state of ignorance in which a large part of the people of England were at that time, as to religious as well as literary knowledge, no doubt stimulated the zealous bishop to such unusual exertions. The state of the clergy in his own diocese will show this. Out of 311, 168 were unable to repeat the ten commandments; 31 of the 168 could not tell in what part of the Scripture they were to be found; 49 could not tell were the Lord's prayer was written; and 31 of the 40 were ignorant who was the author of the Lord's prayer! The low moral condition of many of the clergy in the times preceding the Reformation, was probably still widely spread among them. Hooper endeavored to stir them up to the better performance of their duties, and appointed some of the better sort to watch over their brethren—but his sense of the deficiency existing is shown by a letter written to the Secretary of State, in which he exclaims:—"Ab! Mr. Secretary, if there were good men in the Cathedral churches! God should then have much more honor than He hath now, the King's majesty more obedience, and the poor people more knowledge. But the realm wanteth light in the very churches where of right it ought most to be." He concludes his letter with these words: "God give us wisdom and strength wisely and strongly to serve in our vocations. There is none catch their bread in the sweat of their face, but

such as serve in public vocations. Yours, Mr. Secretary, is wonderful, but mine passeth. Now I perceive private labors be but play, and private work but ease and quietness. God be our help."

I will close my notice of this part of his life, with another quotation from Fox—the author of the book of martyrs. "Though he bestowed and converted the most part of his care upon the public flock and congregation of Christ, for the which also he spent his blood; yet nevertheless there lacked no provision in him, to bring up his own children in learning and good manners; insomuch that ye could not discern whether he deserved more praise for his fatherly usage at home, or for his Bishop-like doings abroad. For everywhere he kept one religion in one uniform doctrine and integrity. So that if ye enter into the Bishop's palace, you would suppose yourself to have entered into some church or temple. In every corner thereof there was some small of virtue, good example, honest conversation, and reading of Holy Scriptures. There was not to be seen in his house any courtly rioting or idleness: no pomp at all, no dishonest word, no swearing could there be heard!"

"As for the revenues of both his bishoprics, [the diocese of Worcester had also been placed under his care], although they did not greatly exceed, as the matter was handled, yet if anything surmounted thereof, he pursued nothing, but bestowed it in hospitality. Twice I was, as I remember, in his house in Worcester, where, in his common hall, I saw a table spread with good store of meat, and beset full of beggars and poor folk. And I asking his servants what this meant, they told me that every day their lord and master's manner was to have customably to dinner a certain number of the poor folk of the said city, by course, who were served by four at a mess, with whole and wholesome meats. And when they were served (being before examined by him or his deputies, of the Lord's Prayer, the Articles of their faith, and the Ten Commandments) then he himself sat down to dinner, and not before."

(To be continued.)

How to Cure a Bad Memory.—Your memory is bad, perhaps; but I can tell you two secrets that will cure the worst memory. One—to read a subject when strongly interested. The other is, to not only read, but think. When you have read a paragraph, or a page, stop, close the book, and try to remember the ideas on that page; and not only recall them vaguely in your mind, but put them into words and speak them out. Faithfully follow these two rules, and you have the golden keys of knowledge. Besides inattentive reading, there are other things injurious to memory. One is the habit of skimming over newspapers, items of news, smart remarks, bits of information, political reflections, fashion notes—all in a confused jumble, never to be thought of again—thus diligently cultivating a habit of careless reading hard to break. Another is the reading of trashy novels. Nothing is so fatal to reading with profit as the habit of running through story after story, and forgetting them as soon as read. I know a gray-haired woman—a life-long lover of books—who sadly declares that her mind has been ruined by such reading.

A help to memory is repetition. Nothing

is so certain to keep your French fresh and ready for use as to have always on hand an interesting story in that language, to take up for ten minutes every day. In that case you will not "forget your French" with the majority of your schoolmates.—*St. Nicholas.*

Letter of John Barclay.

[The following instructive and encouraging letter is inserted at the request of an esteemed correspondent.]

Croydon, 5th of First month, 1835.

Thy communication of the 6th ult. was very welcome and refreshing to us. O! how remarkable are the ways of omnipotent Wisdom, infinite love! As Penington somewhere says,—if its outgoings are stopped in one direction, it will break out with proportionate beauty and force in another. O! what can the enemy do, to hinder the glorious arising and irresistible spread of the gospel of Truth and salvation? He may rant and do great things for awhile, such as vain, if it were possible, delude and carry away the very elect; and all the world may wonder at the beast; but the Lamb and his followers must and shall have the victory; and the kingdom and dominion are given to the saints, even the tribulated witnesses and partakers of that power and faith of Jesus Christ, against which the gates of hell itself shall never be able to prevail. Though it would be very pleasant to be personally near to thee, and to the numerous company whom thou and I have seen coming forth of the barren wilderness of professions into the green pastures of life, and into the quiet habitation where none can make afraid,—yet it seems as if my right allotment for the present might be far otherwise; and with that and every condition, I am desirous to be well content, in the hope and assurance, that while in this state of resignation, nothing can be better for me, and all things shall turn to my good, and tend to His honor, who is all worthy for ever.

It seems indeed as if the Lord was mustering his host for the battle,—his little remnant, whom he ever delights to hide in the hollow of his hand, while they are singly given up to serve him in true-heartedness; sometimes also he signally commands deliverances for them, though the enemy may seem to be coming in as a flood, and ready to devour all before him. But what, as thou writest, shall we say to these things? Is there not occasion for us, through all that we meet with here, in every thing to rejoice and to give thanks, "The Lord liveth, and blessed be our Rock," "because He liveth," whose mercies are so renewed to us, do we 'live also' from day to day, and have at times a precious degree of hope given to us, that we shall outlive all that can happen to us here, and be safely landed in the end, where joy and peace abound for evermore. O! then, may we each in our allotment of labor, suffering, or rejoicing, fill up our measure; and work with a good heart, while it is day,—while we see the way open before us,—in full assurance of faith and love; turning neither to the right hand nor to the left, and endeavoring (for we cannot always succeed herein,) to keep the unity of the Spirit in the bond of sound and true peace. I rejoice in every opening and appearance of good among any people; but I cannot rejoice in finding a falling short of that, in which divine grace would establish all who know its teach-

ings. Some of us seem to be made more up of, in the way of inviting, attracting, gratifying and gathering—others in proving, confirming, settling and furthering those, who are brought into the fold or planted in the enclosure. I long that none of the laborers, among ye more particularly, may interfere in their own will and wisdom with the services of other that our comfort in the Lord, and one in another, may not be marred. May we all I build together, and seek also to build up one another, in the main thing—our holy faith, which stands in power, in truth, in love, in peace, and in the abatement of the creature. O! may this blessed work, with you and every where else, go forward, notwithstanding a opposition or misgivings; and may all the world let, with every weight, be laid aside and removed out of the way, saith my soul!

Whatever may be the good pleasure of Him who raised us up by the breath of his word with regard to our undisturbed enjoyment of those sweet privileges of fellowship together as a visibly distinct body, of which we have so long and so unworthily partaken,—it is more and more clear to me, that the faithful and those that humble themselves in the dust before Him, will never be utterly forsaken or forgotten; that these will never be altogether disappointed of their confidence, though they have the bread of affliction and water of adversity administered for a long season and in large measure:—the Lord will still have; people peculiarly formed for Himself, who shall purely show forth his praise, and be enabled to lift up His standard to the nations. Those who love our Lord Jesus Christ in very truth, nor feignedly, and who in proof thereof are given up to follow him in the regeneration and daily cross, I trust will not be permitted to be moved by afflictions, nor carried away by delusions, nor exalted by abundance of revelations, nor turned aside by the business or the pleasures, the cares or the riches of this life, or by love of other things; but these are concerned to lie low before the Lord and to be crucified with Christ; that so they may say in truth, "I live, yet not I, but Christ liveth" and moveth and reigneth "in me." J. B.

The Kentucky Shower of Flesh.

At last we have a proper explanation of this much talked of phenomenon. L. Brandeis writes to the *Spartan*, 9 5th month:—"In 1537, while Paracelsus was engaged in the production of his 'elixir of life,' he came across a very strange looking vegetable mass, to which he gave the name of 'Nostoc.' "The want of rapid transportation, combined with the perishable nature of the substances fallen, have hitherto prevented a complete and exhaustive examination. The specimens of the 'Kentucky shower,' however, reached this city well-preserved in glycerine, and it has been comparatively easy to identify the substance and to fix its status. The 'Kentucky wonder' is nothing more or less than the 'Nostoc' of the old alchemist. The Nostoc belongs to the conferva; it consists of translucent, gelatinous bodies, joined together by thread like tubes or seed-bearers. There are about fifty species of this singular plant classified; two or three kinds have even been found in a fossil state. Like other conferva, the Nostoc propagates by self-division as well as by seeds or spores. When these spores work their way out of the gelatinous

velope they may be wafted by the winds here and there, and they may be carried great distances.

"Wherever they may fall, and find congenial soil, namely, dampness or recent rain, they will thrive and spread very rapidly, and many cases are recorded where they have covered miles of ground, in a very few hours, with long strings of Nostoc.

"On account of this rapidity of growth, people almost everywhere faithfully believe the Nostoc to fall from the clouds, and ascribe to it many mysterious virtues. The plant is not confined to any special locality or to any climate; sown by the whirlwind, carried by a current of air, in need of moisture only for existence and support, it thrives everywhere, covers aloft in mid-ocean have been found covered with it. In New Zealand it is found in large masses of quaking jelly, several feet in circumference, and covering miles of damp soil; and in our own country it may be found in damp woods, on meadows, or on marshy or even gravelly bottoms.

"All the Nostocs are composed of a semi-liquid cellulose and vegetable proteinc. The edible Nostoc is highly valued in China, where it forms an essential ingredient of the famous bird-nest soup. The flesh that was supposed to have fallen from the clouds in Kentucky is the flesh-colored Nostoc (*N. carolinense* of the botanist) the flavor of it approaches frog or spring chicken legs, and it is greedily devoured by almost all domestic animals.

"Such supposed 'showers' are not rare, and are entirely in harmony with natural laws. In the East Indies the same Nostoc is used as an application in ulcers and scrofulous disease, while every nation in the East considers it nourishing and palatable, and uses it even for food when dried by sun heat."

From "Piety Promoted."

John Eliot.

John Eliot was born in London, the second of the Twelfth month (old style) 1734-5. of parents who were members of our Society. Both of them dying in his early minority, he came under the guardianship of his paternal grandfather, who being engaged in foreign commerce, and designing his grandson for that line of life, took care for his instruction in appropriate branches of learning, particularly in the knowledge of different languages; and at a suitable age placed him in a mercantile counting house. Amidst these facilities for his introduction into business, the far more important advantages of a guarded education, commencing with our religious profession, was unattended to. The family in which he was placed were not of our Society; and the example of his associates and connections was, with very little exception, such as tended to lead away from our self-denying principles. Thus situated, he freely indulged his inclinations in respect to dress, and to the customary forms of deportment.

But soon after he arrived at manhood, at a time when his prospects in life were flattering, and when almost all outward circumstances concurred to immerse his mind still further in the spirit of the world, it pleased the gracious Author of his being to extend, in infinite mercy, a powerful visitation to his soul. He was favored with a sense of his unregenerate state—to see, and deeply to lament, that much of his time had been spent in un-

profitable pursuits, in seeking after worldly wisdom and acquisitions, while the true wisdom which comes from God, and begins with his fear, had been neglected. He saw the emptiness of all worldly possessions and enjoyments, incapable as they are of affording lasting happiness to the human mind, and the comparative unimportance of every pursuit, which has not for its object the glory of the great Creator, and the welfare of the immortal soul. It then became his concern to decline many of his former practices, to seek retirement, and to be frequent in the attendance of meetings for worship. Being advanced thus far, in obedience to the impressions of duty, he felt (to use his own words) an inward persuasion to take up the cross, and to go to the world. This he for some time withstood, trying many things with the hope of finding peace, but in vain; until at length, after having been brought into much distress of mind, he received strength to enter into that way of self-denial, with respect to language, habit, and deportment, which our principles point out, and which he afterwards often believed it right to recommend to others. Not long after this observable change, which took place in the year 1757, he yielded to a belief that it was required of him to bear a public testimony to the efficacy of that Divine Grace of which he had himself experienced the gradual and salutary operations. But, before this, he was not wanting in earnest endeavors with some of his associates and connections, to persuade them to adopt the same choice that he had made. In one quarter, and that to him a peculiarly interesting one, the effect of his example and of his counsel was early apparent. An only and beloved sister, rather younger than himself, had soon to acknowledge him as instrumental in strengthening her previously visited mind to enter upon the path of Christian obedience; which she pursued with much steadiness during the remainder of a short but useful life.

Within a few years after his first appearance as a minister, he performed some visits in that capacity, chiefly in the southern part of England. In 1779, in company with several other Friends under appointment of the Yearly Meeting, he visited the then remaining professors with us in Holland. In 1788, he was engaged in further service on the continent.

In general his services as a minister were confined to his own and some neighboring meetings, and were not frequent. His expressions, when so engaged, were mostly few and simple; the language, at times, of consolation to the afflicted; at others, of tender entreaty to the lukewarm and indifferent, exciting to the love and fear of God; whilst to the diffident and humble mind, his communications were often truly encouraging. In the exercise of private admonition he was diligent, and he was anxious that, in cases of departure from our religious principles, or of a deviation from moral rectitude, this office of love should be seasonably performed. He was a humble man, of a meek and quiet spirit. The tenor of his conduct with regard to the things of this life, showed the influence of religious principle. Alive to the need of guarding against a desire after the accumulation of wealth, he was not solicitous to increase his paternal inheritance. He entertained his friends with kindness and hospitality; and was at the same time a good example of that

simplicity in a domestic establishment which becomes the self-denying followers of our blessed Lord. He also forcibly felt the obligation of making a right use of that portion of outward substance with which he was intrusted. Acting under this impression he was one "ready to distribute;" and thus to many poor persons, as well as to others in reduced or straitened circumstances, he was a kind and unstinted benefactor, and he endeavored to be a discriminating benefactor.

It is probably not frequent in the all-wise dispensations of Providence, that those who may seem to meet with few adverse occurrences, experience some of the deepest inward probations. Of such this Friend had, according to the observation of those who knew him best, a large share. Various were the exercises of mind which he underwent, and amidst which he had often to pass as through solitary places; yet he could at times derive encouragement from the belief that such seasons of conflict and privation were the means of his furtherance in the Christian course. Hence, too, he was well qualified to feel for those who were brought low from inward conflict of spirit. Of those exercises or trials soon the testimonies, to the consistent support of our Society has believed itself called upon to bear. Faithfully to uphold them in his own practice with Christian meekness, was his sincerely conscientious concern; and many are the proofs, as regards his conduct in life, that might be given of the prevalence with him, of religious scruple over considerations of convenience, ease, and secular interest.

About a year before his decease, a close trial was permitted to befall him, in the removal by death, of his endeared wife, who had been a truly helpful companion for a period of almost fifty years. His own health, too, was infirm; and he was frequently in much pain, which he bore with patience. He had a prospect of his departure as near, and it appeared that the view was to him a consoling one, yet accompanied with very humble thoughts concerning himself, as might be gathered from various sentences that he dropped. A week or two before his last illness, in speaking to a friend, he emphatically said, "Mercy I want, and mercy I have." His illness, which indeed a great and rapid decay of strength, was short, and he had little on his mind then to express, but desired his son and daughter who were attending upon him, to pray that he might have an easy passage; and afterwards, on one of them expressing a concern for his great bodily weakness, he replied, "It is as the Lord pleases."

This "dear and valued Friend," to adopt the expressions used by the members of his own Monthly Meeting, very tranquilly departed this life on the 9th of the First month, 1813, at his house in Bartholomew-close, London. He had nearly attained the age of seventy-eight years, and had been a minister about fifty-three years.

Be kind to old people. Age whitening for the tomb is a worthy object of reverence. The old linger sadly with the young, and the young should bestow upon them the tenderest affection and care to diminish the chill of ebbing life. Be kind to those in the autumn of life, for you know not what suffering they have endured nor what may yet be their portion.—Ledger.

Japanese Vegetable Wax.—The substance known in the trade as vegetable wax is grown or manufactured in the southern part of Japan, and from there it is largely exported to England. The principal difference from beeswax is the smell when burning, the vegetable emitting a strong tallowy odor that is very disagreeable. Otherwise the two seem very nearly identical, except that the vegetable production has a higher melting point, and on this account seems to be more valuable than beeswax, which, on account of its low melting point, is too soft for many purposes in the arts. The wax is obtained from the berry of the wax tree, which ripens about October. The fruit is first thrown into a large vessel, where the husk is separated from the kernel by a mill. This done, the nut—being very hard—undergoes the steaming process, which softens it and causes the oily part to flow more readily. It is then submitted to a heavy pressure for squeezing out the oil from the pulp. Tanks placed near by collect the fluid and allow it to harden into a bluish green mass. In this state it is unfit for export, but it is adapted for the manufacture of candles and a few coarse uses. The *Bulletin* gives the following account of the method of refining: "After being boiled with an alkali until a perfectly fluid state is reached, it is run off into a large vessel containing water; the pure wax floats and is taken off to be bleached by exposure to the sun for a couple of weeks; the effect of which is to reduce it to a dirty white crumbling substance, having a strong smell of tallow. Both the latter processes are repeated (with the exception of using an alkali) to render the wax still more refined, the result being an almost crystalline formation. It is then again melted to reduce it to a compact mass, when it is ready for the exporter."—*Ledger*.

Spurgeon tells the following story of a poor man, who had a large family, and gave them a very comfortable support while he was in health. He broke his leg, and was laid up for some weeks. As he would be for some time destitute of the means of grace, it was proposed to hold a prayer-meeting at his house. The meeting was led by Deacon Brown. A loud knock at the door interrupted the service. A tall, lank, blue-frooked youngster stood at the door, with an ox-goad in his hand, and asked to see Deacon Brown. "Father could not attend this meeting," he said, "but he sent his prayers, and they are out in the cart." They were brought in, in the shape of potatoes, beef, pork and corn. The meeting broke up without the benediction.

With the opening of the new academic year of the German universities, the cry again comes of the dearth of applications for the theological departments. And this is the case in the liberal faculty of Heidelberg as well as the orthodox of the other schools. We believe there are now but nine at Heidelberg. And, to make the matter worse, according to the testimony of the presidents of the gymnasiums, it is the least talented students that apply for admission to the department of theology. An experienced teacher affirms that in none of the theological departments numbering a hundred students will there be found more than ten or twelve young men of real talent. And this alarming decrease of students is not because of indifference on the

part of the teachers, for they have spared no effort during the last few years to stem the downward current of their fortunes. The cause must be found in the worldly tendency of the young men of the period, together with the evil effects of the systematized attacks of many German scientists on religious truths. And we believe the cause to lie still deeper and to be found largely in the "machine religion" of the State, which is simply an organism without a spirit.—*Chris. Advocate*.

EVENING SORROW.

Set ed.

I am mourning to-night, for a day that is gone,
That no future time can recall;
A prize beyond value, so lately my own—
But ah! I have squandered it all.

'Tis not that I've idled my time all away,
I've tried to be diligent still;
At the work that was needful I've labored to-day
With a cheerful and earnest goodwill.

I've been faithful to all that could claim me below,
But oh! to our Father above,
Choked up with the weeds, very heavy and slow,
Has been the sweet current of love.

When I rose with the lark, in the rosy-hued morn—
I forgot the Creator of light,
When I saw the dew glittering the grass and the corn,
I forgot who had given me sight.

And all through the day, I've accepted the gifts,
That around me so plentiful,
But not with a heart that in gratitude lifts
All praise to the Giver of all.

And in my own heart, I have not stopped to hear
The voice that would warn me of ill;
Neglected the Saviour, so graciously near,
And now, will He hear with me still?

Forgive me, dear Saviour, in sorrow I pray,
And strengthen my heart with Thy love,
To love Thee, look to Thee, and walk in Thy way,
That leads to Thy presence above!

For "The Friend."

History, Manners and Customs of the Indian Nations who once inhabited Pennsylvania and the neighboring States, by John Heckewelder. New and revised edition, with an Introduction and Notes, by William C. Reichel. Publication fund of the Historical Society of Pennsylvania. Philadelphia, 1876.

This valuable production, which was originally published in 1819, has long been out of print, and its re-issue in this form, accompanied with some explanatory notes, will no doubt prove interesting and acceptable to many readers; some of whom may, perhaps, be led by its perusal, to take a more dispassionate and correct view of the character of the aboriginal inhabitants of this country, than that which has frequently been transmitted to posterity by historians.

An introductory chapter by the editor, gives an outline of the life and labors of the author who, as a Moravian missionary, spent many years among the Delawares in different localities in Pennsylvania and Ohio, chiefly during the latter part of the last century; and who in the course of his sojourn among them, acquired an intimate knowledge of their language and customs. Among the observations which he has recorded, bearing upon the general subject of the treatment of the Indians by the whites, the following remarks are made on the character of the whites as viewed by the Indians, which may be usefully considered at the present day:

"It is true, they confess, that when they first saw the whites, they took them for beings

of a superior kind. They did not know but that they had been sent to them from the abode of the Great Spirit for some great and important purpose. They therefore, welcomed them, hoping to be made happier by their company. It was not long, however, before they discovered their mistake, having found them an ungrateful, insatiable people, who, though the Indians had given them as much land as was necessary to raise provisions for themselves and their families, and pasture for their cattle, wanted still to have more, and at last would not be content with less than the whole country. 'And yet,' say those injured people, 'these white men would always be telling us of their great Book which God had given to them, they would persuade us that every man was good who believed in what the Book said, and every man was bad who did not believe in it. They told us a great many things, which they said were written in the good Book, and wanted us to believe it all. We would probably have done so, if we had seen them practise what they pretended to believe, and act according to the good words which they told us. But no! while they held their big Book in one hand, in the other they had murderous weapons, guns and swords, wherewith to kill us, poor Indians! Ah! and they did so too, they killed those who believed in their Book, as well as those who did not. They made no distinction!'

"The Indians have a keen eye; by looking at a person, they think that they can judge of his friendly or unfriendly disposition to their race; and, indeed, it has been allowed by many whites who have lived among them, that they are, in general, pretty good physiognomists. They are very quick among themselves in giving a name to a stranger or person of note that comes to them, and that name is always significant or descriptive of something remarkable which they have observed about his person, which serves them to remember him as a friend or otherwise, as the case may be; when they believe a person to be their friend, they will do everything in their power to oblige him, it being their principle that 'good ought always to be rewarded with good.' They prefer a plain man, simple in his manners and who treats them with frankness and familiarity. Such a man, they say, loves them. From a proud haughty man they do not expect friendship; whatever may be his professions, they think him incapable of loving anybody but himself, or perhaps, at most, his equal, and that, they think, an Indian can, in his opinion, never be.

"They wonder that the white people are striving so much to get rich, and to heap up treasures in this world which they cannot carry with them to the next. They ascribe this to pride and to the desire of being called rich and great. They say that there is enough in this world to live upon, without laying anything by, and as to the next world, it contains plenty of everything, and they will find all their wants satisfied when they arrive there. They, therefore, do not lay up any stores, but merely take with them when they die as much as is necessary for their journey to the world of spirits.

"The Indians also observe, that the white people must have a great many thieves among them, since they put locks to their doors, which shows great apprehension that their property otherwise would not be safe: 'As to us,' say they, 'we entertain no such fears;

believes are very rare among us, and we have no instance of any person breaking into a house. Our Indian lock is, when we go out, set the corn pounder or a billet of wood against the door, so that it may be seen that no body is within, and there is no danger that any Indian would presume to enter a house thus secured."

"Strong as their feelings are, they do not distinguish their sense of justice, and they are still generously disposed to allow that there are great and good individuals among a race of men, who, they believe, have doomed them to utter destruction."

For "The Friend."

The extracts from the Minute of Advice sent by Kansas Yearly Meeting, which were published in the last number, relative to Gospel Ministry and Worship, have at length called attention to the importance of faithfully abiding the testimony of our Society on these important points. We believe that it is liable to be impaired, either by a cold and formal condition of the church; or by a zeal that has not been subjected to the crucifying power of the cross of Christ, and whose fruits are therefore not wholly the products of that wisdom that is from above.

When John Churchman was visiting the churches in Ireland, about the close of the year 1752, at a meeting in Dublin, "he was led to expose the ignorance of those who conducted there was no worship performed, or oft experienced in meeting together, unless a minister preached, and who were ready to admire at and censure us for sitting in silence. This was not confined, he said, to one of other societies, but included some at profess with us, who never were baptized in the one Eternal Spirit, which creates anew and translates from darkness to light; but are contented to remain in the outer court." John Churchman attended a meeting on the 2nd of March 1753, at Parshaw Hall, of which it is said: "The nature and advantage of true silence and retirement of mind were pointed out, to which our forefathers and ours in the beginning were called, and whereby they increased in Divine knowledge; and became acquainted with Him, whom they had in vain sought after among many professions, hearing much and looking for Him here He was not to be found. It is lamentable that so many of the successors of those worthies have fallen into the same way that they were gathered from; being outward in their views and expectations, and therefore main destitute of life and salvation."

On the 11th of 3rd month following, he was at Sheffield, and of this meeting John Pemberton (his companion) makes the following marks:

"Friends were exhorted to seek and know the Lord for themselves, and to depend and sit on Him; which, it is to be lamented, is neglected in many places, both among teachers and other members; an itching earning in the latter to hear something to divert and please, and in the former a desire to speak at the people might not be scattered; which for want of self being thoroughly mortified of sin, and from indulging a foolish pity, may I, if it should please the Lord to ally me to preach the gospel of peace and tidings, be preserved from going forth about the true motion; and speaking from my own experience, without a renewed qualifi-

cation, and witnessing Him who is the true guide, to put forth; that God may be glorified. His people edified, and he that ministers be refreshed and have the answer of peace."

While all true members of the church must rejoice in the evidences that are afforded, that the Lord is still at work not only immediately in the hearts of the people; but also that He is pouring forth of His gifts on sons and daughters whom He is preparing for service in the great harvest field; yet it is sorrowfully apparent that some have entered on the work of the ministry without the requisite preparation or call. So that we in this day have need to observe the caution, which John Pemberton says was extended at a meeting he attended with his friend Jno. Churchman in Yorkshire: "The few who seemed to have some life, were exhorted to keep close to the Lord, that thereby they might be preserved in a Divine sense and sight, to judge and distinguish between right and wrong; and to be cautious how they joined with every sound, or danced after every pipe, lest they should be drawn into error; but to try the spirits of such as speak among them."

Phosphorescence of the Sea.—The phosphorescence of the sea is one of the most charming phenomena that nature in all her wide range of beauty offers to our admiring gaze. Who that has sojourned on the coast, or traversed the fields of ocean and witnessed it in its full splendor, can ever forget the deep impression made upon his mind when he first saw the dark waves curl over in flashing crests of light—when his vessel's bows ploughed up the waters in silvery furrows, or the rising flood broke in sheets of flame or spangles of diamond brilliancy on the glowing beach! We may well be lost in wonder at so marvellous, so fairy-like a spectacle—well may we be astonished at seeing the cold waters changed as it were by a magician's wand into cradles of fire! But our admiration increases when on inquiry into the causes of the gorgeous spectacle we learn that it is not the result of inanimate agencies, magnetic or electrical, but that it derives its origin from a living source, and that the *noctiluca miliaris*, a globular gelatinous animalcule nearly related to the rhizopods, is the chief illuminator of the seas!

This wonderful little creature is just large enough to be discerned by the naked eye when the water in which it may be swimming is contained in a glass jar exposed to the light; and a tail-like appendage marked with transverse rings, which serves as an instrument of locomotion, becomes apparent under a slight magnifying power. Near the point of its implantation in the body, is a definite month leading into a large irregular cavity, apparently channelled out in the jelly-white substance of the body. The external coats denser than the contained sarcoid, and the former sends thread-like prolongations through the latter, so as to divide the entire body into irregular chambers. "The nature of its luminosity," says Dr. Carpenter, "is found by microscopic examination to be very peculiar; for what appears to the eye to be a uniform glow is resolvable under a sufficient magnifying power into a multitude of evanescent scintillations, and these are given forth with increased intensity whenever the body of the animal receives any mechanical shock."

To fill up the length of an inch it would require 170 noctilucae ranged in a line, and millions could be contained in a wine glass. And yet in every zone they make the wide surface of the nocturnal ocean glow and sparkle with an ethereal light.—*North American.*

For "The Friend."

[Although we cannot approve of all the expressions contained in the following letter, yet the correct sentiments which it indicates, on a subject which we believe is intimately connected with a growth in grace, by one not a member of our religious Society, commend it to the serious attention of our readers.—Eds.]

"Why take ye thought for raiment."—CHRIST.

Dear Eugenia.—Custom and fashion seem to bear sway in many things, but in nothing, perhaps more tyrannically than in the matter of dress. Manifold are the inconveniences and discomforts submitted to under its iron rule. The children of the world are slaves to fashion; but Christians have a right to break away from this thralldom. The Saviour says to them, "Ye are not of the world, but I have chosen you out of the world." It is their privilege now to unloose the bands of their necks, and be slaves no more.

I trust you are not one of those who think that dress is too small a matter to bring your religion to bear upon. Nothing is small or unimportant which can draw us into sin. And we know that dress is not beneath the notice of God, for he has repeatedly alluded to it in his word. You remember that remarkable inventory in Isaiah iii. 18—23. We see from this that the Lord takes notice of every article we wear.

Individuals sometimes turn away impatiently from any admonitions on this subject, because they say it is a matter which concerns no one but themselves. This is not true. Our mode of dress is something which every one can observe; the errors committed here are not among our *secret sins*; they are known and read of all men, and of course their influence is felt wherever we are. We are forbidden to be conformed to the world; this is well understood by the world, and disobedience to the injunction is readily detected by them, and makes its unfavorable impression where we think little of it.

Some will say it is of no use to lay down rules in regard to dress—that it is a thing which cannot be reduced to rule. There is, perhaps, some truth in this; still there are certain principles that as Christians we adopt, and which, if faithfully applied, will regulate our conduct in this matter. It has been my aim, dear Eugenia, in all these letters, to keep clearly before your mind the two great principles of *entire consecration and perfect faith*. Whatever is inconsistent with these, is and must be *sin*. It is no matter by what gentler name the world calls it; God says it is *sin*.

Now, in regard to dress, the world has sundry maxims which it will never do for the Christian to follow. The world says, you may dress richly if you can afford it; but Christ points to a world lying in wickedness, which has not yet been reached by the Gospel; and gently whispers, "The poor ye have always with you." The world says you shall wear at least what is becoming to your rank in life—that you need not be too scrupulous about ornament—that you must not be singu-

larly plain, &c., but Christ says, "Be not conformed to the world."

Do not give any more attention to dress than you honestly believe *comfort and propriety* require. If you do more than this, it involves a waste of *time, money, and thought*—three things which you have solemnly dedicated to God, and therefore have no liberty to waste. Moreover, it will nourish pride and vanity, weaken your influence as a Christian, be a bad example to others, and be contrary to the scripture rule. See I Peter, iii. 3; I Tim. ii. 9.

Some people are consciences about spending money for superfluities, but they take their Lord's *time*, without any scruple. They will not purchase trimmings or finery, but at a great expense of time and thought they will *make* these things, and then congratulate themselves on their economy! *Time, thought and money*, are three talents given us for the service of God; and we have no more right to waste one than the other. I am utterly at a loss to understand how that young lady can believe herself to be a true Christian—living for God—when she spends hour after hour, and day after day, in embroidering and ornamenting her dresses. Is this walking worthily of her high calling? What can she say in defence of such a practice? She can say she is only doing as other people do. What a common excuse, and what a miserable one! Is this the Bible standard? Is this being a Bible Christian? She says, perhaps, she is only gratifying her own taste, and pleasing her friends. She would probably come nearer the truth, if she said it was to gratify her own pride and vanity. But even taking her version of it, has she not got away from the Bible standard, which says we are not to please ourselves; and as to our friends, we must hate them; that is, whenever their claims conflict with the claims of God, we are to act as if we hated them.

In all that we do, we should be mindful of the power of our example. I know an excellent Christian lady, who has ample means, and ample leisure at command, but she will not purchase rich clothing, nor spend time in ornamenting her dress, because others around her, who could not so well spare either time or money, would be led into temptation by her example. Some would doubtless commit sin by imitating her, and others by repining at their inability to do so. You see she is acting on Paul's principle of genuine benevolence—she will not eat meat, if it shall cause others to offend. This is generous—this looks like loving your neighbor as yourself. How all the petty excuses for self-indulgence quail before it!

A very important consideration against giving time, money, and thought to dress, is that *it weakens your influence as a Christian*. "No man liveth to himself." You are a living epistle known and read of all men; now if the first page they read strikes them unfavorably, the rest will not be likely to have much weight. How can you expect to persuade any one to renounce the world, when a glance at your fashionable apparel convinces them that you have not yet renounced it yourself? How can you expect to succeed in winning a half-hearted disciple to a life of entire consecration, when your outward adorning tells too truly that you have never laid all on the altar? You may speak of the enjoyment you find in religion, but it will have little effect

while your style of dress betrays the fact that your heart is, to say the least, divided between God and the world.

In order to have your influence over others all that it should be, it is not enough that you cannot be called *decidedly dressy*; you must be *decidedly plain*. It must be apparent that nothing has been sought but *comfort and propriety*. Anything beyond will weaken your influence wonderfully. You may be satisfied of this by observing your own feelings in regard to others who err in this respect. You can cast the mantle of charity over them, but it is impossible to feel that they are dead to the world. Now, your personal influence as a Christian, is a thing too valuable to be thus lightly thrown away.

It will not do for you to say, "It is nobody's business how I dress." People will make it their business to observe and comment upon it. You must remember that many persons are weak-minded, and make much of trifles. Paul's rule (which indeed is only the working out of Christian love) forbids you to indulge in anything however innocent, that will make one of the weak ones to offend, or be offended.

You think you could go to a martyr's stake. I presume you could. But there are some things in life which require more courage than that; one is, to dare to be singular; and another is to make thorough work in the matter of crucifying self.

You ask whether a Christian is required to dispense with ornaments entirely? It appears to me that the principles we have adopted would banish them altogether—at least in the present state of the world. Most church-members in our cities and large towns have departed so widely in this particular, from Christian simplicity, that it behoves those who would keep themselves unspotted from the world—those who would raise the tone of piety in the Church—those who would be holy—to take a decided stand against all appearance of evil here. Let it be evident that you are *dead*. Remember the Saviour says to his disciples, "Ye are the salt of the earth." "Ye are the light of the world." Observe, he does not say you *ought* to be, but you are *now*. If by the indulgence of your taste, (even in what would generally be considered a very moderate degree,—that is, by allowing everything beyond comfort and propriety,) you diminish your power over the minds of others, *the salt has lost its savor*.

You feel that you have given yourself to the Lord without reserve, and now your great work is to persuade others, both in the Church and out of it, to do the same. If there is anything in your present mode of dress which you have reason to think will weaken your influence with any of these minds, Christian love requires you to drop it at once. Are you not willing to go dressed very plainly if it will help you to save souls? That it will, there can be no doubt.

Let us "be clothed with humility," and wear always that *ornament*, "which in the sight of God is of great price."

Yours affectionately, S. J.

Oh! the dignity and vast extent of thy profession as a Quaker; even as one called out of the corruptions of the age in which thou livest; not in speech and garb merely, but in the renunciation of every superfluous and vain honor, profit and pleasure: as a Christian, distin-

guished at first sight from his neighbors, of whom an uniformity of conduct in all respects is expected, even on pain of the censure of hypocrisy.—*Dr. Ratty.*

Reports of the Weather.—An improvement in the transmission of the weather reports the Signal Service Bureau, at Washington, has recently been made, which, it is expected will materially facilitate their rapid distribution over the country, and enable the charts of the weather which are now furnished by the central office at Washington only, to be printed simultaneously and supplied from many different and distant places. This improvement has been accomplished by the recent invention of a "Fac-simile Telegraph instrument, by which the entire map of the United States, such as is used in connection with these reports with its lines and figures, can be reproduced in a very brief time, with a suitable receiving apparatus is used to connect with it. This instrument has lately been in operation between the Government Building in the Centennial Exhibition ground in Philadelphia and the Office in Washington, a distance of about one hundred and fifty miles.

The time required to telegraph the matter from Washington to any of our large cities, and to prepare it for publication, it is stated, need not exceed three-quarters of an hour. A little study of these maps will enable persons of intelligence, to arrive at an understanding of the probable condition of the weather for hours, and it may be some days in advance. A late paper states:

"It is a well-known fact, that of every hundred storms that originate in the Rocky Mountain region—that is, the heavy stormfully eighty-five per cent. come eastward. Hence when a farmer looks at the weather map in the morning and sees that an extremely low barometer prevails in the west, and notices how the lines representing the height of the barometer run, he will know that threatening weather may be expected for several days. If there is a low barometer at the Gulf, or a cyclone, the probability that a severe storm will rapidly advance along the coast, and therefore cautious signals are ordered. The value of these maps to shippers, insurance companies, railroads, &c., cannot be estimated. When the system is fully arranged, the midnight weather maps may be ready for publication in the morning papers, while the morning reports will be time for the evening papers.—*Late Paper.*"

For "The Friend"

In speaking of the ordained ministry, we are easily influenced by our respect or esteem for individuals among them, and the position they occupy in the religious world, to overlook the system by which they are constituted and upheld as a class, and which they pertinaciously uphold; without reflecting that if our principles relative to the qualification and gift for the work are in accordance with the precepts and teaching of the New Testament, that system is in opposition to the will of God, and the two cannot harmonize.

The whole spirit of the gospel and its practical effects are that of an universal priesthood among true believers; they are made kings and priests unto God, to offer spiritual sacrifices after receiving spiritual gifts. The idea of a "special order" of ministers is nowhere

be found in the New Testament any more than there is a special order of apostles, of prophets, of evangelists, of pastors or teachers, or any other members who have received special gifts. Christ selects and commissions his own ministers. He inspires them to preach when and where He sees fit, and to depend altogether on Him for their reward. The setting up in the visible church of the Judaism of priests as a special class or sacerdotal order, as bishops, priests and deacons, and of altars, is an evil that has grievously retarded the life of religion and the unity of a church.

The Working Classes in Vienna.—The extent to which certain industries are carried here appears marvellous to the visitor. Weavers, for instance, in both wool and silk, number over forty-five thousand workers; not, as we should naturally suppose, distributed in large factories, employing thousands of under-paid and half-starved slaves, but for the most part independent laborers, who do the work by the piece at their own homes, assisted generally by their families. So are all brought up to the trade from childhood; and wherever we see any larger establishments, employing hired laborers to work proved and expensive machinery, we may be sure that their wives and children are also at home on their own looms. The weavers number over fifty thousand, and do their work much on the same principle as the weavers, though in many instances the men do the rougher portions of the work in the shop or factory, and then takes the article home to be finished off and polished by men and children. The leather workers are estimated at over fifty thousand also, and a majority of them do their work on the "one" system like the other trades mentioned. The people engaged in the same industry have congregated in certain quarters of the city, generally in the modern or suburban portions. The weavers occupy almost exclusively the suburb of "Mariahilf"; the tailors predominate in certain districts of the "Leopoldstadt" and the "Neuland." This arrangement creates great uniformity in the mode of life of the inhabitants of the sole sections of the Austrian capital, and prevents the habits of one class from interfering with the daily routine of the other. In the evenings and on holidays the working-class family is seldom found at home. Cafés and other places in which refreshments are dispensed at cheap rates, are the daily resorts of many thousands of this class when the wife's task has been done, and they actually use no more expense than would the cook at home, the burning of light and fuel, and for the men and boys who are desirous to improve their minds, there are plenty of opportunities in the shape of free evening schools, technical and scientific, drawing classes, lectures on popular subjects, where an excellent education can be obtained by industrious students. The rapid improvement of the trade in Vienna goes to prove that these opportunities are not neglected.—*San Francisco Chronicle.*

"Is Father on Deck?"—A number of years ago, Captain D. commanded a vessel sailing from Liverpool to New York, and on one voyage he had all his family with him on board the ship. One night, when all were

quietly asleep, there arose a sudden squall of wind, which came sweeping over the waters until it struck the vessel, and instantly threw her on her side, tumbling and crushing everything that was movable, and awaking the passengers to a consciousness that they were in imminent peril. Every one on board was alarmed and uneasy, and some sprang from their berths, and began to dress, that they might be ready for the worst. Captain D. had a little girl on board, just eight years old, who, of course, awoke with the rest. "What is the matter?" said the frightened child. They told her a squall had struck the ship. "Is father on deck?" said she. "Yes, father's on deck." The little thing dropped herself on her pillow again without a fear, and in a few moments was sleeping sweetly, in spite of wind or waves.

Return of the Jews to Palestine.—A writer in the *Jewish Herald* says: "The last four or five years have witnessed a return of the Jews to Palestine from all parts, but more especially from Russia, which has been altogether unprecedented. The Hebrew population of Jerusalem is now, probably, double what it was some ten years ago. Accurate statistics on this subject it is impossible to find, as the Eastern Jews dread a census from superstitious reasons, and also from the fear of having to pay more, by way of poll-tax, to the Turks, if their true numbers were known. For these reasons, and especially the latter, their official returns on the subject are not to be trusted. In 1872 and 1873, such numbers returned to Saphed alone, (one of the four holy cities of the Jews in the mountains of Galilee,) that there were no houses to receive them, and building was for a considerable length of time carried on all night as well as all day—this, be it remembered, in the East, where 'the night' is emphatically the time 'in which no man can work!' Great accessions still continue daily; and whereas, ten years ago, the Jews were confined to their own quarter in Jerusalem—the poorest and worst—they now inhabit all parts of the city, and are always ready to rent every house that is to be let."

Selected for "The Friend."

5th mo, 12th. In the course of my short pilgrimage, being now in my fiftieth year, I have encountered some difficulties, and passed through seasons of deep discouragement on various accounts. On commencing business for myself, I fully believed that my life and my talents should be devoted to the service of my Heavenly Father. Though it was necessary to make suitable provision for myself and for those who might be dependent on me, yet in my view this was secondary to the main object of serving Him; and through the aid of his blessed Spirit, taking part in the interests and concerns of his church and people. Very early I had the promise, that if I devoted myself to his service, I should never want food or raiment. But though I fully believed the certainty of the promise, and have never since been permitted to doubt its fulfilment; yet when things in the outward have worn a gloomy aspect, and my business was very small, and an increasing family looking to me for their daily supplies, my faith at times has been closely proved. This has had a very humbling effect, and while I have been weaned from the desire

after outward things, both riches and temporal enjoyments, it has tended to bring me many times, in a prostrated state of mind to his footstool, and to lay all before Him, and ask for the continuance of his countenance and mercy towards me, a poor unworthy creature before Him. Herein I have experienced the renewed extendings of his unmerited regard; the load under which my mind had been laboring, was for the present removed, and ability was received to feel with and for the afflicted; and to hold forth to them the language of consolation, in their secret and bitter conflicts. Under the discipline of the cross of Christ, I have been convinced, that much too great part of the time, and of the energies of body and mind, are absorbed in the pursuit of worldly things. A great part of mankind miss of the true enjoyment of the provisions of a beneficent providence, even after they gain them, for want of living to Him, and not to themselves. They are kept, either in a hurried frame of mind, confused or in doubt what to lay hold of to obtain happiness, or they settle down in the love of money, hoarding it, and husbanding it under a sordid attachment to it. They are in bonds, unable to enjoy or to see in what true enjoyment consists. The work of religion is either overlooked, rarely attended to, or postponed to a future day, when they think it will suit their inclination and convenience. I am convinced that it is in our power, as we live in obedience to the Divine will, to find time for all our duties, social and religious. Even the poor, with common industry, as their desires and expenses are circumscribed by the Divine will, may, through his blessing, procure sufficient food and raiment; and when it is proper to leave their outward business in order to perform their religious duties, they may confide in his superintending providence over their affairs and their families, so that they shall not suffer from their faithfulness. How simple and how few are the wants of such! They do not envy the rich, nor covet their possessions. "Their delight is in the law of the Lord, and therein they meditate day and night." They eat their bread with gladness and singleness of heart. Their labors and their rest are sweet, and as they seek first the kingdom of God and the righteousness thereof, all those things necessary to their accommodation, will be added. Here the devoted follower of Christ, experiences the right use of his time, and talents, and the true enjoyment of the various blessings which his Heavenly Father provides and bestows upon him. As time, and the energies of mind and body are wasting away, he is growing in grace, and in the knowledge of those things which pertain to life and salvation. He is laying up treasure in heaven where his heart centres, and he becomes more and more established upon that Rock against which death, hell and the grave cannot prevail.—*William Evans' Journal.*

THE FRIEND.

ELEVENTH MONTH 11, 1876.

The account of the proceedings of the Ohio Yearly Meeting published in our last week's number, is not only interesting as a partial exhibit of the concerns of that body, but is

calculated to renew sympathy in the hearts of its readers with that portion of our brethren in the household of faith, and to administer encouragement to the members of Philadelphia Yearly Meeting, which has had the justice and firmness to declare its unity and brotherhood with a company of believers that, on purely party ground, has been misjudged and rejected by other bodies claiming to be Yearly Meetings.

Time and experience often exert a powerful influence, not only in determining the dispositions and character of men individually, but in developing the principles upon which they are associated together, the motives prompting them to action, and the object or objects they are sincerely aiming to attain. If actuated by genuine love of the religion they profess, though the bread of adversity may be allotted them, it will be found to be converted into the form convenient for them, and their trials prove a school of profitable instruction; softening the too ardent and restive spirit, and though the revelations of Divine Light, presenting a clearer view of whatever may obstruct growth in the unchangeable Truth, and the paramount importance over all strifes and injuries, of being found patiently occupying their ranks in righteousness.

The manner in which Ohio Yearly Meeting has pursued the even tenor of its way, refraining from querulous complaint of the manner in which it has been treated, and evincing a deep concern to be found striving to maintain the doctrines and testimonies which Friends have ever been called to uphold before the world, and its continued exercise to encourage and confirm its members in walking in the narrow way of the cross, consistently with our holy profession, speaks louder than words, however strong and uttered in accordance with conventional usage, that it has not allowed its peculiar position to divert it from the legitimate object of religious association, and give incontrovertible evidence—were other evidence lacking—that it is a true Yearly Meeting of Friends, continuing on the foundation on which it was originally established.

It is cause for rejoicing that Philadelphia Yearly Meeting has declared and maintained its unity with this branch of the Society, in exchanging certificates, not only of ministers making religious visits, but of members removing to or from the subordinate meetings; and we earnestly desire a continued strengthening of that Christian fellowship which springs from walking by the same rule and minding the same thing, preserving from the many grievous lapses from the purity of our self-denying religion that are producing such sorrowful fruit in other parts of the profession.

Unity of the Spirit is a characteristic of the true church. It can be produced and preserved only by the members giving evidence in their lives and conversation of being under the government of the one glorified Head, by wearing his yoke and consistently maintaining a harmonious travail for the support of his cause and the spread of his kingdom. Where this genuine unity subsists, there will needs be that Christian love one for another, that encircles its possessors in the bond of peace, and they will rejoice or suffer together, however external circumstances may prevent the full or free expression of their gospel fel-

lowship, or however the misguided course of others may wound and distress them.

Friends of Ohio Yearly Meeting must no doubt participate, in their measure, in the trials produced by the inroads of the spirit of the world, and find cause for mourning over weakness and deficiencies manifested among them; but it is satisfactory to learn from some who attended their late annual assembly, that a lively concern was felt among many of the young as well as the older members, to gird up the loins of the mind, be sober and seek for right qualification to be employed in repairing the breaches and building up the waste places. May the great Master Builder bless the work and cause it to prosper in their hands.

SUMMARY OF EVENTS.

FOREIGN.—At length there is a prospect of the early termination of the sanguinary struggle in European Turkey. The Russian ambassador at Constantinople, under instructions from his government, insisted that the Porte should grant a two month's armistice beginning on the 1st inst. The Russian demand was accepted, and an immediate cessation of hostilities took place. Both armies will retain the positions they now hold. The London Post says: "Turkey having accepted the armistice, we understand Russia has taken immediate steps to press forward negotiations for the arrangement of all pending questions on the basis of the English proposal." The Post also states that official investigation shows that only 3100 persons were killed by the Turks in Bulgaria. Previous to the cessation of hostilities the Servians had sustained great losses in several battles with the Turks, and were in fact unable to resist their enemies any longer. Russian officers express the belief that thousands of Russians have fallen in the valley of the Morava alone. They openly accuse the Servians of bayoneting Russians who attempted, revolver in hand, to urge them to attack the Turks.

The Emperor has stated that the Porte, yielding to the demands of Russia, has consented to relinquish the positions captured by the Turks since the night of 10th mo. 31st.

The great maritime canal connecting Amsterdam with the German ocean, has been opened with imposing ceremonies. Amsterdam was covered with flags, and at night there was general illumination. The canal, five miles long, and will have at the sea end a harbor covering 250 acres.

The Spanish government continues its efforts to put down the insurrection in Cuba. On the first inst. a battalion of troops 1000 strong arrived at Havana from Spain. The insurrection in the Esqueque provinces of Spain is unquiescent, and it is said that a growing dissension is displayed in the attitude of the Biscayan deputies and towns.

Dr. Slade an American spiritualist and melioid, has been prosecuted in London under the vagrant act, and fined £100. He was generally known as "the Great month's confinement at hard labor in the House of Correction.

The cash reserves of the European banks are extraordinarily high at the present time. The Bank of England holds £170,000,000 in coin, the Bank of France 1,000,000,000, the Imperial Bank of Germany \$125,000,000, the Austrian National Bank 608,000,000, the Netherlands Bank 265,000,000, and the National Bank of Belgium 226,000,000.

The speech of the Emperor at the opening of the German Imperial Parliament at Berlin, was pacific in tone, and encouraged the hope that the peace of Europe would not be easily disturbed. The Emperor's speech fore-shadowed the adoption of a more thoroughly protective tariff on foreign goods. The French and English papers find fault with some of the Emperor's statements, but the French papers even construe them as a direct menace to France.

The eminent Roman cardinal Antonelli, died on the 6th inst. in the seventy-first year of his age, after a long period of ill health. Antonelli was considered an able statesman, and had long been the confidential adviser of the Emperor.

The Prime Minister of Spain, addressing a meeting of 250 Spanish Deputies, declared that it was the intention of the government to retain Cuba at any cost.

UNITED STATES.—There were 310 interments in Philadelphia last week, of these 186 were adults and 124 minors.

The mean temperature of the Tenth month of Pennsylvania Hospital record was 50.38 deg. 11 highest point attained during the month was 71 d highest point attained during the month was 31 deg. Amount of rain 1.21 inch. The average of the mean temperature of the Tenth month for the past 87 years is stated to have been 50 deg., the highest mean during that entire period having been 64 deg., and the lowest 46 deg. The rainfall during the first 20 months of 1876 has been 37.67 inches against 32.2 inches in 1875.

The Public Debt statement of the United States for the Tenth month, shows a reduction of the national debt during the month of \$3,888,153.

The number of permits issued by the Building Department of Philadelphia during the Tenth month was 620, of which 575 were for new houses, and additions and alterations.

The twenty-five ton cable intended to support a proposed foot bridge of the East river bridge, has been safely brought across the East river by means of "carries" and "traveller" cables, and conveyed to New York tower.

During the six days ending the 4th inst., the International Exhibition at Philadelphia was visited, 552,872 persons who paid for admission; the large number was 115,300 on the 2d inst., the smallest 80,000 on the 20th and 21st.

A dispatch from Gen. Miles, written at the Yellowstone river 10th mo. 27th, announces the surrender of a considerable number of the hostile bands heretofore acting with Sitting Bull. They have engaged to go to the Cheyenne agency, and there submit to the requirements of the government. These tribes surrendered five of their principal chiefs as hostages, and a guarantee of their compliance with the terms of surrender.

The Markets, &c.—The following were the quotations on the 6th inst. New York.—American gold, 110 U. S. 86; 1881, registered and coupon, 117 1/2 U. S. 5 per cents, 113. Superfine flour, \$4.50 a \$4. State extra, \$5.20 a \$5.45; finer brands, \$6 a \$10. Amber Michigan wheat, \$1.37; red winter, \$1.2 \$1.28; No. 2 Chicago spring, \$1.23 a \$1.25; No. 3 \$1.12. Western mixed corn, 58 cts. White wheat, 41 a 42 cts. mixed State, 45 a 48 cts. *Philadelph.*—Uplands and New Orleans middling cotton, 14 cts. Flour, \$4 a \$8.50. Red wheat, \$1.25; a \$1.32 a \$1.35; white, \$1.35 a \$1.40. *Pennsylvania*, 72 cts.; Southern, 68 a 70 cts. *Yellow corn*, 58 cts. *Old white oats*, 48 a 50 cts. *Barley*, 31 cts. Sales of 4000 beef cattle at 5 1/2 a 61 cts. per gross for extra; 4 1/2 a 5 1/2 cts. for fair to good, and 3 cts. for common. About 12,000 sheep sold at 4 1/2 cts. per lb. gross, and 4500 hogs at \$7.75 a \$8.25 100 lb. net. *Chicago*.—No. 2 spring wheat, \$1.08 a 1.40, 98 cts. No. 2, 94 cts. Oats, 30 cts. *London*.—Superfine flour, \$3.25 a \$3.75; extra, \$4 a 5. No. 2 red fall wheat, \$1.19; No. 3 do., \$1.09. L \$9.60 per 100 lbs.

WANTED

A teacher for a family school. Address JESSE GARRETT, Willistown Inn P. O., Chester Co., Pa.

A young woman Friend desires a situation as teacher in a small family school. For information address A. H., 302 Arch St., Phila.

FRIENDS' ASYLUM FOR THE INSANE
Near Frankford, (Twenty-third Ward.) Philadelphia.
Physician and Superintendent—JOSHUA H. WOFFINGTON, M. D.

Applications for the Admission of Patients made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting-house, corner of S and Noble streets, Philadelphia, Tenth month 1 1876, JOSEPH E. WRAY, of the city of New York HANNAH B. KITE, of this city.

DIED, on the 23d of Fifth month, 1876, at the residence of her brother James Lee, at Exeter, Berks Pa. MARY E. LEE, aged 86 years, a member and of Exeter Monthly Meeting. She was an example of meekness and humility, a diligent attendee of meetings and a firm believer in the ancient principles of Friends. Her end was calm and peaceful.

PHILADELPHIA.

For "The Friend."

The Life of John Hooper, Bishop of Gloucester.

(Continued from page 98.)

Edward the Sixth died in the 7th month of 1553, and was succeeded by his sister Mary, who was a zealous Roman Catholic. She hastened to reverse the course of her brother an ecclesiastical affairs, and not content with displacing those who favored the Reformation from their positions in the Church, proceeded to condemn many of them as heretics, and caused them to be burnt at the stake. The blood of martyrs is said to be the seed of the church, and we believe it was so in England at that time. The constancy, the faithfulness unto death of those noble witnesses for the truth produced a deep seated effect which time has not obliterated. The fires of Smithfield remain in the memories of men as a continuing protest against Popery.

John Hooper was one of the boldest champions of the Reformation in England, and when the change of government took place his friends warned him that danger was impending. He calmly replied: "Once I did flee and took me to my feet. But, now, because I am called to this place and vocation, I am thoroughly persuaded to tarry, and to live and die with my sheep." On the 1st of the Ninth month, 1553, he was sent to prison, where he continued more than seventeen months, until the time came for his execution. During his imprisonment many efforts were made to induce him to acknowledge the Pope to be the head of the church. To this he replied: "That forasmuch as the Pope taught doctrines altogether contrary to those of Christ, he was not worthy to be accounted as a member of His church; much less to be head thereof." To this position he steadily adhered, notwithstanding all the arguments, promises and threats which were brought to bear upon him. John Fox relates the following incident, which occurred after his third examination before the commissioners. As he was passing out of the building where the examination had been held, in charge of one of the sheriffs, he was a little in advance of John Rogers, who like myself was about to lay down his life for the testimony of a good conscience. "Dr. Hooper looked back, and stayed a little till Mr. Rogers drew near, unto whom he said, Come, brother Rogers, must we two take this matter first in hand, and begin to fry these faggots? Yes, sir, said

Mr. Rogers, by God's grace. Doubt not, said Dr. Hooper, but God will give strength. So going forwards, there was such a press of people in the streets, who rejoiced at their constancy, that they had much ado to pass. By the way, the sheriff said to the bishop, I wonder you was so hasty and quick with my Lord Chancellor, and did use no more patience: he answered, Mr. Sheriff, I was nothing at all impatient, although I was earnest in my Master's cause; and it standeth me so in hand, for it goeth upon life and death, not the life and death of this world only, but also of the world to come." This last expression shows us the secret of the good man's constancy, he "had respect to the recompense of reward" which he was well convinced awaited him in another world.

He was greatly grieved at a false rumor which was put in circulation, that he had recanted: To counteract the evil that might result from this statement, he put forth a letter of denial, about one week before his death, in which he says: "You that may send to the weak brethren, pray them that they trouble me not with such reports of recantations as they do. For I have hitherto let all things of the world, and suffered great pains and imprisonment, and I thank God I am as ready to suffer death, as a mortal man can be. It were better for them to pray for us, than to credit or report such rumors that are untrue. We have enemies enough of such as know not God truly. But yet the false report of weak brethren is a double cross. * * * I have taught the truth with my tongue, and with my pen heretofore, and hereafter shortly shall confirm the same, by God's grace, with my blood."

The letters which have been preserved of John Hooper's, manifest such a truly Christian spirit, as is refreshing to meet with. There is no harsh denunciation of his persecutors; but while he recognizes the wickedness of their doings, he is filled with pity for them. Thus in an acknowledgment to those friends in the city of London who had relieved his necessities while in prison, he uses this language: "Such as have taken all worldly goods and lands from me, and spoiled me of all that I had, and have imprisoned my body, and appointed not a half penny to feed or relieve me withal; but I do forgive them and pray for them daily in my poor prayer unto God, and from my heart I wish their salvation, and quietly and patiently bear their injuries, wishing no further extremity to be used towards us. Yet if the contrary seem best unto our Heavenly Father, I have made my reckoning, and fully resolved myself to suffer the uttermost that they are able to do against me, yea, death itself, by the aid of Christ Jesus, who died the most vile death of the cross for us wretches and miserable sinners. But of this I am assured, that the wicked world, with all their force and power, shall not touch one of the hairs of our heads

without leave and license of our Heavenly Father, whose will be done in all things." "Dearly beloved, if we are contented to obey God's will, and for His commandments' sake to surrender our goods and lives to be at His pleasure, it maketh no matter whether we keep goods and life or lose them."

On the 4th of the Second month, 1555, he was formally "degraded" from the priestly order by the Bishop of London, and handed over to the secular power to be executed. The ceremony consisted in first clothing him with all the vestures and ornaments usually worn by a Catholic priest in the performance of his services. Being thus apparelled, the bishop who presided first plucked off the outermost vesture, and so in order down to the lowest vesture; and so being stript and deposed, he declared him to be deprived of all order, benefit and privilege belonging to the clergy. That same evening, his keeper informed Hooper that he was to be sent to Gloucester, where he had labored so earnestly, to suffer death; "whereat," says Fox, "he rejoiced very much, lifting up his eyes and hands unto heaven, and praising God that He saw it good to send him amongst the people, over whom he was pastor, there to confirm with his death, the truth which he had before taught them; not doubting but the Lord would give him strength to perform the same to His glory; and immediately sent to his servant's house for his boots, spurs and cloak, that he might be in readiness to ride when he should be called.

The next day following, about four o'clock in the morning, before day, the keeper with others came to him and searched him, and the bed wherein he lay, to see if he had written anything, and then he was led by the sheriffs of London and their officers, from Newgate to a place appointed, not far from St. Dunstan's church in Fleet street, where six of the Queen's guard were appointed to receive, and carry him to Gloucester. Which guard brought him to the Angel [inn], where he brake his fast with them, eating his meat at that time more liberal than he had used to do a good while before. About break of day he leaped cheerfully on horseback without help, having a hood upon his head, under his hat, that he should not be known, and so he took his journey joyfully towards Gloucester.

On the Thursday following, he came to a town in his diocese called Cirencester, fifteen miles from Gloucester, about eleven o'clock, and there dined at a woman's house who had always hated the truth, and spoken all the evil she could of bishop Hooper. This woman, perceiving the cause of his coming, showed him all the friendship she could, and lamented his case with tears, confessing that she before had often reported, that if he were put to the trial, he would not stand to his doctrine.

After dinner, he rode forwards, and came to Gloucester about five o'clock, and a mile without the town was much people assem-

bled, who cried and lamented his state; inasmuch that one of the guard rode post into the town, to require aid of the mayor and sheriffs, fearing lest he should have been taken from them. The officers and their retinue repaired to the gate with weapons, and commanded the people to keep their houses, &c., but there was no man that once gave any signification of a rescue or violence. He lodged at one Ingram's house in Gloucester, and that night (as he had done all the way) he did eat his meal quietly, and slept his first sleep soundly, as it was reported by the guard and others. Next his first sleep, he continued in prayer, until morning; and all the day, except a little time at meals, and when conversing with such as the guard permitted to speak to him, he spent in prayer.

Among these was Sir Anthony Kingston, an old acquaintance, who burst into tears, when he saw the shop, and expressed his sorrow; and advised him to consider that life is sweet, and death is bitter. Therefore seeing life may be had, desire to live; for life hereafter may do good. To this Hooper replied, "Indeed it is true, Mr. Kingston, I am come hither to end this life, and to suffer death here, because I will not gainsay the truth that I have heretofore taught amongst you in this diocese, and elsewhere; and I thank you for your friendly counsel, although it be not so friendly as I could have wished it. True it is, that death is bitter, and life is sweet; but, as I consider that the death to come is more bitter, and the life to come is more sweet. Therefore for the desire and love I have to the one, and terror and fear of the other, I do not so much regard this death, nor esteem this life; but have settled myself, through the strength of God's Holy Spirit, patiently to pass through the torments and extremities of the fire now prepared for me, rather than to deny the truth of His word; desiring you and others, in the meantime, to command me to God's mercy in your prayers." They parted with tears on both sides, and at his departure, Hooper told his friend that all the troubles he had sustained in prison, had not caused him to utter so much sorrow.

"The same day in the afternoon, a blind boy, after long intercession made to the guard, obtained leave to be brought into Dr. Hooper's presence. The same boy not long before had suffered imprisonment at Gloucester for confessing of the truth. Dr. Hooper, after he had examined him of his faith, and the cause of his imprisonment, beheld him steadfastly, and (the water appearing in his eyes) said unto him, 'Ah! poor boy, God hath taken from thee thy outward sight, for what reason He best knoweth; but He hath given thee another sight much more precious, for He hath endued thy soul with the eye of knowledge and faith. God give thee grace continually to pray unto Him, that thou lose not that sight, for then would'st thou be blind both in body and soul.'"

(To be concluded.)

Tobacco and Thirst for Strong Drink.—Dr. N. S. Davis, of Chicago, concludes an able article upon the "Influence of Tobacco on the Human System," as follows:—

"In comparing the effects of tobacco with those of alcohol, we find both exerting a sedative influence over nerve sensibility, but the first spends its force mainly upon the vasomotor and ganglionic nerves connected with

the functions of organic life, while the latter acts more directly on the brain and nerves of animal life. Hence the first, when taken in poisonous doses, destroys life by cardiac paralysis or syncope, and the latter either by cerebral insensibility or apnea.

"The primary influence of tobacco is limited to the nerve structures, influencing secretion, assimilation, nutrition, and disintegration only by indirection; while alcohol extends its direct action to the properties of all other structures as well as those of the brain, and modifies tissue changes as directly as it does cerebral sensibility.

"We find nothing in our reading or clinical observations which sustains the idea that these agents are antagonistic, or that the effects of one antagonize those of the other. On the contrary, we have long been satisfied that the thirst, coupled with the sense of uneasiness in the chest and cardiac region, accompanying the use of tobacco, constituted one of the most active incentives to the use of alcoholic drinks.

"And yet, so far is the one from antagonizing the effect of the other that the use of both undermines the health of the individual more rapidly and certainly than the same amount of either would alone."—*Late Paper.*

For "The Friend."

Richard Shackleton.

Although a true father in Israel, and one who was eminently gifted by the great Head of the Church with spiritual discernment, and wisdom which is from above, and who was a wise counsellor, and one whose friendship was greatly prized, there seems to have been left on record but a very brief account of the life of Richard Shackleton. But his letters which have been offered for perusal, loudly proclaim to the attentive reader the bent of the writer's mind, and they cannot fail to bring before us the fact, that he was as a "bright and shining light" in the world; shedding forth among his fellow probationers, those bright rays which spread far and wide, proving to the beholder that his candle was not hid under a bushel; so that others seeing his good works, might be led to glorify our Father which is in heaven.

A short sketch of his life, as penned by the hand of his daughter Mary Leadbeater, is offered to the readers of "The Friend," believing it might be new to some, as well as prove instructive to all.

"Richard Shackleton was born in Ballitore, Ireland, on the 9th of Tenth month, 1726. His grandfather, whose name he bore, was a native of Yorkshire, where he married, in the year 1683, Sarah Briggs.

"When Richard Shackleton was but five years old, his heart experienced the touches of Divine love; and he sometimes withdrew to a retired spot, where he poured out his soul in prayer, and was permitted to approach Him who said, 'Suffer little children to come unto me.' Often did he look back upon this time, and the scene of these early aspirations which seemed hallowed in his view. It was a precious period of his life when he was led to enter into covenant with his Maker, when he walked out alone with his Bible, and poured out his prayers and his tears, being favored with that heavenly feeling which surpasses every other enjoyment; and this tenderness continued, with very little interruption, to

operate on his mind till the sixteenth year of his age.

"On his arrival at this critical period of life, the levity incident to youth, and his natural vivacity, drew him, in degree, fit that watchfulness enjoined by the highest authority, and on which our safety and happiness depend; and though preserved within the bounds of morality, the religious sensibility experienced in early life was weakened. This lapse, though it had been long recovered, he regretted, when about to close his explanatory life. He was very diligent in seeking after improvement in literary knowledge, and, while yet a child, was able to assist his father (in his boarding school.) For this purpose he spent some time in Dublin attending lectures at the college, and learning the Hebrew language. The pious care exercised over him, when absent from his parents, was apparent by the following extracts from letters written to him by his father. 'Keep thy mind as quiet as possible, so that thou mayest have benefit of this little tour. I desire thou mayst have thy eye to Him that hath preserved, in some degree, him that writeth as is his chiefest joy. Next to that, my joy that mine may walk acceptably before Him. Durable riches, I know, and honors are in His right hand, which he dispenses impartially in His own fit time.—1744. We are very desirous of seeing thee at home, for several reasons; and yet very loath to interrupt thee in that in which thou proposest to thyself; advantage, or, at least, a satisfaction; for the mayst assure thyself, whilst thou continue to eye the best things, thou art and wilt be near me.

"My dear son, that gracious Hand that dispenses Divine favors liberally, hath not been wanting to my mind—since thou left us, and thou hast been nearly remembered by me, and my desires are, that thou mayest often participate of those riches and treasure that add no sorrow, but give the soul dominion over all lower enjoyments. This sifting, winnowing, purging, cleansing Hand, that would make room for itself—that would leave nothing but the pure, weighty grain—bring every thought, word and action to judgment; may it be attended upon, and, when retired and withdrawn, patiently waited for. Experience tells us here, too, that the prodigal must know want.—1748.

"Thou hast been pretty much in my mind since we parted, and I have often remembered that portion of Scripture: 'The refining pot is for silver, and the furnace for gold.' Various are the probations that are permitted to fall to our share, in this vale of tears. I cannot think but, if it be not our own fault, they may turn to our lasting advantage, in purging away the dross, the tin, and the reprobat silver. The more deep the trials, the more severe and heavy the refining, reforming Hand presses on our souls, the more high they may rise in acceptance, and have the more sensible enjoyments; and then may the soul bow, in the depth of humility, to the Root, and know its dependence on that from whence living nourishment springs. Surely the all-wise God hath, for a wise and blessed end, dispensed day and night to our souls, as well as to the outward creation, to engage and enamor our souls to love Him.—1748."

"On the 21 of Second month, 1749, Richard Shackleton was married to Elizabeth, younger daughter of Henry and Deborah Fuller.

they settled in a pleasant dwelling in the large near their parents, who looked forward with joyful hope to future prospects for their children, whom they beheld walking in the path which leads to happiness.

"About this time a little band, young in years but increasing in the experience of those things which belong to peace, became closely united. Amongst these Mary Peisley, Samuel Neale, Elizabeth Pike, Richard Hackleton and his wife, and Elizabeth Carleton, often met and were a strength and encouragement to each other. Their union is expressed thus in a letter from Richard Hackleton to Samuel Neale: 'My cry was to-day, dear friend, for us who are young, who are known by one another to have good desires begotten in us for the blessed cause, that we might be preserved and plentifully filled with Divine wisdom, of which I saw a great necessity, that the Lord would take us, being children, and teach us himself; and that we might be drawn into near unity with one another.' Samuel Neale who had been forgiven much, loved much; and having been obedient to the heavenly vision, became a vessel of honor, replenished with good, and pouring it forth for the refreshment of others. He was one who, remembering the trials which attended youth, compassionated them; and in advanced life, his winning affability towards young persons, his fatherly love and care, his heart and house open to receive them, made a deep impression on their minds, from which many received lasting advantage."

(To be continued.)

The Sticklebacks.

Our New York Aquarium publishes a very attractive semi-monthly journal, full of instructive entertainment derived from the manners and customs of the aquatic residents on the corner of 35th street and Broadway. Among these, few are more interesting than the little nest builders who are thus described:

"Having first chosen the site, which may be some secluded little moss covered retreat among the pebbles or the branches of some hardy sea plant, the Stickleback begins the collection and arrangement of the materials out of which the nest is made; these consist of the delicate little leaves and branches of sea weed which abound in all ponds, lakes, or even in the great ocean. With these the work of nest building is begun and completed—the only instrument used being the mouth and active little nose of the builder. First comes a bit of tangled weed for a foundation, which is held in place, it may be, by some bits of straw that a favoring breeze has cast upon the water, and which serves in the place of the beams and rafters. By the aid of these few simple materials, many of them brought from a distance in the mouth of the builder, the nest is completed, and when finished has the appearance of a little green puff ball or thistle bud. On one side, or at the top, a small opening is left, and within is a soft green bed for the reception of the eggs. These eggs, when first laid, are of a yellow color and about the size of the smallest dust shot or poppy seeds. As they approach maturity they turn to a darker color. Mr. Couch, in his History of British Fish, gives a very interesting account of personal observations which but serve to confirm the claim we have

set up for the superior skill and wisdom of the Stickleback. He tells us that in a large dock for shipping on the river Thames thousands of Sticklebacks were bred, and he often amused himself for hours observing them. While multitudes were enjoying themselves near the shore in the warm sunshine, others were busy making their nests. This consisted of the very minutest pieces of straw or sticks, the exact color of the ground at the bottom of the water on which they were laid, so that it was next to impossible to discover the nest unless they saw the fish at work, or observed the eggs. The nest is somewhat larger than an English shilling and has a top or cover with a hole in the centre, about the size of a hazel nut, in which are deposited the eggs or spawn. This opening is frequently covered or concealed by drawing small fragments over it. It was also observed that the fish used great force in conveying the material to the nest. When it was about an inch from the nest it suddenly darted towards the spot and left the tiny fragment in place, after which it would devote a half a minute or more in adjusting it. One of these nests, when taken up, hung together like wood. In other cases, however, where the materials used in its construction are more delicate, the nest will not bear removal, but when taken from the water falls together like a tangled ball of fine thread.

"It sometimes happens that the Stickleback, like the Sparrow and Wren, avails itself of special contrivances for aiding it in its work. An instance of this came under the notice of the observer above named. A pair of Sticklebacks made their nest in the loose end of a rope, from which the separate strands hung out about a yard from the surface, over a depth of four or five fathoms, and to which materials need only have been brought in the mouth of the fish from a distance of about thirty feet. The nest was formed of the usual aggregation of the finer sorts of green and red sea weed, but these were so matted together in the hollow formed by the untwisted strands of the rope that the mass constituted an oblong ball about the size of a large egg. In this had been deposited the scattered assemblage of spawn, and the whole was bound together with a thread of animal substance which passed through and through in various directions, while the rope itself formed an outside covering. In the case of the Fifteen-spined Stickleback, the eggs, which are very large and of an amber color, are not placed within the nest, but distributed in little pockets throughout the mass.

"If the Stickleback displays an unusual skill and ingenuity in the construction of its nest, it is equally active and zealous in the defence of its home and the protection of the treasure it was designed to contain. Wood informs us that when the Stickleback has fixed upon a spot for his nest he seems to consider a certain area around as his own special property, and will not suffer any other fish to intrude within its limits. He will even dash at a fish ten times his size, and by dint of his fierce onset and bristling spines drive away the enemy. If a cane or branch be lowered within their domain the faithful and brave guardian of his home will dash at it with a force that may be felt along its whole length."—*New York Observer*.

From the "Guiding Hand."

Dr. Bond's Vision.

Among the consequences resulting from the predicted outpouring of the Holy Spirit in the last days, it was declared that "your young men shall see visions and your old men shall dream dreams." And though this scripture seems almost abandoned to the mercy of enthusiasts and fanatics, yet the numerous "visions and revelations of the Lord" recorded in the books of the New Testament, as well as in the annals of the church of Christ in all ages, afford sufficient and convincing evidence that this word of the Lord was never spoken in vain, but has received, and may be yet receiving, an abundant fulfillment; and that, not among the fanatical and extravagant and half-crazed followers of new notions and strange doctrines, but among those whose piety, sobriety, intelligence, and usefulness, mark them as chosen vessels to bear the words of Christ to the perishing sons of men.

In an obituary notice of Dr. Thomas E. Bond, which was published, shortly after his death, in the columns of *The Christian Advocate*, of which he had been for several years the editor, there was recorded the following remarkable vision in the early history of this celebrated itinerant preacher. The writer mentions it as "A very extraordinary incident in the life of Dr. Bond. His truth is, however, beyond question. The circumstances forbid the supposition of optical illusion or temporary hallucination. There are those living who testify to such of the facts as were subject to observation, and the memorials of the transaction are yet distinctly preserved in the religious character of sons and daughters of some who were immediately affected by it."

"Being on a visit to his father, he was deeply grieved to find the church, which he had left in a state of prosperous activity, languishing, lukewarm and weak. His thoughts were much occupied with the subject, and of course, it was the matter of earnest and frequent prayer. In this state of mind, one morning, he was walking over the fields to a neighboring house, when suddenly he seemed to be in a room where a number of people were assembled, apparently for worship. The room he recognized as an apartment in the house of a neighbor, where a prayer meeting was to be held on the evening of that day. Had he stood in the midst of it he could not have been more conscious of the scene. There was nothing of the dim, or shadowy, or dreamy about it. He recognized the people, noticed where they sat and stood, remarked his father near the table, and which a preacher was rising to give out a hymn, and near the middle of the congregation he saw a man named C., for whose salvation he felt particular anxiety, standing with his son beside him. While gazing with astonishment upon the scene, he heard the words, 'Go and tell C. that he has an offer of salvation for the last time!'

"Naturally supposing that the too great concentration of mind upon one subject had induced some hallucination of the senses, Dr. Bond fell down on his knees and besought God to preserve his reason. The scene, however, continued; it would not disappear nor change in any of its particulars. In vain he struggled to dispel it; the voice yet repeated with indubitable distinctness, 'Go and tell C. that he has an offer of salvation for the last time.' Yet how would he dare to deliver so awful a message! For a great length of time

he struggled for deliverance from what he still considered an illusion. At length an expedient occurred to him which he adopted. He had never been in the room in which he was apparently present, when it was used for a religious meeting. He, of course, did not know how it was commonly prepared for such occasions. He therefore noted with great care the particulars of the scene. He saw where the little table for the preacher, the benches and chairs for the people, were placed. He noticed his acquaintances, and where they sat and stood, and when he was satisfied that he had possessed himself perfectly of these details, he said, 'I will go to this meeting, and if I see things there to correspond with what I now see, it shall be as a sign from the Lord, and I will deliver the message.' Immediately the scene vanished, and he was alone in the green fields.

"With a spirit indescribably agitated he returned home, where he found ladies who required him to escort them a long distance, and it was somewhat past the hour fixed for the meeting when he reached the awful place. During the day he had freely indulged the hope that on his entrance into the room his trouble would disappear. He thought he had been the subject of an illusion, the fruit of an excited brain, and that a want of correspondence immediately to be detected between the real scene and the one presented to his disordered fancy, would at once satisfy him as to the morbid character of his morning vision, and release him from the obligation of delivering the terrible message with which he was conditionally charged. When he opened the door, however, he saw again, in all its minuteness of detail, the morning scene. In vain he searched the room for a variant particular. There sat his father in the designated place. The preacher at the table was rising to give out the hymn. In the midst of the room stood C., with his son beside him. Everything demanded that the message should be delivered.

"After the preliminary exercises, he rose and stated the circumstances as we have related them, and then going to C., he laid his hand upon him, and repeated the words he had heard. The effect was indescribable. C. and his son fell down together and called upon God. An awful solemnity rested upon all present. Many cried for mercy, and from that time began a revival of religion which spread far and wide; the fruits of which are yet seen, after many days.

"In the midst of this extraordinary scene, the father of Dr. Bond, who was too deaf to hear his words, sat an anxious observer. He was a calm man, whose Quaker education had not lost its influence over his religious character and views. After the meeting he asked Thomas what he had said to produce such an effect. He frankly told him all. The old man mused a while and said, 'You did right.'"

Bible Societies.

For "The Friend."

The British and Foreign Bible Society was formed in 1804. It was organized by a union of all denominations, including Friends. Since that period it has circulated more than 100,000,000 copies of the Scriptures published in 200 different languages. In the 13th century a bible cost in England £30, or \$150. The Roman Catholics for a time cooperated with the British and Foreign Society in distributing bibles by a branch Society at Ratisbon, in

Germany, but this society was abolished by a Papal bull in 1817.

The first Bible Society established in the United States was the Philadelphia Bible Society, in 1808. The American Bible Society was established in New York in 1816. Its receipts the first year were about \$38,000, and in the year 1872, \$690,000. In 1816 it issued 6410 copies, in 1872 over 1,000,000. Its auxiliaries numbered 2000, in 1873, with about 5000 branch organizations.

In the years 1829, 1856, and 1866, the American Bible Society undertook to supply a copy of the Bible to every family in the United States. It has prepared and published the whole Bible in raised letters for the blind, at a cost of \$20 a copy. From 1816 to 1872, its total receipts were about \$15,000,000, and the aggregate number of volumes issued by it 28,780,000.

HAZEL BLOSSOMS.

By J. G. WHITTIER.

The summer warmth has left the sky,
The summer suns have died away;
And withered, in the foothills lie,
The fallen leaves—but yesterday
With rubly and with topaz gay.

The grass is browning on the hills;
No pale, belated flowers recall
The astral glories of the hills,
And drearily the dead vines fall,
Frost-blackened, from the roadside wall.

Yet, through the gray and sombre wood,
Against the dusk of fir and pine,
Last of their lordly sisterhood,
The hazel's yellow blossoms shine—
The tawny gold of Afric's mine.

Small beauty hath my unsung flower,
For spring to own or summer hail;
But in the season's saddest hour,
To skies that weep and winds that wail,
Its glad surprisals never fail.

O, days grow cold! O, life grown old!
No rose of June may bloom again;
But like the hazel's twisted gold,
Through early frosts and latter rain,
Shall hints of summer-time remain;

And as within the hazel's boughs
A gift of mystic virtue dwells,
That points to golden ores below,
And in dry, desert places tells
Where flow unseen the cool, sweet wells;

So, in the wise diviner's hand,
Be mine the hazel's graceful part,
To feel, beneath a thorny land,
The living waters thrill and start,
The beating of the rivulet's heart!

Sufficeth me the gift to light
With latest bloom the dark, cold days;
To call some hidden spring to sight,
That in these dry and dusty ways
Shall sing its pleasant song of praise.

O love! the hazel wand may fail;
But thou canst lend a surer spell,
That, passing over Bica's vale,
Repeats the old-time miracle,
And makes the desert land a well.

A Kind Word.—On a certain Sabbath evening some twenty years ago, a reckless young man was idly loitering under the elm-trees in the public square of Worcester. He had become a wretched wail on the current of sin. His days were spent in the waking remorse of a drunkard; his nights were passed in the buffooneries of an ale house. As he sauntered along, out of humor with himself and with all mankind, a kind voice saluted him. A stranger laid his hand on his shoulder, and said in cor-

dial tones, "Mr. Gough, go down to our meeting at the town hall to-night." A brief conversation followed, so winning in its character that the reckless youth consented to go. I went; he heard the appeals there made. With tremulous hand he signed the pledge of total abstinence. By God's help he kept it, as keeps it yet. The poor boot crimp who tapped him on the shoulder, good Joel Stratte, has lately gone to heaven. But the youth I saved is to-day the foremost of reformers of the face of the globe. Methinks when I list to the thunders of applause that greet Job B. Gough on the platform of the Academy of Music I am hearing the echoes of that tap on the shoulder, and of that kind invitation under the ancient elms of Worcester. "He that winneth souls is wise."—*T. L. Cuyler.*

For "The Friend."

Climatology of Florida.

In an address on the climatology of Florida, recently delivered by Dr. Baldwin, the author gives some interesting statistics, whose value is indicated by the fact that they are based on thirty-six years' meteorological observations, recorded by himself, at Jacksonville together with numerous shorter records from the stations in other portions of the State. He states that the first frost has occurred in the fall in October four times in the course of these records, in November sixteen times and in December seven times. There have been several years in which there have been no frosts in October. There have been three years in which none has occurred in November nor December. Of late frosts he says that there have been very few in April, and none after that. The latest on record is that on the 28th of April, 1858. There have been but four Aprils and but four Octobers in which frosts have been recorded. From these statements an idea can be formed of the average amounts of freezing weather in winter. Frosty days occur on the average about five days in each of the months of December and January. As to clear days, he states that from November to March, there is an average of twenty clear days per month; but for June, July, August, September and October an average of from seventeen to nineteen days. Of rainy days there are in January six or seven, in February three or four, in March five or six, and in December, five. "I judge," Dr. Baldwin says, "that on the whole, the preponderance of clear over rainy and cloudy days speaks decidedly in favor of our climate as being characterized by a fair amount of pleasant weather. The excessively cloudy weather of January, 1875, is a marked exception to all former years since my residence in Florida, and has most probably resulted from some general disturbance of the atmosphere, which has produced such intense cold in the Northern States as will probably be remembered hereafter as one of those cold winters which at long intervals will visit a country, and which on many accounts may be considered as a "blessing in disguise."

A person converted in youth is like the sun rising on a summer's morning to shine through the long bright day. But a person converted late in life is like the evening star, a lovely object of Christian contemplation, but not appearing till the day is closing, and then but for a little while.

Subject.

the Volcano of Kilauca in the Island of Hawaii.

[The following account of a visit to this volcano is taken from Norrihoff's Northern California, Oregon, and the Sandwich Islands.] The great crater of Kilauca is nine miles circumference, and perhaps a thousand feet deep. It is, in fact, a deep pit, bounded on all sides by precipitous rocks. The entrance is effected by a series of steps, and below these by a scramble over lava and rock débris. It is not difficult, but the ascent is tiresome; and it is a prudent precaution, if you be ladies with you, to take a native man for each lady, to assist her over the rougher places, and up the steep ascent. The greater part of the crater was, when I saw it, a mass of red, though not cold lava; and over this you walk to the farthest extremity of the pit, where you must ascend a tolerably steep hill of lava, which is the bank of the fiery lake. The distance from the Volcano House to the edge of this lake is, by the road you take, three miles. The goddess Pele, who, according to the Hawaiian mythology, presides over Kilauca, as some say all her sex are, variable, changeable, mutable. What I shall tell you about the appearance of the crater and lake is true of that time; it may not have been correct a week later; it was certainly not over a month before. We climbed into the deep pit, and then stood upon a vast floor of lava, rough, jammed together, broken, jagged, emanating out a hot sulphurous breath at almost every seam, revealing rolls of later lava ejections at every deep crack, with cavernous and high ridges where the great mass, after boiling, was forced together, and with a steep mountain-side of lava at our left, along the foot of which we clambered.

This floor of lava, which seems likely to be more or less permanent feature, was, three or four years ago, upon a level with the top of the high ridge, or ledge, whose base you skirt. The main part of the crater was then a floor of lava vaster even than it now is. Suddenly one day, and with a crash which persuaded one or two persons at the Volcano House that the whole planet was flying to pieces, the greater part of this lava floor sank down, or fell down, a depth of about five hundred feet, to the level whereon we now walked. The wonderful tale was plain to us as we examined the details on the spot. It was as though a top-heavy and dried-out pierce had fallen in the middle, leaving a part of the circumference bent down, but clinging at the outside to the dish.

After this great crash the lava seems from time to time to have boiled up from beneath through cracks, and now lies in great rolls upon the surface, or in the deeper cracks. It is related that later the lake or caldron at the farther end of the crater boiled over, and sent down streams of lava which meandered over the black plain; that, continuing to boil over at intervals, this lake increased the height of its own banks, for the lava cools very rapidly; and thus was built up a high hill, which we ascended after crossing the lava plains, in order to look down, in fear and wonder, upon the awful sight below.

What we saw there on the 3d of March, 1873, was two huge pits, caldrons, or lakes, filled with a red, molten, fiery, sulphurous, raging, roaring, restless mass of matter, to watch whose unceasing tumult was one of the most fascinating experiences of my life.

The two lakes were then separated by a narrow and low-lying ledge or peninsula of lava, which I was told they frequently overflow, and sometimes entirely melt down. Standing upon the northern bank we could see both lakes, and we estimated their shortest diameter to be about 500 feet, and the longest about one-eighth of a mile. Within this pit the surface of the molten lava was about eighty feet below us. It has been known to sink down 400 feet; last December it was overflowing the high banks and sending streams of lava into the great plain by which we approached it; and since I saw it, it has risen to within a few feet of the top of the bank, and has forced a way out on one side, where, in September, 1873, it was flowing out slowly on to the great lava plain which forms the bottom of the main crater.

What, therefore, Madame Pele will show you hereafter is uncertain. What we saw was this: two large lakes or caldrons, each nearly circular, with the lower shelf or bank red hot, from which the molten lava was repelled toward the centre without cessation. The surface of these lakes was of a lustrous and beautiful gray, and this, which was a cooling and tolerably solid scum, was broken by jagged circles of fire, which appeared of a vivid rose color in contrast with the gray. These circles, starting at the red hot bank or shore, moved more or less rapidly toward the centre, where, at intervals of perhaps a minute, the whole mass of lava suddenly but slowly bulged up, burst the thin crust, and flung aloft a huge, fiery wave, which sometimes shot as high as thirty feet in the air. Then ensued a turmoil, accompanied with hissing, and occasionally with a dull roar as the gases sought to escape, and spray was flung in every direction; and presently the agitation subsided, to begin again in the same place, or perhaps in another.

Meantime the fiery rings moved forward perpetually toward the centre, a new one re-appearing at the shore before the old was engulfed, and not infrequently the mass of lava was so fiercely driven by some force from the bank near which we stood, that it was ten or fifteen feet higher near the centre than at the circumference. Thus somewhat of the depth was revealed to us, and there seemed something peculiarly awful to me in the fierce glowing red heat of the shores themselves, which never cooled with exposure to the air and light.

Thus acted the first of the two lakes. But when, favored by a strong breeze, we ventured farther, to the side of the furthestmost one, a still more terrible spectacle greeted us. The mass in this lake was in yet more violent agitation; but it spent its fury upon the precipitous southern bank, against which it dashed with a vehemence equal to a heavy surf breaking against cliffs. It had under-surfed this lava cliff, and for a space of perhaps one hundred and fifty feet the lava beat and surged into glaring, red hot, cavernous depths, and was repelled with a dull, heavy roar, not exactly like the boom of breakers, because the lava is so much heavier than water, but with a voice of its own, less resonant, and, as we who listened thought, full of even more deadly fury.

It seems a little absurd to couple the word "terrible" with any action of mere inanimate matter, from which, after all, we stood in no very evident peril. Yet "terrible" is the

only word for it. Grand it was not, because in all its action and voice it seemed infernal. Though its movement is slow and deliberate, it would scarcely occur to you to call either the constant impulse from one side toward the other, or the vehement and vast bulging of the lava wave as it explodes its thin crust or dashes a fiery mass against the cliff, majestic, for devilish seems a better word.

Meantime, though we were favored with a cool and strong breeze, hearing the sulphurous stench of the burning lake away from us, the heat of the lava on which we stood, at least eighty feet above the pit, was so great as to be almost unendurable. We stood first upon one foot, and then on the other, because the soles of our feet seemed to be seorching through thick shoes. A lady sitting down upon a bundle of shawls had to rise because the wraps began to seorch; our faces seemed on fire from the reflection of the heat below; the guide's tin water canteen, lying near my feet, became presently so hot that it burned my fingers when I took it up; and at intervals there came up from behind us a draught of air so hot, and so laden with sulphur that, even with the strong wind carrying it rapidly away, it was scarcely endurable. It was while we were conging and spluttering at one of these hot blasts, which came from the numerous fissures in the lava which we had passed over, that a lady of our party remarked that she had read an excellent description of this place in the New Testament; and so far as I observed, no one disagreed with her.

After the lakes came the cones. When the surface of this lava is so rapidly cooling that the action below is too weak to break it, the gases forcing their way out break small vents, through which lava is then ejected. This, cooling rapidly as it comes to the outer air, forms by its accretions a conical pipe of greater or less circumference, and sometimes growing twenty or thirty feet high, open at the top, and often with openings also blown out at the sides. There are several of these cones on the summit bank of the lake, all ruined, as it seemed to me, by some too violent explosion, which had blown off most of the top, and in one case the whole of it, leaving but only a wide hole.

Into these holes we looked, and saw a very wonderful and terrible sight. Below us was a stream of lava, rolling and surging and beating against huge, precipitous, red hot cliffs; and higher up, suspended from other, also red or white hot overhanging cliffs, depended huge stalactites, like masses of fiercely glowing fern leaves waving about in the subterraneous wind; and here we saw how thin was in some such places the crust over which we walked, and how near the melting point must be its under surface. As far as we could judge, these little craters or cones rested upon a crust not thicker than twelve or fourteen inches, and one fierce blast from below seemed sufficient to melt away the whole place. Fortunately one cannot stay very long near these openings, for they exhale a very poisonous breath; and so we were drawn back to the more fascinating but less perilous spectacle of the lakes; and then back over the rough lava, our minds filled with memories of a spectacle which is certainly one of the most remarkable our planet affords.

(To be concluded.)

For "The Friend."

The Last Days of David Sands.

The following notice of the conclusion of the life of this devoted servant of Christ, is taken from the journal of his life and labors.

In the year 1818, the infirmities which now increased upon David Sands, subjected him at times to great bodily pain; but his mind was supported with an unshaken hope that all was well, as respected a future state; saying that he had no fears, except that he might not bear the pains of his departing moments with as much patience as he ought. His greatest anxiety seemed to be for an increase of the kingdom of Christ, and of the religious Society of which he had long been a deeply-exercised member; and to whose religious principles, identical as he believed them to be with genuine Christianity, he was deeply attached. He declared in these solemn moments, that these considerations were dearer to him than his natural life.

About this period a number of Friends met after a Monthly Meeting at Cornwall, to which he belonged; and he requested a religious opportunity with them; when, after communicating suitable counsel and encouragement, he said: "I wish my friends every where to know, that I am like the children of Israel, when passing through the wilderness; my shoes are not waxed old, nor my garments rent; but the same living exercise and travail of spirit that I have witnessed in early life, is yet my experience; and the prayer of my heart often is 'that my sword may remain bright, and that I may go down to my grave in my harness.'" And this his request seemed in a remarkable manner to be granted; and as of the last part of his life was spent in visiting the families of his own particular meeting; and when he had completed this service, he attended the meeting on First-day, and was remarkably favored in testimony, having much to communicate on many subjects, though in great bodily weakness.

When returning home, on passing by the burying-ground, he queried with his wife whether every thing did not appear unusually pleasant; remarking "I do not expect to pass this place again;" and though he was then in nearly his usual health, within a week his earthly course was terminated.

The powers of his mind appeared bright, and his zeal to increase. He often expressed the belief that his time in this world would be very short, and that he wished to improve every opportunity, both public and private, and to encourage all. He knew that nothing could take away the sting of death but freedom from sin and transgression, through the power of the Holy Spirit, and the sprinkling of the blood of Jesus.

His nights were painful; and he was often heard supplicating at the Throne of Grace, that they who sat in darkness, might be brought to have faith in that Divine power which caused the blind to see, and the lame to walk. Thus the exercise of his mind for the good of souls continued almost to his latest moments.

On his return home from the last meeting he attended, he said he had taken a final leave of the meeting; but that there were a few individuals on whose account he still felt some anxiety, as they were not enclosed within the pales of our church. But that his prayers were, that others might be raised up to feel for those, and to bear the weight of his con-

cern, and labor with them. He feared that many felt a disposition to withdraw their necks from under the yoke of Christ; and that though he should be removed from works to rewards, he believed the cause would make progress, though many might "fall out by the way;" but the Truth was the same that it ever was, and that all who were clothed with it, would rise superior to all the power of an unwearied adversary.

He remarked that he had never felt such happiness before,—that he felt himself surrounded with heavenly spirits,—that his sensations surpassed description. "I think," said he, "that some great change will soon take place with me. Come life or come death, my joy and happiness seem complete. My cup this day has been made to overflow. I never experienced such a meeting as I have had this day."

On Second-day morning he was very feeble, and his general appearance indicated the approaching change. It was proposed to call in a physician, to which he consented; but said it was to gratify his friends, for he considered his case beyond the reach of medicine. He remarked that his day's work was done, that he had nothing more to do, as respected a future state, he had not left his concern for that, to a dying hour. He desired that all mankind would be willing to follow as he had. "Behold, I have left all to labor thee, the only true God; and thee alone have I worshipped and adored. Thou hast been my morning song; and my evening prayer has been to thee. How is my soul replenished with thy sovereign grace! Thou hast preserved me by sea and land. Thou hast never forsaken me though my trials have been many." He proceeded to speak of his experience, saying: "I have also been persecuted by false brethren, and many proving dispensations have been allotted to me; but blessed are they who are persecuted for Christ's sake. I have rejoiced that I was found worthy to suffer in so glorious a cause. If I know my own heart, from the commencement of my religious exercises, I have preferred the experience of the mercies of a gracious God, to all other things. By him have I leaped over the walls of opposition that at times have encircled my path. But now the time draws nigh; the curtains of the evening of this life will soon be drawn. I have many precious friends who will lament my loss; and I am sensible that I have had their tender sympathy, though many of them are in a far distant land; yet I seem to feel their tender spirits hovering round my dying bed. But I must resign them with a confident hope of ere long meeting them in the realms of endless bliss."

In the afternoon, a neighbor who frequently attended meeting, called and was desirous to see him; but feeling too feeble he objected to engage in any further labor, aware that probably he might feel anxious to say something to him; but on reflecting a little, he seemed desirous to see him. When he was introduced, David Sands made some very close remarks advising him to pursue for the future a different course of conduct, if he wished for happiness here or hereafter. After he left, David Sands observed that he had been closely tried, but found he must not withhold what presented, probably it might be the last of his labors; and so it proved, except in his own family.

He had often expressed a desire that he might be released from the suffering of a bodily pain in the closing hour; and he was favored to have his desire granted. In much quietness and composure he breathed his last like one falling into a sweet sleep, on the fourth day of the same week, being the 4 of the 6th mo. 1818. He was aged seven-two years and eight months, and had been minister about forty-four years.

From the "New York Tribune."

The Arctic Expedition.

London, Friday, Oct. 27, 1876.

A telegram has been received at Portsmouth from Valentin announcing the return homeward of the British Arctic expedition under Capt. Nares, comprising the nav steamers Alert and Discovery. Progress to the North Pole was found to be impracticable. Capt. Nares reports that no land could be discovered to the northward of the highest latitude reached, namely, 83° 20'; but other respects the expedition was successful. The Alert and Discovery left Port Foul on July 29, 1875, and entered the ice off Cape Sable. After a severe and continuous struggle they reached the north side of Lady Franklin Bay, where the Discovery was left in winter quarters. The Alert pushed on and reached the limit of navigation on the shore of the Polar Sea. The ice varied in thickness being in some place 150 feet deep. Presider Land does not exist.

The Alert wintered in latitude 82° 27'. At this point the sun was invisible 142 days, and a temperature the lowest ever recorded was experienced. A detachment with sledges was dispatched northward. It was absent 70 days and reached latitude 83° 20'. Another party rounded Cape Columbia, the northernmost point of America, and traced 220 miles westward from Greenland, and also explored farther to the eastward. These sledge parties met with no game, and suffered from scurvy. Hans Petersen died from frost-bite. John Porter of the Alert, and James Hans and Charles Paul of the Discovery died on the sledging expeditions. No Esquimaux were seen, nor were any icebergs met with beyond Cape Union.

The expedition encountered great difficulties in returning. The Alert's rudder-bolt was damaged. The vessels left Smith's Sound Sept. 9. They signaled the Pandora Oct. 16 all well. The Alert parted from the Discovery in a gale on Oct. 19. During the sledging journey the ice was so rugged that it was only possible to advance a mile a day. During the winter rich collections in the department of natural history were made, and many valuable scientific observations were taken. Excellent coal was found near the place where the Discovery wintered. The expedition experienced the coldest weather ever registered, the temperature being 59 degrees below zero for a fortnight, and falling once to 104 degrees below freezing point. The health of the crews, with the exceptions, already mentioned, has been good. Frost-bites were severe but not numerous. Petersen, the interpreter, died in 40 days after both feet had been amputated for frost-bite.

All the members of the expedition declare it impossible to get nearer the Pole than their northern exploring party, which penetrated to within 400 miles of it. On the return from their sledge journeys the men were in a very

happened condition, and it was necessary to carry some of them on the sledges. The packing of the Alert was much damaged by the ice.

Interesting Details of the Attempt to Reach the Pole—A Tribute to Capt. Hall.

London, Monday, Oct. 30, 1876.

A narrative of the Arctic Expedition is published. It relates that after first encountering ice the expedition was detained several days in Port Prager. It started thence on Aug. 8, but before reaching the shore of Finneell Land the vessels were caught in an ice-pack. After this their progress northward was an incessant struggle through narrow openings made in the ice by wind and current, the channel through which the ships were constantly closing behind them. The discovery wintered in a well sheltered harbor on the west side of Hall's Basin, a few miles north of Polaris Bay. The Alert pushed forward and rounded the northeast point of Grant's Land, but instead of finding as expected, a continuous coast a hundred miles toward the north, she found herself on the border of an extensive sea, with impenetrable ice on every side and no harbor. The ship watered behind a barrier of grounded ice close to land.

The floating masses of thick polar ice had in meeting pressed up the masses of intermediate ice into blocks frequently a mile in diameter and varying in height from 10 to 50 feet. Obstacles of this kind destroyed all hope of reaching the Pole by sledges before the attempt was made. The sledge party was obliged to make a road with pickaxes nearly half the distance it traveled. As it was always necessary to drag the sledge loads by stalments, the party really traversed 276 miles, although it only progressed 73. All the ice cairns erected by the Polaris expedition were revisited. At the boat depot in Newman's Bay a chronometer was found in perfect order. The heat left by the Polaris was successfully blown aboard the ship.

When at Polaris Bay the Discovery hoisted the American flag and fired a salute as a token of respect to the brave men who were buried under a brass tablet with the following inscription as fixed on the grave of Capt. Hall;

"Sacred to the memory of Capt. Hall of the Polaris who sacrificed his life in the advancement of science. This tablet is erected by the British Polar Expedition, who following his footsteps have profited by his experience."

Two sailors of the Greenland sledge party were buried near Capt. Hall's grave. The offerings of the sledge parties from scurvy were frightful. The expedition under Markham and Parr, which endeavored to reach the Pole, consisted of seventeen persons. Nine became utterly helpless, and had to be carried on sledges. Three could barely walk, and were unable to pull.

Selected for "The Friend."

5th mo. 1st, 1837. Our friend, Joseph Gibbons, who, for many years has been a member and minister in our meeting, died this afternoon, after an illness of several weeks. My wife and myself called the day before his death to make inquiry after him, and being invited into his room, saw that a great change had taken place. He labored for breath, and could say but a little at a time. He remarked, that the work was finishing,

and that she believed he would soon be released from his sufferings. He added, he believed the Lord would deliver him out of all his troubles; that the wedding garment was nearly completed, and that he would soon be permitted to join his beloved companion, who had recently gone before. Soon after, he said, "Lord, now lettest thou thy servant depart in peace, for mine eyes have seen thy salvation." Oh blessed and glorious conclusion to come to, through the mercies of God in Christ Jesus our Lord. I am a poor unworthy creature; it is all through mercy, unmerited mercy, unworthy as we are." He expressed much love for us, and took an affectionate leave, saying, "may the Lord bless and preserve you to the end of the race; to the coming of our Lord and Saviour Jesus Christ." On taking him by the hand I said, I trusted it would not be long before he would be released from all his sufferings; he replied, "we must be resigned and wait the Lord's time." He departed the next afternoon, in the seventy-fifth year of his age.—*From William Evans' Journal.*

Maxims for Young Men.—Time is gold; throw not one minute away, but place each one to account.

Do unto all men as you would be done by. Never put off till to-morrow what can be done to-day.

Never bid another do what you can do yourself.

Never covet what is not your own. Never think any matter so trifling as not to deserve notice.

Never give out what does not come in. Do not spend, but produce.

Let the greatest order regulate the actions of your lives.

Selected.

Dependence on Divine Providence.

"The eyes of all wait upon thee, and thou givest them their meat in due season. Thou openest thy hand, and satisfiest the desire of every living thing. It will fulfil the desire of them that fear him; he also will hear their cry, and will save them.—Ps. cxlv. 15, 16, 19. See also Ps. cv. 25."

Who considers these words enough! The hand of God being my chief provision and storehouse, is it not a shame to be anxiously careful for anything? Has the Lord all things in His hand?—then surely I shall receive what he has for me; none will be able to withhold it. Faith has always a free access to the treasures of God, who is never wanting. Christians have their chests and treasures in such a high place, even in God, that no thief can rob them, and they are sure to have enough in God; and though the Lord should try them with want a little while, yet he relieves them in due time; their bread most rain from heaven rather than they should be left without.

You need not, says Christ, seek these other things, they shall be brought to you if you only abide in me.

If this does not comfort and strengthen us nothing else will. Now, many rely on their full pockets and purses, but if they had true faith, it would be enough that they believed and had it in God's hand, purse and chest.

If the Lord is pleased to bestow some provision on his servant, he is very thankful for it, and is careful to apply it well. But if God

thinks proper to deny it him, he is content and cheerful.—*Bojatzky's Golden Treasury.*

THE FRIEND.

ESTABLISHED MONTH 18, 1876.

We have received a copy of the printed Minutes of Indiana Yearly Meeting, which convened 9th mo. 27th last, from which we make the following extracts of its proceedings. Charles F. Coffin was appointed Clerk, and Douglass Clark and Levi Mills, assistants.

By the epistles from the Yearly Meetings on this continent, we are not informed of the concurrence of any of them in the proposition submitted to them by our last Yearly Meeting for a conference of committees on the condition of Friends of Philadelphia Yearly Meeting, who are in harmony with their brethren of other Yearly Meetings; although we learn verbally that Iowa Yearly Meeting has concurred in such appointment, and by the epistle from Baltimore Yearly Meeting, that the consideration of the subject was postponed until their next Yearly Meeting.

"Inasmuch as several of the Yearly Meetings have declined to unite in such appointment, our committee appointed at last Yearly Meeting is released and the subject dismissed."

The following post-script to the Epistle from Western Yearly Meeting has been received and read, viz: "At Western Yearly Meeting of Friends, held at Plainfield, 9th mo. 15th to 21st, 1876. We are informed that New York and Ohio Yearly Meetings have adopted the proposition of this meeting for a general Conference, with the understanding that the judgments reached by said Conference shall be advisory, and that a majority of the American Yearly Meetings shall concur. They consider with us that your proposition is included in ours. Iowa concurs with you. Can you not revise your proposition so as to harmonize the action taken?"

By direction of the meeting,

BARNABAS C. HOBBS, Clerk.'

"We have reconsidered the subject at the request of our dear friends of Western Yearly Meeting, but do not feel prepared to reverse the decision then arrived at."

The report of the Book and Tract Committee shows the distribution of 2,000,000 pages of tracts, and says, "We have kept a few Friends' books on hand, but we have not donated any to libraries since our last report." No other mention than this is made of the circulation of Friends' books.

The report of the Bible Association recommended "that the Yearly Meeting appoint a committee to carry forward the work of the Indiana Bible Association of Friends. The association to be continued under that name, and to be an auxiliary to the American Bible Society, and to report annually to the Yearly Meeting." This was adopted by the Yearly Meeting.

Indiana Yearly Meeting still continues to receive answers to eight queries from its thirteen Quarterly Meetings, which queries are very similar in their import to those used in Philadelphia; but they have a committee under appointment to revise these queries, which reported such a revision, suggesting radical changes. This report was laid over for consideration next year.

The following is the answer to the third query:

"3. Friends endeavor, by example and precept, to educate their children and those under their care in the principles of the Christian religion, and in plainness of speech, deportment, and apparel; to guard them against pernicious reading, and from corrupt conversation, and to encourage them to read the Holy Scriptures; but a number of the reports state exceptions in one or more of these particulars."

The statistical reports sent up from the subordinate meetings include the following: Five new meetings for worship have been set up within the year; 13 ministers recorded; 991 members received by request; 30 dismissed; 52 resigned; total number of members 17,681. Established meetings 124; recorded ministers 195.

The report on Earlham College gives the number of pupils as 120 boys and 111 girls. The report of the "Missionary Board" states that, "the Monthly Meeting of Southland, near Helena, Arkansas, has forwarded answers to the queries and statistics, the latter showing the members there to be now 142. All of these are colored persons except nine. There has been an increase of thirty-five members the past year." The report states that the Normal Institute at Maryville, Tennessee, which is under the care of the "Missionary Board," is in good condition. The students are all colored persons, and there have been 381 educated in it since its institution. The number of students for the past year is 55; 42 teachers have been educated in the school. "Nine young colored persons have been received into membership with Friends, and they, with their teacher and others, hold regular meetings at the Institute."

SUMMARY OF EVENTS.

FOREIGN.—General Tchernayeff, commander-in-chief of the Servian army, has gone to Belgrade with 200 Russian officers.

A Vienna dispatch says that Russia is raising difficulties in regard to the line of demarcation. She now proposes an arrangement by which the Turks would be compelled to quit the Valley of the Morava.

The London Post publishes an official announcement of Russia's formal acceptance of the English proposal for a conference at Constantinople on the basis of the integrity and independence of Turkey. The proposal as accepted by Russia includes the condition that the Powers jointly and severally renounce all intention of aggression towards Turkey.

The Paris Times publishes a telegram from Vienna which states that Montenegro, finding herself incapable of maintaining the troops in their present position during the armistice, has opened direct negotiations with the Porte for a prompt cessation of peace.

The aversion of the Servians to the war, and their reluctance to engage in military service, is shown by the fact mentioned in a leading Russian journal that 9,000 Servians had mutilated themselves to get away from the army, and a still larger number had deserted.

The Spanish government has submitted a bill to the Senate restoring the constitutions of the provinces throughout the country, except in the Basque provinces.

General Loma has ordered the inhabitants of the Basque provinces to immediately deliver all their arms to the authorities. The Spanish government's decision to exempt all the Basque provinces from the operation of the constitutional guarantees has created a painful impression.

Six hundred and fifty additional troops have arrived at Havana from Spain.

A dispatch from Lisbon says Spanish emigrants and refugees have been ordered to quit Portugal.

The port of Constantinople, in the Bosphorus, and the roadstead, are ice-bound, and navigation is stopped. The river Dwina is frozen and navigation closed. The river Neva is also choked with floating ice from Lake Ladoga.

Two hundred and sixty-one miles of railway were opened in India in 1875, making the total length of completed lines 6,497 miles, of which 5676 miles are of the five 6 inch gauge.

The district of Backergunge, India, was ravaged by a cyclone on the 7th inst. last. A thousand native houses were destroyed. The town of Daulahganj was submerged by a wave and 5000 persons are believed to have perished. The government has sent relief to the desolated sections.

The Times of India announces that relief works have been established in the Sholapore district, where the "Famine, or destroyed." The town of Daulahganj was submerged by a wave and 5000 persons are believed to have perished. The government has sent relief to the desolated sections.

The Times of India announces that relief works have been established in the Sholapore district, where the "Famine, or destroyed." The town of Daulahganj was submerged by a wave and 5000 persons are believed to have perished. The government has sent relief to the desolated sections.

The United States frigate Franklin, with Wm. M. Tweed on board, arrived at the island of St. Thomas on the 5th inst., and sailed on the 8th inst. for New York.

Cardinal Simeoni, recently the Papal Nuncio at Madrid, has been appointed to succeed the late Cardinal Antonelli as Secretary of State to the Pope.

The London Post says an agreement has been reached between the master and operative cotton spinners of Blackley, Lancashire, and the threatened strike is prevented. Other papers on the same information do not consider the matter as finally arranged, but regard an agreement as highly probable.

A dispatch from Calcutta to the London Times says it is reported that 20,000 persons perished in the cyclone of October 31st, and some estimates place the total number of lives as high as 40,000. In the town of Barrishool, capital of the Backergunge district, 3000 houses were leveled with the earth. Letters from survivors report that a great wave nine feet deep swept over the large island of Dakin, nine miles long. The whole of Eastern Bengal apparently have suffered severely from the cyclone, and Calcutta narrowly escaped. The reports of famine from Bombay are worse.

The Thames tunnel was flooded to such an extent a few days ago as to necessitate the suspension of the entire traffic of the East London Railway, Wapping and Deptford Road Station. The inundation is attributed to a defect in some docks recently opened, the foundations of which are said to be higher than the level of the tunnel.

Speeches from Cairo mention the disgrace and banishment of the Egyptian Minister of Finance. It was found that he had endeavored to originate a plot against the Khedive by representing to the people that his reform measures were preparatory to selling the country to the Christians. The ex-minister was banished to Bangala.

The Emperor of Russia delivered a brief address at Moscow on the 10th inst., which is thought to be significant in its bearings upon the question of peace or war in Europe. He refers to the armistice between Turkey and Servia, and his efforts to "obtain a real improvement of the position of the Christians by peaceful means." He will strive for the success of the negotiations about to begin at Constantinople, and hopes that a satisfactory agreement will be reached regarding their future. In the position the Russian Emperor takes on this subject he will have the sympathy of the civilized world, and it is the fairest wish of all humanity as well as Christianity. There is no permanent security for Christians at present under the Moslem government. They are subject to insolence, outrage, assassination and open murder, whenever the Government of Turkey loses their prejudices and passions.

Russia has the resolution to give the Emperor credit for his crimes against humanity, and the Emperor in his speech was positive as to his own action in the near future. "Should," he remarked, "I see that we cannot obtain by negotiation guarantees necessary for the safety of our subjects, I intend to demand from the Porte, I am firmly determined to act independently." This declaration of the Czar occasions apprehension and uneasiness in England, but appears to be heartily approved in Russia by all classes of the people.

UNITED STATES.—Within two days after the Presidential election on the 7th inst. the following result was declared: 17 States, with 181 electoral votes, had given them to the Democratic candidates, Tilden and Hendricks. This was only one vote short of the number required to elect Florida, South Carolina and Louisiana, with 19 States, to be lost by the Republicans, and 16 States with 106 votes, had given them to Hayes and Wheeler. It becoming evident that the actual facts in each case could not be known until the official count was announced by the State officials, the President of the Democratic party, Fremont, and the Republican party, Fremont, standing to go at once to the South and superintend the counting of the votes, so that whatever might be the

result, the country might be assured there had been no fraud or dishonesty in making up the returns.

The Central Pacific Road's annual report shows earnings last year from passengers of \$5,500,000; freight, \$9,650,000; miscellaneous, \$1,100,000; total, \$17,020,000; less operating expenses, \$9,600,000; net income of year, \$7,418,000; increased income, 569,000.

During the Tenth month last there arrived at port of New York 6550 emigrants, of whom 3628 women and 2922 women.

Between 17,000 and 20,000 alligator skins are taken yearly, which are continued by the States and manufacturers in every portion of the United States, as we exported to London and Hamburg. The alligators formerly came almost entirely from Louisiana, and Orleans was the greatest centre of business. The Florida and Massachusetts are now the largest fields. Jacksonville, in that State, the great depot. The gators often attain a length of eighteen to twenty feet.

At the recent election in Pennsylvania, the Republicans elected 17 members of Congress and the Democrats 10. The old delegation stood 10 Republicans and 10 Democrats. The 17th and 18th members of the State, and Hayes in only 31, but some of the latter were so large as to overbalance the Democratic majorities in a number of the counties combined.

The International Exposition at Philadelphia closed at the appointed time the 10th inst., having been open for 150 days. The receipts for the 145 consecutive numbered \$,004,214, and the cash receipts thereof were \$2,814,312. The number of visits made by individual varied so much that it is impossible to show many persons in the aggregate were on the ground. Many were content with a single visit, while others resorted to the exhibition every day for whole weeks. At an average of four visits to each individual, the tire number would reach two millions, beside all those who were furnished with free passes and complimentary tickets.

The number of internations in Philadelphia last year was 315. At the late election in the city 130 votes were polled viz, 76,474 for Hayes and Howe, and 61,047 for Tilden and Hendricks.

The Markets, &c.—The following were the quotations on the 13th inst. New York—American gold, \$11 1/2; mixed State, 45 a 50 cts.; Long, \$10.00; \$5.40; finer brands, \$5.50 a \$9.50. No. 1 white wheat, \$1.13; No. 1 amber, \$1.30; No. 2 red, \$1.27; No. 1 Milwaukee spring wheat, \$1.30; No. 2 Chicago, \$1 State rye, 88 a 90 cts.; Penna. do., \$5 a 86 cts. Yellow corn, 61 cts.; mixed do., 60 cts.; No. 2 white oats, \$1.10; mixed State, 45 a 50 cts.; Long, \$10.00; 100 lbs. Carolina rice, 51 a 61 cts. Philadelphia Middlings cotton, uplands and New Orleans, 12 a 1 cts. Flour, 4 a \$9.00. Pennsylvania red wheat, \$1. Delaware amber, \$1.32 a \$1.35; western white, \$1.13; Rye, 72 cts. Mixed corn, 55 a 50 cts.; No. 2 white, 58 cts.; old white oats, 48 a 50 cts.; Medium white, 38 a 41 cts. New York fancy cheese, 13 a 1 cts.; western fine, 12 a 13 cts. Sales of 2400 beef cattle at 51 a 61 cts. per lb. gross for export; 4 a 51 cts. fair to good, and 4 a 41 cts. for common. Sheep, 50 cts. for the gross. Receipts 13,000 head. H. \$7.50 a \$8.50 per 100 lbs. St. Louis—No. 2 red wheat, \$1.21. No. 2 corn, 41 a 41 1/2 cts. No. 2 do 31 1/2 cts.

WANTED

A teacher for a family school. Address Jesse GARRETT, Willistown Inn P. O., Chester Co., Pa.

A young woman friend desires a situation as teacher in a small family school. For information address S. A. H., 302 Arch St., Phila.

FRIENDS' ASYLUM FOR THE INSANE.
Near Frankford, (Twenty-third Ward), Philadelphia.
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

PHILADELPHIA.

For "The Friend,"

The Life of John Hooper, Bishop of Gloucester.

(Concluded from page 106.)

We come now to the concluding scene in the life of this worthy man and noble martyr for the cause of Christ; and it will be found manifest the same steady faith and humble confidence in Divine power, and the same looking forward to the glorious hopes held up to the view of the Christian.

The sheriffs of Gloucester, with the mayor and aldermen, having come to his lodgings, Hooper was given into their charge by the ward which had brought him from London. He thanked them for their kindness in taking him by the hand, which he regarded as an evidence that their old love and friendship towards him was not altogether extinguished. He added, "I trust also, that all the things I have taught you in time's past, are not utterly forgotten, when I was your bishop and pastor, for which most true and sincere doctrine, because I will not now account it falsehood and presy, as many other men do, I am sent here, by the Queen's command to die, and to come where I taught it, to confirm it with my blood." He requested the sheriffs that they might be a quick fire so as shortly to make an end; and said, "in the meantime I will be as obedient unto you, as you yourselves could wish. If you think I do amiss in anything, hold up your finger, and I have done. For I am not come hither as one forced or compelled to die; for it is well known, I might have had my life with worldly gain; but as one willing to offer and give my life for the truth, rather than consent to the wicked papistical religion of the bishop of Rome, received and set forth by the magistrates in England, to God's high displeasure and dishonor; and I trust, by God's grace, toorrow to die a faithful servant of God, and true obedient subject to the Queen."

The sheriffs proposed placing him for the night in the common goal of the town, but a guard interceded on his behalf, declaring how quietly, mildly and patiently he had behaved himself on the way, adding thereto, that any child might keep him well enough. It was determined at length he should still remain at Robert Ingram's house. His desires, as that he might go to bed that night being, saying, that he had many things to remember; and so he did at five o'clock, and slept one sleep soundly, and spent the rest of

the night in prayer. After he had got up in the morning, he desired that no man should be suffered to come into the chamber, that he might be solitary till the hour of execution.

At nine o'clock, Dr. Hooper prepared himself to be in readiness, for the time was at hand. Immediately he was brought down from his chamber by the sheriffs, who were accompanied with bills and other weapons. When he saw the multitude of weapons, he spake to the sheriffs on this wise; M^{rs}. sheriffs (said he) I am no traitor, neither needed you to have made such a business to bring me to the place where I must suffer: for if you had suffered me I would have gone alone to the stake, and troubled none of you. He went forward, led between two sheriffs (as it were a lamb to the place of slaughter) in a gown of his host's, his hat upon his head, and a staff in his hand to stay himself withal; for the grief of the Sciatica, which he had taken in prison, caused him somewhat to halt. All the way, being strictly charged not to speak, he could not be perceived once to open his mouth; but beholding the people, who mourned bitterly for him, he would sometimes lift up his eyes towards heaven, and look very cheerfully upon such as he knew; and he was never known, during the time of being amongst them, to look with so cheerful and ruddy a countenance as he did at that present. When he came to the place appointed where he should die, he smilingly beheld the stake and preparation made for him, which was near unto the great elm-tree over against the college of priests, where he was wont to preach. The place round about the houses, and the boughs of the tree were filled with spectators; and in the chamber over the college gate stood the priests of the college. Then he kneeled down (forasmuch as he could not be suffered to speak unto the people) to prayer, and beckoned six or seven times unto one whom he well knew, that he might hear his prayer, and report faithfully the same. When this person came to the good bishop, he (pouring tears upon his shoulders and in his bosom) continued his prayer for the space of half an hour.

Now after he was entered into his prayer, a box was brought and laid before him upon a stool, with his pardon (or at leastwise it was feigned to be his pardon) from the Queen, if he would turn. At the sight whereof he cried, "If you love my soul, away with it. The box being taken away, the lord Shandois said, "Seeing there is no remedy, dispatch him quickly."

In the meantime one or two persons, un-called, stepped up, who heard some of the bishop's expressions in his prayer. After making confession of his sinfulness, he said: "Well knowest thou, Lord, wherefore I am come hither to suffer, and why the wicked do persecute this thy poor servant; not for my sins and transgressions committed against thee, but because I will not allow their wicked

doings to the contaminating of thy blood, and to the denial of the knowledge of thy truth, wherewith it did please thee by thy Holy Spirit to instruct me; which, with as much diligence as a poor wretch might, (being thereto called) I have set forth to thy glory. And well seest thou, my Lord and God, what terrible pains and cruel torments are prepared for thy creature: such, Lord, as without thy strength none is able to bear, or patiently to pass. But all things that are impossible with man are possible with thee. Therefore strengthen me of thy goodness, that in the fire I break not the rules of patience; or else assuage the terror of the pains, as shall seem most to thy glory."

As soon as the mayor saw those men, who reported the foregoing words, they were commanded away, and could not be suffered to hear any more. Prayer being done, bishop Hooper prepared himself for the stake, and put off his host's gown, and delivered it to the sheriffs, requiring them that he restored unto the owner, and put off the rest of his apparel unto his doublet and hose, wherein he would have burned. But the sheriffs would not permit that, (such was their greediness), unto whose pleasures (good man!) he very obediently submitted himself, and his doublet, hose and waistcoat were taken off. So desiring the people to say the Lord's prayer with him, and to pray for him, (who performed it with tears, during the time of his pains) he went up to the stake; when he was at it, three irons, made to fasten him thereto, were brought; one to his neck, another for his middle, and the third for his legs. But he refusing them, said, "You have no need thus to trouble yourselves. I doubt not that God will give me strength sufficient to abide the extremity of the fire, without bands; notwithstanding his suspecting the frailty and weakness of the flesh, but having assured confidence in God's strength, I am content to do as you shall think good."

Being fastened to the stake with an iron hoop round his middle, he refused the others, saying he was well assured he should not trouble them. Thus being ready, he looked upon the people, of whom he might well be seen (for he was both tall and stood also upon a high stool) and beheld round about him, that in every corner there was nothing to be seen but weeping and sorrowful people. Then lifting up his eyes and hands to heaven, he prayed in silence. By and by, he that was appointed to make the fire came to him and did ask him forgiveness. Of whom he asked why he should forgive him, saying, that he never knew any offence he had committed against him. O sir, said the man, I am appointed to make the fire. Therein, said Mr. Hooper, thou dost nothing offend me: God forgive thee thy sins, and do thine office I pray thee.

The wood being green, it was difficult to kindle; and the fire had to be made up three several times before death released this patient

sufferer. The last words he was heard to utter were, Lord Jesus have mercy upon me! Lord Jesus have mercy upon me! Lord Jesus receive my spirit.

"Thus," says Fox, "he was three quarters of an hour or more in the fire; even as the lamb, patiently bearing the extremity thereof, neither moving forwards, backwards, nor to any side. He died as quietly as a child in his bed; and he now reigneth as a blessed martyr in the joys of heaven, prepared for the faithful in Christ before the foundations of the world: for whose constancy all Christians are bound to praise God."

To Preserve Flowers and Plants.

The following instructions are from the pen of G. Henslow, one of the best practical botanists in England:

The materials required are common cartridge paper, thick white blotting paper, cotton wadding, and millboard, all cut to the same size. The plants should be gathered in dry weather, and soon after the flowers open, when their colors are brightest. Succulent plants (such as daffodil, orchis or stone crop) should be put into scalding water, with the exception of the flowers, for a minute or two, then laid on a cloth to dry.

Arrange the specimens and papers in the following order: Millboard, cartridge paper, wadding (split open, and the glaze side placed next to the cartridge paper), blotting paper, the specimens, having small pieces of wadding placed within and around the flowers to draw off all the moisture as quickly as possible, blotting paper, wadding as before, cartridge paper, millboard. When the specimens, &c., are thus arranged, heavy weights should be put on them; about thirty pounds the first day—sixty pounds afterwards. Remove them from under pressure in a day or two, carefully take away all the papers, &c., except the blotting papers between which the specimens are placed, put these in a warm air to dry, while the removed papers, &c., are dried in the sun or by the fire. When dry (but not warm) place them in the same order as before; put all under the heavier pressure for a few days, when (if not succulent) they will be dry.

Flowers of different colors require different treatment to preserve their colors. Blue flowers must be dried with heat, either under a case of hot sand before a fire, with a hot iron, or in a cool oven. Red flowers are injured by heat; they require to be washed with muriatic acid, diluted in spirits of wine, to fix the color. One part of acid to three parts of spirit is about the proportion. The best brush with which to apply this mixture is the head of a thistle when in seed, as the acid destroys a hair pencil, and injures whatever it touches (except glass or china); therefore it should be used with great care. Many yellow flowers turn green even after they have remained yellow some weeks; they must therefore be dried repeatedly before the fire, and again after they are mounted on paper and kept in a dry place. Purple flowers require as much care, or they soon turn a light brown. White flowers turn brown if handled or brushed before they are dried. Daisies, pansies, and some other flowers must not be removed from under pressure for two or three days, or the petals will curl up. As all dried plants (ferns excepted) are liable to be infested by minute insects, a small

quantity of the poison, corrosive sublimate, dissolved in spirits of wine, should be added to the paste, which it will also preserve from mould. The best cement for fixing the specimens on the paper or card board is gum paste. It is composed of thick gum water and flour mixed in warm water, by adding the two together, warm, and of a consistency: that will run off the hair pencil.—*Scientific American.*

For "The Friend."

Richard Shackleton.

(Continued from page 107.)

"The following extracts from letters written in the year 1752, instructively depict the state of R. Shackleton's mind at this period, (evinced by his ardent desire and faithful exercise for the advancement of the dear Saviour's kingdom, both in his own heart and in the hearts of others.)"

"Ballitore, 3d of 5th mo. 1751.

"Dear Friend,—I received thine from Edinburgh, and am well pleased that time and distance have not obliterated me from thy memory. I can say also, that on my part I have not forgot thee, but am desirous for thy welfare in every respect, that as thou growest in years, thou mayst grow in grace, and as thou improve in human learning, thou mayst become an adept in Divine Divinity, dear —, is not a trade, but it is a science, and that the most noble of all sciences. It comprehends in it the finest speculations of moral philosophy, and what is more, reduces them to practice. Humility, patience, charity, abstinence, and simplicity, and all the virtues are included in it; they are not only understood but exercised here; and by how much actions exceed words, and a possession is beyond a profession, by so much is the religious man more excellent than the scholar. I wish for thee, dear friend, amid thy diligent attention to thy studies, that thou mayst feel a degree of that Power, which, as it is given way to, will wear thee gradually from the nature and spirit of the world, in which there is trouble, and draw thee toward Him in whom there is peace. This, dear —, will let thee see how to enjoy and use all things in their seasons and in their places, and will sanctify thy natural and acquired accomplishments, and render them beneficial to thyself and others. I have a secret love for thee, and would therefore press it home to thee, to reflect on these things. Be not one of those who can conform (they think it a part of good breeding) in dress, speech and behavior, to those with whom they converse; they may assume, if they please, the title of gentlemen, but I think they have not a just right to that of Christians: for our Great Pattern told his followers that he had chosen them out of the world, and therefore the world hated them; consequently they were of a spirit different from the world. And the apostle Paul charges the Romans, 'not to be conformed to this world, but to be transformed by the renewing of their minds,' &c., and I am in no doubt but that the disciples of Christ in their garb, speech and deportment, wore the badge of their great Master, some mark which distinguished them from the world. Peter seems to have been known to the damsel by his very aspect, to have been with Jesus; when he denies it, another tells him, 'Thy speech betrayeth thee.' So to conceal his profession of Christ, his last resource was 'to curse and swear.' Whether

much stress may be laid on this particular quotation or not, I am sure the Spirit of Truth leads, and always led in the path of humility and self-abasement; and when this has dominion in the mind, there will be visible manifestation in the body, the gown will shine through a tunic. Thus far have I written to thee, love, and in love take leave at present, a bid thee heartily farewell.

R. S.

"25th of Ninth month

"Oh! how I love uprightness and pleading; a heart which loves its friends sincerely, that will not harbor and conceal a so pleasing, envious, injurious thought of a friend, nor bear to hear it uttered by another without rebuke. May the virtues of integrity and simplicity, and single and honest heartiness, be ours, for they are truly Christian. Yea, may it please Divine wisdom more a more to purge out the sour leaven, and leave our hearts with the leaven of his kingdom even the leaven of meekness, long-suffering and tenderness of spirit; so shall we be displeas indeed; contrite, humble and faithful flowers of the Lamb, whithersoever he leadeth. May the Lord preserve us as innocent, tender and babe-like children before Him, hungering to be fed by Him, and growing up as good plants under His hand. Oh! this child-like nature: when shall I get enough of it? It only as a measure of this is effected in us, that we can cry, 'Abba, Father.'

"Though, as thou sayest, 'things look better us look well at home, and as we are capable, in a degree, of doing anything make matters better, let us not make the worse, and the breach wider in the emit, by saying or doing anything in our own regenerated wills, and natural heat of temper which may hurt instead of furthering other. For the enemy works in us with the engine and tools of our corrupt nature, which I find there; and so crafty is the serpent, that he will seem to employ these weapons for the good cause, against himself; whereas, I works in a mystery for himself against the cause, by raising heats and divisions, and hardness of heart between brethren. But I us endeavor, as much as in us lies, to live peaceably with all men, and if we see a brother offend in any branch of our Christian testimony, and by the fire of pure zeal warm and cleansing our own hearts, we find that the Truth (as will often be the case) calls for a witness to it, let us wait to be guided by the Spirit of love and meekness, to bear our innocent, faithful testimony; and if it be not received, stand in the counsel of the same Spirit and let not that get up which would render evil for evil, but overcome evil with good."

"* * * * * My desires are strong in measure, that we, several of us, who are known by one another, and known to our heavenly Father to have at times, living desires raised in us for the glory of God and the eternal happiness of ourselves, and one of another; an sometimes a further concern that our backsliding brethren may no more revolt, but return and live—my desires are that that we may come up nobly and boldly in His cause, and be absolutely (I see no other way to be service) resigned to the will and disposal of the great Lord of the harvest, dedicated freely and cheerfully, as our forefathers did all we have, internal and external, to His service.

R. S.

How Forests affect Rainfall.

Selected.

[Appleton's Journal contains an article on this subject from which we extract the following.]

In Caylon the forests have been cut down for coffee plantations, and more than twenty years ago the loss of springs and fountains began to be a threatening evil. When, two centuries ago, the Spice Islands fell into the hands of the Dutch, they were clothed with dense forests of spice-bearing trees. To increase the value of the monopoly, the Dutch effected an indiscriminate destruction of the forests, and these islands were converted into arid deserts. Not many years ago the world was thrilled by the reports of the famine in the Cape de Verd Islands. The soil there is very light and porous, and requires constant moisture as a condition of fertility. For many years the increasing lack of humidity was noticed. The river Socorridos, in Madeira, a town which ship-timber was formerly floated to the sea, gradually dried up until it became mere rills, whose waters, except at flood-tide, could hardly be seen along its pebbly bed. The diminution of moisture was found to have kept equal pace with the destruction of the forests on the mountain sides, and the Portuguese government made laws prohibiting the cutting down of trees near springs and riversources. But wine culture was profitable, and the laws were powerless against immediate interest. So the trees were cut down more and more; the springs failed, the fountains dried up, and drought and famine followed. Only a quarter of a century ago the British island of Santa Cruz was a garden of fertility. The hills were covered with forests, and trees were everywhere abundant. A person who had formerly resided there recently revisited the island, and found a third part of it reduced to an utter desert. The planters had bared the island of its forests; the soil was gradually desiccated; even the short copious showers had ceased. The island of Suracua was, within the memory of living men, one of the most fertile and well-watered spots on earth; 'but now,' says Mr. Hough, 'the whole plantations, with their once beautiful terraces and terraced gardens, are nothing but an arid waste; and yet, sixty miles away, on the Spanish Main, the rankest vegetation covers the hills, and the burdened clouds shower down abundant blessings.' The United States Commissioner of Agriculture in 1871 writes: 'In Upper Egypt the rains which eighty years ago were abundant, have ceased since the Arabs cut down the trees along the valley of the Nile toward Libya and Arabia. A contrary effect has been produced in Lower Egypt from the extensive planting of the casha. In Alexandria and Cairo, where rain was formerly a rarity, it has since that period become more frequent.'

Religious Belief.—I envy no quality of the mind or intellect in others; be it genius, power, wit, or fancy, said Sir Humphrey Davy, but if I could choose what would be most delightful, and I believe most useful to me, I should prefer a firm religious belief to any other blessing; for it makes life a discipline of goodness; creates new hopes, when all earthly hopes vanish; and throws over the decay, the destruction of existence, the most gorgeous of all lights; awakens life even in death, and from destruction and decay calls

up beauty and divinity; makes an instrument of torture and shame, the ladder of ascent to paradise; and far above all combinations of earthly hopes, calls up the most delightful visions of palms and amarantus, the gardens of the blest, the security of everlasting joys, here the sensualist and the sceptic view only gloom, decay, annihilation, and despair.

From "The Friend."

The Belper Conference.

Dear Friend,—As one who, though not an attendee of the above-named Conference, felt sympathy with those who did so, I do not believe I shall be doing my duty without taking some notice of thy correspondent's letter, signed J. J. of Preston.

Personally I am acquainted with but few of those who did attend the aforesaid Conference, so can say little of what may be the individual course of conduct and conversation of such, so will therefore pass on to that portion of thy correspondent's letter which has taken hold of my mind, as contained in the following remarks. After alluding to that wherein he says we are all agreed, he adds: "Yet Belper Friends charge the Society in this country and America with many innovations on our distinguishing principles, yet not the slightest evidence is produced of any such defection. The tangible charges are innovations in practice."

A tree is known by its fruit, so are we as individuals, and as a Society, known and judged by the light of our practice. We have borne testimony as a people for two hundred years to the true spiritual character of worship and for the immediate necessity of divinely quickening to be felt through the Spirit of the Lord Jesus, before we can enter into communion secretly or vocally draw nigh unto God the Father through his beloved Son; and we have further believed, as of necessity it must be, that in order to the right qualification for a gospel minister, there must be known in the individual member not only a willing surrender, but also an immediate qualification for the work of ministering to his fellows in spiritual things; and that without such divine qualification being known, it is both presumption and assumption for any to take upon themselves to teach or to preach in the name of the Lord.

In the light of such profession what can be now said of our possession? Our teachers, or at least most of them, can teach or preach when and how they will; pray or sing as they list. I was pained to see only this day a large bill on either side of one of our London Meeting-houses, to the following effect:—"Friends' Meeting-house, Peel Court, St. John Street. A series of special services will be held as above, commencing on the 8th and concluding on the 14th OCTOBER, 1876, at which *Gospel addresses* will be delivered, and to which the inhabitants of the neighborhood were affectionately invited. A series of well selected hymns will be sung." This is no new thing, and is only a repetition of what took place last year, only then it was announced that Sankey's hymns would be used, these being then the centre of attraction. The same thing in a more quiet way is going on from week to week in our very midst. I do not wish to interfere with the rightful liberty of any one, but why do they call themselves "Friends," and still withhold their allegiance from those denominations with which they are evidently

in entire harmony? But alas for us as a people! they well know that the Society as a whole is with them and upholds them, and they are biding their time, believing the period is not far distant, when the profession as well as the practice of true Quakerism will be swept off the earth. Such as these I count not my friends, or the friends of Truth, but its worst foes, sailing as they are under false colors. It is long since our foundation truth—the revelation of Christ Jesus by his heavenly and saving light—was struck at, and although London Yearly Meeting has not avowed itself honestly and openly that it no longer holds the same doctrinal truths that were formerly believed by us as a people, yet by the insidious course of holding up to commendation the lives, characters, and conversation of those who have assailed these truths, bound up in and inseparable from the great and important Truth of divine immediate revelation, have established that in our midst, which, if not cut down and rooted up by the same divine power which at first gathered us to be a people, will ere very long scatter us as chaff before the wind.

If thy correspondent J. J. does not see not only many innovations on the principles we have from the first been brought into the possession of, but their entire abandonment, I am sorry for him. I will not speak of profession, for that is of small value. It is because we slight the source whence our principles flow, that we have so little right perception of what those principles are, and see not how we have sliken from them. The old Quaker said the book (the Bible) was not the primary rule of faith and manners. The modern Quaker says it is. Here is the root of that corrupt tree that hath brought forth so plentifully in our midst those fruits which are not of God, because they are not wrought in Christ, as He only who is the only begotten of the Father in every living child (for we may come to know the Truth and fall from it, contrary to the teaching of modern Quakers and evangelists, so called) can beget in us those works that are well-pleasing in His holy sight. Truly great is the mystery of godliness, both in that manifestation that appeared here on earth clothed in human form, and in the reception of Him in the heart by that faith which He begets, and through which alone we can know of the saving efficacy of his blood that cleanses from all sin; through which also we have fellowship with all who have obtained the like precious faith, and have witnessed a death unto sin by repentance, and a new birth unto righteousness by faith in his power. Then do we see the rightful position as to us of the Scriptures of Truth, that the man of God may be perfect, thoroughly furnished unto every good work.—With love, thy friend,

CHARLES W. THOMSON.

47 Herbert Street, New North Road,
Hoxton, 10th month 9, 1876.

Made Kings.

"And hath made us kings."—Rev. i. 16.

An old African Christian negro, when on his deathbed, was visited by his friends, who came around him lamenting that he was going to die, saying, "Poor Pompey! poor Pompey is dying." The old saint, animated with the prospect before him, said to them with much earnestness, "Don't call me poor Pompey; I king Pompey."

The "Railway World" gives the following information respecting the proposed tunnel under the Hudson:

The work of excavating the tunnel, which is to connect New York and Jersey City under the bed of the Hudson river, progresses slowly, the company being still embarrassed by litigation, which they have not been able to force to a final settlement. It is probable, however, that the question of right of way will be decided in a few weeks in favor of the tunnel company. The company will then begin on the New York side, bore under the river and meet the workmen tunnelling from the New Jersey side. The work on the New York side will begin at the foot of Morton street. The work is carried on under the direction of the Hudson Tunnel Company, incorporated under the general laws of the States of New York and New Jersey, and the capital, which is all subscribed, is \$10,000,000. The entrance to the tunnel on the Jersey side will be from Jersey avenue, and from that point to the New York bulkhead line, the extent of boring to be done will exceed somewhat 6400 feet. The terminus in New York—probably in Hudson street—has yet to be selected by commissioners. The entire length of the tunnel and its approaches will be 12,000 feet—with depot tracks to be added—being about one mile under the river and nearly three-fourths of a mile on each side.

The engineer of the road, W. H. Pain, says the company propose to employ as much iron as can be successfully engaged in excavating and laying brick, changing the men each stretch of eight hours. Thus, by constant work, it is believed the tunnel can be advanced five feet from each end every day, and the whole work completed in two years.

The work was commenced in November, 1874, after experimental borings down to the depth to be occupied by the tunnel. While occupied bricking the shaft, the Delaware, Lackawanna and Western railroad obtained an injunction stopping the work, and it was not until last month that the injunction was removed and the company enabled to get to work.

The depth of the shaft is a little over 70 feet, and the greatest depth of water under which the tunnel will pass is 60 feet. The extreme grade is 2 in 100 feet descending from Jersey City, and then ascending on the New York side 3 in 100 for 1500 feet, then 2 in 100 to the New York end. The borings already made show that the soil through which the tunnel will pass is, for the most part, of a tenacious silt, underlain with sandstone. Near the New York shore rocks are encountered, and gravel, which is considered favorable for tunnel construction, not offering any serious difficulties to the builders, as would sand and mud. The tunnel walls will be constructed of brick and cement, 3 feet in thickness and circular in form. The height of the tunnel will be 24 feet and the width 26 feet. A double track will run through it, resting upon a stone ballast 5 feet from the bottom. The walls will be painted white and lighted with gas. Heavy steel rails will be used, which the company have already prepared. Pneumatic tubes, gas, and water mains can run through the tunnel beneath the track, if desired, so that New York gas and water may be sent to Jersey.

Watch ye, stand fast in the faith.

FORGIVENESS.

Selected.

O God forgive the years and years
Of worldly pride and hopes and fears;
Forgive, and blot them from thy book,
The sins on which I mourn to look.

Forgive the lack of service done
For thee, thro' life, from life begun;
Forgive the vain desires to be
All else but that desired by thee.

Forgive the love of human praise,
The first false step in crooked ways,
The choice of evil and the night,
The heart close shut against the light.

Forgive the love that could endure
No cost to bless the sad and poor;
Forgive, and give me grace to see
The life laid down in love for me.

—Transcript.

Selected.

I own no lands, I hoard no golden treasure;
No roof is mine beneath the sky's broad dome,
Yet rich I am, and hold in ample measure
Estates in heaven, and everywhere a home.

Each flower is mine that by its beauty bears me,
Each bird that lifts me on its tide of song,
Each star that by its steadfastness assures me
Its Maker, God, in patience waiteth long.

The fields are mine when first they take their greenness
And softly yield beneath my pressing feet;
The hills are mine—when they rebuke my meanness,
And lead me up their larger faith to meet.

All things are mine that fill my soul's deep longing,
Or cheer my heart along the way's 1 plod;
I find a home and sweet thoughts round me thronging
Where'er I stand amid the works of God.

—British Friend.

Periodicity of Severe Winters.—A memoir by Renou, the distinguished French meteorologist, upon the periodicity of severe winters, although published many years ago, has recently been quoted in defense of the opinion that such periodicity actually exists. According to Renou, rigorous winters return about every forty-one years. They are arranged in groups, generally composed of a central winter, and four or five others disposed on either side of it, within a space of twenty years. Mixed with these years are others also of unusual warmth, in such a manner that the mean cold of the season is not sensibly altered. The period of forty-one years seems to be that which corresponds to the maxima of the solar spots at the same season of the year. A central cold winter arrives eighteen months after the maximum of spots has coincided with the warmest season of the year.

The severe winters seem to alternate between the northern and southern hemispheres of the earth.—From *Baird's Record of Science and Industry of 1875*.

For "The Friend."

Meeting Etiquette.

On the assembling of our meeting this morning, the end appropriated to the female sex was as usual pretty well filled, so much so, that those coming in a little late had either to wait until those occupying seats near the door moved up, or walk forward to the front benches before obtaining a seat; such being the case, I was gratified in observing the thoughtfulness of one occupying a seat near the end of the bench next the passage, and who had herself come well forward to obtain it, on observing a person about to pass her in order to obtain a vacant space beyond, in-

stead of obliging her to crowd between her and the back of the seat in front, immediately rose and took the unoccupied space herself, thus affording the new comer a convenient seat near the end of the form. It has frequently occurred to the writer, that if all would come early would exercise a little forethought in regard to this matter, how much it would add to the comfort and quiet of the meeting, passing in and proceeding to the farthest end or middle of the bench before taking the seat, thus leaving for those who come after them an unoccupied space. Many, there no doubt, have become accustomed to a certain seat, and the thought of removing another is not pleasant; others, perhaps, may not thought upon the subject, but is it not worth thinking of? as anything we can do, add to the comfort of others, is not lost, as may return in blessings on our own head. It is understood that our late dear and valued friend Elizabeth Evans, was particularly charge those under her care not to occupy the first seats or the arm of a bench on going into a meeting, but to pass on and allow an opportunity for those who came afterward to obtain seats without having to inconvenience others, and to a greater or less extent disturb the meeting.

Botany of the Exposition.

BY THOMAS MEEHAN.

Among the botanical curiosities of the Centennial is a specimen of wood of the Bauhinia, in the Brazilian collections. It puzzles the student of structural botany to account for its make up. There is no central pith, no concentric layers of wood, no regularity of form in any sense, as in any ordinary coniferous wood; nor is there anything whatever to suggest the endogenous, of course, if the plant is leguminous—not far removed, indeed, from our ordinary "Red bud," or "Jud tree." The stems are generally flattened perhaps two inches one way by twelve or fourteen the other; but no two stems agree in these comparative dimensions. The stem seems to be made up of innumerable small circular but shapeless pieces, and some of these seem separated from the others by bark. At least, these interior lines all connect with the bark on the exterior, and which envelops the whole. If one can imagine the irregular markings on the chart of a phrenologist's skull, or the lines through a piece of veined marble, he may get some idea of this curious piece of vegetable workmanship. The writer has met with no structuralist who can suggest the plan on which this Bauhinian wood is made. Another singular piece of woody structure, not often seen, is in the Buenos Ayrean department. It is the trunk of a cactus tree. There is, of course, no bark for the fleshy coating of a cactus is both leaf and bark, and rots away when the tree is in preparation for timber. The trunks are about six feet in circumference, but quite hollow in the centre. The woody portion is only about four inches thick. They would look like ordinary wood-pump "trees," only that the woody structure has the appearance of having been stretched, forming large diamond-shaped openings along the surface. I cannot learn that the wood serves any useful purpose; but it is of extreme interest to the botanical student. The palm wood, near it, is much more useful. These trunks are very hard on the

For "The Friend."

A Watchword to the Seeking Ours.

If we want a saving religion, we must have a *practical* one: one that will not only lead us into the strait and narrow way, but keep us there; that will subdue unholiness, purify from unholiness, and enable us by the assisting grace of God to practice self-denial, patience, meekness, temperance and charity. It must turn us from darkness to light; from the power of Satan within, to the power of God within. It must pervade the whole man, till he becomes a new creature. It proceeds from repentance towards God, and faith in Christ—a faith that works by love to the purifying of the heart; and enables us to cast off the works of darkness, and put on the armor of light; to crucify the flesh with its affections and lusts, and to know Christ to dwell in us, giving a knowledge of salvation by the remission of sins.

This is a religion which will stand the storms of time, because it is founded on Christ the Rock; the tried stone and sure foundation; and will give us, at times, a sweet foretaste of God's salvation.

But in passing along through the journey of life, we may expect to hear many voices that do not correspond with the voice of Christ; to find many, who profess to be teachers of the way of life and salvation, who do not evince by *their* lives and conversation that they themselves have been taught in the heavenly school. Such spurious teachers are calculated to render that mysterious which the Holy Spirit, in the times of our "first love," had left clear. Thus the mind and understanding become perplexed and darkened with vain metaphysical speculations, which lead away from a child-like dependence upon Him who alone is the life and light of men. Better by far, to be led *away* from the flowery paths of ease and speculation, into the more arduous one of practice and self-denial. We need to have our religion more transferred from the head to the heart; to have less faith in the wisdom and teachings of men, and more in the power and teachings of God.

"The strong man" within us, may be so well armed with opinion and arguments, and so fortified with a superficial belief, as to be in great danger of keeping out the babe immortal, and thus give us a rest which never was designed for the people of God. But I believe that a "stronger than he" is knocking as it were, for entrance, at the door of each individual heart of "every nation, kindred, tongue and people," and would if we would hear his voice, and open the door, enter in, and lead us onward, step by step, through the wilderness of this world, to an inheritance "incorruptible, undefiled, and that fadeth not away."

We may talk very flippantly and boldly, of justification and sanctification and of being cleansed by the blood of Jesus, without ever witnessing that pure "washing of regeneration and renewing of the Holy Ghost," without which it is said we can never enter the kingdom of God.

We may appropriate to ourselves the merits of Christ's death, without a death unto sin, and a new life into "righteousness; wherein alone we are made "partakers of the inheritance of the saints in light." We may, like Nicodemus, come to Jesus in the night, and, "with the lips" make a noble confession of

ter surface and soft in the interior. The big trunks are split lengthwise and the soft interior scooped out. In this way they make the best possible shingles for roofs. A layer first set side by side, with the edges upward; another layer goes on these, with the edges downward and overlapping the points of those below—just, indeed, as the Europeans do in roofing with tiles. It must be a cheap entry to live in, when a roof can be built this easy way.

There are few more interesting points to be than the numerous varieties into which various grains, seeds, and nuts used by man have branched. Denmark, for instance, exhibits no less than twenty-eight varieties of barley, twenty-two of rye and nineteen of wheat; and other States and exhibitors, though not near the same number, have other varieties that Denmark has not. Even flax seems to have given many varieties, and these are bred by different growers to produce different kinds of fibre, suited to different work—a fact which, I believe, not known to American flax-growers, to whom flax is flax and nothing more. Russia, the Netherlands and other countries of Northern Europe show the fibres of the various varieties and the difference in the growths of the different kinds. There is the "White Blossom Flax," the "Blue Blossom Flax," the "Riga," and so forth. It is, perhaps, worthy of note that the cultivated flax (*Linum usitatissimum*), though thought to be a good species, is not certainly known to be indigenous to any country, and may, after all, but a development made in the past from the *perenne*, *L. Sibericum* or some other ally. The most unexpected variations, to me, were, however, in the rice of the Japanese exhibit. There were no less than thirteen different kinds, none of them, however, as large or as white as ours. There are many others, which I know only as a single article, that seem to have made innumerable varieties in other countries. Take for instance, the almond, the walnut, the ground-nut, among others. As we examine the products of the soil in the various departments, the Spanish and the Italian departments, we are astonished at the great variety. There are English walnuts, or "Marara nuts," two and a half inches long by two inches wide, as a single variety, and numerous others of many sizes and forms.

Besides the many forms of well known kinds, we are introduced by the different countries to vegetable products of which we know little before. There is the Japan pea (*Pisum hispida*), for instance, which has been growing in our gardens ever since Commodore Perry returned from Japan. We have seen it, but have never been able to make a celebrated "Soy" sauce. But here the Japanese tell us how they do it. They take the beans, some grains of wheat, and some salt, and bottle the whole, letting it ferment together for three years, after which it is the "soy," so highly prized. The freedom with which the Japanese explain all their processes is especially striking. The account they give of silk-worm feeding and working is extremely minute and cannot fail to be of immense value to silk-raisers in this country. We have to deal simply with the botanical features, and can only say that they use the Italian mulberry (*Morus alba*), as other countries do; but have discovered that a wholly male variety, which never produces fruit, of course, makes the best silk. Indeed, they have bot-

ties of fruit, and on the labels tell us, "fruit-bearing mulberry, no good for silk." I presume this is entirely new to silk-raisers here. It is to me. As another instance of openness on the part of the Japanese, I may notice that they tell us all the plants used by the Asiatics for adulterating tea; or, as they say, making tea for "experiment." Dried specimens of the leaves and branches are exhibited in glass frames, but unnamed. In one case I noted a narrow leaved willow, which I think must be the same as our *Salix longifolia*, and with which they "experimented with me, I know, for several weeks in the far West, for I used often to fish the perfect leaves out of the bottom of our camp teakettle. To my astonishment, I find here that the *Wistaria sinensis* enters largely into these tea "experiments," as also does a small, weak form of the *Plantago lanceolata*. Then there is a sort of Rhamnus (Buckthorn) and two or three others which I did not recognize. The *Ceanothus Americanus* is closely allied to this Rhamnus, and a few years ago a company started, pretending that they were growing real Chinese tea in Pennsylvania. When it was finally shown that it was the *Ceanothus* the project collapsed. It appears that if they had called this Chinese experimental tea they might have got through. Another matter of great botanical interest to me, in the examination of the tea question, was that these Eastern people make use of what we regard as mere matters of ornament, to produce choice and peculiar brands; and when we read, as we have done, that they keep a few very choice articles at home, for use only by the great, we can see that these ornamental varieties may produce these unique articles. There is the golden variegated tea plant, the silver-leaved and the blood-leaved all of which are used for special brands. As we know, such varieties are always more scarce than the ordinary trees, as they can seldom be easily reproduced from seed, and hence, they would be more costly as tea plants.

The variations of the tobacco are also shown in Japanese collections. They have five principal sorts, all distinguished by the leaves. A botanist would say that one was of a lanceolate form, the others each get a little wider at the base, till the last form inclines to be cordate. Connoisseurs tell us that they can detect distinct "smokes" from each form of leaf, and this following of distinct chemical properties, with the slight variations of form, is a matter of some scientific interest.

Near the Japanese collections in Agricultural Hall are some specimens from Germany of wood "paper" hangings. This use of trees is pretty well known now; but it is worth noting here that some of the best specimens are from the roots, and not from the stem timber. This material can be used for veneering, as well as for walls, and we know how beautiful in this way is the root of our black walnut. In this collection the root of the *Juglans regia* seems more beautiful than ours, and the root of the European elm gives very pretty work.

It is especially worthy to be noted, that the inspired writers, both in relating their own experience and in administering advice and counsel to others on a religious account, lay the whole stress of religion upon the *inward, saving, and spiritual* knowledge of God.—*John Griffith.*

his miraculous power, and that he is "a teacher come from God," and yet be strangers to the new birth; and not realize that "that which is born of the flesh is flesh, and that which is born of the Spirit is spirit," and that we must be born again; "not of blood, nor of the will of the flesh, nor of the will of man, but of God."

We may, like Apollon, be eloquent men, and mighty in the Scriptures, and be instructed in the way of the Lord, and also be fervent in the spirit, and speak and teach diligently the things of the Lord, and yet know of no deeper baptism than that of John, which was designed only to prepare the way of the Lord, and point forward to a deeper and more heart-cleansing work which must come after. We may take up our rest under the shadow, without coming to the substance to which the shadow points us. We must behold for ourselves the Lamb of God which taketh away the sin of the world; and know the purpose of His coming accomplished in us, which was "that he might destroy the works of the devil;" flush transgression, make an end of sins, make reconciliation for iniquity, and bring in everlasting righteousness "into each humble, penitent, seeking soul." But when he comes as a refiner, may we be willing to abide the day of his coming; "for he shall sift us as a refiner and purifier of silver; that we may offer unto the Lord an offering in righteousness." Then would our offering be pleasant unto the Lord, as in days of old, and as in former years. Then should we "rejoice with trembling," and be clothed with humility, meekness and godly fear; remembering that "God is in heaven and we upon earth; therefore our words would be few." We would often seek to sit alone in silent adoration, leaning as on the breast of our beloved, breathing forth in tenderness, our mental prayers or praises to the God of our salvation; or, if prompted by his Spirit, bend vocally before his throne with reverence and diffidence, knowing it is presumption to do so, only as of the ability which God in his mercy may at times give us.

But we must fight the good fight of faith, before we can lay hold on eternal life. Faith is good. (O for more of it!) but can faith alone save us? We may have faith in salvation by Christ, but unless we comply with the terms of salvation, and are saved by him, what good does our faith do us? We may believe in regeneration, but if we do not realize the new birth for ourselves, of what avail is our belief? "For as the body without the spirit is dead, so is faith without works dead also." So let us go on to perfection; and "strive (harder perhaps than we do) to enter in at the strait gate; for many, I say unto you, will seek to enter in, and shall not be able." Jacob, under the old dispensation, had to wrestle, outwardly, for the blessing; and we, under the new, have to wrestle spiritually. We may seek to enter into eternal life with much conflict, and not be able. We may be willing to wear the crown, but not to bear the cross. Willing to reign with Christ, but not to suffer with him. Willing to accompany him to the mount of transfiguration, but not to Golgotha. Willing to attend him at his glorification, but not in his suffering and death.

The same God over all, that "moved upon the face of the waters" in the old creation, and that said, "Let there be light, and

(there was light," is now, unusually moving on the unstable and fluctuating elements of our chaotic world, in order to bring about a new creation in man. But the old creation was not completed instantaneously, or in a day. And now, in the new creation, we have to advance from glory to glory, even as by the spirit of the Lord, until we are "created in Christ Jesus unto good works." "If ye know these things, happy are ye if ye do them." What I say unto you, I say unto all. Watch."

D. H.

Dublin, Ind., 11th mo. 9th, 1876.

For "The Friend."

It is altogether natural that in the progress of Christian culture and the nearer assimilation of the general professing church to the gospel standard, there should be removed from the minds of very many, some of the false opinions respecting, and of the unreasoning prejudices against Friends, which spring up at the time of their coming forth as a distinct portion of the visible church, and which have been perpetuated by ignorance and bigotry among not a few to the present day. It was also to be expected that Friends would admit among themselves such changes as were necessary to adapt the application of their religious principles to the circumstances of the times in which they lived; always however, guarding against endangering any of those principles, or removing the guards that have been found auxiliary to the preservation of the members in a course of conduct consistent with their profession.

In the early days, while Friends were enduring a great fight of affliction, other religious societies had little or no inclination to be brought into juxtaposition or religious communion with them as an organized body; and Geo. Fox and his faithful co-laborers were deeply concerned to keep their fellow converts a separate and compact people, not going outside the pale of their own Society to unite with others in their arrangements for promoting the spread of the truth, so far as the truth was understood by them. This arose from no want of christian comity, or defect in christian charity, but because they knew that in however many points their faith coincided with that of other believers, the obligations and practices into which it led them were irreconcilable with the errors that were held in their churches, and they felt bound to witness unwaveringly to the doctrines and testimonies that had been sealed upon their understandings by the Spirit of Truth, and to avoid all occasion for subjecting the members unnecessarily to temptation to palliate error in others, or to lower the standard placed in their hands to be kept in the sight of the world. While this Society's isolation was maintained, the influence of Friends in promoting the spread of the gospel truths which they held, was marked by a partial though silent modification of dogmas and practices which, while incompatible with those truths, had been rigidly held by other professors.

On the institution of the British and Foreign Bible Society, some members in England joined therein; but the Yearly Meeting, we believe, never committed itself towards its support, and some of the more experienced and consistent Friends, warned of the danger of members being incorporated or taking an active part with its administration or labors. The door to unrestricted intercourse with

other religious professors, was officially opened when London Yearly Meeting sanctioned the use of the meeting-houses belonging to Friendly ministers of other denominations; since then (perhaps before) it is well known that very many members of that meeting attend the meetings for worship held by Friends, in the morning of the First-day of the week, resort to the meetings of other churches, and other times.

The whole tone of popular sentiment in the present day among those who consider themselves the liberal portion of the members, seems to be that it is worse than needless to hotly attempt to carry out the rigid observance our forefathers, or to maintain any striking peculiarities as connected with our religious profession. It is said—and truly said—there are good people among all religious professions, and therefore it is inferred to we may justly suspect the validity of supposed conscientious convictions, or the right authority of any disciplinary restrictions that tend to keep up a separate identity between Friends and other religious denominations. But at the risk of being considered narrow-minded, we are free to confess to we believe the all-wise Head of the church designed that Friends, as a society, should dwell very much alone, showing forth in life and conversation the fruits of a practical submission to the gospel of life and mortality, being living witnesses that if spiritually the power of God unto salvation, and thus as a city set upon a hill, reflect on others the heavenly light of those adulterated truths, the holding of which distinguish them from different sections of the visible church.

So far from this producing arrogance or spiritual pride, it is fitted to humble and straiten the root of self-esteem; for it cannot be accomplished without daily taking up the cross that crucifies to the world and the world to us, and consistently carrying out the religion we profess. Is it not measurably from the desire to avoid this cross, and rather to seek the honor that comes from men, and that which comes from God only, that so many in our Society appear desirous to assimilate with other religious professors in their mode of propagating what they believe to be the truth, and are prepared to encourage an interchange of what they may look on as religious services.

In this intermingling, the obligation to preserve the "peculiarities" of our high profession is easily overlooked, or it is ignored in deference to the known dissent of those with whom Friends are voluntarily associated, as thus strangers devour their strength and they know it not; the spiritual eye becomes dimmed or blinded, and a train of reasoning is adopted that leads on to an affiliation, that can hardly be mar within our own pale the proper uniform support of all the testimonies of Truth which Friends should ever uphold.

Believing these views to be correct it was pointed, though not surprising, to see, in the extract given in last week's "Friend" by the minutes of the late Indiana Yearly Meeting, that that body had constituted the Bible Association, created by it, and under its control, an auxiliary to the American Bible Society. No one, we think, can read the statement without feeling that the dignity of the Yearly Meeting is lowered, and that it is giving its members a valid ground for refusing to con-

bute their funds—even in so good a work distributing the bible—for disposal by an association altogether outside the religious unity with which they are connected.

We are very far from having anything to boast of in relation to the religious standing of our own Society; nor are we called on to do so. In judgment on the divine acceptability of one who differ from us. Doubtless all those who love the Lord Jesus Christ in sincerity, as accepted by Him, and their religious knowledge or profession what it may. But Friends are and are called to occupy an advanced position in the visible church, and they make great mistake who suppose that remaining exclusively within the limits of that position will circumscribe the influence and usefulness of the Society. Members of other religious denominations are mostly clear-sighted enough to see that by joining hand in hand with them, what is called religious work, Friends soon lose their sensitiveness to the practices and performances they are theoretically opposed to, and are betrayed sooner or later into palpable inconsistencies; they are therefore glad to escape the feeling produced by the active, though it may be silent protest of a Society against that in their faith and customs of which it declares by conscientiousness that it cannot approve.

In social intercourse with others than Friends, we are bound to evince Christian courtesy and love, acting so as "to commend" our religion "to every man's conscience in the sight of God," and thus become preachers of righteousness in life and conversation. It has done more, since the organization of the Society, to convince others of the purer value of the principles held by Friends, and to draw the convinced to them, than joining with other professors in religious services, schemes ostensibly for spreading a knowledge of the gospel can be hoped ever to effect. Such cooperation almost necessarily weakens the hold of true Quakerism on our own members, while it fails to commend it to others. It was said by some in George Fox's days, that the magistrates could not better assist him in promulgating his religion, than shutting him up in prison; for the manner which he bore the cruelties heaped upon him, effectually commended the principles of the gospel for which he was a sufferer.

In a speech by C. H. Spurgeon, at an entertainment given to the members of the "Baptist Union" by the Mayor of Birmingham, it is reported to have said: "He believed it is good for Christians of all sects to meet together. What was a Quaker but an unbaptized Baptist? and what was a Baptist but a baptized member of a Society of Friends? The Quakers were growing small by degrees, and becoming less; probably because they did not do their work so thoroughly; and he hoped that after the extinction of the Quakers, would come the extinction of the Baptists, and that it would not come from lowering their standard, but from so boldly and constantly availing their views, that all Christians would accept them." Whatever may be the result of the Baptists, Friends cannot become extinct but by lowering their standard or rather inserting it, and being merged in the different sects. To bring this about the joining with those sects, as mentioned, is a wide step.

"This life is a passage, not a port."

It is gratifying to observe that in some parts of Europe, public attention has been called to the demoralizing effect which the disregard of the First-day of the week as a day of rest and its use as a public holiday, has upon the community. At a recent meeting of the Rhénish Westphalian Prison Association, held at Düsseldorf, — Schreiber, of Berlin, presented a paper entitled, "Sabbath Desecration in Connection with Crime" in which he stated, that special inquiries sent to various prisons in North and South Germany, resulted in showing that the First-day of the week is that on which a large proportion of crimes have lately been committed in that country. During 1873, 10,823 persons were arrested and confined in 239 German prisons; of these 963 were imprisoned for man-slaughter and bodily injuries. Of this number 380, or about 40 per cent., committed their crimes on the First-day of the week, and in nearly all cases, in drinking saloons. Other statistics showed, that a large proportion of other criminal offences, either took place, or resulted from excesses on that day. After a discussion of the subject, the meeting adopted a resolution stating that the increasing practice of disregarding the observance of the First-day of the week, contributes very materially to the immorality of the youth, as well as of the people generally, and declaring its determination to direct public attention more fully to this important matter, and to take measures to promote the action of civil and other authorities towards diminishing this evil.

Very few men are permitted to be successful; very few men are permitted to be wise; very few men are permitted to be eloquent; very few men are qualified to be statesmen; very few men are good for anything eminent; and even those who are eminent are men of like passions with everybody else. Therefore be not discouraged because it is your lot to be in humble circumstances—because work is insignificant in the eyes of men—because you are called to labor in obscurity. The time is coming when all earthly distinctions will be of very little account.

THE FRIEND.

ELEVENTH MONTH 25, 1876.

The Yearly Meeting of North Carolina commenced at New Garden on Sixth-day, the 3d of the present month, and closed on the 9th inst. The attendance was not thought to be as large as has usually been the case, in part owing to the warm interest felt in the result of the State and national elections which took place during the week of the Yearly Meeting, and which caused many Friends to remain at home, that they might vote. The public meetings for worship on First and Fourth-days, were numerously attended by the public generally—some coming from a distance of many miles to be present—as has long been customary.

Among the subjects of general interest that were considered, was an application from their members in East Tennessee to be set apart as a separate Yearly Meeting. The absence of a railroad route through the mountains, compels these to make a long detour via Lynchburg in Virginia, in going to the Yearly Meeting, causing a journey of about 500 miles

and a considerable pecuniary expense. Those Friends could attend a Yearly Meeting at so distant a point as Philadelphia, at a less cost of time, money, and travel, than at New Garden. A committee was appointed to visit them, and report next year. The number of members residing in East Tennessee is said to be 935.

The testimony borne by Friends during the late civil war to the principles of peace, and the sufferings which many underwent for their refusal to bear arms, seem to have given them in large measure the confidence and respect of the community in which they reside; so that there is much openness to receive visits from the ministers of our Society. One token of this, was a friendly message sent to the Yearly Meeting from a Methodist Protestant Conference. The bearer of it was introduced into the Yearly Meeting, and an opportunity given him of delivering the message.

Though the existence of this kindly feeling is a pleasant fact, yet care is needed, lest Friends should be induced thereby to affiliate with other societies; and fall short in the faithful upholding of their own principles. The ministers of other societies are accustomed to commence their vocal services, when the usual time for preaching or praying has arrived, even if their minds are not brought under that religious exercise, without which no man can preach with right authority. If betrayed to imitate their example, we throw away one of our most important testimonies, as to the ground and character of Gospel ministry and true spiritual worship.

A committee which had been appointed a year ago, to revise the discipline, proposed some alterations, which were adopted by the meeting. The changes appeared to be similar in character to those made recently by London Yearly Meeting. Several worthy Friends were uneasy with them, but the current of expression was in their favor.

In the consideration of the state of Society, the answers to the Queries showed many deficiencies in regard to attendance of meetings, and some as to the maintenance of love and unity. Care was taken to discourage the use of intoxicating liquors and tobacco; and with satisfactory results.

The statistics set up this year showed the number of established meetings to be 28, and of members 4275. Of these 1148 were between the ages of 5 and 18—a proportion of about 27 to 100—while in Philadelphia Yearly Meeting, the proportion of children between those years, to the whole number of members is only about 16 to 100—a striking illustration of the effect produced on the social condition of a people by their habits and manner of life. The number received by certificate during the year was larger than of those who had so removed. This would indicate that the depleting process by which other Yearly Meetings had grown at the expense of that of North Carolina, no longer continued.

It seemed very desirable to finish the business on Fifth-day, as a large number of Friends had already left to return home; and if a session had been held on Sixth-day, it was probable but a small proportion of the members would have been present. So much of the time on previous days had been otherwise occupied, that there remained about twenty-five distinct subjects to consider, counting all the epistles to other Yearly Meetings as one subject. To prevent the recurrence of this an-

other year, it was concluded to commence one day earlier, that is, on the Fifth day preceding the first First-day in the 11th month—so that the meeting might finish its business before the public meeting for worship on the following Fourth-day.

The meeting closed after a session of about 5½ hours.

A few months since we published a notice of a conference of Friends, held at Belper, England. The object of this conference appeared to be, to strengthen the hands of Friends in upholding the primitive doctrines of our Society—an object which was undoubtedly sympathized with by many, who did not partake in the deliberations of that meeting.

Since that time there has been a discussion in the columns of "The British Friend," of matters growing out of this conference; especially of a charge, that innovations as to our distinguishing principles had been introduced into the Society. One of the writers for that journal having stated that no evidence had been produced of such defection, its last issue (dated 11th mo. 1st) contained two letters in reply. One of these, written by a member of the conference, adduces specific proofs of the truth of the allegations; the other, from the pen of one who did not attend that meeting, contains so clear and forcible an exposition of the fundamental truths which are involved in the controversy now going on in our Society, that we have transferred it entire to our columns, under the heading "The Belper Conference."

There are many evidences that the minds of some under our name, are being brought to a sense of the dangers to which our beloved Society is exposed by the changes growing out of a departure from our fundamental principles; but we must desire, that a more thorough and general awakening may be experienced. We believe there are very many, in all parts of our religious body, of well-meaning but unsuspecting Friends, who are being led astray by the preaching, writing and conversation of those whose doctrinal views are not in unison with those held by George Fox and his fellow-laborers; and who, in professing to be Friends, "are sailing under false colors," as this letter states.

SUMMARY OF EVENTS.

FOREIGN.—The particulars of the recent hurricane at Porto Rico and other parts of the West Indies, show the storm to have been of great violence. The destruction of property on land and at sea was very great. No less than forty-five vessels were wrecked wholly or partially.

The German government does not propose taking any part in the Paris International Exhibition of 1878.

An official journal of the Russian government reports the whole number of fires throughout the empire in 1875, to have been 27,575, of which 6,526 were attributed to negligence, and 3,669 to design. In more than half the cases the causes could not be correctly ascertained. The value of the property destroyed was estimated at 64,696,896 roubles, or \$51,277,516.

The Italian census for 1875 shows that on the last day of the year the country had a population of 37,722,184. It had increased 671,039 since 12th mo. 31st, 1871; Austria, 192,922; Italy, 4,777,890; Prussia, 2,929,265; Belgium, 2,167; Switzerland, 1,295; and Holland, 1,911. In proportion to area Belgium has the greatest railway mileage of any country in the world.

The Spanish Minister of the Interior has laid before the Cortes a bill restoring the electoral law formerly in vogue in Spain. This bill abolishes universal suffrage, establishes voting by departments, and grants suffrage only to persons paying a certain amount of taxes and to members of certain professions.

A St. Petersburg dispatch of the 19th says: "The St. Petersburg bank has been authorized by an Imperial ukase, dated November 18, to receive subscriptions for an issue of 100,000,000 roubles in bank notes, bearing interest at five per cent, the issue price to be 92. The *Official Gazette* says this loan is rendered necessary by the extraordinary expenditures in view of the present political situation. It hopes all classes will subscribe."

The Turkish Grand Council have formally agreed to the proposed conference. Turkey will be represented by Midhat Pasha and Saïdet Pasha.

The terrific cyclone which devastated Eastern Bengal on the 31st ult., is now found to have been attended with far greater loss of life than was at first reported. A dispatch from Calcutta, published in the London Times says, three large islands, namely, Hattich, Sundeep and Dakhin Shahobazore, and numerous smaller islands in the districts of Chittagong and Chittagong districts were entirely submerged by the storm wave of October 31st, as was also the mainland for five or six miles inland. These islands are all situated in or near the estuary of the river Meena. The largest, Dakhin Shahobazore, was 8,900 square miles in extent, and had a population of 90,000. Hattich and Sundeep together had about 100,000 population.

Up to 11 o'clock on the night of the 31st, there was no sign of danger, but before midnight a wave swept over the country to a depth in many places of twenty feet, surprising people in their beds. Dense groves of cedars and palm trees around the villages enabled many to save themselves by climbing among the branches, and some took refuge on the roofs of their houses; but the water burst the houses asunder and swept them out to sea. Some were carried thus across the channel to the island of Chittagong district, but a vast majority were never heard of again.

The country is perfectly flat, and almost every one perished who failed to reach the trees. There is scarcely a household on the island and on the adjacent coast but lost many members. The cattle are all drowned. The boats were swept away, and many of the islands, with other districts is destroyed. There is much distress among the survivors, which the government is relieving. The *Government Gazette* says: Wherever the storm-wave passed it is believed not a single of the population survived. The islands have barely one-fourth of their former inhabitants.

The Marquis of Salisbury, who has been appointed special Ambassador to act with Sir Henry Elliott as English Plenipotentiary at the approaching conference on Turkish affairs, left London on the 20th with his family for Constantinople, by way of the continent. He will be met at Berlin, Vienna and Vienna for consultation with the respective foreign ministers.

London, 11th mo. 20th.—Consols 95.54. Liverpool.—Middling uplands cotton, 6½d. Orleans, 6.9-16.7.

UNION STATES.—There were 324 internments in Philadelphia last week. The official count of the election returns in this city was not completed till the 14th inst. It shows the vote on the 7th inst. to have been much the largest ever polled in Philadelphia, the total having reached 139,963. Hayes' majority 14,975. The official return of the election in Ohio shows that the number of votes cast was 656,619, and Hayes' plurality over Tilden was 7,516. Three other candidates received 4769 votes.

The late census of Massachusetts shows the total population of the State to be 1,651,912, of whom 794,383 are males and 857,529 females. The number of legal voters is 351,113.

Private advices from General Crook indicate that he thinks the Indian war will soon be over. He says that there are very few Indians on the war path now except the band under Crazy Horse, which is not large, and are not so numerous as they were. The band of Sitting Bull, and are supposed to have gone north with him.

A Texas cattle drover recently purchased in the southwestern section of the State of Texas, 10,000 head of cattle and 2000 horses, for \$140,000 in silver, which is equal to \$1,400,000 in gold.

The uncertainty in relation to the Presidential election continued up to the 20th inst. In Florida the vote is said to be very close, and the majority on either side quite small. South Carolina is officially returned for 1½ years by the return board of that State under the order

of the Supreme Court directing the board to count the vote without exercising any judicial function. revision. The vote was Hayes 97,786; Tilden 90,860; Republican majority 980. The Louisiana return board promise that the count of the vote for that State shall be fair, open and honest, and have consisted of representative men of both parties shall be present when the official canvass is made.

"The official count of Maryland's vote gives Tilden 91,780; Hayes 71,981. In Virginia the vote was Tilden 139,512; Hayes 95,268.

The Markets, &c.—In the following were the quotations on the 20th inst. New York.—American gold, 110. Superfine flour, \$4.50 a \$5.05; State extra, \$5.25; \$5.50; finer brands, \$6 a \$10.00. Extra white winter wheat, \$1.40; No. 2 red winter, \$1.39; No. 3 Chicago spring, new, \$1.21. No. 2 mixed oats, 89 cents; No. 3 State, 84 a 92 cents. State rye, 90¢ cts. Yellow corn, \$1.00. Philadelphia.—Flour and New Orleans extra, 12 a 12½ cts. Flour, 4 a \$9.00. Pennsylvania wheat, \$1.27 a \$1.30; Delaware amber, \$1.35 a \$1.70; western white, \$1.35 a \$1.38. Penna. rye, 72 a 73. Southern, 68 cts. Yellow corn, 61 cts.; mixed wheat, 87.50 a 90 cts. White, white oats, a 49 a 50 cts. Western fine, Old, 12 a 13 cts. Siles of 1000 lb. cut off 5½ a 6½ cts. per lb. gross for extra; 4½ a 5½ cts. fair to good, and 4 a 4½ cts. for common. Sheep, 6 cts. 50 per lb. gross. Receipts \$900 head. H. \$7.50 a \$8.00 per 100. Receipts \$800. H. \$1.00. No. 2 spring wheat, \$1.10; No. 3 do, \$1.05; Oats, 32½ cts. Bye, 62 cts. Barley, 71 cts. Lard, cts. *Chicoutini*.—Family flour, \$5.00 a \$5.80. wheat, \$1.25 a \$1.30. Old corn, 48 cts.; new, 40 cts. Rye, 68 cts. Lard, 10½ cts.

"The Germantown Employment Society for Women offers for sale, at low prices, warm garments for women and children. Ten per cent. taken off on orders of Twenty Dollars or over.

Apply to MARTHA H. GARRET, Green and Court streets, Germantown, Philadelphia.
11th mo. 1876.

FRIENDS' ASYLUM FOR THE INSANE
Near Frankford, (Twenty-third Ward), Philadelphia
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

DIED, suddenly, on the 31st of Fifth month, 1876, the residence of her son, ELIZABETH P., wife of Benjamin S. S., of New York, aged 80 years, who had been a Monthly Meetings, Iowa, in the 73d year of her age. She was firmly attached to the principles of the Religious Society of Friends, and has left to survivors her example, the impressive invitation, "Follow as I have followed Christ."

On the 25th of 8th mo. 1876, ANNA E. COBB in the 82d year of her age, a member and elder of 8d water Monthly Meeting, Belmont Co., Ohio. A shock of corn cometh in its season, and as a servant waiting for his Lord, we believe she was found in readiness with lamp trimmed and light burning. She was ever in patience and innocent sweetness, ever the benefit of resignation to the Divine will in things, leaving to her friends the consoling assurance that her purified spirit has entered into the longed rest. "Behold an Israelite indeed, in whom there is guile."

At his residence, near Fallington, Bucks Co., Pa., on the 4th-day, the 1st of Eleventh month, by JOHN B. BALDWIN, a much esteemed elder member of Falls Monthly Meeting of Friends, in 75th year of his age. This dear Friend endured a lingering illness with patience and meekness. A quiet pillar in the church, and a faithful laborer, whose trumpet gave no uncertain sound; tenderly looking forward, active spirits, while he ever had a word of encouragement to the humble, exercised and earnest christian traveller. His innocent and watchful life was ever in patience and innocent sweetness, ever marked with more than ordinary unction.

He was in New York, on the 17th ult., THOMAS EDWARD BROWN, only son of Edward and Mary Brown, in his 20th year, a member of New York Monthly Meeting.

THE FRIEND.

PHILADELPHIA.

For "The Friend."

Cashmere.

Andrew Wilson writes as follows respecting this region, (which he calls Kashmir) and his entrance into it from the Himalaya. Almost every one longs, and many hope, to see the beautiful vale of Kashmir. "Probably to region of the earth is so well known to the eye of imagination, or so readily suggests the idea of a terrestrial Paradise. So far from being disappointed with the reality, or having experienced any cause for wishing that I had left Kashmir unvisited, I can most cheerfully say that the beautiful reality exceeds somewhat vague poetic vision which has been associated with the name. But Kashmir rather a difficult country to get at, especially when you come down upon it from behind by way of Zanskar and Sürü. According to tradition, it was formerly the Garden of Eden; and one is very well disposed to accept that theory when trying to get into it from the north or north-west. Most people go up to it from the plains of India by one of four authorized routes; but I have a habit of getting into places by some quite unusual way, and did so in this instance."

Wilson gives a detailed account of the dangers and hardships endured by himself and party in making the descent of 10,000 feet on "The Abode of Snow," before the vale of Cashmere gladdened the sight of the weary travelers. He proceeds: "But I have not yet got even into the outskirts of the Garden of Eden. Zogli-ha had to be crossed; and though it is a very easy pass, and set down by the trigonometrical survey as only 11,300 feet high, yet I have heard, and suspect, that a mistake has been made there, and that nearly thousand feet might have been added to it."
* * * Though it seemed to me nothing after what I had gone through, yet this pass just has a formidable appearance to travelers coming upon it from below, judging of the description given of it by Dr. Henderson, an ornithologist of the first of Sir Thomas Forsyth's missions to Yarkund. He says, the road we had ascended was in many places rather trying to the nerves, being very steep, and sometimes consisting merely of a platform of brushwood attached to the face of the precipice. This road, owing to its steepness, quite impassable for baggage animals after a fall of snow, and it is then necessary to wait at Baltal until the snow has melted, or to fol-

low the stream up a very narrow rocky gorge, with precipices from 500 to 1000 feet on either side. This gorge, however, is only practicable when filled up by snow to about fifty feet in depth, as it usually is early in the season; it is then the usual route; and at that season to avoid the avalanches, it is necessary to start at night and get over the pass before sunrise. Avalanches do not fall until late in the day, after the sun begins to melt the snow."

I do not think the road has been improved since Dr. Henderson passed over it, but the great interest of it is that it leads suddenly down upon the beautiful wooded scenery of Kashmir. After months of the sterile, almost treeless Tibetan provinces, the contrast was very striking, and I could not but revel in the beauty and glory of the vegetation; but even to one who had come upon it from below the scene would have been very striking. There was a large and lively encampment at the foot of the pass, with tents prepared for the Yarkund envoy, and a number of Kashmir officers and soldiers; but I pushed on beyond that, and camped in solitude close to the Sind river. This place is called Baltal, but it has no human habitations. Smooth green meadows, carpet-like and embroidered with flowers, extended to the silvery stream, above which there was the most varied luxuriance of foliage, the lower mountains being richly clothed with woods of many and beautiful colors. It was late autumn, and the trees were in their greatest variety of color; but hardly a leaf seemed to have fallen. The dark green of the pines contrasted beautifully with the delicate orange of the birches, because there were intermingling tints of brown and saffron. Great masses of foliage were succeeded by solitary pines, which had found a footing high up the precipitous crags. And all this was combined with peaks and slopes of pure white snow. *Aiguilles* of dark rock rose out of beds of snow, but their faces were powdered with the same element. Glaciers and large beds of snow ran down the valleys, and the upper vegetation had snow for its bed. The effect of sunset upon this scene was wonderful; for the colors it displayed were both heightened and more harmoniously blended. The golden light of eve brought out the warm tints of the forest; but the glow of the reddish brown precipices, and the rosy light upon the snowy slopes and peaks, were too soon succeeded by the cold grey of evening. * * *

The remainder of my journey to the great valley or small plain of Kashmir was delightful. A good deal of rain fell, but that made one appreciate the great trees all the more; for the rain was not continuous, and was mingled with sunshine. The air was soft and balmy; but, at this transfer from September to October, it was agreeably cold even to a traveller from the abodes and sources of snow. As we descended, the pine forests were confined to the mountain-slopes; but the lofty

deodar began to appear in the valley, as afterwards the sycamore, the elm and the horse chestnut. Round the picturesque villages, and even forming considerable woods, there were fruit trees—as the walnut, the chestnut, the peach, the apricot, the apple, and the pear. Large quantities of timber (said to be cut recklessly) was in course of being floated down the river; and where the path led across it, there were curious wooden bridges, for which it was not necessary to dismount. This Sind valley is about sixty miles long, and varies in breadth from a few hundred yards to about a mile, except at its base, where it opens out considerably. It is considered to afford the best idea of the mingled beauty and grandeur of Kashmir scenery; and when I passed through, its appearance was greatly enhanced by the snow, which not only covered the mountain tops, but also came down into the forests which clothed the mountain sides. The path through it, being part of the great road from Kashmir to Central Asia, is kept in tolerable repair, and it is very seldom that the rider requires to dismount. Anything beyond a walking pace, however, is for the most part out of the question. At Ganderbal I was fairly in the great valley of Kashmir, and encamped under some enormous sycamore trees; the girth of one was so great that its trunk kept my little mountain tent quite sheltered from the furious blasts. Next day a small but convenient and quaint Kashmir boat took me up to Strinagar; and it was delightful to glide up the back-waters of the Jehlam, which afforded a highway to the capital. It was the commencement and the promise of repose, which I very seriously needed, and in a beautiful land.

At Strinagar, where I stayed for a fortnight, I was the guest of the Resident Mr. Le Poer Wynn, whose early death has disappointed many bright hopes. I had thus every opportunity of seeing all that could be seen about the capital, and of making myself acquainted with the state of affairs in Kashmir. Afterwards went up to Islamabad, Martand, Achibal, Vernag, the Rozlu Valley, and finally went out of Kashmir by way of the Manas and Wular lakes, and the lower valley of the Jehlam, so that I saw the most interesting places in the country, and all the varieties of scenery which it affords. I shall only touch generally upon its characteristics. It doubtless owes some of its charm to the character of the regions in its neighborhood. As compared with the burning plains of India, the sterile steppes of Tibet, and the savage mountains of the Himalaya and of Afghanistan, it presents an astonishing and beautiful contrast. After such scenes, even a much more common-place country might have afforded a good deal of the enthusiasm which Kashmir has excited in Eastern poetry, and even in common rumor; but beyond that it has characteristics which give it a distinct place among the most pleasing regions of the earth. I

said to the Maharajah, or ruling Prince of Kashmir, that the most beautiful countries I had seen were England, Italy, Japan and Kashmir; and though he did not seem to like the remark much, probably from a fear that the beauty of the land he governed, might make it too much an object of desire, yet there was no exaggeration in it. Here at a height of nearly 6000 feet, in a temperate climate, with an abundance of moisture, and yet protected by lofty mountains from the fierce continuous rains of the Indian south-west monsoon, we have the most splendid amphitheatre in the world. A flat oval valley about sixty miles long, and from forty to fifty miles in breadth, is surrounded by magnificent mountains, which, during the greater part of the year, are covered more than half way down with snow, and present vast upland beds of pure white snow. This valley has fine lakes, is intersected with water courses, and its land is covered with brilliant vegetation, including gigantic trees of the richest foliage. And out of this great central valley there rise innumerable, long, picturesque mountain valleys, such as that of the Sind river, which I have just described; while above these there are great pine forests, green slopes of grass, glaciers, and snow. Nothing could express the general effect better than these lines on Lebanon:

Whose head in wintry grandeur towers,
And whittens with eternal sleet;
While Summer, in a vale of flowers,
Is sleeping rosy at his feet.

The great encircling walls of rock and snow contrast grandly with the soft beauty of the scene beneath. The snows have a wonderful effect as we look up to them through the leafy branches of the immense sycamore, elm and poplar trees. They flash gloriously in the morning sunlight above the pink mist of the valley-plain; they have a rosy glow in the evening sun-light; and when the sun-light has departed, but ere darkness shrouds them, they gleam afar off with a cold and spectral light, as if they belonged to a region where man had never trod. The deep black gorges in the mountains have a mysterious look. The sun lights up some softer grassy ravine or green slope, and then displays splintered rocks rising in the wildest confusion. Often long lines of white clouds lie along the line of mountain-summits, while at other times every white peak and precipice wall is distinctly marked against the deep blue sky. The valley plain is especially striking in clear mornings and evenings, when it lies partially in golden sunlight, partly in the shadow of its great hills.

The green mosaic of the level land is intersected by many streams, canals and lakes, or beautiful reaches of river which look like small lakes. The lakes have floating islands composed of vegetation. Besides the immense sycamores and elms, and the long lines of stately poplars, great part of the plain is a garden filled with fruits and flowers, and there is almost constant verdure.

It is a pity that so beautiful a country should not have a finer population. At the entrances of the valleys, looking at the forests, the rich cultivated lands, and the unused water power, I could not but think of the scenes in England.

Where I was extent than seen Arabian pride,
And brighter streams than fared Hyades glide!
My mind reverted also to the flashing snows

of the American Sierra Nevada, the dwarf oaks and rich fields of wheat, the chubby children, the comely well-dressed women, and the strong stalwart men of California. For though the *chalets* were picturesque enough at a little distance, they could not bear a close examination; and there was not much satisfaction to be had in contemplating the half-starved, half-naked children, and the thin, worn-out looking women. One could not help thinking of the comfortable homes which an Anglo-Saxon population would rear in such a land."

Except that the women have nearly all fine eyes, the reported beauty of Cashmere women, in Wilson's opinion, rests on very slight foundations. He considers them generally plain and many remarkably ugly.

The manufacture of the celebrated Cashmere shawls has greatly declined, but is still of considerable importance, and about £130,000 worth of them is annually exported, of which £90,000 worth goes to Europe. It is only on the wind-swept steppes of Central Asia that the goats produce so fine a hair as is employed in making the most costly shawls, some of which sell even in Cashmere for \$1500 each. The shawl-weavers get miserable wages, and are allowed neither to leave Kashmir nor change their employment, so that they are nearly in the position of slaves; and their average wages are only about three cents a day.

Cashmere which had once four millions of inhabitants, has now only about 500,000 in consequence of repeated invasions and desolating wars.

An Old Allegory.—I read in my boyhood, and have not forgotten, the story of the sluggard and the alarm-clock. A certain man was by nature sluggish and lazy, and as he began to feel the weight of disease upon him he called a physician. The physician prescribed healthful diet and exercise, and especially early rising. The man objected to early rising on the plea that he could not wake up.

"Then get an alarm-clock," said the doctor. "You must rise early if you would have your health."

So the man purchased an alarm clock, and set it up in his sleeping chamber, and at the appointed time the startling whir and clang of the machinery awoke him *instanter*. He was up and dressed in season to see the sun rise, and he really felt brighter and better for the effort. The clock, being regularly wound and set, faithfully performed its office, and while the man was punctual in his obedience to its summons it awoke him with the rising of the sun. But by and by he allowed himself to question the real benefit of this early rising. It often seemed to him that a little more sleep would be pleasant. So one morning, after the faithful monitor had aroused him, he closed his eyes and took another nap. This was repeated until the clock ceased to break his slumber. The sharp bell changed as loud as ever, but he had become deaf to its warning. He did not hear it, because he had contracted the habit of disobeying it.

And so it is with conscience. It is a monitor which, in the morning of life, gives healthful warning to all; but let us once begin to question the need of obeying it—let us disobey its dictates, even in trifling particulars—and very soon it will cease to admonish us; and after a time, by continual disregard, we might fall asleep over a volcano, and con-

science would not have the power to arouse us.

From "Piety Promoted!"

James Brandwood.

James Brandwood was the eldest son. John Brandwood, of Entwistle, in the parish of Bolton, in Lancashire, and was born in it. Eleventh month, 1739.

Having left behind him an account in writing, of his early experience in the work of religion, the following abstract is taken, nearly in his own words, from this narrative. "I pleased the all-wise and gracious God, who gave me being, to follow me by his grace, even from my youth, often bowing my mind in serious consideration, that I was placed here as on his footstool, for a short space of time, and must ere long remove to appear before his judgment seat; also, how short an transient present enjoyment are, compared with the eternal nature of the life to come, whereby my mind was led to conclude, that world is not my resting-place, the life to come is my home, eternity is the chief end and design of my being.

"Running in my own will and strength, from year to year, I heard sermons, read many books, and talked with professors; some said one thing and some another; I then began to read the Scriptures more; but alas! they were to me in many places, as a sealed book. I prayed often in secret places, and learned to sing, thinking I was thereby preparing myself to join the heavenly host. I talked with religious professors about doctrinal points, and endeavored to form as just notions and opinions about the coming, life, doctrines, sufferings, and death of Christ, as I could; and then I called faith. But this faith not proceeding from the quickening power of Divine grace, but from the workings of the natural understanding, was a dead faith, and could not be an evidence of things not seen, nor work a love to the purifying of my heart, so as I gave victory over the various sinful lusts and vanities of this world; but on the contrary, was abundantly overcome thereby, from day to day.

"In this condition I travelled long, and was sorely tossed between the secret reproaches of Divine grace in my conscience, and the workings of the adversary. About the twentieth year of my age, it pleased God, in unspeakable mercy, further to enlighten my soul through the Spirit of his Son, as with the day spring from on high, whereby I was enabled to see more clearly my fallen and corrupt state, and my sins were set in order before me, appearing exceedingly sinful, and opposite to the holy will of God. In this day, at my former building in religion was shaken to its very foundation. In this situation I cried, 'Oh! what shall I do? to whom shall I flee for help in this sinful state? I cannot dwell with Him that is holy.'

"The Scriptures now began to be more opened to my understanding; and though was told, that by a certain ceremony, which was made performed in my infancy, I was made a member of Christ, a child of God, and an inheritor of the kingdom of heaven, yet I did not see the opening of the Scriptures to my true standing. I saw this could not be true; for there I was informed, that the members of Christ were made such by other means, even by his own baptism with the Spirit, as said the apostle, 'By one Spirit are we all baptize

to one body; and that, 'if any man be in Christ, he is a new creature.' I also saw, that the children of God were such as were begotten of Him through Christ, the incorruptible and Word of God, and born again unto wisdom of life, bringing forth the fruits of the spirit. And that the kingdom of heaven and government of Christ are within, by the influence of His spirit, which as a pure principle His children and people, rulers and leaders, are in His service.

"I also saw, that all my prayers and songs praise had been a sacrifice of my own prostration, and offered up in my own vain imagination, in a fallen and unconverted state; and that it was only in and through the Spirit at God could be acceptably worshipped.

"I also saw, that all my former faith was no more than a bare assent of the natural understanding to certain things whereof I had no evidence, but what arose from the letter of Scripture, and other outward means; whereas,

in the opening of the Scriptures, I saw that he that believeth hath the witness in himself, even the Spirit of Him who is the Author and Object of true and living faith, by which the quickened soul received an evidence of things not seen, and an humble confidence in the saving power and redeeming love of God through Christ. I also saw, that I had trusted too much in, and been carried about with, the changeable doctrines of men, and neglected the teachings of the grace and good spirit of God in my soul, which, as a swift witness against evil, had followed me with inward and secret reproof, even from my infant years.

"As I was brought more and more into illness, and bumbled under the Divine hand, the Light of Christ arose, and more enlightened my mind; whereby I saw into the purity of that faith which was once delivered to the saints, and that holy religion, which, through the power of Divine grace, was taught, and which wrought in the primitive believers in Christ. As these things opened in my view, a strong persuasion arose therefrom, that it was not my duty to join any of the various professions of religion with which I was acquainted; and if, at any time, I tried to join with any of them, it brought distress and trouble over my mind. I then said in my heart, 'Is there no people on earth preserved in the simplicity of the Truth, with whom I can unite?' Whereupon it came into my mind to go to a meeting of the people called Quakers; a people of whose religious principles I had very little knowledge, neither did I know more than one person of that persuasion. Being encouraged by repeated drawings of my mind towards them, I went many miles to one of their meetings, accompanied by several others.

"Being sat down in the meeting, which was but small, my mind was seized with great surprise, considering the vast difference between that multitude of words and ceremonies to which I had been accustomed, and the solemn silence in which we sat; and the breathing of my spirit was, 'If this be right, confirm it to me this day.' After some time, my mind was brought into more stillness, desiring to unite in the solemn pause, in which Divine goodness favored my soul with a sense of His gracious presence, and the promise of Christ opened to my mind with great sweetness, though I had not understood it before. Where two or three are gathered together in

my name, there am I in the midst of them.' In this my soul rejoiced, and said, 'This is the truth, this is what I have long been seeking for.' Towards the latter part of the meeting some testimonies were borne in great simplicity and plainness of speech, but in the demonstration of the Spirit.

"When I came amongst this people, I met with great opposition, both from professors and profane; but knowing in whom I had believed, and that his power is greater than he that is in the world, my faith was strengthened, and my spirit frequently bowed before Him for help and support in that day; in which, blessed be his name, I often found his secret hand underneath, enabling me to stand in patience, and bear the cross."

James Brandwood appears to have been early made instrumental to the convincing of several others, of the truth of our religious principles, and became a member of our Society in the year 1761; and a meeting was shortly afterwards settled at Edgeworth, where he resided many years. Soon after he was admitted amongst Friends he spoke as a minister. His offerings in that character were concise, forcible, and comprehensive; and being concerned reverently to wait for the renewed influence of the Lord's power, they were acceptable to his friends. In consequence of his joining our Society, he was disinherited by his father, who died when his son was forty-seven years of age.

After this, for many years he followed the profession of a land-surveyor and conveyancer; he was never married, and lived most of his life in a retired part of the country. He was a plain countryman, possessed of a good understanding, but had not the advantage of a liberal education. Few men appear to have been more free from the love of the interests of this world; but Christian virtues and unobtrusive deportment, combined with his cheerful and instructive conversation, gained him the general esteem of all classes with whom he had intercourse. He was scrupulously tender of the reputation of others, so that his most intimate friends scarcely ever heard him speak to the disadvantage of an absent person.

In the decline of life, however, through a combination of circumstances, he became less diligent in the attendance of our religious meetings, and, in the course of a few years, was discontinued as an acknowledged minister; yet he was enabled to bear, with becoming patience, some deeply trying circumstances, which during this period were permitted to attend him. After some time, it pleased his gracious Lord to re-animate his love to his brethren, and he was again acceptably engaged in the work of the ministry. Early in the year 1824, he removed to West Houghton, near Wigan, and some months afterwards was reinstated as an acknowledged minister. Notwithstanding his advanced age, being in his eighty-fifth year, he was diligent in attending meetings, clear and instructive in ministry, much to the comfort and edification of his friends; and his society was pleasant and instructive to them.

Towards the close of the following year, he became unwell, from which time to his death, he was mostly confined to the house. During his illness, he was preserved in patient resignation, and he was enabled to communicate much valuable counsel. At one time, he requested that passage of Scripture to be read, in which the apostle says, "We preach Christ

crucified, unto the Jews a stumbling block, and unto the Greeks foolishness; but unto them who are called, both Jews and Greeks, Christ, the power of God, and the wisdom of God;" on which he exclaimed, "Wonderful, and very good," and after a few minutes silence, added, "This passage dwelt very much upon my mind whilst in bed this morning;" and he expressed his surprise, that any seriously-thinking man, with the New Testament in his hand, could be drawn into that dangerous disbelief and practice, of reasoning away the propitiation and atonement of Christ, who was crucified for our sins. Adding, "Such as are favored with a sense of their own unworthiness, and the exceeding sinfulness of sin before God, as they humbly seek unto Him for help, come to know that he is also Christ, the wisdom of God, and the power of God."

Three days before his death, in the course of an interesting conversation, he remarked to this effect: "I have indeed lived a great while, and have seen a good deal, both of good and evil; and having, through Divine mercy and forgiveness, got through all, I feel my mind very comfortable, and am thankful I am thus favored." The following day, on its being remarked by one who came to visit him, that he had been a good liver, he replied, deeply affected: "It is not for any righteous-ness of my own that I shall gain acceptance; but all my hope is in the mercy of God in Christ Jesus." After a pause, though then very weak, he was enabled to speak for some time on the fall of man, and his restoration through the atoning sacrifice of our Lord Jesus Christ; but which, he added, it is not the duty of believers to nicely to define or explain; but rather to wait for his spiritual appearance in their own hearts. This was his last religious communication, and he peacefully departed this life, on the 23d of the Third month, 1826.

A Physician's Story.

Dr. Munro, of Hull, gives this incident in his life as a practising physician. It is a story with an unmistakable moral:

"A hard-working, industrious, God-fearing man, a teetotaler of some years' standing, suffering from an abscess in the hand, which had reduced him very much, applied to me for advice. I told him the only medicine he required was rest; and to remedy the waste going on in his system, and to repair the damage done to his hand, he was to support himself with a bottle of stout daily. He replied:

"I cannot take it, for I have been a teetotaler for some years."

"Well," I said, "if you know better than the doctor, it is no use applying to me."

He looked anxiously in my face, evidently weighing the matter over in his mind, and sorrowfully replied:

"Doctor, I was a drunken man once, and should not like to be one again."

He was, much against his will, prevailed upon to take the stout, and in time he recovered from his sickness. When he got well, I, of course, praised him for the virtues of stout as a means of saving his life, for which he ought ever to be thankful. I rather lectured him on being such a fanatic (that's the word) as to refuse taking a bottle of stout daily to restore him to his former health.

I lost sight of my patient for some months; but I am sorry to say that on one fine sum-

mer's day, when driving through one of the public thoroughfares, I saw a poor, miserable, ragged-looking man leaning against the door of a common public house, drunk, and incapable of keeping an erect position. Even in his poverty, drunkenness and misery, I discovered it was my teetotal patient, whom I had not so long ago persuaded to break his pledge. I could not be mistaken. I had reason to know him well, for he had been a member of a Wesleyan Church, an indefatigable Sunday-school teacher, a prayer leader, whose earnest appeals for the salvation of others I had often listened to with pleasure and edification. I immediately went to the man, and was astonished to find the change which drink, in so short a time, had made in his appearance. With manifest surprise, and looking earnestly at the poor wretch, I said:

"S, is that you?"
 "Yes, it's me. Look at me again; don't you know me?" he answered, with a staggering reel and clipping his words.

"Yes, I know you," I said, "and I am grieved to see you in this drunken condition. I thought you were a teetotaler?"

"I was before I took your medicine," he answered, with a peculiar grin upon his countenance.

"I am sorry to see you disgracing yourself by such conduct. I am ashamed of you."

Rousing himself, as drunken people will at times, to extraordinary effort, he scoffingly replied:

"Didn't you send me here for my medicine?"

And with a delirious kind of chuckle he hiccupped out words I shall never forget:

"Doctor, your medicine cured my body, but it damned my soul!"

Two or three of his boozing companions, hearing our conversation, took him under their protection, and I left. As I drove away my heart was full of bitter reflections, that I had been the cause of ruining this man's prospects, not only for this world, but for that which is to come. You may rest assured I did not sleep much that night. The drunken aspect of that man haunted me, and I found myself weeping over the injury I had done him. I rose up early the next morning and returned to his cottage, with his little garden in front, on the outskirts of the town, where I had often seen him with his wife and happy children playing about, but found, to my sorrow, that he had moved some time before. At last, with some difficulty, I found him located in a low neighborhood, not far distant from the public house he had patronized the day before. Here, in such a home as none but a drunkard could inhabit, I found him laid upon a bed of straw, feverish and prostrate from the effects of the previous day's debauch, abusing his wife because she could not get him some more drink; she standing aloof, with tears in her eyes, broken down with care and grief, her children dirty and clothed in rags—all friendless and steeped in poverty!

What a wreck was that!

Turned out of the Church of which he was once an ornament, his religion sacrificed, his usefulness marred, his hopes of eternity blasted, now a poor, dejected slave to his passion for drink, without mercy and without hope!

I talked to him kindly, reasoned with him, succeeded him until he was well, and never lost sight of him or let him have any peace until he had signed the pledge again.

It took him some time to recover his place in the Church, but I have had the pleasure of seeing him restored. He is now, more than ever, a devoted worker in the Church, and the cause of temperance is pleaded on all occasions. Can you wonder, then, that I never order strong drink for a patient now?

DAY BY DAY.

What to-morrow brings, who knows?
 Always God in mercy throws
 A cloud o'er what is yet to be,
 In mercy, for if we could see
 Beforehand all the toil and strife,
 These cares attending human life,
 We should be paralysed with fear,
 And could not do our duty here—
 Day by day.

Hopes bear us on. The eager boy
 Thinks of his future years with joy.
 But when, life closing, he looks back
 Along the chequered narrow track
 How changed and different it seems
 From all his boyish early dreams!
 Yet gratefully he bows his head,
 Seeing how his steps were led—
 Day by day.

Expect not great things: very few
 Are allotted such to do.
 Many more find out their cup
 Of life with trifles is filled up.
 Yet if these things rightly use,
 Not because "so small" refuse,
 Blessings shall descend on all
 In the palace, cottage, hall—
 Day by day.

Then go on thy way, content
 With whatever God has sent.
 Do not try to pierce the cloud
 Which thy future doth enshroud.
 Take the mingled good and ill;
 Do thy smallest duty still.
 In the strength which shall be given,
 When thy need is, stretch from heaven—
 Day by day.

—E. L. Tepper.

ALL WELL.

No sea again shall sever,
 No desert intervene;
 No deep, sad-flowing river
 Shall roll its tide between.

No bleak cliffs, upward towering,
 Shall bound our eager sight;
 No tempest, darkly lowering,
 Shall wrap us in its night.

Love, and unsevered union
 Of soul with those we love,
 Nearness and glad communion
 Shall be our joy above.

No dread of wasting sickness,
 No thought of ache or pain,
 No fretting hours of weakness
 Shall mar our peace again.

No death, our homes o'er-shading,
 Shall o'er our hearts intrude;
 For all is life unending
 In presence of our King.

—H. Bonar.

To be blessed and tranquil, and spiritually to grow, we must commune with the invisible. A few hurried moments in the morning, a few tired moments in the evening, a fragmentary dash at Matthew or Mark, and a few verses hastily read with the sense of a duty accomplished, are not enough to lift one over the roughness and materialities of every day. They are better than no reading, and better than no prayer, but to have a living sense of the nearness of God, one must abide in him.

For "The Friend"

The "Molly Maguire" Trials.

The recent trials in the Anthracite coal regions of Pennsylvania, of persons connected with a secret association, popularly known as "Molly Maguire," are so important in the result, and reveal so serious a condition of things, that it seems desirable to place in the columns of "The Friend" a fuller account than has yet appeared in its pages. About seven years ago, in numbers 51 and of vol. 42 of this journal, there was published a very interesting account of Ribbonism in Ireland. Those who may have read that account, or W. S. Trench's work entitled "Calities of Irish Life," from which it was condensed, will see that "Molly Maguireism," Schuykill county, Pennsylvania, is merely transplanting of Ribbonism from its native Irish soil.

W. S. Trench says, "The main object of the Ribbon society was to prevent any landlord under any circumstance, whatever, from depriving a tenant of his land." "The secret object was to deter, on pain of almost certain death, any tenant from taking land from which any other tenant had been evicted. These main principles of the society were carried out with relentless severity; and numbers indeed were the victims in all ranks of life, from the wealthy peer to the humblest cottier, who fell under the hand of the assassin sworn to carry out its decrees." But it will be supposed that a society, thus constituted in utter lawlessness, was not unlikely to adhere long or accurately to the precise objects for which it had originally been formed; and accordingly, by degrees, it assumed the position of the redresser of fancied wrongs connected with the management of land, or with landed property in a form whatever. "I have seen a notice announcing certain death to a respectable farmer because he dismissed a careless ploughman and a friend who lived near me, was threatened with death, because he refused to hire a shepherd who had been recommended him, and who was approved of by the local Ribbon lodge. I myself received a letter, illustrated with a coffin in flaming bloody red, and adorned with death's head and crebones, threatening the most frightful consequences to myself and family, if I did not continue to employ a young profligate carpenter whom I had discharged for idleness and vice!"

The official title of the secret society in America, popularly called "Molly Maguire" is Ancient Order of Hibernians. None eligible to membership in it, unless they are members among the Roman Catholics are Irishmen. To it must be attributed numerous murders and other outrages in the coal regions, which have for years past rendered life here very unsafe. So frequent have these become, so bold and reckless were the authors of them, such the fear with which they had inspired the public, and so unable were the ordinary officers of justice to cope with the difficulty and danger; that the large coal-mining firms felt it necessary to take some decisive step to protect their own pecuniary interests, and the lives and property of the employees.

They applied to Pinkerton's Detective Agency, whose headquarters are at Chicago. One of the employees of that establishment agreed to run the risk connected with it.

fort to unveil the proceedings of the secret society which had furnished the men to kill those persons who became obnoxious to it, his employee was a young Irish Catholic, named James McParlan. He went to Schuylkill county, assumed the name of McKenna, as soon considered a suitable man to be added to the "Molly Maguires,"—and was initiated as a member—One of the conditions which he went, that under no circumstances should he be called upon to bear witness in a court of justice. He communicated with no one, save one or two police officers, to whom his reports were frequently, sometimes daily, sent by mail. The plan of action marked out was, to make himself acquainted with any intended outrage, to learn who the parties were that were selected to perform it, and all details that could be ascertained; and give such information as would enable a proper police force not only to prevent its accomplishment, but to seize the guilty parties under such circumstances as would assure their conviction.

After operating in this way for a considerable time, his real position was discovered by his companions; and his usefulness as a detective appeared as an end. He subsequently consented to appear as a witness in the trials of several of those implicated in the murders that had taken place; and his testimony was one of the most important means of procuring their conviction.

The first of this series of trials ending in a conviction for murder, was that of Michael J. Doyle, a young Irishman, from Mount Laffee, Schuylkill county; who had been one of the assassins of John P. Jones, a mining boss of the Lehigh and Wilkesbarre coal company, at Ansdorf, Carbon county. Jones had discharged from his employ two men who were members of the Molly Maguires, and for this cause his death was determined upon and committed. He was shot down on the 31st of March, 1875, while on his way to his work, and the atrocious deed was done in so open and public a manner, that immediate pursuit was made, and Doyle, and his two associates, Kelly and Kerrigan, were arrested the same day.

During the progress of Doyle's trial, many of the leading Molly Maguires were present, endeavoring to prevent his conviction. Heretofore, their efforts to shield their members from punishment, by perjured testimony of an *alibi* or other means had been successful. But Doyle was found guilty on the 1st of 2d mo. of this year. Kerrigan, who was then a prisoner in the jail at Mauch Chunk, made a voluntary confession of the circumstances connected with this murder, as well as with that of policeman Yost. The information obtained from him led to the arrest of several of the criminals; and, in connection with the conviction of Kelly as an accomplice in the murder of John P. Jones, spread consternation among those who had been the leaders of these horrible crimes.

Other trials have followed in rapid succession with the same result. Nearly all of the county officers of the Molly Maguires in that section of the country have been brought to the bar and convicted of complicity in the outrages which so long disgraced the mining regions of Pennsylvania; or are fugitives from justice, or in prison awaiting trial.

On the morning of 9th mo. 1st, 1875, Thomas Sanger, a mining boss at Raven Run, was killed

by several men—one of whom, Thomas Munley, was brought to trial on the 27th of 6th mo. in the present year. In this case, Franklin B. Gowen, the President of the Reading railroad, who had formerly been the District Attorney of the county, assisted in the prosecution, (which resulted in the conviction of Munley.) His closing speech to the jury contains some interesting and startling information. The following passages are extracted from it.

"On the 1st of Sept. last, Thomas Sanger, a young English boss miner, a man between thirty and forty years of age, who, so far as we know, may not have had an enemy in the world, left his house in the morning to go to his daily work. Going forward and onward in the performance of his duty, and the prosecution of his daily work, this man was confronted by one of an armed band of five assassins. He was shot in the arm. He turned to run around a house in the neighborhood, and he was there confronted by another of these miscreants who had been sent to intercept him. He again turned and stumbled upon the ground; and then, when the foremost of this band of assassins came up to him, as he lay upon the ground, he discharged his revolver into him, and another turned him, as he lay upon his face, over upon his back, so that he could expose a deadly part for his aim, and then, with calm deliberation, selected a vital spot and shot him as he lay prostrate upon the ground. His wife, from whom he had just parted, hearing his cries, rushed out and reached her husband only in time to hear his last faltering accents: 'Kiss me, Sarah, for I am dying.'

"These cold fields for twenty years. I may say, have been the theatre of the commission of crimes such as our very nature revolts at. This very organization that we are now, for the first time, exposing to the light of day, has hung like a pall over the people of this county. Before it fear and terror fled cowering to homes which afforded no sanctuary against the vengeance of their pursuers. Behind it stalked darkness and despair, brooding like grim shadows over the desolated hearth and the ruined home, and throughout the length and breadth of this fair land there was heard the voice of wailing and of lamentation, of Rachel weeping for her children and refusing to be comforted, because they were not."

"Whether this society, known as the Ancient Order of Hibernians, is, beyond the limits of this county, a good society or not I cannot tell; but I have believed at sometimes that it was, and I am willing to be satisfied of that fact now, if there is any evidence of it. But there has been an attack made upon this organization, and up to this time we have not had furnished to us any evidence that in any place its objects were laudable or commendable. Criminal in its character, criminal in its purpose, it had frequently a political object. You will find the leaders of this society the prominent men in the townships. Through the instrumentality of their order and by its power, they were able to secure offices for themselves. You see here, and now know that one of the Commissioners of this county is a member of this order. You know that a previous Commissioner of this county was a member of this order, convicted of a high offence, and pardoned by the Governor. You know that another county commissioner, be-

fore that, was a member of this order, convicted of an offence and pardoned by the Governor. High constables, chiefs of police, candidates for associate judges, men who were trusted by their fellow men, were all the time guilty of murder.

"I have said to you before that it seems to me as if there had been a divine interposition for the investigation and punishment of crime in this county. Remember that McParlan came here pledged that he should not be used as a witness. We placed no reliance upon him as a witness. We could not arrest a man because he told us anything about him, because he was protected by the pledge we had given him that he was not to be exposed, and was never to be known in the investigation; and I tell you that, no matter what the consequence would have been, when I became an instrument to lead him into the danger to which he was subjected when he took his life into his own hand and entered into the secret councils of this order, I would have been the last man in the world to have asked him to relieve me from the pledge which had been made to him. You have heard that his mission became known to this order, how or by what manner I am not at liberty to tell you to-day, for it is not in evidence. We have the fact, though, that his mission became known to this society, and we have the fact that those from whose vengeance he was to be protected, by ignorance of his true character, acquired information that enabled them to know that he was playing a false part in their organization, and that he was in reality a detective; and he was compelled to leave the county. And then I saw before me my path as clear as day. Then I saw that some miraculous interposition of Providence had been vouchsafed to permit us to use the testimony and the knowledge of this man McParlan."

"When, in all the history of criminal jurisprudence, did ever such a change of society come over a county as that which came over this county on the morning that McParlan first became a witness, and on the morning when Jack K-hoe, the county delegate, with twelve or fifteen other men, handcuffed to a chain, were marched from the high places they had occupied to take their solitary cells as felons within the walls of your prison.

"When I came to this court house on that memorable day, the court room was crowded with the sympathizing friends of these criminals, but where are they to-day? They may be here, but they give no sign, and we know nothing of them, and we care not if they are here. The whole county sprung up like a giant unbound, and never, except in dramatic literature, has there been revealed such an awakening and such a change."

From the testimony of James McParlan, the following account has been condensed of the character and organization of this society. The members were required to be of Irish birth or descent, and Roman Catholics, and were furnished with signs and passwords so as to know each other. The highest authority resided in what was called the Board of Erin, composed of delegates from England, Ireland and Scotland; who sent over the signs and passwords to this country once in three months. In answer to a question as to the practice of the organization in committing crime, McParlan stated, that, generally when outrage was determined on, the Division Master of the district would apply either to another

division or to the county delegate, in order to get men who were unknown to the parties upon whom the outrage was to be perpetrated, and a guarantee was given that the obligation thus incurred would be discharged by supplying the men required for similar crimes elsewhere. If any of their members were arrested, the practice of the society was, to raise money first to obtain counsel; and secondly, to try and get as many witnesses as possible to prove an *alibi*.

Cases of the same character which have since been tried, show that justice sometimes overtakes offenders who have long committed crimes with apparent impunity, and we may hope that the monstrous system of outrage and barbarism, of which the above is but an outline, has now received a fatal blow.

For "The Friend."

There is no one of the Divine injunctions of more general application, nor yet more difficult to be sincerely obeyed, than that which enjoins forgiveness of injuries, whether real or supposed. Often as it may be brought into requisition, as often as we are brought to feel that the spirit of forgiveness is in direct opposition to the impulse of our fallen nature, and that we have need to keep in remembrance the solemn declaration of the Judge of quick and dead, that if we do not forgive from our hearts those who trespass against us, neither will our Heavenly Father forgive us our trespasses.

Where, through the aid of the Spirit of Him who left the glory which He had with His Father before the world began, in order to effect the reconciliation of lost man to His offended Creator, we are enabled to rise above the natural promptings under contradiction, calumny, reproach or other dishonor that may be imposed upon us, and to feel unfeigned forgiveness of the aggressor, it blunts or removes the sting intended to be inflicted, shuts down anger or resentment, encloses in an atmosphere of purity and peace, and exalts into the dignity of overcoming evil with good.

But in applying the spirit of forgiveness that is inherent in our holy religion, we must guard against extending it so far as to impair the cause of religion itself. Though bound by the law of Christ to forgive offences, we are not bound to extend Christian fellowship to those who indulge in a spirit that willingly inflicts injury of any kind on ourselves or on the cause of Truth. There is neither Christian love nor Christian charity in treating such transgressors as though they had committed no wrong, and thus leave them under the delusion that they are right and approved. The true disciple of Christ can understand the full meaning of the expression of his Master, "Woe unto the world because of offences; for it must be that offences come, but woe to that man by whom the offence cometh." The same apostle that exhorts to "lay hands suddenly on no man," at the same time commands us "not to be partakers of other men's sins," and it is a question that each one must decide for himself, how far he may become a partaker of a sin or wrong committed by another, so as to bring him under some responsibility for it, if he in some way does not testify against it: carefully however, observing the courteous and dignified demeanor that becomes such a service.

The apostle in writing to a minister in one of the churches in his day, declares that such

must be "blameless as the steward of God; not self-willed, not soon angry;" also that he must show himself "a pattern of good works; in doctrine showing incorruptness, gravity, sincerity, sound speech that cannot be condemned." "Holding fast the faithful word as he has been taught; that he may be able by sound doctrine both to exhort and convince the gainsayers." For he says that even in that day "There are many unruly and vain talkers and deceivers,—specially they of the circumcision; whose mouths must be stopped, who subvert whole houses, teaching things which they ought not, for filthy lucre's sake."

Thus in the government and oversight of the church it is essential that no false charity be allowed to screen that which is wrong from rebuke and condemnation. None receive gifts for this government and oversight but such as enter the fold through Christ the only door, by submitting to the requirements of his Holy Spirit, and continuing to wear his yoke. Such are so humbled as to prefer others as better than themselves, while at the same time they are bound to try the spirits, the words and the ways of those who profess to be teachers of the people. Their desire is to do their Master's work and nothing else. Their object is to keep out that which will lessen or destroy the unity of the Spirit in the bond of peace, and thus strengthen the gospel fellowship that binds together the true disciples of Christ.

Where it is apparent that any one has so far fallen from a state of humility and watchfulness—if he or she had ever attained to it—as to depreciate or lay waste any of those things pertaining to the church, which its Holy Head has brought about through the instrumentality of dedicated servants, for the preservation or other benefit of its members and the glory of His name, the delegated Shepherds, taking heed to themselves, are bound to rebuke the offender, and defend the well-being of the flock over which the Holy Ghost has made them overseers; and they must be willing "to endure hardness as good soldiers of Jesus Christ;" for all "that will live godly in Christ Jesus shall suffer persecution."

Alas! that there should ever be occasion for such saddening service and discipline. But so it has been more or less in every age; for the visible church is as yet a very defective exponent of that which is unseen; the church of the first-born whose names are written in heaven, the elect host on earth, contending for the faith once delivered to the saints, still militant, but united to the glorious, triumphant company of saints and angels and the spirits of just men made perfect in heaven.

That experienced and eminent servant of Christ, Stephen Crisp, has the following in one of his epistles.

"Therefore all have need to be upon their watch, neither to tempt, nor be tempted. Let none think it a sufficient excuse for them, that they were provoked; for we are answerable to God for evil words spoken upon provocation, as without provocation; for, for this end hath the Lord revealed his power to us, to keep and preserve us in his fear and counsel in the time of our provocations. Therefore if any man through want of watchfulness, should be overtaken with wrath or passion, a soft answer appeaseth wrath, saith the wise man. Such a time is fittest for a soft

answer, lest the enemy prevail on any of their hurt, and to the grief and trouble their brethren; for it is the proper duty of watchmen and overseers to spare the flesh that is, let nothing come nigh them that hurt them, and wound and grieve them.

The good apostle was so careful over the flock of believers, that if there were any doubtful matters to be disputed of, he would not let them that were weak in the faith, at such disputes; much less ought they that are weak to see those that are strong, descend from their strength and go into the weakness where they are not able to bear; for they are certainly weak that cannot bear. Those who really live in the strength and power, can bear even burdens for them, who cannot bear their own. The apostle, when he sent a charge with them, before he said, take heed to the flock of God, he said, take heed to yourselves; and we are none of us like to discharge ourselves well towards others, by taking heed to ourselves, to be kept in the sober, innocent frame of spirit which the Truth calls for."

For "The Friend."

Sarah Stephenson.

I should be glad to see in "The Friend," the early life of Sarah Stephenson and Ruth A. Rutter; showing how they were called to aside their ornaments and appear in the simple garb of a Friend; and what it cost them to do. So many in these days are saying there is nothing in this, that, or the other little thing—but the language to us as a people still is, "Come out from among them; be ye separate," &c. I cannot reconcile a gay attire, a copying after the world, with the life of a cross-bearing Christian, and hope those in our galleries calling upon the youth to follow Christ when their own appearance is so at variance. These things ought not to be.

The following extracts are taken from the life of Sarah Stephenson, published in the fourth volume of Friends' Library.

"Sarah Stephenson, some of the occurrences of whose life are related in the following pages, was born at Whitehaven, in Cumberland, in the year 1738. Her parents were Daniel and Sarah Stephenson, of whom she was the elder daughter. Her mother was the daughter of Joseph Storrs, of Chesterfield, Derbyshire. Of events which were hers in childhood and youth, of her conflicts, consolations, and her preservation from harm and evil, at those stages of life, the subsequent account is nearly in her own words.

"The remembrance of the great love and tender care of the Shepherd of Israel, who sleepeth not by day nor slumbereth by night from my infant days to the present time, cause of deep admiration, reverence, and abatement of soul.

"When I was about six years of age, I had a narrow escape of being burned to death, falling on the fire when no one else was in the room. This preservation, as also another by which my soul was signally rescued from the jaws of the devourer, in very early life attribute only to Him, who hath, in the course of my pilgrimage, succeeded me in many deep and proving seasons; and hath born up my head above the mighty waters, even when the waves have risen so high as to appear likely to overwhelm me. O, my soul, mayest thou

ver be unmindful of the Lord's unutterable loveliness, but walk humbly and reverently for Him, who is abundant in mercy and eat loving kindness!

It may not be improper to mention, that my father carried on a very considerable business in the mercantile way, and had gained rich property. This, and living in what is called a genteel style, and being introduced to a company of high rank when very young, pleased my natural disposition, that I began to take steps in the paths of vanity. But whilst thus pursuing with eagerness, what are called by some innocent diversions, the good shepherd, who seeketh after those that are astray, looked down upon me in love, I so enamoured my soul with his beauty, that I loved to be alone with him. O, how sweet was his presence! But this lasted not long, for the enemy painted the glory of this invisible world in such pleasing colors, that I took the Prince of peace, and proceeded further in the paths of vanity.

My father, as I have mentioned, was dying largely; and he so extended his business that he could not himself have the oversight of it. This was attended with losses and many disappointments; and at length occasioned the separation of the family. My uncle, William Storrs, of Chesterfield, took to Worcester, to my mother's sister, and being as fresh favored with a precious visitation, I was mercifully prevailed on to see in with it.

After I had been in that city a few months, some worthy servants of the Lord, Elizabeth Whipple and Sarah Worral, from America, came to my uncle's house, and I think, staid some days. One evening, during this time, Elizabeth, in a very weighty manner addressed me in the language of unspeakable love; remarking also, "What a pity that child should wear a ribbon on her head." Her words were precious, and deeply affected my mind. I do not know that I closed my eyes to sleep that night; and in the morning, not daring to put my ribbon, I came down without it. Yet I had many fears, expecting to be censured one of the family, as having left it off to the favor of the Friends, and from this just ground, the enemy caused many seasons of sorrow. This was coming a little to the gate of stripping, which work went gradually forward; but great were my trials, both within and without. Indeed my convictions were so great, that I might say, "I ate my bread with mourning, and mingled my milk with tears;"—but then, O, what precious meetings I had at times! my spirit was broken that I could scarcely contain myself. Here were also divers weighty visitations of Friends, whose sympathy with me was precious, and was a comfort to me. It likewise assisted Divine Wisdom, while I remained at Worcester, to permit me to be attacked with slow fever, which reduced me to such a state of weakness, that it seemed not unlikely night sink under it. But that did not prove to be the design of unerring Wisdom; but rather to make it preparatory to fresh exercise and trial of faith. In this time of great weakness and reduction of will, my mind was sweetly supported, and, at seasons, favored with the overshadowing of Divine love, under which my soul humbly and thankfully rested.

When I was a little recovered from this illness, a trial of a close nature was my por-

tion. I received a letter from my father, who, in a pressing manner, requested my going home to live with my dear parents, whom I had not seen for seven years. In my absence, they had removed, together with my sister and my youngest brother, to Douglass, in the Isle of Man, at which place were no others of our Society; and the inhabitants were much strangers to it. Great were the struggles and fears that attended my poor mind, and prayer was begotten that by obeying my natural parent, I might not offend my heavenly Father, who had so richly visited my soul. But the Lord was pleased so to open my way, that it appeared right to go; yet, O, the fear that covered my mind, lest I should bring a reproach on the Truth. My humble cries were put up unto him for preservation, and He was mercifully pleased to hear, and measurably to answer, my petitions. In this humble state I left Worcester, being favored with the love and sympathy of many worthy Friends. Catharine Payton, who then lived at Dudley, was one: she wrote a sweet consolatory letter to a Friend, which was given to me to peruse, in which she said, "If she must go, let her take some Friends' books with her; and may she be preserved, like Lot in Sodom, a preacher of righteousness."

An agricultural achievement in Scotland has recently attracted great attention abroad. The Duke of Sutherland is one of the great land owners of Scotland, but much of his domain is barren and unproductive. Feeling that by labor and an intelligent working up of the soil these lands can be made productive, he, some time ago, determined to have a tract of two thousand acres broken up. The work was begun about four years since, the tract being wild and useless moor land, so swampy and stony that it was impossible to do anything with it by ordinary appliances, including even the common steam plough. He had a gigantic steam plough constructed, and with this and twelve steam engines working other appliances, the moor has been broken up, and the useless land is now converted into four fine farms, in which excellent crops are this year growing. But only a very wealthy man could indulge in such an enterprise, for the work cost the duke the great sum of \$300,000 in gold, an average of \$150 an acre.—*Philada. Ledger.*

A Little Girl and the King.—The King of Prussia, while visiting a village in his land was welcomed by the school children of the place. After their speaker had made a speech for them, he thanked them. Taking an orange from the plate, he asked: "To what kingdom does this belong?"

"The vegetable kingdom, sir," replied a little girl.

The king took a gold coin from his pocket, and holding it up asked, "And to what kingdom does this belong?"

"To the mineral kingdom," said the girl.

"And to what kingdom do I belong then?" asked the king.

The little girl colored deeply, for she did not like to say "the animal kingdom," as he thought she would, lest his majesty be offended. Just then it flashed into her mind that "God made man in His own image," and looking up with a brightening eye, she said: "To God's, sir."

The king was deeply moved. A tear stood

in his eye. He placed his hand on the child's head, and said, most devoutly, "God grant that I may be accounted worthy of that kingdom."

THE FRIEND.

TWELFTH MONTH 2, 1876.

In our last week's number we gave a letter published in "The British Friend" of last month, called forth by a communication in a former number of that paper denying the truth of the assertion made by the Belper Conference, of the active members in London Yearly Meeting having departed from the doctrines and testimonies held by Friends. There is another letter accompanying the one we have already extracted, of the same purport but going into many details, which it is not necessary to quote. The following taken from it may serve to enlighten some of our readers as to the character of the missionary work carried on in Madagascar by the persons employed by the "Friends' Foreign Missionary Association," which association reports to London Yearly Meeting.

When Louis C. Street was over in England (1873-4), he held a sort of public meeting in the Friends' Meeting-house, Mount Street, Manchester, for the purpose of giving information as to the operations of the so-called "Friends' Foreign Mission Association" in Madagascar. After giving said information, he desired Friends present to ask any questions about the matter, saying, he would be glad to reply to such. Way being thus opened by him, a Friend said there were three or four points on which Friends had long wished for some *bona fide* information.

"1st.—Were the meetings for worship which were held with the natives, held after the manner of Friends; and, were any of the meetings with them so held?"

"Reply by L. C. Street: No meetings for worship were held with the natives after the manner of Friends' meetings.

"2nd.—How were these meetings held?"

"Reply: They were conducted in much the same way as the other missionaries out there conducted theirs,—as for instance, the London Missionary Society's representatives; they (*i. e.* L. S. & Co.) found or thought it best to work harmoniously with the other missionaries, &c.

"3rd.—Were any meetings held by them after our way of holding meetings for worship?"

"Reply: Only with the teachers (the English representatives of Friends' Foreign Missionary Association) themselves once a month; no natives were present at such meetings.

"4th.—Was any form or ceremony made use of by the Friends' teachers when a native was received as a member, or professed conversion?"

"Reply: Yes, he was baptized with water by the teacher.

"5th.—Was any ceremony made use of by them, comparable to what is known as taking bread and wine, commonly called The Sacrament?"

"Reply: Yes: they administer the Sacrament, and some of the teachers themselves partook of it. Some had discontinued taking it. (L. C. Street defended this and baptism

warly, saying he considered they were quite consistent with our profession as Friends, and that he in administering them, was a consistent member and minister of the Society!"

Louis C. Street is, we believe, a member of Indiana Yearly Meeting, and stands as an approved minister among them. Though working under the auspices of the Missionary Society in England, we suppose he is paid by the Yearly Meeting to which he belongs, as we observed in its recently printed minutes notice of funds being furnished him.

The course of these missionaries, and the fact of placards being posted at a Friends' meeting-house in London, announcing that "gospel addresses," would be delivered, and "well selected hymns sung" before the audience invited to attend, as mentioned in last week's letter, are consistent with each other, and add to the rapidly cumulative evidence that common honesty demands that the actors and those who support them, should cease to claim to be representatives of the Society of Friends.

SUMMARY OF EVENTS.

FORGIVEN—It is understood that all the powers have agreed to the European conference, and that it will convene in Constantinople about the first of Twelfth month. Meanwhile military preparations continue in Russia, and it is expected that over 200,000 troops will soon be under arms for order. An imperial order has been issued in St. Petersburg prohibiting the exportation of horses. A St. Petersburg dispatch says: The *Car* in receiving various distinguished personages during the past few days, has stated that he would still hope for the maintenance of peace, but considered Russian honor and his own pledges to obtain the concessions which he had demanded from the Porte.

A special dispatch to the London Standard from Constantinople, announces that the Sultan has decreed the absolute abolition of the slave trade throughout the Ottoman Empire.

The subscriptions in St. Petersburg and Moscow alone, to the new Russian loan of one hundred millions of roubles, have already exceeded that amount.

The Spanish Minister of War has presented in the Congress of that nation a bill rendering military service obligatory, and that standing army shall never be less than 100,000 men. The period of service is fixed at eight years, four in the standing army and four in the reserve.

The Spanish government continues to send soldiers in large numbers to Cuba.

An important debate took place in the Spanish Congress on the 25th ult., on the question of religious toleration. After full discussion the majority of the House declared its approval of the government measures.

A special dispatch to the London Times from Argos states that Dr. Schellman, who came to the supposed site of the tombs of Agamemnon and Cassandra, has discovered immense subterranean chambers or tombs, containing a great variety of gold and silver plate and jewelry.

The French Chamber of Deputies considered the estimates for public worship on the 24th ult. Prince Napoleon, speaking for the first time since his election, denounced the dangerous encroachments of the clergy, which had exercised a disastrous influence in recent French history, notably in 1870. He supported a proposal for the reduction of the estimates for public worship. An excited debate ensued, the result of which being protests against the speech, which was violent in tone.

Sir Richard Temple, Lieutenant-Governor of Bengal, after surveying the district devastated by the late cyclone, confirms the estimate that the loss of life and fifty-five millions of property, perished in the storm.

The President of the British Iron Trade Association states that a large proportion of the furnaces are out of blast, and that a still larger proportion of the forges and mills for the production of malleable iron are closed. It is estimated that the loss of wages of the operatives the wages of those retained have been materially reduced. The distress is greatest in the rail-making districts of South Wales and the north of England, but is also very great in Staffordshire, the midland counties, and in Scotland.

UNITED STATES.—Election Returns.—At the Presidential election (document published a vote of 122,155) an increase of 20,200 over the largest ever polled in the State. Tilden had 61,931 votes, and Hayes 59,034. Verano polled a vote of 64,346 for President: Hayes 44,091, and Tilden 20,254. The official returns for Minnesota show the majority for Hayes in that State to be 10,000. Illinois furnished 229,909 votes, Hayes 125,957, being far the largest ever polled in the State. Hayes had 344,148 votes, and Tilden 296,204. At the excited election of 1864 the total vote was only 533,646. In New Hampshire the total vote was 80,015, of which Hayes had 41,522, and Tilden 38,449. Missouri Tilden had 292,657 votes, Hayes 244,338. The total vote of Kentucky was 258,860: Tilden had 160,045 votes, Hayes 98,415. Iowa gives Hayes 171,327 votes, and Tilden 112,099. All the members of Congress from Iowa are Republicans.

Wm. M. Tweed, who a few years ago was a person of so much political influence in New York, and who was sent back from Spain as a fugitive from justice, landed in New York on the 23d ult., and was taken to his former quarters in the Ludlow Street Jail. Increased precautions it is said will be taken to prevent another escape, and it is expected he will be closely as the other prisoners, and allowed no privileges.

The regular army of the United States consists of 25,331 men in active service.

The Internal Revenue from the various States and Territories during the last fiscal year amounted to \$110,001,128. Illinois furnished \$29,909,319; Ohio \$10,568,290; New York, 14,158,374. The smallest returns were from Arizona, \$11,976.

The sugar crop of Louisiana this year is estimated at 200,000 hogheads, or 200,000,000 pounds, which is about one-eighth of the amount required for consumption in the United States.

The Philadelphia Board of Revision of Taxes state that the total assessment of real and personal property subject to taxation is \$603,968,532, an increase over 1875 of \$7,655,154.

The Massachusetts assessors have filed their estimates of the value of real property for 1876. There is a decrease in the values of \$71,269,192 from those of 1875. The decrease is attributed to the generally depressed condition of productive industry.

The result of the Presidential election was not definitely settled up to the 25th ult., the consequence being that the Electoral College of Florida and Louisiana. It is the duty of these bodies in the States named to revise the local election returns, and give a correct statement of the votes cast. The vote of either Louisiana or Florida would secure the election of the Democratic candidates, as without them they lacked only one vote.

At the late election for President, New York, the most populous State in the Union, polled 1,016,505 votes, of which 522,612 were voted for Tilden, and 489,547 to Hayes, the rest being scattering. In Arkansas, Tilden had 58,653 votes, Hayes, 28,569.

The total import of dry goods and general merchandise at the port of New York, from 1st mo. 1st to 11th mo. 25th, 1876, were \$288,322,659, against \$292,225,527 for the corresponding period last year. The total exports of produce during the same period were this year \$240,110,142, against \$227,663,764 for the corresponding period in 1875.

The *Merets*, &c.—The following were the quotations on the 25th ult. *Philadelphia*.—American gold, 1091. U. S. sixes, 1884, 117 1/8; do. 1867, 115 1/2; do. 4 per cents, 1124; do. 4 1/2 per cents, 1091; cotton, 12 1/2 per cents. Flour, \$4 to \$9.00 according to grade or quality. Pennsylvania red wheat, \$1.22 a \$1.35; Ohio do., \$1.28 a \$1.20; Penna. amber, \$1.37 a \$1.42. Southern rye, 70 a 72 cts.; Penna. 75 a 77 cts. Yellow corn, 60 a 61 cts.; western, 48 a 51 cts. Old white oats, 48 a 49 cts.; western new, 31 a 35 cts. etc. New York fancy cheese, \$1.10 to \$1.20. Butter, \$1.43 a \$1.45. New York Superior flour, \$4.80 a \$5.25; State extra, \$5.35 a \$5.50; finer brands, \$6 a \$8.75. No. 1 white winter wheat, \$1.39; amber do., \$1.36 a \$1.37; No. 2 red winter, \$1.30; No. 2 Chicago spring, \$1.30; No. 3 do., \$2.00; No. 4 do., \$1.82; yellow, \$1.45 a \$1.55. etc.

Mixed corn, 50 a 60 cts.; yellow, 60 a 61 cts. Extra white oats, 51 cts.; lower grades, 31 a 49 cts. Lard, 10 cts. Carolina rice, 51 a 61 cts. *Baltimore*.—No. 2 western red wheat, \$1.35; No. 3 do., \$1.25; Maryland red, \$1.40 a \$1.45; amber, \$1.47 a \$1.53; white, \$1.25 a \$1.45. Yellow, \$1.40 a \$1.45. No. 1 spring wheat, \$1.45; No. 2 do., \$1.43; No. 3 do., \$1.40. No. 2 corn, 11 cts. Oats, 31 cts. Rye, 67 cts. Barley, 61 cts. Lard, \$9.85 per 100 lbs. *St. Louis*.—No. 2 red fall wheat, \$1.28; No. 3 do., \$1.20. No. 2 corn, \$1.4 a 4 1/2 cts. Oats, 31 cts. Rye, 65 cts. Lard,

91 cts. *Cincinnati*.—Red wheat, \$1.20 a \$1.28. Corn, 42 a 44 cts. Oats, 30 a 38 cts. etc.

The Managers of the House of Industry, No. 1 North Seventh St., desire to call attention to their large stock of hand-made under-clothing, overalls, and corsets, suitable for distribution among the Indian Prisons, &c. Their funds are unusually low, as they need to convert the above into cash, to enable the Society to pursue its usual course in affording relief and employment to the poor during the coming winter.

"The Germantown Employment Society for Women offers for sale, at low prices, warm garments for men, women and children. Twenty per cent. taken off on orders of Twenty Dollars or over.

Apply to MARTHA H. GARRET, Green and Coul Streets, Germantown, Philada.
11th mo. 1876.

FRIENDS' ASYLUM FOR THE INSANE.
Near Frankford, (Twenty-third Ward,) Philadelphia.
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his residence in Pawtucket, R. I., on the 16th of Sixth month last, JOHN T. KENSON, a man and of his Providence Monthly Meeting, in the 7 year of his age. He was firmly attached to the ancient principles and testimonies of our religious Society, adhering to them through evil report and good reproach rather to suffer with the faithful than to fall on the face of the hypocrites. He was a man of an uncontracted illness with exemplary patience and industry. Alluding near the close, to some of the exercises he had passed through, he said that the awful of an unprepared state had been shown him in flight; adding the light of Christ is the life of men; expressed the desire he felt, if consistent with the will, to be released; which was soon mercifully granted, and in much calmness he departed, leaving the consoling evidence that his end was peace.

—, at Camden, N. J., on the 21st of Eighth 1876, JO BALLENGER, in the 75th year of his age, esteemed member of Haddonfield Monthly Meet. By yielding to the powerful visitations of Divine grace he was in his youth brought to the saving knowledge of the truth as it is in Jesus Christ; and it is believed he was mercifully preserved therein through a life. He was often enabled to bear testimony to blessed efficacy of Divine power to sustain the mind the varied trials and conflicts of time. He was zealously concerned for the maintenance of our ancient Christian principles and testimonies on all occasions and the evidence of his godly sincerity gave him place in the esteem of many, both in and out of Society, with whom he came in contact. His 14 years were marked by feeble health, and at last long confinement to the sick chamber, where he often visited by his friends, to their comfort and edification; giving evidence at such times that his feet were firmly established on the Rock of Ages—the foundation of righteousness. During these tedious days and wearisome nights that were appointed him he was preserved in much quiet resignation to the will of God, and lay as one waiting for his change, in blessed hope of an entrance into the glorious rest prepared for the people of God, of which at times he was assured with a blessed foreknowledge. His last words were, "Whatever you do, do all to His glory."
—, Ninth month 20th, 1876, in the 73d year of age, ALICE T., widow of the late Josiah Alberts, member of Weymouth Monthly and Plymouth Monthly Meeting.

—, on the 27th of Tenth mo. 1876, at her residence near Adrian, Michigan, SARAH B., wife of S. Leeds, in the 58th year of her age. She bore a tractless illness with patience and Christian resignation, desiring to wait all the Lord's appointed time. During her illness she was visited by the Holy Spirit, and his purified spirit has been permitted to enter that "which hath foundations, whose builder and maker God."

From the "Fur Monthly."

The North American Bison and its Extirpation.

The history of our American bison but repeats the history of his congeners and affines elsewhere. His nearest relative, the aurochs of the old world, which in no very remote times roamed over the greater part of temperate Europe, survives now only, through careful protection, in the royal parks of the czar of Russia in Lithuania, where its present representatives number but a few hundred individuals. The urus, which in pre-historic times existed over a much larger area, and which had a few survivors as late as the conquest of Caesar, long since became extinct in the wild state, and has living representatives only in our domestic races of cattle, from whom they are in part descended. In our own country the elk, formerly numerous over the greater part of the northern and western portions of the United States, is now nearly extinct east of the Mississippi river, and is rapidly approaching extirpation elsewhere. The common Virginian deer, formerly abundant throughout all the older States of the Union, exists now only here and there in the east settled districts. From the newer trans-Mississippi States and Territories come reports of the rapid disappearance of not only the elk and deer of those regions, but of the mountain sheep and the prong horn. In many of the parks and valleys within the Rocky mountains, from New Mexico to Montana, where, but a few years since, these animals existed in seemingly exhaustless numbers, they have already been extirpated. But the case of the "buffalo," as our bison will always be commonly called, will doubtless be one of the most remarkable instances of extermination recorded, or ever to be recorded, in the annals of zoology. At the beginning of the eighteenth century, this animal occupied fully two-thirds of the temperate portions of North America; since which time its range has become reduced to an area not larger than that of the three territories of Dakota, Montana and Wyoming; while another decade or two, at its present rate of decrease, will be sufficient for its total extermination.

As is well known, the whole area between the Mississippi river and the Rocky mountains has ever been the region of their greatest abundance, over almost the whole of which vast territory they roamed till within the last half century. Prior to 1830 they had already

been pressed back for some distance west of the Mississippi, along nearly its whole length. The overland emigration that set in so vigorously about 1849, and the construction of the Union Pacific Railroad, served to greatly lessen their numbers, and to divide them into two distinct bands, known commonly as the Great Northern and Southern Herds. Incessant persecution on all sides, and especially of late along the lines of the Kansas railways (Kansas Pacific, and Atchison, Topeka and Santa Fé,) has reduced the Southern Herd to a mere remnant of its former magnitude. While they are now massed principally south of the Canadian river, in Northern Texas, where for a time they may enjoy comparative immunity from the white hunter, they are still also scattered irregularly and sparsely over the western third of Kansas and along the eastern border of Colorado. The whole area occupied by the Southern Herd, which ranged but a few years since from the Staked Plains to the Platte, and from Eastern Kansas to the Rocky Mountains, does not embrace a region larger than the present State of Kansas.

The Northern Herd has suffered a like reduction in its range. As late as in 1850, it extended, in the United States, from the Platte to the British boundary, and from the Rocky Mountains to the plains of the Upper Mississippi and the Red River of the North, besides spreading far northward into the British possessions. South of the northern boundary of the United States it is now limited to the region drained by the principal southern tributaries of the Yellowstone—the Big Horn, Tongue, and Powder rivers—and to a narrow belt extending thence northward, across the Yellowstone, the Musselshell, the Missouri and Milk rivers, widening somewhat to the northward.

The Indians have of course shared largely in the work of destruction, since the tribes that have lived within or near its range have depended largely upon these animals for subsistence, their flesh furnishing them with the chief part of their food, and their skins with clothing, beds and lodge coverings. Though far less wasteful of the buffalo than the white man, the Indian often indulges in needless slaughter, generally killing far more than he needs or can use. When buffaloes are plentiful, the Indians commonly select only the choicest parts, and during the season when they kill them for their skins they rarely save any portion of the meat. Catlin relates an incident that came under his notice in May, 1832, near the mouth of the Teton river, which forcibly illustrates their improvidence. A party of five or six hundred mounted Sioux Indians crossed the river at mid-day, for an attack upon a herd of buffaloes in sight on the other side. After spending a few hours, among them, they recrossed the river at nightfall, and came into the Fur Company's Fort with "fourteen hundred fresh buffalo tongues,

which were thrown down in a mass, and for which they required but a few gallons of whisky,"—not a skin nor a pound of meat, besides the tongues, being saved.

But the wanton, or at least reckless and almost useless destruction of the buffalo by the Indians is scarcely comparable to that of the white man, whose contact with the buffalo has brought a constantly increasing rate of fatality to the doomed beasts. About a century ago, the white hunter, in what is now the State of Kentucky, first met with the buffalo, since which time its extermination has progressed with marvellous rapidity.

It is said that during the season of 1872-3, not less than two thousand hunters were engaged in hunting the buffalo along the lines of the Atchison, Topeka and Santa Fé railroad alone; and that during this year not less than two hundred and fifty thousand buffaloes were slain, simply for their hides, their carcasses being left untouched on the plains. In a few years the buffaloes were wholly annihilated over hundreds of square miles of territory; and now, as if to hide even the evidence of their former existence there, their very bones are being gathered up and shipped to eastern markets for the manufacture of manure phosphates. The best available statistics indicate an average annual destruction of between three and four millions for the last thirty or forty years. At this rate of decrease it is evident that the complete extermination of the buffalo will be soon effected; and thus an animal which, but a few years since, was the most numerous of its size in the world, will be swept out of existence.

The American bison, with his huge bulk, his immense shaggy mane, and peculiarly vicious-looking eyes, presents a far more formidable and dangerous aspect than his real character warrants, he being in reality timid and inoffensive. With lowered head and sullen mien, the old bulls will face an approaching enemy with a great show of determination and bravery, only to flee most ignominiously if their threatening demonstrations fail to appal their assailant. Indeed, one's nerve is put severely to the test when approaching a herd of these formidable-looking beasts for the first time. Only when wounded, however, and sorely pressed, will they turn upon their pursuer; and then woe be to the luckless horse and rider, or the more helpless footman, if they fail to escape the onslaught of one of these furious beasts. Ordinarily, however, they are far less dangerous to encounter than the half-wild domestic cattle of the Texas plains.

Like most bovine animals, the bison is sluggish and stupid, lacking in great measure the sagacity that so effectually protects most wild animals; and he hence falls an easy prey to his human foes. If the hunter is careful to approach the herd from the leeward, he usually has little difficulty in getting near it, the bison being not easily frightened by the sight

of man or by the report of fire-arms, while the scent of an enemy, if unseen and a mile distant, will set them fleeing in headlong haste. It thus happens that the hunter, in stalking the buffalo, approaches easily within close range, even without cover, by simply creeping on the ground; and with a breech-loading arm, loading without rising, often succeeds in killing from five or six to a score or more before the herd finally takes to flight. If it slightly recoils, the hunter creeps up under cover of the slain, and continues his murderous work. So indifferent are the buffaloes to the death of their companions, or so stupidly unconscious of what has befallen them, that they will not only stand and see them shot down around them, but the living have been known to playfully gore the dead, so little do they comprehend the situation. A single hunter will thus often kill fifteen to thirty at a single "stand," and sometimes sixty to eighty in a day. A hunter who acts as shooter for the party to which he belongs, will frequently kill two thousand to three thousand in a single season.

(To be continued.)

For "The Friend."

Richard Shackleton.

(Continued from page 214.)

On the 29th of Ninth month, 1752, the following letter was penned by Richard Shackleton to E. Pike. May it arouse and stimulate to that important duty, which he so clearly brings to view, of *widening*, seeking in true inward retirement of soul before the Lord, for a renewal of that strength so necessary for all, in order that there may be experienced an increase and growth, as well as an advancement, in those things which shall enable to move forward in the line of duty, or to walk with acceptance in the Divine sight.

"Dear Friend,—My desires are strong for thy welfare, and therefore would I recommend to thee, as some little of my experience, principally and especially, to be diligent in the practice of this—often to wait on the Lord for the renewing of strength, and this not only in secret, where no eye sees, but also at other times, in and before thy family. And in whatever manner it may please the Lord to appear, be not thou ashamed of his coming.

Remember that a broken heart and a contrite spirit, which are offspring of his own preparing, are such as he never despises; nay, he has said by his prophet, 'though the heaven be my throne, and the earth my footstool, yet to this man will I look, even unto him that is poor and of a contrite spirit, and trembleth at my word. And such a practice, so far from lessning thy authority, I know by experience, will strengthen it in thy family, and insensibly clothe every branch of it with a true respect and love towards thee, nay more than perhaps they would otherwise bear thee. Besides, as heads of our respective families, we have a duty to exercise in them, and how can we seek for strength to exercise this duty, and be said to walk exemplarily before them, if we do not, from time to time, wait for a renewal of our spiritual senses and strength, and by our example of waiting on the Lord set before their eyes, show them that they also should be found following us in the practice of this most necessary duty, as well as others respecting their conduct and appearance. I know no more I have to say.

But thou mayst be assured that however poor my expression, and feeble my endeavors to help thee forward, I have at times truly sincere and warm desires for thy welfare, with which I shall conclude and remain thy real friend,
RICHARD SHACKLETON."

In the spring of 1754, an afflictive dispensation was allotted to Richard Shackleton. On the ninth day after the birth of his son Henry, he was deprived, by death, of his beloved wife, and left the sorrowful father of four children, viz: Deborah, Margaret, Abraham and Henry, (the latter died young.) The exquisite distress which he endured at this separation, was proportioned to the sweetness of their union; he had lost the object of his earthly affections, the endeared companion with whom he had entered into those family duties, which, during the short space of time they had lived together, she had worthily fulfilled. He had lost her when, from youth and health, they might naturally have looked forward to many happy years; but the great Disposer of events, in his inscrutable wisdom, ordered otherwise.

On the 21 of First month, 1755, R. Shackleton writes as follows: "I have the comfort to tell thee, without boasting, that I think I grow a little in a sense that death itself cannot separate and divide the union of those spirits whom the Lord hath joined and preserved near himself; and this has been my greatest relief in some late sorrowing seasons, for the loss of my very dear and inwardly beloved companion, whose spirit I am at times nearly united unto, when in the depth of affliction; and whose better part I fervently pray to rejoin, when my trials, my baptisms, my provings, and solitary sorrows, which are many, shall be over.
R. S."

Again in the Sixth month of the same year, he addresses the same friend thus: "Our ward trials are suffered to come to prove us, whether they will dislocate our minds from that which ought to be their centre. If they effect this, the accuser of the brethren, who obtained permission to put forth his blasting hand upon the outward substance of upright Job, has gained so much of his point; but if such storms only drive us nearer to the shelter of that Hand, which is full of blessing, then they have a good effect.

"Who sees not Providence all good and wise,
Alike in what He gives and what denies?"

RICHARD SHACKLETON."

The following is extracted from a letter of Richard Shackleton's written at a later period. "I believe the eye of Heaven is over you for good. He will crown your heads with His favor, (which is more precious than any earthly diadem) though for His own wise purposes ye may, as all His children expect to be, tried in the furnace of affliction. Indeed the ballast of trouble is often necessary for our unsteady vessels; and good and wise is the gracious Hand which freights us therewith, along with the other lading which he mercifully bestows. The transgression of the law in the heart, whether by acts of commission or omission, is the great evil which we ought to dread and deprecate, that we may not be led into temptation, but delivered from evil. All the rest it would be our wisdom, and conduce to our quietness of mind, to leave to unsearchable Wisdom, who knows best what is best for each of our various states, habits,

manners, and dispositions. May the Lord strengthen and enable us to do his will, whether by acting or suffering, by striving or forbearing, for herein alone consists a solid peace and capacity to be of any effect, service in the Church of Christ.
R. S."

(To be continued.)

The Visit of William H. Seward to the Mikado of Japan in 1870. Extracted from his "Travels Around the World."

(Before giving the narrative of the visit the following historical remarks are taken from the journal, to elucidate the existing condition of the government of Japan, a rank of the officials alluded to.)

"The people of Japan, whether indigenous here or derived from Siberia, assumed political organization, according to their own records, about twenty-four hundred years ago in the two islands of Nippon and Kjusiu. They were governed by an emperor, who being descended from the gods, was divine and absolute on earth, and when he died was worshipped. Not only was his person sacred to be looked upon by a stranger, but even the sun must not shine on his head, was sacrilegious to touch the dishes from which he ate. At his death, his twelve wives and all their attendants committed *hari-kari*. These attributes are still popularly conceded to him. As vicergerent of Heaven, he was the title of Tenno; as sovereign in temporal affairs, he is the Mikado or Emperor.

Miako, some thirty miles inland, was his ancient capital, and Osaka its seaport. The Emperor by divine right owned the land of the empire, and in time graciously divided them into provinces; retaining five or more of these for himself, he parcelled out the other among great lords or princes, called daimio. In the thirteenth century, a rebellion arose in the empire, and the Mikado, remaining at Miako, committed the defence of the state to the richest and strongest one of these daimio who wore the title of 'Tycoon.' This military commander, after a short time, absorbed the temporal sovereignty and reigned absolutely. Yeddo thus became a third capital of the empire.

The Tycoon, nevertheless, paid homage to the Mikado, who retained his titular rank and unquestioned spiritual authority and pre-eminence. Besides the proper revenues of his own five provinces, the Mikado enjoyed for the support of his dignity, an annual allowance made by the Tycoon, out of the general revenues of the empire. As he cultivated religion and such science as the age allowed, Miako became the centre of intelligence and learning. It still retains this distinction, Osaka being an alternate residence of the Mikado, it partook of the sanctity of the capital.

By degrees the Mikado, free from all responsibility for administration, grew in the affections of the people, while the Tycoon, exercising his power despotically, and held responsible for all national disasters and misfortunes, became an object of public jealousy and hatred. It was at this juncture that the United States, through Commodore Perry and the European powers afterward, made their treaties with the Tycoon, in ignorance of any pretensions on the part of the Mikado to temporal power. It was the Tycoon who sent two successive embassies to the United States, one in 1860 and the other in 1863. I

35, the ministers of the Western powers, siding at Yeddo, wrote alarming accounts, popular discontents with the Tyeoon's administration, and of frantic appeals made to the Mikado to resume the sovereign power, and the treaties, and expel foreigners from empire. For this object, a party was med by powerful daimios and fanatical despotisms.

While matters were in this situation, a young daimio, son of the powerful Prince Satma, was improving an academic vacation in England, to visit the United States. He went to Mr. Seward, in the Department of State. He inquired of the prince to which of the local parties in Japan he belonged. To Seward's surprise, he answered, 'to the Mikado's.' 'What,' said Mr. Seward, 'is the use of the civil war, and what question does involve?' He replied: 'The Tyeoon, who has no title to the throne, but is only a general of the imperial service, some time ago usurped government, and claims to transmit it to his heirs. This usurpation is intolerable, how long,' said Mr. Seward, 'since this usurpation was committed?' 'Oh, it is very recent, only six hundred years since it occurred.'

The revolution was successful, the dynasty the Tyeoon was abolished, and the heavenly Mikado in the year 1868, leaving spiritual seat at Miako, repaired to Yeddo. He promptly resumed the throne of his ancestors, and promptly confirmed the treaties, and of course was duly recognized by the Western powers.

Steamship New York, off the Coast of Japan, October 8th, 1870.—We have embarked, with a heavy hand upon shore to record the best and most striking incidents of our visit to Yokohama. Mr. Seward was not allowed to leave Japan without a marked demonstration on the government, as well as an expression of respect from the foreign residents. On our return from Yeddo, on the 6th, he received an invitation to an audience of the Mikado, his ceremony is usually distinguished by prostrations and formalities even more rigorous than in European courts. The time being shortened, however, in this case, the invitation was accepted.

At two o'clock yesterday morning Captain Wheeler brought to the wharf, in front of Mr. Walsh's compound, then so highly illuminated, a little steam-yacht and received Mr. Seward on board, who, against all remonstrance, persisted in keeping his engagement, though in the midst of a driving wind and rain. He was accompanied by Mr. De Long, Mr. Shepherd, and Mr. Walsh, and at six o'clock, after grounding three or four times in the way, they were safely landed at Yeddo. At eight o'clock, Mr. Ishtabashi appeared in his official Japanese costume, and, profoundly bowing, said, with measured words: 'I am kneeling for the honor of conducting Mr. Seward to the great castle, where he will be received by his majesty the Tenno; not in a stately official manner, but in a private audience, as an expression of personal respect and friendship. I am particularly commanded to make this explanation of the character of the proposed audience.'

At nine o'clock the party proceeded in tworiages, with an enlarged mounted escort. They were conducted, whether by design or not, through streets bordered by immense walled enclosures, which are the strongholds

and barracks of the several daimios who, under the Tyeoon's administration, were required to reside during alternate periods, with their armed retainers, at the capital. The discontinuance of this usage, since the restoration of the Mikado, is a singular illustration of the same advance toward a more popular system of government which was made by the kings of Europe when they reduced the feudal barons to subjection. The barracks vacated by the daimios' soldiers are now occupied by imperial battalions. The feudal soldiers of the Tyeoon must have been a ferocious crew, if they were more savage than these rough and ill-looking guards of the Tenno. The citadel, called 'The Great Castle,' crowns an eminence in the centre of the city. It is a triple fortification, nine miles in circumference, consisting of three concentric forts, each by itself complete, with rampart, inner embankment, ditch, bastion and glacis, parapet and double gates. The outer fort stands on a level with the plain, the next higher, and the central one higher still, overlooking the country and the sea. The walls of each are fifty feet high, built of granite blocks, more massive than those of the Rip-Raps, off Old Point Comfort. The imperial palace is in the centre of the inner fort. It is a low structure, differing from the temples and monasteries, not in material or style of architecture, but in the arrangement of its apartments. The area which surrounds it is tastefully planted and adorned with lawns, winding gravelled walks, small lakes, and what we would call summer-houses, and tenements for attendants and servants. The areas of the other two fortifications are similarly embellished. In any past stage of military science, the citadel must have been impregnable. We cannot learn its history.

When Mr. Seward and his friends had reached the gates of the outer fort, they were received with a salute at each of the double portals, and were permitted to pass through in carriages to the gates of the second. They were received here with similar honors, and passed to the gates of the third. Entering these with salutes as before, they were received by one of the eight Ministers of Foreign Affairs, who, having requested them to dismount their carriages, conducted them, with marked obedience, across the lawns to a sheltered place, where they rested on lacquer stools. Here a second Minister of Foreign Affairs joined the party, and, making new compliments, led them to seats on the shore of a small lake. Here the minister informed Mr. Seward that Mr. Walsh, being an unofficial gentleman, could proceed no farther, and that the same rule excluded Freeman. They stopped. At this juncture Sawa, chief Minister of Foreign Affairs, met Mr. Seward, and conducted him to a summer-house more spacious than the others, which overlooks a larger and deeper lake. On the way thither, he obtained a view of a part of the imperial stud. A rail twelve or fifteen feet long is fixed three feet above the ground, on supports. Several iron-grooved Japanese ponies, unattended by grooms, stood at this rail, in readiness for his majesty's use at the close of the proposed audience. When the party had arrived at the summer-house, the prime-minister, the Chief Minister of Finance and the heads of the other departments, were found waiting, and they were severally presented by Sawa to Mr. Seward. The whole party then sat down at an oblong

table, the prime-minister presiding, and Mr. Seward and the other visitors on his left hand, the Japanese ministers on his right. The prime-minister first, and after him each of his associates, addressed Mr. Seward in words of courteous welcome, to which he briefly replied. A pleasant conversation now ensued, during which tea, cakes, confectionary, cigars and champagne, were successively brought in by attendants, who prostrated themselves on the ground at every offer of their service. The prime-minister then, in a very direct but most courteous way, said to Mr. Seward: 'It is the custom of his majesty the Tenno to receive official visits upon business affairs in an edifice which is built for that express public purpose, and called among us a court; but his majesty on this occasion recognizes you as a special friend of Japan, and a man devoted to the welfare of all nations, and he therefore proposes, by way of showing his high respect for you, to receive you, not at a public court, but in a private lodge of his own, to which he will come down from his palace to meet you.'

Mr. Seward answered that he appreciated his majesty's condescension and kindness. While this conversation was going on, Mr. Seward, looking through an open window, saw at a long distance his friend Mr. Walsh, and Freeman, walking within the precinct which had been appointed them. Presently, an officer came hurriedly into the presence of the grave international council at the summer-house, and announced an intrusion. The prime-minister, upon Mr. Seward's explanation, directed that the supposed eaves-droppers should not be interfered with, but they must come no farther.'

(To be continued.)

For "The Friend."

Thomas Story.

It may be instructive and interesting to epitomize some of the leading incidents and experiences in the Christian career of this truly gifted man. The manner of his joining in fellowship with Friends was remarkable in respect to its being attributable to no outward instrument as a means of conviction, but rather to the direct operation of the Spirit of Truth on his mind in the silence of the natural part. Arriving at age about the year 1688, it will be observed that it was at a period in the history of the Society—something subsequent to its earliest stages, and after the warmth of persecution had in great measure subsided. He was educated in the forms of the National Church of England, but remarks, "I had no aversion to any class professing the Christian name, but occasionally heard several sorts, and yet did not fully approve any sect in all things, as I came to consider them closely."

He was bred in the profession of the law, and appears to have had a good scholastic education. His cast of mind was evidently of a logical and inquiring nature, free from excitement, and careful to investigate the foundation of any religious views which were offered in that age of polemical discussion. The extracts are taken from his journal in "Friends' Library."

"I think proper in this place, to recount some of the gracious dealings of the Lord with me from my early days. I was not naturally addicted to much vice or evil; and yet, through the conversation of rude boys at school, I had acquired some things by imita-

tion, tending that way. But as I came to put them in practice, by word or action, I found something in myself at such times, suddenly surprising me with a sense of the evil, and making me ashamed when alone; though what I had said or done was not evil in the common account of such as I conversed with, or among men, in a common acceptation. And though I did not know, or consider what this reprover was, yet it had so much influence and power with me that I was much reformed thereby from those habits which, in time, might have been foundations for greater evils; or as stocks whereon to have grafted a worse nature to the bringing forth of a more plentiful crop of grosser vices. Nevertheless, as I grew up to maturity I had many flowings and ebblings in my mind; the common temptations among youth being often and strongly presented; and though I was preserved from guilt as in the sight of men, yet not so before the Lord, who seeth in secret, and at all times beheldeth all the thoughts, desires, words and actions of the children of men, in every age and throughout the world. The lust of the flesh, of the eye, and the pride of life, had their objects and subjects presented. The airs of youth were many and potent, strength, activity and comeliness of person were not wanting, and had their share; nor were natural endowments of mind or competent acquisitions at all; and the glory, advancements and preferences of the world, spread as nets in my view, and the friendship thereof beginning to address me with flattering courtship. I wore a sword, the use of which I well understood, and had foiled several masters of that science in the north and at London; and rode with firearms also, of which I knew the use; and yet I was not quarrelsome, for though I emulated, was not envious. This rule, as a man, I formed to myself, never to offend or affront any willfully, or with design; and if, inadvertently, I should happen to disoblige any, rather to acknowledge, than maintain or vindicate a wrong thing; and rather to take ill behavior from others by the best handle, than to be offended where no offence was willfully designed. But then I was determined to resent and punish an affront or personal injury when it was done of contempt or with design. Yet I never met any save once; and then I kept to my own maxims with success; and yet so as neither to wound nor be wounded; the good providence of the Almighty being over me and on my side, as well knowing my meaning in all my conduct. But, in process of time, as these notions of corruption and sin became stronger and stronger in me, so the Lord, in great goodness and mercy, made manifest to my understanding the nature and end of them, and having a view of them in the true light, and the danger attending them, they became exceedingly heavy and oppressing to my mind. And then the necessity of that great work of regeneration was deeply impressed upon me; but I had no experience or evidence of it wrought in me hitherto. This apprehension greatly surprised me with fear, considering the great uncertainty of the continuance of the natural life; and it began to put a secret stain upon the world and all its glory, and all that I had to glory in; and though I kept these thoughts within my own breast, not knowing of any soul to whom I could seriously and safely divulge them. And indeed none, for a considerable time, discerned my inward concern

by any outward appearance; which I found afterwards had been much to my advantage and safety.

"It is admirable by what various steps the Lord is pleased to lead the soul of man out of this world and the spirit of it, home to himself; and yet I am apt to think that, in his divine and unlimited wisdom, he does not take the same outward method and steps with every one, but varies the work of his providence as their states and circumstances may best suit and bear.

"By an accident that befel me I was further alarmed to consider my ways, the uncertainty of life, my present state and latter end. It was this: Intending to go to a country church with an acquaintance, as we were riding gently along, my horse stumbling, fell and broke his neck, and lay so heavy upon my leg that I could scarcely draw it from under him; yet I received no hurt. But as we stood by him I had this consideration that my own life might have been ended by that occasion, and I did not find myself in a condition fit for heaven, having no evidence of that necessary work of regeneration. This brought great heaviness over my mind, which did not totally depart till, through the infinite mercy of God, I was favored with further knowledge and a better state."

(To be continued.)

For "The Friend."

The Alps and the Himalaya Compared.

Andrew Wilson, an English traveller, who had journeyed extensively among the Himalaya, thus points out some of the characteristics of these two celebrated mountain ranges. He says: "As I am well acquainted with the Alps it may not be amiss for me to compare the Himalaya with these European mountains, which are so well known to the English public. The Himalaya, as a whole, are not so richly apparelled as the Alps. In Cashmere, and some parts of the Sutlej valley, and of the valleys on their Indian front, they are rich with the most glorious vegetation, and present, in that respect, a more picturesque appearance than any parts of Switzerland can boast of; but one may travel among the great ranges of the Asiatic mountains for weeks, and even months, through the most sterile scenes, without coming on any of these regions of beauty. There is not here the same close union of beauty and grandeur, loveliness and sublimity, which is every where to be found over the Alps. There is a terrible want of level ground, and of green meadows enclosed by trees. Except in Cashmere, and about the east of Ludak, there are no lakes. We miss much those Swiss and Italian expanses of deep blue water, in which whitetowns and villages, sunny peaks and dark mountains, are so beautifully mirrored. There is also a great want of perennial water-falls of great height and beauty, such as the Staubbach; though in summer, during the heat of the day, the Himalaya in several places present long graceful streaks of foam dust.

The striking contrasts and the more wonderful scenes are not crowded together as they are in Switzerland. Both eye and mind are apt to be wearied among the Himalaya by the unbroken repetition of similar scenes during continued weeks of arduous travel. The picture is not sufficiently filled up in its detail, and the continuous repetition of the vast outlines is apt to become oppressive. The very

immensity of the Himalaya prevents us from often beholding at a glance, as among Alps, the wonderful contrast of green meadows, darker pines, green splintered glaciers, dark precipitous cliffs, blue distant hills, white slopes of snow and glittering icy summits. There are points in the Sutlej valley and Cashmere, where something like this is presented, and in a more overpowering manner than anywhere in Europe; but months, difficult travel separate these two regions, their beauty cannot be said to characterize the Himalayas generally. But what, even Switzerland, would be great mountains, here dwarfed into insignificant hills, and requires some time for the eye to understand the immense Himalayan heights and depth. Some great rocks, or the foot of some precipice, which is pointed out as our camp place for the night, looks at first as if it were only a few hundred feet off, but after a hour of arduous ascent, it seems almost as far as ever.

The human element of the Western mountains is greatly wanting in those of the East, for though here and there a monastery or village may stand out picturesquely on the top of a hill, yet, for the most part the dim colored, flat roofed Himalayan hamlets; not easily distinguishable from the rocks on which they stand. The scattered chalets or huts of Switzerland are wholly wanting, a European traveller misses the sometimes bright and comely faces of the peasantry the Alps. I need scarcely say also, that the more wonderful scenes of the Abode of Snow are far from being easily accessible, even when we are in the heart of the great mountain. And it can hardly be said that the cloudland of the Himalaya is so varied and gorgeous as that of the mountains of Europe, though its sky is of a deeper blue, and the heavens a much more brilliant at night.

But when all these admissions in favor of Switzerland are made, the Himalaya still remains unsurpassed, and even unapproached, regards all the wilder and grander features of mountain scenery. There is nothing in the Alps which can afford even a faint idea of the savage desolation and appalling sublimity of many of the Himalayan scenes. Nowhere also, have the faces of the mountains been so scarred and riven by the nightly action of frost and the mid day floods from melting snow. In almost every valley we see places where whole peaks or sides of great mountains have very recently come shattering down; and the thoughtful traveller must feel that no power or knowledge he possesses can secure him against such a catastrophe, or prevent his bones being buried, so that there would be little likelihood of their release until the soft earth dis-solves. And, though rare, there are sudden passages from these scenes of grandeur and savage desolation to almost tropical luxuriance, and more than tropical beauty of organic nature. Such changes are startling and delightful, as in the passage from Dras into the upper Sind valley of Cashmere, while there is nothing finer in the world of vegetation than the great cedars, pines and cypresses of the lower valleys.

The Alps extend only for about 600 miles, counting their extreme length from Hungary to the Mediterranean, and their lateral extent is very narrow; but the Himalaya proper are at least 1500 miles in length. They are great deal more if we add to them the Hind

ish which really constitutes only a continuation of the range, and their breadth is great that at some points it is more than the entire length of the Alps."

MY DARLINGS.

Selects.

When steps are hurrying homeward,
And night the world o'er-spreads,
And I see at the open windows

The shining of little heads,
I think of you, my darlings,
In your low and lonesome beds.

And when the latch is lifted,
And I hear the voices glad,
I feel my arms more crampy,
My heart more widely sad;
For we measure death of blessings
By the blessings we have had.

But sometimes in sweet visions
My faith to sight expands,
And with my babes in His bosom,
My Lord before me stands,
And I feel on my head, bowed lowly
The touches of little hands.

Then pain is lost in patience,
And tears no longer flow :
They are only dead to the sorrow
And sin of life, I know,
For if they were not immortal
My love would make them so.

—Alice Cary.

An Account of the Convincement of Ruth Anna Butler.

I trust it is in a degree of the influence of a blessed Truth, that I now take up my pen, in order to communicate the tender dealings of an Almighty and most merciful Father into me, in the morning of my day, that if I continued in this state of mortality to future years, my head may be reverently bowed in gratitude, in taking a little retrospect ereof.

It pleased my Heavenly Father to incline my heart to seek Him from my infancy; and about the fourth year of my age, I was vored with a remarkable visitation; the beginning of which I was made sensible of one day, while much interested in a little piece of work; and confining myself to my chamber, many serious reflections presented themselves, and in the evening, sitting in the arbor with my parents, brothers and sisters, I burst into tears; and all leaving the room except my dear mother, she asked the occasion of my uneasiness. I told her I was not thinking if it should please the Almighty to call me before the light of another day, whether I was in a fit situation to appear before his great Majesty! She talked suitably to me, and said she made no doubt if I sought properly to be rendered worthy of an inheritance in the kingdom, I should gain it, and I felt great distress that night, and the morn continued for some time.

One evening, being left alone with my beloved mother, and having some desire of improvement, I asked her what books would be suitable for me to read. She answered there was none more suitable than the Bible. This reply pleased me, and she took that opportunity to verify with me, what society I thought I could join. I told her I believed I should be a Quaker. Indeed I saw it clearly to be my duty to leave off several of my foppish and superfluous things, and felt peace in giving up thereto. But, through unwatchfulness I straggled there, and became again captivated and ensnared in the vain fashions and customs of

the world; and my sister being about to get married, several new things were provided for me on the occasion: I put on my cushion, and dressed in the most fashionable style for girls of my age. I joined in all the levity and mirth that was going forward, and was at times elated; but alas, that innocence and calm serenity of mind with which I had been favored while I lived in the cross to my natural inclination, were no longer in my possession. Every enjoyment carried with it a sting, and I felt a void which I cannot express; but which no doubt proceeded from the absence of my beloved. Nevertheless I pursued a gay line of life till turned of seventeen; though I had often to return to that season wherein I was favored with religious thoughtfulness, and lamented in secret my situation. In the fall preceding the change in my dress, my sister invited me to spend the winter with her, in order to introduce me into company. I accordingly went, and frequented the dancing assemblies, theatre, and all places of amusement that were usual. I also learned music, having a master to attend, and I made great proficiency therein, as I had a natural ear and uncommon fondness for it. I promised myself much pleasure, and thought it would fill up many vacant hours which I should have in the country: for, from the sensation that often attended my mind, I did not think I should continue long in the circle I was then in; and through the course of the winter, I have since thought I was under a very tender visitation of Divine love, though at that time I knew it not.

My mind was at seasons so absorbed, that even when paying formal visits, and surrounded with company, I scarce knew what passed, and but few expressions escaped my lips; so that my friends would tell me I was extremely silent, and laugh at me for it; and indeed I was at times almost ready to conclude there was a great degree of insensibility in me, and natural uneasiness of disposition; for notwithstanding no exertion of my friends, or expense of my parents was spared, to render everything agreeable, I was not happy. When under the hands of the hair dresser, tears would stream from my eyes, and I could not tell the cause, but doubtless it was the chords of thy Divine love, O my Beloved! operating in me in order that I might become wholly thine!

I well remember, one afternoon, being engaged to attend a large party, I went up stairs to dress, and sat before the glass attempting to arrange my hair; but not considering what I was about, being in deep thought, it grew late, and I was hurried; not finding some of my finery which I wanted to put on, it flustered me; and feeling myself troubled in those things which gave me much uneasiness, pain and anxiety, without knowing where to seek relief, I threw myself on the bed in great agony of mind, and gave vent to many tears. After some time I arose, went down stairs, and made some excuse to my sister who expected to see me in full dress. But truly my mind was not in a fit situation to join in a large company, though I strove to hide the real cause. At another time, going with some company to see a play performed, my mind was so abstracted from the objects around me, that I could pay no attention to the scene, but felt dejected and distressed to a degree not easily to be conceived. The last ball I attended, was given by some young

men of my acquaintance. My sister had a dance the preceding evening at her house, and I being very much fatigued, wished to excuse myself from the ball; but it being a set company, and my friends pressing me to go, I yielded, and went, but had not danced more than two or three dances, before I again felt deep distress and dismay to cover my mind. I called my brother and told him I was not well; desiring him to speak to one of the servants in waiting to go home with me, as I wished to leave the room unobserved. He accordingly did so, and my sister expressed her surprise at my quick return. I pleaded indisposition, and soon went to bed. Soon after this I lost an uncle. He dying suddenly it greatly shocked and distressed me. The next First-day evening, it being the time of the spring meeting of (Friends), an evening meeting was held at Pine street. A connection of mine asked me to go with her. I had frequently in the course of the winter, gone in there, when my sister would go on to church, we living two doors from the meeting house. She and her husband would sometimes smile and tell me, they believed I intended to be a Quaker. I did not know it would so soon be the case, but felt a secret satisfaction in attending their meetings, and generally sat near the door, or in the back part of the house, lest my gay appearance should attract their attention. In the evening above hinted at, we had not sat long before a Friend got up and spoke; but he was rather tedious, and my friend soon proposed going. But I chose to stay, and she left me. After some time dear D. Olley appeared largely in testimony. He mentioned the prospect he had of some youth then present having a great work to do; and spoke so closely to my state that I was much struck with it, but knew not at that time that it was intended for me, and thought how deeply those must feel, for whom it was intended. But although I did not at that time take it to myself, I had afterwards cause to remember that solemn testimony, and it was a strength to me.

(To be continued.)

The English Arctic Expedition.

A WINTER IN THE POLAR REGIONS.

A correspondent of the London *Times*, at Valentia, gives the following particulars of the English Arctic Expedition:

"The Alert, after parting with the Discovery in latitude 81 degrees 44 minutes, steamed due north, as it was determined that she should get as near the Pole as possible. The water was fairly open at the commencement, but the ice began to gather more thickly every day, and in the beginning of September the Alert entered an indentation on the coast, latitude 82 degrees 27 minutes, which was the highest latitude she could reach.

"An ocean of ice presented itself before them. This nook was called by them Floeberg Beach, because during the remaining portion of the autumn and in early winter huge floes drifted along by the currents came together, and knit in the water outside the Alert, and formed for her a very considerable protection, though a remarkably gripping one. Here the ship was bound up for seven months, and for nearly fifty of those days light was never seen. It was a terrible time for those on board. The cold was the most intense ever registered, and when it was one

hundred and four degrees below freezing point life outside the ship could not exist, especially if the slightest wind was blowing. During these months the deck was banked up with sixteen inches of snow, in order to keep in the heat, and around the sides of the ship it was piled to the depth of some feet every fortnight.

"The welcome light of the moon came to cheer the ice-bound voyagers, with some evidence that their breath still existed, and its light reflected by mile after mile of glittering ice and snow was of dazzling brilliancy. Landward from the Alert were large mountains, which, from the base upward, looked like cones of snow; and outward toward the ocean ice ridges rose in such long and interminable lines that the ship seemed forever fixed in those dreadful solitudes. During this terrible period the men on board were never allowed to lose heart. Such a failing they never evinced, for men could not have borne up with braver hearts against dangers than they. But the admirable preparations which had been made on board enabled them to pass their time as agreeably as mortals could under such circumstances.

Before the cold of the weather became so dangerous that the officers and men were kept confined to the ship, many expeditions were made on foot over the ice in her neighborhood. A large floe, seventy-five feet high, settled down a short distance from her bow, and the men set themselves, while the weather would allow them, the task of cutting a stairway to its summit, which they rapidly succeeded in doing. The top of Lookout Floe, as they called it, was generally the termination of those excursions, and on one occasion they carried on a performance on it which made the piles of bergs far as they never had done before. It was when, on the 6th of November, the crew of the Alert, with all due ceremony, burned Guy Fawkes' effigy on its top. At the same moment, and without preconcert, the crew of the Discovery were carrying out the same old practice on a smaller floe, in a degree of latitude to the south. Whenever the weather permitted of existence outside the ship, there was some skating to be had on smooth floes, but the great excitement was shooting, and the principal quarry was the musk ox, an animal never before known to inhabit such latitudes. During the winter months about twenty-eight of these animals were shot, and in the spring about ten more, and their skins have been brought home. The horns are small and nicely formed, and the hair which clothes the animal is long and of a dark brown color. The ermine, an animal never before known to live so far north, was also killed."

It is well known that plants sleep at night; but their hours of sleeping are a matter of habit, and may be disturbed artificially, just as a cock may be waked up to crow at untime hours by the light of a lantern. A French chemist subjected a sensitive plant to an exceedingly trying course of discipline, by completely changing its hours—exposing it to a bright light at night, so as to prevent sleep, and putting it in a dark room during the day. The plant appeared to be much puzzled and disturbed at first. It opened and closed its leaves irregularly, sometimes nodding, in spite of the artificial sun that shed its beams at midnight, and sometimes waking

up, from the force of habit, to find the chamber dark in spite of the time of day. Such are the trammels of use and wont. But after an obvious struggle the plant submitted to the change, and turned day into night without any apparent ill effects.—*Phila. Ledger.*

For "The Friend."

George Dillwyn.

We apprehend there are few of the readers of "The Friend" that have not heard of the Friend whose name is at the head of this article. Though removed from the church militant in the early part of this century, he was so noted as a minister and seer, that his memory has been handed down to succeeding generations, and cherished as that of a man who was a bright example of the power of the religion professed by Friends to secure the gifts and graces that dignify and adorn the experienced Christian.

He was in the habit of noting down as they occurred, his thoughts on subjects that deeply interested him. Many of these have been published in that sententious volume entitled "Dillwyn's Reflections." The following taken from his manuscript notes have never before been made public, but there is too much intrinsic worth in them, and aptness to the present time, to be lost.

"The principle of Truth, to the confession of which our first Friends were gathered, and by which they were formed into a Society, as a city set on an hill (to render it more conspicuous)—is its proper foundation: and the testimonies derived from that principle, are the ensignia by which it stands distinguished from other professions of the Christian religion.

"These testimonies, being consonant to the precepts and doctrines of Christ as recorded in the scriptures of the New Testament, cannot but be answerable to the same principle in every human mind, whether those who embrace it are known to us or not—even as trees of one kind, everywhere bear the same kind of fruit: so, on the other hand, if persons professing a belief in this principle, bear not those testimonies they can be but nominal members of the Church, and their conduct and profession will be at variance.

"If these premises be granted, it will follow that if two contradictory rules are adopted by different parts of the body, one or the other of those parts must have deserted the foundation. For otherwise, the principle of Truth would not be the same at all times and on all occasions.

"It is not unreasonable to suppose that in the rules of a body governed by one infallible head, there would be no contradictions, at least not in any essential points, or those on which membership depends; but that they would be adapted to its members in all possible circumstances.

"If therefore, any such contradictions appear, some means should be devised for examining them, and seeing whether they may not be corrected, or so modified as to satisfy all.

"If a person, convinced of the principle of Truth in his own mind, inclined to unite with our Society in recommending it [the principle of Divine grace] to the world, should on inquiry, find us to be so regardless of it ourselves, as that by the terms of membership in some of our Yearly Meetings we are liable to be disowned for what others approve and

allow to be practised—what must he think I verily believe, if I were that person, I should be likely to turn my back on such a ped and seek further, or content myself with discovery of the pearl in my own field."

"The apprehension that such assembly [Yearly Meetings] may be too large fully answer their end is not new; and it would well if an effectual and satisfactory remedy could be found.

"I think the attendance of that of Long was formerly restricted to ministers, elders, the members of the meeting for sittings, correspondents, and representatives from the several Quarters. This restriction probably arose rather from the pressure of necessity than from unbiased deliberation; and was chiefly designed to prevent the intrusion of certain factions and disaffected members, by which the church was then infested; when the cause ceased, the restriction was gradually dispensed with, and at length came obsolete.

"Another expedient thought of for reducing those assemblies and preserving an equanimity, has been to confine them to representatives, with the addition to the lists of such only as request their names to be added, approved. One objection to this expedient may be, that it might sometimes exclude a sent individuals under a concern to attend or others, who after the list was made out by a particular desire so to do. Perhaps this difficulty would be obviated if such were allowed to apply for permission to their Monthly Meetings, and also have lists of their names addressed to the Yearly Meeting granted them.

"The multiplication of Yearly Meetings in the Society appears to require the greater caution, and ought not to take place but in cases of absolute necessity; nor then without the consent of those already existing. For otherwise, as every such meeting is an independent body, that meeting may grant another, and this another till they become too unlike each other to harmonize. In proportion as their codes of discipline differ, the terms of membership are likely to be various, and may prove contradictory. In which case persons denied admission in one may obtain it by applying to another; or a member who in one Yearly Meeting has conscientiously embraced a sentiment, might on removing into another (where it is disapproved,) forego and oppose it or be treated with as an offender. Ministers, too, in passing from one Yearly Meeting to another must often be exposed to the difficulty of either conniving at what they conceive to be wrong, or of involving the meetings they represent in altercation, to the injury of their services.

"But beside this, strangers into whose hands our several books of discipline fall, finding them inconsistent with each other, on points of importance, and as, of consequence, a divided people, may call in question even the principle to which we ascribe them and by which we profess to be governed in the affairs of the church.

"With these views I remember that when the printing of the Book of Discipline was first proposed in our Yearly Meeting, a wish was expressed that it might be deferred till the other Yearly Meetings were consulted, and their several codes compared.

"It is asked what I apprehend the discipline of the church properly relates to, I

THE FRIEND.

TWELFTH MONTH 9, 1876.

answer, 'To the support of those testimonies which it is charged, for the promotion of truth in the earth, and which we believe are desirable to the Witness for Truth, placed in its author in every man's bosom; as well as for the preservation of its members in a consistency of conduct therewith,' and I conclude that any rules which do not necessarily relate to those heads are superfluous and ought to be dispensed with; because being of a captious nature, queries concerning them cannot be answered in clear and unambiguous terms, and may betray us into a lifeless formality which would rather screen existing inconsistencies, than expose them to the help they need.

"A laxity of concern for the maintenance of our religious testimonies, and the well-ordering of the Society, is the almost certain effect of an over-eager pursuit of the world, and correspondent success in the accumulation of riches. The pursuers themselves are often conscious of this, yet know not where to stop; and going on, at length arrive at the brink where they must turn their back on the sea or the other of those objects. If the decision is in favor of the world, it soon shows itself, not merely by a neglect of meetings and religious duties, but also in a change of their society and the drift of their conversation. They now see, or would have it believed they see, that the peculiarity of dress and manners, which the ever-varying fashions of the world leave us, has nothing to do with true religion; for this, say they, expands the heart, and a regard to such trifles tends to throw it up into bigotry and superstition. "If they have families, and children, these naturally take the tone and footsteps of their pointed leaders; who, forcing that in their circumstances in the world are likely to place them far above the common level of society, indulge them in liberties that often lead to fixed marriages."

There is no influence emanating from the teacher during recitation which so completely paralyzes the mind of the pupil as the practice of scolding or ceaseless fault-finding once prevalent, but now rapidly disappearing from the public schools. The temptations to ostentation and snappishness on the part of the teachers are manifold, and, at times, almost irresistible. Lack of faithful preparation, of quickness of perception, of moderate reasoning power, of interest, of enthusiasm, of uninterrupted attention, of just appreciation of the objects and advantages of recitation, are causes of irritation to be found in almost all classes of those who possess but little love for the work of education, who regard neither the present happiness of children, nor the true welfare of individuals and states, who do short, work in the educational vineyard exclusively for dollars and cents, or because some congenial fields of labor are not immediately accessible to them.

The outward Sabbath was a type of the present which Christ gives to those that believe in his name; for, indeed, they that truly believe in him do enter into rest, and cease from their own labors and workings of themselves, and witness God's working in them, "both in will and to do of his good pleasure."—*Matthew 11:28.*

From the printed minutes of Western Yearly Meeting, held at Plainfield, Indiana, and commencing Ninth mo. 15th last, we abstract the following information of its proceedings:

Barnabas C. Hobbs was appointed clerk. The whole number of meetings in the Yearly Meeting is 83. Number of members 12,175; of whom there were admitted by request in the year, 626; four meetings have been established, and two have been discontinued within the year; 15 ministers have been recorded; 17 persons are reported as using spirituous liquors as a beverage. The number of children between the ages of six and twenty-one years is 3594, and 3345 of these are reported to have attended school within the past year. An address to the members from the Meeting for Sufferings, on the subject of Secret Societies, was approved. This address in alluding to the pledges and obligations required of those who join the Grangers and other secret associations, says: "Their judgment and conscience are thus solemnly pledged to men who may profess to be religious without being Christian, and to religious observances which are strictly ritualistic ceremonies. The ostentatious and sometimes grotesque pagantry displayed by most secret orders in public parades, and on ceremonial occasions, and their gorgeous halls and temples, we conceive are not allowed by Christian liberty, nor are they a fit exhibit of economy in works of benevolence and charity. * * * No promise is held by good morals to be binding, when its observance would be an infraction of the civil or divine law." * * "We would earnestly commend to all our members the necessity of a wise and timely decision to keep themselves free from any complications or alliances with any association or order which requires solemn pledges of secrecy, or which stands upon a doubtful moral or Christian basis. Let no step be taken which may be in the way of the future service of your Lord and Saviour, or which will embarrass your relationship to a liberty in his church."

The Yearly Meeting adopted important changes in respect to their rules of Discipline relative to ministers and elders, viz:

"1. That the name of the Meeting of Ministers and Elders be changed to 'The Meeting of Ministry and Oversight.'

"2. We recommend that overseers be associated with ministers and elders, and be a component part of the Preparative, Quarterly, and Yearly Meetings for Ministry and Oversight.

"3. That the duties pertaining to these meetings be so modified that they embrace not only what pertains to the ministry, but a general oversight in teaching and shepherding of the flock.

"4. That the appointment of elders be for three years, and the nomination for each respective Monthly Meeting shall be made by a committee of said meeting in association with the Quarterly Meeting's committee. That the Meetings of Ministers and Elders as now constituted remain unchanged until the appointment by Monthly Meetings is made as directed in Article 4th. From the period of their appointment by the Monthly Meeting

they become members of the Preparative Meeting for Ministry and Oversight, and by that meeting are reported to the Quarterly Meeting for Ministry and Oversight.

"5. That the quarterly Meeting's committee, in association with the committees of all the Monthly Meetings composing said Quarter, be directed, as a part of their duty, to inquire into the character and standing of such as stand in the station of ministers. When said joint committee are united in the belief that any have fallen into objectionable habits, tones, or gestures, indistinctness of enunciation, or multiplicity of words, a misapprehension in their calling or line of service, &c., such shall have their defects kindly and faithfully brought to their notice, with desires for their improvement and encouragement, and that they may study to show themselves approved unto God, workmen that need not be ashamed, rightly dividing the word of truth.

"6. When they believe the services of any having a gift in the ministry, recorded or otherwise, have ceased to be edifying or useful to the Church from any cause, that they report the same to their Monthly Meetings. Ministers so reported lose their privileges as members of the Meetings for Ministry and Oversight, nor can they be authorized to engage in gospel service as ministers by their Monthly Meetings until they are again officially approved as at first.

"7. That when any appearing as ministers give satisfactory evidence that they have a gift from the Lord for the edification of the Church, the Preparative Meetings may submit their names to the Quarterly Meeting for Ministry and Oversight as suitable persons to have a seat in and be a part of those meetings. When such may have a concern to visit any of the meetings, families of Friends, or individual members, within the limits of their own Quarterly Meetings, such are recommended to submit their concern to the judgment of the Preparative Meeting for Ministry and Oversight, held at the regular time or on call, to which they belong, and if the same be approved by that meeting, they are at liberty to lay the same before their Monthly Meeting, and should it occur therein, furnish them with suitable credentials for that object.

"8. It is directed also, that all standing as recorded ministers lay their concern to engage in religious service away from home before their Preparative Meeting for Ministry and Oversight, at either their regular meeting or on call, and obtain the approval thereof preparatory to its being considered by the Monthly Meeting, unless there be some emergency which will not enable them to hold such consultation.

"9. We also recommend that care be taken not to move prematurely toward a full recognition of ministerial gifts. Christ commissioned his disciples for home work before they were prepared for an apostolic commission to go into all the world. Such a mission required a fuller and more mature preparation, and also a special baptismal experience to preach the gospel to every creature, doing the work of an evangelist in word and doctrine.

"10. That when the fitness of persons for usefulness as ministers, elders, or overseers, is under consideration, such should give satisfactory evidence that they are true exponents of our doctrines, as set forth in our Confession of Faith in said Discipline."

The "Book and Tract Committee" report a large distribution of Tracts, but their donations of Friends' writings appear to be confined to four volumes, and to sales of books (character not given) amounting to \$162.77.

The "Home Missionary Board" made a report of their labors, which consist of temperance meetings, tract distribution, holding religious meetings in series in the outskirts of cities, in jails, almshouses, and other places; "mothers' meetings" for poor women, who are taught sewing, and to whom religious reading is meantime carried on, aiding the needy and distressed, &c.

Besides the above, there were reports read from the following standing committees, viz., on "Peace," on "Foreign Missions," on "First-day Schools," on "Indian Affairs," "Education," and "General Meetings."

SUMMARY OF EVENTS.

FOREIGN.—Serious disturbances have again broken out in Mexico, caused by the intolerance of the church party, who complain of the religious toleration granted by the government of President Lerdo de Tejada. The church party alleges that Protestant missions have been protected by the government, and have been quite successful, so that many Mexican cities and towns the power of the Catholic church has been destroyed, and in some of them convents and monasteries have been abandoned for want of means to maintain the inmates. The leading mischief-maker is the Archbishop of Mexico. In several of the States there are insurrectionary attempts to effect a revolution.

Notwithstanding the continued shipment of soldiers from Spain to Cuba, the insurgents in that island prolong the contest with great obstinacy. On the 18th ult. a severe conflict took place on the plains of Manacaes, between a Spanish force and about seven hundred insurgents. The Spaniards lost 33 men killed and 50 wounded. The insurgents left 24 dead on the field, and carried off their wounded. The recent shipments of Spanish troops to Cuba have amounted to 25,000 men.

The beet-root crop in Germany as well as in France, is said to be a complete failure this year.

The French Chamber of Deputies, by a vote of 263 to 229, has rejected a bill which was supported by Dufaure, President of the Council and Minister of Justice and Worship, for an increase in the priests' salaries. It is also expected that the Chamber will reject the grant which Dufaure urgently demands for clerical scholarships.

The last number of the *Annuaire de Göttinge* gives the total population of European Russia, including Poland, at 71,731,000; Finland 1,857,000, the Caucasus, Siberia and Central Asia 29,700,000, making a total of about 103,000,000.

There has been a great fire in the city of Yeddo, Japan; one of the most destructive which has occurred in many years.

During the past two weeks, large shipments of gold have been made from London to New York. The Bank of England has made a small advance in the selling price of American gold.

On the first inst., there was a debate in the French Senate on the bill for the cessation of judicial proceedings against participators in the Commune. Minister Dufaure advocated its passage, but it was defeated by a vote of 156 to 136.

The total number of cinchona trees now planted in India is 2,765,000, chiefly of the red bark variety, which, though it does not yield so much quinine as the yellow, yet is said to give more alkaloid, which as a febrifuge is equally effective, and is easily extracted. These trees occupy about 2000 acres of ground on the Nilgieres, and the bark is now sent to London for sale, at \$1 a pound.

A London dispatch of the 4th says: A terrific gale has prevailed throughout the British Isles since Saturday. Floods are reported in many places, and have caused much damage. There have been numerous disasters to shipping on the coast, with considerable loss of life. The waters of the Thames are very high, and a disastrous overflow is feared.

A Calcutta dispatch says the eastern districts of Bangalore are reported to be rapidly recovering from the effects of the cholera. The disease appears to be less than was expected, but the loss of life has probably been understated. Ninety per cent. of the plow cattle have

been lost. Sickness prevails, but the fears of destination are removed.

The report headed by Col. Abina, Minister of War, has broken out simultaneously in the city of Buenos Ayres and the province of Entre Rios, Argentine Republic.

The Paris Official Journal of the 4th announces that the French Ministers have tendered their resignations to the President. MacMahon has requested them to remain until he has arrived at a decision on the subject.

UNITED STATES.—The number of interests in Philadelphia for the week ending 11th mo. 25th, was 256, and in that ending 12th mo. 24, 317, including 28 of 18th mo.

The emigration to Texas from the Northern States, especially Illinois, Indiana and Ohio, continues quite large. In eight months of this year the emigration to Texas via the Missouri, Kansas and Texas Railway, numbered 160,185 wagons and 97,110 persons.

On the 25th ult. a cavalry force, 100 men, under Col. Mackenzie, attacked a Cheyenne camp of about 100 lodges and 500 men, beside women and children, on the West Fork of Powder river, capturing the village and the greater part of the Indians' horses. A considerable number of the Indians were killed. The U. S. soldiers had thirty-one killed and wounded.

The annual report of the Commissioner of Internal Revenue shows that the revenue receipts for the fiscal year, ending 6th mo. 30th last, were \$117,236,625, an increase over the preceding fiscal year of \$6,691,476. Spirits, tobacco and fermented liquors furnish \$165,792,826 of the total revenue receipts.

The U. S. Signal Office at Philadelphia gives the mean temperature of the Eleventh month as 45 deg., the highest on the 2d ult., 77 deg., the lowest on the 30th, 23 deg. Amount of rain for the month 7.21 inches, of which 4.72 inches fell on the 19th and 20th ult.

The statement of the public debt for the Eleventh month shows that in that period the debt was increased \$457,682.

The following was the vote in some of the States at the recent Presidential election. *Illinois.*—Hayes, 278, 222; Tilden, 258,807; Cooper, 7,109; total, 555,141. *New Jersey.*—Tilden, 115,958; Hayes, 107,513; Cooper, 753; total 224,220. *Indiana.*—Tilden, 213,252; Hayes, 207,971; Cooper, 9,533; total 431,030. *Minnesota.*—Hayes, 72,962; Tilden, 48,799; total 121,761. *Tennessee.*—Tilden, 134,166; Hayes, 89,566; total 223,732.

An incendiary fire in New Orleans the first inst., destroyed 12 buildings, and rendered many poor people homeless. Loss about \$350,000.

A company has been organized in Philadelphia for continuing an exhibition and bazaar on the site of the International Exhibition which has just been closed. The Park Commission has offered the main exhibition building remaining on the ground for the purpose mentioned, and when the buildings were sold at auction on the first inst., the main building was purchased by the company for \$250,000. This huge structure, which was not built with a view to great permanency, cost \$1,600,000. The other buildings brought but a small fraction of the original cost.

At the commencement of the present week the Presidential election was still undecided, the returning boards of Florida and Louisiana not having announced the results in those States. It appears that in Florida the vote will be almost evenly divided between the two parties, the Hayes electors having 24,328, and the Tilden 24,284, a Republican majority of 44. The Democrats however object that if a defective return from one of the counties is corrected, it will show a small majority for several of them. In Louisiana there is a Tilden majority of over 100,000, but it is contended that this is obtained by intimidation of colored voters in some districts, and that in all such cases the returns ought to be rejected.

The second session of the 44th Congress assembled in New York on the 4th inst. Quorums were present in both branches. In the House 260 representatives 246 members answered at roll call. Samuel J. Randall, of Pennsylvania, was elected Speaker by a vote of 161 to 82 for James A. Garfield, of Ohio, the Republican candidate. The House appointed a special committee to investigate the case of the South Carolina and investigate the election in that State.

The Pennsylvania Hospital record differs in some points from that of the U. S. Signal Office in this city. The Hospital record gives 9.02 inches of rain for the month, the highest temperature during the month 77 deg., and the lowest 29 deg.

RECEIPTS.

Received from Joseph Arnfield, Agent, England, £2 vol. 50, 4 copies, and for Samuel Alexander, Jamaica, 10 copies of the *Friend*, 1876, 10 copies. From George Boone, John Bottomley, Samuel Bradburn, H. Buckley, John Cheat, Robert Clark, Thomas G. Williams Graham, Abraham Green, Foster G. Susanna Grab, Mary Halden, James Hobson, S. H. Hope, John Horniman, Henry Horswall, Wm. W. Lewis, Edward Watkins, William Williams, and Liam Wright, 10 shillings; cash, 50; and for E. Bell, £1, vols. 49 and 50; William Buzhang, £1, vols. 50, 2 copies; Samuel Bottomley, £1, vols. 49 and 50; Joshua Jacob, 15 shillings; to No. 52, vol. 50; Major Stout, 12s. 6d.; to No. 52, vol. 50.

FRIENDS' ASYLUM FOR THE INSANE.

New Franklin, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSUAH H. WOOD.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at Burlington, N. J., on the 15th of Tenth last, SUSAN T., wife of Richard F. Mott, and daughter of Robert Thomas, in the 46th year of her age, a member of Burlington Monthly Meeting. It may be observed, although called suddenly away from active participation in the duties and responsibilities of life, was not unprepared for the final summons; but through an abiding trust in the merits and mercies of her Redeemer, whom she endeavored to serve, her fervent and large circle of friends have the consoling belief that she has entered a better and grander her kingdom of eternal rest and peace.

—, at his residence, Marlton, New Jersey, on Friday, the 2d of Eleventh month, 1876, UELIAM E. in the 76th year of his age, a member and elder of Christ Particular and Upper Evesham Monthly Meeting. He bore a suffering and painful illness for many months, but Christian fortitude, often expressing an ardent desire to be released, but quickly adding, the Lord's will the right time, frequently supplicating that his patient might hold out to the end. He was a man of few words, yet faithful in the discharge of duty and in the support of the cause of truth. He was a devoted husband, and was deeply deprived of his beloved wife by death, from which time his health gradually declined. He was weary from earth and the fleeting things thereof, giving evidence to those around him in whom he was trusted, even Christ.

—, at his home, in Shucler Co., N. Y., on 15th of 11th mo., 1876, after an illness of about ten days, ROBERT W. WRIGHT, aged 84, for many years elder of Hector Monthly Meeting. When young belonged to a meeting at Stone Brook in New Jersey, where he suffered a severe attack in the year 1822. Upright in principle, and ever ready to discharge his religious duties, he walked his walk through life, and he had no unity with the modern innovations upon ancient principles and practices of Friends. He held for some time believed that his earthly course was nearly over, and appeared to anticipate the close of his walk with much serenity of mind.

Visit of William H. Seward to the Mikado of Japan. In 1870. Extracted from his "Travels Around the World."

(Continued from page 131.)

When half an hour had passed, a chamberlain announced his majesty's arrival at the summer-house. Sawa and Ishtabashi remained with Mr. Seward; all the other ministers took leave to join the Mikado. A final summons came to Sawa; he rose and conducted the party some distance along a smooth, narrow walk, till they came to a high, shagged knoll, reversing by the way. The minister and Ishtabashi now stopped, and making low bows, announced, in subdued and almost whispering tones, that his majesty was to be in a summer-house directly behind this knoll. After this, there was no word spoken, when they had gone round the knoll, the edge of which now contained the heaven-derived majesty of Japan came to view. It stands a few feet above the ground, is one story high, and consists of four square rooms of equal size, with sliding partitions, the ceilings six feet high, and the whole building surrounded by a veranda. All the rooms were thrown open, and were without furniture. The visitors entered the apartment, which was at their left, and, looking directly forward, saw only Ishtabashi surrounded by a crowd of official persons, crouched on the floor. Having reached the exact centre of the room, Mr. Seward was requested to turn to the right. He did this without changing his place. The United States minister and the consul stood at his right hand. In this position he directly counted the Mikado, who was sitting on a throne raised on a dais two feet above the floor. The throne is a large arm-chair, apparently of burnished gold, not different in form or ornament from the thrones which are used on ceremonial occasions in European courts. All the cabinet ministers and many other officials had arranged themselves below the dais, and behind and around the throne, the Mikado was dressed in a voluminous robe of reddish-brown brocade, which covered his whole person. His head-dress differed in fashion from that which was worn by Sawa in our audience with him, only in this, that a band of curved projecting prong was attached to the boat-shaped cap, and bent upward, the corresponding appendage of the minister's cap being shorter, and bent downward. What distinguished the elevation of the dais, and the height

of his elongated cap, the emperor's person, though in a sitting posture, seemed to stretch from the floor to the ceiling. His appearance in that flowing costume, surrounded by a mass of ministers and courtiers, enveloped in variegated and equally redundant silken folds, resting on the floor, reminded Mr. Seward of some of the efforts in mythology to represent a deity sitting in the clouds. His dark countenance is neither unintelligent nor particularly expressive. He was motionless as a statue. He held a sceptre in his right hand, and at his left side wore one richly-ornamented, straight sword. What the Mikado and his court thought of the costumes of his visitors, with their uncovered heads, square, swallow-tailed dress-coats, tight white cravats, tighter pantaloons, and stiff black boots, we shall never know. Who shall pronounce between nations in matters of costume? The Mikado raised his sceptre, and the prime-minister, kneeling, then announced to the United States minister, by the aid of Ishtabashi, also kneeling, that he might speak. Mr. De Long advanced a step or two, and, bowing three several times, said: 'I hope I find your majesty in good health.'

The prime-minister, kneeling again, presented to the Mikado a written paper, open, and as large as a sheet of foolscap. The Emperor, after looking at its contents, touched it with his sceptre. The prime-minister read it aloud in Japanese. Ishtabashi, again kneeling, brought his head to the floor, and, then raising it, read, from a translation which lay before him on the floor, his majesty's gracious answer: 'I am very well; I am glad to see you here.'

Thereupon Mr. De Long, thus reassured, said in a distinct voice, worthy of a Western orator as he is:

'I have the honor to present to your majesty, William H. Seward, a citizen of the United States. Your majesty having been pleased to invite him to this audience, it is unnecessary for me to speak of the achievements or of the character of this eminent American statesman.'

The interpreter, having rendered this speech into Japanese, Mr. De Long resumed his place. In accordance with an intimation from the prime-minister, Mr. Seward now advanced, and said: 'I am deeply impressed by this gracious reception by the sovereign, at the capital of this great, populous, and emulous empire. I desire to express earnest wishes for your majesty's personal health and happiness, and for the peace, welfare, and prosperity of Japan.'

The prime-minister held before his majesty another paper, which, being read by him, was then rendered by the interpreter as follows: 'I am glad to see you now for the first time. I congratulate you on your safe arrival here, after the very long journey you have made. The great experience which you have had must enable you to give me important infor-

mation and advice how to promote the friendship that happily exists between your country and my own. If you would please to communicate any thing in that way, you are requested to make it known to my prime-minister, and I invite you to express yourself frankly and without reserve.'

Mr. Seward replied: 'I thank your majesty for this gracious permission to confer with the prime-minister on international affairs. A citizen of the United States, I am visiting Japan and the adjacent countries on the Pacific coast, as a traveller and observer. I wear no official character, and I bring no message. The President, however, and all my countrymen, will expect me not to leave any thing undone which I can do, to promote a happy understanding between those countries and the United States, as well as also the advancement of civilization in both hemispheres. With this view, I shall, with great pleasure, avail myself of the privileges which your majesty has granted me.'

The emperor, with his entire court, remained in place until the visitors had retired, after an exchange of salutations. They were conducted back to the summer-house. All the Japanese ministers soon entered and resumed their places around the table. Refreshments were served, and Mr. Seward was informed that his audience was the first occasion on which the Mikado has completely unveiled himself to a visitor. Not only the prime-minister, but all his associates, discussed with Mr. Seward at much length the political relations of Japan with foreign powers. The minister desired him to take notice that the government, in dealing with the vanquished Tycoon's party in Japan, at the close of the late revolution, had copied the example of toleration given them by the United States. They carefully inquired concerning the machinery employed in the United States in taking the decennial census, and also that details of the system of collecting and disbursing public revenues.

They wrote a letter on the spot, addressed to their ambassador at Peking, and, delivering it to Mr. Seward, solicited his aid of their interest at that court. Mr. Seward was deeply impressed on two points: First, that although the administration of justice in Japan is conducted in a manner widely different from that of the Western nations, yet that the public mind entertains not the least distrust of its impartiality. Second, that the administration of the Mikado is sincerely emulous and progressive. Again, if there is any danger in the near future, it will arise, not from a retarding, but from a more rapid acceptance by the government of Western ideas and sentiments, than a people so rude can at once understand.

The ministers had assigned the whole day for the high consultation. They expressed much regret when Mr. Seward announced that he was obliged to depart at the earliest moment for Yokohama, where the steamer was

waiting. Waiving invitations to examine the citadel and the imperial palace and grounds, Mr. Seward returned to the Consulate, and thence proceeded down the bay, directly to this steamer, bound for Hiogo.

A box followed him which contained all the cake, fruit, and confectionery, which remained from the entertainment at the Castle. The ladies noticed that the varieties of cakes were not merely colored externally, but through and through—crimson, yellow, purple, and indigo. The supply sufficient for the voyage to Shanghai.

It ought not to mar the effect of the Mikado's courtesy, if we state that the audience, in its minutest details, was projected and perfected in the Japanese cabinet, with the concurrence of Mr. De Long. All European governments, and even that of the United States, adopt a similar precaution in regard to official executive audiences.

Japan has especial reasons for prudence. The empire is a solitary planet, that has remained stationary for centuries, until now it is suddenly brought into contact with constellations which, while they shed a dazzling light, continually threaten destructive collisions.

Gospel Power.

For "The Friend."

Paul tells us that the gospel "is the power of God unto salvation, to every one that believeth." And George Fox says, that "none are true believers but such as are born of God." If we admit this, we see that the gospel of Christ will bring salvation only to such as thus believe. Paul says he "was made a minister according to the gift of the grace of God given unto me by the effectual working of his power; that I should preach among the Gentiles the unsearchable riches of Christ;" "not of the letter, but of the Spirit; for the letter killeth, but the spirit giveth life." "For the kingdom of God is not in word but in power." And further, the gospel which he preached, he says, "was not after man; for I received it not of man, neither was I taught it but by the revelation of Jesus Christ."

But it took a miraculous manifestation of divine power to convince Paul that Jesus was the Christ; and to make him a minister and a witness for him. He saw, at midday, a light above the brightness of the sun, and heard a voice from one whom he then knew not, that said, "I am Jesus whom thou persecutest; but rise and stand upon thy feet; for I have appeared unto thee for this purpose, to make thee a minister and a witness both of these things which thou hast seen, and of those things in the which I will appear unto thee." As he "was not disobedient to the heavenly vision," he became "the minister of Jesus Christ to the Gentiles, ministering the gospel of God," "to open their eyes, and to turn them from darkness to light, and from the power of Satan unto God; that they might receive forgiveness of sins, and an inheritance among them that are sanctified by faith in him" who had called him out of darkness into his marvellous light."

Now we, like Paul, by receiving the gospel power and command from Christ our Lord, and being obedient to the heavenly gift, may be made ministers of the same gospel, and be qualified by him to minister it at his command, in the power of the Holy Ghost, to the consolation and elevation of fallen men who

embrace it. But the receiving must always precede the giving; "that the excellency of the power may be of God and not of us." Remembering the saying of Christ, "Without me ye can do nothing." We find that the natural unrenewed man, by a cultivated intellect, may become largely qualified in natural things, and also in language; so as to be able to use the "enticing words of man's wisdom" with ease and fluency, but it amounts to nothing in relation to the things of God; for "the things of God knoweth no man, but the Spirit of God." And "as many as are led by the Spirit of God, they are the sons of God." But we see a great reluctance in the strong will of man, to being thus led. As he finds himself so capable in relation to natural things, he cannot see, until his eyes are opened by the divine light, but that he is equally capable in relation to the deep things of God. Thus in the blindness of his heart, a false activity predominates, which stands more in the wisdom of men than in the power of the everlasting gospel. Although Paul was a man of learning, yet he seemed to have a care that his speech and his preaching should not be "with enticing words of man's wisdom, but in demonstration of the Spirit and power;" that the faith of his converts "should not stand in the wisdom of men but in the power of God."

We may feel this gospel power silently in our hearts, saying to the mental ear, as with a loud voice, "fear God and give glory to him; for the hour of his judgment is come; and worship Him that made heaven and earth and the sea and the fountains of waters." We may, I say, feel this gospel power without words, and feel that it is unto the salvation of them that believe and obey it; and we may have this gospel power reciprocally with words, ministered to us by instruments chosen and qualified of God. Thus the church is edified, and her stakes strengthened, and her cords lengthened, and each member encouraged to hold on in the heavenly race, and finish his course with joy. On the contrary, we often see that we may have many words without the gospel power; and even though they should be ever so eloquent and pleasing to the outward ear, what do they profit? They may without great care, allure those who are unstable and unlearned in the school of Christ, far away from the heavenly fold. Thus all that we receive from no higher than an earthly fountain, is worse than nothing to the Christian traveller, as it leads to bewilder, and dazzles to blind. So we see that we may have the gospel power without words, and we may have it with words, and we may have words without the power; which instead of producing life and light, bring death and darkness over a meeting. For like begets its like. A stream cannot rise higher than its fountain. And if that which we hand out to an audience is received from an earthly fountain, it cannot raise the hearers higher than earth, or earthly things. But if what we receive and hand forth, or minister to others, is from a heavenly fountain, it has a tendency to raise the hearers above this transient world, to seek "an inheritance incorruptible, and undefiled, and that fadeth not away."

R. Barclay in his Apology, page 163, says: "This saving spiritual light is the gospel which the apostle saith expressly 'is preached in every creature under heaven,' even that very 'gospel whereof Paul was made a min-

ister.' For the gospel is not a mere declaration of good things, being the power of God unto salvation to all those that believe through the outward declaration of the gospel be taken sometimes for the gospel; yet is figuratively." And Geo. Fox, in his Journal, page 61, says: "For though I read the scriptures that spake of Christ and of God yet I knew him not but by revelation, as Ely who hath the key did open, and as the Father of life drew me to his Son by the Spirit." Then the Lord gently led me along, and I saw how I had loved, which was endless and eternal, surpassing all the knowledge that we have in the natural state, or can get by history or books." And on page 63, "I saw how I had loved the law who had never known the law to be their schoolmaster; and man talked of the gospel of Christ, who had never known life and immortality brought to light in them by it." Again, on page 365, while reasoning with some that said, "the gospel was the four books of Matthew, Mark, Luke and John;" I told them, that the gospel was the power of God, which was preached by Matthew, Mark, Luke or John were written and it was preached to every creature, which a great part might never see nor be of those four books, so that every creature was to obey the power of God; for Christ, the spiritual man, would judge the world according to the gospel, that is, according to his invisible power. When they heard this, they could not gainsay; for the truth came over them. I directed them to their teacher, the grace of God, and showed them the sufficiency of it, which would teach them how to live and what to deny, and being obeyed would bring them salvation. So to that grace I commended them and left them."

It is only as we have an ear to hear which the Spirit saith unto the churches, that we are enabled to distinguish between the letter and the spirit—and it will be with us according to our faith. If we turn away from the Spirit, and prefer the letter, the Spirit will turn away from us. We shall be left to our choice. "He gave them their request; but sent leanness into their soul." And I believe leanness will be our portion, if we choose salvation any thing short of the eternal gift power of God. But if we have a living faith in it, and walk in the light, as God is in the light, we shall then have fellowship of light with another; and it is then, and only then believe, that we shall witness the blood of Jesus Christ his Son to cleanse us from sin, and save us with an everlasting salvation. D. H.

Dublin, Ind., 12th mo. 24, 1856.

How a Pair of Birds Escaped Being Burnt Up.—The day that Ingleside, a popular Massachusetts resort, was burned, a nest with two young birds was found in the top of a small spruce tree that stood near the arched way at the top of the steps in front of the house. The morning after the fire, Corey, who had the care of the grounds, went to look after the birds and found them uninjured. A chair piece of shingle had fallen from the barn roof and rested on some twig above the nest, and this helped to shelter the little ones from the heat which was sufficiently intense to fire to the roof of posts beside the tree. While Corey was examining the birds, the mother came and fured them down into

fields below. "Are not two sparrows sold for farthing?"—*Late Paper.*

From the "Penn Monthly."

The North American Bison and its Extirpation.

(Concluded from page 126.)

A moving herd of buffaloes will blindly follow their leaders, those in the rear pressing on unconscious of the danger into which they sometimes force their comrades at the front. Herds thus rush into the pounds prepared for their destruction by the Indians, or are destroyed by the same wily foes to the brinks of precipices, the presence of which those at the front discover too late to avoid, being pressed on by the main body of the panic-stricken herd, who in turn follow their leaders in the unlooked for fatal leap. Again, in crossing treacherous streams, whole herds will ceaselessly rush into the quicksands, or with sinistral blindness dash across the track of an approaching railway train. It has hence been said, and with some degree of truth, that the buffalo is endowed with only the smallest degree of instinct, and that this little seemeth rather to lead him into difficulties than out of them. This, however, is not quite true; since the blind rushing of a herd into danger results not so much from the stupidity of those at the front ranks as from their inability to turn aside after the danger is discovered, in consequence of the irresistible mass behind, unconcerned of danger, forcing them onward.

As may be well imagined, the habits of the buffaloes, in their undisturbed daily lives, are not far different from those of grazing herds of domestic cattle. They indulge in similar gambols, and when belligerent, in similar glancing demonstrations. The bulls are excessively fond of pawing the ground and of throwing up the earth on their horns, which they readily accomplish by lowering themselves upon one knee. Particularly horine also is the satisfaction they take in rubbing themselves against whatever will oppose resistance, whether it be rocks, trees, bushes, or the corner of a hardened clay bank; the telegraph poles, however, which have been erected along the railroads that cross their range, afford them especial delight as convenient scratching-posts, and may be seen as well smoothed and covered with tufts of hair and grease from their unctuous hides, as are the posts about a farmer's cattle-yard. But what is very unlike anything in the habits of domestic cattle is their propensity to roll themselves on the ground; which, notwithstanding their seemingly inconvenient form, they accomplish with the greatest ease. But their greatest pleasure consists in rolling in the mud, or in "wallowing" as it is termed, from which exercise they arise looking more like an animated mass of dripping mud than their former selves. The object of these peculiar ablutions is doubtless to cool their heated bodies and to free themselves from troublesome insects; the coating of adhesive mud they thus obtain securing them immunity, for many hours after, from the attacks of the herds of mosquitoes and flies with which they are so much harassed.

Despite the apparently unwieldy form and awkward, lumbering gait of the bison, his speed far exceeds the progress he appears to make, while his endurance is so great that the tectness and bottom of a well-trained horse will be severely tested in an attempt to overtake him. When pursued, or when urged on

by thirst, rough ground and a tumble now and then seem scarcely to retard him; plunging down the steep sides of abrupt ravines and up the opposite slopes, as though such irregularities of the surface formed no obstacles to his progress. The buffaloes also exhibit astonishing expertness at climbing; often, when in quest of water, making precipitous descents, where it would be impossible to follow with a horse, and even where a man would clamber down with difficulty. Ordinarily, however, the bison shows commendable sagacity in his choice of routes, usually choosing the easiest grades and the most direct courses; so that a "buffalo trail" may be depended upon as affording the most direct road through the region it traverses.

That the buffalo is capable of complete domestication has been most thoroughly demonstrated; but as yet there have been no persistent, systematic attempts to perpetuate either a pure or a mixed race, nor to test its value as a draught animal, or for other purposes. That the buffalo is susceptible of domestication, and that it will breed freely with our domestic cattle, was well known in Kentucky and West Virginia nearly a century ago. As early as 1750 buffalo calves had frequently been taken by the settlers, and brought up among the domestic cattle; being kept, however, mainly as objects of curiosity. According to Gallatin, a mixed breed was quite common ninety years ago in some of the north-western counties of Virginia; but they gradually became merged into the common domestic stock, through lack of a fresh supply of the wild blood. Other writers also refer to its susceptibility of domestication, and of the probability of its forming, through crossing with the domestic cattle, a superior breed of working oxen. More recently a most thorough test of the domesticability of the buffalo was made in Kentucky, by Robert Wickliffe, who bred them for a period of over thirty years, he obtaining his wild stock from the Upper Missouri country. The experiment was entirely successful, but the herd at last became merged with the common stock through neglect. The mixed breed proved larger than either the wild or tame stock, but were inferior in milking qualities, though they gave promise of forming a stronger breed of working oxen.

As yet no attempt appears to have been made to perpetuate an unmixed domestic race of the buffalo. Such a project, however, is not only feasible, but would doubtless be attended with profitable results. Experience shows that even the first generation are no more dangerous to handle than ordinary cattle; being far more tractable, in fact, than the half-wild stock of the Texas plains. If they should chance to prove incapable of rivaling our domestic race—the result of centuries of careful breeding—it might still be a profitable, as well as an attractive addition to our domesticated animals. Its capabilities as a mixed race should certainly be thoroughly tested, and no time is more favorable than the present. Many of our frontier settlers in Kansas, Colorado and Texas, live on the very borders of its range, thus enabling them to supply themselves with the young animals necessary for the enterprise with little cost or trouble, while the experiment could be tried under the most favorable circumstances possible, avoiding all the risks attending change of habit and acclimation.

The presence in any country of immense herds of wild herbivorous animals, is of course incompatible with the simultaneous existence there of agriculture, and that the bison had hardly disappeared from the more fertile portions of our plains and prairies before vast fields of wheat and corn appeared over the same areas, shows that the time for his restriction had already come. If, however, he is allowed to become extinct without some effort to preserve for a time his existence in the more worthless portions of the public domain—portions that for a long time, if not forever, will be useless for agricultural purposes—it will be a truly lamentable and disgraceful fact in our nation's history.

From the facts already given it is evident that the buffalo cannot long survive unaided by government protection, and it is greatly to our disgrace that nothing has as yet been done to check the wholesale and almost useless murder of these defenceless beasts. No adequate law for its protection has as yet been enacted, either by the general government or by that of the different States and territories which include portions of its range. How to best protect it, in regions so sparsely populated, and where laws are so easily set at defiance, presents by no means an easy problem, and yet one not hopeless of solution.

J. A. ALLEN.

Some Account of the Confinement of Ruth Anna Rutter.

(Continued from page 132.)

About the Fourth month I returned home; and soon afterwards was invited to a wedding; and being again in a careless, thoughtless state, was pleased with the thoughts of having the opportunity to display my fine clothes; but a few nights after this I had a dream which made considerable impression on my mind. The next day, sitting with a near relative, with whom I was very intimate, I related my dream to her, and told her I believed there would be a death in the family. Whilst we were conversing together there seemed a cloud or mist which over-shadowed me, and I felt as if I was raised off the chair. I believe I was at that moment insensible to everything around me, my countenance changed, and my cousin in some surprise asked me what was the matter. I told her I felt very strangely, and burst into a flood of tears. When a little recovered, I told her if nothing happened to myself, or in the family, never to mention the situation I had been in. My mind then became awfully impressed with the thoughts of death, and the necessity of being prepared. On the succeeding day I heard of the decease of a little cousin, who died of a short illness, and when we were assembled to attend his burial, two children of one family were carried by the door, who died of the same disease. All these things had a tendency deeply and awfully to impress my mind. I seemed in a state of amazement and distress, and was willing to deliver myself up to the Lord, but knew not what step to take. All was dark and gloomy before me. May I never forget the night I passed after the funeral. A veil of thick darkness seemed to cover me, and the terrors of an angry God encompassed me about. A near relation slept with me, who had taken a serious turn sometime before. She spoke encouragingly to me, but alas! my mind was not in a suitable condition to receive it.

The next day my parents came home, having been absent for some time. I shed abundance of tears, which was attributed to the sympathy I had for my afflicted relatives, not knowing the real cause. The young woman whose wedding I was invited to, was married according to the appointment, but I felt no disposition to attend the marriage, being sorely distressed; but the day after I paid her a marriage visit, though I scarce knew where or what I was about.

For six weeks I experienced a state of deep conflict and exercise, my dress became very burdensome to me, and the fear of not having stability deterred me from changing. In the course of that time I spent a week with some Methodist relations. Their minister came while I was there. I attended their meetings, and was much pleased. My mind being in a very tender state, they also invited me into their class meetings; but I did not feel the same unity with that,—however, I believed them to be a seeking people. I became greatly attached, and thought I should join the society. But after my return home, still feeling some doubt, and not that peace and confirmation which above all things I desired, my prayers were put up in secret, when a little strength was afforded, that I might be rightly directed; but oh, I knew not what to do, or which way to turn myself for peace of mind. One day being in great distress, my endeared mother came into my chamber, and seeing my situation, she knelt down and prayed fervently for my preservation. At another time she came to me in my chamber, and I, being in great agony, threw my arms around her and asked her what I should do. She told me there was no necessity or cause for my being so distressed, as I was young and innocent; but still my dress being a very great burden to me, and the fear of running too fast, greatly distressed me. One day, being retired, I threw myself on the bed, and taking up the Bible that lay by the side of it, (scarcely knowing what I did,) opened upon this passage: "Put off thine ornaments, that I may know what to do with thee." I also had a dream which still further confirmed me—I thought I was at the point of death, and there seemed no help for me; and being in great agony I covenanted with the Almighty, that if he would spare me a little longer, there was nothing which was required of me, but what I would give up to, through his grace assisting me, and that the remainder of my days should be dedicated to his service. I immediately after made this covenant, I thought I saw myself recovered, and in a plain garment very neat and simple.

Shortly after this I attended a general meeting at Uxehlan; having made preparation thereto as secretly as I could. I took the trimmings of one of my plainest silk gowns, and cut off the trail. I had a black bonnet made without much trimming, which I wore instead of my hat and feathers. There was a considerable number of young girls in company, going to the meeting and I endeavored to appear cheerful, but my heart was secretly engaged in cries to the Lord that I might hear something that would be confirming to me; for I was then wavering whether or not I should join the Methodists. We accordingly went to meeting, and soon after I sat down to deep exercise covered my mind, and after some time dear William Savery got up and spoke so exactly to my state that my heart

was much broken, and my spirit constricted within me. We lodged that night at a house where William Savery also was, who, with some others, marking our appearance to be in the gray line of life, wondered a little at our being there upon such an occasion; but upon our telling them it was from a desire of attending that general meeting, they in a pleasant way expressed their approbation, and spoke encouragingly to us.

After my return from this meeting, the weight and necessity of my putting on a plain dress seemed to increase, and one evening, most of the family having gone from home, I sent to the shop for some plain gauze, and by twilight, with a darning needle, made a little round *card cap*. Next morning I rose early, but did not leave my chamber until most of the family had breakfasted; being upon my knees, and earnestly petitioning to be rightly directed, after which I went down stairs. My father, mother, and a little nephew, were sitting at the table, and as I entered the room my father viewed me (in a manner that somewhat affected me) with silent astonishment at the alteration; however I was favored to keep in a degree of quiet, although it was indeed a deep trial to be thus exposed to the observation of my connections and acquaintances. But my dear sisters and brothers continuing to treat me with their wonted affection and respect, my heart was, I trust made measureably thankful. As I labored under a heavy affliction from an inflammation in my eyes, occasioned by a cold taken some time before I changed my dress, which proceeded from my not taking necessary care when I left off my cushion, and my health appearing to decline from the great exercise of mind I was under, my parents sent me to the Yellow Springs, in Chester county, where I spent four weeks. It happened to be in the time of their harvest frolics, and being persuaded by some company who were there for their health, I went to see them dance. But oh, the distress of mind which I felt when entering the dancing room, I cannot describe! It seemed as if I were in a fire, and could not stay many minutes, but walked into the balcony; and shortly after left the company and retired to my chamber, where I gave vent to many tears, and earnestly besought forgiveness for what I had done; after which I felt a little quiet.

The springs did not prove effectual in restoring my eyes, though my health was considerably mended. In the fall it was thought necessary for me to go to Philadelphia and call a consultation of physicians, as my friends were apprehensive I should lose the sight unless something could be done. The doctors proposed to scarify it, and I felt a willingness to submit to the operation. I have not any doubt that this heavy affliction was in Divine wisdom, to wean my affections from the world. But kind Providence did not suffer the operation to be performed, for, although they came many times with instruments in their pockets, my eye was never in a proper state to receive it. I continued to suffer extreme pain with it for twelve months, a great part of which time I was under the care of physicians, but after a time, being favored to seek to Him from whom all true help cometh, and my dependence withdrawn from those physicians of no value, in a firm reliance that the Lord would restore me in his own time, I became resigned; and forever blessed his

holy name, he was indeed pleased to restore me without the aid of any human assistance. As he is pleased often to afflict for wise purposes, so he is 'graciously pleased to restore when those purposes are fulfilled.

Soon after my return from the city in the fall, Wm. Savery visited Pottstown meet and I happened to be there. He appeared largely in testimony, and spoke so exactly my state, and his doctrine carried with it such an evidence, that I could no longer doubt principle; and since that, I do not remember ever to have omitted an opportunity which was in my power, to attend Friends' meetings. He also appeared in supplication; in one place of which my mind was so struck with belief that I should be called into this ministry, that it caused me to tremble from head to foot. After meeting I invited him home with me; and he, having some recollection of me from seeing me at Uxehlan some time before, accepted the invitation. He presented me with a little book, for which I was very grateful, not for the value of the book but because it was given as a token of regard from one to whom I felt my spirit nearly united. The next Fourth-day he proposed to be at a Monthly Meeting at Exeter; whether my mother and myself went and attended a meeting for worship; and a memorable season it was to me. As we returned home seemed as if the face of nature was changed. I saw a large field of labor opened, and the work was not to be done in a day, or month; but that it was a gradual progress, work, and must go on step by step. I had begun to conclude, after I had altered my appearance, and given up all those recreations of which I was wont to partake, and feeling a degree of peace therein, that the work was completed, and I had nothing more to do; so was in danger of taking up false rest. But He who began the work did not leave me here, but caused a renewed visitation of his love to be extended through that instrument. On Fourth-day evening came in late, and lodged; and in the morning before we parted, had a solemn opportunity with us; in which season he addressed me by name, imparting much counsel and encouragement, if faithfulness was kept to on my part, telling me, also, that the passage through this life was known, even by the most experienced to be a continual warfare. Which sealed to me I have since been feelingly sensible of; but as this was the first time I ever had been so singularly spoken to, it affected me much. I had, some time before this memorial visit from Wm. Savery, been greatly exercised about my music. Having a particular fondness for it, and making considerable proficiency therein, I could not give it up, and it was absolutely required; but after this renewed visitation, it seemed like forbidden fruit, and I dare not touch it. However, not being thoroughly satisfied whether it would be required of me wholly to give it up, I wished to be rightly directed, and one night going to bed under the exercise, I dreamed I was playing, and as I touched the string, they broke under my fingers. This dream, with the feeling that attended my mind, convinced me the time was fully come for me to part with this idol also; which, though a lot and continued cross, I was enabled to take up

(To be continued.)

The luxury of luxuries is that of doing good.

Selected.

The Goodness of the Seasonable Word.

A word spoken in due season, how good is it.—*Yerks xv. 23d.*

This is a brief declaration, and, like many others, though brief, is full of instruction, for, there is a time for everything, and "a season for every work under the sun," there is especially, we may believe, the right time for the right thing, and the due season for the right word. Indeed, to a great extent, its wisdom consists, and its value lies in its seasonableness. It is not less true in a spiritual sense, than a natural one, that there is the time to sow, and the time to plant, and the wise laborer will watch for the time, and disperse the seed in the season. As in our addresses to the mighty we are not heard for our *much* speaking, so, our testimony for Him, will not be ground find acceptance. Nor will our words gain an entrance into the hearts of our souls, by reason of their number; but, if they find a place there, and spring up and bear fruit, must be because under the Divine guidance, they have been sown in their "due season," and graciously watered by the rain of heaven. "There is a time to keep silence, and a time to speak." May those who labor in the Lord's vineyard, and have a "word" from Him, ever seek to know the season, when the seed is not only ripe for the soil, but the soil prepared for the seed, for the "preparation of the heart," as well as the "answer of the tongue," is on the Lord's.

Let the "word" be in the hour of danger, the word of warning; in the day of trouble, the word of comfort and counsel; of strength, the hour of temptation; of encouragement, the hour of faintheartedness; of faith, in the moment of weakness and doubt; of love and sympathy, in the season of adversity and trial; in the day of prosperity, the word of admonition not to forget God; in that of recreation and pleasure, that we condemn not ourselves in that which we allow. How good, under every circumstance, and in every condition of life, has proved the fitly spoken word. Like a brook by the way, to the weary and thirsty traveller, like apples of gold in pictures of silver, to longing eyes and hungry souls. To the loitering and indifferent, like goads, and as nails fastened in a sure place, to the Master of assemblies! Under the power of Him, who alone can touch the heart; under that guiding hand, which alone can build the city; under the blessing of Him, who alone can give the increase, how good has proved the faithful, seasonable "word," though but a word, dropped in brokenness and sincerity. Those who gave, and those who received, can alike add their amen! to the declaration of the wise king that even "a word spoken in due season, how good is it!"

Arctic Voyages.—The failure of the British Arctic Expedition under Captain Nares to reach the North pole recalls similar unsuccessful attempts on previous voyages, from his country and England, since the Franklin expedition sailed. In 1848-9 the British ships Enterprise and Investigator were sent out. In 1849 the Plover, Resolute, Assistance, atreped, Pioneer, Lady Franklin, Sophia, Prince Albert, and Felix, all British vessels, sailed; and also the American expedition in the Advance and Rescuer. In 1851 to the British expeditions then out were added the ship North Star and steamer Isabel. In 1853

the British ships Phoenix and Talbot were out, and in 1853-4 Dr. Kane's expedition in the Advance was out for two winters. In 1860 the British steamer Fox sailed, and Dr. Hayes' expedition also sailed from this country. After that the Arctic voyages became fewer. Captain Hall's expedition in the Polar was made in 1871-73, the steamers Junata and Tigris, also going; about the same time on summer cruises. The series is closed by Captain Nares' expedition, and at present no further explorations seem to be contemplated by either the United States or England.—*Phila. Ledger.*

THE PEACE OF GOD.

PHILIPPIANS IV. 7.

The peace of God!—Ah that my spirit craveth
With an intense desire!
'Tis like a stream in which the way-worn laveth,
Whom desert heat doth tire.

I know 'tis that alone the soul which keepeth,
And heart and mind at rest;
More precious than the tears alone one weepeth
Upon a loving breast.

The peace of God, like water pure upwelling,
Pollution cannot stain,
For love eternal is its source and dwelling,
Healer of every pain.

I know that understanding it defieeth
Its power to comprehend;
An anchor sure, on which the soul relieth,
Cast by the Sinner's Friend.

The peace of God! Ah! that the soul upheareth,
That groweth 'neath its woe;
It tells us, to the uttermost, One careth
For all we undergo.

The peace of God! Dear Saviour, this possessing,
I know Thou'lt be my Guide;
If rich in this, the Spirit's greatest blessing,
I'm safe, what'er betide.

MARRIAGE.

For "The Friend."

The following extract on the subject of "Marriage" is commended to the thoughtful perusal of all young Friends.

"Marriage being a divine ordinance and a solemn engagement for term of life, is of great importance to our temporal and spiritual well-being, yet it is often too inconsiderately entered into, and from motives inconsistent with the evident intention of that unerring Wisdom by which it was primarily ordained; which was for the mutual assistance and comfort of both sexes, in temporals and spirituals, that their endeavors might be united for the education of their children in the nurture and admonition of the Lord; and for the discharge of their duty in their various allotments in the world.

"Where the parties differ in their religious sentiments the most interesting bond of union is wanting, even that which should increase and confirm their mutual happiness, and render them meet helps and blessings to each other. Under these unhappy circumstances the reciprocal obligation into which they have entered becomes their burden, and the more so as it may not be of short duration. The prospect of felicity they might have flattered themselves with in the beginning they have found themselves disappointed in, by the daily uneasiness accompanying their minds and embittering their enjoyments.

"The perplexed situation of the offspring of such alliances is also to be lamented. Attached by nature to both parents, their con-

fusion often renders them unfixed in principle and unsettled in practice; brothers and sisters are trained up in lines diverse from, and in some instances opposite to each other—thus differing in principle they are frequently divided in affection, and though so nearly related are sometimes at the greatest distance from that love and harmony which ought continually to subsist between them.

To prevent falling into these disagreeable and disorderly engagements it is requisite to beware of the paths that lead to them—the sordid interests and ensnaring friendships of the world, the contaminating pleasures and idle pastimes of earthly minds; also the various solicitations and incentives to festivity and dissipation. Let our dear youth likewise avoid the too frequent and too familiar association or intimacy with those from whom may arise a danger of entanglement."

Statistics of Immigration.—The quarterly report of the Chief of the Bureau of Statistics for the three months ending with the 30th of June, 1876, shows the total number of immigrants who arrived during the year to be 169,986, of whom 111,786 were males and 58,200 females. The arrivals at the port of New York were 87,823; Haron, Mich., 31,234; San Francisco, 24,989; Philadelphia, 7,812; and Baltimore, 5,093. The principal countries of the immigrants were as follows: England, 24,373; Ireland, 19,575; Scotland, 4,582; Germany, 31,937; Austria, 5,646; Sweden, 5,603; Norway, 5,173; Denmark, 1,547; France, 8,002; Italy, 2,910; Russia, 4,764; China, 22,781 (of whom 260 were females); Quebec and Ontario, 17,314. The following table shows the immigration into the United States during the last five fiscal years:

Years.	Males.	Females.	Total.
1872	240,170	164,686	404,856
1873	273,792	184,114	457,906
1874	189,225	124,114	313,339
1875	139,950	87,548	227,498
1876	111,786	58,200	169,986

—New York Observer.

For "The Friend."

The following extracts are from an instructive letter of our late valued friend Joseph Elkinton, written during that period of his life which was spent, under an apprehension of religious duty, in promoting the welfare of the Indian natives residing in the Allegheny Reservation, New York. He was at the date of this letter in his 23d year.

"7th mo. 6th, 1817.
"My endeared —, I have been waiting some time to experience a qualification to address thee in this manner, knowing that times and seasons are not at our command, and how happy is it for him, who when he is favored with a knowledge of times and seasons for particular purposes, is engaged in endeavoring to improve them to the best advantage, and in such a manner that it may bring forth fruit to the glory of the great Husbandman; for the apostle Paul in his epistle to the Corinthians, saith, 'I had rather speak five words with my understanding, that by my voice I might teach others also, than ten thousand words in an unknown tongue.' Oh! that we, my beloved —, may be engaged to labor after a similar qualification in all our movements through life, that thereby we may not become the means of causing spiritual

death to any of our brethren or sisters, by improper actions, that we are so liable to fall into, when we get down from our watchtower! There it is, and there only, that we shall be enabled clearly to discover the movements of the enemy, who is lurking about, and endeavoring to gain an unperceived entrance at some weak place that is not well guarded. It is not his wish to make direct and open war—he would much rather deceive, and get possession of the city, little by little. He seldom tries to gain possession all at once; for if he can only become master by degrees, that will answer his purpose well enough, who is not wanting to present excuses to the view of the mind that will sanction our doing certain things, that stop the progress of the blessed birth in the soul. I am aware, my beloved —, of my weakness, I am aware that I too often slip in my steps, and at times I am ready to query whether I shall ever arrive at the 'good land'—feeling myself so weak and unworthy; but let us not be discouraged; let us endeavor to put on the whole armor of faith, remembering the blessed promise that though 'the youths shall faint and be weary, and the young men shall utterly fall,' yet 'they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary; and they shall walk and not faint.' What a blessed promise! Let us more and more endeavor to keep our eye single to the great Head of the Church, who I believe, beyond doubt, if rightly looked unto, will preserve us in trying dispensations, and will not permit the waves to cover our heads. We have abundant cause of encouragement in the many blessed promises that are left upon record for our instruction, and that we may rightly improve the many advantages that we are also favored with is very desirable.

How fading how transitory are the enjoyments of the votaries of pleasure; and oh, the sting that is left behind them! Not so with that dedicated mind whose meat and drink it is to do the will of the Father. Thou, my beloved —, knows what it is to feel the reward of peace for well doing; thou knows that the great Master richly rewards His faithful servants and followers for acts of dedication and obedience; thou knows in some measure the effects of disobedience, and we read that 'if ye be willing and obedient ye shall eat the good of the land,' but 'if ye refuse and rebel ye shall be devoured with the sword.' And oh! that we may 'choose the Lord for our portion, and the God of Jacob for the lot of our inheritance;' then come what will come,—come life, come death,—all will be well, and we shall be able to rejoice in the God of our salvation, and joy in the Holy One of Israel. He it is that is able to make hard things easy, and bitter things sweet; and He it is that is worthy to be served, both now and henceforth; and oh, that we may know a growth in His blessed work.

Let us, of all things, my beloved —, guard against falling into spiritual death. Oh! that we may be preserved from taking up a false rest that is short of the 'good land' and let us not get discouraged and say that our enemies are a people great and strong like the Anakims, and we shall fall before them! but let us endeavor to lean upon and trust that Arm that is mighty to save and powerful to deliver. For if we only put our whole confidence upon that 'stronghold,' the

powers of darkness will not be able to prevail against us, and that our confidence may be placed there is, I trust, my present desire.
* * * * *
JOSEPH ELKINTON."

For "The Friend."

Peasant Life in Burgundy.

Philip G. Hamerton, an Englishman who resided for some years in Burgundy, gives in his book "*Round my House*," some curious and interesting information respecting the rural population of that part of France.

Our writer says: "In the present chapter I intend to say something about a class of persons of whom Englishmen generally know hardly any thing, and yet that class is the very bone and muscle of France. I intend to say something about the peasantry. The peasant-world is a world by itself, and a vast and very important one. How small and insignificant in the number of human lives which are dedicated to them, are the pursuits of art and science in comparison with agriculture. The farmer is everywhere, the artist and man of science only here and there in the great towns, or if in the country, isolated like swimmers in the ocean. Renan speaks of States like France as vast Scythias with little spots of intellectual civilization, scattered over them at wide intervals. Our habits of life, our newspapers and railways, which bring the little points of light together, make us forget the width of the intervals and the millions of people who live in them. From the intellectual point of view, France is a Scythia with very small colonies of Athenians to be found in it, here and there. The true Scythians are the peasantry, the Athenians are the little groups of cultivated people in the towns, or the isolated ones in a few of the country houses.

* * * * * First, on the intellectual side, what is their condition, what do they know, believe, or think? A certain proportion of them are able to read, but few can read easily enough to do it for their pleasure, or for a long time together. The book and the newspaper have practically no effect upon peasant life. In place of these the peasants have two currents of communication; the descending current, which flows from one generation to another, and the spreading current, which flows out in all directions at once, as an inundation covers a wide plain. The first is Tradition, the second is Rumor. The two words are of course unknown in the true peasant's vocabulary, but he will generally mark the distinction in the way he begins what he has to say. * * *

We all know that there are traditions, and we have a general conception of the manner in which they are handed down from one generation to another, in the talk of the winter evenings. *Rumor* holds her court in the marketplace. The markets are the newspapers of a great unlettered peasantry. It is said that the news of any important occurrence will spread all through the poorest classes of India, with a rapidity which seems utterly unaccountable, and that it is not inaccurate. What I have seen of the French peasantry leads me to accept without surprise, the rapidity with which news is said to reach every peasant in India, but what is said about its accuracy surprises me. In France the peasantry all know the same piece of news at the same time, but the piece of news is almost invariably a myth. What the peasants are saying and thinking in one department of France at any given time, they are saying and think-

ing in other departments a hundred leagues away, though there may be no obvious communication between them. The notion which gains currency is generally some notion utterly unimaginable by cultivated minds, and remote from the truth as any misrepresentation of modern personages and events possible can be; but a notion which is believed millions in a country of universal suffrage may be worth the attention even of the lightened. English people fancy that the minds of the French peasantry are entirely the hands of the Roman Catholic clergy; this is very far from being true; the peasant mind seems to be almost entirely self-poised, self-centred, and to exist according to so laws of its own being, which are for us so secure as to be almost inscrutable. I have often talked with priests on this subject, and told them that they are utterly powerless against the rumors which are the news of the peasantry. An excellent instance of this is the succession of notions unfavorable to the Pope and the whole priesthood, which pervade the French peasantry some years ago. I distinctly the priests did not set these notions circulating, and they were as unable to extend against them as if they had been part of the phenomena of the weather. During the Franco-German war, the priests were universally believed by the peasantry to be agents of the Prussian government, and when any priest tried to collect a little money for parochial purposes, it was believed that he sent it to Prussia. I need not say that such a suspicion was unfounded, but I may point out that it was exactly the reverse of the truth, for the priest was much more a Prussian than the peasant himself. The priest had theological reasons for hating Prussia which subsequent events have proved to be perfectly well founded. In this instance the peasants venture to think that I can trace the debt to its source. The belief that the priests were Prussian agents had been preceded a year or two before by another idea, to the effect that the Pope aspired to the French throne, and was only prevented from making himself king of France by a timely measure of precaution on the part of Napoleon III., who sent troops to Rome to keep the bellicose Holy Fat quiet. This was the peasants' explanation of the re-occupation of Rome by the French. The Pope wanted to make himself king of France, he would naturally ally himself with the Prussians, who were also enemies of France. But we are not yet at the true origin of the notion of Papal hostility to France. The myth did not make the Pope unpopular; it was his unpopularity that made the myth. What, then, was the first cause of his unpopularity? It is directly traceable to a certain trick about franc pieces, which was executed by the Papal treasury, and certainly shows considerable ingenuity in the act of profit-coining. There was a monetary convention (still existing) between France, Italy, Belgium and Switzerland, by which the coinage of the four nations acquired a common circulating power. The Papal States which then enjoyed a nominal independence did not join this convention, but the Roman mint imitated France with franc pieces bearing the benignant effigy of his Holiness. For a considerable time, by the indulgence of the French Government, these pieces circulated at their nominal value of a franc, but as Roman mint found the trade profitable

nt on producing the coins in unlimited numbers, so that at last the French Government was compelled to announce that they did not receive by officials for more than their intrinsic value as so much metal. Shoppers immediately followed the same rule, and the Papal franc suddenly fell, all over the world, to the value of ninety per cent. at the most, whilst many would not receive it at all as it was no longer a legal tender. Thousands of peasants had these Papal coins in their possession, and the peasantry feel a measure of this kind more keenly than any others, both because they attach a greater value to small sums of money than other people do, and also because they hoard sums in actual coins. A peasant is always likely to have more silver by him than a squire. Well, the peasants found themselves suddenly losers of thousands of coins on every Papal franc in their possession. If the Roman mint had deliberately tried a means for making the French peasantry hate the Pope, they could not have tried it more ingeniously. The very ascription of the Pope's portrait with the loss of two sous was enough to make him detested. The peasant contemplated the portrait of the very instant when the tax-gatherer or keeper retained the two sous, and remembered that benignant ecclesiastical visage ever afterwards, just as we remember the face of the swindler who has cheated us. The peasant knew no delicate distinction between the clever financial operations of the man mint and the honesty of the Pope himself—the two sous were lost forever, and it was enough. After that the great peasant-world was ready to believe any thing about the Pope, provided only that it was unobtainable enough. He wanted to be king of us. He was the ally of Prussia. All his interests were enemies and traitors. * * *

The spread of Republicanism amongst the peasantry is one of the most striking, and one of the most unexpected, of recent changes. Conservative Republicanism, of course, for the peasant is always conservative; but it is the more likely to last. A destructive Republicanism could only be a momentary aberration in the peasant's mind, and would be opposed to the whole tenor of his habits. Conservative Republicanism is quite in harmony with his habits. He is very independent in feeling, he likes to be free from the pressure of a powerful nobility, he has traditions of the dreadful time when his forefathers had to quit their own fields and leave them untilled, to slave for the noble or the king; of the time when they had to be up all night through to beat the castle moats with logs to prevent the frogs from croaking and disturbing the repose of the *seigneur*. He remembers still, through his traditions, how the old times the land belonged to the dabbler, who had power to compel the inhabitants of the villages to work for the embellishment of his own grounds, so that the peasant had never a week that he could call his own. These recollections give him a decided inclination towards modern ideas; but nothing has until recently prevented him from becoming republican. His aim is to possess land, and he has been told all along that the Republic means the abolition of the rights of property. During the last few years, however, he has made the discovery that property may be secure under a Republican form of government. He sees great *bourgeois* who

have good estates, and yet declare for the Republic; and then he thinks, why should I be not afraid for their property, why should I be not a mine? Once let the French peasant be completely delivered from the fears of the dividers of spoil, and he becomes Republican very easily from hereditary dislike to the domination of the noble. Nobody has profited more than he by the changes which have transformed the country, nobody has less reason to wish for a return to the past. He was a slave and is a freeman; he was a pauper, and is well to do; he was as powerless as his own geese, and now holds the elections in his hands. Ignorant as he is even yet, these things are becoming every day more plain to him, and eloquent indeed must those persuaders be who can make him believe that the old times were better than the present."

(To be continued.)

The "Big Trees" of California.

A California Botanist has sent to the *Rural Press* an account of the results of a careful measurement of the famous "big trees," and a laborious count of the rings in various stumps. The "Father of the Forest" has been said to have sprung from the earth soon after the Deluge, but the rings in his shattered trunk show that his full age at best is probably 1500 years. His alleged 40 feet diameter proves to be only 18 feet, measured at six feet from the roots. This correspondent adds: "One oft-repeated story is true, however, that of a passage through a part of his body large enough to admit horsemen. This passage, burned out of his heart, commences at a point 66 feet from the roots, and extends 120 feet coming out where was once a knothole, now enlarged by relic seekers to a wide doorway. I saw several ladies ride horses of medium size through this wooden tunnel; and one day, while passing, riding one of my horses, and leading the other packed with bulky specimens, I turned into the cavity, and rode safely through. The ceiling overhead is 4 feet to 6 feet thick, so the grand promenade for visitors above is perfectly safe." He mentions another monster tree, whose stump he measured with his tape-line, "held at the other end by a Puritan master builder from Boston," and the longest diameter, including bark, at 5 feet from the base, was found to exceed 27 feet. He says also: "The South Park Grove contains about 500 trees, some of them of the largest class. One, the home of 'Trapper Smith,' is a vast swollen trunk at base, 90 feet in circuit, and 30 feet in diameter. The 'Livery Stable,' which has received 22 horses at a time into its hollowed base, is 84 feet in circuit. A fallen tree is 15 feet in diameter, 20 feet from the roots. A cavity is burned in it sufficient to comfortably shelter 25 or 30 horses, or to afford the passage of a Concord coach and its four-horse team for over 200 feet. These dimensions do not materially differ from some published statements, but counts and estimates of the rings reveal only 1200 to 1500 in number. Other groves visited afforded corroborative evidence that, though the dimensions, being easily determined, are often given accurately, the age has been generally grossly exaggerated."—*Episcopal Recorder*.

"And the Lord direct your hearts into the love of God, and into the patient waiting for Christ." 2 Thess. iii. 5.

THE FRIEND.

TWELFTH MONTH 16, 1876.

The public mind is generally much more easily moved by the commission of some enormous crime, than it is willing to recognize common though prevalent vice. So likewise when some dreadful catastrophe occurs, accompanied by great loss of human life, there is likely to be more attention given to the incidents attending its origin and progress, than serious reflection on the uncertainty of life, the solemn warning of sudden and unexpected death, and the lesson it should teach of the primary importance of so living as to be prepared for death let it come when and as it may.

The awful calamity that has recently clothed the city of Brooklyn in mourning, by the burning of one of its public theatres wherein nearly if not quite three hundred persons perished, is well fitted to shock every one capable of feeling; not merely on account of the loss of life, but from the appalling and harrowing circumstances attending the quick transition of the victims from this state of probation to one of eternal fixedness.

Whatever may be said, and truly said, about the equal liability of crowded assemblies, collected for other purposes than to see a play, to be overwhelmed in as sudden destruction by a similar cause, and however people may argue that there is no special impropriety in seeking amusement from witnessing a theatrical performance, there is yet, we must think, in the minds of nearly all but the most hardened, an instinctive shrinking from meeting death in such a sink of sin and corruption as a public theatre. The accounts given of the oaths, imprecations and other profane expressions that burst from the shrieking, struggling, maddened crowd which choked up the only passage way from the gallery, wring the sensitive soul that remembers, as death leaves us, so judgment finds us, with a pang more fearful than the heart-sickening pictures drawn of the terrible but short-lived physical suffering of the crushed and burning mass of humanity that presented so ghastly a spectacle when the last act was closed in the silence of death. The lesson taught by our Saviour when He said, "Those eighteen upon whom the tower of Siloam fell and slew them, think ye that they were sinners above all men that dwell in Jerusalem? I tell you, Nay, but except ye repent ye shall all likewise perish," was not to inculcate indifference as to what places we might frequent, but to guard against judging of the spiritual condition of any, because of the manner in which they may have been taken out of life, and to bring home to ourselves the necessity of repentance and preparation for death.

We presume not to sit in judgment on the final acceptance of our fellow probationers, but surely we may believe the evidence of all past experience, that theatres and actors are most effective agencies to lure men and women into and down the broad way that leads to the chambers of death; and yet how many there are at this advanced period of the Christian dispensation, who countenance and support them by their example and influence, and by the use of the press for their commendation in order to induce others to patronize them.

This awful visitation, which one would have thought would have caused all connected with theatres, whether as actors or visitors to pause and reflect on the character and fruits of frequenting such polluted places of diversion, has been made use of to seduce the thoughtless and dissipated, under the plea of charity, to throw to them and pay them money, in order that the company may make a show of liberality by presenting it to the living sufferers. Is not one object of the general devotion of the play-actors to this mode of raising money, to dissipate or deaden the feelings that have been forced upon themselves, and upon others by this startling calamity, and to prevent any serious impression being permanently made upon their consciences? We think the great parade made by the authorities of Brooklyn, over the mangled and charred remains of the unrecognized dead, is out of place and fitted rather to divert the thoughts and feelings of the citizens from a proper consideration of what has happened in their midst, so that they may profit by the solemn warning Divine Providence has permitted to be proclaimed among them.

How sadly we need a more practical religion carried out in the every day affairs of life. The great mass of nominal professors of religion glory in the observance of outward ceremonial, and in the building of ornate "churches;" for the latter being thought an evidence of wealth and the refined taste of the congregations, are supposed to beautify a city and add to its importance; but how comparatively little care or means—whether in wealth or time—is bestowed in an effort to arrest the course of those seminaries of vice, which are engaged in initiating the young into the ways of the profligate and hardened sinner; and how few are willing to incur the odium of manfully discontenancing the aid given by the public press and by the votaries of fashion to these and other provocatives of demoralization and crime. How much better it would be public attention as much directed towards means and efforts being used to prevent our citizens going into these resorts of the profligate and abandoned, as it is to providing for their getting out in case of alarm.

When we take into consideration, the infinite purity and sacredness of the Divine Being; the completeness of the law which He has written in the human heart; the immutable decree that the soul that sinneth shall die; and reflect on the multifarious aspects of sin that intrude themselves on the ear and eye of the most careless observer, and that perhaps not one in ten of those who pursue the giddy round of life, allows himself to dwell on his accountability, or recognizes the hourly support and protection of his unseen Creator and Judge, but rather despises his mercy and defies his supreme authority, who but must acknowledge the truth of the declaration "The Lord God is merciful and gracious long-suffering, and abundant in goodness and truth."

SUMMARY OF EVENTS.

FOREIGN.—John Bright made an elaborate speech to a large meeting at Birmingham the 5th inst., against the government's eastern policy or any support of Turkey. On the 8th inst., a large meeting was held in London, at which the Duke of Westminster presided, in order to oppose the pro-Turkish policy of the British government. The meeting was addressed by the Bishop of Oxford and others, among them Wm. E. Gladstone,

ex-Premier. The latter charged Lord Beaconsfield with being personally responsible for the government's position. He declared Ottoman supremacy should be abolished throughout the insurgent provinces, and enlarged on the Crimean and Russian peace. Foreign intervention he regarded as indispensable.

Prince Bismarck, in his speech at the opening of Parliament, gave assurances that the governments of Germany and Russia remain on the most friendly footing. He expressed great hopes of a peaceful solution of the present crisis, even should the conference at Constantinople and the Sultan's fall be the result.

The rebellion which recently broke out in Mexico in the interest of the church party, spread rapidly and has been successful. The government forces were defeated in a decisive engagement about one hundred miles from the City of Mexico. On the 24th inst. President Lerdo de Tejada fled from the capital to the State of Michigan, and on the 23d General Diaz entered the city, and on the 30th he was officially announced as Provisional President of the Republic.

Later advices from Mexico, by way of Matamoras, state that President Lerdo and his cabinet had been captured, and General Escobedo, the Secretary of War, and several others had been shot.

The British Parliament has been prorogued until the 8th of Second month, when it is to meet for the dispatch of urgent and important business.

UNITED STATES.—The President's message, which was sent to Congress on the 5th inst., is a brief, plain and unassuming statement of the condition of the country. The country was burdened with debt and heavy taxation. During the past seven fiscal years the Public Debt has been reduced \$45,000,000, and through this and the funding into five and four and a half per cent. loans, there has been a reduction of thirty millions of dollars in the annual expense for interest, and within the last seven years the taxes have been reduced \$50,000,000. The balance of trade which in 1869 was \$130,000,000 against the United States, is estimated to be \$120,000,000 in favor of the country in 1876. He believes this favorable turn will continue, so that the pledge of Congress to resume specie payments in 1876 will be easily accomplished.

And within the last seven years the taxes have been reduced \$50,000,000. The balance of trade which in 1869 was \$130,000,000 against the United States, is estimated to be \$120,000,000 in favor of the country in 1876. He believes this favorable turn will continue, so that the pledge of Congress to resume specie payments in 1876 will be easily accomplished.

The Post Office Department income was short of its expenses by \$1,351,987. The estimated expenses of the Department the current year are \$35,500,000 which is more than six millions in excess of the estimated income.

President Grant calls the attention of Congress to the necessity of providing some greater safeguards over the method of counting and declaring the election of President and Vice President, and concludes the message with these words: "With the present Congress my official life terminates. It is not probable that public affairs will ever again receive attention from me, further than as a citizen of the republic, always taking a deep interest in the honor, integrity and prosperity of the whole land.

The annual report of the Secretary of the Treasury shows that the net revenues for the fiscal year ending 6th mo. 30th last, were \$287,482,069, and that the net expenditures, including redemption of the public debt, were \$258,459,797, leaving a surplus revenue, exclusive of provisions for the sinking fund, of \$29,022,242. During the same period the total value of the U. S. States was reduced to the extent of \$22,943,000.

During the year ending 6th mo. 30th last, 6,524,326 acres of the public lands were disposed of, a large portion being taken by actual settlers under the homestead and timber culture acts. The cash receipts from the sale of lands were only \$1,747,246.

The number of certificates of citizenship of the United States for the last fiscal year, as appears from official returns made to and compiled by the Bureau of Statistics, are as follows:

Exports of domestic merchandise, . . .	\$25,582,247
Exports of foreign merchandise, . . .	11,802,423
Total,	50,384,671
Imports of goods,	460,741,190

Excess of exports over imports, 79,643,481

The Returning Boards in the three doubtful States, California, Florida and Louisiana having given certificates to the electors of the Republican party, and Wheeler, the Republican candidate for the Presidency and Vice Presidency, they have secured the votes of twenty-one States with 185 electoral votes, while

Tilden and Hendricks have those of seventeen States with 184 votes. This action of the Returning Board especially in the case of Louisiana, is denounced by the Committee of Democratic citizens from the North as an outrage and an insult to the people. They say they were present when the returns were opened by the Louisiana Returning Board, and declare that these gave a majority to the Democratic electors of more than seven thousand. On the other hand Senator Sherman and eight other distinguished men who were present to inspect the proceedings, and three thousand of the people of Louisiana justify the conduct of the Returning Board in rejecting the returns from various districts on account of the violence and intimidation resorted to by the whig Democrats in order to secure the election of their own candidates. When all such election districts had been thrown out, those remaining gave a Republican majority of more than three thousand votes.

On the night of the 5th inst., the Brooklyn Theatre was destroyed by fire, and about three hundred persons out of one thousand who were assembled in this place of vain amusements either perished in the flames, were suffocated or crushed to death. The fire was caused by a gas or oil lamp in the orchestra, which was overturned by fire to the drapery. It broke out on at 11 p. m., the flames spreading rapidly over the whole building, which, in a very short time, was a mass ruin. The Brooklyn Theatre was built in 1870, at a cost of \$180,000. Its rapid and complete destruction shows what an unsafe edifice it was, and how essential for more fire proof buildings to be erected.

A singular difficulty has arisen in regard to one of the Republican electors from Oregon. The laws of the State require the Governor to grant certificates of electors duly elected. Governor Grover has refused certificates to John W. Watt, on the ground that he was disqualified in consequence of holding an office of profit and trust under the United States, viz. that of a postmaster. The governor has given the certificate to a eligible candidate having the next highest number votes, who of course is a Democrat and votes for Tild and Hendricks.

The 10th inst. was extremely cold over a large part of the country. At 8 A. M., the thermometer ranged as follows at the several places mentioned: Cincinnati, 26 below zero; Chicago, 12 below; Larosse, Wisconsin 20 below; Breckenridge, Minn., 21 below; Dulut Minn., 25 below, and Fort Garry, Manitoba, 26 below.

The interments in Philadelphia last week numbered 3413, of whom were 52 deaths of consumption and 36 typhoid fever.

The Markets, &c.—The following were the quotations on the 11th inst. Philadelphia.—American gold, 107 1/2. U. S. sixes, 1881, registered, 112; coupon 115; do. 1868, registered, 112; coupons, 116; do. coupon 110; 4; 3; per cents, 108. Cotton, 12 1/2 a 12 3/4 Floor, \$1 to \$2.00. Pennsylvania red wheat, \$1.40; \$1.43; amber, \$1.45; \$1.47; white, \$1.42 a \$1.44. Yellow, 82 a 83 cts. Yellow corn, 60 a 61 cts. C white oats, 19 a 20 cts.; western and other kinds, 31 40 cts. The arrivals of beef cattle at the two principal yards numbered 4100 head. Extra sold at 5 1/2 cts. per lb. gross; fair to good, 4 1/2 a 5 1/2 cts., and common, 3 1/2 a 4 1/2 cts. Sheep, 4 a 5 1/2 cts. per lb. gross. Hogs, \$3.25 per 100 lb. net; but, no. 1, \$3.50. Superfine flour 5.10 a 5.25; Standard extra, 55.55 a 55.80; finer no. 86 a \$10.00. Amber winter wheat, \$1.48; No. 2 winter, \$1.38; No. 2 Milwaukee spring, \$1.32; No Chicago spring, \$1.24 a \$1.27.

FRIENDS' ASYLUM FOR THE INSANE.

New Franklin, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSUEH H. WORMINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting-house, Muncy, I coming Co., Pa., 1st of Third month, 1876, GEORGE P. TIMB, of West Chester, Pa., to JANE E., daughter of Joseph and Sarah E. Masters, of the former place.

DEED, in Philadelphia, on the evening of the 29th Feb. 1876, ASHBE B. BAKER, daughter of Mary and the late Mahan B. BAKER, of the City of Philadelphia, to the Philadelphia Monthly Meeting, N. Jerk

WILLIAM H. PILE, PRINTER,

Account of the Convalescence of Ruth Anna Kuller.

(Concluded 4 from page 119.)

remained steady in the attendance of meetings for above a year and a-half, before my mind felt at liberty to make application to be received as a member, but for twelve months preceding was constrained to use the plain language. In the fall before I made application to be received among Friends, Job Scott, coming out on a religious visit, lodged at our house. My father was from home, and my mother and aunt, with a beloved friend from city, and myself, made up the family at that time; and truly it seemed as if the canopy of divine love was spread over us, and celestial showers issuing from the fountain of life, depended upon our habitation. I had for the first time been in a low spot, and longed for a drop of heavenly consolation. My dear mother also had her mind much unsettled by profusely conversing upon Swedenborg's notions. There was likewise an elderly man in the neighborhood, who had written a piece, only endeavoring to account for things he did not understand. This man happened to be at our late meeting, when dear Job, after sitting a short time in silence, got up with these words: "Who art thou, O man! or, O woman! who add of thine own finite understanding, presume to investigate the mysteries of the inscrutable God?" The words were solemn and striking, and he was favored to open matters clearly. It proved, I trust, a humbling season to some who were present. And, through divine condescension, this dear Friend, having a sitting in the family, was dipped into the sea of our state, and administered suitable counsel and encouragement. Also, in a little private opportunity, with tears flowing mutually from our eyes, he mentioned his sympathies with me, and his prospect respecting me; saying he should have trials, and to remember that it was told me I should have trials; which assuredly have since fallen to my lot.

About the middle of the ensuing winter, receiving the time nearly arrived for me to make request to Friends to be received under their care, I mentioned it in a solid manner, my parents, though in great fear, and having mine eyes turned to the Lord, with earnest breathings, that I might be strengthened in assisting in this important step. My mother was much affected, and shed tears; but

my father thought it was time enough to make such a sacrifice; that I was young, and had better wait till I was more fixed. I was enabled to tell him that I was willing to give up the world, and all the enjoyments of it, for the purchase of a little peace; that I no longer took delight in those things that had formerly given me much pleasure. He, seeing my mind bent upon it, gave his consent; and the next meeting day my mother went with me to Exeter. After the meeting she called two elderly Friends aside, and told them she felt like Hannah, when she made an offering of her son to the Lord; for she had come to make an offering of her daughter; also telling them of my concern. They accordingly took it under care, and after divers visits from a solid committee of Friends, I was received [into membership] in the Fifth month, 1787.

I then found that, far from sitting down at ease, there was a large field of labor opened for me, and in the prospect thereof my knees were made to tremble! I felt a deep concern to be steady in the attendance of meetings for worship and discipline, and being distantly situated from them, I found considerable difficulty; my father being frequently very averse to my going, particularly when the weather was wet or cold; which proceeded from motives of tenderness, but which nevertheless cost me no small degree of exercise; not feeling easy to stay at home on these accounts, when my health would admit of my going. And as it gave him great uneasiness and he frequently opposed me, I had often to experience seasons of conflict, sometimes for a week before a meeting for discipline occurred; and my heart was poured forth in prayer to Almighty God, that if it was right, I might have strength to persevere, and that way might be opened for me, though I could see no way. And forever blessed and praised be his holy name, He often caused the mountains to skip like rams, and the little hills like lambs, to my humbling admiration. One time I particularly remember. Being appointed to attend the Quarterly Meeting, I asked my father's consent to let me go; he looked sternly at me and objected. I felt in a great strait, and pleaded much with him. He at last consented, but told me I need not expect to go again for some months, for he did not approve of women riding about the country in that manner. As I had gained his consent for the present, I was willing to leave my ease to the Lord, in the belief that if he required me to go, he would open the way for me, and after retiring to my chamber, and giving vent to many tears, my faith and confidence were renewed in Him who is the everlasting Rock of Ages. This was the last time my dear father ever spoke to me so sharply upon such an occasion, for, seeing my peace deeply concerned in the strict attendance of meetings, and my dear mother often pleading with him, he gave up.

May all those who labor under difficulties and discouragements in attending meetings,

be encouraged to keep their eye single unto the Lord, with fervent breathings unto him, even though they may seem to be hedged in on every side.

My exercises and deep baptisms, in the prospect of being called into the work of the ministry, greatly increased; but O, my unwillingness to close in therewith, was more than words can express! My Divine Master saw meet to cause me to suffer long under a very trying dispensation, which was that of my beloved and tender mother being tried with a lingering illness, and there seemed but little prospect of her recovery. The thought of parting with this dear parent, together with the inward exercises of my mind, was almost more than nature could bear. Oh! the nights of anxiety, and days of deep distress, which I passed through at that time, will never be erased from my remembrance. In this season of deep affliction I was made willing to covenant, that if the Lord would spare my mother, I would give up to what he required of me, though it was harder than the parting with my natural life; and He graciously condescended to listen to my cry, and restored my endeared parent.

Previous to this I attended the opening of the Monthly Meeting at Robeson, where were also some Friends from the city in attendance; one of whom in particular, in the course of his public testimony, was dipped into sympathy with me in the deep exercise which I was under, together with the prospect of some further trial and sore conflict which I should have to pass through in order to fit and prepare me for the great and solemn work whereunto my Master was about to call me; which testimony, with the sensations that accompanied my mind, left no more doubt of its being myself that was alluded to, than if my name had been publicly mentioned.

This circumstance, together with that of many valuable Friends having feelingly sympathized with me, and expressed their prospect respecting me in a more private way, had a tendency to confirm me that the Lord did indeed require an entire surrender on my part, and that I must be willing to become a fool for Christ's sake.

After many probations, secret tears and many prayers to my Almighty Father, for his help and gracious assistance, in this awful, solemn work, at a Monthly Meeting held at Exeter in the Twelfth month, 1789, and in the twenty-second year of my age, after a season of the most severe conflict I ever before experienced, wherein the day of solemn covenant was brought before the view of my mind, with this secret intelligence, that if I did not give up to what was required of me, my mother should be taken from me, I ventured upon my feet, and expressed a few words; in which I felt great peace, and believe I had the tender sympathy of most that were present. My esteemed friend, John Simpson, being there, in the language of encourage-

ment, caused my heart to be truly thankful. He came home with me, and very feelingly expressed his unity with me, and also a fear, lest, through diffidence, I should not sufficiently exert my voice. Which gentle hint was of use afterwards, though at that time, and frequently since, I did not expect ever to be called upon again in the same line; which peradventure may not be unusual to those young in experience. W. S. shortly afterwards went to Philadelphia, and a dear friend who was nearly interested about me, inquired of him how I was. He mentioned that I had appeared publicly in a few words, which seemed to him like a swelling fully ripe, which when it was opened became easy. But alas! it was not only to be opened, but probed, and fully searched, before the heavenly ointment or balm of Gilead could be availingly applied.

One circumstance I omitted in the early part of this narrative, which now occurs to my mind. A Friend visiting Pottstown meeting about twelve months before I became plain, and I being in a very low and discouraged state, went to meeting greatly desiring he might be made an instrument of comfort to me. He spoke for a considerable time, but did not touch upon any thing relative to my condition; and I returned home under many doubts and fears, lest my Heavenly Father had cast me off forever. My parents were in Philadelphia, and I being alone, sat down on the sofa, with the Bible in my hand, thinking to gain some instruction and comfort from its sacred contents. I had given up the idea of seeing the Friend, (who was a true father in Israel,) or of having any opportunity with him, as not being worthy of it. But he, having dined at my uncle's, not far distant, was, after dinner walking in the piazza, and looking towards our house, felt a draught in his mind to come over. He knew nothing of the family, but yielding to the impulse he came; and, passing through the outer room, where there was a young woman of the house, without asking any questions, he walked into the parlor, where I was sitting in the situation above described; and without any further salutation than shaking hands, took a seat by me. A considerable time elapsed in deep inward silence, after which he mentioned how unexpectedly he was led to come over, without knowing the cause; but then feeling his mind clothed with sympathy for me, and believing it was for my sake, he imparted much counsel and advice, with a great deal of encouragement to me. Which singular favor did deeply humble my heart, and caused tears of gratitude, contrition and tenderness to stream from my eyes.

Having for my own satisfaction, peened these few hints of my varied conflicts and exercises, and being sensible of the goodness of the Lord to me, his poor unworthy creature, it is in my heart to say, May it please thee, O most gracious and merciful Father, to bow down thine ear and hear the humble petition of thy handmaid. Oh! be pleased to lay, with increasing weight, thine Almighty hand upon me. Let it not spare, neither let thine eye pity, until thou hast thoroughly tried me, proved me, and known my works! Be pleased to bring me more immediately under thy refining operation, and enable me to bear with true resignation, every turning of thy Holy Hand; that so I may be purged and purified, fitted and qualified, rightly to engage in the awful and solemn work wherewith thou hast

called me. Or if, most gracious Lord, thou art pleased to cut short thy work, Oh! let it be in righteousness! and grant me admittance into thine ever blessed Kingdom of light, life, and peace, there to join in the holy anthems of glory, glory, hallelujahs and praises to the Lord God and the Lamb, who are worthy forever, saith my soul. Amen and amen!

RUTH ANNA RUTTER.

Peasant Life in Burgundy.

(Continued from page 143.)

Our author gives numerous illustrations of the cruel oppression and injustice to which the rural population was subject previous to the great revolution of 1789. A few of these we will briefly advert to. The *seigneur* had the exclusive right to keep pigeons, and his pigeons, which were inviolable, had the right to feed at pleasure on the grain of his poorer neighbors. Besides his pigeons the *seigneur* enjoyed the privilege of keeping an unlimited rabbit-warren, the numerous population of which fed on his neighbors' produce. He had also the exclusive right to all other game. The peasants detested these vexations, and at last they were relieved from these and others of similar character by the revolution referred to. The granaries, the bakeries, and the grain-mills all belonged to the *seigneur*. The peasant might not keep his own grain, his lord kept it for him and charged his own price for warehouse room; the peasant was not allowed to bake at home, his lord baked for him and fixed the price. Peasants coming from a distance waiting for their turn at the bakery or the mill, were not permitted to go elsewhere even in the times of greatest pressure.

All these arrangements, the noble of to day will say were only "forms of taxation or of rent." If so they were terribly oppressive forms. They made the personal independence of the peasantry impossible. The peasant of to-day pays his taxes and is free. He can work all the year round on his farm. He keeps his own grain, he bakes his own bread; the nobleman who lives at the chateau has no power over him unless he is his landlord, and even then the power is very limited. Many thousands of peasants are landowners themselves, and independent of every body. They save money, knowing that they may keep the fruits of their own industry for themselves and their children.

The remarkable thrift and economy of the peasantry of Burgundy, and indeed of France generally, are striking traits in their character. Ample evidence of this was afforded when, after the disastrous war of 1870, the government was obliged to borrow large sums of money to pay the enormous indemnity exacted by the Germans as a condition of peace. The small farmers then came forward, bringing their little hoards of gold and silver, and actually offered them to an amount far beyond all that the occasion required. The peasant spends very little for food. On this subject Hamerton says: "The way of living in a peasant's house is this. In the morning the men eat soup—that soup which Cobden praised as the source of French prosperity. It is cheap enough to make. For twelve people two handfuls of dried beans or peas, or a few potatoes, a few ounces of fried bacon to give a taste, a good deal of hot water. The twelve basins are then filled with thin slices of brown bread, and the hot water, flavored

with the above ingredients, is poured in the bread. The bacon and peas are no sufficient quantity to afford much nourishment, but they give a taste to the bread water, and a hot meal is procured in this at a cheap rate. Boiled rice with a little oil is sometimes taken instead of soup. If soup is insufficient, the peasant finishes meal with a piece of dry bread, and as much cold water as he likes, for of this there is stint. The meal at noon is composed invariably of potatoes followed by a second. In this second dish consists the only culinary pan-cake of the peasant's life. It is either water and few eggs, or a salad, or clo milk. No wine or meat is allowed, except during the great labors of haymaking harvest. At these times, a little wine is given with the water drunk at dinner, and a slice of salted pork. At great feasts ham served, and beef broth, the boiled beef served afterwards without sauce. The peasant wives see carefully that the fasts of church are observed—all economical Fre people are religious enough in this—and I member a good instance of the lengths which they will go. We knew an old peasant who was not in very strong health (he was seventy-two years old) and his conscience not very tender about the ordinances of church; I mean, that if any body had given him the opportunity of eating meat in Lent, he would probably have yielded to the temptation. But he had a wife who united orthodoxy with economy, and who took good care that her husband should commit no sin that would be in any way expensive. When I came I used to banter the old man, in a gay way, by inquiring anxiously about his health. He always got weaker and weaker towards the end of forty days, and one year this weakness so distressing to him that he committed a great crime. A pig was killed at the farm towards the end of Lent, in anticipation of Easter Sunday, but so vigilant was the eye of the mistress that nobody dared touch a morsel of the forbidden food. There was one exception, however. The old man sallied forth with a knife, cut a slice of the pig, fried himself in open defiance of both wife and church, and ate it boldly, like a hardened sinner, in sight of his children and servants. Whilst he was eating he underwent a terrible sermon. "Not only," said his wife, "are you breaking Lent now, but you have broken all along, for every day you have cooked the ashes two eggs for your dinner, and it is astonishing to hear you complain of weakness, after such shameless gormandizing that!"

"In the spring the peasants bleed the oxen and cook the blood in a frying pan with onions. Although the preparation may seem disgusting to us, it is very nutritious, and the peasants like it very much. They have an invincible prejudice against the use of mutton. Notwithstanding the abstemiousness of the way of life—which is really little better than one continuous fast—they will not touch mutton at all. Their feeling about it is simply the prejudice against a particular kind of flesh which most people have in one form or another."

Notwithstanding their comparative small use of animal food, they take a much wider range in its selection than is usual in England or this country. For instance small

ich are abundant, are considered a great luxury; they eat also frogs, water rats, and many other things which only extreme hunger would induce Englishmen, however poor, partake of.

The women of the peasant class submit to the severity of their frugal customs without any other relief from them than the occasional feasts at weddings, but the men escape the rule of custom more frequently when they go to the market town and get a liberal dinner at the inn, which they seem to appreciate very heartily. On these occasions they are tipsy as a matter of course, and when there is a great fair they often get more than they can bear, in consequence of successive bottles of wine and beer in the *cafes*, where they treat each other liberally, according to a theory that it is not polite to refuse, nor to accept of polite offers without returning them. * * * These excesses never seem to do any real harm, and the strict rule of daily life is kept again quite readily afterwards, when they return to frugality and duty. * * *

The peasant believes wine to be the universal remedy. He administers it liberally in cases of disease, even in the most violent cases—with what effect may be imagined, a way of treating a bad cold is to put a low candle in a quart of red wine, and heat the tallow melts, after which tallow and wine are stirred up together and swallowed by the unhappy patient. For intermittent fever he beats up eggs with soot from the chimney. To cure the measles he gives hot milk with pepper and honey. Whenever any one is ill, no matter from what cause, hot wine at once administered. * * * The doctor only sent for by a peasant, at the very last extremity, and his prescriptions are rarely followed. I have often talked about this pecuniary with physicians whom I knew intimately, and they invariably said that it was of the slightest use for them to give any advice to peasants. The consequence is that physicians take no interest in rustic patients, I leave them to their own prejudices, and whatever fate may be in store for them. The physician's fees, although extremely moderate and remote indeed from the London guinea, are to the rural mind an expense to be regretted in any event, for if the patient is cured, his friends believe that he would have come round without the doctor, and if he dies, it is plain that the doctor has not been able to save him. Our own medical adviser has many anecdotes of the rustic ways, with reference to the science of medicine, which exhibit the peasant's way of thinking. One of these I select for the reader. A woman went to him for a prescription for her husband, but she was going away, she turned on the threshold, and asked whether her husband could pull through. 'Because,' she added, 'if he is to die after all, it will be of no use to send five francs in medicine.' She positively refused to get the prescription made up unless the doctor would guarantee her husband's recovery.

What the peasants really do believe in is the science of any kind, but magic and superstitious prayers. Their ideas of prayer and of all religion is, in fact, very closely connected with magic. They have full faith in charms, and in the power of combating evil by special prayers—special forms of words which make you safe if you know them accurately, when, without the knowledge of the

form you are helpless against the evil. This is so very particularly with regard to burns and dislocated limbs. It is believed, for instance, that such an old woman knows a special prayer which will cure a burn, or make a set limb go on favorably, and when such a belief becomes current, the person who knows the prayer is in great request, but keeps the prayer itself a secret. The idea is that there are prayers for every kind of evil, which would be perfectly efficacious if one only knew them. It is plain that the notion is more nearly allied to magic than to Christianity. Even in very grave cases, when a surgeon is absolutely required, the peasants will not send for him if they can avoid it, but they will travel many miles to fetch some ignorant old woman. The simple truth is that their minds are in a condition so wholly unscientific that they cannot conceive the idea of science. It is useless to tell them that a physician has studied medicine, and an old woman has not, for they do not know, and cannot imagine, what it is to study any thing, nor are they at all able to perceive the distinction between positive knowledge and superstition. * * *

(To be concluded.)

For "The Friend."

Thomas Story.

(Continued from page 132.)

"Hitherto I had known the Grace of God in me only as a manifestor of evil and of sin, a word of reproof, and a law condemning and judging those thoughts, desires, words, passions, affections, acts and omissions, which are seated in the first nature, and rooted in the carnal mind; in which the suggestions, temptations and influences of the evil one work and prevail. By this divine grace I was, in some good degree, enlightened, reformed, and enabled to shun and forbear all words and acts known to be evil, and moral righteousness restored in my mind, and thereby brought forth in me. I became then weaned from all my former acquaintance and company; their manners and conversation, though not vicious (for such I never liked) became burthenome and disagreeable; for they had not the knowledge of God, nor such a conversation as I wanted. Yet I did not know the divine grace in its own nature, as it is in Christ; not as a word of faith, sanctification, justification, consolation and redemption, being yet alive in my own nature. The Son of God was not yet revealed in me, nor I, by the power of his holy cross, mortified and slain; being without the knowledge of the essential truth, and in a state contrary to him, and unreconciled. But the Lord did not leave me here, but, in his matchless mercy followed me still, by his holy admonitions, and more and more inclined my mind in an earnest enquiry after himself and his own truth and word, concerning whom, I did not know of any in all the earth who could teach me, the world being universally, as I judged by the general ways and courses of men, of all forms and ranks, altogether ignorant of the Lord, knowing only some historical and traditional hints concerning him, and of his doctrine and ways, which having little or no effect or influence upon the minds and conversations of men, it seemed but a dead knowledge or image, and they being dead whilst they yet lived, did not really and savingly believe in the true God, and Jesus Christ, of whom they made profession and talked. I did not then know that

the Lord had any people in the world owned by his presence with them, as his flock and family, which reminds me of that saying of the Lord, 'Nevertheless, when the Son of man cometh, shall he find faith on the earth?'

My mind being truly earnest with God, thirsting unto death for the knowledge of the Way of Life, he was pleased to hear the voice of my necessity, for I wanted present salvation, and the Lord knew my case could not admit of further delay. Being moved by his own free mercy and goodness, even in the same love in which he sent his Son, the beloved, unto the world, to seek and save the lost, on the 1st day of the Second month, in the evening of the year, according to the common account 1689, being alone in my chamber, the Lord brake in upon me unexpectedly; quick as lightning from the heavens, and as a righteous, all-powerful, all-knowing, and self-condemning Judge; before whom my soul, as in the deepest agony, trembled, was confounded and amazed, and filled with such awful dread as no words can reach or declare. My mind seemed plunged into utter darkness, and eternal condemnation appeared to enclose me on every side, as in the centre of the horrible pit; never to see redemption thence, or the face of him in mercy, whom I had sought with all my soul. But in the midst of this confusion and amazement, where no thought could be formed, or any idea retained, save eternal death possessing my whole man, a voice was formed and uttered in me, 'Thy will, O God, be done; if this be thy act alone, and not my own, I yield my soul to thee.' In conceiving these words, from the Word of Life, I quickly found relief: there was all-healing virtue in them; and the effect was so swift and powerful, that, even in a moment, all my fears vanished, as if they had never been, and my mind became calm and still, and simple as a little child; the day of the Lord dawned, and the Sun of Righteousness arose in me, with divine healing and restoring virtue in his countenance; and he became the centre of my mind.

In this wonderful operation of the Lord's power, denouncing judgment in tender mercy, and in the hour of my deepest concern and trial, I lost my old self, and came to the beginning of the knowledge of Him, the just and holy one, whom my soul had longed for. I now saw my whole body of sin condemned in my own flesh; not by particular acts, as whilst travelling in the way to a perfect moral state only, but by one stroke and sentence of the great Judge of all the world, of the living and of the dead, the whole carnal mind, with all that dwell therein, was wounded, and death begun; as self-love, pride, evil thoughts, and every evil desire, with the whole corruption of the first state and natural life.

Here I had a taste and view of the agony of the Son of God, and of his death and state upon the cross, when the weight of the sins of all human kind were upon him, and when he trod the wine press alone, with none to assist him. Now all my past sins were pardoned and done away; my own willings, runnings, searchings and strivings, were at an end; and all my carnal reasonings and conceivings about the knowledge of God, and the mysteries of religion, were over; which had long exercised my mind, being then natural, both day and night, and taken away my desire of food and natural repose. But now my sorrows ended, and my anxious cares were

done away; and this true fear being to me, the initiation into wisdom, I now found the true sabbath, a holy, heavenly, divine, free rest, and most sweet repose. This deep exercise being over, I slept till the next morning, and had greater and better refreshment and comfort than I had felt for some weeks before.

The next day I found my mind calm and free from anxiety, in a state like that of a young child. In this condition I remained all night; and about the same time in the evening that the visitation, before related, came upon me, my whole nature and being, both mind and body, was filled with the divine presence, in a manner I had never known before, nor had ever thought that such a thing could be; and of which none can form any idea, but what the holy thing itself doth give. Divine Truth was now self-evident; there wanted nothing else to prove it. I needed not to reason about him; all that was superseded by that divine and truly wonderful evidence and light, which proceeded from Himself alone, leaving no place for doubt, or any question at all. For as the sun, in the open firmament of heaven, is not discovered or seen, but by his own light, and the mind of man determines thereby, at sight, and without any train of reasoning, what he is; even so, and more than so by the overshadowing influence and divine virtue of the Highest, was my soul assured that it was the Lord. I saw him in his own light, by that blessed and holy medium, which of old he promised to make known to all nations; by that eye which he himself had formed and opened, and also enlightened by the emanations of his own eternal glory. Thus I was filled with perfect consolation, which none but the Word of Life can declare or give. It was then, and not till then, I knew that God is love, and that perfect love which casteth out all fear. It was then I knew that God is eternal light, and that in him is no darkness at all. I was highly favored also with a view of the manner of the operation of the Almighty, in assuming human nature, and clothing therewith his inaccessible divine light and glory, even with an innocent, holy, and divine soul and mind, homogenous to the children of men; as with a veil, whereby the Most High condescended to the low condition of man, and in whom also man, being refined as the tried gold, and thereby fitted for the Holy One, can approach to him, as by a proper medium, and therein dwell with the Lord, and enjoy him forever. But, as the diadem of all, and the only true and certain way, when it pleased the Most High, by the effusion of his own goodness, to reveal in me the Son of his love, even his wisdom and power, by whom he designed and effected all things, then I was taught to fear him; then I was taught to love him; then, and not aright till then, was my soul instructed and informed indeed, but these secret operations were confined to my own breast, so that no one knew any thing of them; an alteration was observed in me, but the cause of it was not seen. I put off my usual airs, my jovial actions and address, and laid aside my sword, which I had worn, not through design of injury, or fear of any, but as a modish and manly ornament. I burnt also my instruments of music and divested myself of the superfluous parts of my apparel, retaining only that which was necessary, or deemed decent. I declined the public wor-

ship, not with a design to join myself to any other sect; for I was rather apt to conclude, from what I had observed, that these manifestations were peculiar to me, and that there was not any people I might properly associate with; and also, I was indeed to believe that one day I should be obliged to oppose the world in matters of religion, but when or how that should be brought to pass, I did not foresee. Remaining in a still and retired state, and the Book of Life being opened in my mind I read what the Lord himself, by the finger of his power, had written, and the Lion of the tribe of Judah opened there; and the Scriptures of truth, written by Moses and the prophets, the evangelists and apostles of Christ, were brought to my remembrance daily, when I did not read them, and made clear and plain to my understanding and experience, so far as they related to my own state, and also in a general way; though I listed not to know any mystery or thing contained therein, other than the Lord, in his own free will and wisdom, thought fit to manifest. As the nature and virtue of divine truth increased in my mind, it wrought in me daily a greater conformity to itself, by its own power; reducing my mind to a solid quietude and silence, as a state more fit for attending to the Divine word, and distinguishing it from all other powers, and its divine influences from all imaginations and other motions; and being daily fed with the fruit of the Tree of Life, I desired no other knowledge than that which was thus given me."

THE SLEEP OF THE BELOVED.

"So He giveth his beloved sleep."—Psalm cxviii. 2.
Sunlight has vanished, and the weary earth
Lies resting from a long day's toil and pain,
And, looking for a new dawn's early birth,
Seeks strength in slumber for its toil again.

We too would rest; but ere we close the eye
Upon the consciousness of waking thought,
Would calmly turn it to yon star-bright sky,
And lift the soul to Him who slumbers not.

Above us is thy hand with tender care,
Distilling over us the dew of sleep;
Darkness seems loaded with oblivion's air,
In deep forgetfulness each sense to steep.

Thou hast provided midnight's hour of peace,
Thou stretchest over us the wing of rest;
With more than all a parent's tenderness
Foldest us sleeping to thy gentle breast.

Grief flies away; care quits our easy couch,
Till wakened by thy hand, when breaks the day—
Like the lone prophet by the angel's touch,
We rise to tread again our pilgrim way.

God of our life! God of each day and night!
Oh, keep us still till life's short race is run!
Until these dawns the long, long day of light,
That knows no night, yet needs no star or sun.

—H. Bonar.

A late address from officers of the New York Prison Association to the electors of this State, affirms that "crime increases faster than population," and that instead of being reformatories our "prisons serve as high schools of crime." Such a statement is of serious import to the welfare of the State, and should challenge enquiry as to the cause of the evil tendency. Where are the "primary schools" of crime from which so many, in increasingly large numbers, graduate to the prison "high schools?" Of the 84,000 arrests in this city last year, the police officials as-

sure us that from 75 to 90 per cent. were to interpenetration. It is certain that the licen and unlicensed grogshops are the sources a large percentage of the increasing crime and that the public welfare demands it they be abolished.—*Nat. Temp. Advocate.*

For "The Friend"

David Sands.

During the visit of that favored and devoted minister of the Gospel, David Sands, to Great Britain and Ireland, in the year 1798, a remarkable circumstance occurred in the province of Ulster, which is related in page 2 of his journal, published at New York 1848.

The following account of the same circumstance, which is extracted from a letter Hannah, wife of David Williams, a well-known Friend of Newport, R. I., appears to have been written while David Sands was still abroad, and as it mentions particulars not noted in the printed account, is deemed suitable for publication.

"We have lately heard a very extraordinary anecdote of David Sands, from Joseph Aust of Medford, and I enquired yesterday of William Rotch, Sen., respecting its authenticity. He said the relation was given by a young Englishman of the name of Wilson, from Manchester, who lately arrived in Boston. That he was travelling in Ireland—with several miles of the stage they intended to make—when he felt a very remarkable stir in his mind. It was then just in the dusk of the evening, and he said he must have a meeting in that place; upon which the Friend who was with him observed, that if they put up in that neighborhood the inhabitants might be notified in the morning; but he remarks that it seemed best to have it that evening. They returned, that the notice could not be very extensive; he replied that it did not seem necessary to spread it very far—if two or three were gathered he should be satisfied upon which they asked him where he would hold it. He paused, and pointed to a barn, a small distance, and said, In that barn. The immediately procured lights, gave some information, collected a few, and sat down to silence. Soon after, a man who was riding by, observing lights in the barn, rode up to enquire the occasion, finding it was a meeting he went in and sat down with them. Soon after David Sands rose, and began with saying, 'Resist the devil and he will flee from thee,' and proceeded to address an individual in a very affecting and solemn manner: said there was a person present under a temptation, who had been tempted for twelve months to put an end to his existence—three months since he had procured instruments for the purpose, and that he had them with him now and had set out on the fatal purpose. He warned him to forbear, and of the awful consequences of such an act. The person who came apparently by accident, discovered great emotion, and after he (D.S.) had cleared himself, the meeting broke up. The next day the person alluded to, went to him, and confessed that he was the person described, that he had been under such a temptation twelve months; three months before he had procured pistols to execute the horrid design, and that he then had them with him loaded, and had left home for that purpose, but was prevented by Divine interposition. A wonderful instance of immediate revelation."

In the journal of David Sands, page 226, is added, "It is stated that soon after this wonderful providential interposition, this person became a changed and greatly improved character."

Early Entrance Into Life.

It is a matter of universal comment among those who have enjoyed the advantage of extensive travel that our young people develop a mental power and general activity earlier and faster than those of other countries. Young men especially shake off their boyhood sooner; they enter business, mix in politics, and marry, at an age when those in older countries are still under parental control, at school or learning trades, or preparing in a sober, leisurely way for some pursuit usually selected for them. This is not, some would aver, the workings of a wilful, headstrong spirit, belonging especially to American youths, but may rather be traced to the peculiar circumstances which surround them. The country being newer, larger, and less crowded, its institutions freer, and its need of active workers more imperative, there is every stimulus to young men to strike out for themselves boldly and speedily in some of the many paths inviting them. The whole one of our nationality is more vigorous, more intense and elastic than that of the older countries, and it is impossible that the young should be unaffected by its atmosphere.

It is a question whether this early maturity is so well adapted to individual perfection; whether there is not some degree of vital exhaustion consequent on so speedy an exercise of activity, which may curtail the ultimate development of strength and expansion; whether judgment and wisdom can ripen so fully, and the art of self-government be so well acquired by early independence as by a longer season of subordination. Some eagerly point to the instances of ruined health and fruitful graves, of fast living and extravagant expenditure, of unrestrained ambition working a thousand ills, in support of this idea. Could boyhood be prolonged under wise guidance, and independence be postponed until good principles were established, doubtless many of the shoals upon which young men founder might be avoided. At the same time, we are inclined to think that the evils we deplore, are due not so much to the premature growth of the faculties as to the uneven and unbalanced way in which they are frequently developed. One portion of the nature is bred as in a hot house, another dwindles in the cold air of neglect. All the powers are brought to bear upon the affairs of life—its industries, its ambitions, its speculations, its schemes—and but few are left for the inward culture of the moral sense, the establishment of principle, or the strengthening of the will against temptation.

One thing is certain, if our young people advance rapidly in one direction they need a proportional advance in the other, and if from any cause this is prevented, they must suffer shipwreck of all that is most noble and worthy. The whole nature must grow at once, if it is to grow healthfully. Thus it is not so much that the boy enters business too soon, as that principles of integrity have not been established within him soon enough. Had he been carefully trained in habits of punctilious honesty through his childhood, he would not have cheated his employer and brought disgrace

upon his family. It is not so much that he was freed from parental control so early in life, as that he has put off self-control so late. Had he acquired the power and the will to deny appetite, to govern passion and to resist enticing influences, he would not have fallen a victim to the blandishments of the wine cup, or the seductions of evil companions. Had he been early imbued with a love and reverence for truth, and accustomed to regard a lie as a hateful and degrading thing, he would not have been guilty of bribery and corruption in politics, or double dealing in business.

The very fact that our children come forward so soon into the arena of life, that their intellect, passions and activities awake early and grow rapidly, makes it of infinite importance that their moral and religious natures should be aroused and developed, that their principles should be laid firmly, their hearts be kept pure and loving, and their consciences preserved keen and sensitive. If they were to be for long years under parental guidance, and without any serious responsibilities or temptations, the necessity for this preparation might not be so immediate; but as it is, we cannot over-estimate its urgency. Upon the lack of it must be charged much of the vice and corruption, much of the injustice and oppression, much of the dishonor and trickery, the accounts of which every righteous citizen must blush to read. This is a subject well worthy the deep consideration of every American parent. It is not possible to alter the tendency of our national life so as to retard the development or postpone the independence of our young men, but it is possible so to equip them for their swift coming responsibilities, that they shall not be carried away by the storms of ambition or passion, or surrender to the fierce attacks of temptation.—*Ledger.*

Richard Shackleton.

(Continued from page 136.)

Mary Ledbetter writes thus of the character of her father: "He was the gentleman, the scholar, and the Christian. His conversation was delightful, for he was unassuming and condescending; it was instructive, for amid the blaze of superior talents humility shone unvaried. His cheerful temper caused him to enjoy every good, while his pious resignation taught him to bear what is called evil with quiet submission. His temper was naturally quick, but his generous mind was ever ready to atone."

In alluding to the joint cares devolving upon her parents, (after her father's second marriage to Elizabeth Carlton, in 1755,) in the oversight of the boarding school at Ballitore, she says, "Casting their cares upon Providence, this exemplary couple felt the shackles of the world hang loose about them. Their duties to the children entrusted to their care were conscientiously fulfilled, and the grateful love which their pupils retained for them was a convincing proof of it." She further adds, "They were useful members of their religious society, and, with clean hands and in the meekness of wisdom, were qualified to take an active part in conducting the affairs of the church."

A brief account of the early life of Elizabeth Carlton, may prove both interesting and instructive to the reader. It brings before

the view of the mind, the ever to be remembered and important truth, that as there is a yielding to the convicting and converting power of the Holy Spirit, which from time to time breaks in upon the unregenerated heart, begetting a willingness to receive these precious visitations, an increase of spiritual light will be given by which we shall be enabled to discern more clearly good from evil, right from wrong; thus there will be a desire on the part of the visited ones, to bring their deeds to the light, in order that the heart may be cleansed, by the operations of the same Spirit, and made pure; a fit temple for His holy presence to dwell in. And as obedience keeps pace with the knowledge received, and the sincere hearted one seeks for strength to enable him to perform the whole will of the Lord, grace sufficient for every time of need will be graciously vouchsafed—thus shall the humble, dependent child of God be enabled to move forward step by step in the way which an all-merciful and loving Father may cast up; his sole reliance being placed upon the same power which in the beginning opened the eye to see, the ear to hear, and the heart to receive the ever blessed truths which were sealed upon the mind.

Such we shall find was the happy experience of the subject of this little memoir.

Elizabeth Carlton was born the 10th of Tenth month, 1726. When young she discovered a strong inclination for the fine arts; had a musical ear and a fine voice; and indulged in dress as far as she could. Her person was agreeable, her manners pleasing, and her company acceptable to the gay and thoughtless; though a native delicacy, amounting to timidity, and a sense of decorum, prevented her from taking the latitude she might otherwise have been induced to take. She excelled in skill and ingenuity with her needle, and was preparing to work a picture for an exhibition, when the ministry of a Friend, on a religious visit in Ireland, was made instrumental to discover to her the vanity of the things in which she had delighted. The account of this period of her life is thus related by herself!

"As long as I can remember, I think I was of a diffident, cowardly disposition, fearful of doing what I knew was wrong, lest I should be punished; yet, when very young, was fond of play, and at times earned reproof. As I advanced in age, the follies and pleasures of youth allured my mind; and company, though of our own society, with whom I was intimate, strengthened the growth of the wrong seed in my heart; so that I delighted much in many things, which though perhaps not accounted evil by the people, yet were very hurtful, and in danger of destroying the innocent life, which ought to be cherished with great care; such as light airy company, music and singing; and a great thirst for reading such books as were entertaining to the natural part, with specious titles for promoting virtue, and rendering vice odious; yet, like subtle poison, gradually tending to the destruction of the root of virtue and innocence in the mind, and creating a dislike to reading the Scriptures, and such other writings as would strengthen and encourage to live a self-denying life, according to the precepts of our blessed Lord.

These practices of mine were not with the knowledge or approbation of my dear mother and grandfather, the only parents I had left;

but concealed from them, and on that account attended with fear and remorse, knowing well that I could not hide from the penetrating eye of Him who beholds the secrets of all hearts. This sense caused a dread of future misery for such conduct, as well as fear of being discovered by my friends to be what I did not appear to be; which, though enticed to join with the temptations when they presented, yet was a charmer I much disliked. And the sincerity of my heart, I believe, pleaded with Almighty goodness to have an eye to me, and not to cast me off, but wonderfully and mercifully to preserve me from greater evils, of which I was in much danger; and also to awaken me to a sense of my perilous situation: so that when I would retire to bed at night for sleep, his terrors, lest I should be deprived of life in that state, followed me. I feared to think of it, and would often resolve to live more circumspectly, but fresh temptations often falling in my way, and not keeping up the inward watch as I ought, my condition, like that of many others, was to be deplored. But He, whose compassion faileth not, was pleased to visit my soul in a particular manner, in a public meeting in Meath street, Dublin; I think on the 31 of Ninth month, (old style) 1747, about the twenty-first year of my age, through the living testimony of a faithful servant, Richard Hipsley, from Bristol.

My mind had been awakened, in the same meeting, by the testimony of some other Friend, and I thought how pleasing it would be, if such ministers of the gospel were to continue with us; when Richard Hipsley stood up, and mentioned, as well as I remember, the disciples being for building three tabernacles, one for Moses, one for Elias, and one for Christ; but these servants were removed, Christ remained, and the voice uttered: 'This is my beloved Son, hear ye him.' I cannot recollect further of his testimony, but those words had such an effect on me, that my heart seemed changed, tender, and broken—a heart of flesh instead of a stony one;—my eyes seemed new, a new heaven and a new earth, in which some degree of righteousness was about to dwell. The cross then, in this day of power, which before I could not willingly take up, became easier, the burden lighter; the practices before mentioned I dared not join with; often being retired, humbled, and broken as it were to pieces. Strength was administered to withstand temptations, and my love to Truth and the friends of it grew strong; and the love of such seemed much toward me, so that I wondered that they should take such notice of me, who seemed to myself entirely unworthy."

(To be continued.)

Selected.

Where peace and love take up their abode, it would not be an irreverent strain of expression to say that heaven is begun. Oh that every awakened soul would daily seek after the sweet influences of gospel love; it begets its like in others; it excites gratitude; and even if bestowed on the ungrateful it brings its own sweet reward with it; for it attracts the approbation of God. Where then will be contempt? Where the indulgence of evil surmising or hard thoughts? Where either studied or careless detraction? Where even the needless disclosure of real failings? Where the least place for any enmity?

From the "New York Tribune."

An Englishman on America.

The opinions on America of John Walter, the owner of *The London Times*, and member of the English Parliament, who is now in New York, possess peculiar interest to the people of this country on account of his relations to the greatest of English journals, and his reputation as a man of liberal culture, keen powers of observation, and marked sagacity of judgment. In a long conversation with a *Tribune* reporter on Thursday evening Mr. Walter touched upon several topics which occupy an important place in the minds of Americans. Among the subjects discussed were the Centennial Exposition, the luxuries and conveniences of American railway travel, some aspects of the political question, manufacturing and agricultural interests, the hard money issue, hard times, and free trade. With all themes taken up he seemed fully conversant. He frequently cited English examples for America, and deplored the fact that the latter nation should apparently prefer to undergo hard experience instead of profiting by that of the mother country. In many instances the situation of the two had been identical; and yet Americans failed to see the logic of events—would close their eyes and stumble over the ruts when the smooth road lay spread out before them.

Mr. Walter said he had traveled extensively since his arrival in this country, visiting Boston, Albany, Chicago, Cincinnati, Washington, Philadelphia, and many other of the principal cities. Mr. Walter did not feel himself competent to judge of the comfort of ordinary American railway traveling. He had ridden so luxuriously in the special Pullman car which had been placed at his disposal that he was unable to form an idea of the way in which other people traveled. "The palace car," he exclaimed enthusiastically, "is fit for the Queen to ride in! In fact, it is much handsomer than the one she uses." The liberality with which railroad directors carried him to and fro over the land was a cause of great astonishment to Mr. Walter. It was a courtesy entirely unknown in England. The Queen herself was obliged to pay immense sums every year for railway conveyance, and no railroad company in all England would think of offering a coach for the free use of any gentleman, public or private. The American car, in Mr. Walter's estimation, was far superior to the English carriage. The possibility of being shut in with thieves or madmen (it had fallen to his own lot to be shut in with a madman); the close, cramped quarters which in their very nature stifled all the comfort out of the unhappy traveler; the partitioning a man from the sight and society of his fellow creatures; and, above all, the shortness of the carriages, which caused them to sway and jerk about so violently that conversation became a torture, and reading an impossibility; all these things combined to render a journey in an English railway carriage a matter of something worse than unpleasantness. The "permanent way" or road-bed of the English railroad, was much more substantial than that of the American, but the English carriages could not be compared with the American cars.

Mr. Walter's opinion of the Centennial Exposition was very high. It was certainly the equal, and, in many respects, the superior of any of the other World's Fairs. He expressed

himself as delighted with the good man exhibited by the people he had met at Exposition. Many of them bore traces of farmer in their dress and talk, but in no case had he seen signs of the boor. Yankee civility was to be noticed on all sides, but caricatured Yankee inquisitiveness did manifest itself.

The political situation was looked upon by Mr. Walter with great interest. He was somewhat surprised to learn that Congressmen and other officers were elected on the day of the Presidential election. It seemed to him proper that a special dignity should be conferred upon the candidates for the President. The salaries to national officers seemed very small to him when compared with the pensions which they must meet in Washington. He thought senatorial and judicial positions should be made worthy of the acceptance of the best men in the country; and though they were usually filled by the best men, who accepted sacrifices from motives of patriotism, it too frequently happened that weak persons, unable to withstand the temptations which accompanied these places of trust, were appointed to fill them, and disgrace, not to them but to the whole country, followed. As a matter of economy it paid to spend money to prevent being made a laughing stock especially to a great nation. With the conservative way in which Americans in the high circles lived, it was impossible to meet an outlay with the salary given by the Government to its leading statesmen, and if they were not men of wealth they must either steal or get into debt. He did not feel qualified to judge America on his slight acquaintance with the subject, but if England should try this sort of economy it would be, without doubt, her ruin. The Mayor of London received £5,000 (about \$25,000) per annum, and the judges were paid correspondingly large salaries. Looking upon it as an outsider, he felt it would be wise economy for the United States to follow England's lead and give some adequate payment for the labors of her servants. The rumor of serious trouble arising from the closeness of the Presidential election was scouted by Mr. Walter as a matter of no serious difficulty. He felt sure there was no danger of another civil war, there being no great issues at stake, and the memory of the last war being still too fresh in the minds of the people to allow them seriously to contemplate the idea of again taking up arms against their brothers. The foreign mind was much more willing to believe in the sincerity of the cry for reconciliation between the North and South than were many Northerners and Southerners.

"Hard times," Mr. Walter said were affecting England when he left that country. The business troubles were much worse, however upon the continent, more especially in Germany. France, always the lucky nation, whose crops were good and whose people lived and thrived upon almost nothing, was the richest of them all; but America he found was not far behind. With her wonderful resource of coal and iron, and her manufacturing and agricultural resources, the United States would soon shake off their present commercial lethargy; they were bound, if they would only hasten the return to specie payment, to find themselves in brisk business before long. In one way America had strangely reversed the natural order of things. Manufactures generally

ere a result of agriculture, and people only me to towns after the agricultural interests had been fully developed. But here this was not true. With room for hundreds of millions in many of the States, the manufacturing element has been developed so far out of its proper proportion that the cry already went up to too many manufactories. Despite the enormous grain and vegetable products of the United States, their agricultural resources had only been touched, not worked.

From the "New York Observer."
Babylon's Fall.

"In that same night was Belsazzar, the king, slain"—so briefly and terribly is the narrative cut short in the Book of Daniel. But from the contemporary authorities, of the next century, we are able to fill up some of the details as they were anticipated or seen at the time. It may be that, according to Berossus, the end was not without a struggle, and that one or other of the kings who ruled over Babylon was killed in a hard-won fight without the walls. But the larger part of the accounts are steady to the vividness and completeness of the shock, and all combine in assigning an important part to the great river, which, as it had been the pride of Babylon, now proved its destruction. The stratagems by which the water was diverted, first in the Gyndes and then in the Euphrates, are given partly by Herodotus and partly by Xenophon. It is their effect alone which need here be described. "A way was made in the sea"—that sea like lake—and a path in the mighty waters." "A Chariot and horse, army and power" are, as in the fable of the Milvian bridge, lost in the dark stream to rise up no more, extinguished like a torch plunged in the waters. The hundred gates, all of bronze, along the vast circuit of the wall, the folding-doors, the two-leaved gates which so carefully guarded the approaches of the Euphrates, opened as by magic for the conqueror; "her waves roared like great waters, the thunder of their voice was uttered." The inhabitants were caught in the midst of their orgies. The Hebrew seer trembled as he saw the revellers unconscious of their impending doom, like the Persian seer for his own countrymen before the battle of Plataea. But it was too late. "Her princes, and her wise men, and her captains, and her rulers, and her mighty men were cast into a perpetual sleep," from which they never awoke. They succumbed without a struggle, they forbore to fight. They remained in the lassitudes of their towering houses; their might failed; they became as women, they were hewn down like the flocks of lambs, of sheep, of goats, in the shambles or at the altar. To and fro, in the panic of that night, the messengers encountered each other with the news that the city was taken at one end, before the other end knew. The bars were broken, the passages were stopped, the tall houses were in flames, the fountains were dried up by the heat of the conflagration. The conquerors, chiefly the fierce mountaineers from the Median mountains, dashed through the fortified city like wild beasts. They seemed to scent out blood for its own sake; they cared not for the splendid metals that lay in the Babylonian treasure-houses; they hunted down the fugitives as if they were chasing deer or catching runaway sheep. With their huge bows they cut in pieces the young men

whom they encountered; they literally fulfilled the savage wish of the Israelite captives, by seizing the infant children and hurling them against the ground, till they were torn limb from limb in the terrible havoc. A celestial sword flashes a first, a second, a third, a fourth, and yet again a fifth time, at each successive blow sweeping away the chiefs of the State, the idle boasters, the chariots, the treasures, the waters. The Hammer of the Nations struck again and again and again, as on the resounding anvil—and with repeated blows beat down the shepherd as he drove his flock through the wide pasture of the cultivated spaces, the husbandman as he filled the rich fields within the walls with his yoke of oxen—no less than the lordly prince or chief. The houses were shattered; the walls with their broad walks on their tops, the gateways mounting up like towers, were in flames.

And yet more significant even than the fall of the monarchy and the ruin of the city was the overthrow of the old religion of the Chaldean world by the zeal of the Persian monotheists. The huge golden statue of Bel, the Sun God—from which Babylon itself, "the gate of Bel," derived its name—on the summit of his lofty temple; Nebo, the Thoth, the Hermes, the God of the Chaldean learning, to whom at least three of the Babylonian kings were consecrated by name, in his sanctuary at Borsippa, of which the ruins still remain; Merodach, the tutelary god of the city, the favorite deity of Nebuchadnezzar, "the Eldest, the most ancient" of the divinities—trembled, as the Israelites believed, from head to foot, as the great Iconoclast approached. "Bel bowed down and Nebo stooped, Merodach is broken in pieces." The High Priest might stand out long against the conquerors, and defend the venerated images at the cost of his life; they could not resist the destroyer's shock; their vast size did but increase the horror, it may be said the grotesqueness, of their fall: the beasts of burden on which the broken fragments would have to be piled groaned under the expectation of the weight; the wagons which bore them away creaked under the prospect of the unwieldy freight. With the fall of these greater divinities, the lesser fell also. In the more cynical form of the latter traditions the frauds of the selfish priesthood were exposed; the monster shapes of the old worship were burst asunder by the sagacity of the Jewish captive and the special favor of the Persian king. But in the ancient contemporary witnesses there is no such littleness mixed with the proud exultation which tells only how in the same general ruin all the sculptured figures come clattering down, and were broken to fragments. And where was the King? The Chaldean records describe how the Prince who had taken refuge at Borsippa was carried off captive to the mountains of Caramania. But the Jewish records know of nothing but the king who "in that same night" was slain.

"Belsazzar's grave is made,
His kingdom passed away.
He, in the balance weighed,
Is light and worthless clay;
The shroud his robe of state;
His canopy the stone,
The Mede is at his gate,
The Persian on his throne"

—Dean Stanley.

"Martha Hawkshurst being asked by a Friend what her gift was, if it was not like

his, (he being a minister of the Gospel) answered, that she believed her gift was to honor, adore and worship Almighty God in awful silence, and to approach near His throne and lay humbly prostrate at his footstool, begging and imploring mercy of his sacred Majesty for the inhabitants of the earth."

THE FRIEND.

TWELEFTH MONTH 23, 1876.

The closing days of the 100th anniversary of our nation's existence are suggestive of reflections on the results left to us of value in the true issues which concern immortal beings. Of material things we can enumerate much that indicates progress, and we might portray a picture of accumulated industry, art, invention, and population, quite flattering to our national pride. The natural tendency of the human mind to rest in the visible and temporal, rather than the unseen and eternal, is constantly leading us astray in our estimate of real gain. "The world passeth away and the lust thereof, but he that doeth the will of God abideth forever." Were this great truth kept constantly in view, and acted upon, how greatly would the aims and efforts of the mass of mankind be diverted from their present channels. It would then be perceived that many things now eagerly sought and highly esteemed, are but an abomination in the sight of Him who "searcheth all hearts, and understandeth all the imaginations of the thoughts;" and that whilst laying up treasures for themselves of an earthly nature, men are not rich toward God. The responsibilities which rest upon professing Christians must increase with the advantages bestowed upon them by a bountiful Creator. If the agency of steam and electricity has given new wings to commerce, and poured the treasures of the east into the lap of the west, it has also opened new channels for the spread of Christianity, and has equally accelerated the means of printing and disseminating the Truth. The material wealth of the United States has grown amazingly within the last half of the century, by the discovery and development of her mineral treasures of iron, coal, oil, silver and gold; by the subjugation of her forests, and the broad acreage of soil brought under tillage. How closely connected with the true happiness of her people is it that they should profit by the example of a favored nation of old, who were brought by the Almighty "into a good land, a land of brooks of water, of fountains and depth, that spring out of the valleys and hills, a land of wheat and barley, and vines, and fig trees, and pomegranates; a land of oil, olive and honey;" "a land whose stones are iron, and out of whose hills thou mayest dig brass;" and who were expressly charged not to say in their heart, "My power and the might of mine hand hath gotten me this wealth. But thou shalt remember the Lord thy God; for it is He that giveth thee power to get wealth."

Our countrymen challenge the admiration of the world for our system of free public instruction, and boast that every child within the borders of most of the States may acquire an education to fit him for any position in life without cost. But whilst taking credit to ourselves for this, must we not at the same time offset our complacent feelings with the painful reflection, that the people of the United

States consume annually more than \$600,000,000 worth of intoxicating drinks, while they spend only about \$90,000,000 in education. That the number of schools in the land is less than 112,000, while the licensed places where strong drink is retailed exceed 143,000. In 1872, there were 65,000 places of worship in the United States, and a total of 248,992 (licensed and unlicensed) places where liquors were sold, or nearly four dram shops for every meeting-house! These hot beds of crime produce their legitimate fruit, as we find that in the city of Philadelphia alone, there were 40,000 arrests made by the police for the year 1872.*

"By their fruits ye shall know them." Truly it is no time for those who claim to be the followers of Christ to fold their hands in slothful indifference to the world around them, and rest in their coiled houses in the selfish conclusion that they are not their brothers' keepers, nor responsible for the public evils which surround them, whilst neither effort, nor the means bestowed on them by a beneficent Creator are devoted to His service.

"Life and immortality have been brought to light through the Gospel," and we rejoice to believe that the innumerable company already filling the ranks of the Lamb's army, is being daily increased by accessions in this land of light and knowledge. It is fitting that the hearts of Christian men and women should be cheered in their labors by thoughts of the souls that are won, and the wages received by the reapers in the great harvest field. Of the increase of the Redeemer's government and Kingdom, we are assured there shall be no end, and those who are engaged in laboring in His vineyard, under the constraining influences of His love and good spirit, however humble and unobtrusive their sphere of service may be, should take courage from this truth, and also remember that His word shall not return unto Him void, but shall prosper in the thing wherunto He hath sent it.

SUMMARY OF EVENTS.

FOREIGN.—The representatives of the great European Powers have met at Constantinople and have had a preliminary conference. The Russian ambassador in Paris has received a letter from Prince Gortschakoff declaring that Russia's instructions to General Ignatieff, showing that she has not arrived at an irrevocable decision, the Bulgarians have submitted their demands through the British representative. They ask a general amnesty for all political offenders, self-government, complete religious equality before the law, decrease of taxation, the disarming of the Mohammedans, &c.

The Russian population of Turkey has presented an address to the Porte, expressing devotion to the government of Turkey, and at the same time protesting against its granting concessions exclusively to the Slavonic provinces.

The Argentine Consul at London has received a telegram from the Argentine Finance Minister, announcing that the rebellion in Entre Rios has terminated, and that the Republic is peaceful. The statement telegraphed to London about a general insurrection are false.

The merchant shipping of the civilized world, excepting Russia, Spain and Portugal, from which we have no returns, stands thus:

British Empire,	7,744,257 tons,
Other Nations,	11,225,211 "
British Isles,	6,047,701 "
United States,	4,772,217 "
Norway,	1,213,223 "
Germany,	1,058,263 "
France,	1,047,273 "

* These figures are taken from Dr. Hargreaves' work entitled, "Our Wasted Resources."

The German Parliament, by a vote of 206 to 116, has rejected a motion to postpone the abolition of import duties on iron until First mo. 1st, 1879.

A special dispatch to the London Standard from Alexandria states that the British Consul General has written to the King of Abyssinia offering to mediate between him and the Khelive. Major Barlow, an Englishman, who it was recently announced was on his way to Abyssinia to take command of the king's army, has been stopped by order of the Khelive.

The New Zealand Parliament has adjourned, having completed the business of consolidating the various provinces into one colony. A severe storm, which raged over the northern part of New Zealand on the 11th ult., occasioned great damage. A large number of fires caused by the lightning occurred; the losses aggregate \$2,500,000.

The French Cabinet has been partially reconstructed. Jules Simon has been appointed President of the Council and Minister of the Interior; Michel Combes, Minister of Justice, in place of Dufaure and Marcere who retire. The other ministers retain their positions. The new President of the Council has made a statement to the Senate and Chamber of Deputies, which was well received. He declared himself profusely a Republican and Conservative, and a devoted adherent of the Republic. He also had a sincere reverence for religion. The President MacMahon had endeavored on all occasions to act strictly in accordance with the principles of constitutional government. The Ministers united among themselves, and with the parliamentary majority, in the desire to maintain the Republic unshaken.

The recently published judicial statistics of France reveal the fact that in 1874 the number of suicides had reached the unprecedented number of 5517. Of these 4435 were males and 1182 females; 29 were under sixteen and 1090 over sixty years old.

On the 16th the Chamber of Deputies voted 392 against 116, to suppress the surtax on salt, notwithstanding the repeal was opposed by Say, Minister of Finance.

It is stated from Vienna that the Servians are preparing to renew the war. The soldiers belonging to the active army of Servia have been ordered to rejoin their colors by the 22d inst.

The accounts of the famine received from Madras are worse than those from Bombay. Large numbers of starving people are flocking into Madras. In the country districts much disease and great distress exists among the inhabitants.

A dispatch from Rome says that the Parliamentary Committee on the revision of the penal code have unanimously agreed to report in favor of abolishing the death penalty.

The latest Mexican advices do not promise an early settlement of the troubles in that unhappy country. After the downfall of Lerdo's government, Iglesias, late Chief Justice, ordered Diaz to proclaim his (Iglesias') presidency. This Diaz declined to do unless he could name four members of the Cabinet. This was refused by Iglesias, whereupon Diaz proclaimed himself Provisional President, and a new struggle is impending.

A Vienna dispatch of the London News says, the prolongation of the armistice until Third month, 1877, is now certain. Turkey objected to a shorter term, and Russia made no opposition because only 120,000 men of Russian soldiers are as yet concentrated on the frontier. A delay has been caused by unexpected difficulties of transportation.

Manufactures and trade in Great Britain continue greatly depressed. The Bank of England rate of interest has been long stationary at two per cent, and British loans are readily procured in the open market at 1½ per cent, on well secured four months' bills.

A colliery explosion occurred the 18th inst., near Newport, South Wales. Seventeen dead bodies had been recovered and many other miners taken alive were seriously and some fatally injured.

United States.—The amount of silver coin paid out from the United States Treasury for the redemption of the currency, since the commencement of the issue for the re-union of a national currency, amounted on the 10th inst. to \$24,450,756.

The House of Representatives, by a vote of 167 to 53, has passed a bill which provides that silver dollars of the weight of 412 grains shall be coined at the mints of the United States, and shall be a legal-tender for all

debts, public and private, except where payment of coin is required by law. The standard is that established by the act of Congress passed First mo. 18, 37.

The interests in Philadelphia last week numbered 319. The Philadelphia City Councils have determined that the tax rate for 1877 shall be 2½ per centum on the assessed value of real estate, the assessment being in most cases fully up to the market value of the property.

General Wade Hampton has been inaugurated Governor of South Carolina. A certificate signed by Hayne, the colored Secretary of State, was read on occasion, announcing that the vote for governor was Hampton 42,291, Chamberlain 91,127.

An ice barge above St. Louis broke on the 12th ult. and forced down the ice in front of the city, carrying with it a number of steamers lying at the bank. Some of these were crushed and others damaged—total loss from \$150,000 to \$200,000.

No fewer than four hundred and eighty-five bills were before Congress which were left over from last session. It is supposed that not one-fourth of these will be a upon.

At the late election in West Virginia 100,145 were polled, of which Tilden received 56,565, His 41,990 and Cooper 1,587.

The bill reducing the salary of the President of the United States from \$70,000 to \$25,000 per annum, which passed both Houses last session and was vetoed by President Grant, was again before the Senate on 18th inst., the question being shall the bill pass notwithstanding the President's objections. The vote was 25 yeas, 19 nays,—the bill therefore fails for want of a majority.

Both Houses of Congress have adopted resolutions for the appointment of committees to act in conjunction or co-operation with each other to prepare and report without delay, a plan of counting the electoral votes adapted to the present emergency.

The Markets, &c.—The following were the quotations on the 18th Superfine Flour, 11½ do, compons, 11 do, 1887, registered, 112½ do, compons, 115½ do, 5 compons, 11½ a 112½; do. 4½ per cent, 108½. Cotton, a 12½ cts. for inland and New Orleans. Flour, 75-80.00 per bbl. Pennsylvania red wheat, \$1.37 a 81.00; amber, \$1.40 a \$1.43; white, \$1.42 a \$1.47. Rye, 82 a 85. Yellow corn, 60 cts.; new southern, 52 a 55 cts. Old white oats, 40 a 50 cts.; lower grades, 31 a 40 cts. Sales of 3776 beef cattle at the two principal yards. Extra at 5½ a 6½ cts. per lb. gross; 5 a 5½ cts. for fair to good, and 4 a 4½ cts. for common. Sheep, 77 cts. per lb. gross. Receipts 13,800 head. Hides, \$1.50 a \$8.25 per 100 lb net. Receipts 5400 head. Wool, No. 1 Superfine, 108.5 a \$5.15; finer hair, \$5.50 a \$10.00. No. 2, white winter, 81 a 84. No. 3, 81.47; amber winter, 81.40; No. 2 Milwaukee spring, 81.36; No. 3 Chicago spring, 81.25; No. 2 Chicgo, 81.32. Oats, 38 a 52 cts. State rye, 93 cts.; western, 81 a 82 cts. Yellow corn, 62 cts.; mixed, 60 cts. Chicago, No. 1 spring wheat, \$1.20; No. 3 do, \$1.05; No. 2 do, 95 cts. 4½ cts. Oats, 33 cts. Rye, 82 cts. Barley, 65 cts. No. 1 \$1.20 per 100 lb. No. 2, 1.00 a 1.05. No. 2 red fall wheat, \$1.34; No. 3, \$1.30. No. 4 corn, 41 cts. Oats, 32 cts. Eye, 70 cts. Lard, 11 cts.

TEACHER WANTED.

A suitably qualified teacher for the Adelphi Color School, Girls' department.

Address or apply, with reference, to Caleb Wood, 254 South Second Street, (near 4th), Johnson, 809 Spruce Street, Samuel Baker, corner Queen and Knox streets Germantown.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent.—JOSUAH H. WORKINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 14th of Eleventh month, 1876, after short illness, REBECCA, wife of William Matlack, the 67th year of her age, an esteemed member of the Inter-Monthly Meeting, New Jersey.

—, at his residence, in Washington Co., Pa., 25th of Eleventh month, 1876, WILLIAM HANCOCK, the 74th year of his age, a member of Salem Quarterly Meeting of Friends of Ohio.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. L.

SEVENTH-DAY, TWELFTH MONTH 30, 1876.

NO. 20.

PUBLISHED WEEKLY.

Price, if paid in advance, \$2.00 per annum; if not paid in advance \$2.50; 10 cents extra is charged for postage on those sent by mail.

Postage on those sent by mail.

Subscriptions and Payments received by

JOHN S. STOKES,

PHILADELPHIA.

For "The Friend,"

Peasant Life in Bureundy.

(Concluded from page 147.)

"The old classical habit of putting a coin to the hand of the dead to pay Charon with all survives among the French peasantry. They have forgotten Charon, and cannot tell why they put the coin into the dead hand, or why they would not omit the ceremony. A much more touching practice is that of putting flowers into the coffin of a child. They tell you their reason for this, which is, that a child must have them to play with. This, too, is a classical idea—the old idea, that life is some kind continued dimly in the tomb itself.

The women go on the day of the Purification, to read the Gospel to the bees with a lighted taper in their hands. I have seen this one, and done in serious earnest, with a perfect faith that the bees could derive spiritual advantage from the reading, and were, at least, so far, Christians. I need scarcely add that there is the usual superstition against the sale of bees. They may be given or exchanged, but if bought and sold they will never prosper.

On Shrove Tuesday, the peasants have a diabolical custom of jumping as high as they can. They believe that this makes their crop grow. They listen to the cry of the hail with great interest, because they believe that he announces the price of wheat—but somehow there is always a difficulty in making out the figure which he announces. They are also convinced that the cattle talk together on Christmas night, at the time of the midnight mass; but curiosity as to what the cattle may say is repressed as dangerous, owing to a legend that the farmer who hid himself in the cow-house to listen heard the prediction of his own speedy demise which took place accordingly in a few days. Thousands of peasants believe this just as firmly as they believe things in the ordinary course of nature.

The peasant mind is in such an uncritical condition that it is subject to ocular illusions, even in perfectly healthy persons. I remember a young farmer who told people that one day I was walking with his father, and made myself appear to him twice as tall as his father by throwing some galle powder in his eyes. The old man and I were about the same height (5 ft. 10 in.) so that I must have

appeared a giant of 11 ft. 8 in. The origin of the illusion, in this case, was the belief that I had magic powders, which would cause a predisposition to see something wonderful. Many people are believed to have magic powders, but in my case this is fully accounted for by a chemical laboratory in which I am in the habit of pursuing investigations in the chemistry of etching and painting. * * *

The priests do nothing to discourage popular superstition; indeed, it may be suspected that they prefer a superstitious state of mind to a more enlightened one. They bless sprigs of boxwood, which are a protection against evil influences. They do not deny the existence of the powers of darkness, but combat them by religious ceremonies. One of the most striking of these ceremonies is the blessing of the fields, which takes place three days before the feast of the ascension. In the beautiful May time, the time of blossoming trees, rustic altars are erected by the villagers, and the priest leaves the church to go in procession from one to another, bearing the Holy Sacrament. The arrangements about the altars are left entirely to the peasants themselves, who erect them without any ecclesiastical or artistic direction, and the priest always accepts them just as they are. This ceremony of the Rogations has always seemed to me one of the most beautiful of all Roman Catholic ceremonies, and it is at the same time a striking instance of the skill with which the Roman Church adapts herself to all situations and circumstances, and of her readiness to take trouble that she may win sympathy and awaken interest. * * * Here you have the genuine rustic religion of the peasantry. They like to see the priest come among them and carry the holy sacrament through the fields that they may be blessed and yield an abundant harvest. The poetic sense which exists in their uncultured minds has its exercise on these occasions in the building of the rustic altar with its green boxes for an apse, and its vases, and candles and flowers. All is so closely connected with the beauty of the beautiful season, that even the rude mind feels the harmony between the ceremony and the time. The year has given its first promise in the flowers, the gentle air breathes warm, summer is coming fast, and after it the peasant looks to the wealth of autumn. * * *

As a special protection the peasants have hazel boughs blessed by the priest on this occasion, and set them in their fields as a defence against hail, which they are believed to avert.

It is not by any means easy to ascertain the exact degree of influence which the Church of Rome possesses over the peasant mind, because the people of that class are cautious and reticent in the expression of their opinions; but a close observer may easily perceive that a strong sceptical spirit has invaded the rural districts during the last few years. At the last ceremony of the Rogations which I wit-

nessed, the only men present who belonged to the hamlet were half a dozen who happened to be preparing materials for a new bridge. They were shaping the beams upon the green, close to the altar, and they went on with their work, giving loud strokes with the axe, till the procession was almost upon them. The women protested against this as unbecoming, and did at last obtain a sort of surliness acquiescence; but the men remained with their wooden beams behind the altar, and did not join the little congregation. I made inquiry about other inhabitants of the hamlet, and discovered that they were all at their work in the fields and woods, not having thought it worth while to quit their labor for an hour, even for the most important rural ceremony of the year. The women and children were there, taking a childish pleasure in their own little arrangements of pots and candles and May flowers; but the men in the fields and woods can scarcely have believed that the ceremony had much practical utility. In another hamlet, not a man was to be seen at the ceremony, except those who had come with the procession, and who might in some instances have joined it from self-interest, to stand well with a powerful noble family which owns a large property in the neighborhood. The real feeling of the men-peasants in this part of France seems to be, that religion is a sort of precaution which may not turn out to be of any use, but which it is as well to take, according to the proverb, 'if it does no good, it can do no harm.' When the rustic sticks a blessed hazel twig in his field to preserve it from hail, he cannot feel that it is a sure preventive because he has often seen fields lashed with hail notwithstanding hazel twigs and benedictions. But then, on the other hand, his fields have often escaped when the blessed hazel was set up in them, and at these times it is just possible that the blessed branch may have been of use. At any rate the precaution, such as it is, is one that costs very little trouble. This as far as I have been able to ascertain, is the exact shade of mingled faith and scepticism amongst my rural neighbors.

It has always been a very interesting problem for me whether the men peasants in this region can be more accurately described as believing their religion or as not believing it. A friend of mine says that they do really believe, but have a kind of surface-scepticism which covers their belief. This is one view. The other is that they have a surface-religion which covers a basis of scepticism as shallow water may cover a rocky bed. There is a distinct vein of scepticism amongst the men, which is as like the Voltairian spirit as the difference between Voltaire and an unlettered peasant will admit. It is most difficult to describe with exact truth a condition of mind which hardly ever expresses itself quite openly, and of which the peasants themselves are seldom quite clearly conscious. They believe in the efficacy of old wives' prayers for the

cure of burns and dislocated shoulders, and yet at the same time, if you tell them of a miracle fully authenticated by the clergy, that (the men) will look at each other and smile with the most evident incredulity. For example there is a young lady, six miles from my house, whose family I know. A little time since she was in a deplorable state, partially paralyzed and unable to walk. "I could be taken to Lourdes," she said, "I know I should get better." To Lourdes she was taken accordingly, and came back to all appearance cured. "She can walk and run—I saw her do both in my own garden not a week since, and she now leads quite an active life. Here was a miracle which would have excited a believing population to enthusiasm, and yet there has been no enthusiasm about it in the neighborhood, and the men say that it was not a miracle at all, that the young lady had ups and downs in her health before, and will probably have them again. In the ages of real faith, a person so favored by supernatural power would have created the most intense excitement. People would have travelled far to see her—to touch the hem of her garment, if haply, some supernatural virtue might pass from her to them. The peasants did not seem so much interested in the matter as I was myself. The case interested me as a remarkable evidence of the effect of imagination. A visit to Lourdes has never restored an organ whose anatomical structure has been changed by accident or disease, but the influence of it on the imagination of a real believer is often so strong as to produce a very remarkable and beneficial effect upon the nervous system."

Harneton gives a detailed and interesting description of the pilgrimages to certain places at which alleged miracles have been performed that have recently been so much in favor in certain parts of France. They are usually started by the bishop of the diocese from which the pilgrimage takes its departure. He sets forth in a printed document of great length, the merits of the saint or blessed personage, and also the great favor of the supreme pontiff towards all pilgrims who visit the holy shrine. Having done this, he commits the matter to the devout adherents of the church among the women, and he takes no further trouble until the day arrives when he goes at the head of his flock. Female emissaries go forth among the people, and display the most remarkable energy in hunting up recruits for the pilgrimage. As to the men they generally regard the whole affair with an indifference closely allied to contempt.

In regard to family relations among the peasantry, our author thinks that generally speaking there is not much love or affection between married persons, but neither, on the other hand, does there seem to be much distrust or quarrelling or conjugal infidelity.

What an inestimable blessing it might be to the rural population and the whole people of France, if the many millions of dollars now expended every year in the support of a standing army counted by hundreds of thousands of soldiers, were applied towards establishing and supporting a good system of common schools, free to all, and not subject to the undue influence of the Roman Catholic clergy. Together with the schools, there is also great need of a cheap literature for the diffusion of useful knowledge, and especially of the all important truths taught by our Holy Redeemer.

Mary Ann Clapp.

For "The Friend."

For our younger members we select an account of Mary Ann Clapp, a child who died in the year 1816, when between 10 and 11 years old. Although many years have passed since then, we believe it cannot be, even now, read without interest, and we trust, benefit.

When about five years old she lost a sister, which much affected her mind; and afterwards, in alluding to it, she said, "I thought I might the too, and I felt afraid if I died, that I should not go to heaven." Being asked what she did when she felt these fears, she answered, I used to go by myself and cry and pray.

Her mother hearing her cry one night, inquired the cause of it; the child replied, that some time before, she had spoken what was not quite true, and she was now grieved that she had committed so great a sin, fearing her Maker would not forgive her.

When taken ill she was very anxious about her future state, and being asked whether she was willing to die, she answered, "I should be willing if I knew that my sins were pardoned;" and added, "I should be glad to be one of the little flock which the Saviour carries in His arms." But, through the condescending mercy of God, this anxiety of mind did not continue long before she received a comfortable evidence that her sins were forgiven. She desired her mother to pray with her, and soon became quiet, saying, "My doubts are now all removed!—my sins are forgiven; I am willing to die at any time when God shall please." She asked her mother to read to her out of the Bible and other good books, and although she could repeat the following lines, yet it was her wish to have them read:

"See Israel's gentle Shepherd stand
With all engaging charms;
Hark! how He calls the tender lambs,
And folds them in His arms."

She often spoke of dying, saying: "I long to be in my Saviour's arms; there were no terrors in death to them that love God." After referring to the kindness of her parents, she added, I shall not feel the want of father or mother; my Saviour will be all in all.

An uncle and aunt having visited her, on bidding them farewell, she wished her love to be given to her cousins, saying, "Tell them to be good girls and seek the Lord early, and they shall surely find Him." At another time she said, "I am sure that I love God, because he is good—good to me; He has given me many good things; He preserved me, and He has forgiven my sins; I am sure that I love God with all my heart." A friend praying with her, she desired him to pray for other little children also, that they all might become good and be happy. When asked whether she felt assured of going to heaven, she said, "I think I cannot be deceived, I think I shall certainly go to heaven, because I love God with all my heart, and he will never cast off any who love him so much." Being asked whether she had thought of God that morning, she replied, "O! yes, I love him, and have been thinking of him with pleasure." While having her dress changed, she remarked, "I shall not need clothes much longer—I shall soon be clothed in the robes of the Saviour's righteousness;" and at another time, "I shall soon be in that happy place—soon shall rest my head on my Saviour's bosom;

why are his chariot wheels so long in coming?" It being observed to her that she had lost much sleep in her sickness, "Yes, so she," but

In wakeful hours of night,
I call my God to mind."

At her wish a number of her young friends were sent for, whom she addressed with much tenderness, gave them good advice, and bore them an affectionate farewell. Being in great distress of body, she said, "O, these are pleasant groans to me, for they are my last," and then recited these lines:

"Jesus can make a dying bed
Feel soft as downy pillows are,
While with his breast I lean my head,
And breathe my life out sweetly there."

To those who stood round her dying bed she said, "I wish you were all as happy as I am," often spoke of her prospect of futurity happily, saying, "Come, Lord Jesus, come quickly—Lord Jesus receive my spirit." After speaking again of the peace and joy which she felt, she quietly fell asleep in the Lord Jesus.

For "The Friend."

Random Notes of Travel.

Steamer Abbotsford, 6th mo. 1st, 1875.

Leaving Philadelphia on the morning of the 27th, at 6 o'clock, we have thus far spent pleasantly along, with scarcely wind enough to fill the sails; but a heavy roll, occasioned by a storm north of us, is sufficient to cause quite an amount of sea-sickness, of a persistent character: for the motion never ceases night or day. What a maximum of discomfort does this, heretofore to us unknown malady occasion, and what a minimum of sympathy does the sufferer receive. The stewardess attend her numerous patients with such an aggravating air of cheerfulness, as she quietly remarks, "You must not give up," "you will soon be able to go on deck," &c., which seem to add insult to injury, in the present state of our feelings. We feel that we are beyond comforting, and we wish to be let alone."

But through all, the sun shines out warm; and brightly, tipping the waves with silver, inducing the few cabin passengers to emerge one by one, to enjoy the floods of sunlight and the fine fresh breeze, which blows away the last remains of illness. An officer has fastened a rope in front of our row of chairs—our backs against the cabin skylight on the starboard quarter-deck—here we have less wind and more quiet; but alas for our anticipation of ease! a sudden lurch of the vessel caused the whole party to slip under the protecting cord, and a universal scream, and close embrace of the deck are the consequence. In the general uproar, one lady exclaimed: "The ship surely will go over on her side!" "She does dip very much! Never knew but one ship to careen," is the emphatic reply of the officer, accompanied by a slightly sarcastic accent.

There are but eighteen cabin passengers and as we are too few to be very troublesome and half this number would represent our available force in the mornings, so many preferring to remain in their state-rooms until almost noon, than to snuff the freshness of the early day, that we please ourselves with the fancy that an extra amount of liberty to traverse the ship is allowed us. We have 133 storage passengers, including a number of children, who make their end of the vessel

erry with their games and laughter. The tile ones occasionally cross the mysterious boundary line of chalk on the floor, which describes their limits, and are obliged to beat back to their own domain.

The Abbotsford is a fine vessel, well nanded, orderly, clean and comfortable. We have an excellent table, and the passengers get on very nicely. The captain has given the ladies a use of his cabin on deck, as a set-off perhaps to the little smoking box occupied, it is scarcely necessary to say, exclusively by smokers, not far distant. But as we find our milieu is rather too cold in the evenings, we generally spend them on the upper main deck, around the smoke-pipe. By diligently exploring the nooks and corners of this locality, we sometimes find a place sufficiently comfortable, in which to remain for a few hours. The life-boats, which are ranged along the deck, furnish backs to our camp stools, to former contain a supply of bread and water, that they may be ready at a moment's notice, in case of accident. Thus provided, we sit and watch the stars appear, one by one, and as we plough our way into the darkness before us, call up the early mariners who crossed this sea. Of Columbus "sounding on his dim and perilous way," finally inhaling his small feet among the gorgeous lands of the West. Of Sebastian Cabot, sailing down Bristol Channel, making in turn his discoveries along the coast of the great world; not however until Columbus had shown him the way across the great deep.

Sixth day out.—An involuntary sense of mildness overtakes one occasionally on the first voyage, as we look at the black, shoreless waste of water completely surrounding us—no ship in sight! only this ever heaving, restless abyss! An iceberg was seen four miles to the north; the keen blast which brought it, seemed as though it had just escaped from the north pole! The petrels still show us, no one molesting them in deference to the superstition of the sailors, who believe that the spirits of their departed comrades inhabit them, and that storms will surely follow the death of one of these birds.

Last night we narrowly escaped from running into a vessel which showed no lights, and was almost dead ahead. For a few minutes the watch lost his presence of mind, and ran away from his post, and the captain topped the ship for a few minutes. This ability to collision enhances the pleasure with which one hears the cheering cry of "H's Well!" from the fore-castle, which is heard every two hours throughout the night, when all is going so smoothly.

A first voyage across the Atlantic cannot be monotonous. Much is made of small occurrences—such as a whale spout, or a porpoise seen, the sailors heave the log and take the reckoning, or run up the rigging and change the sails to suit the wind, looking down contentedly from their dizzy height on us poor landmen. Our young men are growing tired of this enforced idleness, and play at shuttle-board with unremitting perseverance.

6th mo. 8th.

This morning, on awakening, found that and had been in sight since 2 o'clock; went on deck and found we were skirting the Irish coast, which exhibited a fringe of white breakers at the base of the rocks, telling of shipwreck and danger. And so the great ocean

was crossed, and we looked upon another hemisphere. To us who had never seen it, it was the new world, and we had left the old one behind. Opera glasses were in requisition, and brought to bear upon the green fields and small cabins, faintly discernible through the morning mist. One of our lively company declared he saw potato-fields already, and complimented our young Irish doctor upon the fine appearance of his native land. It was brown and rocky enough, with small claim to the cognomen of the Emerald Isle. Light-houses and light-ships, and numerous buoys indicate a dangerous coast. At Queenstown the usual bustle and excitement was occasioned by the departure of some of our passengers, and the embarkation of others, together with the pilot.

Next morning a drizzling rain had set in, almost hiding the shore. We had entered Bristol Channel in the night. And "that is England," said I, pointing to a low mountain on our right, faintly visible through the rain. "No, ma'am, that is Wales," said our steward, a pleasant little man, with red hair and beard. "But Wales is a part of England," said I. "No, ma'am, it is not," still more emphatically, "That is Wales!" and, continued the enthusiastic Welshman, "Wales is a credit to the kingdom! In the whole county of Caernarvon, ma'am, there has not been a man hung for eighty years! and the jails of Aber-gavenny were empty for a whole year!" We were afterwards told, that in Wales the clergymen are generally magistrates also, and therefore they have an opportunity of nipping quarrels in the bud.

A few hours later we arrived at Liverpool, having been twelve days upon the water. Custom house officers came on board. Trunks, valises and boxes were set out; a slight examination took place, and the ceremony was at an end. How inspectors could do any thing in such a scene of noise, bustle and confusion was a mystery, but they are evidently accustomed to it.

Passing over upon an unsteady plank extending from our steamer to the wheel-house of a little black heaving satellite, we bade farewell to the friends on board, and we soon landed upon the shore of England. Our sense of gratitude for preservation on the deep, and the hope we entertained that we might be permitted to return to our native land under their guidance, consoled for the regret we felt at parting from the good ship and her genial officers. This hope was not destined to be realized: the Abbotsford was wrecked on an early subsequent voyage in a fog on the coast of Wales, while under the command of a pilot. No lives, however, were lost, and a part of the cargo was saved. S.

(To be continued.)

For "The Friend."

The New Meeting at Media, Prussia.

The readers of "The Friend" will probably be interested in knowing, that at Concord Quarterly Meeting, held in the 11th month last, there was read a minute addressed to it by Chester Monthly Meeting, stating that after deliberate consideration, it had concluded it might be right to open a meeting for worship at Media, Del. Co., Pa.; said meeting to be held on the afternoon of the first day of the week, at 3 o'clock, to commence on the 1st First-day in the 12th month; and asking the sanction and cooperation of the Quarterly

Meeting. The subject being one of much importance, claimed the careful attention of the meeting. After a time of due deliberation, it was concluded to appoint a committee to unite with a similar committee of women Friends to attend at the opening, and assist Friends of that Monthly Meeting in the holding of future meetings as long as it may appear necessary. The subject having claimed the attention of women's meeting, was united with and a committee accordingly appointed. Chester Monthly Meeting subsequently appointed a committee on the subject, which with that of the Quarterly Meeting, numbers forty-eight Friends; a portion of whom it is expected will attend on each First-day. The meetings held so far have been well attended, and it is thought to the satisfaction of concerned Friends; and it is hoped without injury to the good cause. The setting up and holding of a religious meeting is always a serious undertaking, and unless Best Help is afforded, vain will be the efforts to hold it aright. However weak and disqualified those may at times feel who have had laid upon them the duty of attending; we trust, that if the eye is kept single, and an entire dependence upon Christ, the only source of strength, experienced, it may be supported to the comfort and edification of many individuals, and to the spread of the doctrines and testimonies of the Society in those parts.

Although it may be called a day of darkness and of treading down in our Society on account of unfaithfulness, it is not profitable to give way to discouragement and dwell too much on this aspect of things immediately surrounding us; but rather to "lift up the hands which hang down, and support the feeble knees." May we all remember that the Power which, in the beginning raised up the Society, and qualified and sent forth ministers to preach the glad tidings of the everlasting gospel, is the same to-day, that it was then, and if we faithfully do in simplicity that which in Divine ordering our hands find to do, may we not hope and believe that a blessing will rest upon the effort.

A *Cashmere Lake*.—Andrew Wilson says the Manasbal is called the most beautiful, but it is rather the most picturesque, lake in Kashmir. It lies close to the Jhelam on the north-west, and is connected with that river by a canal only about a mile long, through which boats can pass. This lake is not much larger than Grasmere, being scarcely three miles long by one broad; but its shores are singularly suggestive of peacefulness and solitude. Picturesque mountains stand round a considerable portion of it, and at one point near, they rise to the height of 10,000 feet, while snowy summits are visible beyond. In its clear, deep-green water, the surrounding scenery is seen most beautifully imaged. There being so little wind in Kashmir, and the surrounding trees and mountains being so high, this is one of the most charming features of its placid lakes. Wordsworth has assigned the occasional calmness of its waters as one of the reasons why he claims that the lake country of England is more beautiful than Switzerland, where the lakes are seldom seen in an unruffled state; but in this respect the valley of roses far surpasses our English district, for its lakes are habitually calm; for hours at a time they present an almost absolute stillness; they are beautifully clear, and

the mountains around them are not only of great height and picturesque shape, but, except in the height of summer, are half covered with snow; the clouds are of a more dazzling whiteness than in England, and the sky is of a deeper blue. There, most emphatically, if I may be allowed slightly to alter Wordsworth's lines—

"The visible scene
May enter unawares into the mind,
With all its solemn imagery, its woods,
Its snow, and that divinest heaven received
Into the bosom of the placid lake."

For "The Friend."

Making of Friends' Clothing.

The following interesting records in reference to this subject, are taken from the 10th volume of *The British Friend*, published in 1846. They show the concern maintained at that time that the members of the Society should be preserved in an appearance becoming their religious profession, and furnish encouragement to Friends at the present day to labor to support a testimony by which the Society has ever been characterized:

"At the half-year's Men's Meeting held in Dublin, the 9th and 10th days of the 3d month, 1687,—

"4th minute, Whereas, there was, some years ago, a meeting of Tailors appointed, that they might meet together, to see that none do exceed the bounds of Truth in making of apparel according to the vain and changeable fashions of the world; which meeting having been for some time past neglected, there is a desire in the minds of Friends of this meeting to have it renewed again; and, therefore, it is desired that such Tailors as are present do meet together and consider, whether things be answered in that trade according to Truth." Here followeth the names of several Tailors who are desired to meet as above-mentioned, viz, 14 Friends.

Upon this recommendation of the meeting, a conference was held of Friends engaged in the tailoring business, who issued the following advice:

"At our meeting of Tailors in Dublin, the 11th of the 3d month, 1687,

"The concern and care, that hath for several years past been upon the spirits of Friends when assembled together at several half-years' meetings, from which several testimonies have been given forth that all Friends might keep out of the vain and foolish fashions of the world, as to which fashions in apparel some that profess Truth of our trade have not kept themselves so clear as we could desire, in making or cutting out some garments for Friends and their children, but have entered too much into such fashions as the people of the world have invented, to the grief of the spirits of those who desire to keep to the first pattern which the Truth brought us into in the beginning. These things being under our consideration at this time, hath caused us to renew our Tailors' meeting, which for some time past hath been neglected. Wherefore, being now again stirred up by the spirit of love and true tenderness for the good of all concerned, we do desire all Friends of our trade throughout this nation to let the plain innocent Truth, and the honour thereof, be more in their eye than the profit and gain that may be had by making any garment that is not agreeable to Truth and the plainness thereof, so that we may retain our first love, and that we may be still known by the world to retain and

keep to that which tendered our hearts; that they may be made to confess we are not a changeable people, as some are that run into the many changeable fashions, namely, to keep out of making men's coats with a great compass, and plaited in the lower parts, and big cuffs with needless buttons; and likewise in women's apparel, long slopes behind, which are the vain fashions of the world, and not to be practiced by us who profess the Truth; for we are not to fashion ourselves according to the course of this world, but to be transformed by the renewing of our minds.

"Signed on behalf of the said meeting, by

"EDWARD HUDSON, TOBIAS PLEADWELL."

The following minute of the Morning Meeting in London, on the subject, addressed to Friends of the same trade, appears to be an answer to an address of the Tailors to that meeting, but which address the transcriber has not met with:

"1690, 3d month. To Friends of the Meeting of Tailors, London:

"Friends! we have received your testimony against the vain and needless fashions of the world, and exhorting to plainness and moderation, and we do well approve thereof, and desire that you may confirm and establish this your testimony in your practice; and we are also willing that copies of it may be sent from your Meeting to your correspondents, and to Monthly Meetings, for the stirring up the witness of God in others, that a reformation may be carried on, the Lord's name honored, and his people preserved.

"From Friends, at the second day's Morning Meeting in London; signed by

"BENJAMIN BEALING, Clerk."

A Cigar Scientifically Dissected.

A polite visitor, who, during his interview with us, had rendered our sanctum redolent with the fumes of a fragrant Havana, has just left a cigar on our table with the laughing request that we smoke it. Despite the fact that it is an exceptionally fine cigar, we are unable to gratify our friend's desire, seeing that we don't smoke; but the thought occurs that we can show our appreciation of the gift by applying the light, not of a match but of science, to it, and thus giving our friend and his brother smokers something to ponder over next time "the blue upcurling smoke" leads them to reverie.

To the world in general a cigar is merely a tightly rolled packet having brittle fragments of dried leaves within, and a smooth silky leaf for its outer wrapper. When it is burnt, and the pleasantly flavored smoke inhaled, the habitual smoker claims for it a soothing luxury that quiets the irritable nervous organism, relieves weariness and entices repose. Science, scolding so superficial a description, examines first the smoke, second the leaf, third the ash. In the smoke are discovered water in vaporous state, soot (free carbon,) carbonic acid and carbonic oxide, and a vaporous substance condensable into oily nicotine. These are the general divisions, which Vohl and Eulenberg have still further split up; and in so doing have found acetic, formic, butyric, valeric, and propionic acids, prussic acid, creosote, and carbonic acid, ammonia, sulphuretted hydrogen, pyridine, viridine, picoline, lutidine, colofine, parvodine, coridine, and rubidine. The last are a series of oily bases belonging to the homologues of aniline, first discovered in coal tar. Applying

chemical tests to the leaves, other chemicals have found nicotia, tobacco camphor or nictamine (about which not much is known) bitter extractive matter, gum, chlorophyll, malate of lime, sundry albuminoids, malic acid, woody fibre, and various salts. Feathery white ash, which in its cohesion; whiteness is indicative of the good cigar, yicopota, soda, magnesia, lime, phosphoric sulphuric acid, silica, and chlorine. Our friend has kindly left us a fine cigar; had it been poor and cheap one, the ingredients we should extract would be fearful and wonderful contemplate. Here is the list from an English parliamentary report on adulterations tobacco. Sugar, alum, lime, flour or murrhuab leaves, sulphure, fuller's earth, star meal, commings, chromate of lead, peat moss, molasses, burdock leaves, common salt, and leaves; lampblack, gum, red dye, a black composed of vegetable red, iron and liquor; scraps of newspaper, cinnamon stick, cabbage leaves, and straw brown paper.

Returning now to the smoke, or rather ingredients, Dr. B. W. Richardson, in his *Diseases of Modern Life*, considers the effect the same on the body at considerable length, basing his conclusions on actual investigation. He tells us that water, of course, is harmless, and tends to discolor the secretions and teeth. Ammonia bites the tongue, exercises a solvent influence on the blood, excites the salivary glands, and thus causes a desire to drink while smoking. The tendency of carbonic acid is to produce sleepiness, headache and lassitude. When a cigar is smoked ball that is, when the combustion of the tobacco is slow and incomplete, carbonic oxide is produced in small quantities, and is an active poisoning agent, resulting in irregular motion of the heart, vomiting, convulsions of the muscles, and drowsiness. The nicotine tends to cause tremor, palpitation of the heart, an paralysis. The volatile empyrenematic substance produces a sense of oppression and taints the breath and surroundings of the smoker with the well known "stale tobacco smoke" smell. The bitter extract cause that sharp nauseous taste peculiar to a re-lighted cigar or an old pipe.

By trying the effects of tobacco smoke on lower animals, we can obtain an idea of its influence on ourselves. Small insects are stupefied rapidly, but recover in fresh air. Cold blooded animals succumb slowly to the smoke, birds rapidly. Some animals, such as the goat, can eat tobacco with impunity; but none escape the effects of the fumes. Persons suffer most from tobacco while learning to smoke. Dr. Richardson says that the spasmodic seizures are sometimes terrible, especially in boys. There is a sensation of imminent death, the heart nearly ceases to beat and sharp pains shoot through the chest. Examination of inferior animals under such conditions shows that "the brain is pale and empty of blood; the stomach reddened in round spots, so raised and pile like that they resemble patches of Utrecht velvet." The blood is preternaturally thick, the lungs are as pale as those of a dead calf, and the heart is feebly trembling; this is the primary action of one's first cigar.

After a time, however, the body becomes accustomed to the influences of the poison, and with the exception of constant functional disturbances (owing to the excretory organs,

For "The Friend"

tably the kidneys, being compelled to do work not essential to their duties,) no dissolving results are felt. There are numerous instances where the evil effects are scarcely appreciable, the physical and nervous constitution of the smoker being capable of resisting its influence. In many cases copious saliva attends smoking, and in this circumstance the opponents of tobacco have found a strong argument. Still, either to expectorate or not to do so, is a choice of two evils. In the latter case, the result is to swallow the saliva charged with poisonous matter; in the former, the saliva needed to prepare the food for digestion is lost, and besides, as it contains bits of lime in solution, the effect is to produce large formations of tartar on the teeth. Smoker's sore throat" is a special irritable state of the mucous membrane induced by cigar smoking, which soon disappears when the habit is broken off.

Tobacco smoke does not produce consumption or bronchitis, but it tends to aggravate both maladies. Its effect on the organs of vision is to cause, in the extreme degree, dilation of the pupils of the eye, confusion of vision, bright lines, luminous or cobweb specks, and strong retention of images on the retina, with other and analogous symptoms affecting the ear, namely, inability to define sounds clearly and the occurrence of a sharp ringing sound like that of a whistle or bell. Its effect on the brain is to impair the activity of that organ and to oppress it if it be duly nourished, and to sooth it if it be exhausted. It leads to paralysis in the volitional and in the sympathetic or organic nerves, and to over secretion from the glandular structures. Science was not wise enough to prepare so formidable an antidote of the nicotian weed as the above. At King James' time, else that monarch might have had better ground than his personal dislike for stigmatizing the habit of smoking as a "custom loathsome to the eye, hateful to the nose, harmful to the brain, dangerous to the lungs, and in the black stinking fumes thereof, nearest resembling the horrible Stygian smoke of the pit that is bottomless."

And yet, despite all that Science can say, the habit is increasing. Two centuries ago, the Turks regarded smoking as a religious offence, and paraded a smoker through the streets of Constantinople with his pipe stuck through his nose as a warning to others. Who can disconnect the Turk now from the teas of chibouque or nargileh, or fragrant kateakia? Look at the best cigar wrappers of the world can produce, raised on tobacco fields in the heart of New England, where the Puritan fathers once visited the direst of blue sea vengeance on the wretch who profaned the Maker's handiwork by "making a chimney of his nostrils." The value of our tobacco crop last year reached nearly \$30,000,000. We consume annually some 75,000 hogheads of leaf; we imported about 83,000 bales of cigars, &c., from Cuba in 1875.

What is the end of it all? Effects on individuals likewise affect communities, these in turn influence the nation. No person that smokes can be in perfect health, and an imperfect organism cannot reproduce a perfect one. Therefore it is logical to conclude that, were smoking the practice of every individual of a nation, then that people would degenerate to a physically inferior race. It would follow, moreover, that, in those countries where smoking is most practised, a lower

physical, and a consequently lower intellectual, development must be found. Such, we think, will be conceded to be true of Spain, of Cuba, of Portugal, of Turkey, of Greece, and of the South American countries, where those who are addicted to the habit vastly outnumber those who do not smoke.—*Scientific American*.

GOD IN NATURE.

Great Ruler of all nature's frame!
We own Thy power divine;
We hear Thy breath in every storm,
For all the winds are Thine.

Wide as they sweep their sounding way,
They work Thy sovereign will;
And swayed by Thy majestic voice
Confusion shall be still.

Thy mercy tempers every blast
To them that seek Thy face,
And mingles with the tempest's roar
The whispers of Thy grace.

Those gentle whispers let me hear,
Till all the tumults cease;
And gates of Paradise shall fall
My weary soul to peace. —*Philip Doddridge*.

HOME.

'Tis Home where the heart is, wherever that be,
In city, in desert, on mountain, in dell;
Not the grandeur, the number, the objects we see,
But that which we love is the magical spell.

'Tis this gives the cottage a charm and a grace,
Which the glare of a palace but rarely has known;
It is this, only this, and not station or place,
Which gives being to pleasure, which makes it our own.

Like the dove on the waters, a rest-place to find,
In vain for enjoyment o'er nations we roam;
Home only can yield real joy to the mind,
And there where the heart is, there only is home. —*John Young*.

The Economy of Prohibition.—Neal Dow, in a late letter, says that one reason why Maine has suffered less than other States from the "hard times" is the fact that prohibition and temperance work have exerted so powerful an influence in reducing the consumption of liquor. He affirms that for forty years the liquors annually consumed in Maine cost fully twelve millions of dollars, but that now the clandestine sale is not one-tenth of that amount, and that the difference is in the pockets of the people or is put into better modes of living. Referring to his own city, Portland, he says:

"In the old rum times we had seven distilleries in Portland—large ones—running night and day, and at the same time cargoes and cargoes of West India rum were imported and cargoes of 'rectified' rum were brought from New York. All this was for consumption in the western part of the State, and absorbed and wasted a very large share of the earnings of the people. Now there is not a distillery running in the entire State, and no rum comes in, except in small quantities and by dark and secret ways. All through these hard times the State has been comfortable, and Portland has been prosperous. A great many fine buildings have been erected here every year, and as many this year as any other. Why? Because we have our earnings in our pockets and in our business, instead of wasting it on strong drinks, as the people of other States have done and are doing. The rum shops are at war with every interest of the State and people."—*National Temperance Advocate*.

Our Children.

I believe that the many departures that we see at the present day in so many of our young Friends, more particularly in following after the fashions and customs of the world, are in a great measure, for want of a proper concern and care in parents.

I have thought that where a true concern was felt by parents, for the support of the doctrines and testimonies of our Society, that a corresponding concern will be felt and witnessed for the proper training of our children in accordance therewith.

The following extract from the life of that worthy elder, Joseph Pike, may be applicable to some at the present time, which I offer for insertion in "The Friend." It is to be found in Friends' Library, Vol. ii.

Coal Creek, Iowa, 12th mo. 15th, 1876.

"Much of the stubbornness and stiffness in children who are grown up, is owing to fond and indulgent parents, some of whom desire well for their children, and as Eli did, advise and counsel them, but still they have not restrained them according to their power; and this was his sin, and the cause of the destruction of his sons.

These suffer them through their foolish and evil fondness to get head, and to grow up in disobedience, and when dealt with by concerned Friends, they will tell them, 'we must not be too harsh and severe on our children; we must bear with them, and draw them by love, lest we drive them out from amongst Friends; we hope they will grow wiser and better in time; these and the like fond arguments we have met with: but by means of this forbearance, such a strong spirit of rebellion has grown up in them, that at last they have become so unruly and stubborn as to be above advice, rule, or government.

And here I would warn all such indulgent parents to repent thereof; otherwise, I verily believe the blood of their children will be required at their hands. I have compared a child to a young twig that is easily bent, but when grown to a sturdy tree is past bending. Children when young being prone by nature to evil, are to be kept in subjection; and as soon as anything of pride, wantonness, or other evil appears in them, that is the time for bending and restraining them, so far as it is in the power of parents to do, and which is most certainly their duty, as may be plainly proved by scripture."

The Scene of the Indian Cyclone.

At the north-easternmost corner of the Bay of Bengal, the Ganges and the Brahmapootra—locally known as the Megna—discharge enormous volumes of mud into the ocean, thrusting each day's load a little further into the water, and building up, as the years pass on, one of the largest systems of mud banks known in the world.

These banks, though inferior to the deposits of the Amazon and Mississippi, are some of them as large as English counties, and divided, as they are, in every direction, by fresh water streams and brackish creeks, develop under that hot sun a spontaneous vegetation which as it rots raises the soil inch by inch above the sea, and exaggerates the natural fertility of the mud until it will grow in profusion anything that nature permits in the straggler sections of the tropics. It is the very place

in particular for the rice plant, the sugar cane, the cocconut, and the bamboo.

The banks remain for ages unhealthy, fever-smitten, dreary looking swamps, but they draw the hearts of cultivators as the fairest water meadows do in the western world. Imagine seventy feet of rich mould without a stone in it, with three feet of vegetable compost over that, with no necessity for manure, and with endless rivers carrying your grain direct to the port of shipment! The water system in this region is unequalled, there being literally hundreds of channels fit for the heaviest grain boats, and as unknown to geographers as the minor channels through which the alluents of the Amazon pour under the impenetrable forest.

The peasantry swarm on these marshy districts, heap up the earth excavated for irrigation into mounds to raise themselves a little above the water, and in their mud and mat huts labor unceasingly to grow rich, without a thought of the ocean and the rivers which are every now and then warn them that they are dealing with deposits which may be reclaimed.

Every two or three years the waters are out in backergunge, every five there is an inundation, and every half century probably—the facts before 1756 are not accurately known—there is some terrible catastrophe from water, only less destructive than the one which, it is believed, swept off the population of the ruined province, the Sunderbunds, which stretches from the sea up to Calcutta.—*London Spectator.*

For "The Friend."

From the Memorandums of a young Friend lately deceased.—“Deeply did I lament, that any of my precious time had been spent in perusing publications of an unprofitable tendency; such as plays and romances; and I was made sensible that nothing I had ever been in the practice of, had so much alienated my mind from the love and fear of God, or led me so far from the simplicity of the pure Truth, as books of this kind, and how often did I wish I could warn the whole world of their pernicious effects, and especially, the young people in our Society.”—*Mary Alexander*

The Liquor License.

BY A. WILLEY.

There can be no doubt that the liquor license is the strongest fortress of that power in the country, and the greatest obstacle to the temperance reform. That never can make progress only as this is abandoned. The two policies rest on directly opposite principles, and the conflict is “irrepressible.” To support the one is to oppose the other, and it cannot be otherwise. It is “for me” or “against me.” The attempt to compromise has already retarded the great temperance redemption more than one age. It has divided the moral forces of the country, and holds still in a false position strength enough soon to turn the tide of conflict for God and humanity. Will not such men candidly bring their position to the test of that law which decides all human destinies?

What is this license law? It is not a mere tax law like that for national revenue. That takes the money wherever it finds the dealer, but confers no legal rights. The license, so-called, is in substance a mere certificate of payment of tax for one year, leaving the seller as liable the next day under State and

municipal law as before. Nor is it merely for the purposes of restriction and regulation, for all that can be had without conferring any legal rights, and without money as well as with it. Liquor-selling on Sunday can as well be prohibited without authorizing it on Monday as with it. So of all other restrictions.

But these license-laws, on complying with certain conditions, make the traffic legally right like any other trade, and throw over it as complete a protection of the Government. Prove it to be a misnomer, and your licensing statute shields it. Indict it as a monstrous crime, and the license is the answer. Bring the whole force of the common law against it, and the statute defies it. Prove it an intolerable curse to the public welfare, and the dealer presents his license with a grin. For a fee the State solemnly declares it right, and pledges the last muscle of its power for its protection. Such is license-law, the great favorite entrenchment of the liquor-power.

What is the true character of the business thus specially honored and guarded? The liquor system for beverage—the making, selling, drinking—is sin against God and crime against man. The Almighty says; “Woe to him that giveth his neighbor drink.” This replies, Give him all he wants. It is “framing mischief by a law.” It defies justice and mocks at human woe. It violates the law of God and sweeps human welfare like a prairie-fire. It defeats redemptive mercy beyond any other force on earth, and blasts human hope for all worlds. No system of paganism equals it in guilty enormity. Delusion threw children into the Ganges; we do it for money! And this law “justifies the wicked for reward, and takes away the rights of the poor” wives and children. It will not for a moment bear a moral test, and two hundred years have proved it worthless in practice, as sin always will be until “Satan casts out Satan.” No language can better describe it than “a covenant with death, and an agreement with hell.”

The same principle of licensing sin and crime is seen in legalizing and supervising houses of ill-fame, appointing their physicians, &c. Nothing more pagan ever existed in the South Seas, and every excuse for it makes Christianity and self-government a sham. The liquor-license is of the same class, “doing evil that good may come, whose damnation is just.” And the higher the price the worse in blinding moral perception, strengthening the bribe, and greatly increasing the obstacles to reform. Thousands of communities and churches are spiritually dead from this paralysis. Were other crimes, such as stealing, counterfeiting, and murder, treated as the far greater liquor crime is, society would be shocked and sooner seize the rifle than endure it. Now its most active agents are all right even at the communion-table.

And the relations of society to this license-guilt should be carefully weighed. The citizen is responsible for the laws to which he assents. What they do he does. When the city officers say to the saloon-keeper, Give us so much money and we will protect your business of making drunkards by all the powers of the State, a partnership is virtually formed, and the parties stand on the same moral level, the dealer and the officers; and by their side stand citizens, cities, towns, and States sustaining the contract. All are responsible for

the usual and legitimate results of the business. There that terrible law which is “ceeding broad” will find every soul. Whether in the pulpit, in the church, or out of it, are conspiring for human destruction and a share in the speculation.

This policy of guilt and shame, as unworth of civilization as it is abhorrent to justice to God, is equally opposed to principles sound law, and has received legal recognition only from a mistaken necessity. It originated centuries ago, and has corrupted and disgraced Christendom quite long enough. Under protection the intoxicating power of the country has taken shelter and fortified its strength till it threatens our ruin. It can never overthrow until this covering is torn away and this “gigantic crime of crimes,” as United States Senator in his place just called it, is exposed, and religion and law unite for its suppression like other atrocious crimes. If the Christian power of the country would unite in a firm demand that the old guilty barbarism, this perversion of law and justice which licenses wickedness at crime for money, shall be blotted from existence, it would soon be done, and there would be hope that intemperance can be overcome by drying up its sources. When shall it ever? When shall repentance for the past ensure the discharge of this imperative duty the future? Why not begin this great work all along the line this Centennial year?—*National Temperance Advocate.*

“If we are so fond of a few transient pleasures in this world, how can we bear to be shut out from eternal felicity, and doomed to everlasting misery; I beseech thee solidly to consider these things, and I pray the God of love and mercy to give thee a wise and understanding heart.”

Beware of Esau's crime: it was, when his soul was ready to faint, he despised his birthright; when he had been eagerly pursuing something he delighted in, he came to the unwise conclusion, “Behold, I am at the point to die, and what profit shall this birthright do me.” He wanted patience and solid reflection and afterwards had bitterly to repent who too late. Had he not resigned it, none could have taken it from him, neither can all the powers of darkness from thee, if thou resolve to keep it; this must be done by cleaving the Lord with all thy heart, with all thy soul, and with all thy strength, which thou mayest be enabled to do, is my fervent prayer.”—*Mary Neale.*

The Suez Canal.—As far as we could see the canal was as straight as an arrow. The high banks, sloping to the water, along the edge of which grew a few hardy shrubs, seemed to draw together at the further end. The width of the water-line in the deep cut is 130 feet, the depth 26 feet, the total length 100 miles. It grew monotonous in the course of half an hour—the interminable banks like gray walls away above our heads. By and by we raised a ship, a monster, that towered above our toy steamer, and seemed to tangle the stars with its tapering masts. That ship appeared to fill the canal, for the long, high banks closed in beyond her. We saw the black hull and the gleaming lights; we heard the blustering orders that were howled on board, resounding above the roar of the wind in the rigging. I wondered how wo

ere to pass her, and why she did not caution us to keep out of the way. We didaken our pace somewhat, and then stole under her huge shadow unnoticed. She was very busy in trying to keep herself in the middle of the canal as she slowly drifted toward Suz. Seven ships lay in our track at night—one of these a ship of the line—did all seven of them utterly ignored us, though we were the regular express boat from maila to Port Said. We came to a house recently, a long, low, wooden house, painted blue, and not half way up the bank. Wooden steps led up the slope to the veranda. There were vines creeping over the roof, and flowers growing in the garden and perfuming the air; but beyond it and above it rose the everlasting bank, and we could see nothing to the right or the left but the dark, narrow, straight gap, with its deep waters ebbs and flows, bisecting from sea to sea.—*Cairo Letter.*

I have learned of the Lord, through many exercises, that after the visitation of the Almighty to any soul, the Lord requires an inward, worthy receiving of his love, and a spiritual watch to be kept in his holy light, in which all the workings and approaches of the destroying adversary are discerned, and the enlightened and obedient mind is preserved.—*Charles Marshall.*

"He who runs into prayer and preaching, and before Christ, the Life, livingly moves in thereto, makes haste, and is not therein true believer. Every true believer believes, and waits for, the living coming in Spirit, and qualifications of Christ his life; it is Christ that liveth and acteth in him."

THE FRIEND.

TWELFTH MONTH 30, 1876.

It can hardly do any harm and may do some good to allow the close of the year now upon us, to incite each one of our readers to serious revision of the manner in which it has been passed, so far as the events can be summoned from the storehouse of memory, and the heart opened to receive the instruction they can impart when viewed in the light of Truth.

It is a serious thing to live. As immortal beings endowed with rational faculties, and having bestowed on each one of us a measure of Divine grace for our guidance and help, we are capable of thinking and acting, of choosing and refusing, and are accountable for the use made of our free agency. It may be probable then to embrace the invitation that comes naturally extended by the termination of each year, and the ushering in of another, to recall mentally the course of life we have pursued through that portion of time that has now gone from us forever, and endeavor to profit by the teaching of experience; to do which we must analyze, in measure, both our motives and our actions, or the lessons decreed will be misleading. Not that experience in itself affords a law suited for moral or religious government, but that it may effectually illustrate the good that has been gained, the evil that has been suffered, from strictly obeying, or perversely or heedlessly disregarding that law written in the heart by Him

who is our Creator and Judge, and which is applicable to all times and all circumstances.

The things of time and sense press so forcibly and continuously upon us, that we cannot escape feeling the realities of *this world*; but such is the deceitfulness of our nature, and the strength of the temptation to allow the things of the present to engross our attention, that unless constantly watchful not to forget our responsibility and its consequences, we may easily become insensible to the realities of the world to come. Yet how few of us are they, who, in looking over the past, fail to be saddened by the recollection of some who have been removed by death—relatives around whom the tenderest affections were entwined, or friends closely associated with our prospects of life or connected with our feelings of duty or enjoyment—and how do the mingled emotions of grief at our loss and self reproach for not having valued and served them better while here, well up from the secret springs of the heart. Few then are there but must feel that a true source of consolation is to be found in an abiding well-grounded belief, that those who have been taken away, so lived or so died, that their entrance on the realities of the world beyond the grave, was to begin the fruition of its eternal joys. There is no way in which we can more lovingly embalm their memory, than by allowing these reflections on their death and the belief that reconciles us to our loss, to fasten upon us the conviction of the profitableness of a life of godliness, and the resolution so to live as when called to die, we will be permitted, through mercy, to be reunited to those for whom we still cherish an unselfish love.

Is there not a sadder train of thought awakened in the serious mind that is at times enabled rightly to estimate its own true interest, to which all others are subordinate and ought to be subservient, when, in reverting to our course of life we are obliged to acknowledge to ourselves how many mistakes we have made, how many sins we have committed, how far we have fallen short of accomplishing the duties we have known to be required, and in resolutely pressing toward the mark which conscience tells us we ought to have attained.

We may be quite willing to confess that earthly things are empty and unsatisfying; but are we willing to allow our experience to convince us that while they never confer true content, the engrossing pursuit of them prevents or destroys the appetite for those higher though unseen possessions that alone can suffice an immortal soul, even durable riches and righteousness? If so, and a review of the past is accompanied with the sense that we have been devoting too large a part of time and talents to the things that are seen, wearying ourselves with "panting after the dust of the earth," let the new year be opened with a fixed purpose, that with the help of Him who is strength in weakness, we will seek first the Kingdom of heaven and its righteousness, trusting to his promise that all things necessary shall be added.

It is a solemn thought, but one that should not be allowed to escape from our consciousness, that we are continually in the presence of the Almighty as the omniscient witness, not only of our words and actions but of our every thought. Should not this consideration, if we believe His declaration, "If ye die in your sins, whither I go ye cannot come," stimulate

all, especially the disobedient and negligent, to pause in their career and obey His injunction, "Watch and pray lest ye enter into temptation." To the humble, self-denying Christian, however poor in spirit, it ought to be a consoling and animating reflection, that whatever his crosses and conflicts, the foundation on which he rests standeth sure, having this seal, the great Searcher of hearts knoweth them that are His.

Even those whose main desire is to walk in the way of the just are sometimes too prone to dwell on the evils with which they have to struggle, and which they may imagine are peculiarly hard to bear, without sufficiently estimating those from which they have been delivered, or others from which they have been mercifully preserved. But the eye of Him who inspects every part of the universe every moment, and orders it according to the counsel of His infinite wisdom, is upon them, and as they seek to do His will, He, though He may not predestinate, will so control events as to promote their good, and advance His own purposes. If, then, there are any of this class whose retrospection of the past, may be clouded by shadows of plans or efforts, the success of which was once thought to be essential to the furtherance of their best interest, but which have been frustrated or rendered nugatory by what they considered adverse circumstances or undeserved trials, let them not be discouraged; the progress of events may demonstrate that the good they have been longing for will yet be theirs, and they, led by an invisible hand, arrive at the goal, which, at times, they may have feared was barred to them forever; not, indeed, by the course of their own election, but by ways that they knew not, and in paths that they have not known.

Time that is gone is lost to us forever. The close of the year calls for solemn reflection and self-examination. Elihu said, "Days should speak, and multitude of years should teach wisdom." Remember, "If the word spoken by angels was steadfast, and every transgression and disobedience received a just recompense of reward; how shall we escape if we neglect so great salvation, which at first began to be spoken by the Lord, and was confirmed unto us by them that heard Him." We know not that another year will dawn upon us. Though life should be lengthened out, yet each one may truly adopt the language of the patriarch of Uz, "When a few years are come, then I shall go the way whence I shall not return."

In a notice of a little book entitled "Pennsylvania and Peace," by Samuel M. Janney, published in the last number of "The British Friend," its author is spoken of as a *Friend*, and that his biographies of William Penn and George Fox have long taken their place as *standard works* on those worthies." As "The British Friend" is taken by several of our subscribers, we think it right to say that S. M. Janney is a member among those who separated from *Friends* in the Hicksite schism, and that *Friends* cannot accept the biographies mentioned as *standard works*, because of the opinion inculcated in them, that those distinguished ministers, as well as the early *Friends* generally, coincided with those separatists in their views respecting the divinity and atonement of Christ.

An obituary notice has been received respecting a young woman (E. S. R.), without the information required in such cases of the name of the Friend who sends it, and of the meeting to which she belonged.

SUMMARY OF EVENTS.

FOREIGN.—The Emperor of Germany closed the session of the German Parliament on the 22d inst., with a speech from the throne. The Emperor said in reference to the foreign affairs: "The negotiations of the Powers upon the eastern question, as far as proceeded with, justify the hope that my efforts and the mutually conciliatory and peaceful intentions of the Powers immediately concerned, will be successful in solving the pending question without prejudice to the real relations to be regulated. Germany will continue by friendly, disinterested mediation, to lend her co-operation for the attainment of this end."

The weather has been boisterous and very wet in Great Britain. On the north and east coasts of Scotland and England about 120 vessels were wrecked, and more than 250 persons lost their lives within two weeks.

Small pox prevails to some extent in London. The Metropolitan Hospitals had recently 722 small pox patients under treatment, and these figures only represent the range of the disease among the pauper population.

Forty thousand men are now employed in shipbuilding on the Clyde, and one of the builders recently declared that the Clyde shipyards could reconstruct the entire British navy in two years.

Midhat Pacha has been appointed Grand Vizier of Turkey in place of Mehemmed Kuchel, who has been deposed. It is said that the new Grand Vizier will assert the rights of the empire more strenuously than his predecessor did. The Imperial order appointing Midhat Pacha Grand Vizier, declares that the appointment is made because the Sultan desires a satisfactory solution of the pending questions, while confirming at the same time for the whole world the legitimate rights and interests of the empire.

The London Standard's dispatch from Belgrade says General Nikitich, who is expected to arrive to-day, brings 1,000,000 roubles contributed by the Russian government for the reorganization of the Serbian troops. The Russian Com-Union General has officially informed the Emperor that the Russian officers remaining in Serbia to be considered as forming part of the Russian army, and are to receive the full war pay usual in the Russian service. Serbian officers of the reserve have received orders to start for the frontier immediately.

A new Constitution for Turkey was formally proclaimed on the 22d inst. It is liberal in its provisions, and appears to be designed to make the institutions of the empire approximate to those of the more enlightened nations of Europe. The prerogatives of the Sultan are to be those of the constitutional sovereigns of Europe. Islamism is to be the religion of the State, but the free exercise of public worship by all professions of all creeds is guaranteed. All individuals are equal in the eye of the law, and all are eligible to public office irrespective of religion. The Legislature will consist of a Chamber of Deputies and a Senate. Laws submitted to the Chamber of Deputies and revised by the Senate, will require the Imperial sanction. The number of members of the Senate, Deputies and Senators appointed for life by the Sultan. Liberty of the press and freedom of education is granted, and primary education is made compulsory.

The first sitting of the Plenary Conference was held at Constantinople the 22d inst. One of the representatives of Turkey presided, and in his address opening the conference, he said: "I am glad to see you at the Porte. Turkey, he said was ready to grant to its subjects all privileges which were not contrary to the dignity and integrity of the empire."

Railway trains are not to be permitted to run hereafter in Canada on the first days of each week. The Dominion Government has resolved that the trains are to be run on that day except in cases of great emergency, and of this necessity the authorities are to be the judges.

The French Senate continues to restore clauses in bills which had been thrown out by the Chamber of Deputies. The result will, no doubt, be a serious conflict between the two houses. The Senate, on the public worship estimates, restoring the vote for salary of clergy which had been reduced by the Chamber of Deputies. The Senate also reinserted the grant

for seminary scholarships, which was likewise suppressed by the Chamber.

The total exports of cane sugar from all the producing countries on the globe, during the year 1875, amounted to 2,140,000 tons. These exports were divided among them as follows: Cuba, 700,000 tons; Porto Rico, 30,000 tons; Brazil, 1,200,000 tons; Dutch Guiana, 250,000; Brazil, 170,000; Java, 200,000; Manila, 130,000; China, 120,000; Mauritius, 100,000; Martinique and Guadalupe, 100,000; Australia, 51,000; British India and Penang, 30,000; Egypt, 40,000; Russian, 30,000; Peru, 50,000; Central America and Mexico, 100,000; Louisiana, 75,000; Sandwich Islands, 10,000; Natal, 10,000; Zeylan, 10,000. In addition to this supply, continental Europe produced a crop of beet-root sugar amounting in the aggregate to 1,317,623 tons, or about 40 per cent. of the whole. This crop was divided about as follows: France, 462,250 tons; German Empire, 346,640; Russia and Poland, 245,700; Austria and Hungary, 133,922; Belgium, 74,576; Holland and others, 30,000 tons. These figures give an aggregate supply of 3,457,623 tons for the whole world's consumption during the year 1875, not including the stocks on hand at the commencement of that year.

It is estimated that 10,000,000 acres of land in Algeria are covered with a spontaneous growth of alpha grass, some of which is exported for the manufacture of paper.

The Emperor of Austria has greatly increased his popularity by spontaneously abandoning the privilege, hitherto enjoyed by Austrian Emperors, of having the Harshburg estates exempted from taxes.

Ex-Urso Sprues.—The interments in Philadelphia for the week ending 12th mo. 23d, numbered 281. Of consumption 60; typhoid fever 22.

There were 432 deaths in New York last week.

General Crook's annual report says that the miners in the Black Hills did not violate the Sioux treaty till long after the Indians had ceased to regard it, and that they have not suffered as much from the Sioux since they went to the gold region as they previously did while living on the border. The Indians under Sitting Bull were recently attacked by General Miles' command and scattered over the Yellow Stone in the direction of Fort Peck. At the latter post a large number of lodges, and are now under the charge of Gen. Hazen. Gen. Miles thinks that all the tribes will come in and surrender before the winter is over.

The gold production of Montana since the discovery of the mines in 1863, is calculated by an authority in that territory at \$110,000,000.

A bill in equity has been filed in the U. S. Circuit Court at Philadelphia, in which the Centennial Board of Finance, setting forth that the surplus in the Centennial Treasury of \$2,000,000, and asking the court to decide how this sum shall be disposed of, the Board agreeing to abide by the decision. It is claimed on one hand that the \$1,500,000 advanced by the Government should be repaid in full, and on the other, that the United States should be paid a pro rata dividend in common with the stock-holders.

Considering the disputed result of the late Presidential election in three of the States, and the questions which have arisen in regard to one or more of the electors, the two Houses of Congress have appointed committees in each State, to confer with each other and report a plan to decide finally any questions which may exist in connection to the vote.

In South Carolina, where the two rival parties are of nearly equal strength, each has claimed the right of governing the State, and the attempt has been made to publish two governments, one with Chamberlain, Republican, as Governor, and the other under Wade Hampton. On the 22d the Senate and rival House of the Legislature adjourned *sine die*, leaving the Chamberlain and Hampton governments to act on their own responsibility.

The streets of Virginia City, Nevada, seem to be paved with gold and silver. Assays were recently made of dirt clinging to the wheels of a buggy driven in front of a bank in that city, and it yielded \$118.58 to the ton.

The annual report of the Commissioners of Immigration will show that the number of arrivals at New York 125,045 in 1875. The number was 109,552, as compared with 107,000 in 1874. The number of arrivals from the 15 leading countries in Europe in 1875 and 1876, respectively, were as follows: In 1875, Great Britain and Ireland, 41,636; German Empire, 25,589; Russia, 21,253—total from the three countries 73,448. In 1876, Great Britain and Ireland, 20,923; German Empire, 20,272; Russia, 5,379—total from the three countries 46,574.

The Department of Agriculture estimates the crop of

Indian corn at 1,295,000,000 bushels, which is two per cent. less than that of 1875. The total wheat crop 1876 is estimated at 245,000,000 bushels.

According to the annual report of the Commission of Education, there are 8,756,659 pupils enrolled in public schools of the States and Territories, out of 1,007,522 children entitled by their several laws to instruction.

The legal tender and national bank circulation of the United States has been contracted \$45,234,361 sin 6th mo. 30th, 1874. The contraction amounts to about 61 per cent. of the whole circulation.

The Markets.—The following were the quotations on the 23d inst.: Philadelphia.—American gold, 107. 107½. U. S. sixes, 118½, registered, 114; do, coupon 117; do, 1867, registered, 113½; coupons, 116½; do, 10-40 5 per cents, 113½; 4½ per cents, 108½. Cotton 12½ a 12½ cents, for uplands and New Orleans. Flour \$1.50 a \$1.90. Pennsylvania red wheat, \$1.44 a \$1.44 ½; do, 1845 a \$1.47; western white, \$1.47 a \$1.50. Penna. rye, 78 cts. Yellow corn, 60 a 61 cts.; do, western, 51 a 56 cts. Beef cattle sold from 4 cts. to 6 cts. per lb. gross, and sheep at 3 a 6 cts. per lb. gross. Hogs, \$7.75 a \$8.25 per 100 lb. live. New York.—Superfine flour, \$5.25 a \$5.50; State extra, \$5.60 a \$5.75; finer brands, \$6 a \$10.00; Amber winter wheat, \$1.15 a \$1.50; No. 1. do, \$1.10 a \$1.45; No. 2 red winter, \$1.45; No. 3 Milwaukee super, \$1.33; No. 2. do, \$1.4 Canada barley, \$1.12; State, 75 cts. Oats, 41 a 50 cts. Rye, 88 a 90 cts. Yellow corn, 61 a 63 cts. Carolina rice, 51 a 7 cts.; Louisiana, 41 a 6 cts. Chicago.—No. 2 spring wheat, \$1.21½; No. 3 do, \$1.10½. Corn, 41 a 42 cts. Oats, 31 a 32 cts. Pork, \$10.00 a 100 lbs. Cincinnati.—Red wheat, \$1.30 a \$1.40. Corn, 42 a 43 cts. Oats, 30 a 35 cts. Rye, 80 cts. Lard, 10½ a 10½ cts. Cincinnati Extra flour, \$4.25 a \$4.75; family, \$5 a \$5.50; sin extra flour, \$6 a \$7.50. White oats, 40 cts.; mixed, 38 cts.

TEACHER WANTED.

A suitably qualified teacher for the Adelphi Colored School (Girls' department). Address or apply, with reference, to Isaac Wood, 524 South Second Street, or Samuel Baker, corner Queen and Knox streets Germantown.

FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSIAH H. WORTHINGTON.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at Wilmington, Delaware, on the 15th of Ninth month, 1876, SARAH B. DOWNING, in the 79th year of her age, a member of Wilmington Monthly Meeting.

at Wilmington, Delaware, on the 15th of Fourth month, 1876, GEORGE S., son of Mary and the late Samuel S. Downing, in the 20th year of his age, a member of Wilmington Monthly Meeting.

on the 4th of Twelfth month, 1876, RICHARD W. BACON, in the 66th year of his age, a beloved member of the Monthly Meeting of Friends of Philadelphia for the Northern District. Possessed of a watchful and humble spirit, this dear Friend was earnestly concerned with the health, and the great work of salvation among the members of a crucified Saviour; frequently expressing his desire to "do nothing whatever to offend his Heavenly Father." In his last illness he was favored with calmness and resignation, being sustained through much suffering by the Everlasting Arms, which he felt to "runl about him." Thus, in humble reliance on the mercy of a crucified Saviour, his purified spirit has, we humbly trust, been admitted into a mansion of eternal rest and peace.

at their residence at Coaly Creek, Iowa, on the 13th of Twelfth mo. 1876, Lydia, wife of Isaac Sharp in the 69th year of her age, a member of Coak Creek Monthly Meeting.

on the 25th ult., at the premises of his brother, in Cayuga Co., N. Y., HENSON LAMMON, aged nearly sixty-three years, a member of New Garden Monthly Meeting, Penna.

For "The Friend,"

Establishment of Slavery in this Country.
The late Vice President Henry Wilson's able oration on the "Rise and Fall of the Slave Power in America," has, in its first chapter, condensed and lucid account of the beginning and growth of slavery in this land, which comprehend many of our readers may peruse with interest and instruction. II. W. W. in "Holy Scripture declares that man was created to eat his bread in the sweat of his face. History and tradition teach that the diligent, the crafty, and the strong, have ever tried to evade this Divine decree, by filching their bread from the constrained and untiring toil of others. From inborn indolence, joined with avarice, pride, and lust of power, has sprung slavery in all its protean forms, from the mildest type of servitude to harsh and hapless condition of absolute hereditary bondage. Thus have grown flourished caste and privilege, those deceptions of the rights and well being of mankind, which can exist only by despoiling the many for the benefit of the few.

American slavery reduced man, created in the Divine image, to property. It converted genius endowed with conscience, reason, affections, sympathies, and hopes, into a chattel, and a free moral agent, with rational attributes and immortal aspirations, to merchandise. It made him a beast of burden in the mill of toil, an outcast in social life, a cipher in the courts of law, and a pariah in the household. To claim himself, or to use himself for his own benefit, or the benefit of wife or child, was deemed a crime. His master could dispose of his person at will, and of every faculty acquired by his enforced and unrequited

his complete subversion of the natural rights of millions, by which they were denuded, taken, reputed and adjudged in the law to be chattels personal to all intents, conditions, and purposes whatsoever, constituted a system antagonistic to the doctrines of reason, and the monuments of conscience, developed and gratified the most intense lust of personal pride, a love of class distinctions, and the lust of dominion. Hence grew a commanding power, ever sensitive, ever proscriptive, dominating and aggressive, which was recognized and fitly characterized as the Slave Power.

his slavery and this Slave Power, in their

economical, social, moral, ecclesiastical, and political relations to the people and to the government, demoralizing the one and distracting the councils of the other, made up the vital issues of that 'irrepressible conflict' which finally culminated in a civil war that startled the nations by its suddenness, fierceness and gigantic proportions.

Half a century before the discovery of America, Portuguese and Spanish navigators had introduced African slaves into Europe. The English and other commercial nations followed their example. When, therefore, the Western Continent was opened to colonization and settlement, these nations were prepared to introduce slaves, and to prosecute the African slave traffic with vigor and on a large scale.

In the month of August, 1620, a Dutch ship entered James River with twenty African slaves. They were purchased by the colonists, and they and their offspring were held in perpetual servitude. Thus, at Jamestown, thirteen years from the settlement of the colony of Virginia, four months before the feet of the Pilgrims had touched the New World, began that system in the British continental colonies, which under the fostering care of England, overspread the land. Is it not a singular and mysterious providence that the same year which bore the 'Mayflower' to the New World, with its precious freight of learning, piety and Christian civilization, should have also brought this ill-starred vessel, with its burden of wretchedness and woe, bearing the seeds of a system destined, after a struggle of two hundred and forty years for development, expansion, and dominion, to light the fires of civil war, and perish in the flames its own hand had kindled?

During the years from 1620 to the opening of the American revolution, the friends of the slave trade and of slavery controlled the government and dictated the policy of England. Her kings and queens, lords and commons, judges and attorney-generals, gave to the African slave traffic their unflinching support. Her merchants and manufacturers clamored for its protection and extension. Her coffers were filled with gold bedewed with tears and stained with blood. 'For more than a century,' in the words of Horace Mann, 'did the madness of this traffic rage. During all those years the clock of eternity never counted out a minute that did not witness the cruel death, by treachery or violence, of some father or mother of Africa.'

Under the encouragement of British legislation the fostering smile of royalty, more than three hundred thousand African bondmen were imported into the thirteen British colonies. The efforts of colonial legislation—whether dictated by humanity, interest, or fear—to check this traffic, were defeated by the persistent policy of the British government. 'Great Britain,' in the words of Bancroft, 'steadily rejecting every colonial re-

striction on the slave trade, instructed the governors, on pain of removal, not to give even a temporary assent to such laws.' The planters of Virginia, alarmed at the rapid increase of slaves, in the year 1726 imposed a tax to check their importation, but 'the interfering interest of the African company obtained the repeal of that law.' South Carolina attempted restrictions upon the importation of slaves as late as 1769 for which she received the rebuke of the British authorities. The legislature of Pennsylvania, as early as 1712, passed an act to prevent the increase of slaves; but that act was annulled by the Crown. The legislature of Massachusetts, in 1771, and again in 1774, adopted measures for the abolition of the slave trade; but they failed to receive the approval of the colonial governors. Queen Anne, who had reserved for herself one-quarter of the stock of the Royal African Company, that gigantic monopolist of the slave trade, charged it to furnish full supplies of slaves to the colonies of New York and New Jersey, and instructed the governors of those colonies to give due encouragement to that company; and it was the testimony of Madison, that the British government constantly checked the attempts of his native State to put a stop to the traffic. Up to the hour of American Independence, the government of England steadily resisted colonial restrictions on the slave trade, and persisted in forcing this traffic, so gainful to her commercial and manufacturing interests, upon her colonies, 'which,' in the words of the Earl of Dartmouth in 1775, 'were not allowed to check or discourage in any degree a traffic so beneficial to the nation.' British avarice planted slavery in America; British legislation sanctioned and maintained it; British statesmen sustained and guarded it.

But the British government and British merchants were not alone responsible for the spread of slavery in the colonies. The inhabitants themselves were generally only too willing to profit by such enforced and unpaid toil. North Carolina was settled by colonies from Virginia, who carried slaves with them. Governor Sir John Yeamans, brought slaves with him from Barbadoes into South Carolina, and planted slavery there. Georgia, however, was settled by colonies under the lead of James Oglethorpe, who held slavery to be a horrid crime against the Gospel, as well as against the laws of England, and slavery was there forbidden. Some of the colonists, however, soon began to complain that they were prohibited the use of slave labor. The laws were evaded; slaves from South Carolina were hired, at first for short periods, and afterwards for life. Some slave ships sailed from Savannah for the coast of Africa, and slaves were introduced with the connivance of the British government, and Georgia became a slave State. Slavery also readily found its way into the colonies of Maryland, Delaware, and Pennsylvania. The company interested in

the colonization of New Jersey, offered a land bounty of seventy-five acres for every slave introduced there. And the Royal African Company was enjoined by Queen Anne to have a constant and sufficient supply of merchantable negroes for this colony. The Dutch West India Company promised to supply the Dutch settlers of New York with slaves,—a promise afterwards renewed. They were then allowed to purchase slaves of others, and finally to engage in the foreign traffic itself. Nor did the rugged soil, or the still more rugged climate, of New England save its colonies from the introduction of the system even there. Slavery, however, grew slowly. In 1680 it was stated by Governor Bradstreet that there were only about one hundred and twenty African slaves in the colony of Massachusetts. At the end of a hundred years from the settlement of Plymouth there were estimated to be only about two thousand.

During the half century preceding the revolution, slavery increased with rapidity, especially in the southern colonies. There the production of tobacco, indigo, and rice, became of great importance to the mother country, and slavery felt its stimulating influence. There slaves toiled generally on large plantations, often under merciless overseers and the menace of the lash. In the colonies north of Mason and Dixon's line they were either employed in the families of the wealthy or belonged to small farmers who labored with their own servants, and usually received them into their families. From this circumstance, and from the fact that they were accorded privileges under the laws, and in the usages and customs of society, their condition was rendered more tolerable, and their character was less degraded than were the character and condition of southern slaves."

Thomas Story.

(Continued from page 148.)

"On the afternoon of the 21st day of the Eleventh month, 1689, silence was commanded in me, though not by me, in which it was given me to remain till evening; and then that Scripture, John xiii. 10, was brought to my remembrance; which I began to write, and proceeded, as things opened in my mind, and in manner following: 'Jesus saith to him, he that is washed needeth not save to wash his feet, but is clean every whit. The washing of the feet signifies the cleansing of the ways; and those who are washed in the laver of regeneration, will walk in clean paths, and bring forth fruit according to the nature of the Tree of Life. Such will walk in faith, love, obedience, peace, holiness, righteousness, judgment, mercy and truth. And whosoever saith he is of the Father, and hath not charity, he is a liar, and the living Word ruleth not in him; for whosoever hath known the Word, and abideth therein, hath the Father, because the word of Truth beareth witness of the Father; and whosoever is born of God will keep his commandments. Hear, O ye mountains, and give ear, O ye cedars of Lebanon, the Lord, the Light of Jerusalem, the life of saints, hath put a song of praise in my mouth, and caused me to rejoice in the valley of Jehoshaphat. I was in the desert, and he led me forth by the power of his right hand; I was fallen, and he stretched out his arm, and set me upright; yea, I was dead, and, behold, he raised me from the grave. I was also an

hungered, and he has fed me with the bread of his everlasting covenant. I weakly fainted in the way; but the King of the holy mountain revived me by the word of his promise. He has laid my foundations with beauty, with precious stones of divers colors; and the superstructure is all glory. I was silent before the Lord as a child not yet weaned; he put words in my mouth, and I sang forth his praise with an audible voice. I called unto God out of the great deep; he put on bowels of mercy, and had compassion on me, because his love was infinite, and his power without measure. He called for my life and I offered it at his footstool; but he gave it me as a prey with unspeakable addition. He called for my will, and I resigned it at his call; but he returned me his own in token of his love. He called for the world, and I laid it at his feet, with the crowns thereof; I withheld them not at the beckoning of his hand. But mark the benefit of exchange, for he gave me, instead of earth, a kingdom of eternal peace; and in lieu of the crowns of vanity, a crown of glory.

A deep consideration entered into my mind concerning the states of many persons in the national way of worship, as also among the dissenters from it; some of whose preachers I had occasionally heard, particularly Dr. Richard Gilpin, of Sealeby castle, an able physician and an ancient celebrated preacher among the Presbyterians, and I had observed many others who seemed to have sincerity and good intentions in their respective modes of worship. Hence a question arose whether it might not be through my own fault for want of the true knowledge of God in myself heretofore, that I did not enjoy his presence among them, as I had done, through his grace, since I had been visited by the Lord and drawn into retirement by the comforts of his secret presence? Upon which, I determined to go again and see whether the good presence of the Lord would be manifested in me there as alone in my retirements. The place I went to was that called St. Cuthberts, in the city of Carlisle; there being usually prayers and a sermon there in the afternoon of the First-days,—but not with that pomp, noise and show, as at the cathedral, and therefore I rather chose it. Being seated there, as I had been often, and my mind retired inward, to wait upon the Lord, as he himself had taught me, the Lord would not own that worship by his sensible presence, though in himself omnipresent, nor me in that place; but my mind became filled with darkness, and overwhelmed with trouble, to so great a degree, that I could hardly stay till the time was over. But lest I should do a thing which might be looked upon as indecent, I continued to the end, and returning to my chamber in trouble went not among any of them any more. Though I thus declined all outward worship, or that which was called so, determining to follow the Lord wheresoever it might please Him to lead me; yet I found universal love, good will, and compassion in my mind to all sorts of people, whether Protestants of different denominations, Romans, Jews, Turks, or heathens. But I observed their several religions, or what they accounted so, every man for himself, to be mostly the effect of education, tradition or chance. For he who is born and educated among the Protestants of any sect respectively, is such: he who is born among the Romans

is Roman; and so of all the rest, till by accident or interest, they change from form to form; or sometimes, though more rarely, through the inward convictions of the Spirit of God, they obtain a right understanding, and worship him in truth. Therefore I stood still and waited for the further dealings of the Lord, and the evidence of his presence what to do or where to abide; though the Protestants in general, especially the national church, were still nearer to me than any other sect. Thus the world in general appearing to me dead with respect to the knowledge of God, notwithstanding the truth of some notions they held in relation to matters of fact and literal interpretation, and in walking statutes, I did not then see that the Lord God had any collective body of people at that day, who truly worshipped him, according to his own institution; or that any one on earth knew some things which were true and living God had been pleased, of his own free grace, and which I could neither see or think of, to communicate unto me; though I found in due time, I had been in this point mistaken, as the prophet of old, who thought he had been alone, and all Israel departed from the Lord.

As the life of the Son of God prevailed in me, I became more and more innocent, humble, loving, and charitable to the poor; whom I gave money according to my ability and without ostentation or expectation of reward; one instance of which I think proper to relate, it being attended with some particular circumstances.

At the time king William the 3rd was sitting in Ireland, some persons and families, being tired from the inconveniences and harshness of the war, came into England; and among others an Independent teacher, and with him a youth, his son, who being in want request charity; and coming to my father's house Carlisle, where I then was, I gave him his reward; which, being more than he expected or had received, as he said, from any other person in town, he took occasion thence to enter into discourse concerning some points of religion, and civilly asked me, what I did of worship I attended. I replied, I had formerly frequented the national worship, according to my education; but then, and some time before, had declined it, as also other outward forms, keeping retired in my chamber on the usual days appointed for that purpose. And when he heard this, he asked if his company the next Lord's day, as called it, might be acceptable, for the national worship was not agreeable to him. I gave liberty, and he and his son came according to my chamber, where I was sitting alone in silence waiting upon the Lord.

After a civil reception and a short pause in silence, he began to magnify the great presence of God in re-establishing and advancing that people, meaning the Independents or Presbyterians, who had been so much hated, persecuted and suppressed, now to be made the chief instruments of deliverance, restoration and reformation to the right way to the Lord and to his own glory. As he spoke I observed he himself was not upon the true foundation, nor acquainted with the mind of the Lord on that account; but spoke from his own imagination and partiality to his own sect, as he and they desired it should have been; his mind natural and carnal, and his views outward, toward the power and d

inion of this world, as the Jews were at the time of the appearance of Christ among them; and as soon as he came to a period, finding my mind filled with the sweetness and meekness of divine truth, I replied: "The divine providence is indeed great over the children of men, and apparently over this nation and her dependents at this day; and the necessity of a right and thorough reformation is very great, and in the proper time and way of the mighty, will be brought to pass. But it will be neither by the means nor instruments which are in your view; for all the contenders, one against another, by destructive force, are of an esprit divided against itself, under different names and views, in which the strongest will vanquish themselves and their own way; but not by such means, reform either themselves or others, as they ought to do in the sight of God, who does not approve or countenance violence, bloodshed, and unrighteousness in one sect, and condemn the same things in another; and will therefore bring that reformation, by instruments of a different kind, and by another means and way; it is written, 'Not by might, nor by power; but by my spirit, saith the Lord.' Upon this a stranger was much broken in spirit, and a tear ran down his beard, and dropped on his knee, as he sat by me; and after that he filled with love, the same which had come from my spirit, he embraced me in his arms, rejoicing that he had met me, but said no more on any religious subject. Soon after he departed and I saw him no more."

(To be continued.)

The Codfish.

A. St. John (N. F.), correspondent of the *Central Gazette* gives the following account of the processes used in preparing the codfish market: The codfish, after being caught, is gutted and washed, are spread to dry on the "stake," which is formed of spruce boughs supported by a frame work resting on upright poles. Here the cod are spread out to bleach and exposure to sun and air, and during this process require constant attention. At night, on the approach of rain, they are made up into little round heaps, with the skin outward, which state they look very much like small crocks. When the "bloom," or whitish appearance, which for the time they assume, has melted on the dried fish, the process is finished, and they are then ready for storing, being conveyed to the premises of the exporting merchant, they are first "cuffed," or assorted, into different kinds, known as "merchantable," "Madeira," "West India," and "Dun," or broken fish. The first is of the best quality; the second a grade lower; the third is a grade lower still; and the fourth, which is incapable of keeping, is used at home. The cod sent to hot countries is packed by new paper into small casks called "drums," at which goes to the Mediterranean is usually exported in bulk. We ship large quantities of dried cod to Brazil, and there is hardly an inhabited corner of that vast empire where a Newfoundland cod is not to be found, being carried on the backs of mules from the coast into the most distant provinces of the interior. The negroes of the West Indies welcome it as a grateful addition to their vegetable diet. To all parts of the Mediterranean it finds its way—Italians, Greeks and Spaniards equally relishing the produce of our harvest. The Spaniards and Portuguese

are our best customers. In Great Britain and the United States we have thousands of customers. In the warmer regions of the earth, however, the people seem to have a special liking for the dried and salted cod, and to them it is an almost indispensable article of food. The more extensively Brazil, Spain and Italy are opened up by railways and other means of transit, the greater becomes the demand for cod, as the cost is lessened. The advancing price of fresh meats of all kinds in various countries is rapidly increasing the demand for cod, and has considerably enhanced its value. Twelve or fourteen years ago the average price of fish was from twelve to fifteen shillings per quintal. It is now exactly double that price.

From the "Guiding Hand."

A Stream in the Desert.

I knew a man of God who earned his bread by the sweat of his brow. It was impossible to observe him and not feel that he was separated from those around him by the indwelling of the Holy Ghost. He told me in deep humility that he could not "speak for the Lord," by which I discovered that he meant that he could not accost strangers on the subject of their personal salvation. If he could not speak to man, he could to God; and never shall I forget the first time I heard his voice raised in supplication and prayer at a little wayside gathering. I knew not from whom it proceeded, but I felt whoever it was, that soul had power with God.

He went to live in a village where none cared for anything beyond this present life; he was a stranger, indeed, among them. Early and late he labored in the fields, but the Lord of the whole earth had ordained a blessing for this dark hamlet when He sent his servant there, and a river of the water of life was to flow through this solitary man, unseen by all save the One that keepeth Israel, and neither slumbers nor sleeps.

Yet the servant of God was not required for this ministry to forsake his calling, but to follow the Lord in it. He lived in a poor, thatched cottage, on the outskirts of the village, and when his work was done, seated by the low casement of his room in summer time, he rested his weary heart in close communion with his Heavenly Friend. Dispirited by intercourse with the profane and the mocker, he refreshed himself with new contemplation of the covenant of grace, or pondered over the promises which he was every day proving for himself were priceless treasures for constant use.

As he communed with God alone, and poured forth his soul in prayer, a woman of ill character passed by the cottage door; the sound of the stranger's voice arrested her steps, and she lingered by the casement. She listened. Never before had she heard a soul speaking to the God of its life in such glad thanksgiving for redemption through the blood of the Crucified, or imagined such holy boldness in approaching a mercy-seat by her unought; it seemed a new language to her ears. The prayer ceased. The listener, astonished and perplexed, went on her way, and the solitary man, the charge of angels, lay down to sleep. None but God saw that tiny rill of life that followed a sinner's steps, whispering: "Come! and let him that heareth say, Come! and let him that is athirst come; and whosoever will, let him take the water of life freely."

Another day passed. The woman took up her station in the twilight to listen, and the freedom from condemnation in which the stranger rejoiced seemed to bind her in chains of misery unfelt before. Her occupation was a degrading one. She possessed a voice of remarkable power and sweetness; her husband frequented the public-houses in the neighborhood, and she accompanied him, for he procured from the landlord or his guests, the beer or spirits that he thirsted for, with the price of his wife's company and songs!

Day by day the singer marked the will of God, to see if his life contradicted in any way his desires after holiness, for his prayers set a sign upon him, and she watched for his halting week after week, and watched in vain. While in many a conflict and in humble brokenness of spirit this lonely man seemed to himself a cumberer of the ground, as far as bringing any honor to God was concerned, yet through him flowed the living stream which should "turn the wilderness into a standing water, and the dry ground into water-springs."

The servant of the Lord slept, unconscious of his ministry, little dreaming that the words he had spoken to the Lord in the silence of that summer evening were disturbing the midnight orgies of sinners to whom he had never spoken and who had never heard of his existence. The woman's heart was heavy, and she could not sing! She turned away in bitterness of spirit from the scene of degradation in which she had hitherto been contented to dwell. The anger of her husband raged against her; his gains were gone, and all the means of procuring his evening's wild revelry were over. His persecution added to the poor creature's distress, but it was as nothing in comparison to the weight of misery on her soul. Heavier and heavier pressed the burden of her sins; the way of escape she knew not; despair took possession of her soul. Satan now thought the prey was his own; he whispered that in "death their was no remembrance," but the enemy added not, "and after death the judgment."

The heart-stricken woman saw one way only, and she determined to rid herself of a life become intolerable to her. One morning, when she thought herself secure from interruption, she went to a neighboring stable, and, tying a noose in a rope, fastened it securely to a beam in the roof, and prepared to end an existence too miserable to be borne. But, as her foot was on the edge of the loft from which she premeditated casting herself down, the praise and thanksgiving of the stranger for redemption through the precious blood of Jesus came flowing into her mind. She knelt; she repeated her prayer again and again; such sweetness came with the words, "Redeemed! pardoned! through the precious blood of God's dear Son!" Nor did she pause; nay, she could not. As if the flood-gates of her tears had opened the way for prayer, it poured forth in a wondrous tide. The sinner wept at the feet of Jesus! The prey was taken from the mighty. Hour after hour went by; she heeded it not, and daylight had fallen into evening before her new-born joy allowed her to perceive that the day was spent.

When the servant of the Lord returned to his solitary room, it was to find a rejoicing child of the faith awaiting him, the fruit of those days that seemed of no account, save that he walked in fellowship with Jesus. He

had lived near the fountain; the stream that flowed in refreshment through his own soul, had given life to the weary one without.

Year after year, from many a prayer-meeting, arose the voice of the rescued minstrel, clear and strong in strains of praise to the Lord and Giver of life—And not alone; her husband was by her side, the first to give heed to her words, and to believe her witness to the Lord's long-suffering mercy to himself. Heaven alone can declare the harvest of that lonely man, who walked with God.

The faithful Christian is mighty in unconscious power. His soul, as it gravitates towards God, impresses those with whom he may have to do. The silent life, the godly walk, the steadfast faith, the single-hearted service of a Christian man, is more potent than the strife and babble of many a noisy tongue, that only proclaims the emptiness of the heart from which it speaks.

And the Christian can be in no circumstances however untoward, no position however secluded, where God cannot use him for his glory. The circle of divine possibilities reaches far beyond the stretch of human perceptions. Christ "must needs go through Samaria," in his journey to Jerusalem, and though the Jews might disapprove the act, yet it was a blessed necessity that led the Son of God to sit faint and weary by the side of Jacob's well in the vale of Sychar, for thus the poor water-carrying woman heard the tidings of the well of water springing up into everlasting life, and thus many of the Samaritans believed.

So we in circumstances most unpromising must remember that there is a "need be" for all our "heaviness through manifold temptation;" that if not useful to ourselves our trials may be profitable to those around us, and we may still be unconscious instruments of blessing to those about us when in our own hearts we feel ourselves but embers of the ground, or weary wanderers in a dark and desert land. In all the desert's dreariness, God yet will lead us by his cloudy pillar, and guide us by his guiding hand.

A Wonderful Meteor.—A Jacksonville, Ill., despatch states that on Thursday evening a beautiful meteoric display was witnessed there about half-past eight o'clock. The meteor first came in view away to the west, and about 30 degrees above the horizon. It passed seemingly but a short distance north of the city, and was finally lost to sight away to the eastward. When first seen it seemed a blazing, burning ball nearly as large as the full moon, and appeared to be moving directly towards this city. As it swept along with its fiery tail, some 20 degrees in length, and some 10 to 20 blazing fragments following it, it presented a sight of surpassing magnificence and beauty. When this great ball of fire reached a point considerably east of north it burst into 10 or 12 fragments not unlike in appearance the bursting of a rocket, and these fragments seemed to finally disappear in a bank of clouds which hung near the eastern horizon. The meteor was of such surpassing brilliancy that the whole earth and heavens were lighted up so brightly that persons could be distinguished at a distance in the streets almost as plainly as in daylight. The light was such that it gave a subdued green coloring to the earth, trees, buildings, and every other object. From the time the meteor was

first seen in the west, till lost sight of in the east, full twenty seconds must have elapsed. A singular feature of the phenomenon was that, instead of passing in its flight earthward, its path from west to east seemed in an exact horizontal direction. Nothing of the kind of such grandeur, brilliancy and beauty was ever before witnessed here.

It was also seen at Burlington, Iowa, St. Louis, Mo., Lawrence, Kansas, and at several places in Indiana.—*Philadelphia Inquirer* of 12th mo. 25th, 1876.

THANKFUL REMEMBRANCES.

BY J. BOSAR.

I look along the past, and gather themes
For praise to Thee my ever-gracious God.
It is a part of mercy, and it teems
With goodness at each step along the road.

Not without gladness and prosperity,
But always goodness from thy patient hand;
Always the love that, even in saddest day,
Traced its clear prints upon time's silent sand.

I thank Thee for a holy ancestry;
I bless Thee for a godly parentage;
For seeds of truth, and light and purity,
Sown in this heart from childhood's earliest age.

For word and church and watchful ministry,—
The beacon and the tutor and the guide;
For the parental hand and lip and eye,
That kept me far from snares on every side.

I thank Thee for a true and noble creed,
For wisdom, poetry, and gentle song;
For the bright flower, and for the wayside weed,
The friendship of the kind and brave and strong.

I thank the love that kept my life from sin,
Even when my heart was far from God and truth;
That gave me for a lifetime's heritage,
The purities of unpolluted youth;

That kept my eyes from gazing on the wrong,
And taught them all the sweetness of the right;
That made me in my quiet hours to long
To get beyond this darkness into light.

That showed me that the world was not a rest,
'E'en when it looked the loveliest, and its face
Shone with the gladness of the glowing East,
When it foretells a noon of cloudlessness.

That told me that all pomp was but a name,
That gold and silver were not life and joy,
That what to-day be-towed of love and fame,
To-morrow's breath would wither and destroy.

That kept me from the riotous and rude,
The oath, the lust, the revel, the lewd song;
That drew my foot-steps to the wise and good,
And bid me shun the pleasure-loving throng.

That made me feel, even amid scenes most bright,
At times a strange dark void and vacancy,
A longing for the real and infinite,
For something that would fill and satisfy.

For suns that would not set, for stars and skies
'O'er which no sorrow-laden cloud would sweep,
Beauty that lives, and love that never dies,
A deeper and diviner fellowship.

If earthly beauty, said I, be so fair,
How fairer far the beautiful above,
If creature love be so exceeding dear,
How dearer far the uncreated love!

Oh birth-place of the loveliness and light,
That shine so sweetly over earth and sea!
How excellent must Thou, the Infinite
Eternal Source of all that beauty be!

Glanville and his Brother.—The father of that eminent lawyer, Sergeant Glanville, who lived in the days of Charles II., had a good estate, which he intended to settle on his eldest son; but he proving vicious, and affording no hope of reformation, he devolved

it upon the sergeant, who was his second son. Upon his father's death, the eldest son, finding that what he had hitherto considered the mere threat of his father was really to become greatly dejected, and, in a short period, his character underwent an entire change. His brother, observing this, invited him, with a party of his friends, to a feast, and after several other dishes had been moved, he ordered one, covered up, to be before his brother, which, on being examined, was found to contain the writings of the testator. The sergeant then told him that he had now done what he was sure their father would have done had he lived to witness the happy change they all saw; and that he therefore conveyed to him the whole property.

Random Notes of Travel.

(Continued from page 155.)

Sixth month 12th, 187.

Liverpool presented very much the appearance I expected, a busy, bustling, smoky city, many of the buildings lofty and spacious, dingy and discolored, even when quite new. We visited the famous docks, where ships from all nations lie side by side in friendly security; their tall, naked masts reminding of a pine forest denuded of its verdure. This noble port is a fitting entrance-door to a mighty nation. Crossed to Egremont part of Birkenhead, where we spent several days very pleasantly with friends. In the afternoon took a drive of some six miles in the country, and walked through some beautiful grounds, where we saw a magnificent display of rhododendrons on a sloping hill-side—a very cataract of white and crimson blossoms. Glossy clumps of Portuguese laurels were intermingled with tall trees, covered with ivy, and sunny knolls presented themselves here and there. The freshness of vegetation, the luxuriant growth of many plants in the damp air, not chilling, but soft and warm, the smooth velvet-like turf of a sizzling green all told of England, and I began to realize that we really stood upon her soil. A mode writer observes: "If a man wishes to see England he has so long desired to see—England of his dreams—let him go to Chester!" And certainly he may travel far at long ere he will find such another quaint city.

To an American, the first walled city very unique, and interesting, and here is a city whose walls are perfect and entire, constructed of hewn stone, and twenty feet in height. Panning at the Phoenix Tower, or of several which remain on the walls, I read that "King Charles stood upon this tower Sept. 24, 1645, and saw his army defeated at Rowton Moor." During the civil war Chester was loyal, sustaining a siege of five months in the same year. More than two thousand persons died during the siege. War is a great evil at any time, but civil war is but a chapter of horrors.

The castle of Chester retains but little of its original form, having been replaced by barracks, and stands on an elevated rock overlooking the Dee. But the most curious feature of the two main streets are the "Rows," continuous covered gallery running along the front of the second story of the houses. Here the people pass along as freely as in the street of other towns, and are completely protected from the weather. The best shops open o-

is "upstairs" street, those underneath being a level with the roadway. The old houses are also of antique patterns, with their fronts of timber, and carved gables. The wooden skeleton of the house is filled in with plastered all, a style of building I had never before seen. Chester has borne different names, as Roman, Saxon or Dane was in the ascendancy. Its later days its present name has been carried to the New World, and bestowed on a village on the banks of the Delaware, by grateful hearts which often turned longingly, in doubt, to their beautiful native city on the banks of the Dee. Penn. on his arrival at the place, changed the name of that place as usually related by Clarkson: "This was a memorable event (alluding to his calling an assembly there) and to be distinguished by some marked circumstance. He determined therefore to change the name of the place. Turning around to his friend Pearson, one of his own Society, who had accompanied him in the ship *Welcome*, he said, 'Providence has brought us here safe, tho' hast been the communion of my perils; what wilt thou that I should call this place?' Pearson replied 'Chester,' in remembrance of the town from whence he came. William Penn rejoined that should be called Chester, and that when he divided the land into counties he would recall it of them by the same name also."—*Hick's Annals of Pennsylvania*.

Drove out to Eaton Hall, the palace of the Duke of Westminster, to find it undergoing repairs, and that the interior could not be seen. We were conducted through the conservatories and fruit gardens, which are very extensive. The walls of the latter are very high, having the branches of the trees joined against them like so many masts. There are cherries bluish and ripen, and cover the walls with beauty; peaches steal the gold from the sunshine, and grapes grow liquid in the summer showers. This, it will be remembered, is about 53° of north latitude, and is high as Hudson Bay, or 730 miles north of Philadelphia.

In the afternoon entered North Wales, riding by the "Sands of Dee" for many miles, and passing the old castle of Flint, by night, and up the river Conway until we reached our resting place for the night, and finding day, Betws-y-coed, loveliest of Welsh sites, whose name permitted us no longer to doubt that we were really in the midst of that romantic land. The triumph of civilized art over ignorance and barbarism was exemplified in the striking change that has come over the old Castle of Flint, which, in the good old times, oft resounded with the cry of arms, and sheltered its bands of armed men, but which is now a busy hive where hundreds of industrious artisans are occupied in converting the salt of the Cheshire mines into soda-bath, that enters so largely into numerous materials used in the arts, as to have become the most important factor in modern civilization.

"Ring out the old, ring in the new,

Ring out the false, ring in the true."

Our inn was a charming little place, not far from the village, and kept by two young women and their father. Judging by the bun and tributary verses which graced the walls, they were very popular with the numerous visitors frequenting the house. Cleanliness had attained perfection beneath their roof; the shaded light, admitted through da-

mask hangings, was very grateful in connection with the quiet and order of the dwelling. The neighborhood promised delightful walks that afternoon, but alas! for our expectations, a shower set in and the whole country secured already like a saturated sponge, until one had doubts whether the ground could contain any more water; but the streams leap from the hillsides and glide away from the surface in old, well-worn channels, and the whole place is evidently accustomed to this state of things, as testified by the intense greenness of the landscape. But after dinner the mist cleared away for a time, and our plan was carried out, by taking the right hand road from the inn, and crossing the rushing Conway by a fine bridge. The water was the color of liquid amber, a clear yellowish brown, reminding me of the cedar water among the swamps of New Jersey, with this difference that here the river ran upon a rocky bed, and leaped over and curled around the great boulders which interrupted its shallow current, until the whole mass of water was converted into foam and spray.

Our road gradually ascending the hill before us, while a high stone wall hid the river from our view. Occasionally we passed a gateway in the wall, and caught glimpses of lovely winding carriage roads leading to some gentleman's seat. Severe penalties, including prospective adventures with cross dogs, prevented the public from trespassing on these guarded limits.

However, ample compensation remained to the wayfarer on the beautiful road, and still lovelier paths which were accessible, leading into the secret recesses of the hills beyond. Here in Wales, the beauty and luxuriance of the ivy seem to culminate. Half the trees on the hill side were covered with it, and every stone wall almost hidden beneath its pointed leaves. From the brown mould at its roots spring tall pendulous foxgloves, with open mouth and spotted throat, graceful and elegant, bending over the small daisies beneath them with a protecting air. Wild roses twined themselves among the hawthorn hedges, their pale, creamy flowers, forming a vivid contrast with the background of scolloped green leaves. But foremost in beauty were the tiny waterfalls leaping from rock to rock, beginning at the very summit of the mountains until they reach the river at their feet. Dotted here and there were curious old stone cottages and out-buildings—old enough apparently to have sheltered their inmates for centuries. On our return I entered a short, green lane, so make a nearer inspection of one of them, which had attracted my attention as we passed it before, but I found it deserted, the roof had fallen in, the springs were trodden and soiled,—no cows were in the stalls.

"No dog was at the threshold, great or small,

No pigeon on the roof, no household creature,

No cat demurely dozing on the wall,

Not one domestic feature.

No human figure stirred to go or come,

No face looked forth from shut or open casement,

No chimney smoked—there was no sign of home,

From parapet to basement."

At Fairy Glen we found a wild though not deep ravine, where the Conway dashes over the rocks in a succession of falls. Nodding trees bent over the stream, while feathery shrubs shot up between the cliffs. It was indeed fairy-like in its loveliness, a place to part from with regret, when we remember that we may never see it more.

From Betws-y-coed we took the coach for Capel Curig and the Pass of Llanberis. As little can be seen from the inside of a stage coach, the favorite seat is of course on top; so notwithstanding the threatening promise of the black clouds overhead, I ascended to the pleasant cushioned seat awaiting me. Dr. Johnson observes somewhere that the summit of human felicity may be found on top of an old-fashioned English stage coach, with four good horses, a careful driver, and an excellent road. All these accessories to felicity seemed to be within our reach this day, with the added pleasure of passing through a new and interesting country. But alas! the rain rather increased than otherwise; not yet, however, heavy enough to prevent me from enjoying the wild desolate grandeur of this celebrated pass. I noticed that here and there were little patches of verdure in the tiny valleys, where a few sheep and goats were occasionally seen; but the supremacy of rocks could not be disputed, cold, flinty, and bare, reminding one of the mountain canons of Colorado, particularly that of Cheyenne, near Colorado Springs.

It had long been difficult to keep my umbrella and bonnet from blowing away—even with the assistance of a poor man whom the driver had picked up, and who kindly held on to the former. Wind and water prevailed at last, and an ignoble retreat to the interior had to be endured.

(To be continued.)

For "The Friend."

Richard Shackleton.

(Continued from page 156.)

Elizabeth Carleton's memoir continues thus: "I found that my safety consisted in watchfulness to know, and humble resolution to do what I thought was required of me, though much in the cross to my nature, Divine Goodness strengthening me to bear reproaches, persuasions and mockings of my old companions, who, to their own miserable loss, withstood the offers of heavenly love extended to them; and, notwithstanding I might expect such treatment, I dared not shun the place, but appeared amongst them in a very different manner from what I was used to do, both in my conduct and dress. Of myself I could not have acted thus, but by endeavoring to keep inward and watchful over my words and behavior, begging to be preserved from bringing dishonor on that Holy One, whom I was now above all desirous to serve, and He was pleased in great condescension to preserve me in simplicity, and fear of offending Him. I dared not stay from any meeting which it was in my power to attend, and often called to see or inquire for such Friends as I heard were indisposed, even if not much or at all acquainted with them before, which caused many to have an affectionate regard for me, and made way to drop hints sometimes to my friends which I was afraid to omit, lest I should be one of those that were not faithful in small things, and so become weaker, and not able to pursue the path which my eyes were opened to see was that of acceptance.

"As other things were become new, so was my desire for reading. Now the Scriptures, our Friends' sufferings, and other writings edifying and useful I delighted in, and forsook those which I knew were hurtful to my mind. Retirement and waiting on the Lord, to

renew my strength in Him, I found was good and necessary. Visiting, or being much in company, I declined, lest thereby I should be drawn from off my watch. Religious Friends I loved to be with, and such were kind and tender towards me; and under the sense of the notice that many worthy ministers visiting this nation took of me, my mind was often bowed in humble admiration, that such a poor, weak creature as I, should be so favored; and it was often hard to part with such, and cost me many tears; and after they were gone, divers have written me encouraging letters.

"Thus was I helped through the kindness of Him who affords strength to those that are sensible of their own weakness and entire insufficiency to preserve themselves, fulfilling His old promise of carrying His lambs in His arms.

"Though my mind was so bent to practise what I believed to be my duty in religion, I saw that it was also my duty to be diligent in outward business, helping to make it easier to my aged mother and weakly sister. I have had often to admire how I was enabled, when left alone with a servant (my mother and sister in the country on account of my sister's health) to carry on our little business, attend meetings constantly and keep the house in so frugal a manner that little would be expended, and my kind neighbors and friends well pleased when they called to see me, to find me at home properly employed.

"Thus I went on for some years, endeavoring to do justly, love mercy, and walk humbly, being sensible that a warfare still must be maintained, and a greater victory must be achieved over my own passions and natural propensities, and that best wisdom was necessary to guide me through life. As my experience could not be much, therefore I often begged for it. In course of time, some degree of zeal for the promotion of truth seemed kindled in me, and a desire to attend some of the General Meetings, which was scarcely in my power from my situation, but, in a while, my dear friend, Elizabeth Pike, was raised up to be a kind and faithful helpmeet to me, and we took many journeyings together to General Meetings, often under difficulties."

Her biographer adds: "Her sphere of usefulness (after her marriage) was enlarged, and she needed not alligation to keep her humble, which, in the sincerity of her heart, she had desired, if necessary, for the responsibility of her station forcibly impressed the need of that constant watchfulness which so remarkably characterized her words and actions.

"The difficulties which she had anticipated, and which she had most wished to avoid had been those of becoming mistress of a boarding-school, and of assuming the responsible duties of a step-mother. These vanished, or were made easy to her, and she found in the worth and affection of her excellent companion, those blessings which constitute the happiness of married life."

The following letter was written by Richard Shackleton to his mother-in-law, Rachel Carleton, soon after his marriage with her daughter:

Bulltore, 16th of Twelfth month, 1755.
"It would give me pleasure, and add much to the satisfaction I daily enjoy in thy daughter, to know that her loss sits with tol-

erable ease upon you. I should rather call it her absence, not her loss, for I hope Providence will favor us with meeting divers times together again in this land of uncertainty; and they are not lost who are found in the places which Infinite Wisdom has ordered them in, which I hope is the case with thy dear, valuable child; and doubt not but this consideration makes this separation easier to be borne with thee. And I sincerely desire it may be made up to you by the most solid comfort which unites together in spirit those that are absent in body, and is the crown of the aged as well as the youth. That this may be our chiefest care to seek after, whether old or young, is the sincere desire of

"Thy dutiful and affectionate son,

"RICHARD SHACKLETON."

(To be continued.)

Beet-Root Sugar.—The cultivation of beet-root as a source of sugar was encouraged in every method by the government of the great Napoleon. His fall and the consequent opening up of the whole Continent to British trade retarded the growth of the new industry. Still Napoleon's policy was pursued by the government that succeeded him. Among other modes of protection, beet-root sugar was exempted from all taxation, while a heavy duty was imposed upon foreign sugar. By this means the indigenous manufacture was fostered; and consequently we find that in 1832 about nine thousand tons of sugar were manufactured in France, which was about one-seventh of the total consumption of the country. After this period a new cause came into play, which gave an extraordinary impetus to the beet-root industry. The long agitation against slavery in this country triumphed, and negro emancipation was accomplished in the West Indies. The first result, as our readers are aware, was the disorganization of the West Indian labor market. And France took advantage so promptly of the opportunity that in 1842 her production of indigenous sugar had risen to 35,000 tons. It was an almost four-fold increase in ten years, and was very nearly one-third of the whole consumption, instead of one-seventh, as it had been in 1832. From this time the industry prospered so rapidly, that a duty less, indeed, than that on foreign sugar, but still of appreciable amount, was imposed on the beet root product, and in 1847 that duty was made equal to the foreign duty. Still the industry attained greater proportions. In 1862 the home production somewhat exceeded the foreign imports. And in 1871 it was four times greater. Since then the home production has still further increased, until the foreign imports, compared with it, are but a small fraction. Last year, in fact, the home production exceeded 440,000 tons, nearly twice the amount of 1871. During 1874 and 1875 the wholesale price of sugar at Paris averaged 140 francs per 100 kilogrammes. At that rate the home production last year amounted in value to over £25,000,000 sterling. Thus in less than seventy years an industry has been created which is worth this enormous annual sum to France. In the meantime Germany, Austria, Russia and Belgium followed the example of France, and the total production of beet-root sugar in Europe is now estimated considerably to exceed one million of tons.—*Saturday Review.*

Extract from the Journal of Job Scott.

Fifth-day 9th. Attended the Preparation Meeting at Danby, at the close of which went a few minutes, the men and women together; this was a little comfortable season, divers minds being refreshed in this our parting opportunity. Sixth day, 10th of 9th month we took our affectionate leave of our dear friends, and set forward for home, accompanied by our beloved friend E. S. My mind was much affected at and after parting with Friends with great tenderness and tears of joy, which for a considerable space of time, flowed copiously from mine eyes. My mind was carried back to view the places where we had visited, and my soul was melted into ardent mental supplication for the preservation of Friends in general, and many individuals in particular; attended with such endeared affection and brokenness of spirit as has rarely been my lot to witness for so long a time together. Oh! with what heart-felt fervency did I intercede for the help and preservation of the little flock and family up and down in the world! the earnest requests that I was enabled to put up for the instruction and divine assistance of the many messengers of the Lord which are running to and fro in the earth among the people, that their labors may prove successful, and benefit the souls of mankind; indeed the language of solemn supplication ran powerfully through my mind with a melting sensibility for all; that the dead might be raised, quickened and made alive, in that life which is hid with Christ in God. Many individuals of my acquaintance, both in places where I had visited abroad, as also at home in our own and neighboring Monthly Meetings, came fresh into my remembrance with such ardency of desire, all breathings of soul, for their growth, preservation and improvement, as will not readily be conceived by such as have not felt the same. Yea, my desires for them were expressed in intelligent language in the secret of my soul, in a number of little, short, though sweet and melting requests for one after another, as the Father of Spirits brought them to my remembrance. Oh! how often did it flow through me as a stream of life on this wise: "O most mighty and omnipotent Lord God, commission a thine holy angels to attend and guard thy exercised pilgrims through this veil of tears; let cherubims and seraphims encamp about and surround the little host of militants, thy wrestling seed who here on earth and for evermore." Oh! how did my bosom heave with swelling thine joy and divine delight! yea, all that was in me moved!—my head, my heart, yea, my whole man seemed circled round with spiritual attendants! whose melodious and ecstatic songs of praise enraptured my soul, and lifted me above all earth's tumultuous cares and all its fading joys! and in the midst of this triumphant adoration, my eyes were opened to see and view the depths of sufferings and abasement which my soul had passed through in my visit; then did I see that true wrestling seed of Jacob can never rejoice, but through sufferings; abound, but through abasement; nor live and reign with the Lamb that was dead and is alive, but through death. I then was given to behold as it were around me, as I rode on the way, an innumerable multitude of glorified spirits; and it was said in the centre of my soul, "These are thy which came out of great tribulation, hab-

washed their robes, and made them white in the blood of the Lamb," Rev. vii. 14, their ever-living Redeemer. I saw that I must yet longer endure the cup of sufferings in his house of clay, if I would join the songs of those ransomed souls in never-ending anthems of praise; to which I bowed my head and heart, saying, Lord, let not thine eye nor thy hand spare, until thou hast done away all that offends in me, and brought forth judgment unto victory in my soul: and when I had thus submitted and offered up body, soul and spirit into his holy hands, a willing sacrifice, it was showed me how good it had been for me that I had so deeply suffered; and that, had it been otherwise, I should have missed of this feast of fat things. Next it was showed me, that though I had not altogether done the best that I might have done while on this visit, yet that I have been preserved in the meekness, littleness and humility; and, to my inexpressible satisfaction, I was also showed, and made to see, feel and know, that nothing was laid to my charge as an offence to stand against me; but feeling here was now no condemnation to my soul, was made to join the heavenly harmony; and, in that angelic spring of adoration which felt, my soul within me leapt for joy, and, at the end of this transporting chorus, my inmost language was—"sing praises, sing praises, sing praises, Amen, Amen, halleluiah!" At which it seemed as if the whole expanse of heaven rang with acclamations of joy, thanksgiving and praise! After which I again had freedom to enter into innocent and pleasant conversation with my two friends, which I had not done for miles before as we rode on the way; but I kept the vision pretty much to myself, save what of its effects they discovered in my countenance, and the tears had shed, which I had not power to restrain, nor, never suffer me to forget thy favors and divine communications—but as thou hast begun to clothe my mind with humility, be pleased more and more to centre me deep into; that I may wear it as a garment forever.

Selected.

We live in deeds, not years; in thoughts, not breaths; in feelings, not in figures on a dial.
We should count time by heart-throbs. He most lives who thinks most; feels the noblest; acts the best, and whose heart beats quickest lives the longest; who lives in one hour more than in years do some whose fat blood sleeps as it slips along their veins. Life is but a means unto an end; that end reigning, means, and end to all things.—
Bailey.

THE FRIEND.

FIRST MONTH 6, 1877.

It was a common charge against the early members of the Society of Friends, that they were not entitled to be considered Christians, because they denied the "ordinances of Baptism and the Lord's Supper," as the ceremonies practised by other religious denominations are called. This charge, and the ostracism of the Society from the community of the Christian Church as a consequence of it, have often been met, and their injustice proved by early and modern writers of the Society, but our real views on these subjects are still misunderstood by many, and few outside of our pale seem able to rise above the

supposed necessity of the material elements of water, and of bread and wine to the true spiritual comprehension of the thing signified by our Lord, when He declared that "He that believeth and is baptized shall be saved," and "Except ye eat the flesh of the Son of man, and drink His blood, ye have no life in you."

Friends accept both these great truths, with all that is implied in them, as they do all others set forth in the Holy Scriptures. But they cannot agree to connect the spiritual results alluded to in these passages with corporeal ablutions in water, or partaking of the elements of bread and wine. When Christ held that conversation with the Jews narrated in the 6th chapter of John, wherein He described himself as "the living bread which cometh down from heaven," and further added the words above quoted, respecting the necessity of eating His flesh and drinking His blood, it was a year preceding the last supper with His disciples, when He broke bread and gave it to them, saying, "take, eat, this is my body," and also gave them the cup of wine, with the words, "drink ye all of it, for this is my blood of the new Testament, which is shed for many for the remission of sins." Now, if the reception by the apostles of spiritual life through Christ was dependent upon a participation in the paschal supper immediately preceding His crucifixion, they must have been destitute of such life prior to that time. That this could not have been the case with these men whom Christ long previously had sent forth to preach His Gospel of life and salvation, is obvious enough. He declared that "He that believeth on me hath everlasting life," and in the same chapter it is stated that Peter said to Him "Thou hast the words of eternal life; and we believe and are sure that thou art that Christ the son of the living God." It follows then that Peter and the other apostles had long before the final passover partaken of the mystical body and blood of Christ, and had been granted into Him, the living Vine, from whom they drew divine grace and sustenance, metaphorically spoken of by Christ as bread and as blood to the soul. We hold, therefore, that as those disciples received this divine life directly from Christ without any ceremonial or intermediate agency whatever, so the righteous in the preceding dispensation, and true believers in Him in every succeeding age, have been, and are quickened and fed through a spiritual union, and partaking of His divine nature. He declares that "He that eateth my flesh and drinketh my blood, dwelleth in me and I in him." "As the living Father hath sent me, and I live by the Father, so he that eateth me, even he shall live by me." Thus we see that the mode in which this spiritual life is communicated by Christ to man, is the same by which the beloved Son drew His life from the Father. Hence no form or "ordinance" is essential. "It is the Spirit that quickeneth, the flesh profiteth nothing."

With regard to the language used by our Saviour at the last supper, there is no rational way of understanding it but in the same typical sense in which He so often and obviously spoke of spiritual things on other occasions. When he says of the broken bread, "This is my body," and of the wine, "This is my blood of the new Testament which is shed for many for the remission of sins," we are fully justified in regarding it as equivalent to His saying, this bread is typical of my body, which

is to be broken on the cross, and offered for you; this wine represents my blood which is to be shed for many. There is no place in the Scriptures where it is said that our Lord added any promise that by practising this ceremony of eating bread and drinking wine, His followers should thereby partake of His body and blood, or receive spiritual life.

There is only one of the evangelists (Luke) that speaks of any injunction by Christ to His apostles to continue in the practice of celebrating the passover supper. His words are, "This do in remembrance of me;" and Paul in his allusion to it (1 Cor. xi, 26), gives this explanation of His reason for continuing the custom, viz.: "For as often as ye eat this bread, and drink this cup, ye do show the Lord's death till He come." Here is nothing to warrant the extraordinary assumption made by some sects, that whenever a professing priest or minister may say some ceremonial words over material bread and wine, there is a conversion of these elements into the true body and blood of Christ, and that others eating and drinking them can thereby obtain eternal life; neither as held by some less superstitious denominations, that such an act is "an outward and visible sign of an inward and spiritual grace" on the part of the performer, since this ceremony may be easily enacted by one who is quite destitute of "inward and spiritual grace," and do it hypocritically, as said by the apostle, "eating and drinking damnation to himself."

If it be urged that the primitive believers being evidently in this custom implies an obligation on our part to continue it, we answer that such a consequence by no means follows. They doubtless did it in remembrance of Christ's death, and until He come, as commanded by Him to those of His own age; but that does not necessarily impose it as a perpetual duty on Christians of all ages. There is no such command in Scripture. Those who have truly known the second and spiritual coming of the Lord Jesus in their souls, and have received Him as their Redeemer and Sanctifier, realize the fulfilment of His promise, that "The Comforter shall bring all things to their remembrance," and they will often dwell with reverent love and gratitude on that wondrous act of redeeming grace by which their souls have been bought with the price of His precious blood. When one asked Christ, "How is it that thou wilt manifest thyself unto us, and not unto the world?" He replied, "If a man love me he will keep my words; and my Father will love him, and we will come unto him, and make our abode with him." And again in the Revelation it is written, "Behold I stand at the door and knock; if any man hear my voice and open the door, I will come in to him and will sup with him, and he with me." These words give the key to the true communion and supper of Christ. The conditions are a willing reception of the Holy Spirit when He offers His redeeming visitations, and a faithful obedience to His manifested will and commands. Those who thus receive Christ can adopt the testimony of his apostle in writing to the Corinthians as their experience, "The cup of blessing which we bless, is it not the communion of the blood of Christ? The bread which we break, is it not the communion of the body of Christ?" "For we being many are one bread and one body: for we are all partakers of that one bread."

WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held at Philadelphia, on Sixth-day, First month 5th, 1877, at 10 A. M.

The Committees on Instruction and Admissions meet the same day, at 10 A. M.

SAMUEL MORRIS, Clerk.

Philada., 1st mo. 1st, 1877.

TEACHER WANTED.

A suitably qualified teacher for the Adelphi Colored School, Girls' department.

Address or apply, with reference to, Caleb Wood, 524 South Second Street, Israel H. Johnson, 809 Spruce Street, Samuel Eker, corner Grace and Knox streets, Germantown.

FRIENDS' ASYLUM FOR THE INSANE.

New Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

MARRIED, at the house of Hannah W. Collins Z. W. 221 St., New York, by appointment of New York Monthly Meeting, Dr. JOSEPH H. WORTHINGTON of this city, to SARAH, daughter of the late SYDNEY B. COLLINS, of the former place.

DIED, on the morning of the 9th of 10th month, 1876, at her residence in Moorestown, N. J., MARY G. MELACK, daughter of Samuel Melack, deceased, in the 51st year of her age, a member of Chester Monthly Meeting. She was favored to endure a long and painful illness with patience and resignation, and her surviving friends have the consoling evidence that through redemptive love and mercy she has received a everlasting rest and peace.

—, at the residence of his son-in-law, Emmo D. Gawthrop, on the 23d of 10th month, 1876, RICHARD THOMPSON, in the 76th year of his age, a member of New Garden Monthly Meeting, Penna.

—, 12th month 12th, 1876, at the residence of her brother, Amos W. Howe, near Chadds' Ford, Penna., MARY HOSE, in the 54th year of her age, an esteemed member of Kennett Monthly Meeting.

—, 12th month 12th, 1876, at Woodbury, N. J., CARLETON P. STOKES, in the 67th year of his age, an esteemed member of an annual meeting of New York Monthly Meeting. "The just man walketh in his integrity; shall live by his faith, and his memory is blessed." Quiet and unobtrusive in his manners, and though few unnecessary words escaped his lips, his straight forward, upright, consistent integrity of purpose, and strict regard for truth, won him confidence and esteem.

—, 12th month 12th, 1876, at the residence of her brother, Amos W. Howe, near Chadds' Ford, Penna., MARY HOSE, in the 54th year of her age, an esteemed member of Kennett Monthly Meeting. Firmly persuaded of the truths of the gospel, our Lord and Saviour, as held by our forefathers, he earnestly desired the welfare and preservation of his country, and his friends. His integrity, his industry, his diligence and want of self-appreciation, prevented his comprehending his own usefulness in the Society. Realizing the uncertainty of time, he was increasingly concerned to have his loins girded, his lamp burnt and oil in his vessel, giving evidence that "the light of the just is as a shining light, which shineth more unto the perfect day."

—, at her residence in Winona, Columbiana Co., Ohio, on the 18th of 12th mo, 1876, ARBACAL ALLEN, widow of the late Christopher Allen, in the 70th year of her age, a member of New Garden Monthly Meeting, Penna. This dear Friend was united to a large circle of friends, and was watchful that no word out of her should give cause of offence to any. Bearing of a meek and quiet spirit, she sought not distinction or preferment, but was concerned that her work might progress with the day; and the many tribulations which she was united to, but her husband's illness, indicated that her affections were weaned by earthly treasures, and her burden cast upon the Lord with full assurance that "He will fulfil the desire that he has for him, He also will heal their cry, and will save them." "The memory of the just is blessed."

WILLIAM H. PILE, PRINTER,

No. 322 Walnut Street.

Thus it is, that those who are united to Christ by one Spirit, witness in Him a sweet fellowship with each other, sitting at His bountiful table in their public religious assemblies, as He appears in the midst of them to their joy and refreshment, and in their more private life feeding on the daily bread which He dispenses to them in answer to their petitions. To these "the kingdom of God is not (material) meat and drink, but righteousness and peace, and joy in the Holy Ghost."

SUMMARY OF EVENTS.

FOREIGN.—The latest Mexican advice states that the government of Iglesias is established at Querataro, 150 miles from the capital. Eleven of the States of Mexico recognize Iglesias, and he has an army of 12,000 troops. Diaz, however, has an army of 18,000 men, and is well provided with artillery which Iglesias is deficient. General Mejia, formerly a member of President Lerdo's cabinet, who has been banished from Mexico by Diaz, has arrived in Havana. Gen. Mejia says the accounts of the capture of Lerdo and the shooting of Escobedo, published in the New York papers, are unconfirmed, and that Lerdo probably succeeded in reaching the Pacific coast in safety.

The newspapers at Belgrade publish the following: "The Russian General Nikitin arrived here on Monday to take command of the Serbian army, vice Tchernayeff. At a review of the Russian divisions General Nikitin declared he had come to Serbia by order of the Emperor of Russia to assume command of the army. He said all foreigners serving in Russian corps in Serbia, would be considered part of the Russian army. Orders have been issued to corps commanders of the Serbian army to proceed immediately to their posts."

On the 28th of the month of October, which is held on the 28th ult., at which it was agreed that the armistice should be prolonged until Third mo. 1st, 1877. Several points of the propositions made by the European Powers were discussed, and the amendments and objections made by the Turkish plenipotentiaries were taken up by the European representatives for reference to their respective governments.

The French Senate has unanimously and without discussion, adopted the Budget as it was voted by the Deputies. The debates in the latter House respecting the Budget have caused a schism in the republican majority, the Moderates having definitely separated from the Extremists.

Pauperism is diminishing in England and Wales. In 1849, out of every 16 men, women and children, one was a pauper. In 1875 there was only one person in 30 who was a burden to the rest of the community.

A Constantinopolitan dispatch of the 28th ult. says: A national conciliatory spirit prevails, the Ottoman delegates appearing disposed to make such concessions as are compatible with the integrity and independence of Turkey. Consequently hopes are entertained that an understanding will be reached by which all interests will be reconciled. A Belgrade dispatch says the Serbs are rejoicing at the prolongation of the armistice. All warlike preparations have ceased, and the militia which had started for the front had been recalled.

A gate of unprecedented violence prevailed on the south coast of England on the 1st inst. Dover pier was partly destroyed, and nearly every town on the south coast from Dover to Margate was seriously threatened by the high tide. The damage sustained is very great.

On the first inst. Queen Victoria was proclaimed Empress at Delhi and throughout India, with great ceremony.

UNITED STATES.—The President has sent to the Senate the correspondence between the United States and Great Britain on the subject of extradition. It appears that the treaty has been restored to vitality by the act of Great Britain in revealing from his former position and the consequent surrender of a fugitive to the United States. The United States government is now prepared to consider the question of an amendment to the treaty so as to increase the class of offences for which extradition may be claimed.

A new counterfeit \$1000 greenback has made its appearance in the West, and the plate upon which it was printed is said to have been in existence at least two years. The counterfeit so closely resembles the genuine notes that detection is difficult.

An invoice of silk worm eggs recently arrived in New York from Japan, in 1872 cases, valued at about

\$2,000,000. The shipment reached San Francisco from Japan on the 12th of Twelfth month. The eggs were packed very carefully in the storage deck amidships—the westward port of the vessel. A bamboo partition surrounded them, and a current of air played over them. The eggs were immediately shipped by rail to New York, and are to be carried across the Atlantic to France, Italy and England.

The commissioners appointed by the President to examine the several reports of surveys which have been made at the expense of the United States to ascertain the practicability of an inter-oceanic canal across the Isthmus of Panama have made their report, they favor the Nicaragua route and fix its cost at about \$100,000,000, and estimate that its completion will consume ten years. They also state that an inter-oceanic canal across the Isthmus should be under the protection of all the nations interested.

The steamship King Arthur sailed from New Haven, Conn., on the 28th of Twelfth month, for Constantinople, with millions of war of the Turkish government. The cargo of the King Arthur is valued at \$1,444,000.

A terrible railroad disaster occurred on the 29th ult. at Ashtabula, Ohio. A Lake Shore train, going west, broke through an iron bridge at that place, and all the cars were precipitated into the river seventy-five feet below. The wreck was consumed by fire. There were one hundred and sixty-five persons on the train, and of these over one hundred were killed by being crushed to death, burned or drowned. Many others were injured, some of them fatally. The bridge was considered strong and safe.

The interests in Philadelphia last week numbered 31. The books of the Building Inspectors show that during the year 1876 there were built in this city 442 new buildings, of which 3368 were dwelling houses. The number of new buildings is much smaller than in 1875. There were 510 fires in Philadelphia during 1876, which caused a loss of \$1,308,700.

According to the annual statement of the Wells, Fargo & Express Company, the product of gold and silver in the States and Territories west of the Missouri river, in 1876, has been \$85,861,900. Nevada alone furnished \$49,081,000. California only \$18,613,800. The product consisted of \$4,328,000 in gold, and \$41,539,300 in silver. The amount of silver from the United States treasury had amounted on the 30th ult. to \$25,729,751.

The ship Creasian, which went ashore near Bridgehampton, L. I., was broken up by the gale of the 30th ult. Thirty-three men employed by the Coast Weekender, were on board when the gale came, only four of whom reached the shore alive.

The total number of interests in Philadelphia last year was 18,914, which is 1,109 more than in 1875. Of the deaths 9,862 were males, and 9,052 females.

The mean temperature of the Twelfth mo. 1876, by the Pennsylvania Hospital record, was 29.89 deg., the highest during the month 49 deg., and the lowest 7 deg. The amount of rain 3.16 inches. The average of the mean temperature of the Twelfth month for the past eighty-seven years, is given as 32.62 deg. The highest mean during that entire period was 45 deg. in 1818, and the lowest was 25 deg. in 1875.

The municipal debt of the city of New York now amounts to \$14,197,000, against which there is a sinking fund of \$28,147,000. The newly installed mayor of the city asserts that its financial condition has improved.

THE MARKETS, &c.—The following were the quotations on the 30th ult. Philadelphia.—American gold, 107 U. S. sixes, 1881, registered, 113; do. coupons, 117; do. 1867, registered, 113; do. coupons, 116; five per cents, 10-40, 113; a 113; ditto 4; per cents, 104. Middlings cotton, 124 1/2, etc. for uplands and New Orleans, 125. Flour, 125. Sugar, 11 1/2. Coffee, 11 1/2. Wheat, \$1.14 1/2, 11 1/2; amber, \$1.17 1/2, 1 1/2; western white, \$1.50 a \$1.55. Rye, 77 a 80 cts. Yellow corn, 60 a 61 cts. Oats, 37 a 33 cts. The arrivals and sales of beef cattle at the two principal Philadelphia, drove yards on the 1st inst., numbered 25-90. Extra sold at 47 a 77 per lb. of gross weight, 34 a 35 per lb. of net, and 1 a 1 1/2 cts. Cattle of 6200-8000 lbs., 34 a 35 cts. Cows, 30-40 lbs. gross and 1300 lbs. net at \$8 a \$22.5 per 100 lb. net. (Chicago.—No. 2 spring wheat, \$1.25; No. 3 do., \$1.12, (Corn, 41) cts. Oats, 31 cts. Barley, 66 cts. Rye, 62 cts. per 100 lbs. Baltimore.—New southern white wheat, 33 a 36 cts. Cold water do., 34 cts. Oats, 31 a 35 cts. Corn, 41 a 42 cts. Rye, 61 a 62 cts. Barley, 61 a 62 cts. Oats, 31 a 33 cts. Rye, 58 cts. Milwaukee.—No. 1 spring wheat, \$1.32; No. 2 do., \$1.26; No. 3 do., \$1.16; No. 2 corn, 41 cts. No. 2 oats, 33 cts. Rye, 71 cts. No. 2 barley, 80 cts.

Establishment of Slavery in this Country.

(Continued from page 162.)

"In spite, however, of the aversion which guided and inspired the commercial and colonial policy of England; in spite of the corrupting influence of the slave-trade and of laving itself, they found sturdy opposers in both England and America. The colonial legislature of Massachusetts, of 1641, enacted in its code, styled the 'Body of Liberties,' that there should never be any bond-slavery, unless it be of captives taken 'in just war,' or of such as willingly sold themselves or were sold to them, and such should have the liberties and Christian usages that God had established in Israel. Whether this act prohibited the slavery of Africans or not has been a question freely discussed, and on which differences of opinion have obtained. There can be no doubt, however, that the colonists of that day made a distinction between slaves captured in 'just war' and those stolen in Africa, and that this act was based on this distinction. At any rate, it is safe to say that the servitude it authorized, with its recognized limitations of the Mosaic code, had little in common with the American slavery which afterwards obtained in all the colonies.

In 1646 two slaves were introduced into the colony by a member of a church, who had procured them by a slave hunt in Africa. A memorial which was immediately presented to the General Court, setting forth the three-fold outrage of 'murder, man-stealing, and Sabbath-breaking,—drew forth a stringent order. 'Concerning themselves,' they said, 'bound by the first opportunity to bear witness against the heinous and crying sin of man-stealing,' they supplemented their testimony with the requirement that the victims 'should be sent to their native country, Guinea, and a letter expressing 'the indignation of the court thereabout.' In November of that year it was enacted that 'if any man steal a man, or mankind, he shall surely be put to death.' The colony of Connecticut, in 1650, and the colony of New Haven, soon after, passed acts making man-stealing a capital offence.

Whatever differences of opinion there may have been concerning the full import and effects of the Massachusetts act of 1641, there can be none concerning that of the colony of Rhode Island, adopted in 1652. By this act

it was provided that no 'black mankind or white' 'being forced by covenant, bond or otherwise,' should serve more than ten years, or after the age of twenty four years, but should be set free. 'This noble act,' says Morris, in his 'Notes on Slavery in Massachusetts,' 'stands out in solitary grandeur in the middle of the seventeenth century, the first legislative enactment in the history of this continent, if not of the world, for the suppression of involuntary servitude.' It was in view of this early legislation against African slavery and the slave trade, and of the small number of slaves that found their way into the Massachusetts colonies during the two first generations of their history, that Whittier says: 'It was not the rigor of her northern winter, nor the unfriendly soil of Massachusetts alone, which discouraged the introduction of slavery during the first half of her existence as a colony. It was the recognition of the brotherhood of man in sin, suffering, and redemption, the awful responsibilities and eternal destinies of humanity, her hatred of wrong and tyranny, and her stern sense of justice, which led her to impose upon the African slave trade the terrible penalty of the Mosaic code.'

In spite, however, of this early legislation, and of the popular sentiment which prompted it, slavery made progress, the number of slaves slowly increased, and men were found ready to engage in the infamous traffic. The demoralizing influence of the Indian wars, and the recognition of the principle that captives taken in them might be rightfully held in bondage, contributed largely to this result. There were, however, earnest and faithful protestants, who saw and deeply deplored the great and grievous wrong thus inflicted on both the Indian and the African. John Eliot, the apostle to the Indians, presented in 1675, a memorial to the Governor and Council against selling captured Indians into slavery. His objections were that it prolonged the war, that it hindered the enlargement of Christ's kingdom, and that 'the selling of souls is a dangerous merchandise.' Though the mission of this large-hearted man was mainly with the Indians, he did not forget the African, but lamented, it is said by Cotton Mather, with 'a bleeding and burning passion,' 'the destroying ignorance' in which they were left by men bearing the name of Christians, 'for fear of losing the benefit of their vassalage.'

The iniquity of slavery and of the slave trade, and the wrongs of the slave, were deeply felt by Justice Samuel Sewell, afterwards Chief Justice of the Supreme Court of Massachusetts. In the year 1700 he wrote a pamphlet entitled, 'The selling of Joseph: A Memorial,' in which slavery was characterized, and the primal truths of human equality and obligation were enunciated with signal boldness and force. He maintained that 'originally and naturally' there was no such thing as slavery; and that 'these Ethiopians,

as black as they are, seeing they are the sons and daughters of the first Adam, the brethren and sisters of the last Adam, and the offspring of God, they ought to be treated with respect agreeable thereto.'

Although this production was received, its faithful and fearless author says, 'with frowns and hard words,' there was a state of unrest in the public mind which revealed itself in various ways. The slaves themselves were uneasy under their bondage, and made no secret of their earnest longings for liberty. Though their increase was small, the most thoughtful and conscientious viewed that increase with apprehension, and earnestly desired the abolition of both the trade and the system. During the ten years immediately preceding the Declaration of Independence, in which the rights of man and of the colonies were under sharp discussion, the wrongfulness and inconsistency of slavery became more and more apparent. The desire for emancipation and the extinction of the slave-trade, found utterance in sermons and pamphlets, some thorough and of decided merit, and in the resolutions and memorials of towns praying the legislature to take action at once in the interests of humanity and true patriotism.

The members of the Society of Friends took the lead in this opposition. In the year 1688 a small body of German Friends, at Germantown, Pennsylvania, presented a protest to the Yearly Meeting against the 'buying, selling and holding of men in slavery.' But though not then prepared to take action, it sent forth in 1696 the advice that 'the members should discourage the introduction of slavery, and be careful of the moral and intellectual training of such as they held in servitude.' Three years before this advice was given, George Keith, who was then a member of that Society, had denounced slavery as contrary to the religion of Christ, the rights of man, and sound reason and policy, and charged its members to 'set their negroes at liberty after some reasonable time of service.'

In New England the Quakers, at the Monthly Meeting at Dartmouth, in 1716, sent to the Rhode Island Quarterly Meeting the query, 'whether it be agreeable to truth for the Friends to purchase slaves and keep them for a term of life?' The Quakers of Nantucket, in the same year, moved by the eloquence of (Mary) Starbuck, a preacher of their denomination, sent forth the declaration that 'it is not agreeable to the truth for Friends to purchase slaves and hold them for the term of life.' In 1729 they made an earnest appeal to the Philadelphia Yearly Meeting, in which they said: 'Inasmuch as we are restrained by the rule of discipline from being concerned in fetching or importing negro slaves from their own country, whether it is not as reasonable that we should be restricted from buying them when imported.' At that time Elisha Coleman wrote a pamphlet against making

men slaves, because it was 'anti-christian' and 'very opposite both to grace and nature.'

Most faithful testimony against slavery was borne by William Burling, of Long Island, in the Yearly Meeting of the Friends. In 1729, Ralph Sandiford published "The Mystery of Iniquity," in which he earnestly condemned the sin of oppression. The ardent but eccentric Benjamin Lay, who had witnessed in Barbadoes scenes of cruelty to slaves that disturbed and distressed his sensitive nature, pleaded the cause of the bondman in a volume, published in 1737 by Benjamin Franklin. From 1746 to 1767, John Woolman, of New Jersey, travelled much in the Middle and Southern Colonies, proclaiming to Christians that 'the practice of continuing slavery is not right,' and that liberty is the natural right of all men equally.' This human, unselfish, and self-denying man, as he travelled among the people, saw 'a dark gloominess overhanging the land,' and 'a spirit of fierceness and love of dominion.' But notwithstanding all that was calculated to depress and sadden his heart, he labored on with earnest and unconquerable zeal, and largely contributed to the work of preparing his denomination to bear their early testimony against the sin and practice of slavery.

But the most active anti-slavery writer of that age was Anthony Benezet, the son of Huguenot parents, who escaped from France on account of the revocation of the Edict of Nantes. Having inherited an intense and passionate love of liberty, and becoming deeply affected by the iniquity of the slave-trade, and the cruelty exercised toward slaves by their owners, he earnestly lifted up his voice on behalf of the oppressed, and strove to awaken Christians to a just sense of the sin of slave holding. He established and taught gratuitously an evening school for the instruction of negroes. Under his pious labors their moral and religious advancement recommended the colored race to the notice of influential persons, too much accustomed to hold it in contempt. Among his many publications was an historical account of Guinea, which is said to have given an impulse to the mind of Thomas Clarkson, who afterwards labored so effectively for the abolition of the slave-trade by the British government. He exerted himself to induce the legislature of Pennsylvania, in 1789, to begin the work of emancipation.

By the faithful and self-denying labors of these devoted pioneers and early advocates of anti-slavery, and others of less note, covering a period of a hundred years, was the Society of Friends at length persuaded to rid itself of the system of enforced servitude. Nor was this great work accomplished without much of exciting discussion, stern rebuke, and stirring appeal. For with them as with others, the love of ease and the lust of dominion were strong, nor did they at once and easily let go their hold on the victims of their power. And not until the conscience of the Society was aroused by the unequivocal decisions of its ecclesiastical tribunals, showing slave-holding to be a sin to be repented of and forsaken, did it achieve the high distinction of being the first and only religious denomination to purge itself entirely of this great iniquity.

Nor were the people without remonstrance and warning from strangers, who, seeing the abomination of the system, boldly denounced its essential cruelty and wickedness. John Wesley, who visited this country during the

early part of the last century, unequivocally condemned it. His terse and trenchant characterization of slavery, so often repeated—"that it was the sum of all villainies"—was only one of the many sharp things he uttered. He called the system 'the vilest that ever saw the sun,' and denominated 'slave-dealers man-stealers—the worst of thieves, in comparison with whom highway robbers and house-breakers are comparatively innocent.' To these emphatic words he added that 'men-buyers are exactly on a level with men-stealers.'

(To be continued.)

For "The Friend."

Richard Shackleton.

(Continued from page 166.)

"Richard Shackleton pursuing his onward path, and seeking first the kingdom of heaven and its righteousness, found all things necessary added—all things necessary for those whose desires are moderate; and this is likely to be the case with such as are concerned to keep on their watch; they may hope to see what to do and what to leave undone, even in their temporal affairs.

Richard and Elizabeth Shackleton, in pursuit of the arduous undertaking and care of youth, were imbued with that reverential fear, which is a blessing and a safeguard to those who abide under it. The advantage of their example extending far beyond their sphere in life, was felt throughout their neighborhood, so that many of the higher ranks desired to cultivate a familiar intercourse with a man distinguished by his talents and learning, and a woman of so benevolent a character. But while they received such marks of kindness with respectful courtesy, they were not drawn by them from their allotted situation. Their time and thoughts were claimed by their duties, and they were the more respected for preserving this line of conduct. Industrious and prudent, yet casting their care upon Providence, they felt the shackles of the world hang loose about them. They were eminently useful members of our religious Society, with clean hands and discerning spirits, being well qualified to take an active part in conducting its discipline. Their duties to the children under their care were conscientiously fulfilled, of which the grateful love that their pupils retained for them is a convincing proof. Several of those who, while they were under their mistress's eye, had thought her too strict, loved her the better afterwards, even for this; and many remembered, and we may hope profited by, the tender admonitions which she was wont to impart, particularly at the time of their leaving school, to enter into an untried world.

Richard Shackleton was blessed with a cheerful, contented mind, conducive to his own happiness, and the happiness of all around him. He was prepared to adopt the language of the poet:

"Ten thousand precious gifts,
My daily thanks employ;
Nor is the least a cheerful heart,
That tastes those gifts with joy."

The fault of his temper was quickness, not violence, but this was soon subjected to his judgment, and if he thought he had wounded anybody thereby, he was ready to acknowledge it, with a benign humility which melted the heart, and disposed it to follow so touching an example. From his conversation, young persons derived much instruction and

delight; and such was his solicitude for the eternal welfare, that he might almost be designated 'the apostle of the youth.' He seldom or never left home for any considerable length of time, without paying farewell visits to his neighbors, nor returned without greeting them at their own habitations. After-day industriously spent, it was his practice retire every evening to his garden or chamber; his countenance when he returned to his family, bearing the impress of divine meditation. And before retiring to rest, he read portion of scripture. If he was under difficulty or perplexity, the first thoughts which occurred to him on awaking in the morning were generally those to which he took heed by which he was often freed from what he annoyed him. He had learned to cast his care on Divine Providence, in matters of less as well as greater moment.

Neither he nor his wife were in the habit of minister; but in meetings for discipline and in families, they were often concerned to deliver wise counsel, in words few and pertinent; and R. S. sometimes spoke in public meetings, but like his father, in the character of an elder. When he returned to our National Meeting, and delivered an account of his attendance at the Yearly Meeting of London, his words were delivered with such simplicity, sweetness and brokenness, that the influence under which he moved seemed overspread the assembly.

He was freely given up to these services; his true helpmate, whose exertions promoted the good of all, united with his own; she sedulously endeavored to alleviate the sufferings of body or of mind, which came under her notice; and, her nature, as well as her religion, prompted her to visit the fatherless and widow in their affliction; and in fulfilling these duties, she experienced that feeling excellently described by the poet:

"The heart which bleeds for other's woes,
Shall feel each selfish sorrow less;
The breast which happiness bestows,
Reflected happiness shall bless."

Elizabeth Shackleton thus notes in her memorandum; "Being sensible of my own inability, my dependence was on Divine help, which I had often experienced in times of need. I was favored with understanding and knowledge for the business, beyond what could have thought; my careful industrious husband assisting in many things belonging to my department as well as his own; so that we were reciprocally helpful one to the other in our arduous calling; and both being near of an age, and favored, for many years, with a good degree of health, our success in endeavoring to do our duty was an encouragement, and our minds were preserved in a grateful sense of the gracious dealings of the Lord to us. And notwithstanding our close and constant engagement, so that we seldom left home on other occasions, we found it but our reasonable duty to attend the meeting for discipline to which we belonged, as well as Quarterly and Half-Yearly Meetings; also to show, by an exemplary life, the efficacy—the principles of Truth we professed to be true by, amongst the numerous acquaintance we had; being employed by many who knew little or nothing of those principles."

(To be continued.)

A life of humility and godly fear is the Christian's duty and safety.

The Sioux Indians.

[From the *Philadelphia Ledger* we copy the unjoined abstract of the report of the Commission appointed to treat with these Indians as made by them to the Indian Department lately.]

REPORT OF THE SIOUX COMMISSION.

The report of the Commission to negotiate an agreement with the Sioux Indians, parties to the treaty of 1868, as made to the Commissioner of Indian Affairs, shows that their first council was held on the 7th of September, 1876, at Red Cloud Agency, with the chiefs and head men of the Ogallala Sioux and Northern Cheyennes and Arapahoes, who represented 4901 Indians who were then present at the Agency. Red Cloud and other of the chiefs met them upon their arrival with warm welcome, saying: "We are glad to see you. You have come to save us from death."

The report says: We submitted to the Indians the conditions required by Congress, and stated that we had no authority to change them in any particular. We assured them that Congress and the President had given us full authority to devise a plan to save their people from death and lead them to civilization. The plan submitted was first to provide ample rations for their subsistence until able to support themselves; such rations, in all cases, to be issued to the head of each separate family.

Second. That when said Indians shall be located upon land suitable for cultivation, rations shall be issued only to those persons who labor, the sick, infirm and aged excepted.

Third. That whenever the Government shall establish schools as provided by the treaty of 1868, no rations shall be issued to children between the ages of 6 and 14 years (the sick and infirm excepted), unless said children shall regularly attend school.

Fourth. That whenever any one of the Indians shall in good faith begin to cultivate the soil he shall have a title to his land and receive aid to build a house.

Fifth. That they shall be subject to the laws of the United States and select as many headmen from each band to maintain order as the President may deem necessary.

Sixth. That all agents, traders, farmers, carpenters, blacksmiths, and other employes of the Government within their reservation, shall be lawfully married and living with their families on the reservation.

Seventh. That no person of white or mixed blood whose fitness, morally or otherwise, is not in the opinion of the Commissioner of Indian Affairs, conducive to the welfare of the Indians, shall receive any benefit from this agreement or former treaties, and may be expelled from the reservation.

These provisions were carefully explained and interpreted, and were thoroughly understood by all of the Indians. A copy of the agreement was given to them to take to their own camp. The Indians were in council at their camp on Shadron Creek until the 14th, when we requested an answer. Chief Little Wound came to the agency, and said: "You are wise men and you have had time. Our council may not seem of much importance to you, but to us it seems a very serious matter to give up our country. You must have patience and bear with us."

He held councils with the Indians on the

19th and 20th of September, and after mutual explanations the agreement was duly signed. On the 21st we proceeded to Spotted Tail Agency to receive an answer to the same propositions, which had been submitted by two of our own number on the 14th. After two days' council with the chiefs and head men of the Brule Sioux, who represented 4607 Indians then at this agency, the agreement was duly signed. On the 2d of October the Commissioners, by the authority of the Commissioner on Indian Affairs, detailed Col. A. G. Boone, and Dr. J. W. Daniels as a committee to take a delegation of the Red Cloud and Spotted Tail Indians to the Indian Territory. We obtained signatures of the Indians at Standing Rock, on Oct. 11th, at Cheyenne River Agency on the 16th, at Crow Creek Agency on the 21st, at Lower Brule Agency on the 24th, and at Santee Agency on the 27th. Those signing representing 15,000 Indians. At all of these agencies the provisions of the agreement were made perfectly plain to the Indians, having been fully explained to them. The Indians on the Missouri river, with the exception of the Santees, objected to visiting the Indian Territory, and a supplementary clause was made exempting them from that part of the agreement. The Commissioners were painfully impressed with the lack of confidence the Indians had in the pledges of the government, and in the speeches that were made by some of them they portrayed the wrongs they had received from the whites, arraigned the government for gross acts of injustice and fraud, and described treaties made only to be broken, &c., in colors so vivid and language so terse that admiration and surprise, the Commissioners say, would have kept them silent, had not shame and humiliation done so.

That which made this arraignment more telling was that it often came from the lips of men who were friends, and who have hoped against hope that the day might come when their wrongs should be redressed. Said a chief to a member of our Commission: "If you white men had a country which was very valuable, which had always belonged to your people, and which the Great Father had promised should be yours forever, and men of another race came to take it away by force, what would your people do? Would they fight?"

Another chief said, "I am glad to see you. You are our friends, but I hear that you have come to move us. Tell your people that since the Great Father promised that we should never be removed we have been removed five times." He added, with bitter irony: "I think you had better put the Indians on wheels, and you can run them about wherever you wish." Again and again the Indians spoke with sorrow of the present war, and urged us "to rub it out." They said: "Tell the white people that this is not an Indian war; it is a white man's war."

It seems strange for Christian men to hear from the lips of a savage, "A great many widows and orphans have been made on both sides. It was time to ask who is to take care of them." "This matter has not been begun with judgment;" and then, with deep earnestness, added, "It is displeasing to the Great Spirit." It made our Commissioners remember the words of Jefferson: "I tremble for my country when I remember that God is just."

From the information received, the Commissioners believe that if the Indians are to be made self-supporting as speedily as possible, they ought to remove to the Indian Territory at as early a day as practicable. They are unanimous in the opinion that these Indians can, for the present, find homes on the Missouri River, but do not believe they will ever become a self-sustaining people there.

They do not think that it would be advisable at this time to remove the large proportion of the Sioux to the Indian Territory, but in view of the fact that it is the only valuable country upon which Indians can be located; that this country has been set apart by the most solemn guarantee as the future home of the Indian; that to open any part of this territory to white settlers would be a violation of the nation's pledged faith, and that here the Indians can become a self-supporting people; they recommend that the Upper Yanktonias or Standing Rock be joined to the Lower Yanktonias at the Crow Creek Agency, that the Ponkas, who speak the same language, could be removed to the Osage reservation in the Indian Territory; and if the Upper Brules at Spotted Tail Agency elect to remove to the Missouri river, that they be located on the Ponka reservation. In case they should go to the Indian Territory, that their reservation be given to the Indians now at Cheyenne Agency, and in case the Red Cloud Indians decide to go to the Missouri river, that they should be located at the Standing Rock Agency. In that case the Cheyenne river agency Indians could be located at the Great Bend.

The liability to drought, the plague of locusts and the character of the soil make this country better fitted for a pastoral than an agricultural people. If the Indians remain here permanently it must be long years before they can become self-supporting. We are convinced that the surest way to aid them in civilization will be to furnish them, under proper restrictions, cattle, and teach them stock raising. The Commissioners graphically describe the pitiable condition of the Sioux Indians, and enter into a detailed account of wrongs that have been suffered by them—the treaties that were made from time to time, and particularly refer to the treaty made at Fort Laramie in 1851, by which in return for certain concessions, the Government agreed to pay the sum of \$50,000 for fifty years. The Senate amended the treaty by limiting the appropriation to ten years. This amendment was never submitted to the Indians. They believed that the original treaty was in force. It is now more than ten years since the appropriations ceased. It is believed that this was the cause of the Powder river war.

Space is devoted in the report to the present war, which originated with the raids of Sitting Bull upon white settlers and friendly Indians in Montana, in 1875, and which was followed by numerous departures of Indians from their agencies. Regarding the remedy for evils that exist in the management of Indian affairs, the Commissioners submit that they are not to be found by again placing the care of the Indians in the War Department. It had this duty for nearly three-quarters of a century, and during the whole period there is no page in the history of our Indian management upon which their recollection can linger with emotions of pleasure.

After long and careful examination the Commissioners have no hesitation in recommending that it is wise to continue the humane policy inaugurated by President Grant. We believe that the facts will prove that under this policy more has been done in the work of civilization than in any other period of our history. It has accomplished this one thing, that those who were placed in trust of the national honor did not receive their appointment as a reward for political service. The great obstacle to its complete success is that no change has been made in the laws for the care of Indians. The Indian is left without the protection of law in person, property or life. He has no personal rights and no redress for wrongs inflicted by lawless violence.

We would especially call attention to the inadequate laws to punish white men for the sale of intoxicating liquors to the Indians. There is another fearful evil in the unlawful marriages of white men to Indian women. These unions are made after the customs of the Indians, and under their code they are regarded as valid. The law should declare that any woman who thus lives with a white man is his lawful wife, and that the children of such union are legitimate. The greatest difficulty in the administration of Indian affairs is the inadequate salary of an Indian agent. The Department has lost some of its most valuable agents simply because they would not steal and could not live on \$1500 a year.

The report concludes as follows: Our Indian affairs should be managed by an independent department. It ought to have at its head one of the first men of the nation, whose recommendations would be heeded, and who, as a member of the Cabinet, could confer with the heads of the War and the Interior Departments, and devise such wise and just plans as would equally protect the rights of the Indians and of our own citizens. We are painfully impressed with the fact that most of our Indian wars have not only been cruel and unjust to the savage, but have largely grown out of conflicts of jurisdiction between different departments of the Government. In conclusion, your Commission respectfully urge that every effort shall be made to secure the ratification and faithful fulfilment of the agreement which we have made by direction of the Government with this hapless people. We entered upon this work with full knowledge that those who had heretofore made treaties with these Indians had seen their promises broken. We accept the trust as a solemn duty to our country, to the perishing and to die.

For "The Friend."

The following was published in "The Friend" some years ago, I believe, and if the Editors are willing, should like to have it inserted in its columns again; hoping it may encourage some poor, tried, and may be, often cast down traveller "Zionward," still to trust in that "Arm of power," which first called and gathered this Society in the beginning to be a people, and which alone can preserve it on the "sure foundation." J. S.

Columbiana Co., Ohio, 12th mo. 29th, 1876.

"The last paragraph in Sarah Tucker's diary, supposed to have been written a short time before her decease.

"I am sensible that the present is a day that loudly calls for deep indwelling with the

Seed and Word of divine life; a day in which I believe the foundations of many amongst us will be closely tried. Oh, that we may faithfully attend to the ancient watchword, 'Every man to his tent, O Israel!' God is thy tent, the only refuge of the righteous; and all those who keep inwardly near to him, watching unto prayer, He will keep by His own right arm of power, out of all the by-ways and crooked paths of the enemy. Those that continue faithful in the support of and maintenance of that most precious faith once delivered to the saints, will be as the apple of His eye; and although many sore conflicts and deep spiritual baptisms may be theirs, on account of the sorrowful delusions, both in principle and practice amongst us; yet will they be preserved, a little chosen band, (although fasting and mourning may often be their lot), 'whose bread shall be given them, and whose waters shall be sure, experiencing their defence to be the munition of rocks.'"

"MARK THE SOFT-FALLING SNOW."

Mark the soft-falling snow,
And the diffusive rain;
To heaven from whence it fell,
It turns not back again;
But waters earth
Through every pore,
And calls forth all
Its secret store.

Arrayed in beautiful green
The hills and valleys shine,
And man and beast are fed
By Providence divine;
The harvest bares
Its golden ears,
The copious seed
Of future years.

"So," saith the God of grace,
"My gospel shall descend—
Almighty to effect
The purpose I intend."

Millions of souls
Shall feel its power,
And hear it down
To millions more.

—Philip Doddridge.

RETROSPECT.

"If it be possible, I pleading said;
"All things, O God, are possible to Thee—
Let only this cup pass, and in its stead
I will take anything Thou sendest me."

O self-deceiving heart, to make such prayer
For lighter burden and an easier way;
The heaviest load was best for thee to bear,
And thy dark path the one which led to day.

Be thankful that God does not always heed
The doubt and fear of each despairing cry,
But knows so well what all his children need,
And chooses best the way to lead them by.

—C. B. Leroy.

Keep in the cross, and purity will grow. The safest way is in the cross; take up the cross daily; mind to be guided by that which crosseth your own wills, and it will bring every idle word, thought and deed to judgment in you; and so the old man will be crucified, with the affections and lusts thereof; and you shall find the Lord to sit as a refiner, to judge out all the old leaven, the old nature; and so the new man will be raised up; and Christ, the power of God, will rule and reign in righteousness in you, who is the King of saints; to Him alone be all praise and thanks forevermore.—Letter of Richard Farnsworth.

For "The Friend"

Random Notes of Travel.

(Continued from page 165.)

Before beating an ignominious retreat into the interior of the coach, I caught glimpse of Snowdon in the distance—blue, cold, dreary. To climb the rugged sides of a monarch of British mountains was no part of our programme, therefore no disappointment was felt that the weather rendered it impracticable. Curious traditions linger about the region. One of them relates to "a stone that stands, or formerly stood, in Yr Arddu, very far from the summit. This stone, up to which is a smaller one, is called man, du yr Arddu,—the black stone of Arddu. It was formerly believed that if two persons slept a night upon the top of this stone, one would become a poet, and the other a man!" "The simple inventor of this legend did not know that the terms were too often synonymous!" This comment was certainly not made by the "poet."

As we approached Llanberis, we entered a great slate quarrying region. There is lofty slate mountain near the lake of the name, whose immense quarries, afford employment for thousands of men, which solve the problem that has long been puzzling to what do the people live upon in this desolate region? In the quarries of Penrhyn 5000 men are employed. Some of these mountains are 2000 feet in height, and the terraces on the sides are wide enough for narrow railway which convey the brittle slate to slides, down which it is carefully transported by steam engines, then taken by their cars at the foot to Caernarvon for exportation. It is said that the income from some of these quarries £100,000 per annum. Narrow-gauge railway now popular, were first successfully worked among the slate quarries of Wales. The blasting is in progress, great care is taken to prevent accidents; a horn gives notice to retreat when necessary, while another recalls the laborers to their work. The Welsh slate are fossiliferous, containing marine shells, and are therefore of marine origin.

In Wales the slate is appropriated to many purposes. It is not only used largely in roofing, but sheets of it cover the sides of the houses; while pillars are also made of it, which resemble unpolished marble. It is also used for bathing and washing structures, mantelpieces, &c.

The effect of the bald, rugged outline of these slate mountains is very picturesque. I every land man's ruthless hand plunges into the hidden treasures of the earth,—she is wounded in the conflict, and man triumphs. Here, incessant blasting and splitting and digging, have accumulated great piles of debris which add to the gloomy character of the scene. Here and there, however, are little green nooks where the small, white-washed houses of the quarrymen are seen, a garden in the rear, and often flowers and vines growing over the roof. I fear the exterior of many of these dwellings is all that we can admire. They are far too small for the crowds that inhabit them, and I suspect that a minute inquiry into the modes of living among the people, would not corroborate the statements of our friend, the Welsh steward.

Bangor, 6th mo. 17th.

Had we any doubts as to our locality this evening at Bangor, our sense of hearing would at once have instructed us; Welsh, and

leth only, resounded on all sides, and great as my respect for that ancient language, I not call it musical. The nationality of a idiom generally crystallizes around its chief tones, but nothing particularly unique was arent in this ancient city; not even Welsh s, were to be seen; those curious high-wounded and peaked relics of the past. It is t that only in remote districts are they to be found on the heads of the eldest women. We were told at Bala, that had we been at a fair the day preceding, we would have quite a number; but Bala Water, which is passed later in the day, reflected none of s; the time had gone by, we were literally day after the fair!"

remarked that the language is not musie-merited has it been prolific in surnames, rgan, Roberts, Jones or Evans adorning most every sign-board—the first of these dominating. We stopped at a small station for half an hour, waiting for a train. o very well dressed persons being seated r us, accompanied by a small boy, I remarked to — that I thought we might most presume to know the name of our fellow-travellers without inquiry, and that not be the surname of the little one is Morgan, ling the child to me, I asked him his name, fifth Morgan, was the instant reply, much ur amusement. The beautiful trill of the and the distinct enunciation of the i, were admirable.

Bangor lies in a romantic valley, and consists chiefly of one narrow, crooked street, rly a mile in length, with several opening the water side. It boasts of great antiquity, ample dedicated to Minerva having, say old chronicles, been here erected by Conge, a British prince. The trade of the city is most limited to the export of slates, but beauty of its situation and nearness to sea, attract thousands of visitors during summer.

Bangor is distinguished as the place in which arose the noted Bangorian controversy which caused much excitement in the early t of the last century. This memorable disease arose from the advance by Dr. Hoadly, a bishop of Bangor, of sentiments contrary those entertained by "the church," respecting the spirituality of Christ's kingdom. In 7 he preached a sermon before the king, the text "My kingdom is not of this world." John xviii. 36,) asserting that the clergy h no pretensions to any temporal jurisdiction, and strenuously maintaining that temporal princes had a right to govern in ecclesiastical politics. A long war of pens instantly an, managed on both sides with all the canery of polemical scribes, "disgusting," s Hallam, "from its tediousness and the most unwillingness of the disputants to ak ingenuously what they meant." Hallam's criticism will certainly be thought judicious, if Pope's estimate of the polemics' tendencies had any basis in fact, who cites

"Swift for closer style,

But Hoadly for a period of a mile!"

The suspension bridge over the Menai Straits, once esteemed one of the world's wonders, and the tubular bridge which remains indeed, both stupendous structures, ing the beholder with admiration and awe, while they are sublime monuments to the genius of their architects, Telford and Stephenson, next attracted us. We walked

across the former that we might examine it at leisure, and found that though it is surpassed by that at Niagara, this early attempt remains an admirable specimen of its class. Finding carriages in waiting, we drove to the still greater and more wonderful structure, about two miles distant. The manner in which this triumph of modern engineering was raised from the water by hydraulic pressure, placed upon piers 100 feet high, and united into one continuous tube as a part of grand railway connection, has been so often described that we will not revive it here. The sound of a train rushing through, promised a new sensation, and seeing one coming, I awaited the result at the entrance while standing quite near the track. The effect was overpowering, and I fled terrified from the scene. It is worthy of note that this tube of 1834 feet has proved to be a very delicate thermometer, and that while a weight of 300 tons is required to cause a depression of about 1½ inches, a little sunshine will raise the centre one inch and produce a greater horizontal deflection.

Nine miles by rail through a beautifully picturesque country, brought us to Caernarvon, and in a few minutes after our arrival we were within its magnificent castle, built by Edward I., and the reputed birth-place of Edward II. It is impossible to describe the mingled sensations of awe, wonder and delight, that thrilled me on entering for the first time one of these hoary relics of the past, upon whose battered walls the storms of 600 years have spent their force. This castle is one of the grandest ruins of its kind in Britain. Its lofty battlemented walls are partly covered by ivy and lichens, whose brown and white and mottled tints harmonize with its weather-beaten aspect. For the first time we crossed a moat and passed through a massive archway in which were traces of four portentous walls. The walls are from eight to ten feet thick, enclose three acres, and are crowned by numerous towers, some of which we ascended by means of spiral staircases of stone. Many of the steps were quite worn away, showing that a numerous garrison had occupied this great stronghold. The court-yard was covered by turf of velvet softness, and mounds of rich brown mould were bright with masses of roses and pansies. The quiet of peace reigned over all, undisturbed but by the occasional cawing of the rooks, a feathered garrison.

The Vale of Llangollen! How shall I describe the beauty of this exquisite place! once the favorite home of Owen Glendower, the great Welsh Chieftain, and later the chosen retreat of the "Ladies" who have rendered it famous. The river Dee turns, and winds, and sleeps among the hills, or dashes its amber waters into creamy foam, over a bed of rocks. Best of all, we saw town, river, and valley beneath a warm, bright sun, which lends a tenfold beauty even to this landscape.

After breakfast I left our pleasant little hotel for a short walk to the fine old bridge which spans the river here. For 500 years the traffic of the town had been transported across its arches. A group of donkeys, saddled and bridled, stood in an open space under the guardianship of an old man, who approaching, cap in hand, addressed me with "And now, ma'am, is it the Castle or the Abbey this morning?" I replied that it was the Abbey, and that we had engaged an open carriage for the excursion. A drive of two

miles soon brought us to the gateway of a field, through which we passed to the ruins of the abbey. As Caernarvon had been the first castle I had explored, this was the first deserted monastery I had ever seen, and the Vale Crucis was the first also in Wales to be destroyed by Henry the VIII. If my heart beat high in crossing that meadow, I was not surprised. Grand old trees clustered around the mouldering walls, throwing their shadows over low hedgerows, sweet with wild roses, and climbing briars. We rang a bell, which aroused the custodian, a tall elderly Welsh lady, from some remote dwelling, and were admitted into the interior. Surely the grand old gothic doorway, with the fine window around which the ivy twined its greenest tendrils, with the deep blue sky for a background, formed a finer picture than ever it presented in its palmy days. Vale Crucis was founded by Prince Mudoic, about the year 1200, the prince, whom legends assert, led a party of his countrymen to this western world. It is supposed to have been in perfect order 350 years ago, but a portion of the chapel only now remains, its finely carved gothic ornaments having been carried off to construct the walls of a neighboring barn and adorn the interior of a hay-loft. Our guide pointed out every thing of interest, from the refectory to the fish-ponds, and gave me a bouquet of lovely rose-buds from the garden of the old monks. How dark and rich was the mould from which they had grown! — expatiating on the grandeur of some of the ancient Welsh castles. "Ah! yes," said our cicerone with enthusiasm, "what a people they must have been to have needed such castles to keep them in subjection!" S.

(To be continued.)

1st mo. 20th, 1851.—A dear friend and his wife, called in this evening with whom we had sweet converse upon the things concerning the spreading and power of truth, which lie nearer to our hearts than anything else. He was under a concern that Friends might more frequently visit the members, who have little opportunity of mingling with rightly concerned Friends; and encourage them to faithfulness.

He thought the Society was still blessed with a living ministry; that many acknowledged it in their hearts, and he could not think it would be lost, but in time, fruits would appear. He expressed a fervent and sincere desire, that Friends who felt the weight of service, and of our responsibilities, might be encouraged. I united with his views in relation to the advantage of Friends more generally visiting one another in a right spirit; and we may hope that the time is drawing on for it.—*Journal of Wm. Evans.*

The terrible cyclone and flood from the sea, which caused such great loss of life on the flat lands near the mouth of the Ganges, in India, last October, was also very destructive to the shipping which happened to be at the head of the Bay of Bengal at the time on voyages to or from Calcutta. The ship Prince Waldemar was totally lost, only four men out of the ship's company being saved. Fifteen other ships were either totally or partially dismasted and otherwise seriously damaged. Of the fleet of merchant vessels known to have been at the time in the Bay or the Hoogley river, swept by the cyclone, only three

escaped without serious injury. It does not appear, however, that any American vessel was among the sufferers.—*Ledger.*

Account of Mary Lamley.

Selected.

[While reading the dying testimonies of Mary Lamley, contained in *Piety Promoted*, vol. 2d, I felt a desire to arise to see it published in "The Friend," if the editors think best, hoping that it may prove encouraging to some little visited ones, whose knees are ready to smite together on account of the signs of the times. Oh, may such not be discouraged! The Lord's arm is not shortened that He cannot save, neither is his ear grown heavy that He cannot hear, "But for the sighing of the poor and the crying of the needy He will arise," for the help of those that fully trust in him, having no other helper. I trust that He will yet beautify Zion and build up the waste places, strengthen her stakes, and lengthen her cords, and Jerusalem shall yet become the praise of all the earth; but the work must first be an individual one, we must be individually stript of our worldly-mindedness, we must be hewed and polished by our Lord's refining power, before we can be lively stones, fit to be built up into a spiritual house to offer spiritual sacrifices that will be acceptable in the divine sight.

Oh, there must be a full surrender of all we have and all we are, and become like the passive clay in the hands of the potter, saying in truth, "Holy Father, make me what thou wilt—have me to be, anything or nothing. Though I may be considered by the world as a fool for Christ's sake, thy will be done." Though such may feel at times like a lone sparrow on the house-top, mourning on their way, and saying, "O God, save thy people and give not thy heritage over to reproach," let not such be too much cast down; the Lord sees their exercise, He hears their prayers, their sighing is not hid from his all-seeing eye, and I believe He will arise in his own good time, and pour into their exercised souls the consolations of the gospel; He will give them beauty for ashes, the oil of joy for the spirit of heaviness. Oh then, may we all be able to trust in the Lord, for in the Lord Jehovah is everlasting strength.

T. T.

Shirley, N. Y., 12th mo, 12th, 1876.]

The following is extracted from the account published in "Piety Promoted":

"Mary Lamley, the wife of William Lamley, of Bloxham, near Banbury, in Oxfordshire, was suddenly visited with illness the First-day of the Second month, 1722. She said that her Redeemer lived, and because he lived, she lived also, and that he would stand the last day upon the earth. She desired Friends that came to see her not to sorrow for her, for if the Lord was pleased to take her from them, he could soon raise up one or another of them that might be of more service than she had been. She advised them to faithfulness, and to look to that which would never change nor alter; and above all things in this world, to have an eye to the blessed truth, for she believed that the Lord had blessings in store for some of them; advising them to stand faithful in whatsoever the Lord should require at any of their hands.

At another time she said, "The Lord deals with us as a tender father doth with his child, who, when he first sets him to work, en-

ployeth him in small matters, and afterwards, when the child groweth in strength and understanding, he requireth greater service of him. So the Lord gently leads on his people in his work." The same arm that divided the waters of the sea, and made them as a wall on the right hand and on the left, while Israel passed through the midst, as on dry ground, when the enemies pursued, that same arm caused the waters to return and overthrow them, that there was not one left; and yet there was a wilderness for Israel to pass through afterward, in which many fell, [because] of their murmuring, unbelief, and disobedience."

"Another time, speaking of divers states that Zion's travellers pass through, she said, "We ought to be concerned to be content in every state that the Lord is pleased to bring us into. When we are poor in spirit, we ought to keep the word of patience, and then the Lord will keep us in the hour of temptation, and in his own time he will abundantly bless the provision of Zion, and satisfy her poor with bread; and when he giveth us a full cup, and maketh it overflow, then let us remember our state of poverty, that we may be kept humble before him."

She had also an exhortation to several Friends, in the words of the prophet Isaiah, "Cease to do evil, and learn to do well." She earnestly pressed the necessity of ceasing from evil, and from all that tends to it, that so they might come to learn of the Lord to do that which is good; for if any pretend to go about the Lord's work, and do not cease from evil, that will be a contradiction."

"She said at another time, "I am weak both inwardly and outwardly. I think I am as empty as ever I was. I have sometimes been so favored with the divine goodness, that I have had something to say for the encouragement of others; but now I do not find that I have anything either for myself or them."

But after some time had passed in waiting upon the Lord, in solemn retirement, the Lord gave her, as she declared, in measure what her heart desired; and she spoke to this purpose: "This evening I have been very poor in spirit. We ought to learn in every state, therewith to be content; to wait in faith and patience, the Lord's time, which I believe the living in Zion can say, we have always found to be the best time. It is he that hath the key of David, and when he shuts none can open; and when he opens, none can shut. Therefore let it be with us, as it was with the Lord's servant Job, as to that firm trust in God, which he expressed when he said, though he slay me, yet will I trust in him."

"My friends, let us wait in faith and patience upon God, although he may be at times as a sealed fountain unto us, yet in his own time he will open, and cause the living water to flow, which, blessed be his name, my soul tastes of at this time, beyond what I did expect, and now my strength is once more renewed in him. Who could have thought I should have been so favored at this time. The Lord hath made his strength to appear in my weakness. It was in a very acceptable time he did appear, and therefore let us always wait for his appearance, that he may be our guide, and may be known to go before us. The answer of Christ to some that spoke to him, concerning going up to the feast, was, My

time is not yet come; but your time is already ready. There is abundance in it. Let me not make our states look better than are, or attempt to go up to the feast with the Master of the house, for if we do, he is not pleased with us."

"She spoke at another time, "This eve I have enjoyed that which is beyond what I desire that those I may leave behind may live in that that is beyond words, may be faithful. It is what I have been concerned to call people unto, and the will so furnish his people with strength although they may be but few in number that one shall be able to chase a thousand for every tongue that shall rise in judgment against the truth shall be condemned, and I and my followers shall have the victory. Let us not premeditate what we shall say in behalf of truth, for I believe it will be given us in the time that it may be required of us. The Lord hath favored with blessing beyond what we could ask or think; now, if we part, surely it will be a good part to part, when we are in the breast arms of our beloved. If the earnest sweet, what will the full possession of inheritance be?"

"She said, at another time, "My friends desire we may make sure of the Lord for portion, in seeking him while he is to be found, and calling upon him while he is to be found; for there is no other that can support and able us patiently to bear those afflictions may come upon us. It is certain that it will come upon us all at one time or another, and therefore let it be our chief care to love the Lord, and to avoid all those things that would bring wounds upon us; for I had had a wounded conscience when the afflictions have been upon me, I believe would have been more than I should be able patiently to bear. But when the Lord is pleased to favor us with the smile of his countenance, this sweetens the chastenments that he is pleased to bring upon us. Let it therefore be our great care, to be conscience void of offence towards God, towards men, and then I believe the Lord will be with us, and support us in the great trials, and we shall have cause in measure with the psalmist, "He maketh my strength in my sickness;" for he will make it so to us, that we shall be able to bear our afflictions with a quiet and easy mind."

"She said at another time, "It hath been in my mind this night, to consider how I went with the disciples of Christ when I went fishing, and toiled all night and caught nothing, until the Lord came, and directed them to cast the net on the right side of the ship, and then they obtained that which they labored for. Now when we are laboring the spiritual food, and for a season may have nothing, let us patiently wait for the Lord's direction, and then we shall surely obtain what will be sufficient for us; for his dominion is the same to direct his people now as ever it was in that day."

"My friends, we have no continuing city here; let us therefore seek one that is to come, whose builder and maker is the Lord. Let not those be discouraged that are troubled concerning to labor in the Lord's work, although they may be but few in number in the time may come when more may be engaged in it. Let us all give up freely to serve the Lord in whatever he requireth

for he requireth obedience to the manifestations of his will, both in male and female. We desire that those that are truly sensible of the want of laborers, may be concerned to say the Lord of the harvest to send forth more laborers into his harvest; and that we say all be truly concerned for the honor of God, and for the promoting of his truth, more than for any outward enjoyment, and then the Lord will be with us, and stand by us in our exercises."

(To be concluded.)

For "The Friend."

Art Thou in Health My Brother.

This language has presented to the view of our mind, with feelings far different from those of Job. Are we, beloved Friends, rooted and grounded in love. Endeavoring, above all things, to act for the honor of Truth, and the welfare of each other. Where this is the end and fervent concern of our hearts, there will be an earnest wrestling not only for ourselves, but for the flock and household of truth. As this is our individual engagement, we shall be enabled to travail availingly for the welfare of Zion, and the enlargement of her borders. Then will He who remains to be our Head over all things to His Church, appoint a quality for service. Our hearts will go forth with earnest wrestling, not only for the flock and family of Christ, but in the abundance of His love, who left the bosom of His Father, to seek and save the lost. We will wrestle for those who are afar off. We will be made willing, in and under this love, to seek for the lost, and endeavor to bring that sin that has been driven away; will bind that which is broken, and strengthen the sick. We will thus be enabled to fill our appointed places in His Church, and among His people; His honor and our own peace. Being filled with His own free grace, for the service of others, we will be a saviour of life unto us. I long that we, as a people, may be thus allied, and that all that put forth a hand to meetings of worship and discipline, may be it for the putting forth of our Holy Head. We will witness our meetings being put in the power of God. Then His wisdom and love would prevail over all, and we would be refreshed with His holy presence in our midst. Let us all, of every age and class, examine ourselves, and see if we are in possession of that love, that is of the Father, and that we are filling, as he designs, the places assigned us, to His honor. For He will be in reverence of all that come nigh Him.

The Alabama Claims Commission, when they conclude their labors at the close of the year, will have left a sum equal to one-half the original Geneva award undisposed of in the Treasury, after all the awards are paid. It still contains probably eight millions of dollars credited to this fund, and its future disposition rests with Congress. Several bills are now pending, laid over from the last session, which admit additional classes of claimants for the money, but it is very uncertain to whether any of them will pass. There is a divided sentiment as to the right of the Marine Insurance Companies to participate in the award, and this retards the passage of the pending bills. The subject has been very debated in both Houses at former sessions, and it is doubtful whether it can be dis-

posed of this winter, owing to the political complications.

It has always been maintained in these columns that Congress has no business to go out in search of persons to distribute this surplus among. Its duty was done when it provided for the adjudication and payment of proper claims. This being done, and all just claims being met, whatever surplus then remains should be returned to the Government of Great Britain as its rightful owner. It is not held, we hope, by any one on this side of the Atlantic that any amount of money can be taken as compensation for any affront our Government may have suffered through the *ractions* of Great Britain in permitting the Alabama and other privateers to sail out from their ports.—*Ledger*.

Selected for "The Friend."

Reasons why we should not Read Fiction.

It is a waste of time, it destroys a relish for more substantial reading, it weakens the mind, it often holds up immoral characters as heroes, and in other ways exerts an evil influence over the mind. It arouses feelings that ought not to be aroused, and in moments when we would gladly think of something better. How such reading fills the mind with trifling thoughts, which no effort of ours alone can keep out. And when the taste for such literature is once acquired (as it soon is) we know not where it will end or how fearful the consequence may be; even such books as are said to have a good moral in them, may have a far more hurtful tendency than many are aware of. Some may think they can read such books without being hurt by them, but this is not so; let us then shun everything of the kind, earnestly desiring to be made and kept pure in heart, and true to Him who made us.

"Father, my soul would be
Pure as the drops of eve's unsullied dew;
And as the stars, whose nightly course is true,
So would I be to Thee."

A serious effect of novel reading is, to dissipate those religious convictions with which we are all at times favored, and for which we must give an account. It is almost certain to give a distaste for the Bible and other religious reading, to self-examination, serious thoughtfulness and prayer.

See etc.

The visit of God's holy and ever beloved Son was signal; and in his fear and dread, we received the Gospel with a ready mind, and with broken hearts, and gave up to follow the Lord fully, casting off the weights and the sin that easily besets, and departed from the evil ways and vanities of this world; stripping of all needless apparel, and forsaking superfluities in meats and drinks; walking in the plain self-denying path, having the fear and dread of God in our souls, whom we were afraid of offending in word or deed. Our words were few and savory, our apparel and houses plain, being stripped of superfluities, our countenances grave, and deportment weighty; amongst those we had to do with. Indeed we were a plain, broken-hearted, contrite-spirited people; our souls being in an incessant travail, to do all things well-pleasing in the sight of God. Our concern night and day, was to obtain, through Jesus Christ, the great work of salvation, and thereby an assurance of the everlasting rest and Sabbath of our God.—*Charles Marshall*.

THE FRIEND.

FIRST MONTH 13, 1877.

"What manner of communications are these that ye have one to another, as ye walk and are sad?" The two disciples to whom this query was addressed, doubtless thought there was abundant cause for mourning, when the "prophet mighty in deed and word," whom they had trusted was He "which should have redeemed Israel," had been crucified as a malefactor, and as they feared had gone from them forever; while the priests and people generally were triumphing in the murder they had perpetrated, and were prepared further to gratify their vindictive hate by persecuting any who would show themselves to be followers of the despised Nazarine. Whatever hopes had been awakened by the testimony of the women who had been at the sepulchre, "that they had seen a vision of angels which said that He—their loved master—was alive," having risen from the dead, those hopes were so contrary to the whole course of natural events, that they could not banish their distress nor enliven their faltering faith, so as to withhold the mournful interchange of disappointed hopes and gloomy fears that marked their countenances with descending grief.

How must their feelings have changed as their unknown companion presented a different view of the events that had so depressed their spirits, opening to their understanding the Scriptures which concerned himself, and foretold that Christ "ought to have suffered these things and to enter into glory," causing their hearts to burn within them while He talked to them, although at first He had upbraided them as unwise and slow of heart to believe. And when at the blessing and breaking of bread their eyes were opened and they recognized the risen Saviour, their unbounded joy suffered them not to rest until they returned to Jerusalem to tell to their fellow-mourners the glorious news.

Are there not at the present time sincere disciples of the crucified Redeemer, whose hearts are often sorrowful and their countenances sad because "of the things which are come to pass in these days?" Such as these cherish as a precious privilege religious intercourse one with another, respecting those interests and events which are intimately connected with the welfare of the church and the cause of Truth. To the unappointed eye the revulsive changes that are taking place in many parts of the religious world, may appear as almost unmitigated evils, foreboding greater spiritual deadness and prolonged triumph of the spirit of the world. But man is too short-sighted to see the end from the beginning, or fully to comprehend the ways and means by which the omniscient One controls events, so as to bring about His own purposes. How often do we draw conclusions from insufficient data and find ourselves mistaken. Like the events that drew forth the communications and saddened the countenances of the two disciples that journeyed to Emmaus, these revulsions in the visible church, and the arrogant assaults of professors of materialism on the religion of Christ, must grieve the hearts and depress the spirits of the disappointed disciples, who perhaps have been looking for the speedy redemption of Israel;

but they may be permitted by Him who has all power in His hands, for the purpose of finally removing those "things that are shaken, as of things that are made, that those things which cannot be shaken may remain."

In our own religious Society there is to be found a like disposition among some of its deeply exercised members, to give way to too great discouragement at "the things which are come to pass in these days" within its borders, so as almost to rob them of sustaining faith in the ultimate triumph of truth over error. But when in their "communications one to another," their spirits are depressed, can they not, at times, realize that He who has declared, in reference to his people, that "In all their affliction He was afflicted," has joined himself with them, and so changed the lights and shadows of the clouded scene, that as from the mount of spiritual vision they are enabled to discern things far brighter, than are invisible; so that, for the time, their depressing troubles are banished, their fears scattered, and their faithless anxiety rebuffed.

Let it then not be forgotten, that the cause of Truth is the special care of Him who is unseen and eternal, and that He often fulfils the counsels of his will by means which the outward eye cannot see, nor the outward ear hear. Having promised his church that He will never leave nor forsake it, but that He has graven it on the palms of his hands, and its walls are ever before him, He calls upon its members to stay their minds upon Him, and not to be "slow of heart to believe all that the prophets have written."

SUMMARY OF EVENTS.

FOREIGN.—The representatives of the great European Powers in the Conference at Constantinople have had several meetings but, so far as appears, without having arrived at the desired result. It is the demand of Russia that effective measures shall be taken for the protection of the Slavonic populations of European Turkey, and better governments provided for the provinces in which they form the majority of the people. The plans proposed by Russia for attaining these objects were in the main approved by the other Christian Powers, but Turkey objects that they are incompatible with the integrity and independence of the Ottoman empire. The Sultan's government has not, however, positively rejected them, in that in case the representatives of France, Great Britain and the other powers would be withdrawn from the Conference, and the threatened invasion by Russia would soon follow.

The Railway Statistics of Great Britain for the year 1876 have only recently been published. They show that steady increase in business which has attended the British railroads for many years. The gross receipts of the railways during 1876, were £78,482,758.

An extradition treaty between Spain and the United States has been concluded and signed. It applies to all criminal offences except those of a political nature. The Spanish Cortes has been prorogued, and no date has been assigned for its re-assembling.

A St. Petersburg dispatch of the 4th says: The ports of St. Petersburg and Liban are free from ice, and navigation to and from Baltic ports is no less impeded, except in Revel roads, which are full of drift ice.

A special dispatch to the Pall Mall Gazette from Copenhagen says the first railway accident in Denmark, involving loss of life, has occurred between Hirtsholm and Aarhus. A train conveying a hundred laborers to clear a snow blockade ran off the track. Nine persons were killed and thirty severely hurt.

The Federal Council of Germany has made an important constitutional concession to Alace and Lothar, by having agreed to the annexation of these provinces by the Provincial Board of Representatives, if approved by the Federal Council, shall become law without the previous approval or cognizance of the German Parliament.

According to a dispatch from Madrid to the London Standard, the extradition treaty between Spain and the

United States, includes crimes committed in Cuba and other Spanish colonies.

Advices from Mexico state that ex-President Lord, escaping his escape from the country, having embarked at Acapulco. Whole brigades of Iglesias' army have pronounced for Diaz, but the latter had not yet dared to attack Iglesias who was strongly posted at Silva. General Mendez, who was appointed regent by Diaz, to act during his absence, has ordered an election on the 28th inst., to choose President, Chief Justice and members of Congress. The proclamation of Mendez forbids all members of the governments of Juarez and Lerdo, as well as Iglesias to be candidates.

UNITED STATES.—The public debt was increased during the Twelfth month \$3,585,111. This increase was due to a large amount of gold in the custom receipts, and also in those from internal revenue.

The coinage at the different mints of the U. States for the Twelfth month was \$7,283,095.

Vessels belonging to or trading with ports in the United States, reported totally lost or missing during the year 1876 numbered 25 steamers, 41 ships, 83 barkes, 58 brigs, 241 schooners—total 440, value \$7,890,000.

Captain Eads and Colonel Andrews have gone from New Orleans to Washington to receive the first payment on the treaties. They report a clear, deep channel, two hundred feet wide and twenty feet deep, from deep water in Mississippi to deep water in the Gulf.

A table of disasters on the Lakes in 1876, shows 990 tons of shipping lost—value \$1,173,200.

Cornelius Vanderbilt, the most wealthy citizen of New York, died in that city on the 4th inst., in the eighty-third year of his age. He was the son of a market gardener on Staten Island, and began life with very small advantages in respect of education and social position. He however soon became distinguished for energy, industry, foresight and business capacity, so that his undertakings were mostly prosperous. He left an estate variously estimated at from \$100,000 to a million in Tennessee, in two donations of half a million each. The deceased had no claim to the title of Commodore which was usually prefixed to his name.

A recent census of Reading, Penna., shows that the city has 7,732 occupied dwellings, and 454 vacant dwelling houses, with a total population of 49,109. In 1870 there were 7,000 and 400 inhabitants.

Later accounts of the railroad disaster at Ashabula, Ohio, make the loss of life smaller than was at first reported. It is now stated that only 147 persons were on the train when it broke through the bridge, and of these 72 were rescued from the ruins alive. Some of the rescued have since died from their injuries, making the entire destruction of life about eighty persons.

The total amount of anthracite taken from the Pennsylvania coal fields in 1876 was 18,350,950 tons which is 1,529,323 tons less than in 1875.

The Schuylkill river is frozen over from Pottsville to the mouth, the ice in some places being six or eight inches to two feet in thickness. It is crossed by wagons and sleighs at many places.

The official statistics of the "Methodist Episcopal Church" in the United States report the total number of members of that religious society to be 1,622,291; the number of churches, 11,772; and of preachers, 12,000.

The interments in Philadelphia last year numbered 267. There were 48 deaths of consumption, 23 inflammation of the lungs, 16 typhoid fever, 13 diphtheria, and 10 crop.

In Louisiana as well as South Carolina the election disputes have led to the attempt to establish two State governments. In the first named State, Gen. Nicholls has been inaugurated as Governor on behalf of the Democratic party, while G. Packard represents the Republicans. In his inaugural address Nicholls says that he has been elected by a majority of more than 8000 of his fellow citizens.

The Markets, &c.—The following were the quotations on the 8th inst. *Philadelphia*.—American gold, 1661. U. S. sixes, 1881, registered and coupons, 112; do. 1868, 111; do. 5 per cent, 111; a 112; do. 4 per cent, 107. Middling cotton, 13; a 13; do. for upland, 13; do. for lowland, 12 1/2. 1876. *Pennsylvania* red wh., \$1.15 \$1.17; amber, \$1.18 \$1.20; western white, \$1.50 \$1.52. *Penna.* dry, 74 80 cts. Yellow corn, 60 cts.; mixed, 58 59 cts. Oats, 37 41 cts. New York cheese, prime 1 1/2 to 1 3/4; western, 1 1/2 to 1 3/4 cts. Best cattle sold at 6 1/2 to 7 cts. per lb. Gross for extra 5 1/4 to 6 cts. for fair, and good, and 1 to 5

cts. for common. Receipts at the two principal ports during 3500 head. Sheep sold at 4 1/2 cts. per pair. Receipts 1130 head. Hogs, \$8.50 to \$9.50 100 lb. net. Receipts 4900 head. *New York*.—Soft fine flour, \$5.20 to \$5.75; State extra, \$5.30 to \$6.05; brands, 26.50 to 29.00. No. 2 Milwaukee spring wheat \$1.40 a \$1.42; No. 3 do., \$1.35; red winter, \$1.14. State, rye, 92 c. 94 cts. Old milled corn, 60 c. Southern yellow do., 58 c. Oats, 37 41 cts. Barley, \$1.11; State, 80 cts. *Chicago*.—No. 2 wheat, \$1.26; No. 3 do., \$1.13. Corn, 44 1/2 cts. 35 cts. Barley, 65 cts. Lard, \$11.40 per 100 lbs.

TEACHER WANTED.

A suitably qualified teacher for the Adelphi Col School, Girls' department, &c.

Address, with reference, to
Caleb Wood, 524 South Second Street,
Israel H. Johnson, 809 Spruce Street,
Samuel Baker, corner Queen and Knox str
Germantown.

FRIENDS' ASYLUM FOR THE INSANE

Near Frankford, (Twenty-third Ward), Philadelphia. Dr. J. M. Smith, Superintendent—JOSUAH H. WOOD, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at Melford, N. J., on the 6th of Sixth month, EDITH S., only daughter of Edward and Mary B. Evesham, in the 19th year of her age, a member of U. Evesham Monthly Meeting. This dear young woman had been for a considerable time a pupil at West School, where she was a careful and interested student.

Whilst pursuing her studies in this school, with cherished hope of an early completion of them, she was afflicted with a severe and alarming attack of illness. She was shortly after removed to the care of a friend near by, and afterwards was taken to her own home, where she arrived in a greatly enfeebled condition. In some notes left behind her, written on this time, she says, "I trust I shall receive this and a blessing from my merciful Father, know that of myself I can do nothing." Immediately she thus adds, "Keep me, O Lord; strengthen my feeble faith in thee." Again: "Keep my tongue from evil and my lips from speaking guile." An advanced period of her sickness, her sufferings from intense oppression were great and hard to bear; y was her fervent endeavor to endure these afflictions with becoming fortitude, expressing herself thus: "Pray for patience, but I sometimes fear it will not out. Pray for me." It was apparent that the disease was making rapid advances on her enfeebled frame, and being informed that no hope of recovery was under a deep sense of the exceeding sinfulness of unregenerate heart, she exclaimed: "Wicked, woe wickod; but I love my Saviour, and I believe Jesus loves me." The next morning she said nearly to words: "I feel very peaceful and happy. Dost thou think this an unusual thing? I shall be content. Near the close of the day which was the last of earthly course, seeming remarkably strengthened on the occasion, she called her relations around her bed, and gave them, one by one, much affectionate friendly counsel. Absent ones were also remembered, and she especially mentioned her dear friends to former classmates and others with whom she had associated at Westtown School. Being naturally diffident mind, she spoke cautiously and briefly of feelings; yet it was evident to those who were with her, that she had been led throughout her sickness into a course of patient suffering and hidden conflict of soul, in which there was a sweet serenity and peace of spirit in which she yielded up her breath, the consoling assurance, that having been washed made white, her redeemed spirit was gathered to arms of the Everlasting Shepherd.

On the 19th of Eleventh month, 1876, M. BALEY, widow of Micah Baley, in the 97th year of her age, a member for near seventy years of 86thly Monthly and Particular Meeting. She stood firm in the ancient doctrines and testimonies of Friends. Her life was calm and peaceful.

On the 29th of 11th mo., 1876, ANNE, wife of the late Jeremiah Rogers, in the 85th year of her age, a member and elder of Middleton Particular Monthly Meeting, Ohio.

Random Notes of Travel.

(Continued from page 175.)

Llangollen has its castle also, as the donkey driver had suggested, and one of the most important in Wales. Dinas Bran, derived its name from Bran Fendigaid, or Bran the Blessed, the father of Caradocus. Fendigaid defended his country, Siluria, at an early period against the Romans, and being sent a hostage to Rome for his son while Saint Paul was in that city, is said to have brought back a knowledge of Christianity to his native land.

The castle of Dinas Bran stands on a lofty and almost inaccessible position, 300 feet above the river, and in consequence was often resorted to as a place of safety. The two wells within its walls, were never known to be without water. It is nothing now but a crumbling ruin, reminding one of a forsaken ruin, from which the eagle had long since flown.

Castle and Abbey were alike illustrative of their age. Some warlike prince or baron, after committing every conceivable wickedness, becomes a prey to remorse and melancholy. To expiate his crimes he was encouraged to found a monastery, to which he frequently retired, like some stricken deer, to die within its shades.

Who has not heard of the "Ladies of Llangollen!" This charming vale has something to answer for, in enticing from their homes so noble Irish ladies, whose devoted friendship led them to dream of forsaking the gay world of fashion, and living a quiet, useful, happy life, together here. They sought and found the seclusion they were in search of, and it is rather amusing to see to what time has brought them, as displayed in their pictures sold at every corner. The following extracts are taken from an "Account of the Ladies of Llangollen," which is equally popular.

"The celebrated Madame de Genlis has given the following graphic narrative of the 'Fair Recluses of Llangollen.' During my residence in England nothing struck me so much as the delicious cottage of Llangollen, in North Wales. The manner in which I became acquainted with it is this: During our long stay at Bury, a small company of five or six persons, including ourselves, met every evening, from seven till half past ten, and passed the time very agreeably. One night,

friendship happened to be the subject of conversation, and I declared that I would, with pleasure, undertake a long journey to see two persons who had long been united by the bonds of genuine friendship. 'Well, madam,' replied Mr. Stuart, (now Lord Castlereagh) 'go to Llangollen; you will there see a model of perfect friendship which will amaze you the more delight, as it is exhibited by two females who are yet young and charming in every respect. Would you like to hear the history of Lady Eleanor Butler and Miss Ponsonby?' 'It would give me the greatest pleasure,' 'I will relate it to you.' At these words the company drew nearer to Mr. Stuart

—we formed a little circle round him, and after recollecting himself for a few minutes, he thus began his narrative: 'Lady Eleanor Butler, daughter of the Earl of Ormond, was born in Dublin. She was left an orphan while in her cradle, and possessing an ample fortune, together with an amiable disposition and a beautiful person, her hand was solicited by many belonging to the first families in Ireland. At an early age she manifested a great repugnance to giving herself a master. This love of independence which she never dissembled, did no injury to her reputation; her conduct has always been irreproachable, and no female is more highly distinguished for sweetness of temper, modesty, and all the virtues which adorn her sex. In childhood a tender attachment took place between her and Miss Ponsonby, by an accident which made a deep impression on their imagination. They had no difficulty in persuading themselves that heaven had formed them for each other; that is, that it had designed each of them to devote her existence to the other, so that they might glide together down the stream of life, in the bosom of peace, the most intimate friendship, and delicious independence. This idea their sensibility was destined to realize. Their friendship gradually grew stronger with their years, and they mutually engaged never to sacrifice their liberty or to part from each other, and formed the design of withdrawing from the world and of settling in some sequestered retreat. Having heard of the charming scenery of Wales, they absconded from their friends for the purpose of fixing upon their future residence. They visited Llangollen, and there on the summit of a low hill, they found a little deserted cottage, with the situation of which they were delighted. Here they resolved to form their establishment. Meanwhile the guardians of the young fugitives sent people after them, and they were conveyed back to Dublin; but they declared they would return to their hill as soon as they should become of age. Accordingly at twenty-one, in spite of the entreaties and remonstrances of their relatives and friends, they quitted Ireland forever and flew to Llangollen. Miss Ponsonby is not rich, but Lady Eleanor possesses a considerable fortune. She purchased the little hut, and the property on the

hill, where she built a cottage, very simple in external appearance, but the interior of which displays the greatest elegance. On the top of the hill, she has formed about the house a court and flower garden; a hedge of rose bushes is the only enclosure that surrounds this rural habitation. On the side of the hill, some ancient pines of prodigious height were preserved; fruit trees were planted, and a great number of cherry trees, which produce the best and finest cherries in Britain. The two friends likewise possess a farm for their cattle, with a pretty farm-house, and a kitchen-garden close by. In this sequestered abode these two extraordinary persons, with minds equally cultivated, and accomplishments equally pleasing, have now resided ten years without ever having been absent from it a single night. Nevertheless they are not unsocial; they sometimes pay visits to the neighboring country, and receive with the greatest politeness travellers on their way to and from Ireland, who are recommended to them by any of their old friends.'

"This account strongly excited my curiosity and produced the same effect on Mademoiselle D'Orleans, and my two young companions. We determined the same night to set out immediately for Llangollen. It was the latter end of July when we arrived there. This place has not the rich appearance of the English villages in general, but nothing can equal the cleanliness of the houses, and among the lower classes of any country, this is an infallible proof of abundance. Llangollen, surrounded with woods and meadows, clothed with the freshest verdure, is situated at the foot of the hill belonging to the two friends which there forms a majestic pyramid, covered with trees and flowers. We arrived at the cottage, the only object of our journey, an hour before sunset.

"The two friends had received in the morning, by a messenger, the letter which Mr. Stuart had given me for them. We were received with a grace, a cordiality and kindness, of which it would be impossible for me to give any idea. I could not turn my eyes from these two ladies, rendered so interesting by their friendship, and so extraordinary on account of their way of life. I perceived in them none of that vanity which takes delight in the surprise of others. Their mutual attachment, and their whole conduct, evince such simplicity, that astonishment soon gives way to softer emotions; all they do and say, breathes the utmost frankness and sincerity. One circumstance that I cannot help remarking is, that after living so many years in this sequestered retreat, they speak French with equal fluency and purity. * * * An excellent library, composed of the best English, French and Italian authors, affords them an inexhaustible source of diversified amusement and solid occupation; for reading is not truly profitable except when a person has time to read again.

"The interior of the house is delightful on account of the just proportion and distribution of the apartments, the elegance of the ornaments and the furniture, and the admirable view which you enjoy from all the windows; the drawing-room is adorned with charming landscapes, drawn and colored from nature by Miss Ponsonby; and their solitary habitation is filled with embroidery by them both, of wonderful execution. Miss Ponsonby, who writes the finest hand I ever saw, has copied a number of select pieces in verse and prose, which she has ornamented with vignettes and arabesques, in the best taste, and which form a valuable collection. Thus the arts are cultivated there with equal modesty and success, and their productions are admired with a feeling that is not experienced elsewhere; the spectator observes with delight that so much merit is secure, in this peaceful retreat, from the shafts of satire and envy."

"Miss Seward, the clever and amusing gossip, says of the 'ladies' whom she rhapsodizes as the enchantresses of Plas Newydd: 'Lady Eleanor is of middle height and somewhat beyond *embonpoint* as to plumpness; her face round and fair, with the glow of luxuriant health. She has not fine features, but they are agreeable, enthusiasm in her eye, hilarity and benevolence in her smile. Exhaustless is her fund of historic and traditional knowledge, and of everything passing in the present eventful period. I am informed these ladies speak most of the modern languages. Of the Italian poets, especially of Dante, they are warm admirers. Miss Ponsonby is taller than her friend, and is neither slender nor otherwise, but very graceful. We see through her veil of shadowy reserve that all the talents and accomplishments which enrich the mind of Lady Eleanor, exist with equal powers in this her charming friend.'

"Later in life Charles Mathews thus describes them: 'As they are seated, there is not one point to distinguish them from men; the dresses and powdering of their hair, their well starched neckcloths, the upper part of their habits, which they always wear even at a dinner party, made precisely like men's coats, with regular black beaver hats, every thing contributing to this resemblance. To crown all they had crop heads, which were rough, bushy, and white as snow!'

"The ladies were according to their means, charitable to the aged, sick, and infirm, but had been taught by experience that the best way to help the poor laborer was to give him employment. Although their farm contained only thirteen acres of land, three men, and in hay harvest an additional number of men and poor women were employed, with two ladies, maids, and three female servants in the house. By the aid of these male hands they made every inch of their land productive, and every hedge-fence and walk pleasant to the sight, well answering their end, and the house healthy, orderly and comfortable. In employing the laboring classes, they were as wise and praiseworthy as the Society of Friends."

"The ladies were deemed all powerful intercessors with the magistracy and the government. Many a mother has stood twirling her apron at that dark threshold, whilst recounting her sorrowful tale about her Tom or Will having got into a scrape, and consequent duress, and had her burden lightened by the sympathetic countenance of Lady Eleanor, being at the same time elicited by the whole-

some advice of Miss Ponsonby. Fancy recals her brightened face, and lightened step she turned away with the much desired promise of their advocacy. Their influence proved sufficient to save the life of one young man who had been sentenced to death for forgery. Their qualities were such that their whole lives were spent in performing worthy deeds. Good actions like sweet herbs have a retentive perfume. May their memory be long cherished as a virtuous exponent of that paternal and sympathetic life of the upper order which knits class to class, and has a strong refining influence on the poor and lowly."

"In 1829 the faithful friendship was severed by removing from this earthly scene Lady Eleanor Butler at the age of ninety, and her friend two years later."

(To be continued.)

Account of Mary Lamley.

(Concluded from page 175.)

"The 14th of the Fifth month.—'Although the Lord may be pleased to lead us through the valley of the shadow of death, yet we have cause to fear no ill, as the eye of our minds is truly unto him who is invisible; for he is near to his little ones, supports them in the deepest exercises that they are brought into; and therefore if the Lord be pleased to bring us down into Jordan, let us be willing to follow him there as often as he shall see meet.'"

"The 19th of the Fifth month.—'There is one thing in particular that I have observed in this time of weakness of body, which I esteem as a privilege among many others that I am made partaker of, and that is this: those days that my affliction is the greatest upon me, the Lord hath been pleased to favor me with the most plentiful visitation of his love, whether I have had company, or have been alone; so that thereby I have been encouraged willingly and patiently to bear these afflictions, being made sensible that the inward enjoyment of the goodness of God abundantly exceeds health of body, and those outward enjoyments that I am deprived of.'"

"The 24th of the Fifth month.—'When the Lord is pleased to withhold from us the sweet enjoyment of his love, although we may be sensible of the want of it, yet we cannot reach it for ourselves, and therefore we ought to bow in reverence before him. He deals with us as a tender father may do with his child, who may see meet to withhold food from him for a time, that he may learn subjection to his father. So the Lord may see meet to hide his face at some times from us, as he did from his servant of old, who said, 'Thou hidest thy face, and I am troubled. Although but a little before, he was so favored with the divine presence, that he thought thereby his mountain was made to stand strong; yet there was soon an alteration in his state. When the Lord hid his face, he was troubled; and so it may be with us. And when the Lord doth withdraw from us, let us examine ourselves, that we may come, by that which shows unto men what their states are, to discern whether there is any thing amiss in us, that might give the Lord just cause to withdraw from us.'"

"I believe this inquiry will not hurt any of us, any more than it did the disciples, when the Lord had told his disciples, that one of them should betray him; and another said, 'The Lord is it I?' and another said, 'Is it I?' He that

was the guilty person, was the last as we that asked this question; and so those who are guilty of betraying the innocent [] in themselves, may be the most backward in this work of examination."

"Surely there is abundance in it; let us be willing to search ourselves, that by the spirit of truth we may see whether we are of the number that betray the innocent or not. Upon diligent search, we do not find that there is any willful disobedience in us, to cause the Lord to withdraw from us, but it is for trial of our faith, this, I believe, will be our good, as our minds are staid in pattern. But if our minds are not staid in patience, we may slight our own mercy, for the Lord's mercies may be nearer than we are aware; and before we are aware, may make our hearts like the chariots of Aminadab. The Lord his regard to his servant who waited patiently for him, and the Lord inclined to him, as he heard his cry, and brought him up out of that horrible pit and miry clay, and put a new song into his mouth, even praises to the Lord.'"

"The 26th of the Fifth month.—'This I speak, that those may be encouraged in the work of the Lord, who look upon themselves as the hindmost of the flock. Let us not be discouraged, although at some times the work may not seem so prosperous as we may desire. 'Cast thy bread upon the waters,' and that is a promise, that it shall be found after many days. Sow plentifully therefore, that you may reap plentifully; for those that sow sparingly shall reap sparingly. If sometimes we may have but a few words to speak in a meeting, then let it be our concern to sow to the spirit; that by the light of it, we may discern what the Lord is pleased to give us for our own comfort and nourishment; and what he gives us, to distribute to others. For we read, that is a time to be silent, and a time to speak; and at some times there may be more service in sitting silently in a meeting, than there would be in speaking words; and as our eyes are single unto the Lord, and our wills resigned to his pure will, this waiting in silence will be easy to us. And as in the pure light we shall come to see what, and when to speak and when to end, having a clear sight of our duty herein, we shall go safely on.'"

"The same evening calling her son to her she signified her desire that as the Lord had been pleased to lend him to them, he might also be pleased to make him his servant, and give him a place in the house of the Lord. And she advised him to be obedient to his father."

"The 27th of the Fifth month.—'There is no other name by which any of us can be saved, but Jesus Christ. Let us labor to get into his name; for he hath promised, that where two or three are gathered together in his name, he will be in the midst of them. And he will make his promise good unto all them that are truly concerned to labor to get through all the opposition that stands in their way, that so they may get into the name spirit, and power of Christ, and witness him to be as a place of broad rivers unto them.'"

"The 21st of the Sixth month.—'The Lord is making his people sensible of the time to be silent, and of the time to speak, as they are concerned to wait for instruction from him, and to hearken to his voice, and to the voice of his servant the prophet, who said, 'Keep silence, O islands, before me; let the

people renew their strength." They were to be near, and then they were to speak; and it is now, when we are enabled to come near the Lord, we are sometimes in a capacity to speak to the honor of his name.

"I desire that we may follow the Lord, henceforward he is pleased to go forth before us; and when he is pleased to stand still, let us be willing to be as nothing; and not think for our own thoughts, nor speak our own words; or walk in our ways. Let us wait for a fresh command from our great lawgiver, that according thereto we may go forth in his service, and may know our thoughts, words, and actions, to be sanctified by his Spirit, that his will in all things may be done, and then the Lord will be with us, and bless the labor of ours that such are concerned in. The Lord once more giving me cause to speak well of his name, in a renewed sense of his love. This is an encouragement to trust in his mercy, and when in a state of poverty, the enemy may assault us, and may endeavor to cause us to think that we shall never come to partake of those sweet enjoyments any more, as we have in times past; let us not believe him, for he was a liar from the beginning.

"It was when the master of the house had fasted long, and was an hungered, that the enemy assaulted him with his temptations. But our Lord obtained the victory, and he will preserve his people, that not one hair of their heads shall fall to the ground without his permission. Although the Lord's people may have sorrow as for a night, yet joy will come in the morning, in the dawning and breaking forth of that eternal day, when the sun shall arise that shall go no more down; which is for the light of the New Jerusalem, which hath no need of the outward sun, nor of the moon, for the Lord God is the light thereof, and sorrow and sighing shall come to an end, and the tears shall be wiped from all faces.

"Surely this is a desirable habitation to the weary travellers, but we ought patiently to wait the Lord's time. Let us be willing to bear our share of suffering, remembering what our Lord suffered for us when we were enemies and aliens; and the Lord might justly have cut us off in that state, but he was pleased to show mercy unto us.

"Let us be willing to follow him through many tribulations, through the assistance of his Spirit, that we may be found worthy to obtain an inheritance in the kingdom that is prepared for the followers of the Lamb. When we have done all, we are but as unprofitable servants; we have done no more than was our duty to do; there is nothing to be attributed to us, neither is there any praise belongs unto such, but to God only."

"The 17th of the Sixth month.—Being scarcely two days and a half before she departed, several Friends being there to visit her about the seventh hour in the evening, they found her very weak, but after they had spent some time in waiting upon the Lord with her, the Lord was graciously pleased to renew the visitation of his love to her, by which she was wonderfully revived, and was publicly concerned in thankful acknowledgments of the goodness of God, in supplication to him for the continuance thereof.

She had also an exhortation to the Friends, to follow the Lord in obedience to his requirements; for she signified, that while disobedience remains in the heart, it tends to hinder

the work of the Lord, and therefore it was her desire, that all might be given up freely to follow the Lord, that they might know his ways to become ways of pleasantness to them.

She departed this life the 20th day of the Sixth month, 1722, betwixt the hours of four and five in the morning, being in the forty-first year of her age."

For "The Friend."

Establishment of Slavery in this Country.

(Continued from page 170.)

"In 1739, George Whitefield, the renowned pulpit orator and evangelist, having travelled extensively through the Southern States, addressed to their inhabitants a letter in which he combined the impressions of an eye witness with the reflections of a Christian teacher. Affirming that his sympathies had been strongly excited by the miseries of the poor negroes, he called attention to the practice of slave-masters, and the encouragement it afforded to the savage tribes in Africa to continue their warfare on each other to supply the demand for slaves thus created. He charged the 'generality' of them with using their slaves 'as bad as though they were brutes; nay, worse,—worse than their horses, which were 'fed and properly cared for' after the labors of the day, while the slaves must grind their corn and prepare their own food,—worse even than their dogs, who are caressed and fondled, while the slaves are scarce permitted to pick up the crumbs which fall from their master's table. He spoke of the cruel lashings which ploughed their backs and made long furrows, sometimes ending in death. He reminded them of their spacious houses and sumptuous fare; while they to whose labors their luxuries were owing had neither convenient food to eat nor proper raiment to put on.

Among the earlier apostles of emancipation was Dr. Samuel Hopkins, pastor of the Congregational Church in Newport, Rhode Island, who was as much distinguished for his advocacy of the doctrines of human rights as of the doctrines of the school of theology which bears his name. In 1770 he deliberately and solemnly resolved to attack the system of kidnapping, purchasing and retaining slaves. Although Rhode Island had as early as 1652, passed an act against the purchase of negroes, she had become deeply involved in the slave trade. Newport was the great slave mart of New England. Cargoes of slaves were often landed near the church and home of Samuel Hopkins. Before his congregation, thus deeply involved in the guilt of slave-trading and slave-holding, he boldly rebuked the sin and pleaded the cause of its victims in a discourse of great plainness and power. It was an unselfish and heroic act, imperiling his position both as a pastor and as a recognized leader in the church. Of this noble act Whittier says: "It may well be doubted whether in that day, the angels of God, in their wide survey of His universe, looked upon a nobler spectacle than that of the minister of Newport, rising up before his slave-holding congregation, and demanding, in the name of the Highest, the deliverance of the captives, and the opening of prison doors to them that were bound!"

From 1770 to 1776, Dr. Hopkins repeatedly spoke on behalf of the slave, visited from house to house, and urged masters to free their bondmen. In the latter year he pub-

lished his dialogue concerning slavery, together with his address to slave holders. He dedicated this remarkable production, said to have been the ablest document which had at that time and on that theme appeared in the English language, to the Continental Congress. It had a large circulation among the statesmen of that day, and exerted a potent influence on public opinion. This early champion of the black man was cheered by the passage, in 1774, of a law prohibiting the importation of negroes into Rhode Island; and, in 1784, by the passage of an act declaring all children born after the next March free, results to which he had largely contributed by his early, persistent, and self-denying labors. His heart was gladdened, too, by the action of his church. Instructed by his teachings, and inspired by his zeal, it declared slavery to be 'a gross violation of the righteousness and benevolence of the gospel,' and therefore it resolved, 'We will not tolerate it in this church.'

In 1773, Dr. Benjamin Rush, an eminent physician, philanthropist, and statesman, published in Philadelphia, 'An Address to the Inhabitants of the British Settlements in America, on Slave-keeping.' In this address he combated the idea so persistently pressed by the supporters of the slave trade, that it was impossible to carry on the production of sugar, rice and indigo, without negro slaves. 'No manufactory,' he said, 'with refreshing boldness and fidelity to truth, can ever be of consequence enough to admit the least violation of the laws of justice or humanity.' This early abolitionist eloquently pleaded the cause of 'the unhappy Africans transported to America.' Of the slave traffic he said:—"Future ages, when they read the accounts of the slave trade, if they do not regard them as fabulous, will be at a loss which to condemn most, our folly or our guilt in abetting this direct violation of nature and religion."

These utterances of those earlier apostles of emancipation awoke responses in the bosoms of many of their countrymen. During the years of agitation preceding the Revolution, in which the liberties of the colonies and the rights of man were discussed with masterly power by the most gifted minds of the country, many of the popular leaders of New England, the Middle Colonies, and even Virginia, did not fail to see and to acknowledge the wrongfulness of slavery, and to denounce the slave traffic, and the slave extending policy of the British government. Many slave masters, who afterwards aided in inaugurating the Revolution, in fighting its battles, and carrying the country over from colonial dependence to national independence, were hostile not only to the slave trade, but to the existence of slavery itself.

On the 20th of October, 1774, the first Continental Congress signed and promulgated the Articles of Association. In this bond of union, which laid the foundation of the new nation, the pledge was made that the United Colonies would 'neither import nor purchase any slaves,' and would 'wholly discontinue the slave trade.' The explicit declaration was added, that any persons violating these Articles of Association should be pronounced 'foes to the rights of British America,' 'universally contemned as the foes of American liberty,' 'unworthy of the rights of freemen.' This union of the inhabitants of the thirteen British colonies, thus making them one people, was

begin with a solemn pledge wholly to abstain from all participation in a traffic then supported by the commercial nations of Europe. The Articles of Association, containing these explicit pledges, were adopted by colonial conventions, county meetings, and lesser assemblages throughout the country, and became the fundamental constitution of the first American union."

(To be concluded.)

Selected.

The old Christian, who has by grace reached to a somewhat more elevated ground than one beginning the spiritual journey, should remember the toils, conflicts, weakness, darkness, temptations, &c., that made him groan, and oftentimes ready to faint, in ascending to that point,—that he may lead tenderly and gently, with such as are yet laboring over the same ground. So desirous is the advanced Christian that others should have the same joy, that he is apt to forget, there must first be the fight, and the race. He calls all to rejoice as he does: to be dead to the world as he is,—to bathe in the sweet ocean of redeeming love; and to breathe freely in the pure element of holy communion. And it is natural he should so speak; but this meat should be reserved for riper age; and the milk of younger experience should be given to babes. In this very thing I have erred, and none would correct my mistake.—*Sarah Hawkes.*

Cracked Hands Cured.—None but the laboring man, who has suffered misery while using an ax or pounding with other tools, can rightly appreciate this article. For years, when young, I suffered at some seasons untold bitterness, caused by dry cracks on hands and fingers. I tried every so called remedy I could hear of, but in vain; and being obliged then to labor each successive day on a honest livelihood, I was bound, as with an iron chain, to such sufferings as almost made life a burden. At last a friend told me to put common copal varnish into the cracks and it would cure them; although my faith was very weak, I tried the prescription, and, to my great joy, sure enough, in 48 hours my hands were as well as ever. It does not save from fresh cracks, but it never fails to entirely cure the old ones within two days. I keep a small bottle of the varnish, with a sliver standing in it, cost 19 cents—always handy, and with its help my hands are nearly always well. For the knowledge of this simple remedy I would not part for many dollars. I have given it to many others for many years, and have never known of its failure to effectually cure in all such cases. I don't know that the subject can be considered agricultural (perhaps it is only anticlerical), but there are probably farm readers of the Tribune who will be glad to get the information.—*New York Tribune.*

84-cted.

It is by faith we must subdue every corrupt principle in the human heart; we need not be cast down because we find evils within; but rather be thereby the more roused to prayer and watchfulness. We are the temples of the Holy Ghost, and the old inhabitants of the heart must be cast out: a stronger than the "strong man armed" has taken possession, and will get himself the victory; for Christ says, "We will come and make our abode." We need no more say, "Who shall ascend into heaven, or who shall descend into

the deep to find Christ, for he is nigh thee, even in thy heart." Let us pray for each other, that the Lord may increase our faith to take of the waters of life freely—waters that heal all diseases, and restore to perfect soundness.

THE CLOSE OF THE YEAR.

The changing seasons, the revolving Year
Have brought another land-mark of its close,
Which tells its rapid transit, and proclaims
The work of time. Methinks I hear its knell
Echoing along the hollow realms of space,
As day to day, and year to year succeeds.

How evanescent are the charms of earth
In sight of things eternal! How absurd
To risk the future on the dreams of sense!
Child of corruption! heir of heaven itself,
Let not indifference enwrap thy soul!
In fatal slumbers, but awake and think
What thou hast been, art now, and soon must be!

As standing on the threshold of the year,
We look at that departed; let us mark
The wonders of His grace who crowns our life
With countless blessings, and our souls renews.
The year indeed has flown, but what a train
Of revolution, incident and crime,
Tell its prolific course, and fill the page
Of its historic wonders! How his hours
Swelt into vague infinity, and rise
Above conception's utmost stretch of thought,
In prospect of the last dread scenes of time!
Yes, from an eminence which towers beyond
The mists of sense, we would trace thy flight,
And contemplate thy swift eventful course,
Departed Year.

Let this New Year
Find us prepared to enter on its cares,
With more fidelity—with higher hopes
And happier efforts in the work of God.
To some of us 'twill doubtless form the close
Of our probation, and the end of time;
May it to each of us most richly prove
A happy year indeed. If now it finds
Our hearts at peace with heaven, and us the heirs
Of joy un-speakable, may all its hours,
As they roll onward, find us more prepared
To enter on those glories of the best
Which know no change. If still the slaves of sin
It find us, may it witness our release
And form our year of jubilee, and, indeed,
Sealing our ransom from the tempter's power,
Our sonsnip in the skies.

Remarkable Meteor.

A meteor of unusual size and brilliancy was visible on the evening of the 21st ult., over a wide extent of country in the Western States. The following account is taken from the *New York Evening Post*:

"Our western exchange newspapers contain many accounts of the wonderful meteor which was seen in Kansas, Missouri, Indiana, Illinois and Ohio last Thursday night. As is generally the case, each observer thought the meteor disappeared close by him. We make the following extracts from descriptions of it:

"Professor Comstock of Knox College, Galesburg, Ill., gives the following description of it: 'My family were startled by a brilliant flash of light, which fell upon the carpet in the presence of lamp-light as being green. The children gave the alarm and rushed to the south door, just in time to see the explosion of a splendid meteor. They say it was red, blue and all colors, like a rocket. The light cast upon the clouds had a greenish tint. I was too late to see anything, though it could not have been more than ten seconds from the time the alarm was given until I was in the open air. However, in about five minutes (estimated, not

observed), a tremendous explosion occurred consisting of two reports, with an interval about a half-second. Every window in the house seemed to rattle and the solid earth tremble. It closely resembled a heavy c of thunder. If the time between the flash and the report was five minutes, the distance must have been something over sixty miles, and the angle of elevation, as near as can be estimated from the testimony of the observers, would give a height of less than four miles.'

"At Pontiac (Ill.) its light was so intense that many citizens rushed into the street, thinking the city was in flames. It was accompanied by a rumbling noise louder than the heaviest thunder, and every building in the city shook to its foundation. Several citizens, thinking that the day of judgment had arrived, fell on their knees and begged for mercy.

"From Clifton, Ill., a correspondent writes: 'Just before the light's disappearance an explosion occurred which shook my substantial house from foundation to top, all the windows rattling in a most startling manner causing fright to all the children, the sound being as loud as the explosion of a park heavy artillery.'

"A despatch from Erie, Pa., says: 'A large and brilliant meteor passed over this city last evening, and burst with a terrible explosion near Concord Station, thirty miles from the city, between the hours of 9 and 10 o'clock. The report was distinctly heard here, an sounded like the roar of a cannon. Eye-witnesses say that the meteor resembled a huge engine head-light. When first seen its course was easterly, and when it burst white fragments fell to the ground. Others apparent, continued their wild course.'

"The *St. Louis Republican* of December 2 says: 'About half-past eight o'clock last night a meteor—from all accounts the largest and most brilliant ever seen here—passed over the city in a northwesterly direction. Its appearance in the southwest was preceded by a light as from the headlight of a locomotive throwing a strong, greenish reflection on the clouds, and a fainter one on the hazy atmosphere. A moment afterward the meteor itself came in sight, appearing to the naked eye about thirty feet in length, followed by a flame 150 feet long. It gave a light about midway between that of the sun and moon, moving very slowly, and at a remarkably low elevation. As it approached the city, its color changed to a bright yellow, and when directly over the city there was an appearance on each side of it like the spreading of digits, from the point of which bright sparks flew off in straight lines, leaving tracks of vivid red light after them. The color then changed to that of molten iron, when it began to fade, and before it reached the horizon it became invisible. The closest attention failed to detect any sound of detonation or explosion. The time it was in sight probably equalled three-fourths of a minute, and its track was visible some seconds longer.'

"At Indianapolis, Ind., the fireball, described by many observers as surpassing the moon in apparent magnitude, was followed by a great number of smaller meteors. Its first appearance was at a point twelve or fifteen degrees north of west, and about ten degrees above the horizon. Its greatest altitude, as seen from Bloomington, Ind., was about

then or twenty degrees, and its disappearance occurred at a point in the northeast five or six degrees above the horizon. A remarkable feature of the meteoric group is the slowness of its apparent motion. The time of flight was variously estimated. Most observers, however, think it could not have lasted less than three minutes. Many of the showers following in the train of the principal were larger than Venus or Jupiter. No attempt was made to count them, but their number was certainly nearly 100.

For "The Friend."

Usher's Prophecy.

In the preface to William Sewall's History are the following: "James Usher, Archbishop of Armagh and Primate of Ireland, who foretold the rebellion forty years before it came to pass; beside the intestine war and mischief it befel England, and other things that are fulfilled; which leads us not to reject as fabulous his prediction of the dreadful persecution that would fall upon all the Protestant churches by the Papists; although one of his friends objected that on account of the deep sufferings previously endured in England and Ireland, there was reason to hope that the judgments of God in respect to these kingdoms might have been passed; yet he replied to it, 'I do not myself with such hopes, for I find you all have yet seen hath been but the beginning of sorrows to what is yet to come to pass upon the Protestant churches of Christ, which will ere long fall under a deeper persecution than ever yet hath been upon them; and therefore look you, be not content in the outward court, but a worshipper in the temple before the altar. For Christ will measure all those that profess his name, and call themselves his people; and the outward worshippers He will leave out, to be trodden down by the Gentiles. The outward court is the formal Christian, whose religion is in performing the outside duties of Christianity, without having an inward life and power of faith and love, uniting them to Christ, and these God will leave to be trodden down and swept away by the Gentiles. But the worshippers within the temple and before the altar, are those who indeed worship God in Spirit and in truth: whose souls are made a temple, and He is honored and adored in the most inward thoughts of their hearts; and they sacrifice their lusts and vile affections, yea and their own wills to him; and these God will hide in the hollow of his hand, and under the shadow of his wings; and this shall be the great difference between this last and all the other preceding persecutions; for the former the most eminent and spiritual ministers and Christians did generally suffer out and were most violently fallen upon; but in this last persecution those shall be preserved by God as a seed to partake of that glory which shall immediately follow and come upon the church, as soon as ever this form shall be over; for as it shall be the hardest so it shall be the shortest persecution of them all, and shall only take away the gross hypocrites and formal professors; but the true spiritual believers shall be preserved until the calamity be overpast."

To be counted worthy to escape those things that must come to pass, and to stand before the Son of Man, the remnant of the Lord's heritage may desire earnestly to be found faithful in this trying day of pride, vain glory

and show. Oh! to be enabled, by Divine aid, to bear up and to be true testimony-bearers against spiritual Babylon, and to get clear of all that is in the will of man, as formerly "with the Holy Ghost sent down from Heaven." It seems necessary to pass through tribulation. May my dear friends everywhere be like holy Moses, and "look to the recompense of reward," for what a weight, yea, crown of glory, is awaiting those that shall endure through all; for the Lord will certainly take the cup out of the hands of those who now taste it as the wormwood and the gall, and place it in the hands of those who now prove them therein. S. C.

Millville, Orleans Co., N. Y.

[Extracts from letters from Alfred H. Jones, Superintendent of Freedmen's Schools in Virginia and North Carolina.]

Danville, Va., 1 mo. 3rd, 1877.

Thou asks me the occasion of the falling off of the attendance at Danville last month. It can be answered briefly and satisfactorily,—the inclemency of the weather. About 80 in the primary department poorly clad and nearly barefoot, were kept away. We had been hoping for better weather, but so far it has been growing worse and worse. The snow is now about 18 inches deep, and last night the mercury went down to 4° below zero, about 16° colder than we have ever seen it here before. It is certain that many poor creatures nearly perished and perhaps some did quite. We called at one house yesterday where a grown man and a little boy, both sick in bed had only a thin cover over them, were without any nourishment, and had neither fire nor wood. The alarming condition of the poor has led a number of the most respectable citizens to form an organization for the relief of such, and a Committee has been appointed to solicit subscriptions, to look them up and relieve them. All day long yesterday the Committee were busy, and their tales are as sad as anything I have seen. They found one family, a man and wife, six children, and grandmother in a wretched hovel, without a mouthful to eat and no wood or fire. They find "many cases where the women and children are undergoing the pangs of starvation."

The Mayor has issued a proclamation setting forth the distress, as it has been presented to him and calling on all benevolent persons to contribute to their relief, and that "it must be immediate."

Danville, Va., 1 mo. 5th, 1877.

My ink is pale, but how can I help it, it has frozen like a rock for the last three nights. The Dan River is all scaled up strong, the ground has been slumbering under from 10 to 15 inches of snow for nearly two weeks, and the weather has been getting colder all the while. 4th day the mercury was down to 4° below zero, yesterday 8°, and this morning 2° below. Whew! only think of this in the sunny South! and only think of scores if not hundreds, without fire or wood.

Our school is literally dwarfed, children cannot come out. The few who do come are all but frozen, they have so little protection for either their feet or backs—some cried yesterday after getting into the house with cold feet. The time has come when this large and important school demands more permanent and comfortable buildings; that an institution

should be founded here adapted to the needs of the large colored population, similar in character to that of Hampton.

Here is a colored population of over 4000, with about 1000 children of a school age, with no school but ours and no buildings but this old dilapidated, uncomfortable Hospital ward. Never was there a better chance for some organization or benevolent individual to be a lasting blessing to oppressed manhood, by founding a seminary for the intellectual and moral development of a race of aspiring and anxious but crippled young men and women, whose power for good must depend on a system of training brought within their reach. Poverty forbids their going away. If we fail to entrench ourselves firmly and thus hold the place, I believe the time will come when some one of large Christian heart, desiring to leave some of their bounty where it shall descend as a lasting blessing to posterity, and be a memorial in grateful hearts, in years to come, more lasting than granite or marble, surveying this field, may hear the voice of the Master "Say not there are four months and then cometh harvest? behold! lift up your eyes and look on the fields, for they are white already to harvest," and trusting in the sickle shall receive wages, and gather fruit unto life eternal, and enjoy the sweet satisfaction of knowing "that both be that soweth and he that reapeth may rejoice together." A. H. J.

We clip the following notice of the Address on the proper observance of the First-day of the week, issued last summer by the Meeting for Sufferings of Philadelphia, from the New York Observer of 7th mo. 13th, 1876.

"FRIENDS AND THE SABBATH.

"It is well known that the Society of Friends holds views in regard to the observance of sacred days, that are not in accord with the prevailing sentiments in most religious bodies. Their theory in respect to the peculiar sacredness of any special season, would lead many to think that they would have no special interest in the preservation of the Sabbath as a day of rest and worship. It is with no ordinary gratification that we welcome an intelligent, hearty appeal from the Friends in behalf of the Scriptural and American Sabbath.

"This essay has been published as an appeal from this Society for the due observance of the Sabbath. We wish that we had space to print every word of this document. It is marked by the reflective intelligence characteristic of the Friends' community." The N. Y. Observer then quotes a large part of the Address in its columns.

The Two Gardeners.—Two gardeners, who were neighbors, had their crops of early peas killed by the frost; one of them came to console with the other on this misfortune. "Ah," cried he, "how unfortunate we have been, neighbor! do you know I have done nothing but fret ever since. But you seem to have a fine healthy crop coming up already; what are these?" "These," cried the other gardener, "why these are what I sowed immediately after my loss." "What coming up already?" cried the fretter. "Yes; while you were fretting, I was working." "What! don't you fret when you have a loss?" "Yes, but I always put it off until after I have repaired the mischief." "Why then you have

no need to fret at all." "True," replied the industrious gardener, "and that's the very reason."

Richard Shackleton.

(Continued from page 176.)

In the following letter of Richard Shackleton's, we are reminded of the declaration of the Saviour: "It is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of heaven." If we would gain an entrance within the gates of the holy city, we must be divested of all self-righteousness; and everything must be purged away, which would hinder from that perfect state of purity, in which alone, the disembodied spirit may be permitted to mingle with the redeemed and ransomed of the Lord, "the spirits of the just made perfect," and to inherit the promise of eternal rest.

How very true, as R. S. remarks, that—"To profess to be of the kingdom, to have notions about the kingdom and the laws and polity of it, is one thing; but to enter into it, and be indeed subjects of it, is another." How *all-important* and *essential* is it, that we should be humbled and brought low, if we would hope to be heirs of the heavenly kingdom.

From R. S. to J. C.

Baltimore, 20th of 8th mo., 1763.

"Dear Cousin,

"There are but few people proved with the possession of riches, that are of use and ornament in our Society; we see their general conduct verify the remark of our great Lord, that it is hard for a rich man to enter the kingdom. To profess to be of the kingdom, to have notions about the kingdom, and the laws and polity of it, is one thing; but to enter into it, and be indeed subjects of it, is another, this indeed requires much stripping and deep humbling. May we be so happy, dear John, we and ours, as to bow low enough to enter this kingdom; I believe we neither of us are much anxious about heaping up riches, yet both of us considerably emburdened with business. Let us, therefore, be careful to make the best use of the intervals of recess from the hurry of business, and mind to endeavor (as a friend wrote,) to keep up the daily sacrifice. It is hard to be much in the world of business, without being somewhat tainted with it. There is need, therefore, of the renewing of the baptism of water and the Spirit, (or in other terms spiritual water,) to cleanse from every defilement of flesh and spirit, and there is need of a renewing of the unction of Truth, to teach us all things which concern ourselves and others."

I am dear John, very affectionately thine,

"R. S."

The earnest solicitude of R. S. on behalf of a cousin who had just been married, and in setting before him the importance of ordering his steps aright, and in the fear of the Lord, is brought before us in the following letter:

Richard Shackleton to Thomas Carleton.

Baltimore, 13th of 2d mo., 1767.

"Dear Cousin T. C.,

I now greet thee and thy spouse with my wife's and my dear love, and sincerely wish you health and happiness, and the renewed evidence of a Divine blessing upon your union. You are now joined

together, I hope, by the ordering hand of Providence. You are advanced a step higher, into a more conspicuous station in life and business. The Author of every good and perfect gift has given thee, my dear Thomas, and I believe to both of you, a good share of natural capacity, and the means, through frugality and industry, with his blessing of procuring a comfortable subsistence. He has placed you in a great and populous city, where you profess his holy and saving Truth, among a large number of others of the same profession, who do not honor it as they ought in their lives and conversation. Now, my dear cousins, my mind is a little uncommonly engaged for your temporal and eternal prosperity, and I think I see the path, and the only one which leads infallibly to it. It is by humbly, diligently, steadily, and faithfully seeking to the Almighty Benefactor, for his preservation and blessing to be over and about you, and all that is under your hand. Strive not either to be or to appear great; nor stretch your wings beyond the circumference of your own nest, which, in the ordering of an allwise Providence, is allotted for you. Rather live under, and appear under your ability, than over: you will experience safety and quietness in it. The contrary is a temptation and a snare, and an inlet to many dangers of various kinds; and often with new beginners, lays the foundations of difficulties, straitness, and embarrassments, which they are sometimes never disincumbered of, till they are disincumbered of mortality. Let us take a little view, my dear friend, of the persons and families, which have been up and down, during our short time of observation; let us contemplate them, not with an evil eye, but with an eye to the ways of that all-ruling Power, which resisteth the proud, yet giveth his grace additionally and manifold to the humble. Let us centre down, and have our dwelling low, in a conscious sense of our own unworthiness and insufficiency to direct our own steps and prospects, either as to the things of this or a better life, without his blessed protection and mediation. Be truly humble my dear Thomas; be frequent, and, as much as possible, constant in feeling after a capacity to breathe in secret after an acquaintance and communion with the Author of all goodness. Be exemplary in your conduct and conversation, and exterior appearance and deportment, as becomes the disciples, followers, and professors of the religion established by Him who was meek and low in heart, and whose garment was without seam. So will you, in proportion to the purity of your intentions and the cleanness of your hands in His sight, gain the favor and approbation of Him who knows the heart and hath all power in His hand to bless or blast at His pleasure.

I am concerned and desirous, my very dear friend, that thy determined conduct may be such, now in the setting off in life, as that the good-will and approbation of Heaven may be felt, by being a pattern of humility, steadiness, and plainness, among thy numerous acquaintance in that city. This may occasion some trials, in which it will often be proved whether thy attachment to the testimony of Truth, or to the spirit of the world, is most prevalent. According to the free-will choice which thou wilt be enabled to make, will thy ability to proceed aright be strengthened or weakened, and finally the one side or the other get the victory. The day of small

things, and of little requirings of duty, proportioned to the state of children, is by means to be despised. The cross to our depraved wills is often to be borne, and most friendships, connexions, habits, and penesities, of a hurtful nature, will be dissolved or decay; in the room of which, new desires and affections, new intimacies and sociability will be formed. But in all that He throw down, as well as in all that He builds up, Lord Almighty, as we rely upon him, and faithful to his discoveries, will be found to everything right, and for our good, every manner of way.

I might perhaps write more on this subject, but I should rather be under than over. I most heartily commend thee and thy dear wife to the Grace and good Spirit, Guide and Comforter in your own hearts, which is of it entirely sufficient to lead you safely thro' this dangerous and troublesome world, everlasting happiness; and which I hope reveal in your minds to the rectitude of the counsel, and to the sincere love and feligned desires for your welfare, in which is simply given.

Believe me dear cousins, your truly affectionate kinsman and sincere friend."

"R. S."

(To be continued.)

Three Thousand Years Ago.—The oldest record of humanity extant is the skeleton of one of the earlier Pharaohs, encased in its original burial robes, and wonderfully perfect, considering its age, which was deposited about eighteen or twenty months ago in the British Museum, and is justly considered the most valuable of its archaeological treasures. The lid of the coffin which contained the royal mummy was inscribed with the name of its occupant, Pharaoh Mykerimus, who succeeded the heir of the builder of the great pyramid, about ten centuries before Christ. One think of it, the monarch, whose crumbling bones and leathery integuments are exciting the wonder of numerous gazers in London, reigned in Egypt before Solomon was born, and only about eleven centuries or so after Mizraim, the grandson of old father Noah at the first of the Pharaohs, had been gathered to his fathers. Why, the tide-mark of the deluge could scarcely have been obliterated or the gopher wood kee-timbers of the ark have rotted on Mount Ararat, when this monarch of the early world lived, moved, and had been being. His flesh and blood were contemporaneous with the progenitors of the great patriarchy. His bones and shrivelled skin are contemporaries with the nineteenth century, and the date of the crucifixion is only about midway between his era and ours.

"Go out in the spring-time, among the meadows that slope from the shores of the Swiss lakes to the roots of the lower mountains. There, mingled with the gentians and the white narcissus, the grass grows deep and free; and as you follow the winding mountain paths, beneath arching boughs of veiled and dim with blossoms, paths that forever drop and rise over the green banks and wolds sweeping down in scented undulation steep to the blue water, studded here and there with new-mown heaps, filling all the air with fainter sweetness—look up toward the higher hills, where the waves of everlasting green roll silently into their long line

the shadows of the pines, and we may, perhaps, at last know the meaning of these yet words of the 147th Psalm, 'He maketh us to grow upon the mountains.'—*John Aikin.*

From Schermerhorn's Monthly.

Habits of Sleep.

It is the custom with many persons to neglect all systematic regulation of the hours and conditions of sleep, while very many others systematically interfere with the demands of nature in regard to physical rest. The former class spend such time in bed as may not be absorbed by their various occupations, and pay no attention to the body's want of repose except when they "feel sleepy," or have reason to tempt them to sit up beyond the usual hour for retiring. A party, a new book, an unfinished piece of work will readily induce them to protract the waking period into "wee, small" hours, and they doze or rise the morning according to the exigencies of their plans for the day. The latter class proceed on the theory embodied in the rhyme, "unwelcome to childhood's ears—

"Early to bed and early to rise
Makes a man healthy, wealthy and wise;"

and make it a rule to be up and doing at a specified early hour, even if the drowsy senses seem to be violently roused in order to maintain it.

The habits of sleep have so important a bearing upon physical health and vigor, that it is worth while for parents to give them more consideration than is usually bestowed upon them. It is a fatal mistake to allow anything to abridge the amount of sleep required by growing children. During childhood and youth the constitution should be built up and fortified for the inevitable wear and tear of maturer life. All the sound sleep that can be regularly secured contributes to the great reserve fund of vitality. It is hardly possible for the boy or girl who takes daily even air exercise in fair measure to sleep too much. Time should be secured in two ways: a quiet evening closed by reasonably early retiring, and by non-interference with the natural demands of the body in the morning. It is a custom very injurious to health which permits young people to join their elders on exciting social occasions after eight o'clock, or only the late bedtime, often near midnight, but the agitation of the nerves and the timely activity of the brain are inseparable from this thoughtless indulgence. Often sleep does not begin until long after the immediate cessation of the excitement has passed, and then it does come, it is troubled and broken, the same injury is often wrought by evening study. We have no hesitation in saying that the last waking hour should never be given to study, but to some quieting occupation which shall be favorable to a quick "dropping off" when the head is laid upon the pillow. This is a good rule for everybody, and adopted universally, would add immensely to the general power of endurance and accomplishment. But for children it is an absolute condition of healthy growth. The beds of many nervous diseases in mature life have been sown in youth by habits of mental activity after eight o'clock.

The hour of rising should not be fixed. We know that this will seem a hard saying to thrifty housekeepers. Breakfast at an

early hour is deemed one of the essential points of good management. We do not dispute this, nor forget that circumstances in many families require that the morning meal should not be late. It is not necessary that it should be. If the general suggestions about retiring given above are followed, the children will seldom fail to be on hand at the breakfast table. But if nature calls for extra sleep, her voice should not be drowned by a bell or a peremptory summons to get up. There is no danger of lazy habits being formed when a child is well, and goes to bed at the proper time in a quiet frame of mind.

The individual constitution of every child must also be studied in regard to habits of sleep. Some cannot easily fall asleep, or are easily waked in the night; some cannot rise at once on waking without inducing headache or palpitation, and some cannot do any kind of work before breakfast without injury. Sleeping with another proves detrimental to not a few, and if it were practicable, doubtless all would be benefited by having separate beds. In every case, however, the thorough ventilation of bedrooms is indispensable to health. Many a consumptive is the victim of a constitution enfeebled by a long period of nightly confinement in impure air. Better put your child to sleep in a shed than in the tightly closed chamber where he must breathe over the gas which his lungs have rejected during the first hour of repose.

The influence of regularity in habits of sleep can hardly be overrated. It does not avail to observe healthful conditions five nights out of seven only, with the expectation that two weekly departures from the wiser plan will make but little difference. The two evenings of excitement and late hours will disturb the system and prevent sound sleep on other nights than those invaded by the irregularity. The child's constitution is sensitive and easily overstrained, and though damage done to it may be hidden, it will appear in the disabilities of later life.

It should be added, in behalf of those children whose homes are in our large cities, that six o'clock dinners are unfavorable to sound and early sleep. It may be a choice of evils for the busy merchant to defer his chief meal until he can take time to digest it, but his children should not be obliged to follow his example. In this, as in all family arrangements, the parents' first care should be to give their children health; wealth and wisdom will then follow not very far off. II.

Signs of Spiritual Decline.—When you are averse to religious conversation or the company of heavenly-minded Christians.

When, from preference and without necessity, you absent yourself from religious services.

When you are more concerned about pacifying conscience than honoring Christ, in performing duty.

When you are more afraid of being counted over-strict than of dishonoring Christ.

When you trifle with temptation, or think lightly of sin.

When the faults of others are more a matter of censorious conversation than secret grief and prayer.

When you are impatient and unforgiving toward the faults of others.

When you confess, but do not forsake sin;

and when you acknowledge, but still neglect, duty.

When your cheerfulness has more of the levity of the unrepentant than the holy joy of the children of God.

When you shrink from self-examination.

When you are easily prevailed upon to let your duty as a Christian yield to your worldly interest or the opinions of your neighbors.

When you associate with men of the world without solicitude about doing good or having your own spiritual life injured.—*N. Y. Observer.*

THE FRIEND.

FIRST MONTH 20, 1877.

The 45th number of the "Freedman's Friend" has just been issued by the assiduous managers of a "Friends' Freedmen's Association for Philadelphia and its vicinity." It brings the reminder that it is thirteen years since the first number of the paper appeared, thus proving the unwearied diligence with which some of the officers of this charity, who still hold their places in it, have labored in the good cause. Its tenor is not greatly different from former appeals to the charitable feelings of the benevolent in aid of the destitute colored people under the care of the association; and yet there is an unwonted urgency, perhaps, exhibited in the facts set forth so clearly in its columns respecting sufferings attending the biting cold, the hunger and nakedness that beset these poor "wards of the nation" in this inclement winter, and as a result (partially) of the stagnation in business. Do we really practise upon the injunctions and promises of Scripture that relate to helping the needy? "Blessed is he that considereth the poor: the Lord will deliver him in time of trouble. The Lord will preserve him and keep him alive; and he shall be blessed upon earth; and thou wilt not deliver him unto the will of his enemies. The Lord will strengthen him upon the bed of languishing; thou wilt make all his bed in his sickness." Psalm 41st. Here are rich results indeed from the exercise of considerate charity. Who could ask greater blessings? They are not more striking, however, than those spoken of by the loving Redeemer, as recorded in Matthew 25th, where the glorious reward of the kingdom prepared for the righteous from the foundation of the world, is offered to those who fed the hungry, clothed the naked, and visited the sick and prisoners under the constraining love of Christ, and as His "brethren." "And this commandment have we from Him, that he who loveth God love his brother also." "But whose hath this world's good, and seeth his brother have need, and shutteth up his bowels of compassion from him, how dwelleth the love of God in him? My little children, let us not live in truth," 1st John iii. 17, 18, 19, and iv. 21. We would commend these injunctions, and the destitute blacks of North Carolina and Virginia, together with other sufferers, to our readers once more, as important subjects of thought and Christian duty.

We insert letters from Alfred H. Jones, Supt. of the Freedmen's Schools under care of our Philadelphia Friends' Association, at Danville, Virginia, which give a touching

picture of the efforts of cold and destitution among the blacks there. Contributions, either in aid of the present physical wants of those people or of their education, may be sent as heretofore to Richard Calbury, Treasurer, No. 108 South Fourth St., Philadelphia.

SUMMARY OF EVENTS.

FOREIGN.—Despatches from Constantinople do not encourage the hope that the labors of the Conference will have any satisfactory result. At a meeting of the Conference held on the 11th inst., the representatives of Turkey adduced reasons for rejecting the eight essential points of the European proposal, and absolutely refused to discuss that making the appointment of governors of provinces subject to the approval of the Powers, and the creation of an international commission. The measures which Russia considers essential for improving the condition of the Slavonic provinces of Turkey, and the protection of the Christian portion of their people, are so humiliating to the pride of the Turkish nation that the Porte dare not give its assent to them, though they are necessary to the well-being of the Porte. The Porte, however, is evidently reluctant to engage in a conflict with a more powerful neighbor.

Romania has officially announced herself as freed from vassalage to the Porte, on account of her rights being violated by the provisions of the new Ottoman constitution.

The Constantinople *Tarhipe* newspaper states that in consequence of Rumania's uneasiness the Porte has officially declared that the new constitution was purely internal, not affecting the rights of a Principality guaranteed by international treaties.

The French Senate has re-elected the Duke de Audiffert President of that body. Count Rampart, of the Left Centre, was elected one of the Vice-presidents in spite of the opposition of the right.

In the French Chamber of Deputies at Versailles, Sig. the Minister of Finance, introduced the budget of 1875. He estimates a surplus for that year of 6,000,000 francs.

The regular session of the French Chambers opened at Versailles. In the Chamber of Deputies M. Grevy was re-elected President by 326 out of 340 votes recorded.

At a meeting of the shareholders of the Suez Canal Company in Paris, a convention with the Maritime Powers which binds the Company to expend 10,000,000 francs annually for the improvement of the canal, and terminate the long-standing difficulty relative to tonnage dues, was passed by an almost unanimous vote.

France exports annually \$400,000 worth of human hair to the United States.

The French Government intends to make a large use of the privilege of pardon in favor of the Communists. According to the Registrar General's return, the deaths from small-pox in London rose last week to 116, against 75 the previous week. The metropolitan hospitals contained 2000 small-pox patients. About 2000 were refused admission during the week, all available beds being occupied.

The London Times in an editorial says: "The government of India admits that it has a task before them exceeding in many respects that in Bengal of 1874. The area of the present famine districts is greater. It spreads into two provinces instead of one. The population affected is far greater. There are localities less mitigating circumstances which must not be overlooked. If the population is greater, it is not collected in such dense masses as the famine-stricken people of 1874, and we may still hope there is not now such absolute dearth of food as then."

A London despatch says: "The government estimates show that the famine in Bombay will gradually increase, reaching the maximum in April, when a million people will require relief, after which it will gradually decrease. In Madras the prospect is proportionately worse. The districts affected in Madras cover some 300 square miles and contain a population of eighteen millions. In Bombay the famine-stricken territories extend 50,000 square miles, and have a population of 20,000,000. Five millions of which are in districts now immediately affected."

The foreign office has received a despatch from the British Ambassador at Constantinople, stating that the export of grain and cattle has been prohibited from the Danube, and the export of grain prohibited from the ports of Trebizond, Samoun and Kerass.

At the recent election in Germany 71 members of Parliament, the so-called Democrats showed great energy in all the large towns even where their candidates were

defeated. They succeeded in electing a number of members of Parliament. The clericalists have 89 out of 335 chosen.

The University of Berlin has at the present time 2,300 matriculated students, against 1,877 last year—more in number than they had ever had at any time during the sixty-six years of its existence. A large majority of the students are natives of Prussia, but the other German States are also well represented, and forty-five are Americans.

Another session of the Constantinople Conference was held on the 15th inst., at which the Marquis of Salisbury, in the name of his English colleagues, communicated to the representatives of the Porte the last proposals of the Powers, whose demands were materially reduced and softened in order to make them less objectionable to Turkey. The Marquis announced that if the Porte did not agree to the proposals now made he had instructions to quit Constantinople. The British ambassador made a similar declaration, as did also all the other European plenipotentiaries in succession. One of the Turkish plenipotentiaries replied and said he did not think it possible for Turkey to yield upon the questions relative to the commission of supervision and the appointment of governors, those proposals affecting the independence of Turkey and having already been rejected. The Porte however would examine the communication and reply definitely thereto at the next sitting of the Conference.

UNITED STATES.—The interments in Philadelphia last week numbered 310, and in New York 450.

It is stated that Isaac Firelander the great California wheat cultivator, sold from his farm last year about 18,000 tons of wheat for \$648,000.

The *New York Journal of Commerce* has been investigating the length of time it takes to transmit a message over the Atlantic cable. The first signal is felt in four or five minutes of its departure, but the following one goes through more rapidly. As many as seventeen words have been sent over the Atlantic cable in one minute. Fifteen can easily be sent under pressure; and twelve words a minute is a good working rate. A fact not yet explained by the scientists is that the electricity does not travel from New York to London as in the opposite direction.

The estate of the late Cornelius Vanderbilt is understood to be quite as great as the largest estimates which have been current respecting it. His securities alone, it is said, amounted to about \$850,000,000. The will, which is an elaborate document, was made in 1875, and gave to his son, John G. Vanderbilt, the sum of \$1,000,000. H. Vanderbilt, his son Cornelius is to receive only the income of \$200,000. Five daughters have legacies of \$500,000 each, and three others the yearly income of \$500,000, \$400,000 and \$300,000 respectively. Over twenty individuals are to be paid sums varying from \$100,000 to \$25,000 each, but whatever is bequeathed for benevolent and charitable purposes. A considerable number of railroad shares are given to four sons of Wm. H. Vanderbilt. To the widow on whom \$500,000 was settled at the time of her marriage a few years since—the following bequests are made viz., United States bonds to the amount of \$500,000, railroad shares valued at \$200,000, and all the personal property contained in it.

Wm. H. Vanderbilt says that provision will be made for founding an asylum for railroad men broken down or disabled in the service, and that a site for the institution has already been secured.

The State finances of New Jersey are in a satisfactory condition. The receipts of the Treasury for the year ending 10th mo. 30th, 1876, were \$3,304,262, and the payments \$3,338,186, leaving a balance of \$118,076. The constitution forbids the legislature to create a debt exceeding one hundred thousand dollars without a vote of the people.

The bonded and floating debt of the State of Tennessee now amounts to \$2,968,071.

During 1876, the imports at New York amounted to \$29,320,000, which is \$3,040,000 less than in 1875. The exports of domestic produce were \$265,744,000, and of gold and silver, after deducting imports, the sum, \$16,879,000.

During the year 1876, St. Louis received 15,107,380 bushels of corn; Chicago received 48,298,783 bushels. St. Louis received during the year 349,083 cwt. of sheep, 10,425, and 145 sheep; Chicago received three times as much, 1,038,034, 60,000 and 145 sheep; two and a half times as many sheep, 351,756.

A Pittsburg despatch of the 14th says: The heavy ice began yesterday afternoon, reached here at six o'clock

this morning, doing great damage to coal and steam engines of this city. Two passenger and several boats were sunk and a large number of tow-boats (10) damaged. An immense number of coal flats, laden empty, were carried away, and it is feared that several owners of coal flats, who coal works along the Monongahela were so badly wrecked that it will require several months to repair the damage.

A Cincinnati dispatch states that the movement in the Ohio river has been almost general. Pittsburgh to Cairo, entailing heavy losses chiefly to owners of coal flats. The coal works along the Monongahela were so badly wrecked that it will require several months to repair the damage.

At the Government establishment on the McRiver in California, from six millions to ten millions of young salmon are hatched each year, and distributed to the Fish Commissioners of the various States as rivers suitable for their growth and increase.

A President Grant has telegraphed orders to General Anger, commanding the U. S. forces from Louisiana in which he says that it has been the policy of the administration to take no part in the settlement of the question of the rightful government of that State. Should there, however, be a necessity for the recognition of either of the two rival governments, it may be that of the Republicans under Governor Packard.

A very heavy snow storm occurred the 15th inst. over the north western States, in many places broke the railroads. The snow was from one to three feet deep.

MARKETS, &c.—The following were the quotations on the 15th inst. *Philadelphia*—American gold, U. S. sixes, 1884, 114; do. 1898, 113½; do. 5 per cent. 10-40, 112½; 113½; 5 per cents, 1881, 110½; 112; 5 per cents, 108½. Pennsylvania and western extra 117½; 55; 50; finer brands, \$8 a \$9.00. Pennsylvania best, \$1.50; Ohio do., \$1.40; \$1.42; amber, \$2.25; western white, \$1.35; \$1.30. Penna. red, \$1.25; 81 cts. Mixed and yellow corn, 58 cts. Oats, 43 cts. Best New York cheese, 14½; 15 cts.; west 13½; 14½ cts. Sales of 4200 beef per lb. at the drove yards: extra at 6½; 7 cts. fat hog, gross; fat good, 5½; 6½ cts., and common 4 to 5 cts. Sheep, 7 cts. per lb. gross. Receipts, 7800 head. Hogs, 24,000; and 16,100 cts. for prime. Cows, 4000 head. *New York*—Superfine flour, 25.50 a 25 finer brands, \$6 a \$10.50. No. 1 Minnesota soft wheat, \$1.48 a \$1.50; No. 3 Chicago spring, \$1 State rye, 94 cts.; western, 84 cts. Oats, 42½ a 50 New yellow corn, 61 cts. Middling cotton, 13 1/8; common, 12 1/8; 10½ cts. for prime. Lard, 20; 27.25 a 29.50. No. 2 spring wheat, \$1.20; No. 1, \$1.26. Corn, 44½ cts. Oats, 35½ cts. Barley, cts. Lard, \$1.95 per 100 lbs.

FRIENDS' ASYLUM FOR THE INSANE.
Near Frankford, (Twenty-third Ward,) Philadelphia.
Physician and Superintendent—JOSUAH H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' Meeting, Salem, Ohio, 1st mo. 23^d, 1876, ABEL WALKER, of Fishing, Belm Co., Ohio, to HANNAH L., daughter of Mary J. French, of the late Samuel French, of Salem, Col. Co. Ohio.

—, at Friends' Meeting-house on Sixth street Philadelphia, 12th month 12th, 1876, T. CLARKS ELDREDGE, of Perkiomen Junction, Chester Co., Penna. to ELIZABETH, daughter of Mary and the late J. Bonnell.

DIED, at Smyrna, New York, on the morning of 1st of 1st mo. 1877, HENRY KNOWLES, in the 91st year of his age, a minister and member of Smyrna Monthly Meeting. He was a good example in maintaining the testimonies upheld by the Society in the beginning and often mourned over the departures of many and our name, especially in dress and conformity to the world, and was often led to counsel his children as friends to dwell low, and keep in the simplicity of a friend. His last sickness was short. He was sensible and his end was not said, "his work was done," "it was nothing in his way." He waited in great calmness and composure the final close, leaving a comfortable evidence that his end was peace.

The Ruins of Ephesus.

An enthusiastic English architect named T. Wood, has devoted eleven years to diligent exploration and research on the site of his ancient city, and, says the *New York Evening Post*, has given an interesting account of his labor and its results in a large volume titled "Discoveries at Ephesus, including the site and remains of the Great Temple of Diana," which is published simultaneously in Great Britain and this country. Its illustrations, which are many, include a number of colored plates, showing mosaics precisely as they were found. It is too soon, as yet, to estimate fully the importance of J. T. Wood's work. He has stored in the British Museum great mass of busts, statues, inscriptions, architectural fragments, &c., which must be studied diligently by archaeologists before their full significance can be determined, and his book the explorer has made no attempt to guess precisely what ultimate results must flow from his discoveries; he has enlivened merely to write an account of his labors in Ephesus in the body of his book adding in an appendix a good many of the inscriptions, with tentative restorations, translations, &c., which have been furnished by eminent scholars.

The story that the explorer here tells has all the fascination of heroic romance. With courage this enthusiastic architect undertook thirteen years ago to search for the remains of the Temple of Diana, the site of which was unknown, while even the fact that there ever was such a temple was seriously doubted by many competent critics. So small as the faith of men better able than he was judge of the probable fruitfulness or failure of his undertaking that he could secure no appropriation from the British Museum with which to prosecute the work. He went to Ephesus, however, and under protection of a temporary firman, began the excavations at his own expense, supporting himself meanwhile by practising his profession in Smyrna, fifty miles from the scene of his labors in behalf of science. When he had demonstrated the value of his labors aid came to him in the shape of very small appropriations, which he has directed to expend in ways other than the ones which he believed to be best; but by dint of perseverance he won increased support after a time both from the museum and

from private persons, and after eleven years of incredible difficulty, hardship and danger, during which he suffered constantly with fevers bred in the pestilential atmosphere of Ephesus, and met with many mishaps of a serious nature, he succeeded at last in discovering the remains of the temple for which chiefly he had been searching, and in making such measurements of the fragments that he is able to give accurate elevations of the building, together with interesting drawings of many of its bas-reliefs and other ornamental parts. He has mentioned also the Odeum or lyric theatre of Ephesus, and the great theatre, laying bare their seats, aisles, stage, &c., and discovering there very many inscriptions of great historical value, which are now in the British Museum. His labors have ended for the present, but as he has bought for the British Museum the eight acres of land on which the ruins of the temple were found, the work of further exploration will be begun again in a short time.

J. T. Wood's firman permitted him to export whatever antiquities he might find, except duplicates, which were to go to the Turkish government; and it was a jest of his, that by the terms of his grant he was to give to the Turks any duplicate temple of Diana that he might find. There were other provisions, however, in the firman, which gave him no little trouble. One of them was that he must obtain permission to dig from the owners or occupants of the land; and, as human nature is much the same in Asia Minor as in the western world, his purse and his temper suffered no little in consequence of this stipulation. The greed of the inhabitants operated in other ways, too, to render his work less profitable than it might have been.

"There used to be a very prevalent notion among the Turks in Asia Minor that there was not only much hidden treasure below the surface of the earth in wells and elsewhere, but that even marble statues might contain gold. This belief has perhaps caused more destruction of beautiful sculpture than any other motive; and it is only within the last few years that the Turks have found it to be a much better speculation to sell statues than to break them to pieces in the hope of finding gold."

Our explorer encountered many image-breakers of that other and worse sort, namely the persons who call themselves tourists, and to whom spoil is the chief end of travel. They sometimes came to him in companies, and destroyed much that he had dug up before he could secure it.

"When the Odeum was first opened, the stage, orchestra, seats and steps were found in a perfect state of preservation, under an accumulation of soil and debris varying in depth from five feet to twenty-three feet."

"* The beautiful front wall also remained, with its five doorways and steps, to the height of seven feet and six inches. Visitors have

recklessly destroyed much that remained by breaking off fragments of marble from the seats and cornices, and by strewing the whole of the interior with masses of rejected marble and chippings from the specimens which they carried away. * * * The desire to possess fragments of ancient sculpture, such as a nose, an ear, a finger, or a model of architectural moulding from an old building, may be natural, but is most deplorable when it causes, as it often does, the utter destruction of works of art, which, placed in some museum, would be objects of very great interest. I have even heard of captains of merchant ships, who, bringing passengers to Smyrna, advised them on their visit to Ephesus to take with them hammers and chisels to aid them in obtaining interesting specimens for their cabinets and curiosity shelves at home."

Wood discovered that these reckless destroyers of ancient works of art felt more interest than they feel in antiquities, and that their desire to possess the fragments they rather is chiefly a vainglorious one. Very many of them, he tells us, after journeying all the way to Ephesus, felt so small an interest in the ruins which they had professedly come to see that they would not take the trouble even to enter the walls and look. In view of the recent English assertions that we on this side of the ocean are unable to appreciate, and therefore unworthy to possess, the Karium collection, this English explorer's testimony to the genuineness of American interest in the antiquities at Ephesus is timely and interesting. On this point he writes:

"Visitors to Ephesus came from all parts of the known world; but I have seen there, perhaps, more of our American countrymen than of any other nationality. I was particularly fortunate in meeting with many Americans—ladies as well as gentlemen—who caused me to form a very high estimate of the American character. I found them generally anxious to make something more than a superficial survey of the ruins, and I did not now remember any party of Americans preferring to sit down to eat and drink, to making a careful examination of all the interesting objects they had come to see. I cannot say the same of all nationalities."

The people of the village of Kirkenjee are supposed to be the lineal descendants of the ancient Ephesians, and hence the glimpse which the author gives us of their village and their ways is interesting.

"The appearance of this village strikes the person who approaches it for the first time as being very peculiar, the houses presenting a very formidable front from the radiating dabs of whitewash splashed around the windows, for the purpose, they say, of keeping off the 'evil eye'—a common superstition in Asia Minor. The windows here were made to look like so many evil eyes, as I thought, glaring at you, and defying you to enter the village. This fashion gives a beggarly appearance to

the houses, which are built of small stones and covered with flat mud roofs. Kirkenjee, however, is not so poor a place as it seems to be. The inhabitants are industrious, and cultivate the ground on the plain of Ephesus and for miles around. On feast days the women turn out clad in comfortable and smart dresses of light colors, and make a great display of gold coins, which they string and wear as armlets and necklaces.

The work of the explorer was greatly impeded by the worthlessness of the men whom he was able to employ, and his opinion of the Turkish character is not very high.

"Much has been said about the honesty of the Turks; I am sorry I can say little in support of statements in their favor. They would generally steal any small object of value found in the excavations, and did not scruple to commit the most heartless robberies on their fellow-workmen."

One of them stole the head of a statue which J. T. Wood had dug up, and, after the statue had been forwarded to England, wanted to sell its discoverer the missing head for an enormous price. He adhered so firmly to his price that the statue remains headless still in the Museum.

The Turkish indifference to the valuable antiquities which western explorers dig up under their eyes appears to be in some measure due to their inability to understand the facts which give them their value. The Mudir of the district visited the ruins of the great temple one day to see Wood's "wonders," of which he had heard.

"On my showing him the drums of the large columns and the capitals, he asked me to what building they had belonged. I told him they were the remains of an ancient mosque or church in the time of the ancient Greeks, when they did not worship the one true God, but had many gods, male and female, and that this church was dedicated to the worship of a female, whose statue, forty or fifty feet high, was set up inside it. 'Ah,' said the Mudir, as if a new light had broken in upon him, 'they were Protestants.'"

The most interesting part of the work, namely, that in which the author describes in detail, and illustrates with plans, elevations, &c., the several successive temples as his measurements show them to have been when they were standing intact, we have left wholly untouched, because the chapters devoted to this part of the subject form a consecutive whole which is, of course, too long for reproduction here, and which it is impossible to divide without destroying its value. It is sufficient to say that J. T. Wood has succeeded in discovering what the temples were like, and in restoring the last one, on paper, to a remarkable extent. No pains or expense have been spared in the preparation of the book and its many plates enable the reader not merely to understand but to verify for himself, most of the author's deductions from the facts in possession. The book is one of surpassing interest, and, considering the expense of its publication, the price at which it is sold (twenty dollars) is remarkably low.

It is not for us to judge of the importance of our impressions of duty, or of their use, but to do the work daily set before us, whether greater or smaller, and the reward will follow. And it will have its effect whether we ever know it or not.—*Catharine Seely.*

For "The Friend."

Death-bed Repentance.

In accordance with evidences witnessed in various cases there remains no doubt that *some*, and perhaps *many*, have become sufficiently divested of self to be enabled to arrive at sincere repentance and pardon for their past mispent life, on a death-bed; but so many instances having occurred of *apparent* repentance under prospects of the near approach of death, where a subsequent course of life gave no evidence of a change of heart, that fears may be properly entertained that a thorough preparation for an entrance into the mansions of purity and holiness, under such circumstances, is more rare than is generally believed and advocated. The mercies of Him with whom we have to do are indeed boundless; yet purity of motive on the part of His creatures is essential to being met "afar off," and obtaining the benefit of His mercies.

Man by nature loves ease, and is prone to the continual pursuit of pleasure and happiness, and *this* he seeks to find in the exercise of his own will, and in the gratification of his own lusts and conceivings. When his course is arrested by disease, followed by an apprehension that he will soon be removed from earth and all that his affections hold dear, he feels that he loves *that* in which his heart has delighted, and could he be permitted to possess it unmolested still, would perhaps rest easy for the present, nor be sensible of the necessity of seeking happiness beyond the grave. *But here*, in the absence of a hope of longer enjoying the things of earth, the same selfish promptings which have prevailed through life, may turn to an earnest solicitude for happiness in the world to come, and many penitent sentences may be expressed, and even supplications uttered, which, if he should die, would be accepted as an evidence of a preparation for death, whereas, should he recover, would perhaps soon pass away and leave no trace of any permanent improvement.

A soul may be sensible of the terrors of death, of a foresight of a final separation from all things here below, and of the just judgments of God for sin and disobedience, and yet not be capable of arriving at the true place of repentance because of the prevalence of the "whirlwind and the fire," an *intense anxiety*, without that calmness of mind in the "stillness of all flesh," so essential to a successful approach to the throne of Grace.

True repentance and a preparation for an inheritance with the saints in light, is not merely a sorrow that we are overtaken in an unprepared state, and a desire for heaven and happiness, but the pure love of God operating on the heart, giving it a sense of its sinful condition, and its utter dependence on the merits of a Saviour, purifying the soul from its carnal nature and the love of the creature, to the love of the Creator above every other thing. Should this come to be thoroughly experienced under the hand of affliction, is it at all probable that former evil habits would be resumed on a restoration to health? Similar awakenings, however, have been known to appear in the minds of both those who were removed by death, and those who have recovered, and have lived no more a Christian life than before. Then is there not to be drawn at least a lesson of instruction and caution against the too commonly indulged practice of glorifying the spiritual attainments and evidences of divine acceptance concerning the

deceased on grounds so limited, as to lose the standard of true repentance and amendment of life in the minds of the living?

It is not unusual in the present day to have public communications of this character (funerals, and in many such instances fear apprehensions have been entertained, that serious injury was thereby inflicted on the minds of some, particularly those who were intimately acquainted with the daily life of the deceased, and felt assured, perhaps, that it merited nothing superior to their own, that man can say or do, cannot add or diminish anything relative to the eternal condition of the soul after it has left the body. Then how much more in accordance with the spirit of the gospel would it be, and tend the spiritual well-being of all, to attend simply to the pointings of religions duty. Let the words of death be a warning voice to living, to lose no further time in the indulgence of ease and thoughtlessness, but earnest endeavor each to know their "calling a election made sure," seeing that none of us know "the day nor the hour" when a similitude may be ours, and leave the departed soul in the hands of its merciful Creator. Its destiny is fixed; and the best, and all we can do relative thereto is, to trust to His mercy, and ardently hope it has found acceptance in the hands of a compassionate Saviour.

Ohio, 1st mo. 15th, 1877.

For "The Friend"

Establishment of Slavery in this Country.

(Concluded from page 186.)

"That Congress gave expression to the general sentiment of the people of the colonies fully appears in the declarations of the Virginia and North Carolina convention which sent delegates to that Congress. The conventions pledged themselves not to import slaves, and not to purchase them when imported by others. In Georgia—a colony founded by James Oglethorpe, who forbade slavery there, but whose humane purposes were afterwards thwarted by avarice at power—a public meeting declared 'their disapprobation and abhorrence of the unnatural practice of slavery in America,' and pledged themselves to use their 'utmost endeavors' to the manumission of slaves in our colony. And Congress itself on the 6th of April, 1776, resolved without opposition, that 'no slave' imported into any of the thirteen united colonies."

The British commercial and colonial policy, however, had interested, active, and influential supporters. Leading statesmen in South Carolina and Georgia were confessedly not only for slavery, but for the continuance of the slave trade. In Maryland, Virginia and North Carolina, slavery had still a strong hold upon the people. But their interest in the domestic, quickened their opposition to the foreign slave traffic. Although there were but few negroes in the Middle and New England colonies, many of these having been made free by the voluntary action of the masters, still slavery and the slave trade had zealous supporters, especially among the commercial, wealthy and aristocratic classes. The fact was signally manifested by the action of Congress in striking from the original draft of the Declaration of Independence Jefferson's arraignment of the British king for forcing upon his American colonies that traffic in man-

high he branded as an 'exccrable commerce,' 'piratical warfare,' 'the opprobrium of infernal powers,' 'a cruel war against human nature.' 'That clause reprobating the enslave of the inhabitants of Africa was struck it,' its illustrious author declares, 'in compliance to South Carolina and Georgia, who had never attempted to restrain the importation of slaves, and who, on the contrary still wished to continue it. Our northern brethren, so, I believe, felt a little tender under those assurances. Although their people had very few slaves themselves, yet they had been pretty considerable carriers of them to others.'

The same spirit and policy which struck these words from the Declaration of Independence, influenced the action of Congress in framing the Articles of Confederation. The report of the committee to prepare a plan provided that supplies should be obtained by requisitions in each State in proportion to the number of its inhabitants. This at once and necessarily raised the question of the status of the slaves. Mr. Chase, of Maryland, afterwards one of the justices of the Supreme Court of the United States, moved to count only the white inhabitants. 'The negroes,' he said, 'were property, and no more members of the State than cattle.'

It was suggested by Mr. Harrison of Virginia, that two slaves should be counted as one freeman. Mr. Wilson of Pennsylvania, did the exemption of slaves from taxation could be 'the greatest encouragement to live keeping and the importation of slaves.' He declared that they increased products and imposed burdens, and prevented freemen from cultivating the country. 'Dismiss your slaves,' he said, 'freemen will take their places.' To his remark Mr. Lynch, of South Carolina, replied with emphasis, 'Our slaves are our property; if that is debated, there is an end of confederation.' He asked why they should be taxed more than sheep. To this question Franklin replied: 'Sheep will never make incorrects.' Mr. Chase's amendment was rejected, Georgia was divided, and all the States north of Mason and Dixon's line voted against it.

The obstacles in the way of Confederation being found so great, the discussion was then suspended; but it was renewed again in October, 1777. It was then moved that the supplies be based on the value of property in each State. This proposition was rejected, and a motion was made to exempt slaves from taxation. The four New England States voted against it, New York and Pennsylvania were divided, and Maryland, Virginia, North Carolina, South Carolina and New Jersey voted for it. This vote exempted slaves from taxation altogether, either as inhabitants or property. It was a complete triumph of those representing the slave interest, and may be pointed among the earlier illustrations of the potent influence of the rising slave power.

No power was given to the Confederation to regulate commerce. Each State was left free to decide what imports it would admit or prohibit, so that Congress, after its emphatic condemnation by the acts of 1774 and 1776, renounced forever, in the words of Bancroft, the power to sanction or to stop the slave trade.' This result could not but enure to the interests of slavery and to the strengthening of its power.

But the Confederation secured to the free inhabitants of the State all privileges and im-

munities of the citizens of the several States. The legislature of South Carolina, when the Articles of Confederation were under consideration, saw that by this provision the rights of inter-citizenship were secured to the free colored inhabitants of all the States. After debate the plan of Confederation was returned to Congress with the recommendation that inter-citizenship should be confined to white persons. South Carolina and Georgia supported the proposed change, but eight States refusing their assent, the proposition was lost. In this instance freedom won, and the claims of human equality were vindicated.

But it could not be doubted that at the time of the Declaration of Independence; when the government of England ended, and the government of the United States began, the people were, on the grounds of justice, humanity and interest, largely in favor of putting an end to the African slave trade. Neither can it be doubted that the most conscientious and enlightened portion of the people, including most of the Revolutionary leaders, who guided the colonies through civil war to national unity and independence, believed slavery to be inconsistent with the doctrines they were proclaiming, and the civil institutions they were founding. The statesmen of that era hoped, and confidently expected, that it would soon pass away. But the slave system fostered by England, and sustained by individual interest, indolence, and pride, during a hundred and fifty years, had so incorporated itself into the social life of the people, especially of the South, that, when menaced by the logic of events, it was seen to have a hold and tenacity of life not dreamed of by either friend or foe. Champions were ready not only to protect it against the advancing currents of Christian civilization, but also to oppose every interest, every institution, and every individual that menaced its paramount sway. Even then, when the Republic took its place in the family of nations, had begun and had far advanced that work of personal and public deterioration,—that poisoning of the fountains of individual and social life whose full development the rebellion revealed, as it was itself their sad and legitimate result."

Selected.

Some remarks of George Whitehead on the Bible—the reading of and committing to memory its contents.

"I always had a love to the Bible, and to reading therein, from my childhood, yet did not truly understand nor experience those doctrines essential to salvation, nor the new covenant dispensation, until my mind was turned to the light of Christ, the living eternal Word, the entrance whereof giveth light and understanding to the simple. Yet I do confess it was some advantage to me frequently to read the Holy Scriptures, when I was ignorant, and did not understand the great and excellent things therein testified of. For when the Lord had livingly in some measure opened my understanding in the Holy Scriptures by my often reading the same before, having the better remembrance thereof, it was a help and advantage to my secret meditations, when a lively sense and comfort of the Scriptures was in measure given me by the spirit, and thereby I was the more induced to the serious reading and consideration of what I read in the Holy Scriptures, and the comfort

thereof made known by the Holy Spirit enlightening the understanding. All the promises of God, which are yea and amen in Christ Jesus, being truly comfortable when applied by the same spirit, for that will make no wrong application thereof; that Spirit will never apply peace to the wicked, nor to persons living in their sins; nor tell the unjust that they are just, or righteous in God's sight. It is through faith which is in Christ, that the Holy Scriptures are said to make the man of God, 'Wise unto salvation, and profitable unto him for doctrine, reproof, admonition, and instruction in righteousness, that he may be perfect and thoroughly furnished in every good word and work.' Doubtless Paul esteemed Timothy's knowing the Holy Scriptures from a child, to be some advantage and help to him, but it was principally through faith, which is in Christ Jesus.

These things considered, I would not have Christian parents remain in educating, and causing their children to read the Holy Scriptures, but to induce them both to learn, and frequently to read therein, i. e. the Bible. It may be of real advantage, and profitable to them, when they come to have their understandings enlightened, and to know the Truth as it is in Christ Jesus. I have sometimes observed children in reading the Bible, have been affected with the good things they have read, from a secret belief of them, which hath had such impression, that they have been induced to a more serious consideration thereof, when the Lord has opened their understandings in some measure, by the light of his grace in them."

Shoshone Falls.

We left the Park by another trail that led us among deep, gloomy cavities formed by the river in the misty past, long ere it had contracted to its present limits. These were frequented by thousands of cliff swallows and some sparrow hawks that chattered and screamed incessantly, and from an occasional bunch of straggling shrubbery came the pleasant notes of the song sparrow. These broke the monotonous silence of the forbidding precipices, and gave life to the otherwise dreary scene. Having reached the upper plateau once more, we galloped two miles farther, and halted to listen to the rough, hoarse and muffled roar of the Shoshone Falls that were thundering far beneath us in the cañon.

Half a mile beyond we had a fine view of their outlines. Looking down from our elevated terrace, we could see around them all the elements of a beautiful landscape—gorse and meadow, plain and dell, an undulating park, rich in robes of many-hued flowers, a placid river, and a boiling, snowy cascade, and, in the background, towering terraces of barren crags, veritable mountains of stone. Dismounting, we led our horses down bluff after bluff, until we reached a small park skirting the river. This was covered with grass that reached to our knees, and sprinkled over it were many species of gaudy flowers new to me.

We followed the bank of the river until we reached a copse of juniper that thrives wherever the refreshing spray falls, and, passing through this, found ourselves standing on Lookout Point, directly over the river where it plunges downward; and from this spot we had a magnificent view of the falls, as we could gaze directly down upon them, they

being only four feet below us. Glancing up the stream, we could see that its sinuous course for half a mile was one mass of screaming rapids and small cataracts, which were numerously dotted with barren crags and flower-clad islets of many forms. By counting the larger leaps, we made out eight good falls within an area of two hundred yards, which averaged from six to twenty feet in height; and no two were alike in outline. Close to the shore the water formed deep lanes or canals of bubbling cascades through the rocks, and their gentleness contrasted strongly with the turbulence adjoining them. As these varied and diverging bodies approached the precipice they swung together to produce the Grand Falls, which are excelled only by Niagara and the falls of the Missouri in volume, while they outrank all in diversity of form and contrast of surroundings. Massive in power and vigorous in action; warm in color yet enveloped in gloom; picturesque in immediate accessories yet encompassed by savage grandeur, they possess all the elements that make such scenes attractive to the lover of the beautiful. Their very situation in the midst of a desolate artemisian plain, and hemmed in by canons whose dreary depths are impenetrable to the sunlight for many months in the year, adds to their interest and enhances their impressive magnificence. The main falls are estimated by those dwelling in their vicinity to be two hundred and twenty feet in height; but this is probably beyond the bounds, though, judging from appearance, not much. They have a width of three hundred yards by following the curve of their outline, but in a straight line they will not exceed two hundred.

They are of an irregular concave shape, somewhat like a reversed crescent; but during the spring freshets they assume a convex form, owing to the increased volume and velocity of the water. The pretty park, with its luxuriant grasses, flowers, and coppices of junipers, gives a softness and color to the falls that are agreeably appreciated by the eye, as they impart the picturesque element so much needed, but on the opposite side the dark and towering terraces of trap, with the inevitable accompaniment of a heavy talus, loom up against the sky in black masses, and convey the most impressive idea of gloom and rugged wildness. While the falls are grand from every point of view, it is only at their base that one can fully appreciate them, and I found the attempt to reach that position a most hazardous one, as I had to descend the sheer face of the boulders, and in several instances I could only find a light hold for my finger-tips and the toes of one foot. Had a bit of the rocks given way, I must have been dashed to pieces on the crags below. It was only by bracing every nerve and firmly clenching the teeth, that I was enabled to make the descent; but I confess that even then a knee occasionally trembled, despite my utmost effort to be brave. After a toilsome struggle I reached a prostrate tree that lay against the bluff at a convenient angle, and this led me into a ravine which was covered with stunted junipers, briars, and a large, wiry grass. This even was so steep that it was only by leaning well back and falling against trees, that I was prevented from being shot downward into the river by my own momentum. By clambering over boulders, vaulting fallen trees, and making bridges of prostrate, water-pil-

ished trunks, I was enabled to get within forty feet of the falls; but further progress was checked by the smooth and perpendicular crags.

Selecting a mossy bank covered with a long dank and prostrate grass, I threw myself upon it, and for two hours gazed upon the stirring vista before me in a sort of half-dreamy mood; for it was too overpowering to allow the faculties to expand into full action. The longer I looked the more I desired to, for I was fully captivated by the grand yet weird beauty that surrounded me. The water, in overleaping, sweeping waves of white, and with a vibrating sound that resembled that produced by many mills in motion, thundered steadily downward, and developed splendid rainbows that extended far above the falls, and spanned the stream; while heavy showers of vapory spray slowly upward rose to a height of three hundred feet, then lazily floated away in clouds of darkish gray.—*Appleton's Journal.*

OUR FIRST GRAY HAIR.

BY WALTER C. HOWDEN.

As the first big patting drops that fall
With a splash on our lattice pane
Make us shiver and start as they warn us all
Of a storm or of coming rain:
So it is with life when we're growing old
And age steals on unaware—
We shiver and start, if the truth were told,
At the sight of our first gray hair.

We mark not the light of the noontday hours
Like the first streaks the dawn doth bring;
We hail not the birth of the summer flowers
As we do the first snow-drop of spring;
On the bleak winter wind we look not with grief,
Though it dash through the branches bare,
But we sigh when we witness the brown autumn leaf,
And behold Nature's first gray hair.

Gray hairs may come when the beaming eye
Has none of its brightening lust;
When with buoyant heart we would vainly deny
Youth's Rubicon had been crossed;
But the ivy-clad tree looks young and green,
Though a sapless trunk be there,
And nought of decay on our cheek may be seen
When we witness our first gray hair.

O, a noble crown to a noble life
Is a head of silvery gray,
And 'tis well if, tired with the struggle and strife,
It finds rest at the close of day.
But gray-headed sin is a crownless curse,
And the parent of dark despair,
And it gives us a pang, O doubly worse,
Than the sight of a first gray hair.

Come early, come late, like a knock at the gate
Is that first soft, silvery thread,
And it joins with its silence the years that wait
With the years forever fled;
It silently tells us we're journeying on;
It silently questions us—Where?
O, a faithful mile-stone, were the truth but known,
Is seen in our first gray hair.

“Christians might avoid much trouble and inconvenience,” says Payson, “if they would only believe what they profess—that God is able to make them happy without anything else. They imagine, if such a dear friend were to die, or such and such blessings to be removed, they should be miserable; whereas God can make them a thousand times happier without them. To mention my own case.—God has been depriving me of one blessing after another; but as every one was removed, he has come in, and filled up its place; and now, when I am a cripple, and not able to move, I am happier than ever I was in my life before, or ever expected to be; and if I

had believed this twenty years ago, I might have been spared much anxiety.”

Economy and Hard Times.

Greater are few who have not suffered a greater or less degree during the past year from hard times. Upon some they have been heavily, tearing away accustomed comforts, crushing fond hopes and destroying peaceful mind. To others they have come with a gentle pressure, warning them of dangers unexperienced, while, to a few, perhaps, they have only suggested a more tender sympathy with the woes and a more generous charity for the failings of the real sufferers. To all, however, they bear lessons, old, indeed, at which have to be learned over and over again by each individual, and often only at the cost of bitter experience.

One of the most essential of these lessons is the importance of a wise economy in expenditures. By this we do not mean the sudden retrenchment, compelled by necessity, in times of financial distress, but rather the careful, deliberate and permanent control over expenses which will prevail alike in prosperity as in adverse circumstances. There is probably no greater enemy to pecuniary troubles than this, and no more prolific source of them. Bankruptcy and ruin than the lack of this control does not merely consist in avoiding debt or living within our income, a young man for instance, without other restraint than his own maintenance, may be more extravagant while living within his income than another in different circumstances, who conducts his means. Probably very few in commencing life realize this fully. It seems, indeed, at first sight, that a man has the right fairly and unreservedly, to spend what he earns so long as he violates no other obligations. But a little deeper consideration will show that this is not so. In a general way, it is true each individual is expected to give the world in some sort of labor as much value as he consumes, but there are many inevitable exceptions to this. There are some years the life of every individual during which he can earn nothing. Childhood and youth, also very old age must be provided for some other way. So must years of sickness and times of depression in business, when the special labor of the individual is not in demand. There are also transition periods caused by the very progress of civilization when the various branches of industry will impeded for a time, as in the introduction of a new machine, when many hands are temporarily thrown out of employment. Besides this, there are numbers of persons who, industry reasons, can never produce their own support, such as permanent invalids, and the feeble-minded. It is evident, then, that the must be, in some way, sufficient surplus labor given to the world to meet these needs. This is not a mere matter of chance benevolence though the motive of sympathy alone should urge to the practice of economy. It comes home to each individual in his own case. The debt he has incurred during his career years he must at least discharge in after life to children of his own. He must expect to his own share of the many hindrances to remunerative labor in the course of his life, and he cannot wish his old age to be barrenness to others.

Viewed, therefore, either on a broad social scale, or in the light of individual imper-

ce, it is plainly the duty of each one to procure more than he consumes, or in other words, to practise a wise economy. This cannot be done without diligence, self-denial, and judgment. The labor, of whatever kind, must be guided by intelligence, and performed with skill, to make it as valuable as possible. The proceeds must be expended, not in obedience to the dictates of fashion, the promptings of ambition, or the impulsive desires of the moment, but according to a well laid plan, which aims to secure the best and most permanent results. In youth and health, with ordinarily good prospects, a surplus should always be laid away for times of need, and judiciously invested. It may be difficult to do this, it may involve much sacrifice of inclination, and energy of will, but proportionately to the degree in which it becomes a habit, the danger hard times will be removed, and the consequent sufferings diminished.—*Ledger.*

For "The Friend."

Sentiments of various writers in Reference to War.
To whom is war to be attributed?—"Crimes could be traced to their causes; and guilt could be fixed upon those who occasion, although they may not perpetrate them. And whom are the frequency and the crimes of war to be principally attributed? To the rectors of public opinion, to the declaimers on glory; to men who sit quietly at home their studies and at their desks; to the historian, and the biographer, and the poet, and the moral philosopher; to the pamphleteer; to the editor of the newspaper; to the teacher of religion."—*Dymond on War*, pp. 2, 33.

The Safety of Nations.—"The safety of nations is not to be sought in arts or in arms. War reverses, with respect to its objects, all the rules of morality. It is nothing less than a temporary repeal of all the principles of virtue. It is a system, out of which almost all the virtues are excluded, and in which nearly all the vices are incorporated. In instructing us to consider a portion of our fellow creatures as the proper objects of enmity, it removes, as far as they are concerned, the basis of all civility, of all civilization and virtue; for the basis of these, is the good-will due to every individual of the species."—*Robert Hall, A.M.*
 "As long as mankind shall continue to be without more liberal applause on their destroyers than on their benefactors, the thirst of military glory will ever be the vice of the most galvanized characters."—*Gibbon on the Decline and Fall of the Roman Empire.*

"Morality and religion forbid war in its motives, conduct, and consequences."—*Vicinus Knox.*

Conscientious Obedience.—"There is but one community of Christians in the world, and that unhappily, of all communities one of the smallest, enlightened enough to understand the prohibition of war by our Divine Master, in His plain, literal, and undeniable sense; and conscientious enough to obey it, subduing the very instinct of nature to obedience."—*Wheatley's History of Brazil.*

"They who defend war, must defend the dispositions which lead to war; and these dispositions are absolutely forbidden by the gospel."—*Erasmus.*

The Spirit of Christianity.—"I am persuaded that when the spirit of Christianity shall exert its proper influence over the minds of individuals, and especially over the minds of

public men in their public capacities, over the minds of men constituting the councils of princes, from whence are the issues of peace and war—when this happy period shall arrive, war will cease throughout the whole Christian world."—*Bishop of Llandaff.*

"War has practices and principles peculiar to itself, which but ill quadrate with the rule of moral rectitude, and are quite abhorred from the benignity of Christianity."—*Ibid.*

War the Extremity of Evil.—"As war is the last of remedies (rather no remedy at all), all lawful means should be used to avoid it; as war is the extremity of evil, surely it is the duty of those whose station entrusts them with the care of nations to avert it from their charge."—*Dr. Johnson.*

(To be continued.)

Random Notes of Travel in Europe.

(Continued from page 178.)

From verdant Wales we passed through the smoke, and a swarming population of swartly operatives, to Bromley, in Lancashire. Spending ten days among friends, we attended the ancient meeting of Marsden, now much reduced in numbers. One half this meeting house has been made comfortable with modern seats, while the other remains in its primitive condition, with narrow upright benches, and equally narrow passages, peculiar to a former age. This is a beautiful part of Lancashire, and must have been still more interesting, before the numerous mills, with their lofty chimney-shafts and contiguous villages of workman, had defaced the landscape; but the many busy hives of industry are so suggestive of increased comfort and happiness among the laboring classes, that he who

"Gathers bliss to see his fellows blest,"

will not become too critical an observer.

Pendle-hill looked down upon the busy scene, which differed widely from the aspect it presented when George Fox wrote, "As we travelled we came near a very great high hill called Pendle-hill, and I was moved of the Lord to go up to the top of it, which I did with much ado, it was so very steep and high. When I was come to the top, I saw the sea bordering upon Lancashire. From the top of this hill the Lord let me see in what places he had a great people to be gathered." The origin of the meeting at Marsden dates from near the time of George Fox, and if its history could be written, would present us with some remarkable instances of intellectual character, as well of religious life, in men and women of singular eloquence and power, poets, and men of saintly lives and high character, "whose days were quiet pastorals," and upon whose faces "the dove sat visibly brooding."

At the foot of this conspicuous headland, Pendle-water winds its way so gently through the vale, that one is unprepared to hear that it at times can overflow its banks, can roar and rave, and destroy much property, when swollen by rains. The term creek is never used in England, much to our relief, the word water being employed to designate a small stream and also a lake. "Memories of sweet summer eyes" are mingled with pleasant walks by the holme, beside Pendle-water. This local word is applied to a small, low field, lying beside a stream, or still more appropriately to a meadow that has been recently mown. Remarking to the aged friend who

accompanied me, that I longed to hear the notes of the nightingale, he replied, "I think, my dear, the song of that thrush is quite as sweet."

"I hear the bees in sleepy music winging
 From the wild thyme where they have passed the noon,
 There is the thrush in the hawthorn singing,
 Stirring the white spray with the same sweet tune."

A pleasant feature of English country scenes, is the existence of numerous excellent by-paths, leading across fields, by sequestered streams, furnished with foot-bridges and convenient stiles, and often well paved. These paths date from immemorial custom, and the right of way is jealously guarded against the encroachments of the land proprietors.

The dwelling houses in Lancashire are generally built of stone, and are often long and low, and in the Elizabethan style with mulioned windows, small diamond panes; the mansion-houses enriched with a wealth of plate glass, and always without outside shutters. Stone walls everywhere supersede the hedge row universal in the southern counties, and harmonize with the grey of the houses. As we approach Scotland, the country becomes bolder in outline; the fine sloping hills are not generally wooded, but are of a deep rich green to the summit. Old forests have been cleared away, but very many trees still flourish, worthy successors of the giants of old. Near the streams, or bordering the highways, in almost every available place, a magnificent beech or elm could be seen, and though there are no continuous forests, the abundance of grand trees gives to the landscape a more sylvan aspect than now prevails even in the Atlantic Border States.

An invitation to visit one of the extensive factories of Lancashire, could not be declined, and we were shown through one in which 1200 hands were employed. The clank of the shuttles, the rush of the bands, and the general din, combined with the glitter of polished steel everywhere, rendered the scene impressive. Beautiful fabrics were growing beneath the eyes of the girls who attended the looms,—Henrietta cloths, de laines, poplins, and especially the bright colored and highly ornate, soft and graceful patterns, destined to robe the Chinese mandarin, and imitating the native fabrics with Chinese faithfulness. The proprietors of this vast hive have long incalculated habits of thrift and economy among their work people, and we learned that there are very few of the elder men who are not in possession of some hundreds of pounds sterling. Mechanics Institutions for promoting knowledge among them, were also warmly patronized, and the consequences of their care, were apparent in the cleanly and very comfortable character of the cottages and the conduct of their inmates. The people were also well clothed. Leather-soled shoes were replaced by clogs with wooden soles, and the clatter produced thereby, upon the pavements of stone, is one of the peculiar sounds ever recurring in these factory villages. A large and handsome school-house, supported by the proprietors, stood near, to which large groups of children were flocking, and where it is to be hoped the barbarous *pitios* of the uneducated classes will at length pass from use, for the dialects of Yorkshire and Lancashire were, to us, almost as unintelligible as the language of Russia.

The General Meeting at Ackworth School

occurring at this time, our kind friends accompanied us to this interesting place, upon which our Westtown School was modelled. Ackworth was not, however, erected to serve as an educational Institution, but was originally a hospital, and its long arched stone passages produce a dreary effect. Many of the classrooms are commodious and well furnished with maps and chemical apparatus. One feature we observed which is particularly worthy of notice, that the boys are provided with a room furnished with tools and benches, and encouraged to amuse themselves in the production of articles in fret-work carving of their own designing. Many of these were highly creditable. Thus, while the hand and the eye were trained, and invention stimulated, roughness and rudeness were restrained and the good order of the school promoted. A very animated and good-humored discussion upon raising funds for enlarging the school, arose in the General Meeting. After this we sat down to dinner in company with three hundred other Friends.

Our way to our lodging lay through a fine old garden belonging to the school, devoted to fruits and vegetables and some shrubbery. "The currant-bush and haw tree together,

The bear's sweet breath was blended with the rose,
Alike rejoicing in the pleasant weather,
That brought the bloom to these—the fruit to those."

Large English gooseberries bordered the walk, but their fruit was not yet ripe. A few weeks later we found them in Scotland and discovered their excellence, their abundance and cheapness.

York, 7th mo. 1st.—Leaving Ackworth and our beloved friends, we passed through a fine agricultural district, very unlike the smoke-begrimed region lying between Liverpool and Burnley, where we were seldom out of sight of perhaps thirty tall chimneys, pouring forth volumes of sulphurous clouds. Ancient and ecclesiastical York was our destination, and its Cathedral, the finest in England, like a great magnet drew us within its shadow. Long before we reached the station, its proud towers were seen grandly prominent above the city, and York Castle was conspicuous in another direction. We soon stood beneath the grand tower, whose rose above our heads in majestic proportions. Language can but feebly portray the beauty of these old cathedrals, which may be truly called poems in stone.

Extreme age is indicated by everything around us, the ancient tombs with the carved effigy of some knight in armor, or bishop in his robes, extended at full length—the curious carving—the fine gothic arches, the crypts beneath, all so unlike anything we have seen at home, impress the mind in a manner as novel as it is pleasing. The magnificent interior is an embodiment of one of the grandest architectural conceptions, in which beauty, grace, and sublimity are all combined. Trunks of stately forest trees seem clustered into columns of stone, and the lofty overarching and interwoven branches form the canopied roofing of the wondrous aisles. The great attraction of the minster is the east window, which is seventy-five feet high and thirty feet wide, and one of the largest in existence. This "storied window richly light," is divided into 200 compartments, each adorned with an illustration of a leading event recorded in Sacred History. Some idea of the vast size of this minster may be

indicated by stating that its length is 524 feet.

These great temples belong to another age, and were built in accordance with the prevailing religious feeling of the time that produced them. To build magnificently was then deemed a pious duty, and the more labor and treasure bestowed in enriching and adorning them, the greater was esteemed the merit of their constructors. Devotion to the great work was enjoined upon all. Though we, who live in a day esteemed more enlightened, may regard such devotion as of little worth compared with the exercise of the Christian virtues, and of that spiritual worship, which "He who dwelleth not in temples made with hands," requireth of us, we should remember that the ignorance of the early ages, their want of printed books, and the prevalence of the Roman Catholic religion, are the apologies for the existence of such mediæval structures, the reflex of the thought of their day. The immense sums lavished in our time upon their restoration, though they may be creditable to the taste of the donors, are not proofs of a higher appreciation of the true methods and aims of religion, than was held by the projectors of these florid temples.

(To be continued.)

Self-Denial.—Cecil, we are told in his Memoirs, possessed a remarkable decision of character. When he went to Cambridge, he had made a resolution of restricting himself to a quarter of an hour daily in playing the violin—on which instrument he greatly excelled, and of which he was extravagantly fond; but he found it impracticable to adhere to his determination; and had so frequently to lament the loss of time in this fascinating amusement, that, with the noble spirit which characterized him through life, he cut the strings, and never afterward replaced them. He had studied for a painter, and, after he had changed his object, retained a fondness and a taste for the art. He was once called to visit a sick lady, in whose room there was a painting which so strongly attracted his notice that he found his attention diverted from the sick person, and absorbed by the painting; from that moment he formed the resolution of mortifying a taste which he found so intrusive, and so obstructive to him in his nobler pursuits, and determined never afterward to frequent the exhibition.

Selected.

Those who are going down with the stream, floating on its bosom, may not know its power; those only who are bearing up against it are conscious of the force of the current. The children of Israel sat contentedly by the flesh-pots of Egypt as long as they submitted to their slavery; it was when they were seized with a spirit of independence that they felt how hard their tasks, and how harsh their taskmasters. It is when the captive would break his chains that the iron enters his soul. If you have tried to love God, you have found how difficult it is to raise these hearts above the objects of the earth. If you have been striving to keep up a heavenly temper, you have felt that your affections flow downwards like the stream, instead of mounting upward like the evaporation drawn up by the sun.—*Dr. Mc-Cosh.*

The Shineeck Indians.

In the accounts of the wreck of the steamer *Circassian* on the 11th of last month, near Bridgehampton, in the southeastern extremity of Long Island, mention is made of the loss of life of some of the men employed by the Wrecking Company, who, with the cargo, among whom were several Shineeck Indians. The accounts state that on the 11th, while the men were thus employed, wind freshened, and the sea running high eventually began to break over the ship. The men, apprehending danger, went to the fore rigging, where they were ordered for greater safety. All on board—the two persons—remained thus exposed early in the morning, when it was deemed advisable to shift quarters, as the falling of the top hamper, caused by the rolling of the vessel, made it difficult to hold on. "The cargo was safely transferred to the mizzen, and signals of distress were made. All this time the shore was plain in sight; the moon shining brightly, and the fires built by the crew of the life-saving station showed plainly the figures of the crowd on the beach hurrying to and fro in vain endeavors to aid the men in the rigging, but every effort to get boat off shore proved futile. As often as it was attempted the sea drove it high and dry on the beach, while all efforts to throw out a rope from a mortar failed. Every time the ship struck the men thought she would lose her masts to which they had lashed themselves. Still they had not securely lashed themselves, and among these were the only four saved from the wreck.

"On the morning of the 31st, at half-past four, the long-dreaded crisis came, and the mizzen-mast went by the board with a crew carrying the mainmast with it. A tremendous swell had struck the *Circassian* at a point raised her very high. When it receded it thumped heavily, and the terrific jar threw the mast over the side. The masts being it went to the bottom immediately, carrying with them twenty-eight men, among them Capt. Williams, who like a true-hearted sailor, refused to leave his post, as he had paid the price of his fidelity with his life.

"Amid the howling of the tempest and the roar of the waves, there was borne to the ears of those on shore the voices of the poor fellows in the rigging, singing hymns and praying in chorus to God. There was heard a dry eye on shore among us as we heard these thrilling and supreme appeals made to God. Among those on the wreck were nine Shineeck Indians, who, as a rule, are very good men. During this agonizing scene which lasted for hours, we heard these men praying. The beach was lined with hundreds of people, many of them women, sobbing piteously. Some of them were the wives and daughters of the Indians.

In consequence of the attention which has been drawn to this small band of the descendants of the aborigines of this country, said to be the last of the Montauks, it may be interesting to some of the readers of "The Friend," to have the following information respecting them. In reference to them the *New York Tribune* of the 1st inst., says:

"So many of the residents of this city spend their summers on the east end of Long Island

the history of the peaceful tribe of Shinnecock Indians, living on their reservation near Southampton, working industriously as farmers, horse servants, or toiling on the sea, familiar to them. The Indians are said to be honest and hard-working Christian people, but the sudden calamity which has befallen them finds many destitute of food, or even of the means to bury the dead out of their sight. The three trustees of the tribe lost their lives. One Walker, said to be a most exemplary man, leaves a widow and a number of little children. The Bunns (consins) leave widows and large families. One poor widow loses both her sons and a son-in-law, and has a daughter, with five little children, made a slave."

In 1865, the Committee of Philadelphia Early Meeting for the Improvement and Civilization of the Indian natives, deputed one of its members to visit the different tribes residing in the State of New York, and a statement of their condition and numbers has ascertained, was published in the following year. From that account the following is taken relating to the Shinnecock Indians:

This Reservation is located on a neck of land in the south-east corner of Long Island, which is surrounded on three sides by Shinnecock Bay. They once held a considerable tract of land, but the chiefs parted with it for a mere nominal compensation, and the proceeds were spent, the tribe being likely to suffer from want, the purchasers used it to them for 999 years, reserving certain privileges as rent. From this arrangement much litigation arose; and though the land was of little value for farming, both sides desired to have the control of it. About five years ago an agreement was entered into by which the Indians relinquished to the whites all their claim to about 3000 acres, and retain for their use about 640 acres, one hundred of which are marshy land. Twenty-eight families reside on this tract, comprising about 147 persons, of whom 20 are absent at sea during the visit of the boatmen; there are fifty-eight males and fifty-nine females. Many of the grand-children of the present generation married colored persons of African blood, and most are descended from these, yet but few have much darker complexions than Indians generally. Owing to intemperance they are reputed to have been formerly in a deplorable condition, living in poor wigwags and obtaining a very scanty subsistence. They were in the practice of binding out their children to white people to serve until they were 21 years of age.

About 1828 the temperance reform was introduced among them, and the Legislature of New York made an appropriation to educate the children. A great and salutary change was soon produced. The Indians are now generally sober, moral and industrious, cleanly in their persons, and comfortably dressed. All their houses are frame, one of them cost from \$400 to \$700, and generally have several rooms, and are supplied with the ordinary articles of furniture. They are more neatly kept than is usual for Indians. Small patches of corn, oats, potatoes and other vegetables are raised, and a few bushels of wheat, but not an adequate supply for all. Each family has two or three cows, and there are six horses and ten cows

in the settlement. Those who own horses have vehicles also.

The principal support of these Indians is drawn from the Bay where they procure large quantities of clams, oysters and fish. Many of the young men engage in the whale-fishery, and evince much skill and capacity, for which they are promoted to lucrative stations on board the vessels. It is said they often return from these voyages with balances of from \$500 to \$1000 due them, and sometimes even larger amounts. One young man said he made \$3000 in one of his voyages.

With part of this money he built himself a good two storied house, at which the deputation were quartered. The rooms were well furnished, and neatly kept—the parlor was carpeted, and had in it a sofa, rocking-chair, a clock, a table spread with a variety of books, &c.

A few of the tribe have laid up some money, but in general they are not very economical or provident. The land requires manure to make it produce well, and few have the money wherewith to purchase it—hence they do but little farming, for much would not be remunerative. About 300 acres of it are enclosed for pasturage, most of which is hired out, and the rent applied to the general purposes of the tribe.

They elect two trustees annually whose duty it is to allot the land for tillage, to those entitled to use it. As the population changes frequently by the return of those who have been at sea, the allotments are often altered, and the liability to this makes it uncertain whether the portions assigned can be held for more than a year, which discourages fencing and fertilizing, and is a disadvantage to the farming interest.

For about four months in the winter a school is taught by a white man, and by a female for about the same time in the summer.

The deputation were gratified to find these people so orderly and moral in their habits, and so respectful and courteous in their behavior to each other. Most if not all the adults are professors of religion, and have two places of worship for different denominations. All speak the English language, and with the exception of ten can read and write. They converse fluently and sensibly on general subjects, and appear to be persons of good understanding. Many of them evinced a lively concern for their spiritual welfare, and appeared to be quite familiar with the Holy Scriptures, but some were endeavoring unprofitably to pry into mysteries which it has not pleased Divine goodness to reveal, and which it is unnecessary that man should know.

They appear contented with their allotment and grateful for the many privileges and blessings they enjoy; and the visit of the deputation was spoken of as one of the favors to be thankful for. Although divided in opinion on some religious subjects, they did not seem to be shy of one another, or to entertain any unkind feeling toward those who differed from them; the members of one denomination attending the meetings of the other, and participating in the religious exercises.

They showed the deputation much kindness, and expressed their satisfaction with their remarks on the right domestic and school training of their children and other subjects.

One of the men replied by saying:

"It is a very important subject, and all ought to take heed to the advice given them, for a great responsibility rests upon parents. I desire the prayers of those I address that I may be found faithful in the performance of my duty. I am very sensible of my deficiencies. Sometimes I correct my children too little, and at other times too much. But I desire to do my duty to them, and I hope my brethren and sisters will be concerned to do theirs."

The Montauks are mentioned as occupying the eastern end of Long Island as early as 1657. They were afterwards associated with other bands or tribes in the neighborhood, and in 1773 were reduced to a very small number. Their language is said to have been similar to that of the Delawares, by whom it was understood, and that they were originally of the same race. In Bayley's "Sketches of Suffolk County," it is stated that in 1703, in order to settle difficulties which were constantly arising between the Indians and whites, the people of Southampton repurchased of the Indians the land they occupied, and at the same time gave them a lease on the Shinnecock tract, including a large area, for the term of one thousand years. By an act of the New York Legislature, in 1859, the Indians were authorized to give up their lease for the absolute ownership of the land now known as Shinnecock Neck.

"Verily, for myself, I am so well pleased with Christ and His robe and honest-brother cross,—this cross that is come of Christ's house and is of kin to Himself,—that I should weep if it should come to exchange and bartering of lots and conditions with those who 'are at ease in Zion.' I hold still by my choice, and bless myself in it."—*Rutherford*.

The Suez Canal is now patronized by twenty four regular lines of steamers, employing 234 steamers, of 509,447 tonnage. (Classed by nationalities, the quota of England is 152 vessels of 350,273 tonnage; France, 18 vessels, of 112,624 tonnage; Holland, 15 vessels, of 26,585 tonnage; Austria, 18 steamers, of 29,227 tonnage; Italy, 10 steamers, of 15,248 tonnage; Russia, 8 steamers, of 13,386 tonnage; Germany, 8 steamers, of 11,386 tonnage; Spain, 5 vessels, of 10,751 tonnage.—*Lite Paper*.)

THE FRIEND.

FIRST MONTH 27, 1877.

The present situation of political affairs in our beloved country, is such, we think, as strongly to impress the minds of the thoughtful with considerations of the uncertainty of the prospects and purposes of men, and the indispensable necessity of strict integrity in the administration of Government. The recent election for President of the United States has developed so close an apparent equality in the power of the two political parties, and subsequent investigation has shown so many instances of intimidation and fraud in the manner in which that election was held, that the question as to which of the two candidates is rightfully entitled to be in-

vested with the power and responsibility of that high office remains unsettled, while the supporters of each are unwearied in their efforts to assert and defend their respective claims. The definite announcement of the result, usually made within a few days after such an event takes place, has thus been pending for more than two months, and yet remains in doubt, while serious disputes have arisen in several of the States, accompanied in more than one instance by the ominous spectacle of the inauguration of rival Governors and Legislatures by the antagonistic parties.

It is worthy of remark, that the present crisis which appears to some to threaten the stability of our form of government, should have occurred immediately upon the termination of that period which had been set apart for the celebration of the one hundredth anniversary of our national existence, during which, no little self complacency, and may we not say exultation, prevailed among the people, in view of the rapid growth and prosperity of the nation, and the wonderful strides which it has made towards becoming one of the great powers of the earth. The evidences, however, of wide spread fraud and injustice which have recently been brought to light, striking as they do at that feeling of mutual confidence which lies at the basis of republican institutions, are well calculated to humble us, and enforce the truth of the declaration that it is "Righteousness which exalteth a nation, but sin is a disgrace to any people."

Amid the distracting voices which are raised in the discussion of the several plans now engaging the attention of the public to remedy the existing perplexities, the following counsel of Stephen Crisp, contained in his epistle to Friends, concerning present and succeeding times, is well worthy of revival and consideration at the present day.

"And when you see divisions and parties, and rendings in the nations, and rumors and tempests in the minds of people, then take heed of being moved to this party or to that party, or giving your strength to this or that, or counselling this way or that way; but stand single to the Truth of God, in which neither war, rent nor division is. Take heed of that part in any of you, which trusts and relies upon any sort of the men of this world in the day of their prosperity; for the same party will bring you to suffer with them, in the time of their adversity, which will not be long after; for stability in that ground there will be none. But when they shall say, come join with us in this or that, remember you are joined to the Lord by his pure Spirit, to walk with him in peace and in righteousness; and you feeling this, this gathers out of all bustlings, and noises, and parties, and tumults, and leads you to exalt the standard of Truth and righteousness, in an innocent conversation, to see who will flow unto that. This shall be a refuge for many of the weary, tossed and afflicted ones in those days, and a shelter for many, whose day is not yet over."

SUMMARY OF EVENTS.

FOREIGN.—According to Bohm and Wagner's latest Yearly Review of the Population of the Earth, the total number of human beings on the globe is about 1,223,917,000. Of this number 399,178,200 are assigned to Europe, 825,318,500 to Asia, 199,921,600 to Africa, 47,840 to Australia and Polynesia, and 85,519,000 to America. There are no means of ascertaining the

exact number of people in various extensive and populous regions in which no actual enumeration has ever been made. These deficiencies of course have been filled by probable estimates.

General Diaz has finally triumphed in Mexico. Having failed to effect a compromise with Iglesias, he attacked the latter's forces, under command of General Antillon, in Guajuatita, on the 3d instant. Antillon was defeated, and surrendered his whole army and all his war material to General Martinez. Iglesias has asked to be allowed to retire to private life. General Quiroga, according to a proclamation made by him, signed a special order upon the 30th of Eleventh month, when he surrendered 5000 men and a large quantity of material of war to General Trevino. Quiroga retired to his home, but was soon arrested and condemned by his captors on the charge of fomenting trouble, and was shot by them according to the vindictive and barbarous usage of the country.

A special dispatch from Berlin states that negotiations have been reopened between Germany and France, and there is now a probability that Germany will reconsider her original decision, and agree to participate in the Paris Exposition in 1878.

The Government of India has forwarded a dispatch to the India-office at London, estimating the total cost to the State on account of the relief works and other measures for mitigating the famine in Madras and Bombay at £6,500,000.

Communication between Trieste and Vienna has been entirely suspended in consequence of a tremendous landslide near Steyrbach. In consequence of rock and earth have buried the railway to a depth of fifty feet for two hundred yards. The river Save was filled and has overflowed its banks in consequence of the stoppage of its waters. Two houses with families were overwhelmed and buried.

At a final meeting of the Constantinian Conference was held. S. Ivet Pacha, on behalf of Turkey, read a statement to the effect that the Porte found it impossible to accede to some of the demands made by the European Powers. Thereupon Lord Salisbury, the representative of Great Britain, declared that the conference refused the two chief guarantees demanded by the Powers, there was no longer any common basis for discussion, and the Conference therefore must be regarded at an end. Russia's representative, General Ignatiev, spoke similarly. S. Ivet Pacha justified the refusal of the Porte by the decision of the Grand Council of the empire, a numerous body composed of Christians as well as Mohammedans, who had voted unanimously against Turkey submitting to the demands of the Great Powers.

Lord Salisbury and General Ignatiev were about to leave Constantinople immediately, and the other representatives would soon follow them. It is hoped, however, that between Russia and Turkey will not commence immediately. It is intimated that soon after the closing of the conference Turkey will spontaneously offer considerable concessions, which it now refuses to yield to compulsion.

It is reported from Vienna that Servia wishes to make peace directly with the Porte, and has asked for the mediation of England to effect that purpose.

UNITED STATES.—The foreign trade of Philadelphia for the year 1876, consisted of exports \$50,552,300, and imports \$20,297,763. The imports are three and three quarter millions less than in 1875, and the exports are eighteen and a half millions more.

The number of immigrants landed at Philadelphia in the month of May was 7182. There are now 3453 taxmen and beer sebsons in this city, being an increase of 718 in eighteen months.

James G. Blaine has been elected U. S. Senator both for the short term and for that ending 3d mo. 4th, 1883. S. J. May, of Michigan, has been re-elected by the Legislature of that State, and J. M. McKim, of Nebraska. Massachusetts has elected George F. Hoar to the U. S. Senate in place of Senator Boutwell.

The House of Representatives at Washington has passed a resolution, yeas 158, nays 81, directing the Secretary of the Treasury to restore to the members of the Louisiana Returning Board for contempt of the alleged contempt consists in the Board having refused to produce certain records and papers relating to the recent Presidential election in that State.

The Senate Committee on Finance has reported back the House bill authorizing the coinage of the standard silver dollar, and restoring its legal-tender character. The bill was passed on the 4th.

The silver coin disbursed by the Treasury for redeeming fractional currency and other purposes, had amounted last week to \$26,089,181.

The director of the mint at Brussels, Belgium, has

made a proposition to coin silver for the United States government, alleging that the Belgian mint can do coinage for this country cheaper and better than its establishments.

The number of passengers from foreign ports for New York last week was 113,973 of whom 71 were aliens and 42,714 citizens or persons who had hitherto been before.

There is reason to hope that the difficult and embarrassing subject of the Presidential election will be posed of in a manner that will meet the approval of the electing portion. On the 3d inst., the Joint Committees of the two Houses of Congress, reported the draft of a law to regulate the course of the electoral vote, and to determine all disputed questions connected therewith. The report was unanimous, being signed by six members of the Senate committee of seven, and all of the House committee of seven, and all of the House committee of seven Democrats, all of whom signed the report except Senator Morton. The mode of proceeding in Congress in counting the electoral vote is first provided for, then the appointment of a commission to decide all disputed points that may arise. The commission will be composed of the Chief Justice, the Judges of the Supreme Court, selected in a mark likely to insure impartiality, and five Senators and Representatives to be chosen *visa voce* by the Houses.

The funded debt of the city of Philadelphia is \$55,025,992, beside which it has a large floating debt of \$2,000,000. The total debt is composed of \$8,300,373. The public property and assets of all kinds valued by the City Controller at \$82,500,000.

The receipts of the Patent Office for 1876 were \$7,957, and the expenditures \$612,552.

The steamer Lotus sailed from New Haven on 22nd inst. for Europe, armed and manned by the Turkish Government, value at \$1,700,000.

The whaling business of the United States is said to be slowly improving. The present whaling fleet, deducting the recent losses, is 172 vessels complete with 169 a year ago, and 163 two years ago. There also several whale ships building. Eighty whale ships are now in the North Atlantic whaling regions.

Justice Strong, of the United States Supreme Court has delivered the opinion of the Circuit Court respecting the distribution of the funds in possession of Centennial Board of Finance. It is not in favor of government's claim for the payment of \$1,500,000 on the 22d inst. The Circuit Court has ordered that the Finance shall pay and distribute the funds in its hands to and among the stockholders pro rata; and it appears that the aforesaid funds are insufficient to them the full amount invested by them, Court orders that no part of the said funds be paid to the United States Treasury.

The commission to settle the boundary dispute between Maryland and Virginia, have decided that Maryland has sovereignty over the whole Potomac river and its southern bank. That of Virginia ends at low mark on the south side of the river.

The Markets, &c.—The following were the quotations on the 22d inst. for *Philadelphia*, American gold, U. S. sixes, 1881, registered and compound, 144 1/2 do. 1868, registered and compound, 117; do. 5 per cent 10-40, 113 1/2 113; do. 4 1/2 per cent, 108. Cotton 13 1/2 a 13 1/2 for uplands and New Orleans. Extra, 5 a \$8.50; finer brands, \$6 a \$9.75. Pennsylvania red, \$1.50; Ohio, \$1.45; amber, \$1.50. Sugar, 100 lb, \$8.50; Java, \$8.50. Coffee sold at 6 7/8 per lb. gross, for extra; 5 1/2 for fair to good and 4 1/4 for common. Sheep, 4 1/4 63 per gross, and hogs at 9 1/2 101 cts. per lb. net for fat choice, and 8 9 cts for common. *New York*.—Sugars, fine loaf, \$5.70 a \$6.05; extra, \$9.40 a \$9.65. Coffee, 100 lb, \$8.50. Java, \$8.50. Coffee sold at 6 7/8 per lb. gross, for extra; 5 1/2 for fair to good and 4 1/4 for common. Sheep, 4 1/4 63 per gross, and hogs at 9 1/2 101 cts. per lb. net for fat choice, and 8 9 cts for common. *Chicago*.—Extra flour, 26 a \$8.00; patent process, 27.25 a 29. No. 2 spring wheat, \$1.31; No. 3 do., \$1.16 a \$1.14. *London*, 10 1/2 cts.

From "Seward's Travels Around the World."

Visit of William H. Seward to the Maharajah of Putteeala, in India.

[Putteeala is a Principality in the extreme northern part of Hindostan.]

Immediately after our arrival at Umballa, native gentleman presented himself to Major Pugh, and, announcing himself as "canal agent" for the Maharajah of Putteeala, asked to be presented to Mr. Seward. Before the latter had time to answer, a second native appeared, and, declaring himself to be the Maharajah's "Minister of Justice," asked to be introduced. They were admitted, and each presented a letter of invitation from the Maharajah of Putteeala, tendering us the hospitality of his state, elegantly written in Arabic on gilt paper, the envelop being a bag of the finest kineeb. The bag, as well as the notes, was perfumed with attar of roses. The bag was tied with a silken cord, on which was suspended the great waxen seal (weighing but nine ounces) of the kingdom, principality, or state, of Putteeala. Yesterday, at five o'clock, a. m., we proceeded in four carriages, each drawn by four horses, which the prince had sent to convey us to his capital. We were attended by his two messengers, the *mustee* (canal agent) and the minister of justice, a large military escort, and many servants, Captain Horsford, of the British civil service, accompanied us. At stages of one mile each, mounted sentinels first saluted us, and then joined our escort. The maharajah's high civil officers wore the finest of white India muslin turbans and robes, and his soldiers were arrayed in green, gold, and scarlet, as brightly as the birds of India.

The Emperor Akbar and his successors made excellent roads, and at convenient stages built caravanserais for the security and rest of travellers. These host-tries, each of which is a fortification, are still well preserved. We stopped at the half-way caravanserai, and were met there by a large deputation of the maharajah's household, in dainty costumes, similar to those worn by his messengers. These deputies, surrounded by sixty or seventy servants, tendered us congratulations, in the name of his highness, on our safe arrival, and far on our journey. Each individual member of these delegations presented to each one of us, on a massive silver salver, covered with a white napkin, a half dozen silver coins, and a fresh bouquet. As instructed, we touched these coins as acknowledgment of mutual

friendship, and retained the flowers. This ceremony was followed by a profuse supply of delicate refreshments. In the midst of these attentions, a telegram from Putteeala announcing that the British Ministers of Finance and Foreign Affairs for the district of Punjab were just leaving the town, and would desire to pay their respects to Mr. Seward when they should meet him. When we had gone a few miles on our way, those distinguished personages, with their families, came rolling along in four four-horse carriages, and an escort—both the equipages and guard having been furnished by the maharajah, and being exactly on the same magnificent scale as those by which we were conducted. Greetings were exchanged, and a cordial invitation was given to Mr. Seward to extend his journey to Lahore, the capital of the Punjab.

Putteeala the capital of the province or native principality of the same name, is protected by a citadel as spacious, though not so substantially or scientifically constructed, as Fort Hamilton. Fortifications in India seem to have been built as retreats or places of safety for the sovereign or his family. The mother of the present prince resides in the citadel of Putteeala. Arriving at its gate, we came to a halt, and we saw through a cloud of dust the maharajah coming toward us in a magnificent state coach drawn by six white horses; the highway, on either side, was lined with outriders and a squadron of cavalry. The prince, driving by the side of our carriage, saluted Mr. Seward with stately cordiality. When the compliments were ended, the maharajah asked Mr. Seward in which manner he would prefer to make his entrance into the capital; whether he would go with him in his coach, or whether he would be pleased to make his entrance on the back of an elephant. Mr. Seward, diffident perhaps of his skill in the latter mode of travel, or acting under a conviction that modesty best becomes a visitor, accepted the offer of a seat in the coach. The maharajah, taking his seat at Mr. Seward's left, made a rapid advance toward the city. The ladies, like Mr. Seward, being complimented with the same choice of manner of entering the city, decided like Mr. Seward in favor of a comfortable coach and six. Hereupon a halt and parley ensued between Captain Horsford and the prince's master of ceremonies. In the course of this debate, it appeared that, while the prince excused Mr. Seward's declination of the honor of the elephant on the ground of his years, the ladies, who could offer no such plea, would give offence by claiming the same indulgence. Sixty elephants stood by the road side, richly caparisoned in cloths of gold and scarlet, all ornamented with gilt earrings and necklaces. There was no more to be said on that question. The elephants knelt, silver ladders were placed against their sides, and, in less time than it takes to describe the action, the two ladies, not venturing to ride alone, were

seated together with Captain Horsford, in the spacious gilded and velvet howdah. The elephant arose with a motion like that of the surge on the coast of Madras, and the ladies found themselves in the upper air. The Hindoo driver sits on the elephant's head, and directs his motions by the use of an iron spike, which he thrusts against the skin on either side of the forehead. A procession was then formed. First, the maharajah with Mr. Seward; then the ladies; next, our three servants, Jeanie, Price, and Freeman; next, the *mustee*; next, the Minister of Justice, mounted in the same manner, and behind them the long train of elephants without any riders, and the five hundred richly caparisoned horses, led by as many grooms no less gayly dressed. As a signal for the progress to begin, the air was rent by a salvo of nineteen guns; the salute was repeated by a fusillade from what seemed endless ranks of infantry, bugles sounded a march, and the cavalry moved to the front. Four bands of music wheeled into column, playing more or less together, "God save the Queen!" Behind them a company of fifty bagpipers, playing not altogether, as they fell into line, "Bonnie Dundee." At the moment of the cannonade the led horses kicked, pranced, and reared; the elephants uttered piteous, deep, indescribable cries, and tried to prick up their enormous jewelled ears, remaining otherwise quiet; crowds on the wayside shouted applause, and children screamed with delight. As for Mr. Seward, he, fortunate gentleman, snugly seated by the maharajah on velvet cushions, in the coach drawn by six well-trained animals, was unconscious of the disturbance which had arisen behind him. His inexperienced and more venturesome companions clung to each other in fright—but order was restored, and all were reassured. On the way to his capital, the maharajah addressed to Mr. Seward a studied speech of welcome. Taking care to express his regret that his guest had not accepted the elephant, the prince said that the troops we had passed in review were ten thousand in number. He also explained to Mr. Seward that, when he came to the throne, he found no streets in Putteeala wide enough for such a pageant as he had occasion to make, and that he had, therefore, enlarged the streets, but not without making due compensation to the owners of adjacent property. Night came on as we reached the gates. We looked from our howdahs upon the flat roofs of the dwellings and shops below us. Their inmates were gathered at the doors in gay dresses, and seemed as diminutive as the barghans of Liliuput. Thus we passed through the entire city, and reached, beyond the farther gate, an esplanade used as a *Campus Martius*. Winding around a tall flag staff, under the folds of what is called the sacred banner, we stopped before a lofty Sarcenic gate. Here, the maharajah, with Mr. Seward, alighted, and the elephant-riders dismounted. The prince led the way on a

gravelled walk, by the side of successive fountains, in an orange and lemon garden, as it seemed, of boundless extent. Each fountain poured over a cascade into the next. These cascades were illuminated by torch-lights from behind, which imparted to the jets all the hues of the rainbow. We stopped at the porch of a small Saracenic palace. The prince, taking Mr. Seward by the hand, led him up a gentle flight of steps, across a veranda, into a *saloon* which may be eighty by forty feet, and thirty feet high, the ceiling supported by a double row of columns, and the walls draped with orange and scarlet silks. "This palace," said the maharajah, "is yours; 'tis the hall in which you will sit, these apartments on either side of it are the rooms in which you will sleep. You must be weary with your journey. I beg to take my leave for the night. I shall have the honor to visit you to-morrow morning."

The ladies were not slow in exploring the cosy little palace. Its lights, furniture, and ornamentation are an Oriental exaggeration of the European style. The welcome dinner, though prepared by a French hand, and graced with the best wines of France, Germany, and Portugal, was served by Hindoos, who, dressed in flowing white gowns, glided noiselessly in bare feet over the velvet carpet. It was evident, as he himself said, that the Prince of Puttecala is not like those "people" whom we see in Calcutta. As for the ladies, they expressed a doubt whether the story of Aladdin is indeed a fiction.

(To be continued.)

For "The Friend,"

Richard Shackleton.

(Continued from page 182.)
R. S. to Joseph Jacob.

"Ballitore, 14th of Second month, 1770.

"Dear Friend and Cousin,

* * * * * "It is my belief that if we, and our beloved companions, true helpmeets, be favored to keep our dwelling in the Truth, we shall more and more be confederated together in solemn league and covenant, and in united travail and laborious service. When I write to thee, I know not how to divide thee from thy wife. My dear friends, be patient, be diligent in spirit; keep as much as possible out of the hurries and flutters which attend the busy, active life, and whatever ye omit, omit not to keep up the daily sacrifice. And as ye thus follow on to know the Lord, and wait from season to season to feel his hand upon you, ye will be dipped into a state of tribulation and sympathy with the oppressed cause of our Great Head and Master, Jesus Christ, and ye will be made partakers of his sufferings. Shrink not, my beloved companions, at these bitter cups and baptisms; if ye deny him not when he is persecuted and reviled, if ye accompany him with fidelity to his place of suffering; ye will in due time be made living and joyful witnesses of his resurrection in life and power. I am troubled in my measure at the situation of things amongst us; there are so few living witnesses of the Truth which they are educated to profess, there are so many who have indeed been called visited; but for want of care and diligence on their parts to co-operate with that Power, which would make and keep their hearts as the good ground, the seed of the kingdom is variously rendered fruitless and abortive, and there is not a coming forth in

increase of strength, and answering the glorious designs of the Great Husbandman.

It occurs to me just now as I write (without previous thought) that when I was last in your province, I heard some talk of losing you, my dear friends, to sit in the Select Meetings. I know the diffidence and low opinion which ye have respecting yourselves, which might sway you to decline this office, and that you are too generous and sincere to make the reply *Nolo Episcopari*, in a formal customary manner. But take heed, dear friends, how ye resist the call of the church. Not only the Spirit saith, "Come," but the bride saith, "Come," and the imposition of her hands, when guided by the Spirit, is of great weight and force. Give up in the simplicity of your hearts to what she requires; look not about at others; nor think what others may say; but be willing to become yet more vile, both in your own eyes and theirs. Humility is the only way to true honor, and if ever we come to be effectually serviceable in the Lord's hand, we must be reduced very low indeed, and self become of little reputation.

Many well disposed persons (I fear) suffer loss, both to their own states and capacity for service, by being too backward, not putting their hand to a little business in the family, which is obviously necessary to be done; not caring to make themselves particularly distinguished and exposed to observation; but waiting for some other person more advanced in years, or more conversant in these matters, to do it. But, perhaps, this is thy own business, not another's; and why should thou grudge thy little assistance? Thou knowest not what encouragement thy stepping forward in thy rank might be to others, and how acceptable in the sight of the Master, by whom actions are weighed. Neither canst thou be certain what detriment may not accrue from this little piece of service being left undone, or improperly done, through thy omission; and from the general weakness suffered by one person falling back out of the rank, bringing discouragement upon others, and disorder on the whole.

Thine sincerely,

R. S."

Richard Shackleton thus again writes to his cousin Joseph Jacob:

"Ballitore, 19th of Second month, 1772.

"My Dear Cousin, * * * If the great Apostle witnessed bonds and afflictions to bedevil him everywhere, well may we expect to be at times bound in spirit, and not to feel that enlargedness which we at other times may experience. It is a day of general famine in our land, and I believe the very best suffer want. What have we then to do, but to possess our souls in patience, watching unto prayer, and a capacity to breathe in secret that Almighty help may be near us, and preserve us in the root alive in our affections to Him, and faithful to His cause, though little fruit may appear on our branches?"

Ye have at home your family of innocent children. I doubt not but ye sit down at times of an evening with them, feeling after the blessing which makes truly rich, and, at times, select such portions of Holy Writ, or such historical accounts of the labors and sufferings of our ancient Friends, as are suited to the capacities of children. In this exercise, your minds being gathered to the gift of God in yourselves, I trust ye find a degree of peace and satisfaction. And if we stand devoted

and resigned in all our faculties to do the will of our Creator, made known to us by the revelation of his Spirit, we shall surely be acceptable of him, though we may appear contemptible in our own eyes, and even in the eyes of others.

I am, my dear friend, thine sincerely,

R. S."

(To be continued.)

Selected for "The Friend."

"The Pursuit of Trade and Business." From Advice of Philadelphia Yearly Meeting.

It being evident, that where the manifestations and restraints of the Spirit of Truth are duly prized and regarded, it leads out of bondage to the spirit of this world, and preserves the minds of its followers from man fettering and disqualifying entanglements, and contrary wise, that an inordinate love and pursuit of worldly riches often betrays those who are captivated by them into many difficulties and dangers, to the great obstruction of the work of Truth in the heart; we affectionately desire that the counsel and gracious promise of our blessed Redeemer to his followers may be borne in remembrance by us: "Seek ye first the kingdom of God and his righteousness, and all these things shall be added unto you."

This meeting being earnestly concerned for the service of our religious Society may not be obstructed, or its reputation dishonored by any imprudence of its members in their worldly engagements, recommends to all, that they be careful not to venture upon such business as they do not well understand, nor to launch out in trade beyond their abilities, and at the risk of others; especially on the credit which may be derived from a profession of the Truth; but that they bound their engagements by their means; and when they enter into contracts, or give their words, that the endeavor on all occasions strictly to fall them.

We particularly exhort, that none engage in such concerns as depend on the often deceptive probabilities of hazardous enterprises; but rather content themselves with such plain and moderate way of living, as is consistent with the self-denying principle we make profession of; whereby many disappointments and grievous perplexities may be avoided, and that tranquillity of mind obtained, which is inseparable from the right enjoyment even of temporal things; and it is advised that where any among us err, or are in danger of erring in these respects, they be faithfully and timely admonished.

Our worthy ancestors having their eye directed towards an enduring inheritance, and their affections placed upon things above sought not after greatness in this world, but passed the time of their sojourning here in fear and in great simplicity of heart, endeavoring thereby to reach the Divine Witness in every mind, and to promote the love of truth and righteousness amongst mankind. In minds thus bent upon seeking a more glorious inheritance than the accumulation of worldly possessions, a concern is maintained to hold forth an example of temperance, justice, and truth; but where a defection from this simplicity of heart and heavenly mindedness hath prevailed, it hath led into the love and pursuit of this fading world, produced the fruits of pride and ambition, and occasioned many wants which our predecessors were pre-

ered from; and to satisfy these wants, some have been excited to enter into a larger extension of trade and commerce, than they had skill and ability to conduct. Ambition and emulation leading into higher living and greater expenses than their income would admit, their circumstances thus becoming reduced, and being unwilling to lessen their appearance in the world, indirect means to procure a temporary support have been used, which has ended in failures and bankruptcies, due submission to the cross of Christ would have timely prevented this reproach brought on individuals, and trouble on their friends; and it would also lead those under wasting and deficient circumstances, rather to give up their effects in due time, than to go on enlarging their debts by disreputable artifices, until they are stopped by unavoidable necessity. I plunged at once into ruin, sorrow and disgrace; with the painful addition of bringing to their just creditors into grievous inconveniences, and some into great danger of sinking with them in the wreck of their affairs.

The love of the world is the cause of many variations. In some it discovers itself in a desire to be rich and great, whilst in others a worldly spirit is as clearly discerned, though the attention seems to be occupied in smaller concerns; and though we are clear at very extensive ones are often in themselves great evils, yet the trafficker in hundreds, unless the eye be kept single, may be much buried in the earth as the trafficker in thousands.

We are not about to condemn industry, which we believe to be not only praiseworthy, but indispensable. It is the inordinate desire of the mind after worldly things, and the engrossment of the time and attention, from which we desire that all our dear Friends may be redeemed.

It is recommended that Friends frequently inspect the state of their affairs, and keep their accounts so clear and accurate, that they may any time easily know whether they live within the bounds of their circumstances, or not; and in case of death, that these may not perplexing to survivors. And whenever we find that they have no more property left than is sufficient to discharge their just debts, it is advised, that they immediately consult some judicious Friends, and without loss of time make their circumstances known to their creditors, carefully avoiding the payment of one in preference to another, that so none may be injured, nor any reproach be incurred by mismanagement.

Advised, that when Friends accept the office of trustee or assignee, they be active in collecting the effects of the estate, and punctual and speedy in making distribution.

Advised, that Friends everywhere carefully avoid being any way concerned in defrauding a government of its duties; that so our great testimony in this respect may be invariably maintained.

We warn our members against a pernicious practice amongst the trading part of the community, which has often issued in the ruin of those concerned therein, viz: that of raising and circulating a kind of paper credit, with engagements to give it an appearance of value, without an intrinsic reality,—a practice which, it appears to be inconsistent with the Truth we profess, we declare our disapprobation of, and treat every member of our Society to avoid and discourage it. We also caution all

in membership with us, to avoid entering into joint securities with others, under the specious plea of rendering acts of kindness; many, by so doing, having been suddenly ruined, and their innocent wives and children reduced to deplorable circumstances.

"Be not thou," said the wise man, "one of them that strike hands, or of them that are sureties for debts. If thou hast nothing to pay, why should he take away thy bed from under thee?"

(To be concluded.)

For "The Friend."

The Theatre, and its effects on Actors.

Fanny Kemble, whose former celebrity and experience as a delineator of the drama, entitles her opinion to respect on such subjects; in a sketch of her autobiography contributed to the *Atlantic Monthly*, describing her first appearance on the stage, which was made for the purpose of retrieving the decayed fortunes of her family, thus writes:—"So my life was determined, and I devoted myself to an avocation which I never liked or honored, and about the very nature of which I have never been able to come to any decided opinion. It is in vain that the undoubted specific gifts of great actors and actresses suggest that all gifts are given for rightful exercise; in vain that Shakespeare's plays urge the imperative claim to the most perfect illustration they can receive from his-trionic interpretation: a business which is incessant excitement and factitious emotion, seems to me unworthy of a man; a business which is public exhibition is unworthy of a woman." "I never presented myself before an audience without a shrinking feeling of reluctance, or withdrew from their presence without thinking the excitement I had undergone unhealthy, and the personal exhibition odious." She adds, after quoting a letter she wrote to a friend immediately after her debut at Drury Lane, that she does not know whence she derived the deep impression expressed in that letter of the moral dangers of the life upon which she was entering. It was certainly not from her parents, she says, who were not troubled with a perception of the moral evils of their calling. "I had never heard the nature of it discussed, and was absolutely without experience of it; but the rapid vacuity of the last years of my aunt Siddons' life had made a profound impression upon me—her apparent deafness and indifference to everything, which I attributed (unjustly, perhaps) less to her advanced age than to what I supposed the withering and drying influence of the over-stimulating atmosphere of emotion, excitement, and admiration in which she had passed her life; certain it is that such was my dread of the effect of my profession upon me, that I added an earnest petition to my daily prayers that I might be defended from the evil influence I feared it might exercise upon me."

The Roman Pharos in Dover Castle.—There is still standing within the walls of the castle at Dover, England, an old Roman pharos. The antiquity of this light-house, which has probably not been used as such since the Norman conquest, no doubt exceeds that of any light-house in Great Britain, it having been built, as is supposed, about A. D. 41. Upon it burned for many centuries great fires of wood or coal, the modern system of lamps and reflectors having superseded coal fires during

the last century. This pharos, like the one at Boulogne, is built of bricks, in color and shape like those found elsewhere in the Roman structures of Great Britain. They are of a light red color, about fourteen inches long, and not more than an inch and a half thick. The mortar joints are of nearly the same thickness. The preservation of this famous relic is doubtless due to the fact that some centuries ago the tower was turned into a belfry, and was surrounded by walls of stone. The latter are now nearly destroyed by time, and the old remaining tower is again exposed. —*Elliot's European Light-house System*, p. 75.

For "The Friend"

Spiritual Guidance.

Some remarks are subjoined, made by Theodore Monod, a Pastor in one of the Protestant churches in France, at a religious meeting lately held in Dublin, respecting the difference between what is called "Christian Work," being done in the natural will and wisdom of man, or under the direction and will of the good Shepherd, who said that "When He putteth forth His own sheep, He goeth before them and the sheep follow Him, for they know His voice." They are in remarkable accordance with the views held by Friends on the subject, and are encouraging as coming from a land where Papacy and ritualism hold so much sway:

"Why is it that a great deal of what we call work amounts to so very little—and yet it is conscientious work, hard work, with plenty of judicious organization? Because we have not been careful enough to inquire whether that particular work, at that particular time, and through these particular men, was the will of God. Because we have put our own wisdom first and foremost; because we have said, 'This seems to us to be good, and we are going to organize and do it.' Christ says, 'Every plant that My heavenly Father hath not planted shall be rooted up.' The Lord's work can only be done in a prayerful, childlike spirit, letting God go before; asking Him not only in the abstract, and generally, whether this or that is good, but whether this is the work that He calls us to do, and to do now. When we have our answer, and do that work—His work, His will—oh, it is living work, it is abiding work! It is a plant that the Father has planted; and there is not one of His plants that comes to nothing, whether the fruit appears early or late.

"Now, do you not think that we are as a Christian Church, called upon to do the very thing which an individual is called upon to do? That is to put our whole work into the hands of God, and to ask Him honestly, 'Shall I go on with this? Is this Thy work? Is it being done in Thy Spirit? Is there anything to alter in it, or in the way of doing it?' Then we may expect the answer; we will be sure to get it. Then all our work will be true work,—not only a work but a fruit, a fruit of the Spirit, a fruit bearing seed according to its kind, that shall go on bearing fruit forever.

"The difficulty is this: We are loth to believe, at any rate we are slow to believe that God does guide every believing, trusting soul. Practically, I think, many of us believe this: that there are certain great principles in the Bible to which we must conform our life, and then, in the light of these principles, we must

do the best we can. Read the Acts of the Apostles, and see if that was the way they lived. That will be sufficient answer. They were guided by the Holy Spirit, and not only the apostles, but the other disciples—Philip, the deacon, for instance, and others. They were under the guidance of the Holy Spirit in the smallest things, and in all things. It was God who told them, Go here, or Go there, and they were always in His hand, listening to His voice.

"Do you say that this borders on mysticism? I will tell you what it borders on. It borders on these words of Christ: 'My sheep hear my voice and they follow Me, and they follow none other voice, because every other voice is a stranger's voice to them. Do you know what this means? Do we begin to know it—that Christ really leads His people continually? Do you think, then, that God guides us less on some days, and that He guides us more on other days? That He calls some things great, and needing His guidance, and other things small, where our own light will suffice? Everything is small to Him, and everything is great to us. Or, if you please to put it otherwise, nothing is small that is the will of God, and nothing is great—so great that we cannot do it—if it is the will of God. Oh, for a band of Christian men and women, who, every morning, have but one prayer on their lips, one desire in their inmost souls,—to do the will of God."

The Power of the Electric Light.—The most powerful artificial light at present in existence is that employed for the great lighthouse at Souter Point, on the coast of England, near the mouth of the Tyne.

On both banks of this river there is an immense number of manufactories of all kinds, the smoke from which, under the influence of the west wind, seriously obstructs the approaches from the sea. Fogs at this part of the coast are also frequent; and the problem of light house illumination required that such light should be secured as would penetrate through any slight fog or haze, it having been generally acknowledged that not even the sunlight itself can penetrate an ordinary dense fog. The electric light established at Souter Point after condensation is equal in power to 800,000 standard candles, being eight times as powerful as the best American fixed lights. The electric spark passes between slender pencils of carbon, which are themselves consumed at the rate of about one inch per hour. The electric current is generated by two of Professor Holmes's patent rotary magneto-electric machines, driven by steam-engines of six horse-power. The number of revolutions made by each machine is 400 per minute, and 12,500 sparks pass per minute when both machines are at work. These sparks are, of course, formed so rapidly that the eye does not separate them, and the result is an intense beam of light, so dazzling that the eye of a person within the lantern can not rest upon them for an instant without intense pain. As observed from a distance of several miles, this light is so bright as to cast a well-defined shadow upon the deck of a vessel.—*Elliot's European Light-house System*, p. 120.

This is a day of peculiar desire to run into fashions and customs; but let all guard their precious charge; great accountability lies at the door of parents.

THE GOLDEN SUNSET.

The golden sea its mirror spreads
Beneath the golden skies,
And but a narrow strip between
Of land and shadow lies.

The rocklike clouds, the cloudlike rocks
Dissolved in glory float,
And midway of the radiant flood
Hangs silently the boat.

The sea but seems another sky,
The sky a sea as well;
And which is earth, and which is heaven
The eye can scarcely tell.

So when from us life's evening hour
Slow fading shall descend,
May glory born of earth and heaven
The earth and heaven blend.

Flooded with peace the parting soul
With silent rapture glow—
Till where earth ends, and heaven begins
The spirit scarce can know.

—Samuel Longfellow.

SUCCESS.

I thank Thee, O my Lord!
Not utterly in vain my hands have wrought,
Not unaccepted their poor offering brought,
I have not wasted time and strength and thought
On work of thine, nor wept and prayed for naught,
I thank Thee, O my Lord!

Thank God, not all in vain!
My confidence had almost worn away,
As I had watched and waited day by day,
And years passed, lighted by hope's falling ray
As still I knelt, the self-same prayer to pray
Thank God, not all in vain.

Great Giver of all good!
Thou gavest me the boon I sought, success
In long endeavors darkened souls to bless,
To lighten hearts weighed down by deep distress,
To lead them up to Thee and happiness,
Thou Giver of all good!

I thank Thee, O my Lord,
That thou these loved and longed-for friends of mine
Rejoice in glorious hope and peace divine,
How glad we journey on in ways of thine,
For ever lighted by thy smile benign,
O Thou most gracious Lord!

Thy smile can brighten all,
Still let me trust when round me glooms the night,
And never doubt thy wisdom, love, and might,
In thine own time, which evermore is right,
Through breaking clouds will dawn thy blessed light,
That smile which brightens all.

—M. E. Atkinson.

Sentiments of various writers in Reference to War.

(Concluded from page 189.)

"Christianity forbids war in all cases."—*Charles Sumner.*

"War is utterly and irreconcilably inconsistent with true greatness. Thus far mankind has worshipped, in military glory, an idol, compared with which the colossal images of ancient Babylon or modern Hindostan are but toys; and we, in this blessed day of light, in this blessed land of freedom, are among the idolaters."—*Charles Sumner.*

"War of every description is shown to be contrary to the laws of Christ; inconsistent with the Christian character; incompatible with the highest good of nations; and entirely unnecessary and unreasonable."—*Letters to Governor Strong of Massachusetts.*

"Has not the system of war been sufficiently proved to show its destructive and disgraceful nature? What miseries does not mark its progress? What vices does not follow in its train?"

* * * It is time the earth had rest from the commotions of war. It is time we began to teach our children, that they are born for

selected.

other and nobler purposes than shedding by man blood."—*From Letters to Gov. Strong.*
